(6) *Their separation from the mass of the people, their distinctive 'Pharisaism.'* On all the above-mentioned points the Pharisees simply held what was common to later orthodox Judaism. But all our sources present them to us as a distinct party within the people, an *ecclesiola in ecclesia.*[†] This is implied also in the name that they bore. The name, Φαρισαῖοι, is derived from the Aramaic פְּרִישִׁין, *stat. emphat.* פְּרִישַׁיָּא, and denotes 'the separated ones.' Whether this name was given them by their adversaries (Schürer, Montet, Edersheim) or adopted by themselves,[‡] it connoted something more specific than the separation from the Gentiles, which, since the time of Ezra and Nehemiah, was characteristic of all who would be genuine Jews. It referred to their separation from the great mass of even their orthodox fellow-countrymen. The latter, however willing, were unable to observe strictly the minute prescriptions of the law as to foods and levitical purity; they were consequently unclean in the eyes of the Pharisees, who, in order to avoid all risk of being defiled, held aloof, as far as possible, from all intercourse with them. '*Parush* is one who separates himself from all uncleanness and from unclean food and from the people of the land, who are not scrupulous in the matter of food' (Nathan ben Jechiel). The Pharisees were thus the Separatists or Purists. The name, however, that they gave themselves was *ḥăbērîm* (חֲבֵרִים 'associates'), a name which also shows that they formed among themselves a close fellowship. A *ḥābēr* is one who, whether learned or unlearned, scrupulously observes the law, written and oral, more especially in respect of levitical purity, tithes, and all other religious dues. According to the OT view each Israelite was the *ḥābēr* (רֵעַ) of the other; the Pharisee acknowledged as his *ḥābēr* only him who scrupulously observed the law. These scrupulous observers of the law, and these alone, were the *ḥăbērîm*, the genuine Israelites. The rest of the people were simply the *'am hā-'āreẓ*, the people of the land, common persons, the vulgar herd. In the Books of Ezr ($9^{1f.}$ $10^{2.11}$) and Neh (10^{28-31}) this name was given to the heathen and half-heathen inhabitants of Palestine as distinguished from the Jews; as used by the Pharisees, it designated the mass of the people as distinguished from themselves, the real Israelites, the Israel according to the spirit.[§]

They were naturally unable to separate themselves entirely from 'the people of the land,' and had therefore to draw up precise rules regulating their intercourse with them. 'The full *ḥābēr* undertook not to sell to an *'am hā-'ārez* any fluid or dry substance (nutriment or fruit), not to buy from him any such fluid, nor to entertain him as a guest in his own clothes (on account of their possible impurity)' (Edersheim, i. 312). Hillel 'used to say, No boor is a sinfearer; nor is the vulgar [an *'am hā-'ārez*] pious' (*Aboth*, ii. 6); cf. Jn 7^{49}: 'this multitude which knoweth not the law are accursed'; also the fault found with our Saviour on account of His free intercourse with publicans and 'sinners,' Mt 9^{9-13}, Mk 2^{14-17}, Lk 5^{27-32} 7^{36-50}.

---

[*] See Ryle and James, *op. cit.* lii. ff.; Hühn, *Die messianischen Weissagungen des israelitisch-jüdischen Volkes*, 91 ff.

[*] See Sir 11^{14}: 'Good things and evil, life and death, poverty and riches are from the Lord' (cf. 33^{7-15}); $15^{11ff.}$: 'Say not thou, It is through the Lord that I fell . . ., it is He that caused me to err . . . (The Lord) left man in the hand of his own counsel. If thou wilt, thou shalt keep the commandments; and to perform faithfulness is of thine own good pleasure. He hath set fire and water before thee; thou shalt stretch forth thy hand unto whichsoever thou wilt. Before man is life and death; and whichsoever he liketh, it shall be given him.'

[†] According to Josephus (*Ant.* XVII. ii. 4) they numbered above 6000 in the time of Herod.

[‡] Wellhausen (*op. cit.* 289) says it was a title of honour and called attention, not so much to their separation, as to their eminent piety.

[§] The above paragraph summarizes Schürer, *GJV*³ ii. 396–403, a very full and lucid account of the matter; cf. also Weber, *Jüdische Theologie*, etc., 42–46; Edersheim, i. 311 f. Schürer remarks that the question, Who is my neighbour? (Lk 10^{29}), was a very important question to a Jew. The *ḥābēr* of a Rabbi was a Rabbi; the *ḥābēr* of a priest was a priest; the *ḥābēr* of an Israelite was an Israelite.

Notwithstanding the fact that they thus separated themselves from the mass of the people, they were not a religious 'sect' (Ac 15^5 26^5) in the strict sense of the term. Neither in worship nor doctrine did they separate themselves from the Jewish community at large. 'Hillel said, Separate not thyself from the congregation' (*Aboth*, ii. 5). They worshipped in the temple and the synagogue along with their fellow-countrymen, and the views they held as to the law, the resurrection of the body, etc., were by no means peculiar to themselves. They were, indeed, in all respects 'the classical representatives of post-exilic Judaism, (Schürer, *GJV*^{3} ii. 403 [*HJP* II. ii. 25]).

While their separation from the *'am hā-'ārez* shows that the Pharisees were far from being democrats, they were nevertheless, at least ultimately, the popular and most influential party. They had more influence with the multitude than even the king and the high priest (XIII. x. 5, XVII. ii. 4); they had the multitude on their side (XIII. x. 6), so that the Sadducee officials had to act according to their principles (XVIII. i. 4). Even in Roman times, when the high priest was still the head of the Sanhedrin, and the Sadducees had probably the most votes, the Pharisees were the real rulers in respect of legal matters. They had influence especially with women, *e.g.* Alexandra Salome and the female members of Herod's household (XVII. ii. 4). They were also, according to the Gospels, the real leaders of the opposition to our Lord. Several reasons contributed to their popularity. They had more regard to the public than the Sadducees (*BJ* II. viii. 14); they were milder as judges (*Ant.* XIII. x. 6, XX. ix. 1); they shared, and indeed nourished, the national hatred against the Romans; the doctrines they held and taught, their scrupulous observance of the law, and their outwardly strict and severe manner of life caused them to be revered as pattern Israelites (XVIII. i. 3). That they courted this popularity, we learn, not only from the Gospels, but also from such sayings in the *Pirke Aboth* as 'Let thy house be opened wide; and let the needy be thy household' (i. 5); 'Receive every man with a pleasant expression of countenance' (i. 16); and Hillel's saying (quoted above), 'Separate not thyself from the congregation' (ii. 5).

(7) *The Pharisees and the supremacy of the Gentiles.* Though the Pharisees were not a political party, it is unjust to represent them as unpatriotic. Their patriotism, however, was 'religious patriotism' (Cheyne). Their ideal was the kingdom of David. What they desired was not the setting up of a merely independent secular kingdom of Israel, but an Israel reconstituted by means of the law, an Israel over which God reigned in the person of His vicegerent, and from which all 'sinners' were excluded. For the setting up of this Jewish nationality they looked, not to the adoption of political methods, but to a direct interposition of God; the great means whereby they could prepare the way for this Divine interposition was the strict carrying out of the law. So long as this was permitted, they could tolerate even a foreign yoke, as being a Divine punishment for the people's sins; only when this was not permitted, or when their principles were flagrantly outraged, did they resist with force, as in the time of Alexander Jannæus and towards the close of Herod's reign (cf. the Hasidæans in the time of Antiochus Epiphanes). Their use of political means to further their religious ends during the reign of Alexandra Salome shows that they were by no means consistent in the application of their religious principle.

A fairly correct idea of their attitude to the foreign domination may be formed from the Psalms of Solomon. The Lord, who is 'King over the heavens and judgeth kings and rulers' ($2^{34.\ 36}$), is 'our King' (5^{22}), He is 'our King henceforth and even for evermore' ($17^{1.\ 51}$); He is the King of the expected Messiah (v.^{38}). Because of the people's sins, He has meanwhile given them up to a foreign yoke. In $17^{5.\ 6}$ ('Thou, O Lord, didst choose David to be king over Israel, and didst swear unto him touching his seed for ever, that his kingdom should not fail before Thee. But when we sinned, sinners rose up against us; they fell upon us and thrust us out: even they, to whom Thou madest no promise, took away our place with violence'), the allusion is probably to the usurpation of the high priesthood and kingship by the Hasmonæans; but the psalmist writes in the same strain of the overthrow of Jerusalem by the Romans. God not only did not prevent Pompey from casting down fenced walls with a battering-ram (2^1), but it was He that brought the Gentiles upon Jerusalem (2^{24} 8^{16}). God's righteousness was manifest in these judgments (2^{16} $8^{7.\ 31}$); they were a judging of Israel with chastening (8^{32}; 18^4 'Thy chastening is upon us as upon a firstborn son only-begotten'). Still the psalmist does not conceive this foreign domination as lasting. He looks forward with confidence to a restoration of Israel under the divinely raised up, but human, Messiah ($17^{35\text{f.}}$), who puts no confidence in any carnal weapon (v.^{37}), suffers no wicked person or stranger to dwell any more among the people (vv.$^{29.\ 31}$), nor any iniquity to be in their midst (vv.$^{29.\ 36}$), and judges the nations and the peoples with the wisdom of his righteousness (v.^{31}). 'Blessed are they that shall be born in those days' (17^{50} 18^7); but the present generation must wait God's appointed time (7^9); they must pray for its speedy advent ($17^{23-25.\ 51}$), and be prepared for it by a Divine cleansing (18^6: 'The Lord cleanse Israel for the day, when He shall have mercy upon them and shall bless them; even for the day of His appointing, when He shall bring back His anointed').

This was undoubtedly the attitude of the Pharisees generally to the Gentile rule. Such rule was meanwhile to be tolerated, as being a Divine chastisement (the standpoint of Pollio and Sameas, *Ant.* XIV. ix. 4, XV. i. 1); but it was nevertheless a violation of God's sovereignty over the elect people. God alone was king of Israel; there could be no lawful king of Israel, save God's vicegerent, the 'son of David.' In accordance with this principle they were opposed to the Hasmonæan princes (who were neither descendants of David nor of the legitimate high priestly family) and abhorred the rule of Herod and the Romans. To the former the majority of them refused the oath of allegiance (*Ant.* XV. x. 4, XVII. ii. 4); and they questioned the lawfulness of paying taxes to the latter (Mt $22^{17\text{ff.}}$, Mk $12^{14\text{ff.}}$, Lk $20^{22\text{ff.}}$). They thus by their teaching and practice fanned the flame of national hostility to the Romans, and were indirectly responsible for the rebellion against Rome. Josephus is anxious to separate the Zealots entirely from the Pharisees (in *Ant.* XVIII. i. 1. 6 he calls them a fourth philosophic sect), and draws attention to the fact that some leading Pharisees did not approve of their excesses (*BJ* IV. iii. 9); but he is forced to admit that it was a Pharisee, named Zadok, who along with Judas Galilæus formed that party, and that the notions they held were those of the Pharisees (*Ant.* XVIII. i. 1. 6, cf. *BJ* II. viii. 1). The Zealots were the party of political action, and simply carried out the Pharisaic principles to their logical conclusion.

iii. THE PHARISEES AND JESUS. — (1) *Their opposition to our Lord.* The Pharisees and scribes were the first to assume an attitude of hostility and criticism to Jesus. They maintained this attitude all through His public ministry down to the very close; for although in the last days of His life the Sadducees were most prominent, the Pharisaic scribes also took part in His trial and condemnation. They had many reasons to find fault with Him. He claimed authority to forgive sins (Mt 9^{3}, Mk $2^{6f.}$, Lk 5^{21}), and associated freely with publicans and 'sinners' (Mt 9^{11}, Mk 2^{16}, Lk 5^{30} 7^{39} $15^{1f.}$ 19^{7}); He and His disciples were indifferent to ascetic practices (Mt 9^{14}, Mk 2^{18}, Lk 5^{33}), and to levitical purity (Mt $15^{1ff.}$, Mk $7^{1ff.}$, Lk $11^{37f.}$), and were not careful to observe the Sabbath in the orthodox fashion (Mt $12^{1-8.\ 9-14}$, Mk $2^{23ff.}$ $3^{1ff.}$, Lk $6^{1ff.\ 6ff.}$ 13^{14} $14^{1ff.}$, Jn $5^{10ff.}$ $9^{13ff.}$). They accused Him of being in league with Beelzebub (Mt $12^{24ff.}$, Mk $3^{22ff.}$, Lk $11^{14ff.}$, cf. Mt 9^{34} 11^{19}), demanded a sign from Him (Mt $12^{38f.}$ 16^{1}, Mk 8^{11}), and attempted to frighten Him from Galilee into Judæa, where He would be more in the power of the Sanhedrin (Lk 13^{31}, cf. Plummer, *St. Luke*, 348). They put testing questions to Him, *e.g.* as to the way of inheriting eternal life (Lk $10^{25ff.}$), as to the greatest commandment (Mt $22^{34ff.}$, Mk $12^{28ff.}$), and as to the law of divorce (Mt 19^{3}, Mk 10^{2}). These were leading questions meant to test His orthodoxy, and to discredit Him, if possible, with the people (see Swete, *The Gospel according to St. Mark*, p. 202 on Mk 10^{2}: 'probably their intention was simply to place Him in apparent opposition to Moses, who had permitted divorce'). Their most skilful testing question was that as to the lawfulness of paying tribute to Cæsar (Mt $22^{15ff.}$, Mk $12^{13ff.}$, Lk $20^{19ff.}$): whatever answer He gave, He could hardly avoid offending either the Roman authorities or the people. For their alliance with the Herodians in this matter (Mt 22^{16}, Mk 12^{13}), cf. Mk 3^{6}. From their standpoint their opposition to Him was inevitable. They felt instinctively that the whole spirit of His life was in flat contradiction with their most cherished convictions.

(2) *Our Lord's criticism of the Pharisees.* Jesus recognized that the opposition between Himself and the Pharisees was essential, and not only defended Himself against their attacks, but also criticised them keenly. He frequently denounced them as hypocrites (*e.g.* Mt $6^{2.\ 5.\ 16}$ 15^{7} $23^{13.\ 15.\ 23.\ 25.\ 27.\ 29}$, Mk 7^{6}), whited sepulchres (Mt 23^{27}, cf. Lk 11^{44}), the offspring of vipers and serpents (Mt 12^{34} 23^{33}), an evil and adulterous generation (Mt 12^{39} 16^{4}), and blind guides (Mt 15^{14} $23^{16.\ 19.\ 24.\ 26}$); He warned His disciples against their leaven (Mt $16^{6.\ 11f.}$, Mk 8^{15}, Lk 12^{1}), denied that their righteousness qualified for admission into the kingdom of heaven (Mt 5^{20}), and declared that, while the publicans and harlots were entering the kingdom, they were remaining outside (Mt $21^{31f.}$). He recognized their official character, and the duty of the people towards them as authorized teachers, but He warned against following their example (Mt $23^{2f.}$). He also charged them with a great many specific vices, most of which were inherent in Pharisaic Judaism.

The fundamental principle of Pharisaic Judaism was complete separation from everything non-Jewish; hence their separation from the mass of their fellow-countrymen; hence also their devotion to the minute study and scrupulous fulfilment of the law. The law was God's great gift to Israel; their possession of the law was the most signal proof that they were God's chosen people; it separated Israel as a 'holy' people from all other peoples. It was also the only, and the absolutely perfect, means of attaining the Messianic salvation both for the individual and the nation. Life had therefore no other aim and meaning than the study and fulfilment of the law. One evil consequence of this 'idolatry of the law' was the externalizing of religion. God was conceived of mainly as Lawgiver and Judge. The religious relation between God and Israel was purely legal; it was founded on a purely legal compact. Religion was not a fellowship with God, but a strictly legal walk before God. Their zeal for the law was consequently a serving of God for the sake of reward; more especially for the supreme reward of sharing in the glory and bliss of the Messianic age. It was possible to satisfy God's demands perfectly in a legal way; and by doing so they hoped to enjoy the commanding God, whom they obeyed, as a a gracious God. This doctrine of merit led almost of necessity to a great multiplication of precepts, to a hedging or fencing of the law, so as to make its violation almost impossible. They also sought to acquire merit by doing more than was commanded. Moreover, in their keeping of the law, they considered mainly whether a particular action was commanded or forbidden. Their attitude to their almost deified law was external, formal, mechanical. They laid stress not upon the rightness of an action, or upon the disposition from which it was done, but upon its being commanded and upon its formal correctness. They applied this principle even to such matters as fasting and prayer. They attached excessive importance to the precepts relating to foods and levitical purity, because the strict observance of these precepts kept them from defilement. They made the law 'only a manual of religious etiquette.' Their righteousness was thus mere formalism; their righteous man was one who kept the law, written and oral, in an external, but formally correct manner.

Our Lord's whole teaching regarding God as the Father was a criticism of Pharisaic legalism. God is not primarily Lawgiver and Judge, but the heavenly Father. Religion is fellowship with God. The religious bond uniting God and man is grace on God's part, trust and love and heartfelt obedience on the part of man. In the relation between God and man there is no room for the idea of merit (Lk 17^{7-10}). God cares for individual sinners *quâ* sinners, and throws the kingdom of heaven wide open to all who are willing to enter in. He sends His Son to seek and to save the lost, and rejoices greatly when any lost one comes back. He rewards men, not according to the quantity of work they have done, but in accordance with His own sovereign grace (Mt 20^{1-16}). Our Lord explicitly criticises the externalism of the Pharisees. According to Him, the basis of the ethical life is not an external authority, but the personal relation of an individual to God (cf. Mt $5^{45.\ 48}$ $18^{32f.}$. Lk 7^{47}). What He demands is not outward correctness, but inner moral life (Mt 23^{25-28}, Lk 11^{39-41}), the surrender of the whole personality (Mt 22^{37-40}), not the mere performance of a number of externally good deeds. That which 'defiles' a man is the evil condition of his own heart (Mt $15^{11ff.}$, Mk $7^{14ff.}$). No action is of any moral worth, unless it is the expression of the inward disposition (cf. what is said of almsgiving, prayer, and fasting Mt $6^{2.\ 5.\ 16}$ $9^{14f.}$). The righteousness of the kingdom of heaven is inward and spiritual; it is the fruit of a renewed heart and of a filial relation to God.

The purely formal ethics of the Pharisees led to a great many other evils. They paid no attention to the ethical content of a law. Ethically indifferent precepts were as important as those bearing on really moral duties, simply because they were contained in the law or tradition. They accordingly busied themselves with minute trifles, to which they even attached greater importance than to the discharge of duties to their fellowmen. They divorced morality and religion (Mt $15^{1ff.}$, Mk $7^{1ff.}$, Mt $23^{23f.}$, Lk 11^{42} 18^{12}, cf. Mt $5^{23f.}$ 9^{13} $12^{10ff.}$: justice and mercy, etc., are opposed by our Lord to a false way of serving God; mercy is better than sacrifice; duty to parents takes precedence of so-called religious duty; to be reconciled to one's brother is more necessary than coming to the altar; the Sabbath is 'sanctified' by doing good; 'the programme of genuine religion': 'genuinely ethical deeds are more important than the observance of ceremonial prescriptions'—Jülicher). Their externalism did not deliver them from the impulses of the natural man, such as covetousness and rapacity (Mt 23^{25}, Mk 12^{40}, Lk 20^{47}, cf. 16^{14}) and the desire of receiving honour from men (Mt $23^{6ff.}$, Mk $12^{38ff.}$, Lk 11^{43} $14^{7ff.}$ 20^{46}); while it led inevitably to casuistry (*e.g.* in respect of the Sabbath;* oaths, Mt 23^{16-22}; duty to God outweighing duty to man, Mt $15^{3ff.}$, Mk $7^{9ff.}$; inventing statutes virtually cancelling more irksome ones, Mt 23^{4}, Lk 11^{46}), ostentation and self-righteousness (Mt 6^{1-18} 23^{5}, Mk 12^{40}, Lk 16^{15} $18^{9ff.}$ 20^{47}), censoriousness (Lk $18^{9ff.}$), and hypocrisy (Mt 23^{25-28}, Mk 12^{40}, Lk $11^{39.44}$ 16^{15} 20^{47}). They paid external homage to the great men of the past, but were altogether void of their spirit (Mt $23^{29ff.}$, Lk $11^{47ff.}$). By means of their false interpretations of scripture and their legal conception of religion they shut the kingdom of heaven both against themselves and others (Mt 23^{13}, Lk 11^{52}); while by means of their fencing of the law, they turned the commandments of God (*e.g.* as to the Sabbath), which were given to help men to live a true life (Mk 2^{27}), into heavy burdens, grievous to be borne (Mt 23^{4}, Lk 11^{46}). There were doubtless in our Lord's time many good men among the Pharisees, but the tendency of the whole system was to produce hypocrisy (cf. what is said of proselytes Mt 23^{15}), or, in the case of earnest and sincere souls, self-torture and a sense of estrangement from God (cf. Mt $11^{28ff.}$; see Weber, 320 f.).

D. EATON.

PHARPAR (פַּרְפַּר, B 'Αφαρφά, A Φαρφαρά) is named by Naaman, along with the ABANAH (2 K 5^{12}), as one of the rivers of Damascus. Much has been written on the subject, but its identity is still in doubt. The Arab. Version gives *Taurâ* for Pharpar, but the modern Beirût revision simply transliterates *Farfar*. There is a local belief, for which some antiquity is claimed, that Abanah and Pharpar are represented by *Nahr Baniâs* or *Abaniâs*, and *Nahr Taurâ*, respectively. In favour of this, Dr. Wm. Wright argues in Nelson's *Bible Treasury* (p. 250), quoting the late Dr. Meshaka, one of the most learned of modern Damascenes. The old Arab geographers, however, are unaware of the pre-eminent charms of any two rivers of Damascus. Dimashki (*c.* A.D. 1300) speaks of seven streams into which the waters of *el-Barada* are divided, and mentions among the others, with no special commendation, *Nahr Thaurah* and *Nahr Balniyas* (or *Bānās*). So also Idrisi (A.D. 1154). But even these names are unknown to Istakhri and Ibn Haukal (A.D. 951–978), who refer to only three canals as branching off from the main stream. It is hard to see why Naaman should have ignored the river itself, flowing towards the city with full refreshing current, to extol two of the canals supplied by its waters.

The identity of Pharpar with *el-A'waj* is maintained by Thomson (*Land and Book*, iii. 359, 398, 429). The two main sources of this stream rise on the eastern slopes of Hermon, just under *Ḳaṣr 'Antâr*; the *'Arny* to the north, and the *Jennâny* to the south. Below *Sa'sa'* the latter takes the name *Sabirâny*, which it retains after confluence with the *'Arny*, as far as *el-Kisweh*, on the great *hajj* road. Thence to the lake it is called *el-A'waj* ('the crooked'). In the season of melting snows the volume of water it carries is very great; but later in the year the stream is much attenuated. Escaping from the valley, *el-A'waj* waters the south-eastern part of the plain of Damascus, and, splitting up into several streams, falls at last into *Bahret el-Hijâneh*. In the *Wâdy Barbar* it is natural to detect an echo of the ancient 'Pharpar'; but Thomson errs in making this *Wâdy* tributary to the *Sabirâny*. Such waters as it supplies are carried into the plain north of *Jebel el-Aswad*, while the *Sabirâny* flows to the south. The proposed identification, therefore, loses what support might be derived from similarity of name. It is, however, adopted by G. A. Smith as probable (*HGHL*^{1} 642), and by Baedeker as certain (*Pal.*^{3} 268, 312). Dr. Wright quotes Dr. Meshaka to the effect that *el-A'waj* 'is not a river of Damascus at all. It is distant a ride of 3 hours from the city at the nearest point.' Against this we have the statement of Dimashki (*c.* 1300), 'another river (of Damascus) is called *el-A'waj*,' and the distance from *Bawwabet Ullah* to the nearest point is only 6 miles.

It is futile to seek for the Pharpar in the short stream from *'Ain Fîjeh*.

Beside *el-Barada*, with its copious and never-failing supplies, *el-A'waj* may seem hardly worthy of mention. But during the greater part of the year it carries down no mean volume of water; and there is no other stream near the city at all deserving the name of river. It should also be remembered that whatever ministered to the fruitfulness and beauty of any part of the famous plain would be an object of grateful pride to the Damascene soldier.

LITERATURE.—Thomson, *Land and Book*, iii. 429–432; Baedeker, *Pal.*^{3} 268, 312; Nelson's *Bible Treasury*, 250; Guy le Strange, *Pal. under the Moslems*, 235, 238, 265, 266.

W. EWING.

PHASELIS (Φάσηλις)*.—A city on the eastern extremity of the coast of Lycia near the Pamphylian frontier, standing apart, not only geographically, but generally even politically, from the rest of the country. Pliny (*Nat. Hist.* v. 36) and Stephanus Byz. actually assign it to Pamphylia; but this is erroneous. It was said to be a Dorian colony; and it became a city of great importance at a very early time, being one of those which shared in the trade with Egypt under Amasis, B.C. 570–526. It struck a series of coins in the 6th and early 5th cent. with a variety of types, among which the most noteworthy are the prow and the stern of a war galley.

---

* See Schürer, ii. 470 ff., 491 f.; Edersheim, ii. 774 ff.

* Φασηλίς wrongly in edd. of 1 Mac 15^{23}, and in some classical authors; but Φάσηλις is right, and is now printed in Strabo, p. 666, Paus. iii. 3. 8 (where older edd. have oxytone), etc. Φασηλίς was the name of a kind of vase or utensil in Alexandria

These coins, which were struck on the Persian standard, cease about B.C. 466, when the Athenian confederacy became powerful on these coasts; but Thucydides (ii. 69) mentions that Phaselis was a place of consequence in the Athenian trade with Phœnicia and the Levant coasts generally. Its coinage began again about B.C. 400, and during the 4th and 3rd cents. the same types were characteristic. During that period it was a more or less independent city; but while Lycia was under the power of the Ptolemies, B.C. 276–204, Phaselis was probably under the same influence; and at the end of that time a radiated head, which is conjecturally taken as representing Ptolemy IV., appears on the prow in the reverse type.

When Seleucid power ended in B.C. 190, Phaselis commenced to use the type of Pallas. About B.C. 168 it began to strike coins with the types of the Lycian confederacy (Κοινὸν Λυκίων), founded in that year (see LYCIA); and in the 1st cent. it also struck coins which are of a different style. There can therefore be no doubt that at least in the period later than B.C. 77 (when it was captured by Servilius Isauricus), it ceased to be a member of the Lycian confederacy; and Strabo mentions that it was not a member in his time (B.C. 64–A.D. 19). But Mr. G. F. Hill, in his *Catalogue of Coins in the Brit. Museum, Lycia*, p. lxvii, thinks there is no reason to deny its membership during the period before B.C. 77. But the mention of Phaselis among the States to which the Roman consul sent letters in B.C. 139 in favour of the Jews (1 Mac 15^{23}), proves that it was at that time a free city, distinct from the Lycian confederacy (which is also mentioned as a recipient of similar letters); and Mr. Hill admits that there is some reason to think that it was not a member of the confederacy about B.C. 100, for it must have been one of the greatest cities of Lycia, yet Artemidorus does not mention it when enumerating the six members of the first class at that period. Now, even its coins with confederacy types do not mention the name ΛΥΚΙΩΝ, as is the case with those of most cities; there are, however, occasional examples of the same omission on the coins of other Lycian cities, even during the early period of the confederacy. But, on the whole, it would appear that Phaselis either never belonged to the confederacy (but merely from alliance and common interest adopted the types), or ceased before 138 to belong to it; and the words of Cicero (*Verr.* ii. 4. 10, 21) suggest that it had originally been a Lycian city, but that it soon allied itself with the Cilician pirates (which led to its capture by Servilius) and separated from the Lycians.

Phaselis stood on a promontory with a very conspicuous mountain behind it. Livy (xxxvii. 23) describes this in vague and hardly accurate terms. He is evidently alluding to the vast ridge of Taurus, which rises from the coast all along the eastern part of Lycia, and is seen by sailors for a great distance out at sea; but he is hardly correct in saying that Phaselis is the first land descried by sailors on the voyage from Cilicia to Rhodes.

No coins of Phaselis are known with certainty under the Roman empire except in the time of Gordian III. (others are probably forged), which shows that it hardly maintained its ancient importance in the post-Christian period. It was a bishopric in the Byzantine time.

W. M. RAMSAY.

PHASIRON (A Φασιρών, ℵ Φασειρών, V Φαρισών).—Name of a Nabatæan tribe (1 Mac 9^{66}). Since most Nabatæan names find easy etymologies in Arabic, it ought to be possible to explain this from that language; the roots, however, which this name recalls, seem rarely used for forming proper names, except, indeed, *fazara*, which gives *Fazārah*, a well-known tribal name. The form *Pashīrōn* of the Peshiṭta version makes it no easier. The name may be corrupt. D. S. MARGOLIOUTH.

PHASSURUS (B Φάσσορος, A Φάσσουρος, AV Phassaron), 1 Es 5^{25} = Pashhur.

PHEREZITE occurs in AV and RV of 2 Es 1^{21} and in AV of Jth 5^{16} for the more usual PERIZZITE, which is the reading of RV in the latter passage.

PHICOL (פִּיכֹל, Φικόλ).—The captain of the host of Abimelech, who accompanied his master upon the occasion of the latter's entering into treaty with Abraham, Gn $21^{22.\,32}$ (E), or Isaac, 26^{26} (J). See ABIMELECH, No. 1.

PHILADELPHIA (Φιλαδέλφεια, WH -ία).—A city in the E. part of Lydia, in the valley of the Cogamis[*] (an important tributary of the Hermus), on the extreme outermost slopes of Mount Tmolus. It is now a station on the railway, 28¼ miles from Sardis, 64 from Magnesia, 105 from Smyrna (by the detour which the railway makes round Mount Sipylos). It is situated only 650 feet above the sea near the upper end of the low coast valley which runs up from the gulf of Smyrna; and around it on all sides, except the road to Sardis, rise the mountains which form the rim of the great central plateau, or extend out from it towards the sea like fingers. Thus the Cogamis valley is a sort of funnel (like the Lycus valley, with its cities, see LAODICEA) in the flank of the lofty main plateau of Asia Minor. A few miles farther up the course of the river was the old city of Kallatebos, mentioned by Herodotus on the march of Xerxes, whose rank and power were probably transferred to Philadelphia, when it was founded. The name Philadelphia shows that it commemorates Attalus II. Philadelphus (so named from his affectionate and loyal conduct to his elder brother and predecessor, Eumenes II.); and it must have been founded between B.C. 189 (when Eumenes came into possession of this country) and Attalus's death in 138.

The importance of the new city lay in its relation to the cities of the upper plateau. The direct waggon and carriage road from the cities of northern Phrygia to the Ægean ran past Philadelphia to Smyrna; and a considerable part of the fertile district called the Katakekaumene, or Burnt Land, also sent its abundant vintages, fine wines, and other produce by Philadelphia to the same port (though the western Katakekaumene would send direct by Sardis to Smyrna). Strabo seems perhaps to describe Philadelphia as part of the Katakekaumene, but this is hardly accurate geographically; and his expression, on p. 579, that it was on the side of that district, must be taken strictly as denoting the outer side. That district was a broken, irregular country forming part of the great plateau, but on a lower level, like a step leading up to it. The Katakekaumene lay north and north-east from Philadelphia. It derived its

[*] So spelt on a coin. Pliny has Cogamus.

name from the extraordinarily fresh and impressive traces of volcanic action which appear in it: great streams of lava, and vast heaps of cinders, looking as if they had just cooled yesterday, surround the three 'funnels' (as Strabo calls them, Devitt, or Ink-pots,* as the Turks now call them), which are the craters of volcanoes that were active down to a comparatively recent time. These blackened and bare rocks and cinder heaps encroach in irregular outline on the rich, green, fertile glens and slopes of the luxuriant country, with its ten cities, from which it derived its other name, Decapolis. Strabo (xiii. p. 628) describes Philadelphia as being constantly subject to earthquakes, so that the walls and houses could hardly stand firm; but modern experience tends to show that there is considerable exaggeration in his picture. He also says that few people lived in the city, but that most lived in the open country, and were engaged in cultivating the very fertile land. This account would suggest a somewhat simple and rustic settlement; but that is hardly the impression that one gets from other facts. Philadelphia was evidently a place of importance in the imperial organization of the province of Asia. It took the name Neokaisareia for a time in the 1st cent., being so styled on coins of Tiberius, Caligula, and Claudius, and the name was evidently given to it under Tiberius, who aided it to recover from a great earthquake in A.D. 17. Under Vespasian it was honoured with the title Flavia. In the reign of Caracalla it received the honour of the Neokorate (see PERGAMUM).† Meetings of the Council of the province Asia, with the games called *Κοινὰ Ἀσίας*, were held in it, at least in later time.

Philadelphia was the seat of one of the seven Churches to which were sent special messages through the mouth of John, in the opening of the Apocalypse. In all probability each of the seven is to be understood as the centre and head of a district; and it would be quite a mistake to understand that there were only these seven Churches in the province. Laodicea is certainly to be taken as representative at least of the whole Lycus valley (where the Churches of Colossæ and Hierapolis had long existed), and probably also of southern Phrygia (see LAODICEA). Similarly Philadelphia stands as representative of a district; and there can be no doubt that its district consisted of the neighbouring regions of the plateau, including parts of eastern Lydia and western Phrygia. None of the valley west of it could be in its district, for the Hermus cities would fall either under Sardis or under Thyatira.

These facts, and its abundant coinage, reveal to us rather a rich and powerful city, connected by trade with a large district towards the east and north, for which it formed a centre, and thus well suited to be one of the central Churches of Christianized Asia. It is said that there has been 'set before it a door opened' (Rev 3^{8}), and the 'open door' doubtless refers to its position on the threshold of the eastern country, and to the rapidity with which the new religion was spreading to the plateau through the cities connected with Philadelphia. On this sense of the 'open door' compare 2 Co 2^{12}.

But it is hardly possible, in our almost complete ignorance of the inner history and circumstances of Philadelphia, to find an intimate connexion between them and the language of the address to the Church. It may, however, be noticed that in the seven letters to these Churches, it is chiefly the faults which are associated with the local circumstances, and which derive light therefrom. In so far as a Church attained Christian purity, its character rises to a higher plane; in so far as it degenerates from that high level, it becomes affected by its earthly surroundings. Now the two Churches which are addressed in terms of almost unmingled praise are Smyrna and Philadelphia; and in those two addresses we find least reference to local history and situation. Philadelphia had kept the word, and not denied the name of God. It is described in Rev 3^{8} as having 'a little power'; and this is considered by some commentators to be explained and illustrated by Strabo's description of the actual city as being small. But the allusion to its 'little power' seems rather to point to the Church being a recent foundation, which had not yet acquired great strength in the city, though there is a brilliant opening before it. As a newly founded and small Church it was more likely to escape notice and persecution; and hence it is to be 'kept from the hour of trial,' 3^{10}. It is stated in 3^{9} that there was a synagogue in Philadelphia. The Jews of this synagogue had degenerated greatly from the strictness of Hebrew morality and religion, had complied with the pagan customs and ways of living, and had become 'the synagogue of Satan.' Yet this synagogue was to recognize the love that God had bestowed on this Church, and to bow down before it. This apparently implies that the Jews of Philadelphia were in process of rallying to the Christian side. The Church on the whole is rebuked for no faults or weakness; but is exhorted to continue strong and energetic, as it has hitherto been; and to 'hold fast what it has.'* Great rewards are promised to those who are steadfast and win the victory. The name of God, and the name of His city, the new Jerusalem, and the new name of the writer who addresses them, are to be written on all who overcome (on this see PERGAMUM).

Philadelphia was a bishopric under the metropolitan see of Sardis, in the Byzantine period, mentioned in all the lists immediately after Sardis. It grew steadily as the Ægean coast cities tended to dwindle, and the central regions of Asia Minor to grow more important in the Byzantine period. In the last centuries of the empire it rose to a lofty pitch of heroism. It was long the bulwark of the Christians against the encroachments of the Turkish power, whose centre was at Konia or Iconium. Frederick Barbarossa was permitted to enter the city alone by its inhabitants, though they fought for two days against his army, as he was marching across Asia Minor on the fourth crusade in 1190. Andronicus Palæologus (1283–1328) recognized its importance by raising it to the rank of a metropolitan archbishopric, and making it tenth in 'the order of dignity.'† This probably implies that it now became practically the Christian centre of Lydia (in place of Sardis), although the official lists (*Notitiæ Episcopatuum*), with their usual conservatism (see PERGA), continue to mention it, as before, in the list of bishoprics subject to Sardis (sometimes with the added note, 'which was promoted to the rank of a *metropolis*,' as in *Not.* xiii.). In 1306 it stood a long siege by the Seljuk Turks; but, after suffering terribly from hunger, it was relieved by Roger de Flor with his Catalan troops. Again in 1324 it suffered a similar siege, and even greater extreme of hunger; but again was relieved by the Byzantine general, Alexius Philanthropenus. As the Turkish power spread westward, Philadelphia was entirely isolated, but still maintained its proud independence as a free Christian city in a Turkish land, until it was conquered by a combined army of Ottoman Turks and Byzantine imperial troops sent by the submissive emperor, in a year which is given variously between 1379 and 1390.[*] In 1403 it is said to have been captured by Tamerlane, who built a wall with corpses (the situation of which is still pointed out).

---

* Wrongly called, by almost all travellers and guide-books, Devlit.

† See Buresch, *Aus Lydien*, p. 103 ff. Marquardt (*Röm. Staatsverw.* i. p. 341) is mistaken in saying that it was the seat of a *conventus*; but it was one of the places in the *conventus Sardianus* where the court of the *conventus* might be held by the proconsul.

* On the Jews in Phrygia and Lydia see *Cities and Bishoprics of Phrygia*, ch. xv.

† See Parthey, *Notitiæ Episcop.* xi. No. 11, p. 226.

It is remarkable that the city whose noble Christian career is intimated in the message Rev 3^{8-14} should have had the most glorious history of all the cities of Asia Minor in the long struggle against the Turks. Perhaps the only city that could vie with it was Smyrna (also highly praised in Rev); but the resistance of Smyrna was due in part to European aid, while Philadelphia maintained itself with native steadfastness and vigour. It is still to a large extent Christian. 'He that overcometh, I will make him a pillar in the sanctuary of my God, and he shall go out thence no more,' Rev 3^{12}.

The modern name of Philadelphia is Ala-Sheher, the 'reddish city' (or rather parti-coloured, with a reddish-brown tinge), so called from the colour of the hillside that slopes away backwards and upwards behind the city. It was by a mere error, due to a smattering of Turkish, that older travellers reported its name as Allah-Sheher, the City of God, which has led to a good deal of mistaken moralizing. W. M. RAMSAY.

PHILEMON (Φιλήμων).—The correspondent to whom St. Paul addressed the charming letter which bears his name (see the following article). The name occurs with considerable frequency in inscriptions, and is found twice in literature in connexion with Phrygia, viz. in the beautiful legend of Philemon and Baucis (Ovid, *Metam.* viii. 631), and in Aristoph. *Aves*, 762. St. Paul's correspondent was most probably a native of Colossæ (cf. Philem ^{1} with Col 4^{17}); and in Theodoret's time his house was pointed out in that city. Tradition speaks of him as bishop of Colossæ (*Apost. Const.* vii. 46), and the *Menæa* of Nov. 22 record his martyrdom there, by stoning, in company with Apphia, Archippus, and Onesimus, in the reign of Nero. In the case of such facts as these, local tradition may generally be regarded as trustworthy, and here it falls in with the documentary evidence, for the idea that Philemon was of Laodicea is a mere guess.

Philemon was a dear and intimate friend of St. Paul (vv.$^{1.\,22}$), and probably one of his converts (v.^{19}). Of the circumstances of his conversion to the Christian faith we have no record, but it may well have taken place during St. Paul's stay at Ephesus (Ac 19^{26}; but cf. also Ac 16^{6}). From the facts that he owned slaves (see ONESIMUS), and that he was noted for his hospitality and charity to his fellow-Christians (vv.$^{2.\,5-7}$), it is plain that he was a rich man. St. Paul speaks of 'the church in his house' (v.^{2}), and does not scruple to bid him prepare a lodging for him against the time he should arrive in Colossæ (v.^{22}). It only remains to be added that Philemon was so earnest in his work for the gospel, that St. Paul can call him a συνεργός (was this at Ephesus?), and that the tone of the apostle's appeal on behalf of Onesimus would lead us to conclude that he was a man of high and generous character, who might be expected to rise superior to the prejudices of heathendom as to the relations between master and slave. APPHIA may have been his wife, and ARCHIPPUS his son. J. H. BERNARD.

PHILEMON, EPISTLE TO.—

i. External tradition.
ii. Transmission of text.
iii. Purport and analysis of the Epistle.
iv. Its internal evidence and genuineness.
v. Its place in St. Paul's life.
vi. Its attitude to slavery.

i. The earliest certain quotations from this Epistle are found in Origen (cf. *Hom.* xix. *in Jer.* 2, *Comm. Series in Matt.* §§ 66, 72), who expressly ascribes it to St. Paul. That Marcion accepted it is explained by Tertullian (*adv. Marc.* v. 21) as due to its extreme brevity. The Muratorian Canon names among the Pauline Epp. 'ad filemonem unam.' Eusebius counts it among the ὁμολογούμενα (*HE* iii. 25). It must have been included, if we are to judge from the extant documentary evidence, in the earliest collection of Pauline letters. The play upon words (εὔχρηστος . . . ἄχρηστος) of v.^{11} is found again in Theophilus (*ad Autol.* i. 1), and Ignatius (*Eph.* ii., *Magn.* ii.) uses ὀναίμην as it is used in Philem ^{20}; but these last coincidences do not necessarily betray literary connexion, though they suggest it.

ii. The text of the Epistle is attested by the uncials ℵ A C D L P ב (this last unpublished) and F G (these omit v.^{21}–end); and by the Egyptian, Syriac, and Latin VSS (of the OL we have *d e f g m*). Of the cursives it is sufficient to mention 17, 47, 67**, 137 as specially valuable.

iii. This Epistle differs from all the other Pauline Epp. which have reached us, in that it is a strictly private letter written to an individual friend. It is possible, though not certain, that the words ἐγὼ Παῦλος ἔγραψα τῇ ἐμῇ χειρί (v.^{19}) apply to the whole letter, which would thus have been an autograph, and not written by an amanuensis, as was St. Paul's usual habit. The Pastoral Epp., although addressed to individuals, are semi-official in character, and deal with the affairs of the whole Christian society; the nearest parallel in the NT to Philemon is 3 Jn, addressed to 'Gaius the beloved.' This characteristic of Philemon provoked prejudice against it in early times, and Jerome, Chrysostom, and Theodore of Mopsuestia found it necessary to defend the Epistle against the charge of secular triviality, unworthy of St. Paul, and unbefitting, as was argued, a work to be included in the sacred Canon of the NT. But modern critics from Luther to Renan have shown a keener insight, and have found in the contents of the Epistle matter for admiration rather than for depreciation.

The body of the letter is an appeal made by St. Paul to PHILEMON, a citizen of Colossæ, on behalf of ONESIMUS, a runaway slave who had come under the apostle's influence and had embraced the Christian faith. Onesimus seems (v.^{18}) to have been a thief, and would in the ordinary course of things have been subjected to very severe punishment had he come again into the power of his former master Philemon. The apostle, with rare tact and delicacy, which only bring his strong sense of justice into fuller relief, asks pardon for the offender, not only as a personal favour to himself (vv.$^{9.\,11.\,14}$), but on the ground of the brotherhood in Christ of master and slave (v.^{16}). He does not ask directly that Onesimus shall be freed, although he indirectly suggests it (v.^{21}); 'the word *emancipation* seems to be trembling on his lips' (Lightfoot).

An analysis of the letter may be drawn up as follows:—*Salutation* (vv.$^{1-3}$); *thanksgiving* for Philemon's love and faith (vv.$^{4-7}$); *request* that he will receive Onesimus, the bearer of the letter, with kindness (vv.$^{8-17}$); adding the assurance that, so doing, he will gratify the writer, who hopes soon to visit Colossæ (vv.$^{18-22}$); *salutations* and final *benediction* (vv.$^{23-25}$).

---

[*] 1379 in Muralt, *Chronographie Byzantine*, from whom we take the preceding dates, 1306 and 1324.

The whole Epistle has frequently been compared to a beautiful letter written by the younger Pliny on a similar occasion (Plin. *Ep.* ix. 21), of which a translation is given by Lightfoot (*Col. and Philem.* p. 316).

iv. Considerable as is the external testimony (see i.) to the Pauline authorship of this Ep., the strongest argument for its genuineness is based on its internal evidence of truth, its witness to itself. 'Peu de pages,' says Renan, 'ont un accent de sincérité aussi prononcé. Paul seul a pu écrire ce petit chef d'œuvre.' The vocabulary of the Ep. has indeed been challenged in refutation of this general impression which it leaves upon the mind, and has been described, *e.g.* by Baur, as un-Pauline. As a matter of fact, the only words which do not occur again in St. Paul are *ἀναπέμπειν*, *ἀποτίνειν*, *ἄχρηστος*, *ἐπιτάσσειν*, *ξενία*, *ὀνίνασθαι*, and *προσοφείλειν*; and of these all but the last occur elsewhere in the NT or in the LXX.* No serious argument can be based on such a meagre list; and, on the other hand, many phrases in the letter are unmistakably Pauline. Not to lay overmuch stress on the form of salutation (v.^{3}), and farewell (v.^{25}), and the opening thanksgiving (vv.$^{4\text{ff.}}$), which are in St. Paul's undoubted style, for these might be imitated by a *falsarius*, the diction all through is that with which we are familiar in the Pauline Epistles. We have the metaphor *ὃν ἐγέννησα ἐν τοῖς δεσμοῖς* which recalls 1 Co 4^{15}; we have words like *ἐπίγνωσις*, *παῤῥησία*, *παράκλησις*; we have *τάχα* which only occurs again Ro 5^{7}; and we have quite a number of coincidences with Eph, Col, Ph; *e.g.* cf. *δέσμιος Χριστοῦ Ἰησοῦ* (vv.^{1} and ^{9}) with Eph 3^{1}, *συνεργός* and *συστρατιώτης* (vv.$^{1.\ 2}$) with Ph 2^{25}, *ἀνῆκον* (v.^{8}) with Eph 5^{4} Col 3^{18}, *συναιχμάλωτος* (v.^{23}) with Col 4^{10}, and *ἀδελφὸς ἀγαπητός* (v.^{16}) with Eph 6^{21} Col 4^{7}. On the whole, not only does the artless style of the letter powerfully support its claim to be genuine, but the phraseology is strikingly like that of the other Pauline Epp., and especially Eph, Col, Ph, the Epp. of the first Roman captivity.

v. An obvious link connecting the letter with Colossians is supplied by the proper names which occur in both Epistles. Both purport to come from 'Paul and Timothy'; while writing both Paul is in captivity; in both Archippus is greeted (v.^{1}, Col 4^{17}); Aristarchus, Mark, Epaphras, Luke, Demas join in the salutations with which the letters conclude; Onesimus a 'beloved brother' is to be the bearer of both letters, accompanied as it would seem by Tychicus (v.^{16}, Col 4^{7}). With this agrees the fact that no greeting to Philemon is found in Colossians, because to him a separate letter had been addressed. And as Ephesians and Colossians were intrusted to the same messenger, viz. Tychicus (Eph 6^{21}, Col 4^{7}), we are led to the conclusion that the three Epistles, Eph, Col, Philem, were written at the same time and under the same circumstances. (See EPHESIANS, EPISTLE TO).

A determination of the *place* of writing will help us to determine the *time*. As St. Paul was in captivity, the letter must have been written either from *Cæsarea* (Ac 24–26) or from *Rome* (Ac 28^{30}). Tradition is all in favour of Rome, and the *a priori* arguments which have been alleged on the side of Cæsarea are untrustworthy.

Thus (*a*) it has been urged that Cæsarea being nearer to Colossæ than Rome, it would be more natural that Onesimus should fly there. But, on the contrary, a fugitive could more easily hide himself in the great metropolis. (*b*) If Eph, Col, Philem were carried by the same messenger from Rome, he would arrive first at Ephesus, and yet in Eph we find no commendation of Onesimus. This is explicable only, it has been supposed, on the hypothesis that Onesimus was no longer with Tychicus, having arrived at his destination (Colossæ) before the messengers reached Ephesus. But this would involve an approach from Cæsarea rather than Rome. It is a sufficient answer to this that arguments *e silentio* are very untrustworthy, and that no reason has been assigned why a slave like Onesimus should be singled out for mention in a letter to a Church where he was not known. (*c*) Philem ^{22} suggests that St. Paul intended to go direct to Colossæ, while Ph 2^{24} speaks of his intention of going to Macedonia. This would suggest a starting-point south of Colossæ, so that that place might be visited *en route* to Macedonia.

But we do not know how far the apostle's plans were modified in the interval between the composition of Philemon and Philippians, nor is there any reason why he should not have proceeded from Rome to Colossæ *viâ* Philippi.

The positive arguments, independent of tradition, in favour of Rome are slight. *E.g.* from Eph 6^{19} it appears that St. Paul had a certain amount of freedom while in captivity, which is hardly consistent with what we know of his imprisonment at Cæsarea and of the dangers to which he was there exposed (Ac 23^{21}; but cf. 24^{23}). But leaving that aside, there is at least nothing to forbid us to acquiesce in the traditional belief that it was in Rome that the apostle wrote the three letters Eph, Col, Philem, as it is evidently the place from which he wrote the kindred Epistle to the Philippians (Ph 1^{13} 4^{22}; cf. PHILIPPIANS, EPISTLE TO).

The question as to the priority of Philippians to the group Eph, Col, Philem, is difficult, and there is not a great deal of evidence available. Lightfoot, Sanday (see Smith's *DB*^{2} i. 627), and Hort (*Rom. and Eph.* p. 102) support the view that Philippians was written earlier than Eph, Col, Philem; but the opposite opinion, that it is the latest of the Epp. of the first Roman captivity, has also many defenders, *e.g.* Zahn (*Einleit.* i. 386, 392), Gwynn (*Speaker's Comm.*), and Ramsay (*St. Paul the Traveller*, p. 358), and on the whole it seems to the present writer the more probable.

The reasons for this opinion are the following: (α) It seems from a comparison of Eph with Ph that the conditions of the apostle's imprisonment are represented as more rigorous in the latter Ep. than in the former, which contemplates a state of things like that portrayed in Ac $28^{30.\ 31}$. On the other hand, when Ph was written, he has been put on his trial, and forced to make his *ἀπολογία* (cf. Ph $1^{16\text{f.}}$ $2^{17.\ 23}$). (β) Again, a comparison of Philem ^{22} (*ἐλπίζω γὰρ ὅτι διὰ τῶν προσευχῶν ὑμῶν χαρισθήσομαι ὑμῖν*) with Ph 2^{24} (*πέποιθα ἐν κυρίῳ ὅτι καὶ αὐτὸς ταχέως ἐλεύσομαι*) taken in connexion with the joyful tone of Ph, despite the trials which the writer has endured, points to the fact that he was much more confident of his release when Ph was written than at the period of writing Philem, and this would naturally arise from the fact that his trial, which had not come on before the group of letters Eph, Col, Philem was despatched, was in progress and was already so far advanced that he could predict the issue with some confidence. (γ) Too much has been made of the fact that Luke and Aristarchus who join in the salutation to the Colossians and to Philemon are not named in Ph, for they are not named in Eph either. Yet still it falls in with the hypothesis that they had departed before Ph was written; and indeed Ph 2^{20} ('I have no man likeminded [*sc.* with Timothy] who will care truly for your state') seems to make it certain that when Ph was despatched the companions who are named in Col, Eph, Philem had departed from the side of the apostle. The only positive argument of any weight which has been urged on the other side is that the similarities between Ro and Ph are much closer than between Ro and Eph, Col, Philemon. Lightfoot, in particular, urges that Philippians resembles the earlier rather than the later group of Pauline letters, and that therefore it must be placed before Eph, Col, Philemon. Such an argument has little force, for on any hypothesis the interval which separates Eph, Col, Philem from Ph is too brief to account for any marked change in style, supposing such to exist. And, on the other side, the undoubted parallels between Ph and the Pastoral Epp. may be brought forward (cf. *e.g.* 1^{23} and 2^{17} with 2 Ti 4^{6}, 4^{8} with 1 Ti 3^{8}, 1^{21} with Tit 1^{11}, $1^{12.\ 25}$ with 1 Ti 4^{15}).

We thus are inclined to place Philemon before Philippians, and therefore it will fall not quite as late in St. Paul's first captivity as that Epistle. The determination of the year of writing will depend on the system of Pauline chronology which is adopted (see CHRONOLOGY, vol. i. p. 420). It is perhaps most probable that it was written in the year A.D. 61.

vi. The conditions of social life which form the background of the Ep. are deeply interesting to the student of history, and the letter derives a peculiar importance from the light which it throws on the attitude of the early preachers of the gospel to the institution of *slavery*. It is not condemned, nor (as has been said already, § iii.) does St. Paul even advocate directly the emancipation of Onesimus. Christianity did not attempt all at once to abolish an institution which was so deep rooted in Roman social life, however inconsistent it was with the religion of the Incarnation. Indeed the revelation of the brotherhood of men in Christ made it especially necessary to emphasize (as the apostles did) the fact that social differences were not thereby obliterated. Even if (which is doubtful) St. Paul was so much in advance of his age as to have grasped the idea that no man has a right to *own* another, to have proclaimed the iniquity of slavery to a world which was not prepared for it would have exposed society to the frightful dangers of a *bellum servile*, on the one hand, and would, on the other, have done more to arouse the hostility of the Roman imperial authorities than any other proclamation could have effected. Christians had to show at the very outset that Christianity was not inconsistent with good citizenship, and that the reforms which it hoped to promote in social life would not be imposed violently from without, but that they would be the outcome of the development of the national conscience, in which the seed of the gospel was to grow and fructify, secretly but surely, as the leaven spreads in the meal. And the event has justified the policy. Slowly and steadily, as Christianity spread, did the condition of the slave improve in imperial Rome; until at last the time came when it was possible for the Church, with a fuller recognition of the implications of the creed, and without danger to her own corporate life, to preach emancipation. And the letter to Philemon is the first indication in Christian literature that the problem of the relation of master to slave must be seriously affected by the new conception of the brotherhood of man, which Christ's apostles had set themselves to proclaim.

* *ἐλλογᾶν* (WH) occurs again in Ro 5^{18} (TR in both *ἐλλογεῖν*).

LITERATURE.—Lightfoot on *Colossians and Philemon* is the best; von Soden (*Hand-Commentar*) and Vincent (*Internat. Crit. Comm.*) are also valuable; and Abp. Alexander's comm. in the *Speaker's Comm.* is picturesque and full of matter.

J. H. BERNARD.

PHILETUS (Φίλητος) is mentioned along with Hymenæus in 2 Ti 2^{17} as sharing in the same heresy regarding the resurrection. The nature of that heresy has been already explained in the article on Hymenæus (which see), and it is sufficient to state here that it consisted in doing away with anything in the nature of a bodily resurrection, and resolving all Scripture references to such a state into figure or metaphor. For full particulars regarding the men and their heresy, reference may be made to J. G. Walch, *Miscell. Sacra*, p. 81 ff.; and to F. R. Walch, *Hist. der Ketzereien*, i. 125 ff. See also Ellicott on *The Pastoral Epp. in loc.*, and Burton, *Bampton Lect.*, Note 59, p. 428.

The names of Philetus and Hymenæus occur separately among those of Cæsar's household whose relics have been found in the Columbaria at Rome.

G. MILLIGAN.

PHILIP (Φίλιππος).—**1.** King of Macedonia, B.C. 359–336, and father of Alexander the Great (1 Mac 1^1 6^2). **2.** A Phrygian, who was left by Antiochus Epiphanes as governor of Jerusalem, after he had plundered the temple in B.C. 170 (2 Mac 5^{22}). Philip is described as being 'in character more barbarous than him that set him there,' and he showed his cruelty by burning certain fugitive Jews, who had taken refuge in caves, and scrupled to defend themselves on the Sabbath (*ib.* 6^{11}). He was the first to take measures against Judas Maccabæus (*ib.* 8^8), and is often identified with—**3.** A 'friend' and foster-brother (*σύντροφος*) of Antiochus Epiphanes (2 Mac 8^{2a}). This view is supported by Zöckler, but the grounds of the identification are somewhat precarious (cf. Rawlinson in *Speaker's Comm.*). Epiphanes on his deathbed gave his ring to Philip, and appointed him chancellor and guardian of his son, Antiochus V. (1 Mac $6^{14f.}$). Lysias, however, gained possession of the young king, and seized the supreme power. Philip, returning with the army from Persia, occupied Antioch, whereupon Lysias, who with Antiochus Eupator was prosecuting the war in Palestine, hastily made terms with Judas Maccabæus and returned to Syria (*ib.* 6^{55-63}). Lysias took Antioch, and according to Josephus (*Ant.* XII. ix. 7) put Philip to death. The statement that, on the death of Antiochus Epiphanes, Philip took refuge in Egypt with Ptolemy Philometor (2 Mac 9^{29}), cannot be reconciled with our other authorities; and 2 Mac alludes elsewhere (13^{23}) to Philip's attempt to establish his authority as regent. **4.** Philip V., king of Macedonia, B.C. 220–179. His overthrow in battle is mentioned as one of the great achievements of the Romans (1 Mac 8^5). An able and energetic monarch, he extended his power in Greece and Epirus, and in B.C. 215 made an alliance with Hannibal. The war with Rome, however, was not carried on with much energy, and after some years a hollow peace was made. In the year 200 the Romans again declared war, but gained little advantage till the supreme command was entrusted to T. Quinctius Flaminius, by whom Philip was completely defeated at Cynoscephalæ in Thessaly (B.C. 197), and forced to accept humiliating terms. During the remaining years of his life he attempted to recover something of his former power, but his cruel and suspicious conduct alienated his subjects, while he was continually troubled by disputes between his two sons. He was at last induced to put his younger son Demetrius to death, and dying shortly afterwards was succeeded by Perseus (which see).

H. A. WHITE.

PHILIP (Φίλιππος, *Philippus*).—**1.** THE APOSTLE. One of the Twelve, belonging to Bethsaida of Galilee (Jn 12^{21}), the fourth of those who attached themselves to Christ as followers, and the first whom our Lord directly called (1^{43}). He had probably been, like his fellow-townsmen Andrew and Peter, a disciple of John the Baptist; for his call took place near 'Bethany beyond Jordan, where John was baptizing,' on the day after Christ's interview with Simon Peter, when Jesus purposed (*ἐθέλησεν*) to leave the district for Galilee ($1^{28.43}$).

Himself 'masterfast,' Philip, either at Bethany or on his arrival, along with Jesus, at Cana, communicates his discovery of the Messiah foretold in the OT to his friend Nathanael, describing Jesus (in accordance with his defective information at the time) as the son of Joseph (1^{45}). Unable to meet directly Nathanael's objection to an alleged Messiah sprung from Nazareth (see NATHANAEL), Philip wisely falls back on experimental evidence, invites Nathanael to 'come and see,' and is the means of his friend's coming, not only into the Master's presence, but under His saving power ($1^{46ff.}$). When the Twelve are chosen, Philip becomes one of the second quartette, at whose head, in each list, his name stands (Mt 10^3, Mk 3^{18}, Lk 6^{14}). He appears thrice otherwise in the Gospel history; and all the references to him (except the bare statement that he was one of the Twelve) are made by his fellow-townsman John, who, writing probably after all his fellow-apostles were dead, appears anxious, in the case of Philip and Andrew, to rescue from oblivion or obscurity, through a few significant reminiscences, some characteristics of those two friends of his youth.

Philip's prompt reply to our Lord's inquiry in Jn $6^{5f.}$ suggests that he had anticipated his Master's compassionate desire to feed the multitude in the wilderness, and had reckoned up (privately, but not unobserved by Jesus) the minimum sum required for the purpose,* without any thought, seemingly, of miraculous intervention. Philip's Greek name, given to him, perhaps, in honour of Philip the tetrarch (Lk 3^{1}), led probably to the 'Greeks who came up to worship at the feast' selecting him as a medium of introduction to Christ; but it was an appropriate coincidence that those who wished to 'see Jesus' should have applied to one who had said to Nathanael, 'Come and see.' Philip's application to Andrew (who also bore a Greek name, and, like Philip, had brought another into Christ's presence), to take part, as principal (Jn 12^{22} RV), in the desired introduction, arose probably not from any doubt as to our Lord's willingness (Jn 10^{16}), but from modesty and a sense of the importance of the occasion. The request of Philip, on the occasion of Christ's address on the night before the Passion (14^{8}), for some such revelation, presumably, of God the Father as Moses had enjoyed (Ex $33^{18ff.}$), indicates the union of earnest religious aspiration with somewhat dull spiritual apprehension. He was seeking after the shadow of a theophany, when the substance of the incarnation was already given to him; just as he had formerly concerned himself about the need of 200 pence, when the riches of Christ's miraculous power were available. Philip's motto appears to have been 'Seeing is Believing,' both in the signification of undue dependence upon testimony addressed to the senses, and in the worthier meaning of an appreciation of the value of experimental evidence. The main lesson to be learned from the incidents of Philip's history as related in the Gospel is this, that while a sincere believer needs to be thoroughly 'proved' (Jn 6^{6}) and instructed before he is fit to 'go forth' as a leader and pastor of the Church; on the other hand, if the portion of truth already apprehended be faithfully held, he may, amid defective knowledge (Jn 1^{45} 'son of Joseph') and imperfect spiritual insight, possess the genuinely missionary spirit, be instrumental in leading others to Christ, and advance the kingdom of heaven.†

Philip's life and work after the Ascension are obscured by the widely prevalent confusion in early times between this apostle and the evangelist Philip, who was one of the 'Seven.'‡ The confusion arose, doubtless, from the wider use, after Pentecost, of the word 'apostle,' as including others besides the Twelve (see APOSTLE). It seems best to accept as reliable the earliest distinct testimony regarding Philip's later career furnished by Polycrates, bishop of Ephesus in the latter part of the 2nd cent., who was likely to have been well-informed. Polycrates (quoted by Eusebius, iii. 31) states that Philip, 'one of the Twelve,' lived as one of the 'great lights of Asia,' and is 'buried at Hierapolis along with his two aged virgin daughters'; and he adds that another daughter, who 'lived in (fellowship with) the Holy Spirit,' was buried at Ephesus.* The statement of Polycrates is supported by the apocryphal *Journeyings of Philip the Apostle* (3rd cent.), which represent Hierapolis as the chief scene of his labours, and associate him significantly with Bartholomew (who is described, however, as one of the Seventy); by Theodoret, the historian, who records in his *Commentary* on Ps 116 [Eng. 117] that 'the apostle Philip controverted the error of the Phrygians' (to whose country Hierapolis belonged); by pseudo-Dorotheus, who states in his *Synopsis* that Philip of Bethsaida preached in Phrygia, and is buried with his daughters in Hierapolis; and by pseudo-Epiphanius, who makes a similar declaration (Lipsius, *Apokr. Apost.* i. pp. 211–213, iii. 25, 26).† In substantial harmony, so far, with Polycrates is his contemporary Clement of Alexandria, who states (*Strom.* iii. 6) that the 'apostles Peter and Philip begat children,' and that the latter apostle 'gave his daughters in marriage' (which would account for the burial of one daughter in Ephesus and not in Hierapolis). The fact of Philip the Evangelist having had four virgin daughters who prophesied, does not invalidate the early testimony to Philip the Apostle having also had notable daughters, although it may have led to confusion on the part of later or less well-informed writers; and the apostle's settlement and labours in Asia Minor harmonize with the introduction of his name on three occasions into the Gospel written at Ephesus by St. John.‡

Regarding Philip's labours prior to his settlement in Hierapolis, the traditions are divergent. The *Journeyings* represent him as travelling through Lydia and Asia; in the apocryphal *Acts of Philip*, Upper Hellas, particularly Athens (where he is said to have abode for two years, and to have founded a Church, appointing presbyters and deacons), and afterwards Parthia, are the scenes of his ministry; while later Latin documents attribute to him the evangelization of the Gauls (Galatians?) and Scythians (Lipsius, iii. 26, 50, E. 19; Fabricius, *Cod. Apoc.* ii. 736). Similarly conflicting are the traditions regarding the manner of Philip's death. A natural decease appears to be indicated by Clement of Alex. (*Strom.* iv. 9), pseudo-Doroth., pseudo-Epiphan., and the Latin *Passio Philippi* (according to the last-mentioned, at the age of

---

* A denarius or 'penny' (about 9½d.) purchased 12 wheat or 36 barley 'loaves' (Mishna, *Peah*, viii. 7 and Rev 6^{6})—round cakes an inch thick and a span in diameter. 200 'pence' would thus procure a scant meal (Jer 37^{21}, Lk 11^{6}) for 5000 men and 2200 women and children.

† Clement of Alex. (*Strom.* iii. 4) records a tradition that Philip was the disciple referred to in Mt 8^{21} as asking Christ for permission 'first to go and bury my father.' If so, the incident belongs to Philip's call, not to discipleship, but to apostleship, when permanent departure from home was involved.

‡ Thus Tertullian (*de Bapt.* 18) speaks of the Apostle Philip being 'snatched away from the eunuch'; the Philip of Ac 6 is referred to in the *Apost. Const.* vi. 7 as συναπόστολος; and in Calendars of the Coptic and Armenian Churches there is a commemoration of Philip as 'Deacon and Apostle' (Assem. *Bibl. Or.* iii. 645; cf. Wright, *Apoc. Acts of Ap.* ii. p. 69 ff., where the history is given of Philip, 'Apostle and Evangelist'). Even Eusebius shares in the confusion (*HE* iii. 31).

* Eus. (*HE* iii. 39) refers to a still earlier testimony in the same direction by Papias, bishop of Hierapolis (first half of 2nd cent.), to the effect that the daughters of Philip the apostle had told him (Papias) about a man raised from the dead in their father's time. As Eus., however, does not quote the exact words of Papias, and as the historian himself confused the two Philips, this reference must be regarded as uncertain.

† In a recently discovered ancient Christian inscription at Hierapolis reference is made to a Church τοῦ ἐνδόξου ἀποστόλου καὶ θεολόγου Φιλίππου (Ramsay, *Cities and Bishoprics of Phrygia*, p. 552). Although Philip the Evangelist is sometimes called ἀπόστολος in the wide sense (see above), so formal an ascription of apostleship is not likely to have been made except to one of the Twelve.

‡ The earliest and strongest testimony in favour of the Philip who settled in Hierapolis being the evangelist, is the statement in Eusebius (*HE* iii. 31), that in a dialogue held at Rome early in the 3rd cent. between Caius and Proclus a Montanist, the latter is represented as referring to 'four prophetesses, daughters of Philip, whose tomb, as well as that of their father, was at Hierapolis.' It is, of course, not absolutely impossible that both Philips were buried with their respective daughters in the same city; but, assuming the improbability of such a coincidence, it is a tenable supposition that either Eus. (through his own ideas being confused) misunderstood, so far, Proclus, or that Proclus himself, knowing about 'daughters of Philip' buried at Hierapolis, assumed mistakenly that these belonged to Philip the Evangelist. The tradition, moreover, which identifies the Philip of Hierapolis with the evangelist is neutralized by the counter-tradition, according to which the latter became bishop of Tralles (see next article).

87). Other ancient authorities ascribe martyrdom to the apostle. Pseudo-Hippol., the *Journeyings*, and the Æthiopian *Acts* represent him as crucified head downwards (according to the first document, under Domitian; according to the second, in the reign of Trajan); while several Latin martyrologies and an ancient Irish *Passio* relate that he was first stoned, then crucified (Lipsius, iii. 25, 26, 48, 50, E. 73; Atkinson, *Passions and Homilies from Leabhar Breac*, pp. 112, 358).

LITERATURE (in addition to works referred to).—*Acta Sanctorum*, vol. xiv. p. 7 ff.; Lightfoot, *Colossians*, p. 45 f.; *Expositor*, Jan. 1875, Dec. 1877; A. Maclaren, *A Year's Ministry*, 2nd series; A. B. Bruce, *Training of the Twelve*.

2. PHILIP THE EVANGELIST.—One of the Seven chosen by the primitive Church at Jerusalem, and ordained by the apostles (Ac 6) to take charge of the daily ministration of charity to the Christian widows and other poor (see DEACON). If not a Hellenist Jew, he was a Hebrew with conspicuously liberal sympathies. After the outbreak of persecution, inaugurated with the martyrdom of his colleague Stephen, Philip, hindered in the fulfilment of one office, straightway entered on the work of another. He was one of those who departed from Jerusalem for missionary ministry ($8^{4.5}$). As Stephen was the forerunner of Paul in unfolding the relation of Christianity to Judaism and in repudiating the Jewish claim to a monopoly of Divine favour, so Philip was the precursor of the Apostle of the Gentiles in missionary zeal, and particularly in opening the door of the Church's fellowship to non-Jewish believers. (1) He selected as his first missionary field the (chief) city of Samaria (Ac 8^{5} RV), *i.e.* either Sebaste (Samaria) or Neapolis (Sychem). The Samaritans, notwithstanding their partial Hebrew descent and partial acceptance of Judaism (including circumcision), were rigidly excluded from the Jewish Church, and were denied even the privilege, accorded to heathens, of becoming proselytes. To this people Philip, mindful doubtless of our Lord's own Samaritan ministry (Jn 4), proclaimed the Gospel and administered baptism. The inhabitants of the city had long been under the influence of SIMON MAGUS (which see), whom his sorceries had induced them to regard as 'the Power of God which is called Great' (Ac 8^{10}). Philip's preaching, supported by miracles of healing and of dispossession, was successful in transferring Samaritan allegiance from Simon to Christ. The population as a whole were baptized; and Simon himself (although with divided heart, as the issue proved) believed and received baptism. Philip's success in Samaria led to the despatch thither of Peter and John, who completed the work which the evangelist had begun. The first stage was thus reached in the development of the Christian Brotherhood out of a Jewish sect into the Catholic Church. (2) A further service in the same direction was rendered by Philip through his baptism of the Ethiopian eunuch, whom he met, by Divine suggestion and providential arrangement, on the road between Jerusalem and Gaza (Ac $8^{28\text{ff.}}$).[*] This eunuch, who held the high office of treasurer to CANDACE (which see), queen of the Ethiopians, had apparently become, in his native land, a 'proselyte of the gate'[†] to Judaism, and was returning home, after worship in the temple, on the occasion, presumably, of one of the great annual festivals. Philip's conduct in relation to the eunuch notably exemplifies trustful obedience to Divine leadings (Ac 8^{27}), alertness in availing himself of missionary opportunity (8^{30}), and broad-minded disregard of national and religious prejudice (8^{38}). The Ethiopian, as a descendant of Ham, belonged to a despised race (Nu 12^{1}, Am 9^{7}), and, if literally a eunuch, was inadmissible into the full membership of the Jewish Church (Dt 23^{1}). Philip by the reception of this man into the Christian Church, virtually declared that disabilities of race and outward condition have no place there, but that all who believe in Christ are eligible for membership and baptism.[*] It was probably Philip's signal service to the cause of Church extension on these two occasions which led, at least in part, to the designation of him as *the* evangelist (Ac 21^{8}).

After the baptism of the Ethiopian, Philip evangelized the country between Azotus (Ashdod) and Cæsarea, which, according to tradition, was his birthplace (see documents quoted by Lipsius, *Apokr. Apos.* iii. 2, 40), and where eventually he took up his abode (Ac 21^{8}). There, along with four virgin daughters who were prophetesses,[†] he was found residing, more than 20 years later, by St. Paul and his friends, who remained for some days as guests in his house, on their way to Jerusalem. During the apostle's protracted imprisonment at Cæsarea we may assume there would be much intercourse (Ac 24^{23}) between Philip and one with whose missionary zeal and broad ecclesiastical views the evangelist would be in full sympathy. Among those who were in Cæsarea along with St. Paul (at least during part of the time) was St. Luke (Ac 27^{2}); and the details of Philip's early evangelistic ministry, recorded in Ac, were doubtless, at this time, communicated to Luke by Philip himself. The historical credibility, therefore, of the narrative in Ac 8 can be questioned only by those who dogmatically reject all records of what is supernatural (Ac $8^{7.26.39}$).[‡]

In 65 A.D. the revolt which developed into the great Jewish war broke out at Cæsarea; and Philip, like other Jewish Christians, would probably leave Palestine before the fatal issue. We are prepared, accordingly, for traditions which indicate his ultimate settlement elsewhere. These traditions are divergent. (1) The earlier connects the evangelist and his daughters with Hierapolis (see note ‡ on p. 835^{b}), but is rendered doubtful by the manifest confusion which existed as to the two Philips. It appears to the present writer much less worthy of acceptance than (2) the tradition which represents Philip, with his daughters, as settling at Tralles[§] in Asia Minor, as performing there many miracles, and as becoming ἐπίσκοπος or ἐπίτροπος of the Church which he was mainly instrumental in building up in that city (pseudo-Doroth. *Synopsis*; *Martyr. Basilii*; Joseph. Hymnographus; and other authorities quoted in *Acta Sanctorum*, xxi. p. 608 ff., and by Lips. iii. 2, 3). In favour of the latter tradition is the fact of its being associated, not like the former, with both Philips, but with the evangelist alone. According to most forms of the tradition, he died a natural death at Tralles; but one authority (a Greek *menologium*, quoted by Lips. *l.c.*) represents him as suffering martyrdom there.

---

[*] According to Jerome (*Epist.* 103) and a Roman martyrology (quoted by Lipsius, iii. 3), the baptism took place at Bethsoron, near Hebron.

[†] The word εὐνοῦχος is sometimes applied to a high court-official, without implying castration (Gn 39^{1} LXX); but this treasurer, owing to his employment in a confidential capacity under a queen, would most probably be a eunuch literally (see ETHIOPIAN EUNUCH). Such a condition would prevent him from becoming a 'proselyte of righteousness,' but was not incompatible with his admission to worship in the temple as a 'proselyte of the gate' (Is $56^{4.5}$). The supposition that he was a Jew, born in Ethiopia, is hardly consistent with the natural interpretation of the passage. The one argument in its favour, viz. that no such objection seems to have been raised to Philip's procedure as was made in the case of Peter and Cornelius (Stokes, *Acts of the Apostles*, i. p. 412), is met by the fact that the baptism of Cornelius and his household was notorious, having been, in a manner, publicly administered (Ac $10^{24.33}$); whereas the Ethiopian was baptized without witnesses, and the circumstances would probably, at the time, become known only to a limited and sympathetic circle.

[*] According to an old Ethiopic tradition, the eunuch is represented as having evangelized the subjects of Candace or Hendake (Ludolf, *Hist. Æthiop.* iii. 1, 2; Niceph. Callist. *Hist. Ecc.* ii. 6).

[†] Jerome (*Epist.* 108) states that the chambers of the four daughters were still shown at Cæsarea in his day. An ancient Greek *menologium* (quoted by Lipsius, iii. 3) records their names as Hermione, Charitine, Irais, and Eutychiane. Hermione is stated by the same authority to have practised medicine, and to have been thrown, without injury, into a caldron of boiling water in the reign of Hadrian.

[‡] It is open for us, however, although not necessary, to regard the interventions referred to in $8^{26.39}$ as made through natural means; in the former case through a dream, in the latter through a divinely produced impulse of Philip's own mind (Stokes and Holtzmann, *in locis*).

[§] This city is usually understood to be the more celebrated Tralles in Caria; but, if we suppose it to be the other Tralles

PHILIP (HEROD).—See HEROD in vol. ii. pp. 358^b and 359^a.

PHILIPPI (Φίλιπποι).—Philippi, in Turkish *Felibedjik* or Little Philippi, to distinguish it from Philippopolis in Bulgaria, was founded (or rather re-founded, for an earlier town had existed on the site) by Philip of Macedon in the middle of the 4th cent. and called after his name. It was situated in eastern Macedonia—so near Thrace that it is sometimes spoken of as Thracian—on a steep hill rising at the edge of a great plain which stretches far inland to the north and north-west. In the opposite direction stood its port of Neapolis (the modern Kavala), 8 or 9 miles distant, at the nearest point of the coast: the road connecting the two, part of the great Egnatian road which ran across from the Ægean to the Adriatic, passed through a depression in a line of hills which stretch east and south-east of Philippi and cut it off from the sea. An immense marsh lay directly south of the town, fed by the springs which gave it its older name of *Crenides.* At the present time two streams pass one on each side of Philippi, but at some short distance from it,—the larger rising on the east and flowing to the south of the town,—and fall into this lake or marsh, which in turn is itself a source, though not the main one, of the river Dramenica, a tributary of the Strymon. If ancient authorities, however, are to be trusted, this river, known as Angitas or Gangites or Gangas, derived its name from the Philippi branch. Where the country is so marshy, the configuration of the streams may have altered since St. Paul's day.

Philippi, with the rest of the dominions of Perseus, king of Macedonia, fell under Roman domination by the victory of the consul Æmilius Paullus in 168 B.C., whose reorganization of the conquered territory, while it preserved municipal freedom and self-government and diminished taxes, aimed at destroying the political unity of Macedonia by a division into four regions; a division so strictly carried out that an inhabitant of one region could neither intermarry with nor hold property in another. Of these regions the first, which had Amphipolis for its capital, included the whole district east of the Strymon, and therewith Philippi. It is, however, doubtful to what extent this system of tetrarchies survived the formal establishment of Macedonia as a province (A.D. 146).

The event which differentiated the fate of Philippi from that of Macedonia at large was of much later date. In the autumn of B.C. 42 the party which had brought about Cæsar's death in the hope of restoring the republic was finally extinguished in the defeat of Brutus and Cassius by Antony and Octavian (afterwards Augustus) outside the walls of Philippi. The colony of Philippi, *Colonia Augusta Julia* [*Victrix*] * *Philippensium,* was founded, as the name *Julia* implies, in honour of the victory of the cause of Julius Cæsar (cf. Strabo, vii. fr. 41, κατοικία μικρά, ηὐξήθη δὲ μετὰ τὴν περὶ Βροῦτον καὶ Κάσσιον ἧτταν): and the first citizens, if we may judge from the phrase *cohors praet. Phil.* upon the coins, were soldiers of the bodyguard of Antony and Octavian. A second foundation by Augustus after the battle of Actium eleven years later, when many of the dispossessed partisans of Antony in Italy were transplanted to Dyrrhachium and Philippi (Dio, li. 4, § 6), is commemorated by the other title *Augusta.* The territory of the colony included Neapolis.

Each Roman colony was a fresh representation of the Roman people in miniature. The magistrates, elected by the citizens, or rather by the senate of the colony, fulfilled on a small scale the functions of their prototypes in Rome, and like them were attended by lictors bearing *fasces* or bundles of rods: their authority, within their district and over its inhabitants, excluded even that of the governor of the province. And Philippi, besides the normal privileges of all colonies, possessed as well the *ius Italicum,* or exemption for its territory from the rent ordinarily reserved for the Roman state over conquered countries.

About a hundred Latin inscriptions survive from Philippi: the most interesting, *CIL* III. i. 633, records the names of a *collegium* or burial guild recruited from the lower classes (including out of a total of 69, 4 slaves of the *colonia* and 3 of private persons), and entitled *cultores* or *sodales Silvani.* The guild had its *sacerdos*, its *junior* [*sacerdos*], and its *aedilis,* and had erected a temple (the gifts for which are recorded) to its tutelary deity.

Christianity first made its way to Philippi, as far as we know, in the person of St. Paul. Somewhere about A.D. 50, perhaps most probably in the spring of that year (see CHRONOLOGY OF NEW TESTAMENT, vol. i. p. 422), the apostle in the course of his second missionary journey crossed for the first time from Asia, and having set foot on European ground at the seaport of Neapolis, pushed on without delay to the mother city of Philippi, where sufficient stay was made to preach and found a Church. His companions were, from Antioch Silas (Ac 15^{40}), from Lystra Timothy (16^1), from Troas Luke (16^{10}, where the first person plural commences in the narrative).

St. Luke describes Philippi as πρώτη τῆς μερίδος Μακεδονίας πόλις κολωνία, a phrase which, as it stands, must mean *either* 'the first city in rank,' *or* 'the first city they came to,' in (that) district of Macedonia. The objections to either interpretation are serious. (1) Philippi was not the first city in rank, for Thessalonica was the capital of Macedonia as a whole, while in S.E. Macedonia, Amphipolis, distant only 30 miles from Philippi, was not only the capital of the region in the original Roman tetrarchy (see above), but was still in St. Luke's day much more than its equal in importance: Amphipolis had a separate issue of coins for the reign of each of the emperors from Augustus to Nero, while for the same period Philippi was apparently content with two, one under Augustus and one under Claudius. (2) Nor is the translation 'first city to come to' any more satisfactory. As a matter of fact the apostle first set foot in Neapolis; and in so far as Neapolis was Thracian (so Bp. Lightfoot, *Philippians*^{4}, p. 50, n. 1), Philippi must have been the same, since Neapolis was in the territory of Philippi (*CIL* III. i. p. 120). And if the geography of this interpretation is doubtful, its grammar is impossible: πρώτη is never used in this sense without qualifying words (Field, *Notes on the Translation of the New Test. ad loc.*, quoting πρώτη μετὰ τὴν Γαλατίαν, πρώτη . . . πρὸς μεσημβρίαν, πρώτη . . . ἰόντι ἀπ' Ἀχαΐης). Moreover, in either translation the τῆς before μερίδος is intolerably awkward, and so the older scribes felt: B drops the article, and the Bezan reviser (D) substitutes for πρώτη τῆς μερίδος the single word κεφαλή.

---

in Lydia, which was also the seat of a bishopric (Hierocles, *Notitiæ Episc.* p. 168), and was distant from Hierapolis only fifteen miles, the proximity of the two cities would account the more easily for Philip the Evangelist, as well as Philip the Apostle, being associated with Hierapolis.

* Ramsay, *Journal of Theological Studies*, Oct. 1899, p. 116, follows Head, *Historia Numorum*, p. 192, in adding *Victrix*: but Mommsen, *CIL* III. i. 660, denies the title; and it does not seem to be sufficiently proved from the coins.

Hort (*New Testament in Greek*, Appendix, *ad loc.*) attempted to escape these difficulties by reading Πιερίδος for μερίδος, 'a chief city of Pierian Macedonia.' But if we are to emend, it is better to read πρώτης for πρώτη τῆς, 'a city of the first region of Macedonia and a colony.' This simple emendation—it may have arisen either by the accidental reduplication of the letters τη, or from a misunderstanding of the correction if by mistake πρώτη was written originally, and -της written over it to correct it—occurred first to Joannes Clericus (according to Blass, *Philology of the Gospels*, p. 68, but we have not been able to verify the statement) and to the unnamed friend of an English divine, James Peirce (see Peirce's *Paraphrase and Notes on the Epistle of St. Paul to the Philippians*, ed. 1, A.D. 1725, ed. 2, A.D. 1733, p. 3, and L. M. Artemonius, *Initium Evangelii S. Johannis*, A.D. 1726, pt. i. p. 211); and in our own day has occurred independently to Field, *op. cit.* p. 124, Blass, *loc. cit.* and *Acta Apostolorum, ad loc.*, and to the present writer. The only possible objections appear to be (i.) that μερίς does not mean a district or region (Hort, *loc. cit.*); and (ii.) that though Philippi had belonged to the 'first region,' the whole division into tetrarchies had fallen out of memory long before. But as to (i.) μερίς is in fact found as a term for subdivisions of the Egyptian 'nomes' (Ramsay, *Church in the Roman Empire*, p. 158, note); as to (ii.) there is nothing in our present knowledge to justify so sweeping an assertion (Ramsay, *ib.*).

St. Paul was always accustomed to commence his mission within the sphere of the religious organization of Judaism. But Philippi—unlike the Cypriot towns, Pisidian Antioch, Iconium, Thessalonica, Berœa, Athens, Corinth, Ephesus (Ac $13^{5.14}$ 14^{1} $17^{1.10.17}$ 18^{4} 19^{8})—possessed apparently no synagogue, so small was the number and importance of the Jews there, and on the Sabbath St. Paul found the few Jewish worshippers at prayers beyond the gates of the city by the riverside. If we ask ourselves why under such circumstances St. Paul stopped at Philippi, the most probable answer is that what attracted him was exactly the feature which accounted for the paucity of Jews, namely, that it was not an ordinary Greek town but a Roman colony: Rome and things Roman were uppermost in the mind of St. Paul.

The reading of the Textus Receptus is οὗ ἐνομίζετο προσευχὴ εἶναι, 'where there was accustomed to be prayer'; and Blass's conjecture, *ad loc.*, ἐνόμιζον ἐν προσευχῇ εἶναι, gives a similar sense. The Western authorities, however (ἐδόκει προσευχὴ εἶναι, D; *oratio esse uidebatur*, latt.), as well as Westcott and Hort (ἐνομίζομεν προσευχὴν εἶναι, but no single uncial gives exactly this reading), say nothing about the *habitual* character of the worship there; and it would be possible, if St. Paul's visit could coincide with one of the great Jewish fasts (those of the 4th, 5th, 7th, and 10th months, Zec 8^{19}), to suppose that the riverside worship was due only to the solemnities of the day. Compare Tertullian, *de ieiunio* 16, 'Iudaicum certe ieiunium ubique celebratur, cum omissis templis per omne littus quocumque in aperto aliquando iam precem ad cælum mittunt'; by which we ought perhaps to interpret the more general words of the Decree of the Halicarnassians (Josephus, *Antiquities*, XIV. x. 23), τὰ σάββατα ἄγειν καὶ τὰ ἱερὰ συντελεῖν . . . καὶ τὰς προσευχὰς ποιεῖσθαι πρὸς τῇ θαλάττῃ κατὰ τὸ πάτριον ἔθος. Where no seashore was available, any open place, *quocumque in aperto*, appears to have answered the purpose. It will be noted that both authorities specially mention 'prayer' or 'prayers' as the distinguishing mark of this open-air service, just as St. Luke does for Philippi.* On the whole it is more probable that we are to understand that the open space by the river was the normal scene of what Jewish worship there was at Philippi.

That St. Paul 'sat' and so spoke 'to the women who had gathered' there, appears to imply both a contrast to the more formal procedure of a synagogue (St. Paul stands to preach at Pisidian Antioch, Ac 13^{16}, yet see Lk $4^{20.21}$), and also the non-existence of many worshippers beyond the (Gentile) women who here as elsewhere, especially in Macedonia (Ac 13^{50} $17^{4.12}$), were attracted to Judaism. From this class, at any rate, was drawn the first convert, Lydia the purple seller of Thyatira, who was followed by the whole *familia* of which she was the mistress; her house became the home of the apostle and the centre of the Philippian Church (see LYDIA, and cf. Ramsay, *St. Paul the Roman Traveller*, p. 214).

Among the women influenced by St. Paul, either as an attendant at the preaching by the riverside, or simply from the general spread of interest in the strangers and in the novel faith they were propagating in Philippi, was a slave girl, who performed in a small way the functions of an oracle, and gave answers like one under inspiration to whatever questions might be asked of her, her owners, of course, reaping the benefit of the fees paid for the privilege of inquiry.

As the pagan prophetess (like the prophetesses of the Montanists) was conceived of as the passive instrument of the spirit which inspired her, she would speak with its voice, not with her own, and so might be called (as Ramsay, *St. Paul*, p. 215) *ventriloqua* or ἐγγαστρίμυθος (thus the Witch of Endor in the Fathers is called both πυθώνισσα and ἐγγαστρίμυθος). For several points in the story, compare the description of a false prophet in the Shepherd of Hermas, *Mand.* xi. § 12, μισθοὺς λαμβάνει τῆς προφητείας αὐτοῦ, ἐὰν δὲ μὴ λάβῃ οὐ προφητεύει: § 2, ὡς ἐπὶ μάντιν ἔρχονται καὶ ἐπερωτῶσιν αὐτὸν τί ἄρα ἔσται αὐτοῖς: § 6, ὅλως οὐ λαλεῖ ἐὰν μὴ ἐπερωτηθῇ: § 13, κατὰ γωνίαν αὐτοῖς προφητεύει.

Daily as St. Paul passed to 'the (place of) prayer,' the girl, perhaps from some fixed station at a street corner, annoyed him by following and crying out that he and his companions were, like herself, 'slaves of (the) God,' divinely inspired to preach to the Philippians a 'way of salvation,'—a form of recommendation not at all after the mind of St. Paul,—till at last one day he turned and made use of those powers of exorcism which the early Christians never for a moment doubted that they could wield, 'in the name of Jesus Christ,' over the spirits that 'possessed' such pagan devotees. The girl, whose belief in him was no doubt very real, lost from that day forward her supposed gift; and her owners (the injury to their gains making them keenly susceptible to the injury to their religion) seized Paul and his chief companion, Silas, dragged them to the *forum*,—the great open space in a Roman city on to which the law-courts would look,—and brought them before the magistrates on the double charge of violating public order (ἐκταράσσουσιν τὴν πόλιν) and of preaching rites which for Romans at least, whatever might be the case with others, it would be illegal to accept or carry out (καταγγέλλουσιν ἔθη ἃ οὐκ ἔξεστιν ἡμῖν παραδέχεσθαι οὐδὲ ποιεῖν Ῥωμαίοις οὖσιν).

The magistrates are called ἄρχοντες in Ac 16^{19}, στρατηγοί in $16^{20.22.35.36.38}$; and Prof. Ramsay (*St. Paul*, p. 217, *Journal of Theological Studies*, Oct. 1899, p. 115) sees in St. Luke's employment of the two terms in $16^{19.20}$ a proof that the book never received its finishing touches. ἄρχοντες was the normal Greek word for a supreme board of magistrates. στρατηγός was, in later times at least, used interchangeably with ἄρχων; but it was also the technical rendering of the Latin *prætor* (so ἀντιστράτηγος=*proprætor*); and in some colonies the highest grade of magistrates were actually called after the Roman model *prætores*, so that it has been questioned whether this may not have been the case at Philippi. But it would seem that this usage was confined to the period B.C. and to the oldest group of Roman colonies outside Italy, those in *Gallia Narbonensis*. It must be taken, then, as fairly certain that the official title of the superior magistrates was not *prætor* but as in other colonies *duumvir*. [The inscription *CIL* III. Suppl. No. 7339, which speaks of one who was Quæstor in Bithynia-Pontus, Cerial Ædile, Prætor-designate, Decurion or Senator, at Philippi and in Thrace, refers to the Roman Prætorship]. *Duumvir, Duoviri*, can be represented literally in Greek by δυανδρικός, δύο ἄνδρες; but it is beyond question that a writer like St. Luke would avoid, if possible, such awkward literalism. He could only fall back on the rough equivalent στρατηγός: and his use of this Greek phrase in no way proves either that the magistrates at Philippi were *prætores*, or even that they were called so by courtesy.

The trial was never carried to an end (ἀκατακρίτους, Ac 16^{37}); popular feeling had been roused, and the magistrates, in the exercise of their general power to detain and punish suspicious characters (Mommsen, *Römisches Strafrecht*, 1899, p. 309, n. 1), summarily ordered their lictors to scourge the prisoners. A Roman citizen was by law exempt from a form of punishment which was looked upon as degrading (ὑβρισθέντες ἐν Φιλίπποις, 1 Th 2^{2}); and since on one other occasion at least St. Paul claimed his rights (Ac 22^{25}), it is possible that at Philippi too he made a protest which passed unheard or unheeded; but as he suffered scourging altogether not less than three times (τρὶς ἐραβδίσθην, 2 Co 11^{25}), it is also possible that for the moment he was silent of set purpose about his citizenship. [If it could be supposed, in face of 16$^{37.38}$, that Silas was not a citizen, the motive of his silence would be obvious]. The prisoners were then remanded with special instructions as to their safe custody; and the gaoler, no doubt rightly interpreting this as a warning against too lenient a treatment, threw them into the inner prison and made their feet fast in the stocks.

---

* There appears to be little or no evidence for any technical use of προσευχή in the sense of an informal 'place of prayer' as *opposed* to 'synagogue.' See art. SYNAGOGUE.

The ἐσωτέρα φυλακή was surrounded entirely by the outer prison, and appears to have had no light and no air except through the door: for illustrations of the inner prison and stocks, cf. (1) Epistle of the Churches of Lyons and Vienne (A.D. 177: Eusebius, *HE* v. 1), τὰς κατὰ τὴν εἱρκτὴν ἐν τῷ σκότει καὶ τῷ χαλεπωτάτῳ χωρίῳ συγκλείσεις καὶ τὰς ἐν τῷ ξύλῳ διατάσεις τῶν ποδῶν ἐπὶ πέμπτον διατεινομένων τρύπημα; (2) Acts of Perpetua (A.D. 202) § 3, post paucos dies recipimur in carcerem et expaui quia numquam experta eram tales tenebras, *ib.* paucis horis emissi in meliorem locum carceris; § 8, die quo in neruo mansimus; (3) Acts of Pionius (A.D. 250) § 11, οἱ δεσμοφύλακες . . . ἔβαλον αὐτοὺς εἰς τὸ ἐσώτερον, but afterwards they were allowed out εἰς τὸ ἔμπροσθεν; (4) Eus. *HE* vi. 39, cf. Origen (c. A.D. 250), τάς τε ὑπὸ σιδήρῳ κλοιῷ καὶ μυχοῖς εἱρκτῆς τιμωρίας καὶ ὡς . . . τοὺς πόδας ὑπὸ τέσσαρα τοῦ κολαστηρίου ξύλου παραταθεὶς διαστήματα κατασπώμενος κ.τ.λ; (5) Cyprian, *Ep.* xxxvii. 3, squalorem carceris ac receptaculi poenalis horrorem; xxxix. 2, per decem nouem dies custodia carceris sæptus in neruo ac ferro fuit. Cf. Mommsen, *Römisches Strafrecht*, p. 302.

At midnight Paul and Silas were singing at their prayers (προσευχόμενοι ὕμνουν: Jewish liturgiology is too obscure a subject for us to say whether it formally included prayers for midnight, but Ps 119$^{62.164}$ should not be overlooked; in any case, the 'hymns' may probably have been from the Psalter), when an earthquake shook the prison so violently that the bars of all the doors and the fetters of the prisoners gave way. The gaoler, supposing naturally that his prisoners had taken the opportunity to escape, and knowing that he would be held responsible for them, would have committed suicide if St. Paul had not been able to reassure him, and so turn him from his purpose. From that moment, if not before, it is clear that he attributed the convulsion of nature to the prayers and powers of his two prisoners; and he at once professed himself their convert. From the inner prison he removed them to his own house,—a violation of the spirit rather than of the letter of the magistrates' injunctions,—ministered to their temporal wants, and received from them spiritual instruction and baptism. As in Lydia's case, the whole household came over to Christianity with its head.

As soon as day broke, the *duoviri*, doubtless thinking to avoid all further complications by seeing that the objects of the riot left Philippi before the excitement should burst out afresh, sent their lictors to the prison with an order terminating all further proceedings, which, as Roman prisons were used only as places of detention before or during trial, was equivalent to a direct order of release. St. Paul refused to leave in this undignified fashion; he advertised the fact that he and Silas were citizens; and he demanded a personal acknowledgment of their error by the magistrates. This was willingly accorded as the price of the departure of the unwelcome strangers, whose citizenship not only rendered illegal the previous proceedings, but would complicate any future proceedings that the owners or the populace might choose to press against them. St. Paul, though he would not forego a formal farewell to his hostess and his converts, did not further contest the demand that he should leave Philippi, where, indeed, his presence might for the moment hinder rather than further the work of the gospel. But the foundations of a flourishing Church had been laid; and Luke, the writer of the Acts, was (to judge from the dropping of the first person plural between 16^{17} and 20^{5}) left in charge of it.

Five years later (perhaps in A.D. 55) St Paul, on his way to Corinth in the course of the third missionary journey, passed again through Macedonia and exhorted at length the Christians of 'those parts' (παρακαλέσας αὐτοὺς λόγῳ πολλῷ, Ac 20^{2}). We may be certain that a visit to Philippi was included, for the time occupied in travelling from Ephesus to Corinth was apparently as much as six months (cf. 1 Co 16^{8} with Ac 20$^{2.6}$). On his return from Corinth in the early spring he paid another and unintended visit (Ac 20^{3}), the last of which we have a definite record; and though it delayed the journey to Jerusalem, which he was so anxious to accomplish by Pentecost (Ac 20^{16}), he spent with the Philippian Church the last *pascha* which he was to enjoy in freedom for many years, while his (mostly Gentile?) companions went on and awaited him at Troas. At Philippi the 'we-passages' commence again (20^{5}): St. Luke appears to have joined St. Paul again at this point, and probably stayed by him during the rest of the period of the Acts.

The bonds of peculiar affection which united St. Paul to his Philippian converts are impressed on every line of the letter (see PHILIPPIANS, EPISTLE TO THE) which he wrote to them from Rome, probably at the beginning of his first captivity there (c. A.D. 59-60).

That St. Paul again visited Philippi during the eastern travels implied in the Pastoral Epistles, is not recorded, but may almost be assumed. The apostle journeyed to Macedonia from Ephesus (1 Ti 1^{3}), and the journey would naturally be made *viâ* Troas and Philippi. And if the recorded visit to Troas (2 Ti 4^{13}) belongs, as is probable, to a different and later occasion, the indications of the Pastoral Epistles suggest two visits to Philippi rather than one.

At the beginning of the 2nd cent. the Church of Philippi emerges once more for a moment into the light of history, when it received a visit from one apostolic father and a letter from another. Some time in the reign of Trajan (*i.e.* before A.D. 117), Ignatius, bishop of Antioch, was condemned to death as a Christian, and sent in charge of a guard of soldiers to be thrown to the beasts at Rome. His route, as we know from his Epistles, lay through Philadelphia, Smyrna, and Troas. Thence, like St. Paul, he must have crossed to Neapolis and so reached Philippi (his guards were probably making for one of the Adriatic ports by way of the Egnatian road), since the Church of Philippi 'welcomed' and 'escorted' him, and on his departure wrote two letters, one to the Church at Antioch consoling them for the loss of their bishop, and one to Polycarp of Smyrna asking for copies of as many as possible of the letters which Ignatius had written in Asia Minor.* St. Polycarp's answer is his *Epistle to the Philippians*, the sole source of our knowledge of this episode of Philippian history. We learn from it, further, that scandal had been caused at Philippi by the conduct of the presbyter Valens (the name is singularly frequent in Philippian inscriptions), and his wife, who had apparently, like Ananias and Sapphira, combined to carry out some dishonest financial transaction. Avarice would seem specially reprehensible to a Church which had distinguished itself for liberality as the Philippian Church had done in St. Paul's day (Ph 4$^{10-18}$; and of Macedonia generally, 2 Co 11$^{8.9}$ 8$^{1-5}$).

Of the subsequent history of the Philippian Church nothing seems to be known till we meet the names of a few of its bishops among the subscriptions to 4th and 5th cent. councils: 'Porphyrius a Macedonia de Philippis' at Sardica in A.D. 344 (the Church of Philippi was therefore Athanasian, not Arian); 'Flaviano Philippensium qui Rufi quoque reuerendissimi Thessalonicensium episcopi locum gerebat' (he signed next after the bishops of Alexandria, Jerusalem, and Ephesus) at the œcumenical Council of Ephesus in A.D. 431; 'Sozon Philippi' at the Latrocinium of Ephesus in A.D. 449, and the same bishop, 'Sozon Philippensis,' at the Council of Chalcedon, which undid the work of the Latrocinium, in A.D. 451.

---

* It is not impossible that this request of the Philippians was the origin of the collection of a *corpus* of the Ignatian letters, and therewith of their preservation for later ages.

LITERATURE.—For the topography—Leake, *Travels in Northern Greece*, iii. (1835), esp. pp. 214–225; and the Austrian and Bulgarian staff maps of Macedonia. For the secular history—Livy, xlv. 29; Diodorus; Strabo, vii. fr. 41; Dio, li. 4, § 6, and the *Corpus Inscriptionum Latinarum*, III. i. 633–707, III. *Supplementum*, 7337–7358. i. THE CHURCH OF PHILIPPI.—On the town see preceding article. The Church of Philippi was founded by St. Paul during his Second Missionary Journey, about the year A.D. 52 [Turner, 50]; it was the first Church which he founded on the soil of Europe (Ac $16^{12ff.}$). On his arrival in the city, according to his custom, he sought out the Jews, who do not appear to have been numerous, for they had no synagogue within the city, only a 'place of prayer' (προσευχή) outside the gates, on the banks of the river Gangites. Paul, accompanied by Silas and Timothy, and possibly by Luke (the use of 'we' in Ac 16^{13}, and the graphic character of the whole narrative, betray the hand of an eye-witness), repaired to this place on the Sabbath day and spoke to some women whom they found there. A certain God-fearing proselyte named Lydia [or this may be simply an ethnic name='the Lydian'; see above, p. 177^b], from the city of Thyatira, received the word, and was baptized with her household. Paul and his companions remained for some time in Philippi, continuing to frequent the Jewish place of prayer; there does not appear to have taken place any breach between him and the Jews on this occasion. The incident of the maid with the 'spirit of divination,' and the subsequent arrest of Paul and Silas, led to their abrupt departure, but not until the nucleus of a Christian Church had been formed. The author of the Book of Acts says (16^{40}) that before leaving Philippi, Paul and Silas entered the house of Lydia and comforted 'the brethren.'

Two features in the narrative deserve special notice, for they were not without influence on the subsequent history of the Philippian Church. The first is that the Jews were few in number; the second, that the earliest converts were women. To the first we may ascribe the failure of the Judaizers to gain a footing within this Church; and perhaps the second explains the specially kindly interest taken by the Philippian Church in the personal comfort of the apostle. It may also account for the circumstance that the disputes in the Philippian Church were about personal rather than doctrinal questions. It has been said that the narratives in Ac 16^{13} $17^{4.12}$ indicate—there is some corroborative evidence in the inscriptions—that in Macedonia women held a higher position than elsewhere. Female influence certainly continued strong in the Church of Philippi, for Paul regarded a personal quarrel between two of his female converts as a serious danger to the Church (Ph $4^{2.3}$).

The Church founded by Paul and his companions continued to prosper. It suffered persecution (2 Co 8^2), but remained conspicuously faithful to the gospel of Paul and to Paul himself. If we are to understand 'bishops,' 'deacons' (Ph 1^1) as names of ecclesiastical officers, it appears to have made more rapid progress in organization than other Churches (see on this point below, iv. n. 2). The Churches of Macedonia, and we may be sure Philippi was not an exception, manifested their attachment to Paul by the alacrity with which they collected money for the poor saints of Jerusalem, although they were themselves in deep poverty (2 Co 8^3). The Philippians also sent repeated personal gifts to Paul when he was in Thessalonica and in Corinth (2 Co 8^9, Ph $4^{15.16}$); and, lastly, when he was in Rome their care for him again revived, and they sent a gift through Epaphroditus, who was instructed to remain in Rome and minister to the apostle (Ph 4^{18}).

It is probable that the friendship between Paul and the Philippians was cemented by more frequent intercourse than we know of. Polycarp (*Philip.* iii. 2) speaks of the 'letters' written by Paul to the Philippians; and, although this may be a mere inaccuracy on the part of Polycarp, or even if the plur. ἐπιστολαί may be used to denote a single letter (see Lightfoot, *ad loc.*), it is most improbable that Paul made no written acknowledgment of the repeated gifts. As Philippi lay on the Via Egnatia, he must have frequently received tidings of its Church from friends and messengers (Ac 19^{22}). In the year 57 [Turner, 55] Philippi had two visits from the apostle in person; and it was in Macedonia, and almost certainly in Philippi, that he spent the anxious days of waiting for Titus (2 Co 2^{12} $7^{5.6}$). There also he wrote, in all probability, the Second Epistle to the Corinthians (2 Co 2^{13} 7^5 8^1 $9^{2.4}$). If that was the case, Paul passed one of the most critical seasons in his life, when his entire life-work seemed in danger, among the Philippians; and at such seasons friendships are deepened. A second visit was paid to Philippi when Paul kept the Paschal feast with his converts before leaving for Jerusalem; and the language in Acts suggests that it was with difficulty that he tore himself away from them (Ac $20^{5.6}$).

In his Epistle, Paul expresses a hope that he would again visit the Philippians after his release from his Roman captivity (Ph 2^{24}). Whether this hope was fulfilled we cannot say. If he was released,—as seems more probable,—and the Pastoral Epistles are to be accepted as a genuine record of his subsequent labours, he certainly paid one visit to Philippi after his release (1 Ti 1^3), and probably more than one.

ii. THE TIME, PLACE, AND CIRCUMSTANCES OF WRITING.—When St. Paul wrote the Epistle to the Philippians, he was a prisoner (Ph $1^{7.13.14.17}$), and the place of his captivity was almost certainly Rome. He sends greetings from those of Cæsar's household (4^{22}). A large and active Christian Church is in his neighbourhood, of whose doings he is fully cognizant (1^{14-17}). A number of friends, old and new, are beside him, and appear to have free access to him ($4^{21.22}$); he sends letters and messengers to distant Churches, and messengers come from other lands to visit him (4^{18}). All this is in harmony with his Roman life as described in Acts (28^{30}): it is improbable that he enjoyed the same liberty in Cæsarea, where, moreover, as far as we know, there was no Christian Church. One expression only in the Epistle suggests Cæsarea. In 1^{13} the apostle writes that his bonds had become manifest in Christ ἐν ὅλῳ τῷ πραιτωρίῳ. When in Cæsarea, Paul was confined in the prætorium of Herod (Ac 23^{35}). Usage forbids us to understand *prætorium* as the imperial palace on the Palatine; nor does it seem to have been used (as is held by Ellicott, Meyer, etc.) as a name for the barracks of the imperial guard (see Lightfoot, *Philip.* p. 99). It is a designation, however, frequently given by Latin writers (*e.g.* Tac. *Hist.* ii. 11) and by Josephus (*Ant.* XIX. iii. 1) to the prætorian or imperial guard; and in this sense most modern commentators understand it here. Mommsen (*Berlin. Akadem. Sitzungsberichte*, 1895, p. 495 ff.), who is followed by Ramsay (*St. Paul the Traveller*, p. 357), maintains that it is here a name for the supreme imperial court, before which Paul appeared. This explanation relieves Paul's words of that note of exaggeration which they contain according to the former interpretation; for it is not possible that the knowledge of Paul as a bondsman of Christ should have pervaded the ranks of the immense imperial guard. See, further, art. PRÆTORIUM.

If Paul wrote the Epistle in Rome, it was written between 62 and 64 [Turner, 59 and 61]; or if Harnack's chronology be adopted, between 57 and 59. The probability is that it is the last of the Epistles of the captivity, and that it belongs to its closing period. (Bleek, Lightfoot, Sanday, Hort, *et al.* would place it first among the Epistles of the captivity; the view advocated in this art. is that of Zahn, Gwynn, Ramsay, *et al.*). A good deal had happened in Rome since Paul's arrival. If we accept Mommsen's view (see above), he had already appeared before his judges; and he was looking forward to a speedy settlement of his case (2^{24}). The assumption of Zahn (*Einl. in d. NT*), that when the apostle wrote, the period of *libera custodia* had ended, and that he was in strict durance, rests upon a slender foundation, and is hardly consistent with the free intercourse with his friends implied in 2^{19}.

St. Paul's Roman life, as mirrored in the Epistle to the Philippians, presents that blending of joy and sorrow, of unexpected triumphs and baffled hopes so familiar to the reader of the Book of Acts and of the Pauline Epistles. For years he had longed to see Rome that he might preach the gospel in that great gathering-place of the nations, and communicate some spiritual gift to the Church of the metropolis of the world. He entered Rome, however, in a guise that seemed to mock all his hopes of fruitful apostolic labour; but he was able to assure the Philippians that the frustration was only in appearance; for his bonds in Christ had become manifest in a manner which had spread to wide circles the knowledge of Christ (1^{13}); and his presence as a captive for Christ's sake had quickened evangelistic zeal within the Roman Church (1^{14}). But an element of personal bitterness mingled with his joy at the success of the preaching of the gospel. Some of the preachers whom his inspiring presence had sent forth to preach were animated by feelings of animosity towards himself, and preached Christ 'of faction,' hoping, as the apostle expresses it, to add affliction to his bonds (1^{17}). This can hardly mean that they hoped to increase the rigour of his captivity, for if they had irritated the authorities by their preaching, they would themselves have been the first sufferers; they rather wished to make him feel more acutely the limitations of his captive condition as compared with the unfettered freedom enjoyed by his rivals. It is the opinion of some critics (*e.g.* E. Haupt) that the cause of the hostility of those preachers was simply jealousy of the masterful alien who had become the leader of the Christian community in Rome. Had they been Judaizers, it is urged, Paul could not have rejoiced in their preaching, after his emphatic condemnation of different gospels in the Ep. to the Galatians (1^{6} 5^{2}). It is true that there do not seem to have been in Rome, when Paul wrote to the Romans, Judaizers of the extreme Galatian type. The Roman Church appears to have contained a majority of Gentile Christians, but there must have been in it a considerable minority of Jewish Christians, some of whom were anxious to preserve certain Jewish rites and customs. These may have taken alarm at the immense accession to the strength of the other party by the arrival in their midst of the great representative of anti-legal Christianity. It seems therefore not improbable, and it is certainly more charitable to assume it, that those who preached Christ 'of faction' were under the influence of a more respectable motive than personal jealousy of the apostle. St. Paul might rejoice in their preaching, because through it men heard of Christ who would otherwise not have heard the gospel at all. It was otherwise when, as in the case of the Galatian Judaizers, an attempt was made to substitute a gospel trammelled by legal conditions for the free gospel of the grace of God, which the Galatians had already received.

During his Roman captivity St. Paul was solaced by the society of a number of friends. Timothy, Luke, Epaphroditus, Aristarchus, Epaphras, Tychicus, John Mark, Demas, Jesus Justus, and Onesimus [see separate articles on these names] were all more or less frequent visitors in the hired house (μίσθωμα, Ac 28^{30}) in Rome, and not improbably often lodged under its roof. To a man like Paul, who possessed a genius for friendship, the presence of his friends must have been a source of unfailing joy and comfort; and he owed to their ministrations not only the personal comfort which he enjoyed, but his opportunities of missionary effort in Rome and elsewhere; for he frequently sent them out on apostolic missions. But one expression in the Ep. to the Philippians shows that the element of disappointment was not altogether absent even when he was in the society of his chosen friends, and that they did not always come up to the apostle's high standard of self-forgetfulness in the service of Christ. He writes ($2^{19.\ 20}$), 'I hope in the Lord Jesus to send Timothy shortly. For I have no man likeminded who will care genuinely for your state. For they all seek their own, not the things of Jesus Christ.' It has been said that if these words are to be taken seriously, they show that Paul, like Luther in his old age, fell into a mood of morose complaining, which made him unjust towards his fellow-workers. But we need not apply them to all the friends of whom mention has been made above, only to those, and perhaps few, who happened to be present with him at the time he was writing; some of these appear to have pleaded private business, and to have excited Paul's easily roused indignation by their apparent indifference to a mission which was dear to his heart. '"All,"' writes Jülicher (*Einl. in d. NT*), 'is without doubt hyperbolical. Paul was a man; and he had a right to give expression in his letters to his passing moods.'

It is generally supposed that Epaphroditus was the bearer of the letter to Philippi, and that he was also the amanuensis. Lightfoot's judgment is that 'on the whole it seems most probable' that 4^{3} is an appeal to Epaphroditus, who was by Paul's side and writing down his words, to use his best endeavour to heal the grievous quarrel between Euodia and Syntyche. Others consider this unnatural, and prefer to take Σύνζυγος as a proper name, and to explain γνήσιος as 'truly called.' The return of Epaphroditus and the fitness of sending thanks for the gifts received, through the person who had brought them, was probably the immediate occasion of the Epistle.

iii. THE CONTENTS OF THE EPISTLE.—The Epistle begins in St. Paul's usual manner, with this exception, that the bishops and deacons are singled out for special greeting ($1^{1.2}$). The apostle goes on to say that the remembrance of the Philippians always awakens in his heart thankfulness to God, and that his prayers for them are accompanied with joy, because of their fellowship in the furtherance of the gospel from the day they first heard it (vv.$^{3-8}$). A prayer follows, that their love may abound more and more, and that it may be accompanied with knowledge and discernment so that they shall be able to prove things that differ, and be found free of offence unto the day of Christ (vv.$^{9-11}$).

The apostle then turns to his own affairs, which are likewise those of the gospel. His captivity, instead of proving a calamity to the cause of Christ, as might have been feared, had contributed to the spread of the glad tidings, his bonds having become manifest in Christ throughout the whole prætorium and to the rest. His captivity had likewise emboldened many brethren to speak the word of God without fear; and although some of the preachers had been animated by unworthy feelings towards himself, he was able to rejoice that they had proclaimed Christ. For himself, he cherished the confident expectation and hope that Christ would be magnified in him, whether by his life or by his death. Death was to him a more attractive prospect than life, for after death he should be with Christ; but his life was more needful for the Philippians and his other converts, and he felt confident that he would be spared for their sakes. Only one thing could damp the joyful confidence of the apostle, evil tidings of his converts, and he therefore exhorts them to live in a manner worthy of the gospel, and not to be intimidated by adversaries (vv.$^{12-30}$).

An appeal to the Philippians follows, to fulfil the apostle's joy by living lives of brotherly love. They are warned to shun the spirit of faction and vainglory, and to cultivate lowliness of mind. In their Lord Christ, who exchanged the form of God for the form of a servant (Bruce, *Humil. of Christ*, p. 28; see Gifford, *Incarnation*, p. 22 ff., and below, iv. n. 2), they had before them an example of lowliness of mind, and in His subsequent exaltation, a proof of God's approval of the lowly mind (2^{1-11}).

The apostle then repeats certain warnings already given against disputings and murmurings, and entreats the Philippians to live as children of God. His absence ought to act as an additional incentive to more strenuous efforts on their part to work out their own salvation with fear and trembling (vv.$^{12-18}$).

The apostle intimates his intention to send Timothy to visit Philippi, that he may comfort them, and bring tidings of them to himself. Timothy is one who will truly care for their welfare; and such men were at the time rare among the apostle's companions, for they all seek their own, not the things of Jesus Christ. The apostle explains that he has sent back Epaphroditus whom the Philippians had sent to minister to him, because Epaphroditus, after a dangerous illness, had been seized with a longing for his home. He had, however, done noble service to the apostle, and deserved the best reception from his fellow-Christians in Philippi on his home-coming. The passage ends with the words, 'Finally, my brethren, rejoice in the Lord' (2^{19}–3^{1a}).

The last words of the former paragraph seemed to indicate that the apostle was about to close his letter. But a new paragraph begins with 3^{1b}, in which he goes on to state that he does not hesitate to repeat warnings formerly given, as he knows that they are a means of safety for his converts. An impassioned invective follows against the 'dogs' of the concision who were always barking at him. Their worship, which they were so eager to introduce among all Christians, was a worship in the flesh, and not by the Spirit of God. Paul had himself possessed, in all their fulness, the fleshly privileges of which the Judaizers boasted, and had renounced them that he might gain Christ in their stead, and experience the power of His resurrection, and that fellowship in Christ's sufferings through which lies the path to a joyful resurrection. The apostle adds that he is aware that his own apprehension of the blessings of the Christian calling is as yet incomplete, but he describes himself as one who is forgetting the things that are behind, and stretching forward to the things which are before. A warning reference follows to some who are spoken of as the enemies of the cross of Christ, not apparently because of their opposition to the gospel, but because of their worldly and licentious lives. These men mind earthly things; but the citizenship of the Christian is in heaven. The passage concludes with a general exhortation to Christian steadfastness (3^{1b}–4^{1}). An entreaty follows to two women, Euodia and Syntyche, who had been formerly fellow-labourers with Paul, to be of one mind in the Lord; and an unnamed true yoke-fellow (or perhaps [see above] a friend named *Synzygus*) is exhorted to labour to bring about the desired reconciliation. All are exhorted to rejoice in the Lord, and to show by their gentle and forbearing behaviour towards all men that they believed their Lord to be at hand. Their needs should be laid before the Lord in prayer, and the peace of God—a better defence than all the devices of men—would stand sentinel over their hearts and thoughts. After another 'finally,' a passage follows which seems to breathe the spirit of the philosophic moralist rather than of the Christian apostle. Let them open their minds and hearts to the contemplation of all true and beautiful thoughts, of all fair deeds wherever they are to be seen (4^{2-9}).

St. Paul then gives thanks for the gift the Philippians had sent through Epaphroditus, which he valued because of the spirit of which it was the manifestation, rather than for itself, for he was not in need. The Epistle closes with salutations and the Pauline benediction (vv.$^{10-\text{end}}$).

iv. THE CHARACTERISTICS OF THE EPISTLE.—In the Ep. to the Philippians and in the Second Ep. to the Corinthians, St. Paul's personal character is more clearly revealed than in any of his other writings. But the two Epistles disclose different sides of his character. In 2 Co he is writing to adversaries and to lukewarm or suspicious friends, and we mark how acutely he felt personal slights and unworthy accusations. He pleads his own merits and services in a manner which shows that self-esteem was by no means dead within him, and he verges on what appears to the modern reader boastfulness. In writing to the Philippians, he is addressing some of the most trusted friends he had in the world. This trust in his readers gives a pleasing sense of repose to the Epistle. It accounts for the epistolary undress of the language, for the want of plan, for the repetitions, and for the obvious reluctance to leave off. There were some things amiss even in Philippi, and Paul had to administer certain reproofs, but he is less fearful than on other occasions, having a full conviction that God would perfect His good work among them, and reveal His will to them in those matters which were as yet obscure to them. Chapter 3 forms an exception to the general restfulness of tone observable in the Epistle (see Note 3 below). Critics, however, have discovered that there existed a soreness in the mind of the Philippians about Paul's reception of their pecuniary gifts. Zahn (*Einl. in d. NT*) maintains that they had written a remonstrance to him complaining that he had not suitably acknowledged it. Another critic (Holsten) finds in St. Paul's words 4^{10-19} 'thankless thanks.' A third (E. Haupt), however, regards his acknowledgment as a veritable masterpiece of delicate and considerate courtesy. The practice of lauding the courtesy of the apostle has been somewhat overdone. St. Paul could be very courteous, but his courtesy was always kept in strict subordination to his duties as a counsellor and as a reprover. To say not only that he did not desire, but that he did not require the gift, was not precisely the courtesy of the courtier; and was likely enough to bring a shade of disappointment to the countenances of the poor people who had sent it. But the apostle evidently recognized that they were in some danger of exaggerating the value of the money gift. He said, therefore, with all plainness of speech, that to him its value consisted solely in the evidence it gave of their personal affection, and of their willingness to make sacrifices for the cause of God.

NOTE 1.—Ph 1^1 *σὺν ἐπισκόποις καὶ διακόνοις.* This is the first (unless we take into account the words attributed to Paul in Ac 20^{28}) mention in the NT of bishops. Its presence in a letter purporting to be written by St. Paul has excited suspicion of the genuineness of the letter, as the episcopal office (at least in its monarchical form) is generally admitted to have originated at a later period. It is very doubtful, however, if St. Paul here refers to the holders of a definite ecclesiastical office. When writing to the Thessalonians, he spoke of their leaders as *οἱ προιστάμενοι* (1 Th 5^{12}). In the Ep. to the Ephesians those exercising episcopal functions are named *ποιμένες καὶ διδάσκαλοι* (Eph 4^{11}). In the Ep. to the Hebrews they are termed *ἡγούμενοι* (He 13^{17}). The apostle here names those 'bishops' who were elsewhere called by other names, but who exercised the same functions. Whether this was the first occasion on which the word was uttered in the Christian Church, we cannot say; probably it had been already given by Paul or by others to Philippian Church rulers; but it was a name, once given, that was likely soon to supersede all others on the principle of the survival of the fittest. It was well known and understood by Greeks; and not less so by the Jews, for it is common in the Septuagint; and it expresses by a single word at once the dignity and the duties of the rulers of the Church.

E. Haupt suggests that the bishops and deacons are here selected for special greeting because they had taken a leading part in arranging for and collecting the gift sent by Epaphroditus. With regard to the two classes of persons named, Haupt writes: 'It is possible that there is no reference here to the offices. In 1 Th 5^{12} the same persons are certainly designated by the expressions *οἱ κοπιῶντες* and *οἱ προιστάμενοι*; and it is at least probable that the same is the case with regard to the *ποιμενες* and *διδάσκαλοι* of Eph 4^{11}. Clement (*1 Ep.* xlii. 5) ascribes presidency to *ἐπίσκοποι* and *διάκονοι* alike. It is, therefore, possible that here *ἐπίσκοποι* and *διάκονοι* are to be understood as applying to the same persons; and that here as in the other Pauline Epistles, there was as yet no fixed terminology for the office of president' (*Die Gefangenschaftsbriefe*, p. 3). See, further, on the subject of this note, Hort, *Ecclesia*, 111 f.

NOTE 2.—Ph 2^{5-11}. This passage has been pressed into the service of speculative theology, and many attempts have been made to extract from it an apostolic doctrine of the relations of the Divine and human natures of our Lord. It is very doubtful, however, if the apostle had any intention of formulating, or even of hinting at the meaning which his words are supposed to bear. In v.^{4} he had uttered a warning against factiousness and vain glory, and a counsel follows to cultivate lowliness of mind. Of this voluntary choice of lowliness, Christ was their great example, for He had exchanged His heavenly glory for the life of humanity,—for a life which ended in a death of shame.

According to some commentators the words *ὃς ἐν μορφῇ θεοῦ ὑπάρχων οὐχ ἁρπαγμὸν ἡγήσατο τὸ εἶναι ἴσα θεω* refer to the lowliness of spirit exhibited by the Son during His pre-existent life. Although in the form of God, He did not ambitiously snatch at equality with the Father. If this be the meaning, it is a thought strangely foreign to the ordinary thought of St. Paul to hint even at a possible rivalry between the Father and the Son. Nor do the words force us to adopt this interpretation. The word *μορφή* as distinguished from *σχῆμα* denotes that which is essential to the subject, that which properly belongs to its nature; and the words *τὸ εἶναι ἴσα θεῷ* need not express a different, but the same idea. Christ being in the form of God, therefore possessed equality with God. The only word which creates difficulty is *ἁρπαγμός*, which, according to its termination, signifies 'a snatching,' not 'the thing snatched.' But substantives in *-μος* are frequently used to describe the concrete thing (*e.g.* *πειρασμός*, *πορισμός*, *δεσμός*). *Ἁρπαγμός* occurs only once in classical writers in a passage in Plutarch (*Mor.* p. 12 A). So we cannot say with certainty whether or not it was ever employed in the passive sense. It was certainly so used by the Greek Fathers, who were writing in their native tongue. In a number of passages the Fathers employ the expression *ἁρπαγμόν τι ποιεῖσθαι* as synonymous with the more ordinary expression *ἅρπαγμά τι ποιεῖσθαι.* If we may so translate *ἁρπαγμός* here, the meaning is that Christ did not regard the equality with God which He possessed, as a prize to be eagerly grasped and retained, but of His own will surrendered it for the condition of lowliness. The verb *κενοῦν* (Ro 4^{14}, 1 Co 1^{17} 9^{15}) refers to this surrender by Christ of His heavenly glory and dignity, and the manner of surrender is explained in the expression that follows—*μορφὴν δούλου λαβών.* To answer the questions of speculative theology as to the exact relation which continued to exist between the 'two natures' of Christ, was entirely foreign to the purpose of St. Paul's exhortation. 'It contains,' writes Zahn (*Einl. in d. NT*), 'hardly more dogmatical teaching than the sentence in 2 Co 8^9.'

NOTE 3.—Ph 3^{1b-20}. This passage does not harmonize either in substance or in tone, with the rest of the Epistle. It almost looks as if it had been torn out of its connexion in the Ep. to the Galatians, or in the 2nd Ep. to the Corinthians. It has certainly more kinship with those Epistles than with the Epistle in which it stands. It consists of a passionate invective against the Judaizers, reminding us of Galatians, followed by a vindication of St. Paul's own position as the possessor of all the privileges of which the Judaizers were fond of boasting.

It is extremely difficult to discover a fitting connexion between it and the preceding paragraph, which concludes with the words, 'Finally, my brethren, rejoice in the Lord.' Some commentators (*e.g.* Bengel, B. Weiss, Klöpper) have seen a link of connexion in the circumstance that Christian joy was obscured by the practice of Judaic rites which diverted the gaze from Christ: 'Gaudium spirituale optimam affert certitudinem contra errores, Judaicos præsertim' (Bengel). But a connexion so delicately hinted, when the Judaizers were in question, is unlike St. Paul. Lightfoot gives up the attempt to establish an inner connexion of the passage with what goes before. He conjectures that the apostle was interrupted when writing the letter. In the interval something occurred in Rome which reminded him of the restless propagandism of the Judaizing missionaries. 'What if they should interfere at Philippi as they were doing at Rome, and tamper with the faith and loyalty of his converts? With this thought weighing upon his spirit he resumes his letter.' But a device of this character rather suggests the interpreter in despair. We prefer the explanation of E. Haupt, who remarks that the fragmentary character of Paul's closing exhortations makes it unnecessary to look for a connexion with the foregoing passage, if a possible danger to the Philippians from the Judaizers was present to his mind. That he is speaking of the Judaizers sufficiently explains the sudden change of tone to severity and solemn warning; for the mention of those plotters against the peace of his Churches always excited the indignation of the apostle. It also accounts for the introduction of the vindication of his own ancestral privileges as a Hebrew of the Hebrews, and as one who had always been found blameless as touching the righteousness which is of the law; for the apostle was aware that it was the invariable practice of the Judaizers to indulge in detraction of himself, whom they regarded as the chief obstacle to their designs upon the freedom of the Church.

v. THE GENUINENESS AND INTEGRITY OF THE EPISTLE.—The genuineness of Philippians was denied by Baur and his scholars Schwegler, Volkmar, etc., and by Hitzig. The mention of bishops and deacons in the greeting betrayed, they maintained, a later date than the lifetime of St. Paul. They found in it, moreover, evident traces of the Gnosticism of the 2nd century. Its teaching regarding the Kenosis of Christ (2^6) was a reflexion of the Valentinian myth of the fall of Sophia from the Pleroma to the Kenoma. In 2^8 they found the Gnostic Docetic teaching about the body of Christ; and in 2^{10} Marcion's doctrine of a *Descensus ad Inferos*. In Clement, who is mentioned in 4^3, they perceived a reference to the Clement of the Clementine Romances. The design of the Epistle, according to Baur, was to repel Ebionite assaults, and to promote unity between the two sections of the Church. The views of Baur with regard to this Epistle possess at present only a historical interest. The Epistle to the Philippians is accepted, if not by all, at least by a great majority of NT critics. Many who reject Ephesians and are doubtful of Colossians (*e.g.* Jülicher, Hilgenfeld, Pfleiderer, Lipsius), accept Philippians as the genuine work of the apostle. Holsten in his latest work (*Paulinische Theologie*, 1898), although he continued to place it among the Epistles wrongly ascribed to Paul, admitted that its teaching is wholly Pauline. A theory was broached recently by Voelter (*ThT*, 1892) that the Epistle is in part the work of Paul, in part by another hand. The genuine parts are, according to Voelter, 1$^{1-7. 12-14. 18-28}$ 2$^{17-29}$ 4$^{10-21. 23}$. The remaining parts are not genuine. Spitta (*Zur Geschichte u. Lit. d. Urchristenthums*, 1893) also denies the integrity of the Epistle. C. Clemen (*Die Einheit d. paulin. Briefe*, 1894), while rejecting the theory of Voelter and defending the genuineness of the whole of the Epistle, maintains that it consists of two letters of the apostle, written at different times, and made into one by an editor. 2$^{19-24}$ 3^{2}–4^{3} 4$^{8. 9}$ he holds to belong to the second letter. The expression of Polycarp, that Paul wrote 'letters' to the Philippians, is relied upon as giving a certain traditional authority to this theory. Did the portions which are considered as belonging to different letters follow one another consecutively, the theory might deserve some consideration; for two letters by the same author might easily have got fastened together, and would in time have been regarded as one letter. But it is hard to see what motives could have induced an editor to transform two connected letters into a document of artificial piecework. Chapter 3 alone gives some colour to the idea that foreign matter may have found its way into the Epistle, but is not sufficient to lead us to accept Clemen's theory.

PHILISTIA.—See next article, and PALESTINE.

PHILISTINES (פְּלִשְׁתִּים, in Am 9^{7} and 1 Ch 14^{10} [*Kethîbh*] פְּלִשְׁתִּיִּים; LXX Φυλιστιείμ in the Hexateuch, and ἀλλόφυλοι elsewhere; in Josephus and other Greek writers Φυλιστῖνοι or Παλαιστῖνοι).—'Philistines' is the gentilic plural of פְּלֶשֶׁת, in AV 'Palestina,' 'Palestine,' 'the Philistines,' but in RV always 'Philistia'; in Assyr. '*Palastu*,' '*Pilistu*'; in Gr. Παλαιστίνη, but in LXX always transmuted into the word for 'Philistines' (Ex 15^{14}, Is 14$^{29. 31}$, Ps 60^{8} 83^{7} 87^{4} 108^{9}, Jl 3^{4}). The Hebrew name as well as the Greek has been explained, though with very doubtful warrant, as by derivation denoting 'immigrants.'

1. *The Name.*—It is probably Semitic. It has a peculiar grammatical use. The Hebrew has two usual ways of designating a people as such. One way is by the use of the primitive noun without modification, just as proper names of persons are used. For example, 'Asshur,' 'Assyrian,' 'the Assyrian,' 'the Assyrians' are in Hebrew all alike *Asshur*, this noun denoting either the founder, the country, the nation, or the people, and in each meaning used in the masculine singular, and without the article. But no such use is ever made of any primitive from which *Pĕlishtîm* might be derived. The other way is by the use of the gentilic adjective in the masculine singular, with the article. We have, for example, 'the Moabite,' 'the Jebusite,' 'the Ekronite,' 'the Gittite,' in the singular, alike for an individual and for the people as a whole, though the English versions pluralize words of this class when they denote peoples. In contrast with this, the word *Pĕlishtî* is used in the singular only of individuals, the instances being Goliath (1 S 17$^{8. 10}$ and often) and the Philistine of 2 S 21^{17}, and is always plural when it denotes the Philistine people. Further, it is regularly used without the article, though there are some exceptions, *e.g.* Jos 13^{2}, 1 S 4^{7} 7^{13} 13^{20} 17$^{51f.}$, 2 S 5^{19b} 21^{12} (*Keth.*), 1 Ch 11^{13a}, 2 Ch 21^{16}. These facts differentiate this name, in a very marked way, from most other biblical names of peoples.

This differentiation becomes the more marked when we note that it serves to affiliate the Philistine name in certain directions, as well as to sever it in other directions. Perhaps the name *Caphtōrîm* and the six other unusual names mentioned with *Pĕlishtîm* in Gn 10$^{13. 14}$ follow completely the same usage, though the number of instances is too small to be decisive. The word *Rĕphāîm*, when used as a gentilic name, follows the same usage; and the other proper names of the giant peoples follow it in that they are used in the plural (see GIANT, etc.). The name מִצְרִי, denoting the Egyptian people, is plural except in Ezr 9^{1}. The words כּוּשִׁי, 'Ethiopian,' לוּבִי, 'Lybian,' כַּשְׂדִּי, 'Chaldæan,' denoting peoples, are always plural, and are regularly definite without the article. All this is certainly significant of facts in Philistine history. Whether the facts thus signified are recoverable is another question.

2. *Characteristics of the Philistines in the times when they are best known.*—The usage attending the name is not more remarkable than are many of the facts concerning the Philistines themselves, as they appear in the OT.

Their territory extended 'from the Shihor* which is before Egypt, even unto the border of Ekron northward' (Jos 13$^{2. 3}$). Its eastern limit was at Beth-shemesh (1 S 6^{18}). It included possibly 2000 square miles of land, much of it remarkably fertile. Within this territory there were, according to the biblical writers, in the times when the Philistines were prominent, four kinds of inhabitants. First, there were the Philistines proper. Second, there were remnants of the Anakim and the Avvim in Gaza, Gath, Ashdod, etc. (Jos 11^{22} 13^{3}, Dt 2^{23}). These were politically Philistine, as the Anakim at Hebron were politically Amorite. Third, the accounts of the conquest under Joshua and of the subsequent events seem to imply that there were Canaanites living among the Philistines, some of whom were conquered and superseded by Israel (see 3 below). Fourth, some of the southern Geshurites (Jos 13^{2}, 1 S 27^{8}), and perhaps other like tribes, lived within the Philistine territory, near the Egyptian border. It is noteworthy that the Philistines seem to have confined themselves to their own narrow region, even when for decade after decade they held dominion over the wider territories of Israel. It is recorded as an exceptional fact that, after the overthrow of Saul at Gilboa, some of them became resident among the Israelites in the regions beyond Jezreel and Jordan (1 S 31^{7}, 1 Ch 10^{7}).

The Philistines were proficient in agriculture

---

* That is, either an arm of the Nile (Dillm.) or the *Wâdy el-'Arîsh*, 'river (נַחַל) of Egypt.'

(Jg 15[4. 5], 1 S 6, 2 K 8[2] etc.). They were skilful in architecture, in sculpture, in the working of iron and of the precious metals, and in other arts (*e.g.* Jg 16[25-30], 1 S 5. 13[19. 20] 17[5. 6] etc.). At a relatively early date they seem to have had monetary usages peculiar to themselves, witness the 'eleven hundred of silver' (Jg 16[5. 18]; cf. 17[2]). In fine, they are presented to us as relatively a wealthy and highly civilized people. So far as appears, it was only in later times that they engaged largely in commerce and maritime pursuits.

Politically, they had five principal centres, the cities of Ashdod, Gaza, Ashkelon, Gath, and Ekron (wh. see, severally, and see also 1 S 6[17], Jos 13[3], Zeph 2[4-7] etc.). It has been inferred that Ashdod possessed a right of hegemony over the others; but the order of mention differs in different places; and, judging by the history, the claim of Gath to the hegemony is much stronger than that of Ashdod. Besides the five, the Philistines had many other cities, the following (which see) being familiar examples: Gerar, Gezer, Timnah, Ziklag, Gob, Gibbethon, Jabneh (2 Ch 26[6]); and many of them dwelt in unwalled towns (1 S 6[18], Dt 2[23]); but the five principal centres representatively included them all (1 S 6[18]).

Their political organization was unique. The people of each centre are currently spoken of in the ordinary way in which other nationalities are mentioned, as 'the Ashdodite,' 'the Ashkelonite,' etc. But the centres themselves and their political heads are alike designated by the altogether peculiar word סְרָנִים, *ṣĕrānîm*, tr. 'lords' in AV and RV (Jos 13[3], Jg 16[5] etc.). This word is used only in the plural. It is doubtless the native term, and has no near cognates in the Hebrew, save that a word of the same spelling is used (1 K 7[30]) of some accessory to the wheels of the laver-bases of Solomon's temple. Here the RV, following Vulg. and many lexicons, tr. by 'axles,' though the word is different from the one rendered 'axletrees' in the same context. Half a dozen opposing derivations have been conjectured for *ṣĕrānîm*, none of them more plausible than the natural suggestion that these five cities and their chiefs were regarded as the centres or representatives of national power; or that *ṣeren* is the Greek *τύραννος*.

The *ṣĕrānîm*, 'lords,' are distinguished from the *sārîm*, שָׂרִים, 'captains' (1 S 18[30] 29[2-9], where AV and RV misleadingly translate 'princes' instead of 'captains'). The former are the depositaries of national authority, and the latter the men in actual military command. In particular cases, both offices may or may not have been combined in one person. The LXX prevailingly tr. *ṣeren* by *σατράπης* or *σατραπία*, 'satrap' or 'satrapy,' and *sar* by *στρατηγός*, 'captain,' but sometimes interchange the two, and sometimes tr. *ṣĕrānîm* by *ἄρχοντες*, 'rulers.'

The functions of the *ṣĕrānîm* were both civil and military. We have no account of any one *ṣeren* acting by himself, but only of acts in which the whole body of *ṣĕrānîm* participated. The accounts speak sometimes of the 'armies' and sometimes of the 'army' of the Philistines (1 S 23[3] 28[1] 29). Apparently each of the five centres had its independent force, but all were combined, in time of war, under one command. In David's time Gath was especially prominent, and perhaps held the hegemony (1 Ch 20[6], RV of 2 S 8[1]; cf. 1 Ch 18[1]). King Achish of Gath may have been the Philistine commander-in-chief, though the narrative does not explicitly say so (1 S 29).

We have no information as to whether the office of *ṣeren* was hereditary or elective or perpetuated in some other way, nor as to the relation between this office and that of king. None of the Philistine kings who are mentioned reigned over all Philistia (Gn 20[2] 26[1. 8], Jer 25[20], Zec 9[5]); they were all local. We are not told whether the *ṣĕrānîm* existed from the earliest times, or whether they continued to exist after the conquest by David. But in the one instance we have of a Philistine king in relations with the *ṣĕrānîm*, the instance of Achish (1 S 28. 29), the king is compelled to submit to the *ṣĕrānîm*. Achish may himself have been *ṣeren* of Gath, as well as king of Gath.

The religion of the Philistines was in some respects unique (see DAGON and BAAL-ZEBUB). They were a very religious people. Their priests and diviners (1 S 6[2]) had great influence. Their cloud-observing (?) soothsayers (Is 2[6]) were famous. Their being an uncircumcised people is much emphasized in the biblical records (Jg 14[3] 15[18], 1 S 14[6] 17[26. 36] 31[4], 2 S 1[20], Jer 9[25. 26]).

They were distinguished especially for military prowess. Pretty full details of their system might be gathered from various parts of the Bible, including mention of their archers, their equipment for heavy armed infantry, their organization into hundreds and thousands, etc. (1 S 31[3], 1 Ch 10[3], 1 S 29[2]). The accounts make the impression that they usually fought as infantry, though chariots and cavalry are mentioned (1 S 13[5], 2 S 1[6], and perhaps Jg 1[19]). We have descriptions of their savage treatment of the bodies of their fallen enemies (1 S 31, 1 Ch 10), and of the honours with which their women welcomed their warriors returning from victory. But more significant than all matters of detail is the fact that this little nation, with its few hundred square miles of territory, was able again and again to conquer Israel, and to hold Israel in subjection for generations.

In their military operations they seem to have pursued a very definite policy. In the earlier stages of any movement of conquest they practised effective and systematic pillage, as, for instance, in the case of Keilah (1 S 23[1]), or earlier, after their first great defeat of Saul (1 S 13[17. 18]). The indications are, however, that the Israelites increased in population and wealth during the long periods of Philistine oppression, provided they were submissive. From this we may infer that it was the policy of the conquerors, whenever resistance ceased, to abstain from pillage, doubtless exacting tribute instead, and finding it for their own interest to have the tributary people as prosperous as possible.

To secure submission, the Philistines practised the disarmament of the subjected people. We have an instance in the time of Saul (1 S 13[19-23]), and what seems to be an allusion to an earlier instance of the time of Shamgar (Jg 3[31] 5[8]). According to the LXX in the first of these passages, the Philistines used this as a method of exacting tribute, suppressing the working of metals in Israel, and then compelling the Israelites to pay an exorbitant price for their tools.

It was the Philistine policy to prevent the existence of a united Israel. As long as David is king of Judah, and has a rival king farther north, they seem to be content. When Israel is divided, the Philistine supremacy is not imperilled. But when it is proposed that David reign over all the twelve tribes, the Philistine armies march at once (2 S 5[17]). A similar situation had arisen previously, when Samuel became judge (1 S 7[7]).

Presumably, the Philistines did not achieve all their successes single-handed. It is a familiar fact that in cases of Egyptian invasion, in earlier times, or, later, of Assyrian invasion, it was the custom of the multitudinous little peoples between the Euphrates and the Mediterranean to band together against the common foe. Judging by the numbers of the Israelites, as mentioned in the Hexateuch, the invasion under Joshua was sufficiently formidable to call for similar confederations of the threatened peoples. As a matter of fact, the Bible represents the resistance made to Joshua and, later, to David as being of this character. We shall presently find evidence that in some of the wars of subjugation the Philistine success was due in part to the ability to array many allies against Israel.

3. *The History of the Philistines.*—Beyond dispute, they were immigrants into Palestine. The passages presently to be cited affirm this explicitly. It has been thought to be implied in the etymology of the Hebrew name *Pĕlishtîm* as well as of the Greek Ἀλλόφυλοι. So far, the problem is easy. But the questions whence they migrated, and when and how the migrating stock was modified in its new seats, are questions not so readily answered.

The Philistine language was probably Semitic, although the data whence this conclusion is drawn are restricted. So were certain important elements in their religion and their civilization. This proves either that the Philistines were originally Semitic, or that they changed their language, and to some extent their institutions, under the influence of the Semitic region to which they came.

We are told that they came from Caphtor, as Israel from Egypt, or Aram from Ḳir (Am 9^{7}, Dt 2^{23}); that they were Caphtorim (Dt 2^{23}). They are called 'the remnant of the coast of Caphtor' (Jer $47^{4.5}$). The Caphtorim are said to be one of the seven nationalities begotten by Mizraim (Egypt), and the Philistines are said to have 'come out' from the locality where one or more of the other six were (Gn $10^{13.14}$). The text has the adverb of place 'from where,' not the pronoun 'from whom,' and the two expressions are not in Hebrew convertible. It is not said that the Philistines are descendants of the Casluhim and the others, and there is no need to transpose the clauses or otherwise change the text (but see Dillm. *ad loc.*). The net result from this part of the testimony is that the nucleus of the Philistine people consisted of Caphtorim, who migrated, within known historic times, from regions inhabited by Caphtorim and kindred peoples.

But where was *Caphtor*? The LXX uniformly either transliterate the name or make it Cappadocia. Some have identified Caphtor with Cyprus. This finds some support in the fact that the Egyptian monuments associate the Philistines with the Zakkal, a people from Cyprus, and portray the two as scarcely distinguishable. Ebers, Halévy, and others have strongly held that Caphtor was a region in or near the Egyptian Delta. There is a strong recent trend toward the opinion that Caphtor was *Crete*. See CAPHTOR, CARITES, CHERETHITES AND PELETHITES, CRETE.

The argument for identifying Caphtor with Crete connects itself closely with the phenomena presented by another biblical name. In two relatively late places (Zeph 2^{5}, Ezk $25^{15.16}$) the Philistines are identified, wholly or in part, with the *Chĕrēthîm*, whom the LXX, in these places, make to be the Cretans. In both passages the word *Chĕrēthîm* is used in a punning way, effecting a play on words. The name does not occur elsewhere in the plural, but, in the singular, 'the Cherethite' is once mentioned (1 S 30^{14}) as living in or near the Philistine country, and six or seven times in connexion with 'the Pelethite,' as forming a part of king David's military force (1 Ch 18^{17}, 2 S 8^{18} 15^{18} 20^{7} and *Ḳerê* of ^{23}, 1 K $1^{38.44}$). On the basis of these facts it is affirmed that *Cherethite* is another and earlier name for the Philistines, that they were Cretans, that *Pelethite* is merely a variant form of *Philistine*, and that David's successes were largely due to his having Philistine troops. These conclusions are plausible, though they lack something of being sufficiently proved.

The evidence, however, amounts to a strong probability in favour of the more general fact that the Philistines were originally Aryan pirates, whether from Crete or Cyprus or elsewhere, who forced a settlement for themselves among the Semites and Rephaim of the Mediterranean lowland, and adopted the language, and in part the religion and civilization, of the Semites whom they conquered. Of this we shall find many confirmations as we proceed to consider the evidence as to the date when the migration took place.

Ramses III. of Egypt, contemporary, in part, with Joshua, says that in his eighth year he repulsed an invasion made by six or seven hostile nations. Most or all of these nations have Greek names. They are kin to other Greek peoples, settled on the African coast west of the Delta, who made trouble for Ramses in his fifth and his eleventh years, and who had previously made trouble for his predecessors. The invaders who came in his eighth year came by land and by sea. Those who came by land plundered the Syrian regions, 'beginning with the people of Kheta, of Kadi (Galilee), and Carchemish, Aradus, and Alus,' established a rendezvous 'in the land of the Amorites,' and were defeated by Ramses on the frontier between Egypt and the land of Zahi, that is, the region that we know as the land of the Philistines (Insc. in the Ramesseum at Luxor, as cited by Brugsch, *Egypt under the Pharaohs*, p. 329). Those who came by sea entered the mouths of the Nile, and were there defeated, large numbers of them being captured.

Of these six or seven peoples, two are many times mentioned together, to the extent of being somewhat distinguished from the others. In the sculptures they closely resemble one another. They are, of course, Greek in features and equipment. These two are the Zakkal and the Pulusata, Pulsata, Pulista, Purusata, Purosatha, as the name is variously transliterated. Scholars seem to agree that the Zakkal came from Cyprus. The Pulsata have been identified with the Pelasgi, with the Prosoditæ of Cyprus, and with the Philistines. Some of those who believe that they were the Philistines hold that they came at this time from Crete or Cyprus, and were settled by Ramses, after their defeat, in the cities of Zahi. But it is more in accord with the whole of the evidence to hold that the Pulsata and the Zakkal had then been on this coast for some generations, keeping in communication with their kindred in the various Greek regions, and now making themselves leaders in the movement of the hordes that sought the spoils of Egypt. If the Pulsata of Ramses had then just come from Crete, he would surely have designated them by their Greek name, and not by a Semitic descriptive word. If they had just come from Crete, it is difficult to account for the resemblance which the Egyptians found between them and the Cypriote Zakkal, while this is easily accounted for if the two had long been dwelling among Semitic neighbours on the coast. Other Greek invaders Ramses describes as 'kings,' or as 'peoples of the sea,' but he speaks of the 'leaders of the hostile bands' of the Pulsata and the Zakkal, just as he does in the case of the Edomites ('Effigies at Medînet-abu,' as cited in Brugsch, *Egypt under the Pharaohs*, p. 332). Sayce (*EHH* p. 291) cites Hommel as having found a mention of the Zakkal on the coast near Dor, in a Babylonian document (*WAI* iv. 34, No. 2, lines 2, 6) of the 15th cent. B.C. The writers of the history in the OT certainly thought of the

Philistines as well established in their country before the Exodus (Ex 13^{17} 15^{14} 23^{31}, Jos $13^{2.3}$ etc.). Whether they believed that the Philistines were in the land in the time of Abraham and Isaac is not so certain. They designate as Philistine both the land and the people of that date (Gn $21^{32.34}$ $26^{1.8.14.15.18}$), but it is easy to understand this as a mere geographical use of the term, or as proleptical. On the other hand, however, these Philistines are described as a military people (Gn $21^{22.32}$ 26^{26}), and as having other resemblances to the Philistines of later times; and the proofs that the Philistine migration had not begun as early as the time of Abraham are not so decisive as many imagine.

Whenever the Philistine settlements began, they probably began on a relatively small scale. The immigrants came in successive expeditions, and not all at once. In certain matters they accepted the conditions of life which they found on the soil. They became owners of cattle if the people whom they conquered were owners of cattle, and raisers of crops if the conquered were agricultural people. If they conquered Egyptian tributaries, they accepted the suzerainty without which Egypt would have forthwith expelled them. They seem to have accepted the Semitic names of the cities they conquered. At all events, Gaza, Gath, Ashkelon, and several other cities of the region were known by the names still familiar to us, as early as the time of Amenhotep III. of Egypt (Tel el-Amarna letters). There were of them more men than women, and the marrying of native wives began at once. Their peculiar political organization, that of the *ṣĕrānîm*, presumably grew up upon the soil. From the time of Ramses III. they were probably driven from the sea, isolated from their Greek kindred, and compelled to become a non-maritime people. Through these various changes of blood, institutions, government, and external relations, they became at length differentiated as a people by themselves.

The accounts of the conquest by Joshua make the impression that the Philistines were then in their five central cities, but that there were also in the region several independent petty Canaanitish kingdoms; that Israel at that time conquered most of the Canaanite kingdoms, although it failed to permanently hold some of them (Jos $10^{33.41}$ $11^{2.3.16}$ 12^{12} 15^{33-47} $16^{3.10}$ etc.); but did not conquer the Philistine cities (Jos $13^{2.3}$), though Ekron, Ashdod, and Gaza are by the tenure of promise included in the inheritance of Judah (Jos 15^{45-47} 13^{6}). It is said that Judah, after Joshua's death, conquered Gaza, Ashkelon, and Ekron (Jg 1^{18}), but that the Philistine cities were independent when the struggle of the conquest came to an end (Jg 3^{3}).

The biblical records signalize four periods of oppression of Israel by the Philistines. The first is that in which Shamgar was the deliverer (Jg 3^{31} 10^{11}). This was in the time of the twenty years' oppression by Jabin and Sisera (Jg 4^{2-4} $5^{6.7}$). Presumably, a generation or two of prosperity had raised Israel to a position where he was formidable to his neighbours, and so a coalition was formed against him by the Philistines and the many peoples of the north. The Philistine pressure was mainly felt by Judah and Simeon, and it may account for the absence of these two from Deborah's roll-call of the tribes that marched against Jabin. We have no details of the Philistine operations, but there is a suggestion of a disarmament of their enemies, like that which was practised afterwards in the time of Saul (Jg 3^{31} 5^{8}).*

The second Philistine oppression of Israel is that mentioned in Jg $10^{6.7}$ as occurring before the eighteen years of oppression by the Ammonites. Contrary to common opinion, the writer of this article holds that this was the oppression in which Samson distinguished himself (Jg 13^{2}–16). It began, apparently, before Samson's birth (Jg 13^{5}), while Tola was judge. In the time of Samson's wild youth it was so thoroughly a recognized fact (14^{4} 15^{11}) that it did not prevent relations between Israelite and Philistine families. It ceased when Samson was made judge, after the battle of Lehi (15^{14-20}). During the twenty years of his public life, the Philistines kept on their own side of the border (16), even when plotting against him.

The third Philistine oppression was the one that lasted through the forty years that Eli was judge (1 S 4^{18}, here regarded as corresponding to Jg 13^{1}) and the twenty years that followed (1 S 7^{2}). After the first horrors of conquest were over, the Israelites seem to have prospered under the yoke, if we may judge of the population by the size of the armies (1 S $4^{2.10}$ 11^{8} 15^{4}). This oppression ceased after Samuel became judge (1 S 7^{7-14}). He defeated the Philistines in a decisive battle. He compelled them to surrender the cities in their country that belonged to Israel, that is, apparently, those that had formerly been Canaanite, and had been conquered by Israel. 'And the Philistines were subdued, and they came no more into the coasts of Israel; and the hand of the Lord was against the Philistines' as long as Samuel remained chief magistrate of Israel, a statement not inconsistent with 10^{5} $13^{3.19\text{ff.}}$.

The fourth oppression was that of the time of Saul. It began when Saul had been long enough on the throne for his son Jonathan to have grown to military age (1 S 13^{3}). The account says that they invaded Israel with an army extraordinarily large (1 S 13^{5}). Deal as we may with the numbers given, it appears that they had at that time great respect for the strength of Israel, and had gathered an immense body of allies to assist them. It turned out that their precaution was needless. Saul quarrelled with Samuel. His army melted away from him. With no resistance worthy of the name, the Philistines became masters, and plundered and disarmed Israel at will. Later, however, Israel rallied. During the remainder of his reign Saul waged a series of fierce battles with the oppressors. He perished in the battle of Gilboa, and the Philistine power over Israel became supreme (1 S 31).

Presumably both David and his northern competitor paid tribute to Philistia during the seven and a half years that he reigned over Judah (2 S 5^{5}). Naturally, they interfered to prevent his becoming king over a united Israel. He defeated them in two desperate defensive campaigns (2 S 5^{17-25}), and then, in four or more aggressive expeditions (2 S 8^{1} 21^{15-22}), reduced them to subjection.

In consequence of the disruption of the kingdom after the death of Solomon, the Philistines became independent, but they never re-established their earlier glory. We hear no more of their *ṣĕrānîm*. Later, in the Assyrian times, they have a king for each of their cities (Zec 9^{5}, Jer 25^{20}, and many passages in the records of Sargon and his successors). In the same later times they seem to be engaged in commerce, dealing especially in Israelitish spoils and slaves (Am 1^{6-8}, Jl 3^{4-8}, cf. Ob $^{13.14.19}$, depending, however, on the date one assigns to Joel and Obadiah). Perhaps there are signs of a Greek revival among them (Jl 3^{6}, and the *Yavan* of Sargon).

However their institutions changed, we have frequent mention of the Philistines themselves. Among the cities fortified by Rehoboam were Gath and Mareshah, etc. (2 Ch 11^{8}). The Philistines warred with Israel for Gibbethon (1 K 15^{27} 16^{15}). They were celebrated for their oracles (2 K 1^{2}) and their soothsayers (Is 2^{6}). Some of them paid tribute to Jehoshaphat (2 Ch 17^{11}), after whose death they raided Judah ($21^{16.\,17}$). Philistia was a refuge for fugitives when the invasions of Shalmaneser II., warring with Benhadad and his allies, caused famine in northern Israel (2 K $8^{2.\,3}$). Hazael of Damascus captured Gath (2 K 12^{17}). Ramman-nirârî III. of Assyria conquered Damascus and took tribute from the Philistines. At this point there is a wide gap in the Assyrian records. When they again become available, the Philistines, with a multitude of other nations between the Euphrates and the Mediterranean, have become independent of the Assyrian, and are again being reduced to subjection. Uzziah of Judah is especially prominent among the rebel kings. Later, by intrigue and by arms, Tiglath-pileser, to whom Ahaz of Judah was tributary, reduced Gaza and Ashkelon to tribute (B.C. 734). Under Sargon and Sennacherib there were two parties in the Philistine cities, the one favouring Assyria and the other favouring Hezekiah of Judah, and the latter was crushed. From Sargon to Assurbanipal the Assyrians have much to say concerning their Philistine conquests and subjects. The Philistine military operations of Uzziah and Hezekiah were doubtless connected with Assyrian politics (2 Ch $26^{6.\,7}$, 2 K $18^{7.\,8}$). Their mutual relations to the Assyrians account for the fact that the Israelite historians and prophets, from Amos to Ezekiel, speak of the Philistines sometimes with denunciation, as enemies, but also often as having a common interest (2 Ch 28^{18}, Is 9^{12} 11^{14}, Am $1^{6\text{-}8}$, Mic $1^{10\text{-}15}$, Zeph $2^{4\text{-}7}$, Jer $47^{4\text{-}7}$, Ezk $16^{27.\,57}$ $25^{15.\,16}$, Am 3^{9} 6^{2} 9^{7}, Zec $9^{5\text{-}8}$, Jer $25^{18\text{-}20}$). Gath vanishes from the biblical records (except Mic 1^{10}) from the time of its capture by Uzziah (2 Ch 26^{6}), and is similarly absent from the Assyrian monuments.

---

* Moore (*Judges*, pp. 80, 105) argues that Shamgar appears too early as a champion against the *Philistines*.

The Philistines suffered greatly in the struggle between Egypt and Assyria, in the decades when the Assyrian power went down. Herodotus says that Psammitichus I. of Egypt, the contemporary of Manasseh and Josiah of Judah, took Ashdod after a siege of 29 years (ii. 157); that in the later part of his reign Scythian hordes plundered the temple of Venus at Ashkelon (i. 105); that his successor Necho, returning from the battle of Megiddo (when Josiah was slain, B.C. 608), captured Gaza (ii. 159); that when Cambyses invaded Egypt, about B.C. 625, Gaza and the whole coast belonged to the king of the Arabians (iii. 5).

This is practically the close of Philistine history, though the cities and some of the institutions long survived, and the region has been the scene of many interesting events. The Ashdodites came into collision with Nehemiah (Neh 4^{7} 13^{23}). Alexander the Great took Gaza from the Persians. Ptolemy Lagi did notable fighting there. In the Greek accounts of the Maccabæan times the *Allophuloi* and the land of the *Allophuloi* figure prominently, and the land thus described is the Philistine country; but the persons called *Allophuloi* are any heathen in arms against Israel (*e.g.* 1 Mac 3–4). Sketches of the later history are given under the names of the respective cities.

LITERATURE.—Hitzig, *Urgeschichte . . . der Philistäer*; Knobel, *Völkertafel*; Movers, *Phönizier*; Pietschmann, *Phönizier*, p. 261 ff.; Stark, *Gaza und die philistäische Küste*, Jena, 1852. Of more real value are recent works on Palestinian geography and explorations, works which give the text of Egyptian and Assyrian inscriptions, works on the history of the nations mentioned in the Bible, and commentaries on the biblical passages where the Philistines are mentioned. As examples one may specify McCurdy, *HPM* vol. i. sections 166, 54, 192–194; Sayce, *EHH* p. 291, and *HCM* (index); G. A. Smith, *HGHL* ch. ix.; Brugsch, *Egypt under the Pharaohs*, chs. ix.–xiv. etc.; W. Max Müller, *Asien u. Europa*, 387 ff.; Schwally, *Die Rasse der Philistäer*, *ZWTh.* xxxiv. 103 ff.; Maspero, *Struggle of the Nations*, 463 f.

W. J. BEECHER.

PHILOLOGUS (Φιλόλογος).—The name of a Christian greeted by St. Paul in Ro 16^{15} along with Julia, Nereus, Olympas, and others. The name is common among slaves and freedmen, and in inscriptions of the Imperial household (*CIL* vi. 4116). Philologus was commemorated with Patrobas (which see) on Nov. 4. Later legends about him will be found in *Acta Sanctorum*, Nov., ii. 1, p. 222. A. C. HEADLAM.

PHILOMETOR.—See PTOLEMY VI.

PHILOSOPHY.—

Introduction: the place and function of philosophy; the relations between religion and philosophy; the periods of contact between them.

I. The Problem of Greek Philosophy.—1. First Stage: early Greek thinkers. 2. Second stage: the Sophists; Socrates, Plato, and Aristotle. 3. Third Stage: Stoics and Epicureans; Scepticism; Neoplatonism.

II. The Contact of Christianity with Greek Philosophy.—1. The Christian Unity: Christianity and Neoplatonism contrasted. 2. Christianity and the Greek dualism: (i.) the speculative problem; (ii.) the ethical problem. 3. The relation of Christian experience to Greek forms of thought. Reference to the conclusions of the 'historical' school.

The Place and Function of Philosophy.—Man lives, and man thinks about the life he lives. This is the essence of his constitution as man. He is under the constraint of his nature to re-think the life he lives. This is his distinction from the lower animals, who live, but do not think of their life. Admit that man is an animal, and has been produced by evolution. Admit even that there are traces of several mental faculties in the lower animals. Yet the fact remains that for man alone does life present itself as an object of reflexion. For man alone is experience a problem. Philosophy, speaking broadly, is the activity of thought brought to bear on experience as a whole. It is, in Schwegler's phrase, 'the thinking consideration of things.' It is implied in the very fact of experience being a problem that, throughout its manifold and diverse elements, there is a unity of thought, reason, or spirit. If it were not so, experience would not be a problem, for it would never have arisen as a whole out of the succession of separate sensations. It is the task of Philosophy to make explicit this unity which is implicit in human experience. We can see, therefore, in broad outline, the course which the history of Philosophy must take. It is a progress towards unity, towards a synthesis of elements, towards a view of human experience, with its varied contents, from one central standpoint.

The stages of this progress will be marked by the unifying principles which they severally employ. Such a principle, let us suppose, is reached. It serves to explain a number of the particular elements of experience, and to bring them into a harmony which shall be for the time satisfactory to thought and stimulating to action. Soon, however, it is found that this synthetic principle is not adequate to the complexity of life. Elements of experience come into view which refuse to be explained by the alleged universal principle. The harmony which was temporarily reached is broken. Tragic discord appears. The quest for unity has to be resumed with a deeper, sadder, insight, and a larger, more patient wisdom. As we review the history of Philosophy, accordingly, we see that no speculative system is final. Each system, in turn, has failed. We see, moreover, that Philosophy, if we choose to speak paradoxically, must always end in failure. It is the last result of thought to raise questions which thought alone cannot answer, to penetrate to discords which the energy of thought alone cannot reconcile. This very failure of Philosophy, however, is, in the highest sense, its success. Want of finality in Philosophy, inability to comprehend the variety of experience in one formula, is not a mark of weakness, but of strength. It means that thought is not content with abstractions, but is resolute to face the facts of life in their fulness and their mystery. It is essentially the quest for a synthesis of life. The success of the quest consists in so deepening the problem that it is seen that no merely intellectual synthesis is possible. The problem of Philosophy merges into the problem of Religion; and Philosophy points beyond itself.

Religion and Philosophy thus present many features of resemblance and contrast, and have close and intricate mutual relations. Religion *provides* the solution which Philosophy *seeks.* That which is the quest of Philosophy is the realized experience of Religion, a unity in which the profoundest differences in life are actually reconciled, which leaves nothing beyond itself to confound the human spirit, but brings all elements of experience into a perfect spiritual harmony.

Towards religious experience, Philosophy renders a service which is at once apologetic and critical, and is in both aspects helpful and indeed indispensable. Philosophy vindicates the validity and reasonableness of religion. In the words of the Master of Balliol, it provides 'a vindication of the religious consciousness—the consciousness of the infinite—as presupposed in that very consciousness of the finite which at present often claims to exclude it altogether, or to reduce it to an empty apotheosis of the unknown and unknowable' (E. Caird, *Essays on Literature and Philosophy*, vol. i. p. 224). Philosophy at the same time has to consider the form in which this religious experience at any particular epoch clothes itself. And if it shall appear that the form contradicts the universality and comprehensiveness of the experience of which it is the expression, and is, therefore, falsifying and imperilling that experience, Philosophy must ruthlessly assail that form, and break it up, in name of that principle of reconciliation which is the inspiration and the goal both of thought and action. Religion holds an analogous position toward Philosophy, and has a work to do in its behalf, both constructive and critical. Religion discovers the principle for which Philosophy has been seeking, and exhibits it, not as a theory, but as a power, in the freshness and originality of actual life, transforming character and inspiring service. Philosophy, sinking into exhaustion through the inadequacy of the synthesis which it has reached, is rejuvenated at the fountain of religious experience, and is enabled to meet the deepening complexity of its problem with a more comprehensive and more detailed explanation. Religion at the same time has to consider the intellectual synthesis to which its own inspiration has given birth. And if it shall appear that this synthesis has omitted some element in the problem, and has obtained an appearance of harmony by neglecting some source of discord, and is thus stopping the progress of thought short of its goal, Religion must resist the claim of this Philosophy to be absolute, must emphasize the neglected elements of the problem, and must proclaim again the harmony which triumphs over the discords of life,—a harmony found not in intellectual formulæ, but in the verifiable realities of spiritual experience. It follows that Philosophy and Religion can never in their inner meaning be opposed to one another. They are both necessities of the human spirit. Both alike presuppose the spiritual unity which pervades experience, and makes possible both thought and life. Each has its special function in apprehending and realizing this unity; and in their respective functions each is essential to the other. Those periods in which they come into close and conspicuous contact are peculiarly interesting in the history of each. The most important of these occurred in the beginning of the Christian era. In that period, Greek philosophy reached the goal of its long development. In this article we desire to show what that goal was, and how, in reaching it, Greek philosophy asked a question to which Christianity brought the only adequate answer.

I. THE PROBLEM OF GREEK PHILOSOPHY.—The movement of Greek thought falls into three well-marked stages. In the first of these, the principle of explanation is sought beyond consciousness. In the second, a spiritual principle has been won, and is used for the comprehension of all existence, and the erection of a system of encyclopædic knowledge. In the third, thought retreats to the standpoint of the individual; the problem of knowledge is raised in its acutest form; the exhaustion of Philosophy overtakes it, and an intense demand is made for a religious solution.

1. *First Stage.*—The early Greek thinker looks out upon nature with joyous curiosity, and asks, 'What is the principle which underlies these multitudinous phenomena?' The earliest philosophies contain brief dogmatic answers to this question. They are not valuable in themselves; but they are interesting as stating the problem of Philosophy, and indicating the goal of thought. They are divided into four schools. The *Ionic School* identified the explanation of all things with one element in nature, saying with Thales (B.C. 640–550), 'all is water'; or with Anaximander (B.C. 611–547), 'all is matter,' τὸ ἄπειρον; or with Anaximenes (B.C. 588–524), 'all is air.' The *Pythagorean School* passed from substance to the proportion which all things bear to one another, and taught that 'all is number.' The *Eleatic School* passed still further on the path of abstraction, from 'substance' and 'number' to 'being,' saying with Xenophanes (B.C. 576–480), 'all is one.' The *Physicists,* in reaction from this abstractness, sought to analyze existence into its material elements. This period closes with Anaxagoras (B.C. 500–428). His great distinction as a thinker is that he relies on the principle of reason, νοῦς, as the principle of explanation. Νοῦς is a world-forming intelligence, acting on the primitive constituents of matter. Thus the first stage in the great movement of Greek philosophy has brought us to a spiritual principle. This is its great achievement, the splendid heritage it hands on to succeeding generations of thinkers. But along with this it also hands on another and less satisfactory heritage, viz. dualism, the opposition of the spiritual and the material, Thought and Extension.

2. *Second Stage.*—At the period of Greek history at which we have now arrived, about the middle of the 5th cent. B.C., we notice that the interest of thought is turning from the outer world of nature to the inner world of the human spirit. Thought, accordingly, becomes anthropological, and seeks the ultimate principles of truth, not beyond, but within man's consciousness of himself.

(*a*) *The Sophists.*—By these men this new departure in the development of Philosophy is inaugurated. One of the most famous of them is Protagoras of Abdera (*c.* 440 B.C.), a pure subjectivist, who taught that there is no absolute standard either of truth or right. Nothing is good or bad by nature (φύσει), but merely by statute (νόμῳ). Another is Gorgias (*c.* 427 B.C.), who taught a rigorous individualism, summed up in a series of paradoxes. Nothing exists; or, if something exists, it cannot be known; or, if it can be known, it cannot be communicated. The work of the Sophists was destructive, and often ethically mischievous, but it was necessary, as a preparation for the great forward movement which Greek philosophy was now to take. Their *merit* is that they have claimed on behalf of man that the principle which is to explain experience must be in harmony with his self-consciousness. Their *defect* is that they have construed man too poorly, and have regarded self-consciousness as little more than individual opinion or feeling.

(*b*) *Socrates* (B.C. 469–399).—In one sense Socrates is a Sophist. He occupies the position of subjectivity, and is a keen critic of conventional customs, institutions, and dogmas. His aim, however, is always positive. He desires to break through mere opinion in order that he may reach universal principles of thought and action. His method accordingly has a double aspect. It is destructive, an 'irony' by which he destroys the conceit of knowledge and convinces of ignorance, which is the 'original' sin of the Socratic theology; but it is also constructive, an obstetric process, whereby universal truth is brought to the birth, and instinct is raised to the rank of clear self-consciousness. In a word, his method is induction, the process whereby is discerned in a mass of particulars what is universal, and therefore fundamental and true. The last result of this method is condensed into the famous Socratic phrase, 'Virtue is knowledge,' knowledge of universal principles of thought and action. In Socrates the problem of Greek philosophy has deepened so as to include the element of man's conscious life. It has become a moral, even a religious problem, how to live life whole, and reach a complete synthesis of experience. Socrates finds the answer in Thought or the Universal. His gospel is 'Salvation by Wisdom.' Defective as it was, the teaching of Socrates declared the supreme worth of man as a spiritual being. It gave direction to the whole subsequent course of Greek thought, till at length the problem became too complex for the Socratic solution.

(*c*) *Plato* (B.C. 427–347) *and Aristotle* (B.C. 385–322).—Socrates attempted no systematization of thought. He was content with enunciating and illustrating a principle. It was the work of Plato and Aristotle to take the Socratic primacy of thought, and from this standpoint to frame systems of knowledge. Their systems have been called 'splendid digressions.' This would be incorrect if it meant that they were not in the main current of Greek thought. It is true, however, that one element prominent in Socrates is lost in them, to reappear with yet stronger emphasis in the post-Aristotelian thinkers, viz. subjectivity. They treat thought as a universal organ. Man as an individual falls into the background. Their problem is that of all Philosophy, to find a unity that shall reconcile all differences; but among these the self-assertion of the individual and the claim of the particular have not found their place.

The Socratic universal principles are in Plato 'ideas,' which are reached by 'reminiscence,' and form the archetypes of all things. Supreme among the ideas is the Good, the ultimate reality, the common ground of all thought and being. The Good is God; but for Plato the question of the personality of God has not arisen. He is moving in the pure ether of speculation, high above the strife and tragedy which make men so eagerly demand or so passionately deny a personal God. Aristotle occupies the same ground as Plato in holding that the universal is the real. But he has a deeper interest than Plato in the phenomenal and the particular. His aim is to bring the universal and particular together, and to exhibit them in their true relations. The formula he uses is that of Form and Matter, εἶδος and ὕλη. Form acts as a plastic artist, taking up the rude amorphous matter, and transforming or rather forming it into actuality. Not only so, but this relation has stages: that which is Form to what is beneath it, being Matter to what is above it. Thus there is a chain of being with mere Matter at one end and pure Form at the other. Pure Form originates the whole movement of existence, but is itself unmoved. It is Thought, in its pure activity, having no object but itself, Very Thought of Very Thought, νόησις νοήσεως. Thus the high level of Greek speculation is theism, not that of the Hebrews with its ethical content, but a theism of thought, in which God abides by Himself in the bliss of perfect knowledge.

Both in Plato and in Aristotle the Unity is magnificent, but it is incomplete. The dualism of Anaxagoras is not yet exorcized. The phenomenal and the individual still fall apart from this sublime transcendental Thought. They must receive their proper place before a true unity can be reached, and when it is, it will not be merely intellectual.

3. *Third Stage.*—In this, the closing period of Greek philosophy, a great change has come over the ancient world. It is the age of world-wide empire, crushing out the earlier civic life. It is therefore also the age of individualism.

In Plato and Aristotle we are aware of an aloofness from the problems that most interest us; but in the post-Aristotelian philosophies we find an affinity with our modes of thought and our general attitude toward life which make them interesting and valuable, though speculatively they are beneath the level of the great encyclopædic systems which immediately preceded them. The Philosophy of this period is intensely and increasingly occupied with the needs of man. To begin with, it is essentially Ethic, and this Ethic is meant to suffice man for religion. As it advances, it becomes more and more religious, till in the end, in Neoplatonism it is avowedly Religion. The systems of this period all logically connect themselves with elements to be found in Aristotle. In Aristotle we have still the Greek dualism unreconciled. Form and Matter, Reason and Sense, are still in opposition. Accordingly we find: (*a*) one system which makes Reason its ruling principle; (*b*) another which chooses Sense for its keynote; (*c*) a third which chooses either element to contradict and destroy the other; (*d*) finally, a system which strives to rise above the antagonism of elements, and makes a leap for unity.

(*a*) The first is *Stoicism*, which regards the soul of the universe as rational, and gives to it the significant title of the Logos. Of this rational whole of things, man is part. He finds salvation, accordingly, in living according to nature, taking his place at the standpoint of all governing Reason. Thus all things work together for his good. Stoicism, to its eternal honour, lays hold of human personality, and attributes to it absolute independence and infinite worth. In this aspect it approximates to Christianity, and formed a mental and moral discipline which prepared the Roman world for the preaching of the gospel. At the same time, Stoicism failed as a redemptive power in the fast-growing corruption of the Roman world. It is 'Salvation by Wisdom,' limited, therefore, to the few, and precarious even in them. Reason fails as a reconciling, unifying principle. See STOICS.

(*b*) The second is *Epicureanism*, which frankly makes matter the ground of all things, sense the ultimate principle of knowledge and action. The Epicurean, like the Stoic, said, 'Live according to nature'; but nature, as he conceived it, was material only, and the end of a life within its limits is no more than pleasure. Such a principle does not necessarily lead to vice; but it may lead to this as well as to virtue; and in any case it fails to organize life into a whole, or quicken it with sustained energy. Epicureanism is the intellectual expression of the decay of moral life in the Roman world. See EPICUREANS.

(*c*) The third is *Scepticism*, which, by keeping rigidly to the individualism which was common alike to Stoicism and Epicureanism, showed that no absolute truth of knowledge, no authoritative rule of action, is possible. Thought and life are reduced to the mere play of opinion and impulse. The only possible attitude toward reality is mere suspense of judgment. Such a position is paralysis both mental and spiritual. Scepticism makes articulate the despair which was brooding over the hearts of men. It is the last utterance of Philosophy, and it is the demand for Religion.

(*d*) The fourth is *Neoplatonism*. The life of man had become hopeless. The demand of the age, therefore, is not now Wisdom for the conduct of life, but Salvation, σωτηρία, escape from the dissatisfaction of this life, emergence into a higher sphere. To this demand Neoplatonism makes response. It is at once the climax and the destruction of Greek philosophy. In it Thought, the mighty force which had led the human spirit in its quest for unity, breaks down, and gives up the reins of government. After Neoplatonism barbarism followed, and would have followed more disastrously than it did, had not Christianity succeeded to the place vacated by Greek philosophy. The real advance of Neoplatonism on all preceding systems consists in its conception of the speculative and practical problem. The old Greek dualism of Form and Matter is deepened, and is transformed into that of God and the World, the Infinite and the Finite, Good and Evil. It is thus specifically a religious problem; and Neoplatonism is avowedly a religious solution, a Philosophy which takes up all religions into itself, and claims to be the Absolute Religion. The great precursor of Neoplatonism is Philo Judæus. Its chief exponent is Plotinus (A.D. 204–270).

It is impossible here to give any adequate account of the systems of these men, or of the many systems elaborated through the opening centuries of the Christian era. They all occupy the same standpoint, and exhibit many resemblances in their treatment of the problem which they all alike are designed to solve.

It is important, however, to note the three great doctrines into which all Neoplatonic systems may be condensed.

(i.) *The Doctrine of God.*—God is transcendent, the Absolute, the Original (τὸ πρῶτον), the Unlimited (ἄπειρον). To Him no finite predicates are applicable. He is beyond all determination by human thought. If we attribute to Him power or goodness, it must be remembered that these designations cannot express His real nature.

(ii.) *The Doctrine of the World.*—Between God and the World, the Infinite and the Finite, there is a great gulf, which Neoplatonism proceeds to fill up with variously conceived schemes of emanation. From the Infinite height there is a descent through less and less perfect beings, till at length crass matter is reached. Only by some such machinery would Neoplatonism allow that God could possibly be the source of material existence.

(iii.) *The Doctrine of Man.*—Man has in him a spark of the divine. He lies, however, immersed in the sensuous sphere. Salvation for him, therefore, consists in escaping from this sphere and rising into that supersensuous sphere to which he truly belongs. This escape is accomplished in a process of purification (κάθαρσις) by means of ascetic discipline.

To such a system had the long evolution of Greek thought arrived, when Christianity went forth on its mission. With this system Christianity was confronted as its chief antagonist.

II. THE CONTACT OF CHRISTIANITY WITH GREEK PHILOSOPHY.—1. *THE CHRISTIAN UNITY.* Into the Hellenic world, torn as it was with divisions, hysterically eager for intellectual and moral satisfaction, Christianity entered with the claim to be the unity which men of Hellenic culture, and human hearts everywhere, required and sought for. It differed profoundly, however, from Neoplatonism or any such system, both in the interpretation which it put on the problem and in the nature of the solution it proposed.

(*a*) *The Christian interpretation of the intellectual problem and of the moral need of men.* Beneath the opposition of elements, Form and Matter, Infinite and Finite, which was the deepest conception Greek thought had formed of the problem of life, Christianity pierces to antagonism of wills, the personal will of man in revolt from, and out of harmony with, the personal will of God. This is the hurt of the human soul; this is the secret also of the world's pain and unrest. Greek thought never did justice to personality. Pantheism drew the Hellenic mind like a magnet. Its goal was ever absorption of personal life in the wide sea of impersonal being. The hindrance to such a consummation always lay outside the constitution of man, in the material environment of his soul. Christianity boldly grasped the fact of personality; had for its goal the fulness of personal life in communion with a personal God; and saw the hindrance to this consummation within the personal life itself. Evil, the barrier to unity of God and man, is not outside of man, in the material framework in which he finds himself, but within man, in the determination of his will against the divine will.

(*b*) *The nature of the Christian solution.* In one word, it was Christ. Christianity, whose keynote, like that of Neoplatonism, is unity, whose phraseology often resembles that of Neoplatonism, differs from it by the whole diameter of mental culture and spiritual experience. It approaches the human spirit, not with a theory, scheme, or process, but with a gospel, a declaration whose sum and substance is Christ Jesus, incarnate, crucified, risen. Holding stedfastly before the eyes of men, as the ultimate problem of life, the reconciliation of wills, human and divine, it proclaims the problem solved, the reconciliation achieved through Christ. *Christ is God Incarnate*, not a man who has reached the highest point in a process of κάθαρσις, but God, who, in order to effect the reconciliation of man, has entered into humanity, and taken it into union with Himself. The long quest of man for God had ended on the verge of an impassable gulf, across which he vainly sought to cast a rainbow bridge of fair images. In the Incarnation, God of His own proper motion crosses the gulf, and by His own act annihilates the distance. *Christ has died for men.* That which holds God and man apart is not the frailty of man, as though that could be any real hindrance to spiritual and personal fellowship, or as though the removal of it could secure that fellowship. On this rock Neoplatonism wrecked itself as a redemptive power. The root and secret of man's inability to reach God is sin. He does not need to make himself divine in order to hold communion with God. He does need to be delivered from the burden of guilt. This deliverance has come through the sacrificial death of Christ. Guilt is not a feeling of uneasiness at the division man finds in his own nature. It is the consciousness of alienation from God. Sin is not an element in man's subjectivity, a moment in the process whereby he rises out of individualism. It is an objective reality of the spiritual world, which must be taken out of the way before the human spirit can be at one with God. Christ has done this in the deed of sin-bearing. *Christ is risen.* His life, while lifted above time and space, is continued in organic union with those who occupy time and space. He raises them through personal union with Himself into union with God. He in them is the source of a life whose spirit is sonship, whose privilege is communion, whose goal is likeness. The occasional ecstasy, which was the highest privilege possible under Neoplatonism, is replaced by a daily fellowship, without ecstasy but with true and abiding intimacy, open not to a few accomplished spirits, but to all who come to God through Christ.

With this the Christian solution is complete. The problem, constituted by antagonism of the human will to the divine, is solved at length.

2. *CHRISTIANITY AND THE GREEK DUALISM.*—Greek Philosophy, as we have seen in the foregoing sketch, was haunted by a dualism which it sought in vain to overcome. The secret of the failure lay in not conceiving the dualism profoundly enough. Christianity penetrates beneath the dualism of elements to antagonism of wills. The Greek problem lies within the Christian problem. The Christian solution is at the same time also the solution of the Greek problem. This does not mean that Christianity is a philosophy, or has its truth bound up with any special metaphysical system. It is a Religion. But it is a religion which provides the unity sought for by Philosophy.[*] It contains, therefore, implicitly the answer to the question raised by Philosophy.

(i.) *The speculative problem.* The Greek mind presupposed the irreconcilability of form and matter. The utmost effort in the direction of reconciliation was that made by Neoplatonism, the filling up of the gulf by a series of emanations. The Christian teachers, surveying the long toil of the Greeks after wisdom, said in effect, 'The ultimate dualism is not that of form and matter; it is that of the divine and human wills. What hinders man from reaching God is not his material environment, but his sin. Christ has taken away the sin of man. The Incarnate Christ may be reached by any human soul, immediately, at a step, a touch, a look. And when Christ is reached, God is reached.' They found, however, that the Greek mind was hag-ridden by phrases and formulæ, Pleroma, Logos, and what not, all implying the impossibility of getting to God except by a clumsy machinery of emanations. They therefore boldly adopted this nomenclature and baptized it into Christ.

What was supposed to be done by emanations, etc., and never really was done, has been done by Christ. He that hath seen Him hath seen the Father. Do they speak of the Pleroma? He is the Pleroma (so in Colossians). Do they speak of the Logos? He is the Logos (so in the Fourth Gospel). These Greek philosophic terms do not indicate that the Christian leaders who use them are sitting at the feet of Greek metaphysicians. The NT conveys a thought which had another origin than the speculations of a Philo; but, entering the Greek world at the time it did, it uses the terms which expressed the endeavour of the Greek mind, to carry the truth which the Greek mind despaired of reaching. In other words, Christianity, not by emanations or by hypostatized abstractions, but by the living Christ, lifts men to a central standpoint, and enables them to look out on experience as a unity, and to see even in its most material elements no remote antithesis to God, but the manifestation of His mind, the instrument of His purpose. God is self-revealing Spirit. The universe is spiritual to its core. Christ has abolished dualism. Christianity, it cannot be too much insisted on, is not a philosophy; but it is the inspiration and the goal of all philosophy.

(ii.) *The practical problem.* The Greek dualism haunts Greek ethic, and sets Reason and Sense in eternal opposition. The senses, seated in man's material frame, form the great hindrance to virtue. Greek ethic, accordingly, resolves itself very much into various plans for the disposal of the sensual element in man's nature. Neoplatonism preaches the elimination of sense by an ascetic discipline, which shall gradually set the spiritual nature of man free from all perturbation by the senses. Stoicism proclaims the dominion of reason over the passions. Man is to be a despot in the domain of his nature, crushing every uprising of sense with the proud might of reason. Aristotelianism, breathing the classic spirit of Hellenism, teaches that reason is to use sense as an artist uses the material with which he works, and by means of which he elaborates an artistic product.

Tracing evil to the senses as a given element in man's constitution, Greek ethic never deepens toward conviction of sin, has no need or room for redemption, and remains always proud and self-sufficient. Christianity by a deeper analysis traces evil, not to sense as an element in man's constitution, but to will, *i.e.* to the man himself in revolt from God. It therefore accumulates upon man responsibility for moral evil, and deeply humbles him before God. Christian morality, accordingly, has the note of humility and contrition which is absent from Greek ethic. It also exalts man, and holds out to him hope of an attainment far higher than was possible under Greek ethic. Let his will be yielded to God and made one with the divine will. He is then at once placed in a position which is central and supreme. His whole nature, including his material frame, is now a domain wherein the will of God is being progressively realized. The painful and precarious treatment of sense as an alien element is replaced by a process by which every element in man's complex nature is brought into harmony. This process has its human side, requiring strength of will and strenuousness of purpose. It is conducted, however, in the might of a divine energy, and its product, the Christian character, is not a manufactured article in which man may pride himself, but a creation, the work of the Divine Spirit operating immediately upon the surrendered spirit of man.

3. *THE RELATION OF CHRISTIAN EXPERIENCE TO GREEK FORMS OF THOUGHT.*—The after-relations of Christian faith to Greek forms of thought have been made a subject of close and prolonged investigation by the modern school of historical criticism of which Harnack is the great representative, and of which Hatch and McGiffert are leading English examples. The work of this school is of priceless value in respect of its pure historical research. But in so far as it is dominated by certain presuppositions, and is determined by a certain preconceived idea, it seems to the present writer to be mistaken in its results. That dogma is 'in its conception and development a product of the Greek spirit on the soil of the gospel' (Harnack) may in a sense be admitted. At the same time, care must be taken

---

[*] The reference in Col 2^8 is not to be regarded as a condemnation by the apostle of Philosophy in itself. It has in view a definite form of teaching, easily recognizable by the first readers of the Epistle, though affording matter of inquiry and discussion in later times. This teaching was probably of a theosophic Jewish Christian character, not without relation, as Lightfoot and others have shown, to the Gnostic Judaism of the Essenes (see art. COLOSSIANS). Bengel's remark is apposite, 'Philosophia in se est *medium* quiddam: sed tamen facilior abusus ad *fraudem*, in ea præsertim philosophia Judaica, quam tum jactabant et puritati fidei attemperare conabantur' (*Gnomon N.T. in loc.*).

in the application of such a principle to do justice to the original content of the gospel with which later reflections had to deal. In the hands of certain members of the school it may be doubted whether this is secured. In the Hibbert Lecture of the late Dr. Hatch, the problem, as conceived by these writers, is expressed with a clearness which leaves nothing to be desired, viz. 'Why an ethical sermon stood in the forefront of the teaching of Jesus, and a metaphysical creed in the forefront of the Christianity of the 4th cent.?' The conclusion to which the brilliant ability and ripe scholarship of the author are devoted is, that this change, being 'coincident with the transference of Christianity from a Semitic to a Greek soil,' is 'the result of Greek influence.' In plain words, primitive Christianity was simple ethical teaching regarding God and duty, undisturbed by intellectual problems, and absolutely free from speculative elements. Theology, as embodied in the great creeds, is a superstructure of mischievous metaphysic reared by the fruitless subtlety of the Greek intellect, which must be swept away before genuine Christianity can be revealed in pristine beauty and power.

Obviously, then, the question is as to the nature of primitive Christianity. Is it true that it was ethical merely? Is it true that its essence is summed up in the Sermon on the Mount? Is it permissible to lay aside every element in the NT that is not rigidly and exclusively 'ethical'? Is it fair to state the problem as being the transition from the Sermon on the Mount to the Nicene Creed? If the problem be misleading, the conclusions cannot fail to be erroneous. In order to reduce the problem to the simplicity and narrowness of the above statement, the following positions must be maintained. (1) Jesus Christ cannot have been more than a unique religious personality, with deep and true moral instincts, and a high degree of spiritual-mindedness. He cannot have made Himself the centre of His message. His declarations regarding His second coming must have been an afterthought, due to the discovery on His part that His mission was to end in His being rejected and put to death. Here we have to ask: (*a*) Is this a fair account of the Jesus of the Gospels? Can the personality of Christ as presented in those narratives be reduced to the outlines of such a sketch? Take the picture of Jesus drawn by the historical school and place it beside that given in the Gospels, and say if they are duplicates. If that of the historical school be correct, then that of the Gospels is not merely incorrect in certain features, but is a sheer monstrosity, which invalidates the whole Gospel narrative, and makes it valueless for purposes of sober history. (*b*) Is it fair to ignore the self-consciousness of Jesus as gathered into His most pregnant sayings? On what principles of historic research is it permissible to discount the self-assertion of Jesus? Has the Self of Jesus not such a place even in that very Sermon on the Mount as to give an entirely different view of the sermon itself, and an entirely different reading of the problem 'from the Sermon on the Mount to the Nicene Creed'? (2) The religion of the primitive disciples must have been simply Jewish Unitarianism and Jewish Legalism, modified in some of their elements by the teaching of Jesus regarding God and duty. Here again the question is as to matter of fact. Is this the whole truth regarding the first generation of Christians? Is this account a fair interpretation of the narrative in the Acts? Can the life and work of the early Church, its worship, its preaching, its missionary impulse, its labours and martyrdoms, be made intelligible on such a supposition? In particular, is it fair to discount the place which the Risen Christ had in the faith of the early Church? Why was He worshipped, prayed to, trusted, served, and that long before Hellenic influence had touched the Church's creed? Give due weight to the self-consciousness of Jesus, estimate aright the place of the Risen Christ in the life of the early Christians; and the positions of Hatch and McGiffert must be profoundly modified. (3) The conceptions of Christ to be found in the NT writings must be due to peculiarities in the intellectual history of their authors, and cannot express anything in the general belief of Christians. On the face of it, such a proposition is utterly improbable. The NT writings are chiefly letters between correspondents. Whatever may have been the intellectual idiosyncrasies of the writers, it is inconceivable that they do not express a consciousness common to writers and recipients. Indeed, this is expressly claimed by the writers, and Paul insists that his teaching is simply the faith of Christian people as such. The existence of a Pauline or Johannine Christianity which was not that of the Church at large, and, in particular, was not the Christianity of Christ, is an unproved hypothesis, not warranted by the known facts of the NT period, and not required for their interpretation.

If, then, the NT as a whole is substantially correct, both in its narratives of events and in its interpretation of them, the problem for the historian is not 'from the Sermon on the Mount to the Nicene Creed,' but 'from the NT as a whole to the Nicene Creed.' The question at issue is, 'Is there anything in the Nicene Creed which, in respect of the truth sought to be expressed, is not already in the New Testament?'

Go back now to the moral and intellectual situation of the age in which Christianity appeared. Greek philosophy has led men to a fundamental dualism, and has uttered the demand of the human spirit for union with God. Neoplatonism, the last despairing effort of Greek thought, fails to meet the demand. Christianity enters the Hellenic world with the proclamation of that for which Hellenic thought had sought in vain, union with God. This, accomplished in Christ, is its message to the Hellenic world, and to the heart of man as such. A mere amended Judaism would have had no point of contact with the Greek mind, or with the spirit of man anywhere. The personal Christ, Son of God and Son of Man, is the centre of the primitive gospel.

Conceive now Christianity entering the Hellenic world; it will bear a twofold relation to Hellenic culture and to Greek forms of thought. (*a*) It will be influenced by them. It is implicitly the solution of the problem of Greek philosophy. It will thus naturally use the terminology of Greek philosophy, and fill the formulæ of unsuccessful thought with the meanings of a divine revelation. (*b*) It will stiffly refuse to be coerced by them. The Christian idea of union with God, viz. reconciliation through a Person, utterly transcended Greek thought. Again and again, in the centuries preceding Nicæa, the attempt was made to reduce Christianity to a phase of Greek Philosophy. Sabellianism on the one hand, Arianism on the other, were more logically consistent as speculative systems than the fulness of the gospel. Yet Christianity declined to surrender its independence. In the end the Christian experience was gathered into the Nicene Creed, which, in effect, is this: Christianity, stating, in terms borrowed from Greek Philosophy, that which is too great for any system of philosophy, a truth distinctive, unique, a revelation, not a discovery.

LITERATURE.—On the nature and function of Philosophy, E. Caird, *Essays*, 2 vols. 1892. On the relation between Philo

sophy and Religion, E. Caird, *Evolution of Religion*, 2 vols. 1893; and discussions in T. H. Green's *Collected Works* (1888), vol. iii. On the development of Greek Philosophy, the Histories of Philosophy by Schwegler (1847, Eng. tr. 1867), Zeller (1883, Eng. tr. 1886), Ueberweg (7th ed. 1883–86, Eng. tr. from 4th ed. 1872–74), Windelband (*Gesch. der alten Philosophie*, 1888, Eng. tr. 1900; *Gesch. der Phil.* 1892). On Neoplatonism and its relation to Christianity, Harnack, *Dogmengeschichte*, 1886–90 (Eng. tr. 1894–99). On the relation of Christianity to Greek Philosophy, Hatch, *Hibbert Lectures*, 1888. T. B. KILPATRICK.

PHINEES (Φινεές, *Finees*).—1. Phinehas, the son of Eleazar and grandson of Aaron. 1 Es 5^{5} $8^{2.29}$ (B Φορός, A Φινεές), 2 Es 1^{2b}. 2. The son of Heli and father of Achias. These three names are mentioned among the progenitors of Ezra only in 2 Es 1^{2a} (cf. the lists in Ezr 7, 1 Es 8): their insertion here is probably an error, since Ezra belonged to the line of Eleazar, and Phinehas son of Eli to the younger branch of the line of Ithamar. 3. A priest of the time of Ezra, and father of Eleazar, 1 Es 8^{63} (LXX ^{62}). H. ST. J. THACKERAY.

PHINEHAS (פִּינְחָס, LXX Φινεές).—1. Son of Eleazar, and his successor in the high priesthood, Ex 6^{25}, 1 Ch $6^{4.50}$, Ezr 7^{5}, 1 Es 8^{2}, 2 Es 1^{2}. The circumstance by which Phinehas is chiefly remembered (Nu 25) bears a striking analogy to the most decisive crisis in the life of St. Peter. The great confession at Cæsarea-Philippi was scarcely more significant and epoch-making in the growth of Christian discipleship than was that act of fiery zeal at Shittim in the history of the Old Covenant, when for the first time the Mosaic religion came into collision with Baal worship, its future rival. In both cases we have, 'in the fulness of the time,' a great moral decision to be made of world importance, 'Jehovah or Baal,' 'but whom say ye that I am?' Alike at Shittim and at Cæsarea, amidst a general hesitancy and failure to grasp the situation, there is a prompt response on the part of one alone, followed by the pronouncement on that one of a signal blessing of far-reaching import. When 'Israel joined himself unto Baal-peor' it was no ordinary revolt or murmuring. Something more was needed 'to make atonement' than the official execution by man of 'all the chiefs of the people,' or even than the visitation of a plague by God. The Divine want was satisfied by the personal devotion of the young priest who, while others wept helplessly, identified himself with 'the Lord whose name is Jealous' ('He was jealous with my jealousy among them'), and determined for ever the rightful attitude of a whole-hearted servant of J″ towards any encroachments of the abominable idolatries of the heathen. Accordingly we find that the slaying of Zimri and Cozbi was ever after one of the proud and stimulating memories of Israel's past history. In the psalmist's retrospect (Ps $106^{30.31}$) Phinehas, it is implied, was a second Abraham. His deed of faith 'was counted unto him for righteousness, unto all generations for evermore.' The son of Sirach in his 'praise of famous men' stamps Phinehas as 'the third in glory' after Moses and Aaron, 'in that he was zealous in the fear of the Lord, and stood fast in the good forwardness of his soul when the people turned away, and he made reconciliation for Israel' (Sir 45^{23-25}). The slaughter of the apostate Jew and of the king's commissioner at the hands of Mattathias, which initiated the Maccabæan revolt, recalls to the historian the example of Phinehas, and, in his dying exhortation to his sons, Mattathias reminds them how 'Phinehas our father, for that he was zealous exceedingly, obtained the covenant of an everlasting priesthood' (1 Mac $2^{26.54}$). With respect to this covenant, reasons have been given under the article ABIATHAR for believing that the promise to Phinehas of an everlasting priesthood was conditional, as are all the promises of God, and that, in fact, Abiathar was his last direct representative. The other notices of Phinehas in the Bible history are of lesser importance. Nu 31^{6} (P) states that he accompanied the punitive expedition against Midian, not as commander (Jos. *Ant.* IV. vii. 1), but in his priestly capacity, 'with the vessels of the sanctuary and the trumpets for the alarm in his hand,' in accordance with the law (Nu $10^{8.9}$; cf. 2 Ch 13^{12}). He was leader and spokesman of the deputation from the western tribes to the eastern concerning the erection of the altar Ed (Jos $22^{13.30-32}$); and in Jg 20^{28} the civil war between Benjamin and the other tribes is incidentally stated to have occurred during his high priesthood, and that the ark was then at Bethel (so also Jos. *Ant.* V. ii. 10), not at Shiloh as previously and subsequently (Jos 18^{1}, 1 S 4^{3}). Ewald (*HI* ii. 313) notes that the estate given to Eleazar (Jos 24^{33}), being called Gibeath-phinehas, is 'a proof that in popular estimation he ranked even higher than his father.' For this place see art. GIBEAH, 3. According to 1 Ch 9^{20} Phinehas at one time had been superintendent of the Korahite gate-keepers. 'The sons of Phinehas' (Ezr 8^{2}, 1 Es 8^{29}, 1 Es 5^{5}) seems to mean the clan of priests who elsewhere are called sons of Eleazar.

It remains that a brief mention should be made of the legends that gather round Phinehas in Rabbinical literature. His grandfather Putiel (Ex 6^{25}) was identified with Jethro by an absurd etymology, and Phinehas, before his great exploit, had been constantly reproached with his Midianite origin (*Sota*, Gemara, viii. 6, ed. Wagenseil and Targ. of Jonathan). In the Targ. of Jonathan on Nu 25, twelve signs testify to a Divine interposition in the death of Zimri and Cozbi, and the promise of God receives this remarkable addition: 'I will make him the angel of the covenant, that he may live for ever to proclaim redemption at the end of the days.' A combination of this legend with Mal 4^{5} is the probable origin of the widespread belief in the identity of Phinehas with Elijah (Fabricius, *Cod. pseudepig. Vet. Test.* ch. 170; *Seder Olam*, ed. Meyer, pp. 261, 845). He was also identified with the anonymous prophet of Jg 6^{8} (*Seder Olam*, ch. xx.) and with the prophet who denounced Eli (Jerome, *Qu. Heb.* on 1 S 2^{27}). Eusebius (*Chron. An.* 860) blunderingly identifies Phinehas with Eli. Phinehas was also said to have been the author of the last verse of the Book of Joshua, and of an explanation of sacred names (Fabricius, *l.c.*).

2. Younger son of Eli, 1 S 1^{3}. Jos. (*Ant.* V. xi. 2) says that his father had resigned the office of high priesthood to him on account of his old age. It is true that the biblical narrative implies throughout that Hophni and Phinehas performed the active functions of the priesthood, but there seems no other ground for this supposed abdication in favour of the younger son than the fact that the succeeding high priests were descended from him. Hophni was probably childless. Two sons of Phinehas are mentioned, Ahitub (1 S 14^{3}) and Ichabod (1 S 4^{21}). On the other hand, it is almost certain that in 2 Es 1^{2} this Phinehas is reckoned among the high priests. That list alone inserts Heli, Phinees, and Achias (*i.e.* Ahijah) between Amariah and Ahitub. This is evidently an attempt to make a complete list by adding Eli and his successors, who are ignored in Ch, Ezr, and 1 Es. This is not the place to moralize on the excesses of Phinehas and his brother, or on their indulgent father's dignified but feeble remonstrances, or on their miserable death. Their ritual irregularity, however, demands an explanation. They committed two distinct breaches of the law. (*a*) It seems clear that 'the memorial,' which in

animal peace-offerings was the inner fat (Lv 3), was always burnt on the altar first; that is, the Lord received His portion before either priest or offerer took theirs. (*b*) The portion of the animal due to the priest was strictly defined, although neither the law of Lv 7[34] ('the wave breast and the heave thigh have I taken . . . and given unto Aaron the priest and unto his sons as a due for ever from the children of Israel') nor that of Dt 18[3] ('they shall give unto the priest the shoulder and the two cheeks and the maw') may have been then in force. The worshippers, however, seem to have resented the impiety more than the greed of the priests. The sin of the young men is graphically summed up in the statement that 'they contemned (נאצו) the offering of the Lord' (1 S 2[17], on which see Driver or H. P. Smith).

3. Ezr 8[33], 1 Es 8[63]. Father of Eleazar, one of the two priests who received at Jerusalem the offerings brought by Ezra from Babylon.

N. J. D. WHITE.

PHINOE (*Φινόε*, AV Phinees), 1 Es 5[31]=Paseah (*Φισόν*), Ezr 2[49], Neh 7[51].

PHLEGON (*Φλέγων*).—The name of a Christian greeted with others by St. Paul in Ro 16[14]. He is commemorated with Herodion and Asyncritus (which see) on April 8 (*Acta Sanctorum*, April, i. p. 741). The name was borne by a Greek writer of the 2nd cent. who is stated by Origen to have given some information concerning Christ.

A. C. HEADLAM.

PHŒBE (*Φοίβη*).—In Ro 16[1] St. Paul commends Phœbe to the Roman Christians. He describes her as (1) 'our sister,' (2) 'a servant (*διάκονος*) of the Church that is at Cenchreæ'—the port of Corinth. (3) He asks that they 'receive her in the Lord, worthily of the saints, and 'assist her in whatsoever matter she may have need of them.' (4) He says that she has been 'a succourer (*προστάτις*) of many,' and of himself in particular. It is generally assumed that Phœbe was the bearer of the Epistle, and the words by which she is introduced (*συνίστημι ὑμῖν*) imply a formal introduction to the Roman community.

Two points demand a short discussion: (1) How far is *διάκονος* technical? This is the only place where the office is referred to by name in the NT (for 1 Ti 3[11] 5[3ff.] cannot be quoted), but the younger Pliny (*Ep.* x. xcvi. 8) speaks of *ministræ* in the Christian Church, and there are constant references to them under the names of *διάκονος* (ii. 26) and *διακόνισσα* (viii. 19, 20, 18) in the *Apostolic Constitutions.* Moreover, the circumstances of Oriental life must have made it necessary that there should be female attendants to perform for women what the deacons did for men, in baptism, in visiting the women's part of the house, and in introducing women to the bishop or deacons (*Apost. Const.* iii. 15, etc.). There is no occasion, therefore, for thinking that the word has not, at any rate to a certain extent, a technical meaning, but we have not sufficient grounds for assuming an order of deaconesses in the later sense. The translation 'servant,' however, is inadequate.

(2) The description of her as *προστάτις* suggests that she was a person of some wealth and position. This word again is probably technical. It implies the legal representative or wealthy 'patroness.' Her residence at Cenchreæ — the port towards Ephesus—would enable her to exercise the duties of hospitality, and to give other forms of assistance to Christians on their first landing in the country, and to help what must have been a small and struggling Church. She is commemorated on Sept. 3. See *Acta Sanctorum*, Sept., vol. i. p. 602.

PHŒNICIA.—

i. Sources.
ii. The Country—
    (*a*) Its extent and natural features.
    (*b*) Its history.
    (*c*) Greater Phœnicia.
iii. The People.
iv. The Alphabet and Language.
v. Constitution and Government.
vi. Civilization and Commerce.
vii. Religion—
    (*a*) The deities.
    (*b*) Sacred objects and cultus.

i. SOURCES.—The sources of our knowledge of Phœnician history and civilization are contained in—(*a*) *Inscriptions in the Phœnician language.* These are very numerous, amounting to some thousands. They have been found in Phœnicia itself and in Cyprus, Egypt, Greece, the islands of Melita, Gaulos, Sicily, Cossura, Sardinia, and Corsica, as well as in Africa, Italy, France, and Spain. Whilst these are invaluable for the restoration of the language (especially such as have Greek transliterations and translations appended), unfortunately very few are of historical interest, few are of any length, few have been found in Phœnicia itself, and, with one exception, none are earlier than the Persian period. The oldest known is *CIS* No. 5. This is on the fragments of a bowl discovered in Cyprus ('in insula Cypro, casu [ut putamus] reperta') but belonging to a temple of Ba'al not far from Sidon, and on palæographical grounds is assigned to the 9th cent. B.C. It mentions a 'Hiram, king of the Sidonians,' but it remains uncertain to which of the kings of this name it refers. The remaining inscriptions consist mostly of dedications and memorials on tombs, with two or three pertaining to sacrifices. Their chief value lies in the names of kings they contain, and in the proper names containing names of gods.*

(*b*) *The Egyptian hieroglyphic and Babylono-Assyrian cuneiform inscriptions* contain many references to the land of Phœnicia, and give some idea of its relation to foreign powers from the 16th cent. B.C. to the Persian period. The Tel el-Amarna tablets give a glimpse into contemporary history which is valuable and probably characteristic. Much, however, remains to be done in the classification and identification of the geographical names in the cuneiform inscriptions. For the Egyptian much has been done by W. Max Müller.†

(*c*) *References to the Phœnicians, and especially to Tyre and Sidon with their dependencies, in the Old Testament.*—These occur in writings extending over a period of about four centuries (9th to 5th cent. B.C.). They consist partly of short notes ethnographical (more properly geographical) as in Gn 10; archæological or geographical, as in Dt 3[9], Jos 13[4]; historical, as in 1 K 5 and 16; or relating to religion, as in 1 K 11[5]. In addition to these the longer passages in the books of Isaiah (ch. 23), Jeremiah (chs. 25. 27. 47), and Ezekiel (chs. 26–32) give a striking picture of the commerce and civilization of the chief Phœnician cities at the time when these prophecies were written.[*]

---

* The Phœnician inscriptions are collected in the *Corpus Inscriptionum Semiticarum*, pt. i. vols. i. and ii., Paris, 1881–99. Further details as to some of them, and two or three new and recently discovered inscriptions, will be found in the *Oriental Journals* of Germany, Vienna, Paris; in the *Revue d'Assyriologie*, vol. v. No. 1, and other journals.

† The references to Phœnicia in the Egyptian inscriptions will be best found in Flinders Petrie's *History of Egypt*, Brugsch's *Egypt under the Pharaohs*, and W. Max Müller's *Asien und Europa.* The Tel el-Amarna tablets are edited by Winckler, *The Tell el-Amarna Letters.* A very useful compendium with much valuable comment is contained in Flinders Petrie's *Syria and Egypt from the Tell el-Amarna Letters*, London, 1898. The best collection of Babylonian and Assyrian inscriptions is in Schrader's *Keilinschriftliche Bibliothek*, vols. i.–iv.

(*d*) *Greek writings*.—For fragments of two of the most important writings on Phœnician history we are indebted to Josephus, Eusebius, and others whose writings we have, who may have taken them from the encyclopædic writer Alexander Polyhistor. *Menandros of Ephesus*, who seems to have flourished about the 2nd cent. B.C., wrote a history or chronicle of some at least of the Phœnician cities. The first fragment (in Josephus, *c. Ap.* i. 18 and in part also in *Ant.* VIII. v. 3) contains Tyrian annals, with a list of kings from the early part of the 10th cent. B.C. to the founding of Carthage at the close of the 9th century. A second fragment (*Ant.* IX. xiv. 2) tells of a siege of Tyre under Shalmaneser, and a third (*c. Ap.* i. 21), usually ascribed to Menandros, though he is not explicitly mentioned as the author, gives further chronology and list of kings from a siege of Tyre under Nebuchadnezzar to the accession of Cyrus to the throne of Persia. Three other smaller pieces are of minor importance.

Dios, an otherwise unknown writer, is quoted in Jos. *c. Ap.* i. 17 as having written an accurate history of Phœnicia. The extract given tells of Hiram the contemporary of Solomon. Two or three other authors are mentioned in Greek literature as writers on Phœnician history, but their works have perished.—Quite different in character from the works mentioned seems to have been the Phœnician history of *Philo Byblios*, a writer of the end of the 1st cent. A.D. His work professed to be a translation of the writing of a Phœnician named Sanchuniathon who lived in the period before the Trojan war. The portions of his work preserved for us by Eusebius show him to have been a euhemerist, who in his description of the gods and his cosmogony has used Phœnician material, but has so adapted it to suit his own views that his work can be used only after most searching criticism.—Besides the above works, there are references in Greek writings too numerous to be mentioned here. The *Iliad* mentions 'Sidon,' 'Sidonians,' and 'Phœnicians,' and the *Odyssey* the same, with the addition of 'Phœnicia.' Herodotus tells of Phœnician legends and commerce, and many writers after him have incidental notices of this land and people.—Of *Roman* writers, one deserves mention. In the prologue to the 18th book of Justin's epitome of the history of *Pompeius Trogus* (about the beginning of the Christian era) occur the words, 'Inde (continentur) origines Phœnicum et Sidonis et Veliæ Carthaginisque res gestæ in excessu dictæ.' The only section that remains is in Justin, xviii. 3 ff., and was probably taken from a work of Timagenes (1st cent. B.C.).[†]

(*e*) *Archæological remains*.—Underground Phœnicia is still almost entirely unexplored, though a beginning has now been made at Sidon. Scattered about, however, on the surface of the ancient Phœnician land are remains of walls, fortifications, temples, and tombs, which help to tell the story of bygone days. Of the colonies, Cyprus and Carthage have yielded a large number of articles (vases, statuettes, etc. etc.), which throw light on the arts and daily life of the people. Coins also, and seals, though not in large numbers, are now to be found in museums (see below under 'Civilization and Commerce').

ii. THE COUNTRY.—(*a*) *Extent and natural features*. Although the Phœnicians inhabited cities as far north as Myriandos (in the Gulf of Alexandretta) and as far south as Jaffa (see below) in the Persian period, the earlier Phœnician territory may be said roughly to have been bounded on the north by the river Orontes or Mt. Casius, and on the south by Mt. Carmel. On the east the limits are entirely unknown, but the Bargylos and Lebanon ranges seem to form natural boundaries on that side. Colonists from Sidon, however, appear to have pushed their way as far inland as the neighbourhood of the sources of the Jordan (Jg 18). The land thus consisted of two distinct regions: (1) The hill-country, *i.e.* the slopes of Bargylos (Nusaireyah) and Lebanon. Both these ranges extend from N. to S.: the former from Antioch to the river Eleutheros, the latter from this point to the mountains of N. Galilee and Hermon. They are of limestone, with many other formations, and in some parts reach a height of over 10,000 ft. The scenery is magnificent, especially in the great gorges where the rivers pass down into the plains. The vegetation is luxuriant for a long distance up the slopes, and the many flourishing villages on the side of the Lebanon facing the sea to-day, tell us of one part of Phœnician life which has vanished almost entirely from its history. The chief rivers are the Eleutheros, which separates Bargylos from Lebanon; the Adonis, famous in history; and the Lycos, at the mouth of which still remain the well-known Egyptian and Assyrian inscriptions. But besides these there are many small streams which pour down from every mountain slope, full in the rainy season, empty in the dry, and for this very reason affecting both commercial and military movements. (2) The plains are best known as containing nearly all the cities that have left their mark in Phœnician history. The extreme north is a mere strip of land between the mountains and the sea, and the first great plain is that extending for about 60 miles south from Gabala, with a width varying from 2 to 10 miles, and containing the cities of Arvad and Simyra. The next piece of open country is that from the Lycos river to a few miles below Beyrût, then follow the plains of Sidon, about 10 miles long and 2 broad, Tyre about 20 miles long and from 1 mile to 5 miles broad, and Acre about 8 miles long and 6 broad. These plains as well as the hilly slopes were famous for their cultivation, and there are traces to-day, in the remains that are found, of the industries that were carried on in them. But they owe their fame mostly to the fact that they are the highways along which the trade of the East came to the West. The inscriptions at the mouth of the Lycos, the annals of Egypt and Assyria, and the descriptions of the OT prophets, all bear witness to the constant traffic and frequent invasions that were made possible by this low-lying coast-land of Phœnicia.[*]

---

[*] For a complete list of OT passages referring to Phœnicia, see the *Concordances s.* 'Sidon,' 'Sidonians,' 'Tyre,' 'Arvad,' 'Gebal,' and consult the table in Gn 10; see also CANAAN in vol. i. p. 347. Tyre and Sidon are mentioned in the NT by the Synoptists, Mt $11^{21.22}$ 15^{21}, Mk 3^{8} $7^{24.31}$, Lk 4^{26} 6^{17} $10^{13.14}$, and in Ac 12^{20} $21^{3.7}$ 27^{3}. In Mk 7^{26} the adjective Συροφοινίκισσα occurs.

[†] The fragments of Menandros are collected in Müller's *Fragmenta Historicorum Græcorum*, vol. iv. p. 445 ff., but to Müller's list must be added the paragraph contained in Jos. *Ant.* IX. xiv. 2, and it should be noticed that a part of the first piece is repeated in *Ant.* VIII. v. 3. It will be observed that Josephus says that Menandros wrote of the 'kings of the Greeks and the Barbarians.' The fragment of Dios is contained in the same volume (*Frag. Hist. Gr.* iv. 398), where the author is identified with Ailios Dios; but this is very doubtful. The remains of Philo Byblios are collected, *ib.* iii. 560 ff. The value of his work has been much discussed by scholars. A good essay on the subject is that of W. Baudissin in his *Studien zur semitischen Religionsgeschichte*, vol. i. pp. 1–46. His conclusion is that Philo has taken his material from various sources—some Semitic—and given to it the name of a man of antiquity. Sanchuniathon is a genuine Phœnician name. In any case the work as a whole represents Phœnician religion in its *decline*, not in its origin.

[*] A description of the old Phœnician territory at the present time may be read in Renan, *Mission de Phénicie*; Walpole, *The Ansayrii*; Réclus, *l'Asie Antérieure*; and Baedeker's *Palestine and Syria*.

(*b*) *History of the country.*—The earliest historical mention of the Phœnician land is in the older Egyptian inscriptions, where it appears under the name of *Dahe* (or *Zahi*).* Between B.C. 1587 and 1562 Aahmes reached it in his northern conquests. He also mentions a people called the Fenkhu as workers in his quarries. Thothmes I. (1541–16) overran the whole length of Syria as far as the Euphrates. Thothmes III. (1503–1449) in his 23rd year records a victory over the Fenkhu and other Syrians; in his 29th year another campaign to Retennu, Tunep, Arvad, and Zahi, with much Phœnician spoil; in his 30th year a campaign to Kedesh, Simyra, and Arvad; and in his 34th year a campaign which brought tribute from Zahi, Retennu, and Asi (Cyprus). In the reign of Amenophis III. (1414–1379) Egyptian power seems to have been at its highest, and Phœnicia, with the rest of Syria, was entirely subject to it. The next reign, that of Amenophis IV. (or Akhenaten, 1379–66), is one of decay. The discovery of the Tel el-Amarna tablets has given us a rather fuller insight into the relation of Phœnicia to Egypt than we have had hitherto, for some of the letters contained in these tablets are from or to Egyptian governors and others in Phœnician cities. Thus we have mention of Abimilki of Tyre, Amunira of Beyrût, Khaib, commissioner of Simyra, Ribaddi of Gubla, Shutatna of Akko, Zimrida of Zidon, etc. Nearly all the letters tell the same story of attacks from without and rebellion within, and prove that whether Phœnicia now made a stand for independence or became a prey to other rising empires, it was at this time passing from Egyptian dominion. The Egyptians still made raids into Phœnician territory or marched through it (cf. the inscription of Ramses II. at the mouth of the river Lycos) to attack other enemies, and Phœnicians probably still paid tribute from time to time to Egypt. We have no details of the history of the land at this time. We know, however, that it never formed one united kingdom. Its history is the history of its cities. Of these, Arvad seems to have enjoyed a pre-eminence in the earliest times, and more certainly Sidon a little later. The whole people was sometimes known to foreigners as the Sidonians. The era of Tyre began about B.C. 1197 (according to Jos. *Ant.* VIII. iii. 1); but Arvad and Sidon were still independent cities in the 9th cent.: in the 8th Tyre seems to bear rule over Sidon, Akko, and other cities. Later, Diodorus Siculus (xvi. 41) mentions a united council of men of Arvad, Tyre, and Sidon at Tripolis (native name unknown). This development of the government of cities was not without foreign intervention. The Egyptians had scarcely ceased troubling them when they were brought face to face with danger from a new quarter. It is possible that as early as 1140 Nebuchadnezzar I. of Babylonia invaded their country (cf. Winckler, *Geschichte Babyloniens und Assyriens*, p. 95 and note 18). Tiglath-pileser I. (*c.* 1100) also seems to have reached the Mediterranean coast near Arvad. In the 9th cent. Assur-naẓirpal raided the country, as did his successor, Shalmaneser II., who received tribute from Tyre and Sidon and Byblos (Gebal), as well as from Jehu king of Israel; and Mattanbaal king of Arvad fought with Ahab at the battle of Karkar (854). In the 8th cent. the cuneiform inscriptions record tribute received by Tiglath-pileser III. from Arvad, Tyre, and Gebal; and Menander tells of a siege of Tyre by Shalmaneser IV. which lasted for five years. In the following century Sargon, Sennacherib, and Esarhaddon all sent their armies to Phœnicia, and the last named even to Idalion in Cyprus; and in the 6th cent. the new Babylonian empire continued the work of Assyria in the famous siege of Tyre by Nebuchadnezzar. With the rise of the Persian empire came a change which greatly benefited the Phœnicians. Cyrus seems to have left them alone, and about this time they again supplied the Jews with materials for building their temple (Ezr 3[7]). Cambyses enrolled them in a satrapy with Cyprus, Syria, and Palestine, and thus received from them their share of tribute; but was friendly to them, and depended on them entirely for his navy (cf. Herod. iii. 19); nor did he attempt force against them even when they refused to give him ships wherewith to attack Carthage. The Phœnician fleet continued to do good service for the Persians, especially against the Greeks, until 351, when Sidon, under Tabnit, revolted; but Ochus soon brought Phœnicia back to obedience, and its cities continued to flourish under their native kings until after the battle of Issus they fell into the hands of Alexander the Great, Tyre only after suffering a long siege and a cruel punishment. After Alexander's death, Phœnicia fell with Syria to Laomedon, then in 320 to Ptolemy Lagi, and in 314 to Antigonus. In 287 it again passed to the Ptolemies, who held it until 198, when it became part of the Seleucid empire. During all this period Greek manners and customs and language were largely introduced into the country. Finally, after it had shared with Syria in the many vicissitudes of the Seleucid power, in 65 Rome took possession, and Phœnicia was included in the province of Syria under a proconsul or pro-prætor, though Tyre, Sidon, and Tripolis remained free cities with their own elected magistrates and council (cf. Ac 12[20f.]). In Mk 7[24-30] a woman of this country is called a Syro-phœnician; in Mt 15[21-28] the older name 'Canaanitish' is used. For this section, see, further, the Literature cited in the notes to 'Sources,' above.

(*c*) *Greater Phœnicia.*—A sketch of the history of Phœnicia would be incomplete without a notice of the many ports, especially in the Mediterranean, where its people settled, and from which came many of those articles of commerce which made them renowned. Some of these settlements can be traced back to the 15th cent. B.C. There may have been some before that time; but records fail us. In some of these places the Phœnicians seem to have had real colonies, in others merely 'factories,' where their traders received the wares of the neighbouring country to export them to their own land. Cyprus was very early settled by them, and although the Greeks afterwards took much of the island, the towns of Kition and Idalion flourished up to Roman times (see CYPRUS). The islands of the Ægean Sea (including Crete, Rhodos,

---

* W. Max Müller suggests that this name may be connected with the root زها 'to be beautiful,' ܙܗܐ 'to act well'; cf. צחה 'to shine' (*Asien und Europa*, p. 176). This name begins to go into the background in the 12th cent., and is almost forgotten in the Ptolemaic period. *Kaft* or *Keft* (in the inscription of Thothmes III. etc.) is frequently taken to indicate the Phœnician coast (cf. Sayce in article CANAAN), but Müller (p. 337 ff.) argues strongly for its representing Cilicia. *Canaan* is a geographical term denoting the low land, and seems to have been used by the Phœnicians themselves at one time to denote their land (see CANAAN). The name Φοινίκη given by the Greeks (it occurs in *Odyss.* iv. 83) has given rise to much discussion. It seems to have been used (like Ἑλλάς) for the land where Phœnicians dwelt, whether at home or abroad; thus Euripides (*Tro.* 221) uses it for Carthage. The older derivations of the name Φοίνικες (Phœnicians) from φοῖνιξ, the bird ('phœnix'), or a 'palm,' are fanciful and secondary. Some derive the word from φοινός, 'brownish-red,' as denoting the colour of the skin (Pietschmann, *Gesch. d. Phönizier*, p. 13), a root which reappears in the Latin *Pœnus* ('Punic' of Carthaginians). Some (cf. CANAAN and Ed. Meyer, *Gesch. d. Alterthums*, §§ 180, 190, etc.) refer both these names back to the word 'Fenkhu,' which appears in the inscription of Thothmes III. at Karnak. To this Müller objects (p. 208 ff.), that this word was originally only an *Egyptian* term used in a general sense for the northern barbarians. Finally, Ed. Glaser (*Punt und die südarabischen Reiche*, 1899) has revived the view that the name is connected with the 'Punt' (or Powen-at=Poen-at) of the Egyptian inscriptions, a part of South Arabia and East Africa.

Kythera, and many others) were occupied by them—as many scholars hold—even in pre-Homeric times (cf. Bérard, 'Les Phéniciens et les poèmes Homériques,' in *Revue de l'histoire des Religions*, xxxix. 173–228 and 419–460). The advance of the Greeks, and consequent expulsion of the Phœnicians from these islands, seems to have led to an increased interest in the settlements in the West Mediterranean, some of which, at least, had been founded long before. Sicily, Sardinia, Corsica, Malta, Gaulos, Tarshish, and Gades in Spain, various places in N. Africa, including the famous Carthage, were settled by them, and were in constant communication with the home country. Many of these settlements have been assigned by history and tradition to certain Phœnician cities, *e.g.* Utica and Carthage to Tyre, and Carthage itself seems to have established new trading ports on the opposite coast of the Mediterranean. (For settlements outside the Mediterranean, see paragraph in small type below).

iii. THE PEOPLE.—The origin of the Phœnician people is wrapped in mystery. According to their own traditions of the 5th cent. B.C., they dwelt formerly by the Erythræan Sea (Herod. vii. 89; cf. i. 1), *i.e.* the Indian Ocean, including the Persian Gulf. This tradition is repeated by other classical authors—Strabo, Justin, Pliny, *et al.* Justin enlarges the story by a statement that an earthquake was the cause of their movement, and that they dwelt then near the 'Assyrian lake' (XVIII. iii. 2); and Strabo (who in I. ii. 35 regards the story of the migration as untrustworthy) says (in XVI. iii. 4) that in the Persian Gulf are two islands—Turos and Arados—whose temples resemble those of the Phœnicians, and that the inhabitants of these islands say that the Phœnician islands are named after them, and their towns are settlements from themselves. Sayce (note to Herod. i. 1) suggests that the similarity of names gave rise to the whole legend, and points out that the names are really different, as according to Ptolemy and Pliny the real name of the island in the Persian Gulf was Tylos, while the Phœnician city Tyre was צר, and the Phœnician Arados was properly Arvad. Failing historical evidence, we are led to such testimony as we can get from language, anthropology, and religion. This is avowedly incomplete at the present time; but the material available shows the Phœnicians of the Syrian coast to have been a Semitic people, who took part in the great migration to the West which at different times sent also the Aramæans to Syria and the Hebrews and their kin to Palestine.

It has long been known that the activity of the Phœnicians was not confined to the islands and coasts of the Mediterranean, and it has been suspected that the Phœnicians of the Syrian coast were perhaps only one branch of a race which had settlements in other parts of the Semitic world. A work entitled, *Punt und die südarabischen Reiche*, by Eduard Glaser, the famous traveller in South Arabia, appeared in the end of 1899, in which evidence has been gathered from the records of Egypt and the South Arabian inscriptions to show that these conjectures are supported by history. According to Glaser, the land of Punt, so often mentioned in Egyptian inscriptions, was a large part of the coasts of East Africa and South Arabia. Thence the Egyptians obtained incense, gold, etc. From this land were established several colonies, including Mashonaland and Socotra. But the remains in the former place are evidently Phœnician, various signs indicate the identity of the races inhabiting the land of Punt, and the name itself is identical with 'Phœnician.' Thus we must in future speak of two branches of the Phœnician people, a Northern on the coasts of Syria, and a Southern (of the same race, language, and origin as the Northern) which left the Erythræan Gulf at a very early period, and ceased from that time to influence the other members of the race. The confirmation or otherwise of this theory must depend on the further evidence of the Babylonian and S. Arabian inscriptions.

iv. ALPHABET AND LANGUAGE.—(*a*) The Phœnician *alphabet* is purely consonantal, and consists of 22 characters, written from right to left. Tradition says that this was the first alphabet invented—

> 'Phœnices primi, famæ si creditur, ausi
> Mansuram rudibus vocem signare figuris.'—(Lucan).

It is, however, generally recognized that the invention consists in the taking over of signs used originally by other peoples to denote syllables, and the adaptation of these to denote simple sounds, together with the simplification of what were originally pictorial or hieroglyphic characters. Together with this we must recognize that some letters were not taken over directly, but were formed by slight modifications of those thus received (thus the sign for the rough aspirate *ḥ* is formed from that of the simple *h* by the addition of a stroke to the left). Various opinions are held as to the original source. Until lately the favourite view has been that the Phœnicians borrowed their characters from the Egyptian. This was also held in ancient times, and is mentioned in Tacitus—'Primi per figuras animalium Ægyptii sensus mentis effingebant . . . et literarum semet inventores perhibent; inde Phœnicas, quia mari præpollebant, intulisse Græciæ gloriamque adeptos, tamquam reppererint quæ acceperant' (*Ann.* xi. 14). Supporters of this opinion are divided as to whether the Phœnician characters were derived directly from the hieroglyphs or from the hieratic writing. Much has been written of late to show that the Babylono-Assyrian cuneiform is the real source of the Phœnician alphabet. This opinion was also held in early times. Pliny says, 'Litteras semper arbitror Assyriis fuisse, sed alii apud Ægyptios a Mercurio, ut Gellius, alii apud Syros repertas volunt' (*Nat. Hist.* vii. § 37). The widespread use of the cuneiform characters about the time to which is assigned the invention of the Phœnician alphabet, is used to support this hypothesis. A third view held by some corresponds in some degree with the last mentioned by Pliny, and derives the Phœnician characters from the Cypriote, which are connected with the so-called Hittite characters. This opinion is altogether too undeveloped at present to be judged properly. Nor is it easy to decide as to the Egyptian and Assyrian theories. The selection of the characters to which the Phœnician are referred seems arbitrary, and a succession of intermediate forms is wanting. Either view seems to be historically possible, neither proved. The Phœnician alphabet, like most others, seems to have only incompletely represented the sounds of the language. Two words beginning in Phœnician with the same letter are represented in Greek by different letters, צור=Τυρος, צדן=Σιδών. These characters are identical with those found on the Siloam inscription in Judæa and the Moabite Stone, and on early Jewish coins, and may thus be called Canaanitish (in the large sense) as well as Phœnician. The early Greek alphabet was also derived from the Phœnician (cf. Herod. v. 58), though soon altered in many ways to suit the needs of the Greek language.

(*b*) The *language* of Phœnicia is pure Semitic, and belongs to the same branch of that family as the Hebrew, the Moabitish, and the Semitic glosses in the Tel el-Amarna letters, forming with these (and probably other dialects of which we have no remains) the so-called Canaanitish group. The materials for an exact comparison with Hebrew are wanting. The inscriptions (with the single exception of *CIS* i. 5, see above under 'Sources') are later than the 6th cent., and mostly of the 4th and later, when the language had probably suffered a certain amount of decay. The Punic passages in Plautus are of the end of the 3rd cent., and can be used only with care (cf. Nöldeke, *Die semitischen Sprachen*, p. 25 f.), and the vowel letters in the inscriptions are rare. The consonants are the same as in Hebrew, but many words were probably pronounced with different vowel sounds from those used in the same words in Hebrew. The wau conversive with the imperfect, so familiar in Hebrew, is wanting in the Phœnician, which, on the other hand, seems to have formed a kind of pluperfect with *kān* (*CIS* 93). Words, too, that became rare or poetical in Hebrew were in common use in Phœnician. The later language shows the same weakening and confusion of gutturals that marks late Hebrew.

LITERATURE.—On the Phœnician alphabet see de Rougé, *Memoires sur l'origine égyptienne de l'alphabet phénicien*, 1874; Deecke, "Ursprung d. altsemitischen Alphabets aus d. neuassyrischen Keilschrift,' in *ZDMG* xxxi. 102 ff.; and cf. Zimmern, *ib.* l. 667 ff.; Isaac Taylor's, *The Alphabet* ^{2}, where the Egyptian origin is accepted; Ball, 'Origin of the Phœnician Alphabet,' in *PSBA*, 1893, 392–408; Berger, *L'écriture dans l'antiquité*. Conder, in *The Bible and the East*, p. 74 ff., supports the Cypriote origin.

The inscriptions are collected in the French *Corpus*; the words in them are collected in Bloch's *Phœnicisches Glossar* (Berlin, 1891); and esp. by Lidzharski, *Handbuch d. nordsemitischen Epigraphik* (Weimar, 1898). The words in Plautus are discussed by Gildemeister in Ritschl's edition of Plautus, vol. ii. fasc. 5 (Leipzig, 1884). A fuller discussion of these by Prof. D. S Margoliouth will appear in a forthcoming number of the *Classical Review*. The only grammar of Phœnician is Schröder's *Phœnizische Grammatik* (Halle, 1869). Cf., further, article on LANGUAGE OF OT.

v. CONSTITUTION AND GOVERNMENT.—The Phœnicians never appear in history as one united people under one government. Their political history resolves itself into the history of their chief cities. Naturally a quiet and unwarlike people (Jg 18^7), the country folk were probably content with the simpler forms of local or patriarchal government usual among Eastern peoples, depending for help in time of need upon the city that was nearest to them or which they had originally left as settlers. In the cities the government was more conventional. Kings of Sidon, Tyre, Gebal, Kition, and Idalion are mentioned in the OT, in foreign records, and on the Phœnician inscriptions. From Menander's list of the kings of Tyre we can see that the monarchic power remained in the same family, except when revolutions broke the order of succession. As to the constitution of the court circle, we can only gather from our knowledge of Carthage, and of the Semitic states bordering on Phœnicia, that there existed an aristocracy which probably owed its existence in early times to prominent position in the tribes. In some of the cities a body of ten chiefs (Justin, xvii. 6. 1) seems to have been prominent in international business. This seems to have been part of a larger council of a hundred men. Of the organization of the traders, the most important part of the population, we know nothing. A tradition in Justin (xviii. 3) seems to indicate the presence of a large slave population. Among the different cities it was inevitable that one or another should gain some pre-eminence over the others. This is historically proved by the fact that at one time Sidon gave its name to the Phœnician people as a whole, while in OT times Tyre evidently had some kind of supremacy. For the Persian period Diodorus Siculus (xvi. 41) mentions a federal government with headquarters at Tripolis, where Arvad, Sidon, and Tyre held a common council. Even when under the sway of foreign powers, the chief Phœnician cities seem to have always maintained a large amount of self-government in internal affairs; and under the Romans we know that Sidon, Tyre, and Tripolis retained the rank of 'free cities,' with the right to appoint their own councils and magistrates.

vi. CIVILIZATION AND COMMERCE.—The people were originally, in all probability, largely agricultural. The inscription of Thothmes III. mentions among the spoil of Phœnicia, 'good bread and various bread, corn in grain, flour . . . and all good fruits of the land.' But though the agricultural class doubtless existed throughout its history, it soon yielded in importance to those of the manufacturers, merchants, and seamen, who received raw material from various parts of the known world, and sent it forth again in new and more useful or more beautiful forms, or contented themselves with simply acting as intermediaries with profit to themselves. Their navigation, originally taken up for business purposes, became later a great source of influence and probably of wealth to them, when they provided a navy for their Persian rulers. Phœnicia was essentially mercantile, and was warlike only when commercial life was threatened. Situated on the only part of the Syrian coast that had any pretence to natural harbours, and hemmed in by lofty mountains on the north and east, its people naturally turned to the sea. And so the sea soon carried their ships; its shells gave them their valuable dyes, and its sand the material for their glass. The meeting of the land trade-routes from Asia and Africa, and of the sea-routes from all parts of the Mediterranean, made alike the history and the civilization of Phœnicia. The land-routes existed for natural reasons; the sea-routes were due to the skill and enterprise of the sailors who pushed their way from island to island, and cape to cape, until they reached the southern capes of Spain, and passed through the Straits of Gibraltar. Yet the people do not seem to have been very original or inventive, and their chief merit seems to have been rather the power of adapting and fitting for commercial purposes the arts they learned from others. They had, too, the advantage of being able to collect in one place the products of many lands, and thus of producing an effect on the imagination of peoples which gave them a glory not all their own. Glass was one of the manufactured articles for which they gained much credit, and tradition came to ascribe its invention to them (Pliny, *Nat. Hist.* xxxvi. 65); but it had been made 'from time immemorial' in Egypt, and the art of making it was probably taken by the Phœnicians from that country. The dyed wares of Phœnicia were renowned throughout the ancient world, and the abundance of the *murex* on their coasts (see COLOURS in vol. i. p. 457) gave full opportunity for the production of the most brilliant colours then known; but the art of dyeing probably came from Babylonia. Their weaving and embroidery were alike famous and sought after; but we are still ignorant as to how much progress in these arts was due to native workers. Gold, silver, iron, tin, and lead were imported by them long before the days of Ezekiel, and were wrought into forms of beauty that were known to the Homeric poems (*Il.* xxiii. 740 ff.; *Odyss.* iv. 618); but their artistic forms show undoubted marks of large foreign influence. Amber, it is now known, was dug in Phœnicia itself, but was also probably received by the ordinary trade-routes from the Baltic, and objects made of it have been found in the ruins of Mycenæ.

The *artistic side* of Phœnician life (with a rather large commercial appearance in it) is well represented in the various objects which have been dug up or discovered in Phœnicia itself, but more extensively in Cyprus and Carthage and a few more of the old Phœnician colonies. The pottery discovered belongs mostly to the Græco-Roman times, and most of its excellences seem to be due to foreign influence. Earlier specimens, supposed to be Phœnician, are both of the painted and incised varieties, but are not at all remarkable. The metal-work is more interesting, and the statuettes of bronze are curious if not particularly beautiful. The bronze bowls of Cyprus and the celebrated cup (discovered at Præneste) of silver, overlaid with gold, with figures in low-relief, alike bear witness to the influence of Egyptian and Assyrian art. The same applies to the seals and cylinders, which do not usually show a very fine finish, and are generally of serpentine, sometimes of glass, etc. The chief feature of this sculpture was the application of colour to give emphasis to certain parts of the figure. Their architecture is only partially known to us from very imperfect remains. A marked feature in their building is the employment of the natural solid rock, as far as possible. This is the case with the old walls of Sidon, much of the funeral architecture, and the famous monolith house of Amrith. There seems to have been no vault in Phœnician architecture, the roof being terraced, as in Syria at the present day. The columns, cornices, and other decorations are almost entirely foreign, largely Egyptian. The tombs were in caves, and sarcophagi were used, and sometimes massive monuments like the so-called 'Hiram's tomb' towered above the burying-place. The architecture of their temples was probably Egyptian. That in all these arts the Phœnicians were reputed to be skilful workmen we know from the OT account of the relations between Solomon and Hiram of Tyre. A namesake of the Phœnician king made for the temple at Jerusalem the two great pillars of bronze, the molten sea, and other objects of beauty and utility (1 K 7 ff.). To reconstruct these from the descriptions given has been a desire of many writers on ancient art, but there is and must be much uncertainty as to the details of the work. See art. PILLAR.

The only *metal* found in Phœnicia itself was iron, but the abundance of minerals in some of their colonies soon made the Phœnicians expert miners. Cyprus contained large quantities of copper, and the island gave its name to this metal. The Sardinian settlements were apparently due to the search after copper and lead. The mines of Thasos were known to Herodotus (vi. 47), and the Spanish colonies were perfect storehouses of gold, silver, copper, tin, iron, and lead.

The attention given to *navigation* naturally gave rise to a large industry in the art of shipbuilding, and it is possible to trace on the Assyrian sculptures and Phœnician vases and coins the development from the rude and small boats first used to the large and well-fitted vessels used in later times, and so warmly eulogized by Xenophon in the *Œconomica* (§ 8). The art of navigation, too, as distinct from the usual hugging of the shore and sailing in the daytime only, seems to have been developed if not invented by these people, to whom the Polar star was known. 'The ships of the sea, with their mariners,' occupy the first place in Ezekiel's description of the pride of Tyre (ch. 27).

From this description by Ezekiel we can easily understand that the private life of the Phœnician traders was one of great luxury. Many of the articles of commerce, in which they traded, found their way into the homes of the people. Little is known of their private life, but there are indications that behind the outward show of wealth and civilization lay a selfish and even cruel spirit. The traffic in slaves was no unimportant part of their commerce, and for the sake of it they would forget 'the covenant of brethren' (Am $1^{9.10}$). Commerce was the life and soul of the people, and the faults as well as the virtues of a purely commercial people marked the Phœnician race (cf. Is 23, etc.).

LITERATURE.—The remains of Phœnician industry and art may best be studied in Renan, *Mission de Phénicie*; Perrot et Chipiez, *Histoire de l'art dans l'antiquité*, tom. iii. 'Phénicie-Cypre'; L. P. di Cesnola, *Cyprus, its Cities, Tombs, and Temples*; A. P. di Cesnola, *Salaminia*; Ohnefalsch-Richter, *Kupros, die Bibel und Homer*; Davis, *Carthage and her Remains*. For fragments of the Phœnician calendar, cf. Conder in *PEFSt*, 1889, p. 22 f.

vii. RELIGION.—The religion of the Phœnicians was polytheistic, nor so far as we can go back do we find any traces of its ever having been monotheistic. In the Tel el-Amarna tablets the Phœnician names contain the names of several of the gods; in the OT, too, the *ba'alim* (plur.) are mentioned. The origins of the gods are unknown. The statements of Philo Byblios in this matter are useless, for everything is made to serve his own euhemerism. The view that Ba'al was the name of an originally one and only god—and that the sun-god—has been shown to be more than doubtful (see art. BAAL). Even the later identification by the Greeks of certain Phœnician gods with their own tells us nothing of their origin and previous history. As Ed. Meyer says (*Gesch. d. Alt.* § 192, note), 'It should never be forgotten that of the Phœnician religion we know very little (*recht wenig*), of the Phœnician mythology proper, nothing at all.' It is a striking fact that one goddess, 'Tanith,' is mentioned about 2000 times in Carthaginian inscriptions, and we know nothing either as to the meaning of the name or the nature of her being. Without attempting to explain the nature of each individual god, it seems clear, however, that some at least took their origin in the worship of the powers of nature (cf. the 'Ba'al of heavens,' the worship of Eshmun and Adonis, the feasts of the seasons of the year, the veneration of objects of nature, etc. [see below]). In this respect they fall in line with other Semitic peoples. Another determining feature in their worship seems to have been their social organization. The existence of various tribes among the Phœnicians has often been asserted, and is in itself very probable, but there is no evidence for it. On the other hand, the city has played a part, larger than in the history of any country, except perhaps the history of Italy in the Middle Ages. That each city had a god of its own is evident. Sometimes he was simply called the Ba'al of that city (see BAAL), sometimes he had a name of his own (as *Melḳarth*, the Ba'al of Tyre). Beyond the actuating power of these two factors—reverence for the powers of nature, and the bond of city life—it is difficult, if not impossible, to go in the present state of our knowledge of the early gods of Phœnicia. A striking feature in the names of the gods is the presence of so many appellatives in the names of the best-known (thus *Ba'al*, 'possessor'; *'Adon*, 'lord'; *Milk*, 'king,' etc.). Another characteristic is the recognition of female as well as male deities. By the side of Ba'al is Ba'alat (as early as the Tel el-Amarna tablets 'Ba'alat ša Gubla'), with Milk is Milkat, with El is Elat (see *CIS* 243, 244); but it does not follow that because the masculine and feminine forms of the same words are used, that there is necessarily any special relation between the god and goddess represented by them. A closer relation between two gods seems to be indicated by the compounding of two divine names, as in Milk-'ashtart, Ba'almelḳart, Ẓadmelkarth, Ẓadtanith, etc.; but whether this has any political or doctrinal significance is uncertain.

In later times Phœnician cities, like other peoples of the ancient world, introduced foreign gods into their temples. Egypt especially furnished its share, and Babylonian deities are not wanting; while in regard to the other nations around them (other Canaanites, Aramæans, etc.), it is often difficult to say whether one has borrowed from the others, or all have received them from a common stock. In Greek times the identification of their own gods with Greek deities did much to change the nature and worship of both.

The relation of the individual (we have no evidence of the tribal relation prominent in Arabia, and undoubtedly present among the early Israelites, cf. TRIBE) to the god is expressed by the various words expressing dependence on or relation to, prefixed to names of gods to form names of persons, *e.g.* עבר־ 'servant of' (which occurs with the name of nearly every Phœnician god known); אש־ 'man of'; בר־ 'branch, member of' (see Bloch, *Phœn. Gloss.* p. 19, note); חי־ (for אחי) 'brother of'; גר־ 'client of'; and once or twice אב־ and אבי־ 'father, *or* my father is' . . . Women's names are also formed by prefixing the following and similar words to the divine names בת־ 'daughter of'; אחת־ and חת־ 'sister of'; אמת־ 'handmaid of'; ארשת־ 'bride of.'

(*a*) *The deities.*—Altogether about 50 names of gods are known from the Phœn. inscriptions (see Lidzbarski, 152 ff.). Of many of these we know nothing but the name. Among the most important are the following (in the order of the Phœn. alphabet):—

ארני (Gr. Ἄδωνις, cf. Heb. אֲדֹנָי), originally an appellative. A god in Byblos, then in Cyprus, where he was also joined with Eshmun. Origen and Jerome identify him with Tammuz (Ezk 8[14]), who was really a Babylonian god. In some places he is joined with Osiris. For the probable meaning of the Adonis feast, see Baudissin, *Studien zur semitischen Religionsgeschichte*, ii. 188, note.

אל (cf. Heb. אֵל) occurs in several proper names, but it is still doubtful whether it stands for a particular god. Philo of Byblos says that he was the chief god of Byblos, but had neither temple nor cultus. The feminine form אלת occurs on two Carthaginian inscriptions as the name of a goddess with priests of her own.

אשמן (called by the Greeks Ἀσκλήπιος) is not mentioned in the OT, but was worshipped in Sidon, Berytos, Carthage, Cyprus, etc.; and his name occurs frequently in proper names, and compounded with Melkarth (cf. Ed. Meyer in Roscher's *Lexikon d. Griechischen u. Römischen Mythologie*, i. 1385 f.).

בעל (Gr. Βάαλ, Βῆλος, Βήλ, and in proper names Βάλ) was worshipped also by the Israelites, Philistines, and probably by Moabites. He appears in Palmyrene inscriptions as בול and בל. He was probably also indigenous in Arabia (Nöldeke in *ZDMG* xl. 174), and is evidently connected with the Babylonian Bel. See BAAL. The feminine form בעלת (Gr. Βααλτίς, Βῆλτις) occurs in the Tel el-Amarna tablets as *Ba'alat ša Gubla*. It is as goddess of the same place that she is mentioned four times in *CIS* 1. It seems also to be present in the OT place-names בַּעֲלָה, בַּעֲלַת בְּאֵר, and בְּעָלוֹת.

גד appears in Phœnician inscriptions only in proper names, but occurs as a god in Is 65[11], in the מגרל גר of Jos 15[37], and in Ezr 2[12], also in Aramaic (*ZDMG* xlii. 474), in Arabia (Wellhausen, *Reste d. Arab. Heidentums*², 146), and probably in Palmyrene, but is unknown to the Babylonians. He was a god of Fortune (see art. GAD); but the city-god Τύχη of Greek inscriptions and coins from Syria, with whom he has been generally identified, is regarded by Baudissin (Herzog-Hauck, vi. 334 f.) as referring more probably to Atergatis.

מלך, originally an appellative,—cf. Molech and Milcom of the Ammonites (see MOLECH),—is mentioned in the Tel el-Amarna tablets in the names Abi-milki, Ili-milki, 'Abd-milki, etc., and in many names in the Phœnician inscriptions. A goddess מלכת is also found in Carthage, Hadrumet, and Sardinia.

מלקרת (= מלך־קרת 'city-king') is not mentioned in the OT, but was the Ba'al of Tyre, and was identified by the Greeks with Ἡρακλῆς (so in *CIS* 122, *c.* 180 B.C.). His temple, according to a tradition in Herodotus (ii. 44), was founded about B.C. 2740. His name is also found in Cyprus, Malta, and Carthage, and in such proper names as Hamilḳar, and is preserved in the Greek Μελικέρτης. In compound names of deities he occurs with Eshmun, Zad, and Resheph (see Ed. Meyer in Roscher's *Lexikon*, ii. 2650 ff.).

סכן occurs in the proper names גרסכן, עברסכן, and סכניתן, which last is also the name Σαγχουνιάθων of Philo's fictitious authority.

ענת (in the Greek part of *CIS* 95 represented by Ἀθηνά) is met with in the OT in the place-names Beth-anoth (Jos 15[59]), Beth-anath (Jos 19[38], Jg 1[33]), and Anathoth (Jer 1, etc.). As a goddess of war she was known and honoured by the Egyptians in the 17th and 18th dynasties, having, according to Meyer (*ZDMG* xxxi. 718 f.), been taken over from the Hittites. A connexion with the Babylonian Anatu is not proved.

עשתרת (Gr. Ἀσταρτη), identified by the Greeks with Ἀφροδιτη. See ASHTORETH.

צד seems to be connected with the Heb. ציד 'to hunt, fish,' but occurs only in names of men and of compound deities.

רשף occurs in proper names of Cyprus, and meets us in Egypt as *Rashpu*, and is ascribed by Meyer, like *Anath* (see above), to the Hittites. It seems, however, more natural to connect the name with the Hebrew word for 'flame,' and to look upon the deity as a god of storms or lightning. This seems, too, to be confirmed by the combination רשף חץ in *CIS* 10 (cf. Driver, *Deut.* 68, with references).

תנת was the great goddess of Carthage; but though her name occurs some 2000 times in inscriptions, we are ignorant of her nature and origin. Except in two or three inscriptions she is always entitled פן בעל 'face of Ba'al. A compound deity צרתנת occurs in some inscriptions.

As has been noticed in the case of 'Anat and Resheph, it is possible that some of the gods already mentioned were taken from other peoples. In the later period this borrowing certainly took place, and in the inscriptions we find the Babylonian Nergal, the Egyptian Isis, Osiris, Absit (*e.g.* Bastu, cf. Bubastis, Ezk 30[17]), Horus, and Ptah. In some cases a Phœnician god was joined with a foreign one, as in Melekosir (so Jeremias), but the first part of the name may be only appellative.

(*b*) *Sacred objects and cultus.*—As in other Semitic religions of Western Asia, the most prominent objects of nature had an idea of sanctity attached to them. Whether as themselves containing spirits, who had power over men, or simply as the greatest gifts of the gods, they were regarded with feelings of awe. High places (במות) were chosen for their temples and altars as being especially near the deity; and it was on Carmel (which was known to be sacred in the time of Tacitus, cf. *Hist.* ii. 78) that the priests of Ba'al offered with Elijah (1 K 18). In Greek and Roman writers there are many memories of the earlier sanctity of various Phœnician mountains, from Mt. Casius to Carmel. Waters, too, were regarded with veneration, and some were particularly associated with certain gods, and even named after them (as the Adonis). Springs and rivers, two sources of life in the East, were regarded with peculiar reverence. Trees, too, we find sacred, especially to certain goddesses. The cypress, myrtle, and palm were closely associated with Astarte. This specialization is, however, probably only a development from an earlier form of nature-worship.

The ordinary worship of the Phœnician might be offered in any place in the open air, but was most natural on high places, with trees, and often with a sacred stream. Among these surroundings was built an altar with an *ashera* beside it, and on it the sacrifice was offered. But there is mention in history of temples (*e.g.* the temple of Melkarth at Tyre); and one would naturally expect that those who did so much for the temple of Jerusalem should have had great sanctuaries of their own. Yet it is very doubtful whether the temple ever played a very important part in the worship of Phœnicia, or was ever much more than a prominent adornment of a city. Sacrifices were usual, and human life was offered in the fire and human blood on the altars, but apparently only on important occasions. Various animals, both tame and wild, were offered, and products of the field as well as flesh. Sacred prostitution was also a form of offering common to many acts of Phœnician worship. Vows were made in time of difficulty or danger, and votive offerings (statuettes, tablets, etc.) were common. Feasts, too, were often associated with religious rites. Priests and priestesses officiated, and the king himself was sometimes (if not always) a priest.

LITERATURE.—The articles TYRE, SIDON, TARSHISH, etc., in this Dictionary, as well as articles on several of the gods by Ed. Meyer in Roscher's *Lexikon*, by Baudissin in Herzog's *Realencyclopædie*³, and by various writers in this Dictionary, and in the *Encyclopædia Biblica*; Baethgen, *Beiträge zur semitischen Religionsgeschichte*, especially pp. 16–65, with Nöldeke's review in *ZDMG* xlii. 470 ff.; Baudissin, *Studien zur semitischen Religionsgeschichte*, i. and ii.; Jeremias in de la Saussaye's *Lehrbuch d. GENERAL LITERATURE.—In addition to the works mentioned and quoted in the different sections of this article, the following are the most important general writings on the subject: Movers, *Die Phœnizier* (a new edition has long been promised, and should become the standard work); Pietschmann, *Geschichte der Phœnizier* (in Oncken's series); Kenrick, *Phœnicia*; Rawlinson, *History of Phœnicia* (and a smaller volume in the 'Story of the Nations' series): the sections dealing with the Phœnicians in the Histories of antiquity of Duncker, Ed. Meyer, and Maspero; cf. Meltzer, *Geschichte der Karthager*.

G. W. THATCHER.

PHŒNIX (Φοῖνιξ, AV Phenice) was a good harbour on the south coast of Crete. When the cornship from Alexandria, bound for either Puteoli or the Portus Augustus beside Ostia at the mouth of the Tiber,[*] on which St. Paul was sailing from Myra towards Italy, had been detained so long on the voyage that it was considered too late in the season to risk the passage across the open sea from Crete to the southern coast of Italy, it was resolved to winter in Crete. When the resolution was come to, the ship was lying in Fair Havens, near the middle of the south coast. The question then arose, where should the ship lie up? The centurion, who evidently had the supreme authority,[†] called a council to advise him on this question; and the opinion of both captain and sailing-master was that they should seek an opportunity and make for the harbour of Phœnix. Paul, whose opinion was also asked (as, though a prisoner, he was treated with much consideration, being a Roman whose appeal to the emperor had been allowed by the procurator governing Palestine, and being also an experienced and practised traveller), strongly urged that they should stay where they were. There must have been good reasons on both sides. The experienced sailors had some ground for their opinion: presumably Phœnix was a better and safer harbour, and quite probably also it was recognized as being the proper place to winter in, if one of the many ships engaged in that trade had to spend the stormy season on that part of their long voyage (as must have been often the case). On the other hand, Paul dreaded the voyage to Phœnix, which therefore must have been some distance away. Winds from the north strike with terrific force on the sea a little south from Crete (though the waters immediately on the coast are protected by the lofty mountains). The danger, then, would be greatest in crossing the great opening of the gulf of Messaria, which begins a few miles west of Fair Havens. It is obvious, therefore, that Phœnix is to be looked for somewhere on the other, or western, side of that gulf.

The centurion, as was right and almost obligatory in his situation,[*] took the advice of the experts; and, when the opportunity of a mild south wind was given, they set sail; but in attempting to run across the gulf of Messaria, they were caught by a tremendous north-easterly gale, which swooped down on them from Mount Ida, and narrowly escaped after a terrible voyage of many days across the open sea.

Phœnix is described by Strabo (p. 475) as being a settlement (*κατοικία*, denoting a large flourishing village,[†] originally a settlement of colonists or *κάτοικοι*) on an isthmus. The passage is very obscure, owing to a lacuna; but apparently what Strabo describes as the isthmus was a narrow part of the island of Crete, between the northern and the southern sea, with a small town, Amphimalla, on the northern coast, and Phœnix on the southern. Apparently he considered Phœnix as a settlement in the territory of Lampa or Lappa, a Cretan city of importance, striking coins (*Φοίνικα τὸν Λαμπέων*). Now the situation of Lappa is practically certain; it was situated in the inner country, where Crete is narrow for a space, before it broadens out again to its western end, at a site called Pólis. On the southern coast of this narrower part of Crete, Phœnix must be sought. Nearly due south from Lappa there is a village, Loutró, with a harbour, described as the safest harbour on the south coast of Crete. Captain Sprat, an experienced surveyor and sailor, was fully convinced, after an exploration of the south coast, that Loutró must be Phœnix, 'because it is the only harbour west of Fair Havens in which a vessel of any size[‡] could find any shelter during the winter months.' James Smith, who defends this view by very convincing arguments, quotes several even stronger assertions of the superiority of Loutró to all other harbours on the south coast. There is some evidence that the tradition of the ancient name remains among the Greeks of the place (Smith's *Voyage and Shipwreck of St. Paul*, ed. 3, p. 250 ff., App. I. and II.; also p. 86 ff.).

Ptolemy (iii. 17. 3) describes both a harbour Phœnikous and a town near the south coast called Phœnix. His frequent vagueness and want of accuracy make him an unreliable authority; but he places the town and harbour evidently in this part of Crete (see further, below).

Phœnice (*i.e.* Phœnix) is mentioned as a bishopric in the earlier *Notitiæ*, viii. and ix.;[§] and Hierocles gives it in his list of Cretan cities. All three authorities speak of it as beside a place Aradena (or Ariadne, *Not.* ix.): the phrase *Φοῖνιξ ἤτοι Ἀραδένα* denotes that two distinct places were united as a single bishopric. Now Aradena still retains its ancient name as Aradhena, a place which is not much more than a mile from Loutró. Again, Stephanus Byz. mentions Aradena (Ἀραδήν) as a city of Crete which is also called Anopolis; and about two miles north of Loutró there is a village on high ground with ruins which is called still Anapolis. This is probably to be identified with the Phœnix which Ptolemy distinguishes from the harbour, while Aradhena and Loutró together constitute his harbour Phœnikous, and all three were united in a single bishopric.

---

[*] At that period more probably the former.

[†] That this was so, and that the centurion had authority even over the captain, results from the character of the imperial service (the ship belonged, of course, to one of the imperial corn fleets), in which the military service ranked higher than the naval, and yet was not strictly divided from it. But the centurion exercised his authority with the penalty of severe punishment before him, if he mismanaged; and he therefore would necessarily ask advice on the point of where to winter, and in purely nautical matters would leave the captain and the sailing-master free in their own departments. See Ramsay, *St. Paul the Traveller*, p. 324 f.

[*] See the preceding note.

[†] See Buresch, *Aus Lydien*, p. 2 f.

[‡] The ship which is concerned in the question was large, being able to accommodate 268 of a crew and passengers, and a cargo of corn from Alexandria for Rome.

[§] In *Not.* vii., which is the oldest known, there is a lacuna of about 200 names, among which were the Cretan bishoprics.

Again, Hierocles (whose order in enumeration is commonly a very good guide) mentions the island of CAUDA or Clauda (he uses the form Κλαῦδος) next to Phœnix. Now that island is only a few miles due south of Loutró.

Finally, an inscription placed here in the reign of Trajan shows that an imperial ship was spending so long a time at this point of its course between Alexandria and Italy that there was time to erect some considerable work, whose nature is not specified. There can hardly be any doubt that the ship was lying up for the winter, and the imperial freedman who was in authority on the ship employed the crew at some useful work on shore. The sailing-master, *gubernator* (compare κυβερνήτης, Ac 27^{11}), and the ship's sign, *parasemum* (compare παράσημον, Ac 28^{11}), are both mentioned. See Smith, *Voyage and Shipwreck*, 261.

Thus we see that Loutró was beside a harbour where at least occasionally the large ships of that Egyptian corn service wintered.

The identification of Loutró as the harbour called Phœnix in Ac 27^{12} seems beyond dispute, it these accounts of travellers and explorers rest on a sufficiently minute examination of the coast. But the identification is encumbered by one serious difficulty. The harbour of Phœnix is described in Acts as looking towards the south-west and the north-west, *i.e.* apparently as opening towards the west, with a mouth just so wide that the entrance extends up towards north-west and down towards south-west. But the harbour of Loutró opens towards the east, looking between north-east and south-east.

In this difficulty there seem to be only three alternatives open. 1. The harbour of Loutró is formed by a very narrow isthmus connecting a broader peninsula with the mainland; and there is a harbour on each side of the isthmus. As the isthmus runs out south from the mainland, one of these harbours looks east, viz. Loutró, while the other looks west. Bishop Wordsworth has suggested that the western harbour may be the ancient Phœnix, and has pointed out that on the Admiralty chart the name Phinika is given to it. Obviously, most of the arguments for identifying Loutró as Phœnix would apply equally well to this western harbour, which is separated from the other only by a narrow isthmus, and is almost equally near Aradhena and Anapolis. The only difficulty lies in the very positive assertions that Loutró is the only well-sheltered harbour; and certainly the chart represents the western harbour as more widely open. Still it is distinctly desirable that the western harbour should be more closely and critically examined. Sprat, indeed, can hardly have failed to do so, and his weighty authority is almost conclusive (though not quite); but the rest of the evidence depends much on the statements of residents in Loutró; and every traveller knows how prone the Greeks are to emphasize too strongly the arguments which support the identification of their own town with an ancient place of fame; their very love and respect for antiquities lead them to exaggerate the claims of their home.

The conclusion must be that Wordsworth's suggestion is not absolutely disproved, though the evidence accessible at present is against it. Among other things one desiderates careful examination as to whether the coast-line has been modified during eighteen centuries, and whether there are any traces of the western harbour having been used in ancient times.

2. James Smith suggests that the words of Ac 27^{12} βλέποντα κατὰ Λίβα καὶ κατὰ Χῶρον, do not mean, as is commonly thought, 'looking towards south-west and north-west,' but 'looking in the direction in which the south-west and north-west winds blow' (*i.e.* towards north-east and south-east). His rendering is distinctly against the analogy of Greek literary expression; but, considering how little is known of Greek technical sailor language, one cannot feel quite certain that the rendering is absolutely impossible.

3. It has been pointed out[*] that Luke did not actually visit Phœnix (for the ship never went there), but merely speaks on report: his authority was the argument used by the captain and the sailing-master of the vessel in the council which the centurion called. Naturally these arguments were reported to him by Paul; and, even if Luke were wrong, his mistake would prove, not want of observation of a place which he had seen, but misapprehension of the description of a place strange to him, after that description has passed through an intermediate channel. If (as was often the case) the expression of sailors differed from that of literary Greek and of the ordinary landsman, an error might have thus been produced without any one being conscious of it.

The case, therefore, must be pronounced undecided until Sprat's statement (weighty as it is) is confirmed by new and careful examination; but the balance of evidence is strong that Loutró is Phœnix; and in that case the third alternative is perhaps least improbable, though the second is not proved to be impossible. W. M. RAMSAY.

PHOROS (Φορός)=Parosh; 1 Es 5^{9} 8^{30} (B Φαρές, AV Pharez), 9^{26}.

PHRURAI.—In Ad. Est 11^{1} the Book of Esther is called 'the epistle of Phrurai' (ἐπιστολὴ τῶν Φρουραί, A . . . Φρουραιά); cf. Est 9^{26}, and see ESTHER, and PURIM (FEAST OF).

PHRYGIA.—

I. Geographical and Historical.
II. Pauline Geography.
III. Phrygia in Acts 2^{10}.
IV. Christianity in Phrygia.
V. The Jews in Phrygia.

Phrygia (Φρυγία) was the name of a very large country in Asia Minor. On the view which will be here set forth, the noun Phrygia never occurs in the Bible, but only the term 'the Phrygian region' (Ac 16^{6} 18^{23});[†] and in 2 Mac 5^{22} the ethnic 'Phrygian' is applied to Philip, who was left as governor of Jerusalem by king Antiochus Epiphanes about B.C. 170. In addition to this, a journey right across Phrygia is implied tacitly in Ac 16$^{7-9}$, and another is briefly described in Ac 19^{1} (according to the view to be here explained). But in spite of the very small appearance made by the Phrygian name in the Bible, there are such difficult questions connected with the passages where it occurs that a somewhat long discussion is needed. Moreover, Phrygia had unusual importance in early Christian history, and the monuments of Christianity before the time of Constantine that remain in the country are of unique number, interest, and importance. It can be truly said that the first Christian city was a city of Phrygia.

---

[*] Ramsay, *St. Paul the Trav.* p. 326.

[†] Many scholars regard Φρυγίαν as a noun, not an adjective, in both these passages; others take it as an adjective in 16^{6}, and a noun in 18^{23}. These opinions will be very fully treated in the sequel.

It will be convenient to classify the following remarks under headings.

I. GEOGRAPHICAL AND HISTORICAL.—The vast country of Phrygia presents so great a variety in natural character that it cannot be described except at too great length. The level of the cities varies from the frontier town Karoura in the coast-valley of the Mæander, 500 ft. above sea-level, to the ancient city, among the monuments of the early kings beside the tomb of Midas, about 4000 ft. Great mountains, plains, and lakes are found in it. The two chief cities of Phrygia in the time of Paul were Laodicea and Apamea (Strabo, p. 576).

Phrygia means the land of the Phryges; and there is a general agreement that (as Herodotus, vii. 73, says) the Phryges were a tribe, or union of tribes, from Macedonia or Western Thrace, who crossed the Hellespont into Asia Minor, and gradually spread their conquests first over the Troad, and then farther east and south over the plateau. In the eastern direction they penetrated at their extremest range of power through the Sangarius valley and up to the banks of the Halys. On the south-east they reached ICONIUM, which was the last Phrygian city on that side. On the south they were stopped by the Pisidian mountains, the northern ridges of the Taurus range, into which they seem never to have penetrated. On the west the boundaries vary most; but on all sides they vary to an extraordinary degree. Hence, in trying to define what any ancient author means by the name 'Phrygia,' we must begin by inquiring what period is referred to, and what was the usage of the name in that period.

That the country of the Phrygians at an early period was bounded on the north-west only by the waters of the Ægean and the Hellespont is beyond doubt. They were the masters of the sea, according to Diodorus (vii. 11), for 25 years about B.C. 900. Troy is frequently called Phrygian, and there was a large, vaguely defined region along the Hellespont and the Sea of Marmora, called Hellespontine Phrygia. The country beside Mount Sipylos, north of Smyrna, the realm of Tantalos and Pelops, is often called Phrygia by the poets, who reproduce ancient semi-historical myths; and this shows that considerable part of western Lydia once bore the name of Phrygia.

At an early time the irruption of Thracian tribes, such as Thynoi, Bithynoi, Mysoi, across the Bosporus drove a wedge through the country of Phrygia, and separated Hellespontine Phrygia from the inner country, which was henceforth termed Great (Μεγάλη, *Magna*) Phrygia. The Phrygian element and name died out in Lydia also at an early period. The Troad ceased to be called Phrygia; and though the name of Hellespontine Phrygia[*] lingered on for several centuries, the land lost the Phrygian character,[†] and after the time of Alexander the Great it seems to have no longer possessed any claim to be called a distinct and separate country. Strabo still uses the name in A.D. 19. The north-eastern regions of Phrygia Magna were transformed into GALATIA during the 3rd cent., first through gradual drifting of the Gauls into that district as the one where there was least resistance to contend with, and finally, about B.C. 232, by general agreement of the surrounding rulers, and especially Attalus I., king of Pergamum, who penned them into this place and acknowledged their right to it, but set limits to their wide-ranging forays. About B.C. 205 a new name, Phrygia Epictetus, *i.e.* Acquired Phrygia, came into existence. It was applied to a region in the north which seems to have been acquired by Attalus I. from Bithynia. According to Strabo (p. 576) it contained six cities at least, Azanoi, Nakolia, Kotiaion, Midaion, Dorylaion, Kadoi. Another name for a special district was Paroreios Phrygia,[*] the great valley in the east between Sultan-Dagh and Emir-Dagh (whose ancient names are unknown), with the cities Ipsos or Julia, Philomelion, Thymbrion or Hadrianopolis, Tyriaion, and many small towns and villages.

A third district was Pisidic Phrygia, or Phrygia towards Pisidia, or Phrygia the Pisidian.[†] The city of Antioch towards Pisidia is the only one assigned to this district by Strabo; but Ptolemy, and probably Polybius, extend it more widely to include Apollonia and other cities in the valleys underneath the northern flanks of Taurus. Strabo clearly says that Paroreios and Pisidian Phrygia were only parts of Great Phrygia, whereas he distinguishes Epictetus as a separate and added country.

Under the Romans, the whole country of Cibyra and most of the valley of the Lysis were reckoned to Phrygia, though previously they had been counted either to Pisidia or to Kabalis or to Milyas. It would also appear that the lower part of the Lycus valley was divided at an earlier time between Lydia (viz. Hierapolis and Hydrela) and Caria (viz. Laodicea and Trapezopolis and Attoudda);[‡] but in the Roman period all these cities came to be classed to Phrygia. On the other hand, Iconium was then classed to Lycaonia (except in the estimation of its inhabitants, see ICONIUM and LYCAONIA), as were also Laodicea Katakekaumene and even perhaps Tyriaion.

In the Roman time Phrygia was divided between two provinces, Asia and Galatia, with thorough Roman indifference to national frontiers in mapping out their province—an indifference which resulted in the final failure of those provincial divisions to attain permanence. These two parts were called *Phrygia Asiana* and *Phrygia Galatica*: for the former name, see Galen, π. τροφ. δυν. iv. p. 312 (Kuhn, vi. p. 515); for the latter, see a notice in a Byzantine Menologion (taken from a good and ancient source) quoted in *Acta Sanctorum*, Sept. 28, p. 563.

That part of Phrygia was included in the province Galatia, though often ignored, is no longer denied by any scholar. A number of inscriptions, enumerating the parts of the province Galatia, mention among them Phrygia; *e.g.* *CIL* iii. 6818, mentions the parts as Galatia, Pisidia, Phrygia, Lycaonia, Isauria, Paphlagonia, Pontus Galaticus, Pontus Polemoniacus; compare *CIL* iii. 6819; Fränkel, *Inschr. Pergam.* No. 451 (the lists vary at different periods as districts were added to or taken from the province). See also GALATIA, vol. ii. p. 90 f.

Moreover, several cities which Strabo and Ptolemy assign to Phrygia, *e.g.* Apollonia and Antioch, are shown by their coins and by other means to belong to the province Galatia; and Ptolemy gives the region which he calls Pisidian Phrygia as a part of the province Galatia.

Galatic Phrygia, or the Phrygian region of the province Galatia, was not a very large country. It was a strip of territory extending in considerable length along the front of the Pisidian mountains; and it included the cities of Iconium (in the native usage), Antioch the *Colonia*, Apollonia, and, as Ptolemy says, several others. Asian Phrygia was immensely larger, including all Paroreios and Epictetus and far the larger part of Great Phrygia. In process of time the Pisidian connexion became stronger, and the name Pisidian Phrygia was gradually disused. Antioch ceased to be considered a city of Phrygia and was called 'of Pisidia.' Some of the epigraphic lists of the regions making up the province Galatia omit Phrygia and mention only Pisidia. At last a distinct Roman province Pisidia was constituted about A.D. 295, with the metropolis Antioch and a secondary metropolis Iconium. But in the time of St. Paul, and long after, the view was dominant among the people that Antioch and Iconium were cities of the Phrygian region.*

---

[*] Also called Little Phrygia in distinction from Great Phrygia (Strabo, p. 571).

[†] The Phrygian character was probably bound up with the use of the Phrygian language. Iconium called itself Phrygian, because the language was used there (see Ramsay, *Historical Commentary on Galatians*, p. 216).

[*] It is often wrongly said that Paroreios denoted the country west and south from Sultan-Dagh, with the city of Pisidian Antioch. That was Pisidic Phrygia (see following note).

[†] Pisidic Phrygia, Polybius, xxii. 5 14; Phrygia πρὸς Πισιδίᾳ, Strabo, pp. 557, 566, 5797; Phrygia Πισιδία, Ptolemy, v. v. 4.

[‡] Ramsay, *Cities and Bishoprics of Phrygia*, i. pp. 6, 183 f.

A distinction between High Phrygia and Low Phrygia can be traced in the Roman time from Strabo, A.D. 20, onwards. Low Phrygia was a name that included Hierapolis (Philostratus, *Imagines*, i. 12) and Lake Anava (Strabo, i. p. 49) and the Sangarios (Steph. Byz. *s.v.*), *i.e.* it included those districts that were less elevated above sea-level, while High Phrygia (ἡ ἄνω Φρυγία) was the elevated region of central Phrygia lying between the Sangarios on the north-east and the great road passing close to Hierapolis in the Lycus valley and along the edge of Lake Anava. Aristides speaks of a certain city (probably Akmonia, possibly Synnada) as in High Phrygia. The pair of terms rarely occur in literature; but they clearly were in current local use.

We have seen how Phrygia steadily diminished, losing parts on the west, north-west, north-east, south-east, and south. About A.D. 295 or soon afterwards, when the great province Asia was broken up, two new provinces were formed,† Phrygia Prima and Secunda, called also Great and Small,‡ or Pacatiana and Salutaris: the last pair of names came into use in the latter part of the 4th cent., and soon established themselves in almost universal usage. The name Salutaris is explained by the Byzantine writers as caused by the fact that St. Paul had preached the gospel of salvation there. This is a curious statement: it implies that St. Paul had preached much more in Phrygia Secunda than in Phrygia Prima (which was the western half under the primacy of Laodicea). Now that may be either a belief founded on old authority, or a mere groundless fabrication of the Byzantine time, to explain a curious name. In the former case it would afford valuable evidence bearing on the history of St. Paul, for there was good authority underlying the really old tradition in Asia Minor. In the latter case it would be absolutely valueless. Unfortunately, the latter alternative is pretty certainly true. The name is Latin (*Salutaris*) transformed into a Greek word; but if it had rested on a genuine popular tradition or belief, it would have been Greek, for Greek was the language of the country, and very few can have known Latin in Phrygia. The name *Salutaris* has probably nothing to do with St. Paul or with religion.

The name Phrygia henceforth was restricted within the limits of those two provinces. The district of Cibyra, on the south-west, was given over to Caria, Apamea and Metropolis to Pisidia, and (between 386 and 395) Amorion, Orkistos, and other north-eastern cities to Galatia. In the 8th cent. part of Paroreios was transferred to Galatia, and placed under Amorion as metropolis: it is, however, very doubtful whether this transference affected more than the ecclesiastical organization, for the civil division into provinces (though always retained in the ecclesiastical system) disappeared politically in the 8th cent., and was replaced by the military system of Themes. In the later Byzantine authors much confusion and ignorance is shown in regard to the divisions of Phrygia. Constantine Porphyrogenitus, in his treatise *de Thematibus*, defines the extent of Salutaris in a thoroughly erroneous way. Cinnamus (p. 198) speaks of Laodicea *ad Lycum* as on the border of Little Phrygia. Ducas gives the name Great Phrygia to part of the region of Hellespontus (from Assos to the Hellespont), calling it also Low Phrygia: he does not speak of Little Phrygia or of High Phrygia, but apparently he must have treated those names as equivalent, and including both Pacatiana and Salutaris (as Cinnamus evidently does), which he sums up as 'all Phrygia' (see pp. 13, 72). Cedrenus (ii. p. 69), and Nicetas Chon. (p. 68) speak of High Phrygia as evidently including both Pacatiana and Salutaris. In those writers the names are prompted rather by inaccurate antiquarian memory than by real survival of the names in popular usage (see Ramsay, *Historical Geography of Asia Minor*, pp. 150–153).

II. PHRYGIA IN PAULINE GEOGRAPHY.—This long enumeration of vicissitudes and changes shows how slow one must be in making assertions as to the meaning of the name Phrygia in any ancient writer, and how carefully the situation and the context must be studied. Accordingly, when in a writer of the 1st cent. we find the statement that a traveller crossed Phrygia, we must not assume forthwith that a journey across Phrygia *Asiana* is meant. The term Phrygia is employed freely in inscriptions of that period, found in the country outside of it, in the sense of Phrygia Galatica; and a writer who follows as a rule local expression may have used this term Phrygia in the same way as local inscriptions do. In such a case we must examine the context to see which division of Phrygia is to be understood. Now in Ac 16^6 Paul is stated to have traversed the region of Phrygia.* What part of Phrygia did he traverse? The situation makes this clear. Paul in his journey had reached Lystra.† He now went on through Phrygia. It is beyond doubt that the part of Phrygia through which he must go immediately on leaving Lystra was Galatic Phrygia, which began only a very few miles north of Lystra. Moreover, Paul had started on this journey with the deliberate intention of visiting two cities of Galatic Phrygia, Iconium and Antioch; and as we now see, geography makes it clear that he could not possibly proceed onwards from Lystra without going through Iconium and through part of Galatic Phrygia.‡

---

* In Antioch the memory of its Phrygian character remained as late as the 3rd cent. (see evidence in Ramsay, *Histor. Comment. on Galatians*, §§ 19, 20); but outsiders called it 'of Pisidia' in the 2nd cent. Similarly in Iconium.

† Malalas says that Constantine divided Phrygia into two provinces, implying that in 295 only one province, Phrygia, was constituted. If so, Constantine's action is older than A.D. 325, as is shown in *Cities and Bishoprics of Phrygia*, pt. i. p. 81; Malalas, in fact, mentions Constantine's act before the Council of Nicæa (A.D. 325), xiii. p. 323.

‡ Small Phrygia (Μικρὰ Φρυγία) occurs in a few 4th cent. authorities; the name Great Phrygia in this new sense does not occur (our authorities say 'Phrygia' and 'Small Phrygia'), but seems necessarily to follow from the other term.

* It is immaterial to the geogr. import whether Φρυγίαν in that passage is to be taken as a noun or (what we think right) as an adjective connected with the following χώραν.

† Some say Iconium; but we cannot consider that Ac 16^2 implies that Paul has reached Iconium, for he is still in Lystra in 16^3. Ac 16^1 and 16^6 give the successive stages of travel. This, too, hardly touches the geogr. import.

‡ This is even clearer on the North-Galatian than on the South-Galatian theory. If Paul were going from Lystra to North Galatia, he must proceed first to Iconium in Galatic Phrygia; and if he were in Iconium, he must go on through part of that country. It may, on that theory, be maintained that Paul went on through Asian Phrygia afterwards; but it must be admitted that he first went through Galatic Phrygia.

Moreover, if a writer of that period desired to be thoroughly clear, he ought to add some expression or epithet to show which part of Phrygia he meant. But this is exactly what Luke does in Ac 16⁶. He adds the adjective 'Galatic' to show that he means 'Galatic Phrygia.' It is unfortunate that both AV and RV confuse the expression, and render the Greek adjective by the noun 'Galatia.' Luke never speaks of 'Galatia'; because, like most Greeks, he disliked calling the province by that name, and preferred the expression 'Galatic province or region' (as used in *CIG* 3991).

If Luke had used the noun Phrygia in this place, he would have simply appended the adjective and called the country traversed by Paul 'Galatic Phrygia,' the term quoted above. But he desired to be minutely and pragmatically accurate; and (as is sometimes the case in ancient writers *) in his desire to exclude all possibility of mistake he employed a more cumbrous expression, which becomes obscure to us through our ignorance of the nomenclature of that little known region. A custom existed of designating the various districts included in the vast province GALATIA † as χῶραι or regions; *e.g.* the Isaurican region (Strabo, p. 568 f.), the Antiochian region (at this time a kingdom governed by Antiochus, but afterwards incorporated, see Ptolemy, v. 6. 17). Luke follows this custom: he thinks of 'the Phrygian region,' and adds the adjective 'Galatic,' calling it 'the region (which is at once) Phrygian and Galatic,' ‡ *i.e.* the country which ethnologically and according to native Greek expression is Phrygian, while politically and according to Roman provincial classification it is Galatic (τὴν Φρυγίαν καὶ Γαλατικὴν χώραν). Lightfoot was the first to see and to state clearly the right and necessary construction of this expression, and subsequent discussion has failed to shake his decisive argument; but, while he correctly translated it, he failed (owing to the obscurity in which central Asia Minor was then enveloped) to see the right geographical application.

The interpretation of Ac 16⁶ affects that of 18²³; and on that account Luke expresses his meaning more briefly in the second passage. In that passage, as Dr. Hort says (*Lectures on Colossians and Ephesians*, p. 82), 'he followed his old course (*i.e.* as in ch. 16) through southern Asia Minor, and this time was allowed to follow it right on to Ephesus,' instead of being stopped and turned away north, as in 16⁶. He passed now through 'the region of Galatia and Phrygia,' as it is rendered in RV (τὴν Γαλατικὴν χώραν καὶ Φρυγίαν). These words are applied to a more extended journey than those of 16⁶, for in 18²³ the journey through Derbe and Lystra is included, whereas 16⁶ begins from Lystra, and includes only the subsequent journey. The difference of order of the words is important: in 16⁶ two epithets are attached to one noun which follows them, whereas in 18²³ an epithet with its noun is connected by καὶ with a following epithet (or noun), § and the second epithet (with the preceding noun repeated in thought) indicates a second region (this order in enumerating a list is common in Greek). ‖ Two interpretations of the words have been suggested—

1. Φρυγίαν is to be interpreted as a noun, and indicates the country Phrygia, both Asian and Galatic; Luke may be supposed to use Φρυγία χώρα in 16⁶ to indicate Phrygia as a region of the Galatic province, and Φρυγία the noun in 18²³ to indicate the country Phrygia as a single conception independent of Roman provincial divisions. Then τὴν Γαλατικὴν χώραν would indicate 'the Galatic region' in the sense of the province like Γαλατικὴ ἐπάρχεια in the Iconian inscription of A.D. 54–55, *CIG* 3991. Luke would, on this theory, say that Paul traversed the Galatic province and Phrygia (the country). There is a certain simplicity in this view which recommends it; yet for many reasons we are obliged to reject it. The following arrangement seems conclusive. St. Paul, as he traversed the region of Galatia and Phrygia in order, stablished all the disciples: there were disciples in both the region of Galatia and in Phrygia, so that throughout both regions he passed from Church to Church. Now we know positively that he had as yet no Churches in any part of Phrygia except Galatic Phrygia. Moreover, the remarkable reading of the Bezan text Ac 19¹ shows clearly that its originator (whether Luke himself, as Prof. Blass and his supporters hold, or a 2nd cent. reviser, as seems more probable) considered Paul to have arrived at the borders of Asia in 18²³, and then, after completing his survey of his Churches, to have begun to return to Jerusalem, when the Spirit bade him turn back again into Asia (*i.e.* the province Asia), the higher parts of which he traversed, and so, finally, came to Ephesus.

We must therefore adopt the following interpretation:—

2. Φρυγίαν is an adjective, being the briefer description of the same region which in 16⁶ is called with pragmatical minuteness τὴν Φρυγίαν καὶ Γαλατικὴν χώραν. Luke would on this theory say, 'Paul traversed the Galatic region and the Phrygian.' Now, in truth, Paul did traverse two regions of the vast Galatian province, one Lycaonia containing the cities Derbe and Lystra, the other Phrygia with the cities Iconium and Antioch.* The one real difficulty is this: could Roman Lycaonia be called simply 'the Galatic region'? The phrase can be explained and defended only on the supposition that the speaker conceives himself standing or travelling in Lycaonia: Lycaonia consisted of two parts, Roman or Galatic and non-Roman or Antiochian (under king Antiochus): Ptolemy tells us that the latter was called Ἀντιοχιανὴ (χώρα), and the corresponding term for the other part necessarily would be Γαλατικὴ χώρα: the inhabitants of Lycaonia would describe the two divisions of his country by those terms. This explanation may seem rather complicated, but the complexity is due to the real complexity of the divisions at the time. As we see, it is the expression of one who feels himself standing in the country, *i.e.* it must be regarded as the expression used by St. Paul the actual traveller, and caught from his mouth by the listener Luke.

The system of dividing Phrygia into High and Low is probably referred to in Ac 19¹, though the name of the country is not actually mentioned. The journey described in 18²³, as we have just seen, carried St. Paul over ground which he had previously traversed and cities where there were already disciples; but there still remained a long stretch of country between him and his goal in Ephesus, viz. the whole breadth of the large province Asia. The journey is resumed in 19¹, where St. Paul is said to have traversed the higher parts (τὰ ἀνωτερικὰ μέρη). The term ἄνω is often used in Greek to indicate simply the inner country as distinguished from the coast;[*] but this distinction seems not in harmony with Luke's narrative: it is of no consequence to him to distinguish coast and interior: moreover, most of the previous part of the journey was over the high ground of the interior. Here we want some expression suitable specially to describe the part of Asia which he traversed. The word ἀνωτερικὸς is a rare one, and seems chosen in order to suggest a contrast with certain lower parts;[†] in other words, the meaning is that St. Paul avoided the route through Lower Phrygia, and traversed Higher Phrygia (according to the distinction mentioned above, § I.). This distinction was important: Luke had a definite purpose in defining the part of Phrygia which St. Paul traversed. He makes it clear that the apostle did not follow the longer and easier trade-route by Apamea, Lake Anava, Colossæ, and Laodicea (which led through Lower Phrygia, see above, p. 864), but took the other more direct road (less suitable for wheeled traffic, but better for walking travellers) across High Phrygia, keeping very near a straight line from Metropolis to Ephesus.[‡] That was a point of some importance, for Paul mentions that he had never seen the Churches of Colossæ or Laodicea, which therefore must have been founded by some of his coadjutors (perhaps Timothy).

---

* An instructive example is mentioned by Mommsen (*Res Gestæ D. Aug.* p. 38), '*præcipuam curam ducens sensum animi quam apertissime exprimere nec dubitans gratiæ aliquid detrahere ut vitaret obscuritatem* (Sueton. *Aug.* 86), ut fit, ipso nimio ambiguitatis vitandæ studio incidit in ambiguitatem!'

† See above, p. 864, and vol. ii. p. 87.

‡ The idiomatic English is 'the Phrygian or Galatic Region,' see ii. p. 90, and *Classical Review*, 1898, p. 337.

§ Epithet *or* noun, according as we take Φρυγίαν as adjective or as noun; see next sentence.

‖ Examples are given in vol. ii. p. 90, τῆς Ναβατικῆς χώρας καὶ Ἰτουραίας καὶ Μωαβίτιδος καὶ Ἀρηλίτιδος, etc.

* Compare the precise and clear definition of 18²³ by Asterius about A.D. 400, quoted in vol. ii. p. 91.

III. PHRYGIA IN ACTS 2^{10}.—Phrygia is also mentioned in Ac 2^{10} in the list of places whence came the Jews and proselytes who were present in Jerusalem at the Feast of Pentecost shortly after the Crucifixion—'dwellers in Mesopotamia, and in Judæa[§] and Cappadocia, in Pontus and Asia, Phrygia and Pamphylia, in Egypt,' etc. This remarkable list is an insoluble puzzle. It is made on no discoverable principle, either as regards the order of enumeration or as regards the districts mentioned and omitted. The only certain fact about it is that it is quite different in style from the original work of the author of Acts, and must have been derived by him from the earlier authority, or authorities, to whom he owed the narrative of the events described in ch. 2. Some districts where Jews were numerous, and which are certain to have had representatives at Jerusalem, such as Cilicia, are omitted. The names, as a rule, are those of countries, not of Roman provinces; yet Asia is mentioned; this name must denote either the Roman province or a much larger region (see LYDIA); in the former case it would include Phrygia Asiana, in the latter case it would include all Phrygia, both Asiana and Galatica, together with Pamphylia.[‖]

The most probable view is that Asia in this passage means the province (a Roman province being named in this one case, because the name had already established itself in popular Greek nomenclature); and Phrygia is named in addition, partly because it was inhabited by such large numbers of Jews (see below, § V.), partly because Phrygia Galatica, which contained very many Jews, was not included in the province Asia. Similarly, the Lugdunensian Christians wrote to *τοῖς ἐπ' Ἀσίας καὶ Φρυγίας ἀδελφοῖς*, for they desired to include in their address the important Churches of Iconium, Antioch, and probably several in Galatic Phrygia of later foundation (which were not in Asia). On this address, probably, Tertullian models his expression (*adv. Prax.* 1) '*pacem ecclesiis Asiæ et Phrygiæ inferentem.*' There can be no doubt that the Churches of Phrygia Galatica were as important in the 2nd cent. Christianity, as its Jews were in the Jewish world.

IV. CHRISTIANITY IN PHRYGIA.—Christianity was introduced into Phrygia Galatica by Paul and Barnabas on their first missionary journey (Ac 13. 14). Paul revisited, confirmed, and strengthened them (Ac 16^{1-6} 18^{23}). Considering how much space the author of Acts assigns to the account of the formation of these Churches (along with the two Lycaonian Churches), and considering how often Paul visited and consolidated them, we must see that they were regarded as being highly important in the early Church.

Phrygia Asiana was traversed at least twice by St. Paul. On his second journey, accompanied by Silas and Timothy, he went from Pisidian Antioch northwards through the country to near the Bithynian frontier (probably to about Dorylaion, over against Mysia), and then westwards into Mysia and the Troad.[*] Paul was on that journey forbidden to preach in [the province] Asia, so that he cannot have founded any Churches in Asian Phrygia (though, perhaps, we need not interpret the prohibition so strictly as to suppose that he was bound to keep silence absolutely about the gospel on the journey to the Troad: probably the command only implied that he was not to make Asia his sphere of work). On the third journey St. Paul traversed Phrygia Asiana from east to west on a line between Antioch and Ephesus (see above). He probably preached on the journey; but there is no sign of any success; and he was evidently eager to go to Ephesus, and make it the centre for the whole province. Thus in all probability the earliest Churches in Phrygia Asiana were those of the Lycus valley, Colossæ, Laodicea, Hierapolis, founded through the work of his assistants and subordinates (probably Timothy in particular), while he was in Ephesus.

According to tradition of somewhat uncertain value, the Lycus valley was afterwards the scene of missionary work by St. John the apostle and by St. Philip (probably the apostle, though several authorities, especially the later, say he was the deacon). Archippus of Colossæ, the 'fellow-soldier' of St. Paul (Philem ^{2}), was said to have been the first bishop of Laodicea (probably a recollection of his 'ministry, διακονία, in the Lord,' Col 4^{17}), and to have been martyred at Chonæ (*i.e.* the later Byzantine representative of Colossæ); and Nymphas or Nympha *Laodicensis* is coupled as an apostle with Eubulus of Rome in the Greek Menæa, and commemorated on 28th February: cf. Col 4^{15}. Heros is said to have been appointed bishop of Hierapolis by St. Philip, Epaphras of Colossæ by St. Paul. These traditions, hardly trustworthy in themselves, are at least evidence that the Lycus valley was the scene of steady and progressive work in the second half of the 1st century. That work was certainly not confined to the valley, but spread up, doubtless, east and north into Phrygia, and perhaps south towards Cibyra, so that LAODICEA must be taken as the centre and representative of a number of young

---

[*] ἄνω is used always in that sense, not ἀνωτερικός.

[†] ἀνωτερικός (except in passages dependent on Ac 19^1) is used only by medical writers, Hippocrates and Galen (if we may depend on Steph. *Thesaurus* on this matter). Hobart (*Medical Language of St. Luke*, p. 148) does not fail to observe the confirmation which this word gives to his views.

[‡] *The Church in the Roman Empire before* 170, second or later editions, p. 94, note.

[§] The name Judæa is suspected by Blass, who would substitute on Jerome's authority Syria. It is, of course, not in harmony with the context; but, in a list which is as a whole incomprehensible, it is vain to carp at one incomprehensible detail.

[‖] Pontus and Cappadocia may be regarded as the external boundaries of 'Asia,' taking that term in the sense described in a very difficult passage, Pliny (*Nat. Hist.* v. 28), where it is said that 'Asia,' if its two parts are taken together, extended from the Ægean and Egyptian and Pamphylian Seas to Paphlagonia and Pontus: on the meaning, see *Studia Biblica*, iv. p. 45.

[*] The North-Galatian theory would lengthen the westward journey across Phrygia Asiana, and shorten the northward journey by diverting the route from that country into Galatia.

Churches (as well as those in Colossæ and Hierapolis; see above, p. 831^{a}). Papias and Apollinaris, the great bishops of Hierapolis, Sagaris the bishop and martyr of Laodicea, are evidence of the importance of the Lycus valley in Christian history during the 2nd century.

If Laodicea was such a centre of Christian influence, so also we may be sure were Pisidian Antioch and Iconium. A trace of this work may be observed in the tradition that Bartholomew was the apostle of the Lycaones. It has been pointed out[*] that this must mean, not the people of Lycaonia, whose apostles were Paul and Barnabas, but the tribe of the Lycaones in central Phrygia, west and north-west of Synnada. But far more important and trustworthy evidence is furnished by the Christian inscriptions of Phrygia, which are collected for the central and south-western districts in *Cities and Bishoprics of Phrygia*, pt. ii. chs. xii. xvii.[†] The earliest is the famous epitaph of Avircius Marcellus, presbyter or bishop[‡] of the less famous Hieropolis or Hierapolis in the Glaukos valley about A.D. 192. This document mentions St. Paul in such a way as to suggest that he was regarded with special respect in that district, probably owing to its having been first evangelized by his immediate followers and ministers.

The inscriptions fall into three local groups, differing widely in character. One has its chief centre in Eumenea and Apamea, and probably resulted from the influence of the Lycus valley Churches; one is strong in the extreme south-east of Phrygia (and in the adjoining northern part of Lycaonia), and evidently sprang from the influence of Iconium and Antioch; the third is seen in the north of Phrygia in the valley of the Tembris or Tembrogius, and seems connected with the Christianity of the Troad (2 Co 2^{12}),[§] spreading up through Mysia and the province Bithynia. All three therefore seem traceable to a Pauline source. The inscriptions of the third group are more akin to the Montanist type, and those of the first to the Orthodox type,[‖] while those of the second are mostly indifferent, but contain occasional examples like both other classes. The inscriptions of the first two groups throw considerable light on the Christians of the 3rd cent. Already during the 2nd cent., in the Montanist controversy, Phrygia stands out rather as a country where Christians are contending with Christians, than one where missionaries are trying to convert pagans; and the inscriptions of the 3rd cent. set before us Eumenea as a city which was mainly Christian in the period 250–300, in fact as the first Christian city (one may say with great confidence); and, further, they show probably that the prosperity of Eumenea died about the beginning of the 4th cent. Now Eusebius and Lactantius mentioned that a city of Phrygia, whose population was wholly Christian, was destroyed by fire in the persecution of Diocletian, A.D. 301–312; and, though there are some slight discrepancies in details between their statements and probably some exaggeration in the sweeping conclusion, yet the general truth cannot reasonably be doubted; and the coincidence with Eumenian history is so striking that the statements may with the highest probability be applied to it. Apamea, its neighbour and fellow in Christian history, also seems to have sunk in importance to an extraordinary degree about the same time. On the very remarkable type of Christianity developed in those cities, see the full discussion in *Cities and Bishoprics of Phrygia*, ch. xii.

Christianity did not spread uniformly over Phrygia. The three local groups of inscriptions are separated by a large district, where the new religion seems not to have grown so strong until the time of Constantine.[*] The Phrygian martyrs who are known by name almost all belong to the period before A.D. 184 (see Neumann's list in *der röm. Staat und die allgemeine Kirche*, p. 283). When Christianity was so strong, the Roman theoretical principle, that Christians should be treated as outlaws, was difficult to carry out; for a formal accusation by an overt prosecutor was ordinarily required, and it would be difficult to find private persons ready to incur the hatred of a united and energetic body like the Christians. But in Diocletian's persecution the government hunted down the Christians, and employed soldiers and officials for that special purpose; and in such a time the cities where Christians were most numerous would suffer most. Even in Diocletian's time individual Phrygian martyrs were little remembered, but only the general facts that whole communities and one entire city were destroyed.

Considering at how early a date Christianity was diffused over large parts of Phrygia, it may seem strange that the ecclesiastical system was so backward there during the 4th cent., except in Galatic Phrygia, where the list of bishoprics can be traced almost complete during that century.[†] The reason lies in two noteworthy facts. In the first place, Phrygia was the country where, above all others, heresy was strongest; but the ecclesiastical lists are of the Orthodox Church. Thus, for example, Kotiaion was a great seat of Christianity in the 3rd cent., and so was the country of the Praipenisseis. Yet neither can be traced in the lists earlier than the 5th cent. The reason is, undoubtedly, that the Orthodox Church had little hold there. We know of either bishops or presbyters at Otrous and Hierapolis in the 2nd cent.; but in the ecclesiastical lists those two cities appear only in the 5th cent. In the second place, Phrygia was regarded by the orthodox writers as rude and uneducated,[‡] because the organization and equipment of the Orthodox Church were in a backward state there. Christianity was so strong in certain parts of Phrygia that the persecution of Diocletian raged there on a vast scale, and almost annihilated people and civilization and organization.

V. THE JEWS IN PHRYGIA.—The position and history of the Jews in Phrygia is another large subject, which throws much light on the narrative of Acts and on the rapid spread of Christianity in the country. The Jews were much favoured by the Seleucid kings, as trustworthy colonists in the many cities which they founded to maintain their empire in Asia Minor, especially along the routes leading from their capital at Syrian Antioch through Cilicia and Lycaonia into Southern Phrygia[§] and Lydia.

[*] *Cities and Bishoprics of Phrygia*, pt. ii. p. 709. See also PONTUS, and Lipsius, *Apocr. Apost.* ii. 2, 55 ff.

[†] The other districts will be treated in pt. iii. See Cumont's very imperfect list (*Mél. d'Arch. et d'Hist.* 1895).

[‡] He is addressed by a friend as co-presbyter (*συμπρεσβύτερος*), which may be used of a bishop.

[§] Perhaps also with Ac 16^{8}, according to a tradition that can be traced in the interior of Mysia during the 4th or 5th cent. (see *Acta S. Philetæri*, 19th May; and *Expositor*, Oct. 1888, p. 264). This tradition perhaps led to the Bezan text in Ac 16^{7} *διελθόντες* for *παρελθόντες*; and, if so, the tradition must be as old as the 2nd cent. (implying that the statement that Mysia was 'neglected,' or 'passed by,' was regarded at that early date as incorrect in the quarters where the Bezan text originated).

[‖] But one case at least of the most marked northern type occurs, *Cities and Bishoprics*, ii. No. 393.

[*] On the evidence, *Cities and Bishoprics of Phrygia*, ii. p. 715; also p. 501.

[†] Galatic Phrygia is part of Pisidia in the lists. Those Pisidian bishoprics which can first be traced in the 5th cent. or later were in the mountainous and backward districts.

[‡] See, for example, *Acta S. Hypatii*, 17 June, iv. 249.

[§] Northern Phrygia and Galatia, which were little or not at all under Seleucid power, shared very little in these settle-

Seleucus Nikator (B.C. 301–280) granted them the highest class of rights, equal to those of Macedonian and Greek settlers, in all his colonies; and his successors maintained the privileges of the Jews. Various privileges were conceded to their religious scruples: the entire body of regulations guaranteeing their rights and privileges seems to have remained permanently in force in the cities, and is appealed to as 'the law of the Jews' in an inscription of Apamea as late as the 3rd cent. after Christ.* By one single act Antiochus the Great ordered 2000 Jewish families to be brought from Babylonia and settled in the strong places of Lydia and Phrygia about B.C. 200. When such a course of action lasted for fully a century, it is plain what large numbers of Jews must have been settled in Phrygia, Lycaonia, etc.

These considerations explain how Flaccus, the Roman governor of Asia in B.C. 62, could seize 100 pounds weight of gold at Apamea, and 20 at Laodicea, being contributions from the Jews of Phrygia on the point of being sent up to Jerusalem. These large sums, of course, represented the contributions of great districts, and not simply of the two cities. They are calculated by M. Th. Reinach as together equivalent to 100,000 drachmæ, being the contributions of 50,000 people paying two drachmæ annually.†

According to Dr. Neubauer (*Géographie du Talmud*, p. 315), these Jews had to a considerable extent lost connexion with their country and forgotten their language; the baths and wines of Phrygia had separated the Ten Tribes from their brethren, as the Talmud expresses it; they were readily converted to Christianity; and the Talmud alludes to the numerous converts. These opinions have been strongly confirmed by epigraphic discovery. The Phrygian Jews were strongly affected by their surroundings, and were ready to comply, at least outwardly, with many pagan customs, and especially with the forms of the imperial religion, regarded as the test of loyalty to the Roman empire. They probably were often inclined to magic and forbidden arts (see THYATIRA and Ac 19^{13}). Their frequent tendency to amalgamate Jewish and pagan ideas in an eclectic philosophical system is illustrated at Colossæ (see the Epistle). A Jewess married to a Greek and having an uncircumcised son is mentioned at Lystra (Ac $16^{2.3}$). At the same time there can be no doubt that the Phrygian Jews as a body preserved much of the old Jewish character, and presented in society a much higher and purer moral tone than the pagans; and it was this character that gave them great influence and attracted numerous proselytes. On the whole their existence was not hostile, but favourable, to Christianity. Luke emphasizes every instance of their opposition, but he shows clearly that there was another side to the question: the Jews of Pisidian Antioch were opposed to Paul's placing the Gentiles on an equality with themselves (Ac 13^{45}), but not so much to his doctrines: a great multitude of Jews at Iconium believed. The Jewish and the Christian inscriptions melt into one another in Phrygia, so that it is often difficult to draw a line of distinction. The Phrygian Christians were strongly inclined to Judaism. Every heresy in Phrygia tended to become Judaistic. Novatianism, which seems to have been quite free from any Judaizing character in the West, became strongly tinged with it in Phrygia. The Phrygians regarded the 14th day of Nisan as the great religious day, and seem to have called the festival Azyma, the Unleavened. There is every appearance that the reconciliation between Christians and Jews, which was one great aim of St. Paul's work, was attained far more thoroughly in Phrygia than elsewhere.

Early Phrygian Judaic Christianity thus presents a very remarkable character, which stands in the closest relation with the Pauline Epistles. Its development was arrested by the terrible persecution of Diocletian, which seems to have raged with special fury in that most thoroughly Christianized of countries. As Eumenea was the most thoroughly Christian city, so Apamea was the most strongly Jewish; and they (so far as we can judge) were the greatest sufferers (certainly very severe sufferers) under Diocletian.

W. M. RAMSAY.

PHYGELUS (Φύγελλος, WH Φύγελος).—Mentioned in 2 Ti 1^{15} along with HERMOGENES (wh. see) as among those in Asia who turned away from St. Paul during his last imprisonment in Rome. The phrase 'all they which are in Asia,' proconsular Asia that is, must be qualified in some way, known doubtless to Timothy, and may perhaps be best taken to mean, 'All whose help I asked' (cf. 2 Ti 4^{16}). We cannot tell what Phygelus refused to do, nor can we affirm with certainty that apostasy or declension from the faith is implied. Possibly he was asked to go to Rome to use some influence he had on the apostle's behalf, and refused to admit that St. Paul had any such claims on him. The forcible language used makes it probable, however, that Phygelus was guilty of something worse than merely neglecting to visit the apostle in his imprisonment. W. MUIR.

PHYLACTERIES, FRONTLETS.—*Phylactery*—so first in the Genevan Bible, 1557, in earlier versions *filateris* (Wyclif) and *philateries* (Tindale, etc.)—comes to us through the Vulgate from the Greek *φυλακτήριον*. In the Greek of the 1st cent. A.D. this word signified an amulet or charm, which possessed the property of protecting (*φυλάσσειν*)* the wearer against evil spirits and similar malign influences. Among favourite charms were slips of parchment, written over with a magical spell and placed in a case which was hung round the neck, hence also called *περίαπτον*, *περίαμμα*, synonyms of *φυλακτήριον*.

In His great anti-Pharisaic discourse (Mt $23^{1ff.}$), our Lord charges the scribes and Pharisees with ostentation in the discharge of their religious and social duties, 'for they make broad their phylacteries (*πλατύνουσι γὰρ τὰ φυλακτήρια αὐτῶν*), and enlarge the borders of their garments (for which see FRINGES in vol. ii. 68 ff.), and love the chief places at feasts,' etc. (Mt $23^{5f.}$ RV). Now there has never been any doubt that the author of the first Gospel here uses *φυλακτήρια*, which is not found elsewhere in the NT, as the equivalent of the contemporary Hebrew word תְּפִלִּין, *tĕphillîn* (plur. of תְּפִלָּה 'a prayer'), the name then, and by the Jews still, given to two small cases of leather, to be described in the sequel, which were worn by the more ardent legalists of the time, one upon the forehead and the other upon the left arm. This practice, very considerably curtailed, however, is still regarded as one of the most sacred of religious duties by orthodox Jews of the present day (cf. opening paragraph of art. FRINGES).

In this article it is proposed to investigate the origin, history, and significance of the phylacteries,

---

ments. The Jews of North Galatia were probably all late immigrants from Phrygia, etc.

* *Cities and Bishoprics of Phrygia*, pt. ii. No. 399 *bis*; see also ch. xv. on 'The Jews in Phrygia.'

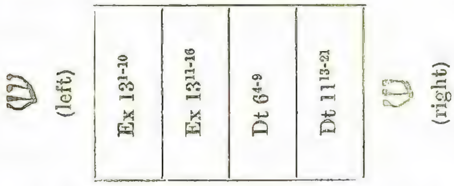
† *Textes Relatifs au Judaisme*, p. 240. He thinks they must represent several years' contribution; but as the two cities stand for all Asian Phrygia and great part of Lydia, it seems not at all impossible that they are the contribution of one year. Adramyttium and Pergamum are the only other two places where Flaccus is said to have seized Jewish money.

* The perverted derivation still met with in some quarters from *φυλάσσειν* (*τὸν νόμον*), as if *φυλακτήρια*=*observatoria*, is now entirely abandoned by scholars.

and for this purpose, on the principle of proceeding from the more familiar to the less, we shall examine—

i. The practice of modern orthodox Judaism;
ii. The alleged Scripture warrant for this practice;
iii. The date of the introduction of the phylacteries;
iv. The manner and extent of the practice in NT times.

i. THE PRACTICE OF MODERN ORTHODOX JUDAISM.—Every male Israelite above the age of thirteen years is required to 'lay (לְהָנִיחַ, Mishna, *Shebu.* iii. 8, 11, etc.) the *tĕphillîn*'—to use the technical expression—at daily morning prayer. To this extent the use of the phylacteries has been curtailed since NT times (see § iv. below). The *tĕphillîn* or phylacteries are two in number, known since the earliest times as the head-phylactery (תְּפִלָּה שֶׁל רֹאשׁ) and the hand-phylactery (ת״ שֶׁל יָד), and consist of two cubical leather boxes or cases, varying in size from ½ to 1½ in. in the side. The material is the prepared skin of a clean animal which has been thoroughly soaked in pure water. A cube-shaped wooden block (טְפוֹס [τύπος] Mishna, *Kel.* vi. 7) is employed to give the desired shape and size. To form the head-phylactery, three deep incisions (קְצִיעוֹת) are made in the block, and the moist parchment spread over it and inserted into the incisions. When the material has dried and hardened the block is removed, and a leather case of four compartments, technically 'houses' (בָּתִּים), is the result. Before this, however, two *shins* (שׁ) have been impressed on the soft leather, one with the ordinary *three* prongs on the outer wall of the *báyith*, which, when the phylactery is complete, will be to the right of the wearer, and another with *four* prongs on the outer wall to the left. This fourfold case is now fitted with a leather brim, and into each 'house' is inserted a slip of specially prepared parchment (קְלָף *Shabb.* viii. 3), having written on it, in a special caligraphy, one of the Scripture passages to be cited presently, and each bound round with a few white hairs of a calf or cow. A firm base is supplied by a square piece of thick leather, connected by a flap with the brim, and sewed to the latter by means of twelve stitches (representing the twelve tribes) of clean gut. The four passages of Scripture above mentioned are those which the Jews have always regarded as constituting their warrant for the use of the phylacteries (see ii. below), viz. Ex 13[1-10] 13[11-16], Dt 6[4-9] 11[13-21]. They are inserted in the four compartments in the order represented by the diagram—



The hand-phylactery is shaped on a similar block without incisions, and consists of a single compartment (בַּיִת *báyith*) with plain walls, fitted with brim, base, and flap as before. The same four passages are written in four parallel columns on a single piece of parchment, and inserted in the *báyith*. Both phylacteries, coloured a deep black, are kept in position by leather straps (רְצוּעוֹת *Yad.* iii. 3), which are passed through the flaps. Both straps are of considerable length, and blackened on the upper side. The head-phylactery is fitted to the wearer's head by having its strap tied at the back of the head into a knot (קֶשֶׁר), of the shape of a *daleth* (ד). One end of the other strap, after being passed through the flap of its phylactery, is formed into a noose by means of a knot of the shape of a *yod* (י). The *shin* of the head-phylactery together with these knots thus make up the letters of the sacred name *Shaddai* (שדי 'Almighty'), to which a mystical significance is attached.

The phylacteries, as has been said, are now worn daily at morning prayer, except on Sabbaths and festival days, which, being themselves 'signs,' render the phylacteries unnecessary on those days. After assuming the *ṭallîth* (see FRINGES), the worshipper proceeds 'to lay the *tĕphillîn*.' The hand-phylactery is laid first. Its position is the inner side of the left arm, which must be bare, just above the elbow, so that, when the arm is bent the phylactery may rest 'upon the heart' (as commanded Dt 11[8]). The long strap, which passes through the noose, is drawn tight, and wound three times round the arm above the elbow, the worshipper pronouncing the following benediction in Hebrew: 'Blessed art Thou, O Lord our God, King of the universe, who hast sanctified us by Thy commandments, and hast commanded us to lay the *tĕphillîn*.' The strap is thereafter wound four times, then three times, round the arm below the elbow, in such a manner as to form a four-pronged and a three-pronged *shin* respectively. At this point the head-phylactery is placed in position, so that the case lies in the middle of the forehead just touching the hair, the two ends of the strap hanging down over the shoulders in front, the following benediction being meanwhile repeated: 'Blessed art Thou, O Lord our God, King of the universe, who hast sanctified us by Thy commandments, and hast given us command concerning the precept of the *tĕphillîn*.'* To this is added, when the adjustment is completed: 'Blessed be His name, whose glorious kingdom is for ever and ever.' Finally, the remainder of the strap of the hand-phylactery is wound three times round the middle finger, and the following is said: 'And I will betroth thee unto Me for ever; yea, I will betroth thee unto Me in righteousness, and in judgment, and in loving-kindness, and in mercy: I will even betroth thee unto Me in faithfulness; and thou shalt know the Lord' (Hos 2[19]). Prayers over, the phylacteries are taken off in the reverse order, the head-phylactery first, then the hand-phylactery. We cannot here attempt to give even a summary of the exceedingly numerous and minute precepts which have been elaborated and codified by the Jewish authorities regarding the preparation of the materials, the manner of writing, the preservation and inspection, etc., of the *tĕphillîn* (see authorities named in the bibliography at end of article).

ii. THE ALLEGED SCRIPTURAL AUTHORITY FOR THE PHYLACTERIES.—The command to 'lay the *tĕphillîn*' is contained, the Jews maintain, in four passages of the Pentateuch, viz.: Ex 13[9. 16], Dt 6[8] 11[18]. It is of the utmost importance for our investigation to obtain an accurate and unprejudiced exposition of these cardinal passages, which we proceed to examine in their order.

(*a*) The bulk of Ex 13 is made up of injunctions regarding the perpetual observance of the Feast of Unleavened Cakes or Maẓẓoth (vv.[3-10]), and of the Dedication of the Firstborn (vv.[11-16]). The former, we read, 'shall be for a sign (אוֹת *'ôth*) unto thee upon thine hand, and for a memorial (זִכָּרוֹן *zikkārôn*) between thine eyes, that the law of J" may be in thy mouth: for with a strong hand hath the Lord brought thee out of Egypt' (v.[9]). Similarly with regard to the dedication of the firstborn, 'it shall be for a sign (*'ôth*, EV 'token') upon thine hand, and for frontlets (טוֹטָפֹת *ṭôṭāphôth*) between thine eyes,' etc. (v.^{16}). Now these two verses are so similar in their phraseology that no sane expositor would hesitate to declare them to be, in the writer's intention, completely identical. The feast of Maẓẓoth and the dedication of the firstborn shall alike serve as perpetual reminders to the Hebrews of the Egyptian deliverance, and of J‴'s resulting claim upon them.

---

* On the slight variation in the form of these and similar benedictions see Friedländer, *The Jewish Religion*, 1891, note, p. 329 f.; to this excellent work the student is referred for an exposition of the 'sign' of *tĕphillîn* from the orthodox Jewish standpoint. The renderings given above are from Singer's edition of *The Authorized Daily Prayer-Book*, 1892, p. 16.

(*b*) In Dt 6$^{6ff.}$ we read: 'And these words, which I command thee this day (the exact reference of 'these words' will be considered presently), shall be in thine heart; and thou shalt teach (שִׁנֵּן)* them diligently unto thy children. . . . And thou shalt bind them for a sign upon thine hand, and they shall be for frontlets between thine eyes. And thou shalt write them upon the door-posts of thy house, and upon thy gates.' In the second passage from Dt (11$^{18-20}$) this injunction is repeated with only slight verbal changes (cf. 11^{18a} 'ye shall *lay* these words upon your heart and upon your soul,' with 6^{8a}). We have now before us the cardinal passages on which has been based the ancient Jewish custom of the phylacteries. Do they, we must now ask, or do they not command and sanction this custom? The answer is by no means so easy as may at first sight appear, for it is not an affair of exegesis alone, but involves questions of criticism and lexicology.

Thus we note that the language of the passage Ex 13$^{3-16}$ presents a strong Deuteronomic colouring, which has prevented our foremost critics† from assigning it exclusively to J, with which source it has also undoubted affinities. Only two alternatives are possible (cf. Wellh. *Comp. d. Hexat.*^{3} 74). Either we have here a section composed in whole or in part by an editor of the Deuteronomic school (so Kautzsch, Cornill, Bacon), or we have one of several examples of the literary activity of the writer (R^{JE}) who united J and E into a single work, and who must have belonged to 'the circles whence Deuteronomy issued' (Kuenen, *Hexat.* § 9 n. 4, § 13 n. 29).‡ In either case the important result follows, that we have to deal not with two enactments, separated by a couple of centuries, the earlier of which may possibly be understood in a figurative and the later in a literal sense, but with enactments of approximately the same age and reflecting the same religious standpoint.

With regard, further, to the Deuteronomic passages (Dt 6$^{6-8}$ 11$^{18-21}$), various critical difficulties suggest themselves. Whence this unwonted and almost *verbatim* repetition in the course of the same address? Must we hold that in some of the early copies of Dt the verses repeated stood in ch. 6, in others with some variations in ch. 11, and that our present text has inserted a harmonized version of them in both places (so Steuernagel in Nowack's *Handkommentar*, 1898, p. 40)? Or shall we, with the latest commentator (Bertholet in Marti's *Kurzer Hand-Commentar*, 1899, p. 36), regard 11$^{18-21}$ as an insertion which interrupts the connexion between v.^{17} and v.^{22}? The strong adversative with which v.^{22} opens in the original (כִּי אִם ='but,' not as EV 'for') certainly follows awkwardly on vv.$^{18-21}$, which so far makes for the latter view. The present writer, however, doubts whether either passage is in its original place. Dt 6^{2}, for example, which is parallel to 11^{21}, looks as if originally intended to form the continuation of vv.$^{6-9}$; this would give the following correspondences: 6$^{6.8}$=11^{18}, 6^{7}=11^{19}, 6^{9}=11^{20}, 6^{2}=11^{21}. Assuming that both passages are genuine, we should thus have an impressive call to the continued observance of the provisions of the Deuteronomic code placed both at the beginning and the close of the hortatory introduction in chs. 6–11. In any case the characteristic Deuteronomic phrase, 'these words which I command thee this day' (6^{6}), must have here, as it has everywhere else in chs. 5–11, a *prospective* reference to all the provisions of the following code, and not merely to the two preceding verses, as the commentators suppose. The two pairs of passages, then, we have seen, are alike in tone and intention, and that intention is to impress upon those addressed the duty of perpetual observance, in the one case (in Dt) of the whole Torah, in the other (in Ex) of two particular ordinances thereof. The whole and its parts should be continually in their thoughts and on their lips, and should form a never-failing subject for the instruction of their youth.

When we proceed to a closer examination of the special verses, Ex 13$^{9.16}$, Dt 6^{8} 11^{18}, it is very evident, if our contention as to their authors' motive is correct, that the language of these verses is *figurative throughout*, as, indeed, is usually admitted for Exodus, but denied, or at least questioned, for Deuteronomy. But all figures of speech in Hebrew, as in other tongues, are borrowed from the common objects and processes of nature, or from the familiar facts of human life. So it must be in the case before us. Thus, as regards the 'sign' upon the hand, we have only to recall the widespread practice, among all primitive races, of tattooing or branding various parts of the body with the name or symbol of the deity to whom one wishes to dedicate one's self, and whose protection it is desired to secure (see CUTTINGS IN THE FLESH in vol. i. 538^{b}). Such, doubtless, is the underlying idea of the mark (אוֹת)* of Cain, by which he was placed under the special protection of J″ (see esp. Stade's brilliant essay, 'Das Kainzeichen,' in *ZATW*, 1894, p. 250 ff. In this essay Stade has further shown [p. 310 ff.] that זִכָּרוֹן of Ex 13^{9} is a synonym of אוֹת in this sense).† The forehead,—for such is the meaning of 'between the eyes' in all our passages,—even more than the hands and wrists, was specially adapted for the reception of these religious tokens, and is so used by the most widely scattered savage and semi-savage races at the present day. But even in the canonical and extra-canonical literature of the Hebrews we find undoubted references to this practice. Thus we have the young man who bore on his forehead some mark or token that he belonged to the prophets of J″ (1 K 20^{41}; see Stade, *loc. cit.* 314 f.; and Kittel, *Handkom. in loc.*), Ezekiel's cross (תָּו 9$^{4.6}$) on the foreheads of the faithful (cf. Rev 7^{3} 14^{1}), the 'token of destruction' (*σημεῖον τῆς ἀπωλείας*) on the forehead of the wicked (Ps-Sol 15^{10}, cf. v.^{8}), while 'the mark of the beast on hand or forehead' (Rev 13^{16} 14^{9} etc.) is familiar to all. These instances more than suffice to give us a glimpse of the circle of ideas which supplied the metaphors of the passages we are considering. The ordinances of the Torah were to serve the same purpose as these *στίγματα* of the ancient cults; they were to be outward and visible tokens of the Hebrews' allegiance to J″ their God, and of J‴'s special propriety in them.

In three of the cardinal passages, however (Ex 13^{16}, Dt 6^{8} 11^{18}), for the *zikkārôn* of Ex 13^{9} there is substituted a word of uncertain signification, טוֹטָפֹת *ṭôṭāphôth*, EV 'frontlets.'

---

* שִׁנֵּן, only here in OT, appears to mean 'to prick with a sharp-pointed instrument,' hence probably = tattoo (see below).

† Except Dillmann; but see his latest editor's view in Dillmann-Ryssel, *Exodus*, pp. 111, 141.

‡ For a conspectus of modern critical opinion regarding Ex 13$^{3-16}$ see Holzinger, *Einleit. in d. Hexat.* 455 f., and the 'Tabellen' accompanying that work.

* These marks were called *στίγματα* by the Greeks (see Stade, *ut sup.*, and Deissmann, *Bibelstudien*, 266 ff.); cf. LXX Lv 19$^{27f.}$ *γράμματα στικτά*.

† Cf. Nu 16$^{38.40}$ (Heb. 17$^{3.5}$), where אוֹת and זִכָּרוֹן are used interchangeably.

The singular of this word appears as טוֹטֶפֶת in post-biblical Hebrew, and the טוטפת of the MT should in all probability be so pointed.[*] In form it resembles כּוֹכָב for כַּבְכָּב, by reduplication from a root which must be either טפף or טוף (see König, *Lehrgeb.* II. i. § 60, 6*a*). The latter form is generally preferred on the strength of the Arab. *ṭâfa*, 'to encircle,' but the sense 'fillet, head-band' (so Ges. *Thes.*, Dillm., Driver, etc.) suits neither the descriptive expression 'between thine eyes' nor the circle of ideas from which, we are convinced, the figure in the text is borrowed. The rendering *tĕphillîn* of the Targums is merely a reflexion of the interpretation which had long been current among the Jews (see below). The root טפף is therefore to be preferred, but its significance can only be conjectured. Several modern scholars favour a conjecture, first proposed by Knobel, viz. 'to strike,' then 'to make an incision,' so that *ṭôṭāphôth* would thus also denote *στίγματα* (Klein, 'Die Totaphoth nach Bibel und Tradition,' in *Jahrb. f. protest. Theologie*, vii. (1881) p. 673; Siegfried-Stade, *Lex. s.v.*; Nowack, *Heb. Arch.* i. 134). This conjecture, it may here be added, has the support of the Peshiṭta in Dt 6^8 11^{18}, where *ṭôṭāphôth* is rendered by *rûshmâ*, 'a mark,'[†] which is also used to render Ezekiel's mark and the mark of the beast in Revelation.

In the absence, however, of all trace of the above signification in the extant literature, it is more probable that we have in טפף a root akin to נטף 'to drop,' and actually found in this sense in the Talmudic טַפְטֵף 'to drip *or* drop' (used of wine, oil, blood, etc.); cf. the series המם, הום, נהם, and Arab. *hamhama*, Ges.-Kautzsch, *Heb. Grammar*, § 30*k*.

טוֹטֶפֶת is thus akin to נְטִיפוֹת '[ear-]drops' (Jg 8^{26}, Is 3^{19}), as is further confirmed by the rendering of the Samaritan Targum טפין, which must be the Aram. טִפָּא 'a drop' (of blood, etc.; see Levy, *s.v.*). It prob. denoted a '*drop*,' *bead*, or *jewel* worn as an amulet,[‡] *i.e.* as a true *φυλακτήριον*. In the Mishna, *Shabb.* vi. 1, 5, *ṭôṭépheth* clearly signifies a jewel worn by Jewish women, attached to their head-dress.[§] The Deuteronomic authors, then, do not shrink from the use of another bold metaphor to express the thought that the commands of J″ shall be as constantly present to the thoughts of His people, and as highly prized as the most precious of jewels by their superstitious contemporaries.

The results of our investigations may now be summed up. The passages in Ex and Dt on which the institution of the phylacteries is based cannot be kept apart in such a way that the expressions of Ex are to be taken *figuratively* but those of Dt *literally*. The figurative interpretation of both passages, further, is confirmed by such additional considerations as the following: (*a*) numerous other expressions in the contexts are plainly figures of speech; such are the references to the words of J″ being in the mouth (Ex 13^9, cf. Schoettgen's remarks, *Horæ Heb. et Talmud.*, 194 f.) and in the heart (Dt 6^6), to the duty of impressing (שָׁנַן 'to prick with a sharp instrument') them upon the children (6^7), and of laying them upon the heart and the soul (11^{18}, but see above, § i., for an attempt to do this literally); (*b*) similar expressions elsewhere have never been taken otherwise than figuratively, *e.g.* Dt 30^{14}, Pr 3^3 ('bind them [kindness and truth] upon thy neck, write them upon the tablet of thine heart'), 1^9 6^{21} 7^3, Jer 17^1 31^{33} etc.; (*c*) there is the impossibility of carrying out the injunctions in the literal sense when these refer to the whole Deuteronomic code, as we saw to be the case even in Dt 6^8,—a consideration, it may be added, which effectually disposes of the strictly literal interpretation of 6^{10} ($=11^{20}$).

iii. The Rise of the literal Interpretation of Ex 13^{16} etc., and the Date of the Introduction of the Phylacteries.—We have now to inquire at what period of Jewish history the literal interpretation of the four passages in question took its rise. A strong presumption against a date in the Exile, or even early in the post-exilic period, is furnished by the fact that the phylacteries are unknown to the Samaritan community (see Klein, *loc. cit.* 686 f.; Hamburger, *Realencycl. d. Judenthums*, ii. 1065). The Aramaic form of the name *tĕphillîn* points unmistakably in the same direction. An evident *terminus a quo*, however, is supplied by the figurative passages from Proverbs just cited. These are admittedly echoes of the Deuteronomic teaching (see Driver, *LOT*^{6} 396), and it is incredible that a Jewish writer would have so expressed himself, if the literal interpretation of Dt 6^6 etc. already held the field. Now the passages in question are all contained in the later section of the book (Pr 1–9), which, if the earlier section (10 ff.) date from the late Persian period, can hardly be earlier than B.C. 300.[*] Even half a century later, *c.* 250 B.C.,—the provisional date generally accepted for the beginnings of the Alexandrian translation (LXX),—the figurative interpretation was still accepted, at least in Egypt. This we see from the LXX rendering of the crucial טוטפת (*καὶ ἀφάψεις αὐτὰ εἰς σημεῖον ἐπὶ τῆς χειρός σου, καὶ ἔσται ἀσάλευτον πρὸ ὀφθαλμῶν σου*, Dt 6^8) as something 'immovably fixed' (*ἀσάλευτον*;[†] cf. Ac 27^{41}, He 12^{28}) before one's eyes, the unchanging subject of one's thoughts.

The *terminus ad quem* is suggested by the famous letter of the pseudo-Aristeas, who represents himself as having been instructed by Eleazar, the then high priest at Jerusalem, in the institutions of Moses. The latter, says Eleazar, in addition to 'the token of remembrance on our garments (see Fringes) and the texts (*τὰ λόγια*) on doors and gates, commanded us expressly to bind the sign on the hands also' (*καὶ ἐπὶ τῶν χειρῶν τὸ σημεῖον περιῆφθαι*—Hody, 'Aristeæ Historia,' in *De Bibliorum Textibus*, p. xviii; Kautzsch, *Pseudepigraphen*, 'Der Brief d. Aristeas,' v.^{159}), an unmistakable reference to the hand-phylactery, *but to that only*.[‡] Unfortunately the date of Aristeas is still *sub judice*. For various reasons we decline to accept the early date, c. 200 B.C., advocated by Schürer (*HJP* II. iii. 310), and incline to a date early in the 1st cent. B.C. (cf. Wendland in Kautzsch, *op. cit.*). We thus obtain a period of one hundred and fifty years (B.C. 250–100), to which the introduction of the phylacteries may confidently be ascribed. Now it is more than a coincidence that this is the period which witnessed the growth of that more strict and literal observance of the requirements of the Torah, which is associated with the rise to power and influence of the sect of the Hasidæans (wh. see) and of their successors, the Pharisees. The latter, we know, acquired great influence under John Hyrcanus (B.C. 135–105), imposing upon the people their views regarding sacrifice, prayer, and worship generally (Jos. *Ant.* XVIII. i. 3), and it may well be that among the observances which the Pharisees then introduced (see *ib.* XIII. xvi. 2), and which were successively abrogated by Hyrcanus and reintroduced by Alexandra (B.C. 78), the practice of 'laying the *tĕphillîn*' had a place. Our conclusion, then, is that the introduction of the phylacteries may with certainty be assigned to the period between B.C. 250 and 100, and conjecturally to the generation embraced by the reigns of Simon the Hasmonæan and his son John Hyrcanus, viz. B.C. 140–105.

---

[*] It should be noted that the Hebrew text has twice טוטפת and once טטפת, never, as in the Samaritan Pentateuch, טטפות, with express plural termination.

[†] Which favours the singular pointing, as suggested above.

[‡] It is well known that the practice of wearing jewellery in the ears, nose, etc., had its origin in the desire to guard the orifices of the body against the entrance of evil spirits (cf. W. R. Smith, *RS*^{1} 433 f.). As rings could not be inserted in the eyelids as through the ear-lobes and nostrils, the same end was secured by hanging a jewel 'between the eyes.'

[§] Cf. the explanation of the Jerus. Gemara in Levy, *s.v.*, 'something worn in the place of the *tĕphillîn*,' *i.e.* on the forehead.

[*] Toy in the *International Critical Comm.* says *c.* 250 B.C. ('Proverbs,' Introd. xxx); so, too, Wildeboer in Marti's *Hand-comm.*

[†] For this term and the variant *σάλευτον* (of which Philo gives an ingenious explanation, *Opp.* ii. 358), as also for the renderings of the later Greek versions, see Field, *Origenis Hexapla*, at Ex 13^{16} and Dt 6^8.

[‡] Have we here an indication that the head-phylactery was of later introduction than the hand-phylactery? The female diviners of Ezekiel's day were in the habit of binding amulets (כְּסָתוֹת, EV 'pillows,' but understood in the former sense by Ephraem Syrus, and the anonymous 'Hebrew' who rendered the word by *φυλακτήρια*, see *ap.* Field's *Hexapla*, *in loc.*) on their wrists, a practice which Hitzig regarded as the precursor of the phylacteries (see the comm. on Ezk $13^{18ff.}$, and art. Kerchief). The late W. R. Smith seems to have shared this view (*Jour. of Philology*, xiii. 286).

iv. THE PHYLACTERIES IN THE EARLY CENTURIES A.D.—By the NT writers, as by Josephus (*Ant.* IV. viii. 3) and by their contemporaries generally, the phylacteries, like the use of the *Shĕma'* (שְׁמַע) in the daily prayers (Schürer, *HJP* II. ii. 77, 84 f.),—for both practices doubtless had their rise in the same period and in the same circles,—were regarded as dating from the days of Moses. The practice was, of course, regarded as having scriptural authority, but even the details of the construction of the phylacteries were ascribed to a special revelation to Moses (technically הֲלָכָה לְמשֶׁה מִסִּינַי, for which see Hamburger, *Realencycl.* 2nd Suppl. p. 162 ff.). The following details, gleaned from the Mishna,—which may be taken as authoritative for the century ending A.D. 135, although in its present form of somewhat later date,—may be given as illustrating the practice of orthodox Jewish circles in NT times, and as showing, when compared with the details already given in § i., how little change has been introduced since the 1st cent. A.D. In the Mishna, then, we find the same terms applied to the phylacteries as at the present day, *tĕphillā shel rô'sh* and *t. shel yādh* (for the latter also, more correctly, ת״ שֶׁל זְרוֹעַ '*tĕphillā* of the arm,'—*Miḳw.* x. 3, 4). The material was the same (*Kel.* xxiii. 1); the shape square, not round (*Megil.* iv. 8). The head-phylactery, sometimes spoken of as *the* phylactery *par excellence* (*Kel.* xviii. 8, etc.), was already divided into four compartments (*Kel. ib.*), but not more (*Sanhed.* xi. 3), each with its parchment slip (*Shabb.* viii. 3; cf. Justin Martyr, the first Christian writer outside the NT to refer to the phylacteries by name, *Dial. c. Tryphone*, 46, ed. Otto^{1}, ii. 148, *φυλακτήριον ἐν ὑμέσι λεπτοτάτοις γεγραμμένων χαρακτήρων τινῶν*) containing in all probability the same passages as in modern times. Thus the third of the passages in question (Dt 6^{4-9}) is expressly described as 'the smallest section (פָּרָשָׁה קְטַנָּה) in the *tĕphillîn*, which is, Hear, O Israel' (*Sanhed.* viii. 3).* The writing had to be in the square Hebrew character (אַשּׁוּרִית, lit. Assyrian, *i.e.* Syrian or Aramæan). Women, slaves, and minors (קְטַנִּים) were exempt from the obligation of wearing the phylacteries (*Berakoth*, iii. 3), also all males in the presence of their dead (*ib.* iii. 1), and on Sabbaths and festivals, the latter as greater 'signs' rendering superfluous the observance of the lesser sign of the phylacteries. When not in use the phylacteries were kept in a case (תִּיק, *θήκη*, *Shabb.* vi. 2). From various indications it may be inferred that they were worn during the whole day, the justification for which was found in a mistaken interpretation of Ex 13^{10}. There the Hebrews are enjoined to keep the feast of Unleavened Cakes מִיָּמִים יָמִימָה, *i.e.* not from day to day, every day, but—as the phrase elsewhere signifies and as the context requires—*from year to year* (so correctly Onkelos; also Aquila *ἀπὸ χρόνου εἰς χρόνον*). The Jews, however, referring the command to the phylacteries (v.^{9}), interpret the words as enjoining their use 'from day to day.' This interpretation is most clearly expressed in the Targum (pseudo-)Jonathan to Ex $13^{9f.}$. After the direction that the hand-phylactery shall lie on the upper part of the left arm, and the head-phylactery in the middle of the upper part of the forehead, we read: 'Thou shalt observe this commandment of the phylacteries in the appointed time, on working days but not on Sabbaths and feast days, and in the day time not in the night time' (*ap.* Walton's *Polyglot*, vol. iv.). The later limitation of their use to the time of the daily prayers was no doubt due to the same causes as brought about a similar curtailment in the wearing of the *ẓiẓith* (see FRINGES in vol. ii. 69^{a}).

It is difficult to say with certainty to what extent this habitual wearing of the phylacteries prevailed among the Jewish people as a whole. That it was the invariable practice of the Pharisees and of the scribes, who belonged almost exclusively to that sect, we may take for granted. On the other hand, the balance of probability is against its adoption by the Sadducees, who may possibly be referred to in the Mishna sentence (*Sanhed.* xi. 3) as saying, 'there is no such thing as *tĕphillîn* (אֵין תְּפִלִּין).' Certainly the Karaite Jews, who claim to be the religious successors of the Sadducees, maintain the figurative interpretation of the injunctions in Ex and Dt (Hamburger, *op. cit.* ii. 1204; Klein, *loc. cit.* 688). The great mass of the people also,—*ὁ ὄχλος ὁ μὴ γινώσκων τὸν νόμον* (Jn 7^{49}),—engrossed in the hard routine of daily toil, paid no heed to this enactment of the scribes (with Jn 7^{49} cf. Talm. Bab. *Berakoth*, 47*b*: 'Who is an '*am-ha'areẓ*? R. Jehoshua says: Every one who does not lay the *tĕphillîn*' [כל שאינו מניח ת״]). Hence we may infer that neither our Lord nor His disciples followed, in this respect, the lead of the Pharisees (cf. Jn 7^{15}). In His denunciation of the latter (*πλατύνουσι γὰρ τὰ φυλακτήρια αὐτῶν*, Mt 23^{5}) our Lord is generally understood to refer to the ostentatious breadth of the straps (רְצוּעוֹת *Yad.* iii. 3, etc.) by which the phylacteries were firmly secured on head and arm, as is expressly stated by the earliest Syriac translators (see *loc. cit.* in the codices of Lewis [Sinaiticus] and Cureton: 'for they make broad the straps of their *tĕphillîn* [ערקא דתפליהון]).' It is probable, however, that this increase in the width of the straps was accompanied by a corresponding increase in the size of the phylacteries proper, and that both are included in the denunciation.

In addition to the Talmud (Mishna and Gemara), we have in the Targums ample evidence of the Jewish belief in the antiquity of the phylacteries, resulting in several cases in amusing anachronisms. Thus Saul's bracelet or armlet (2 S 1^{10}) is converted into 'the phylactery * (מוֹטַפְתָּא) which was upon his arm.' The turbans (פְּאֵר) of Ezekiel and his fellow-exiles are changed to phylacteries (Targ. Ezk $24^{17.\ 23}$), while Mordecai is represented as recognizable as a Jew by his phylacteries (Targ. Est 8^{15}).

While we believe that the introduction of the phylacteries was not due to a superstitious belief in their magical virtues as 'appurtenances to make prayer more powerful' (so W. R. Smith, *Jour. of Phil.* xiii. 286, and others), but, as we have shown above, to a mistaken obedience to the letter on the part of over-zealous students of the Torah, it cannot be denied that by the rank and file of the people—from whom, no doubt, the name *φυλακτήρια* proceeded—and even by some of the more educated, the phylacteries were regarded as possessing magical properties. This appears from the repeated mention, in the Mishna, of the *tĕphillîn* alongside of the *ḳĕmîa'* (קָמִיעַ), which was an amulet also written on parchment by a professional exorcist (see *Shabb.* vi. 2), and worn on the person, from the rendering of Ca 8[3] in the Targum,* and from various references in the Midrash and Gemara (for which see Klein, 679 f.; Hamburger, art. 'Tephillin').

---

* Jerome (*Comment. in Matth. ad* 23^{5}) was evidently mistaken in thinking that the orthodox phylacteries contained the Decalogue. He seems to have confused them with similar *φυλακτήρια* used exclusively as amulets (see below).

* This is a preferable rendering to 'bracelet,' which is based on the precarious etymology referred to above (§ ii.).

On the other hand, the Talmud abounds in extravagant eulogy of the religious value of the phylacteries.† In the Middle Ages, from the 8th, and especially from the 10th cent. (Hamburger), they were less esteemed; and, in some parts at least, the practice almost became extinct (see Rodkinssohn, תפלה למשה, *Ursprung u. Entwickelung d. Phylacterien-Ritus*, 1883 (Hebrew), to be used with caution, cf. *REJ* vi. 288). The fact that several Jewish scholars of note, beginning with Samuel ben Meir (Rashbam, 1080–*c.* 1150), in their commentaries maintained the figurative interpretation of the cardinal passages, no doubt contributed to the growing disuse of the phylacteries. A return to the earlier practice, however, was gradually effected, and their use is now universal among the orthodox Jews, both of the Polish and Spanish rites. At the age of thirteen years and a day the Jewish boy attains his religious majority, becomes responsible for his actions, and a 'Bar-Mizvah' (בַּר מִצְוָה, for the history and significance of which see Löw, *Die Lebensalter in d. jüd. Literatur*, 210 ff.). Among the duties and privileges of the Bar-Mizvah not the least important is that of 'laying' the *tĕphillîn.*

LITERATURE.—The commentaries, esp. Dillmann-Ryssel, *Exodus*, etc.; Dillmann, Driver on *Deuteronomy*; Kalisch, *Exodus* (special dissertation, pp. 223–227). The numerous minute Rabbinical prescriptions will be found in the authoritative works of Maimonides (*Yad Ha-ḥazaka Hilkoth Tephillin*) and Joseph Caro (*Shulḥān 'Aruk*). Extensive excerpts from Maimonides in Ugolinus, *Thes. Antiquitatum Sacrarum*, xxi., containing treatise 'de Phylacteriis Hebræorum.' Of the older discussions the most valuable are those by Buxtorf, *Synagoga Judaica*, pp. 170–185; Spencer, *de Legibus Hebræorum*, etc., Cambridge, 1727, lib. iv. capp. 1–7 ('de natura et origine Phylacteriorum'); Bodenschatz, *Kirchliche Verfassung der heutigen Juden*, iv. 14–19 (with illustrations). Lightfoot, Schoettgen, and similar works on Mt 23[5]. M. Margoliouth, *The Fundamental Principles of Mod. Judaism*, pp. 1–49. Of the articles in Bible Dictionaries perhaps the most important are those by Delitzsch in Riehm's *Handwörterbuch*, etc. (art. 'Denkzettel'), by Ginsburg in Kitto-Alexander's *Biblical Cyclopædia* (art. 'Phylactery'), both illustrated, and by Hamburger, *Realencyclopædie d. Bibel u. Talmud*, vol. ii. (art. 'Tephillin'). The only critical investigation of the subject hitherto has been by Klein, 'Die Totaphoth nach Bibel u. Tradition,' in the *Jahrbücher für protest. Theologie*, 1881, pp. 666–689 (useful collection of material, but critically and exegetically weak). The varying usage of the Middle Ages is given by Rodkinssohn, תפלה למשה, *Ursprung u. Entwickelung des Phylacterien-Ritus bei den Juden* (in Hebrew), 1883 [not seen]. A short exposition of modern Jewish teaching in Friedländer, *The Jewish Religion*, 331–338.

A. R. S. KENNEDY.

PHYLARCH (τὸν φυλάρχην, 2 Mac 8[32]).—There can be but little doubt that this word is not a proper name (as in AV; cf. RVm), but a military title. In Athens the 'phylarchs' had command of the cavalry; and here either a cavalry officer or a commander of auxiliary forces seems to be intended. Zöckler still supports the proper name.

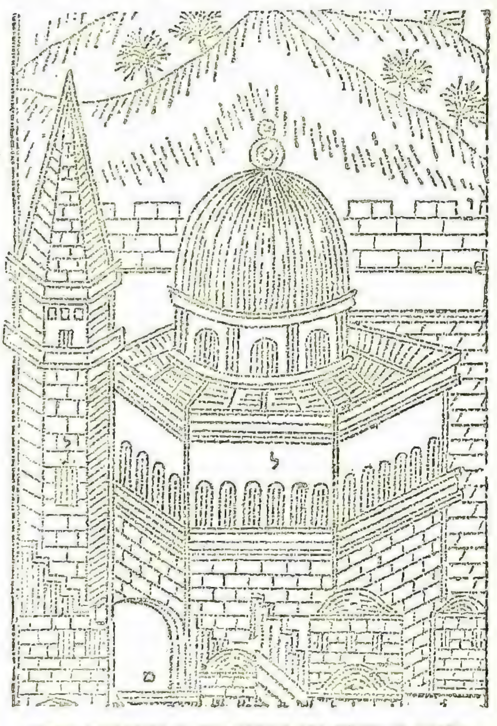
PHYSICIAN.—See MEDICINE, p. 321.

PI-BESETH (פִּי־בֶסֶת, Βούβαστος).—Ezk 30[17], a city in Lower Egypt, the hieroglyphic *Per-Bastet*, 'House of Bastet,' in Copt. *Pubasti*, *Buasti*, etc. The city was named *Bast*; the goddess who dwelt in it was hence called *Bastet*, 'the Bastite,' and thence again was formed the sacred name of the city, viz. *Per-Bastet*, lit. 'the house of the Bastite.' The sacred name was that adopted by the Greeks and Romans; the modern name of the site, Tell Basṭeh, 'the hill of Basteh,' may be derived from the original form.

Bubastis was probably a wealthy and important city from the earliest times. Its mounds are very extensive, and its temple, recently excavated by Naville for the Egyp. Expl. Fund, contained monuments of every period from the 4th Dynasty down to Roman times. It is now entirely deserted, but lies close to the large town of Zagazig, which owes its importance to the railway. Bubastis was capital of the 18th nome of Lower Egypt, the boundaries of which are very uncertain. In history it does not appear until the time of the 22nd Dynasty, founded by Shishak about B.C. 1000, and known as the Bubastite Dynasty, under which Bubastis was the second city of Egypt, Thebes still remaining the first. When that dynasty expired, and Egypt was divided, Bubastis was still the capital of a royal family, which was afterwards considered to be the legitimate 23rd Dynasty. The city was visited by Herodotus, who greatly admired the situation and beauty of its granite temple, and has recorded the existence of a popular and somewhat licentious annual festival held in honour of the goddess Bastet (Hdt. ii. 59 f.). The goddess was figured with the head of a lioness, or later almost invariably of a cat. She was held to be a mild form of Sekhemt, the goddess of destruction. Cats were sacred to her. Her son was named Mahes, 'fierce-eyed lion'; but Nefer-Atum was commonly worshipped as the third member of the Bubastite triad. Mummied cats, sometimes in bronze cases, were very abundant, the cat cemetery having extended over many acres; but antiquity dealers have now plundered what the damp atmosphere of the Delta had spared.

F. LL. GRIFFITH.

PICTURE is AV trⁿ of 1. מַשְׂכִּית Nu 33[52] (LXX τὰς σκοπιάς), Pr 25[11] (ὁρμίσκος). In the former of these passages RV has 'figured stones' (cf. Lv 26[1]). These may have been stones erected for worship,



JEWISH ENGRAVING OF THE TEMPLE AND MOUNT OF OLIVES.

---

* It is maintained by some, however, that the power of protecting from evil spirits here affirmed is confined to the *mĕzûzā*.

† It is unfair, however, to use for polemical purposes such purely academic statements as *Berakoth*, 6*a*, that the Almighty Himself 'lays the tĕphillîn'! (a curious inference from the following passages: Is 62[8], Dt 33[2], Ps 29[11]).

or with a hand or other amulet sign marked upon them for the preservation of fields and vineyards from evil influences. For 'pictures of silver' in Pr 25[11] RV gives 'baskets (m. filigree work) of silver.' See Lagarde, *Anmerk. z. Gr. Uebersetz. d. Proverb.* 80. 2. שְׂכִיָּה. For עַל כָּל־שְׂכִיּוֹת הַחֶמְדָּה of MT the LXX has ἐπὶ πᾶσαν θέαν πλοίων κάλλους, AV 'upon all pleasant pictures,' RV 'upon all pleasant imagery' (m. 'watch-towers'). Siegfried-Stade propose to read סְפִינוֹת (cf. Jon 1[5]), 'ships,' for שְׂכִיּוֹת.

Figures were represented either by an image completely separated from its surrounding material, or by a surface in partial relief, or by a line of stain or etching (מְחֻקָּה) on the surface.

At the present day, when a pious Syrian Jew wishes to have a picture of the temple and the Mount of Olives in his house, he falls upon the device of having a line engraving made up of Scripture quotations, thus avoiding the formal infringement of the second commandment. See engraving on previous page. G. M. MACKIE.

PIECE.—1. A measure: 1 Es 8[20] 'an hundred pieces of wine' (Gr. μετρητής, RV 'firkin,' as the same word is translated in Jn 2[6] AV and RV). See WEIGHTS AND MEASURES. 2. An instrument of war; 1 Mac 6[51] 'pieces to cast darts and slings' (Gr. σκορπίδιον, dim. of σκορπίος, a scorpion). In this sense the word is scarcely obsolete. Shaks. *I Henry VI.* I. iv. 15, has—

> 'A piece of ordnance 'gainst it I have placed.'

In Selden's day the word was beginning to be replaced by gun. He says (*Table Talk*, p. 65), 'Sometimes we put a new signification to an old word, as when we call a piece a Gun.'

PIETY.—In Lat. *pietas* signified duteous regard (1) to the gods, (2) to one's parents [cf. the familiar 'pius Aeneas' of Vergil, *Aen.* i. 220, etc.] and inferiors, (3) to one's country; and the Eng. word 'piety' retained all these meanings. We use it now of devotion to God only, although we can prefix an adj. and speak of 'filial piety.' We cannot say with Milton, *Samson Agon.* 993—

> 'The public marks of honour and reward
> Conferred upon me for the piety
> Which to my country I was judged to have shown.'

In AV the only occurrence is 1 Ti 5[4] 'If any widow have children or nephews, let them learn first to show piety at home,' where εὐσεβεῖν is rendered 'to show piety,' and the tr. is retained in RV. An example of the meaning 'devotion to God' is found in the Preface to AV, 'Piety towards God was the weapon, and the onely weapon that both preserved Constantines person, and avenged him of his enemies.' J. HASTINGS.

PIGEON.—See DOVE.

PI-HAHIROTH (פִּי הַחִירֹת).—When the Israelites turned back from ETHAM, 'in the edge of the wilderness,' they encamped 'before (לִפְנֵי Ex 14[2]) *or* beside (עַל v.[9]) Pi-haḥiroth, between MIGDOL and the sea, before BAAL-ZEPHON.' The name occurs again in the itinerary of Nu 33[7. 8]. In v.[8] RV has 'from before Haḥiroth,' instead of 'from before Pi-haḥiroth,' following in this the MT מִפְּנֵי הַח׳, which, however, may be a copyist's error for מִפְּנֵי פִּי הַח׳ or מִפִּי הַח׳. All the passages in which Pi-haḥiroth is mentioned belong to P. Unfortunately, the above definition of its position is insufficient to fix its site, for Migdol and Baal-zephon, like most of the places named at the initial stages of the Exodus, are themselves unknown. Even RAAMSES has not been identified, although we know the site of PITHOM. See, further, art. EXODUS in vol. i. p. 803.

The etymology and the meaning of the name Pi-haḥiroth are likewise uncertain, although attempts have been made to explain it from the side both of Egyptian and of Hebrew. The LXX, which finds a proper name in Nu 33[7] (B ἐπὶ στόμα Ἐπιρώθ, AF . . . Εἰρώθ) [8] (BA ἀπέναντι Εἰρώθ), treats פי החירת in Ex 14[2. 9] as an appellative, ἀπέναντι τῆς ἐπαύλεως. The 'farmstead' of this last rendering reminds Sayce (*EHH* 181) of the *ahu* or 'estate' of Pharaoh in the district of Thukut, on which, according to a letter dating from the 8th year of Merenptah, the Edomite herdsmen were allowed to settle. Naville has proposed to make Pi-haḥiroth = *Pi-Qerhet*, 'the house of the goddess Qerhet,' the name of a sanctuary in or near Pithom, but to this there are philological objections. The Pesh., Targ., and Sa'adya take פי as the construct of פֶּה 'mouth,' while חירת, according to the first, means 'trenches *or* canals,' according to the other two, 'mountains *or* rocks.' For modern conjectures see Dillm.-Ryssel on Ex 14[2], which, along with Sayce (*HCM* 252 ff.) and Driver (in Hogarth's *Authority and Archæology*, 57, 61), may be consulted on the question of the site. J. A. SELBIE.

PILATE.—Pontius Pilatus (Πόντιος Πειλᾶτος) was the fifth* Roman procurator of Judæa. After the deposition (A.D. 6) of Archelaus, his territory, which included Judæa, Samaria, and Idumæa,† was erected into an imperial province in charge of an officer of the equestrian order with the title of *procurator*. In the Gospels, Pilate is called simply *governor* (ἡγεμών); but Josephus specifically calls the ruler *procurator* (ἐπίτροπος; *Ant.* XX. vi. 2, *BJ* II. viii. 1, ix. 2, etc.),‡ as also does Tacitus (*Ann.* xv. 44). His official residence was in the palace of Herod in Cæsarea (cf. Ac 23[35]); but at the time of the feasts he usually went up to Jerus., probably occupying there also the palace of Herod.§ The military force under him consisted of about three thousand men at Cæsarea, besides small garrisons scattered throughout the country, and a cohort (500 men?) stationed in Jerusalem.‖ His judicial authority was supreme, except in the cases of Roman citizens, where appeal lay to the emperor, while his chief duty concerned the financial administration and the collection of taxes for the imperial treasury. The Judæan procurators thus exercised much higher authority than officers of the same name in most Roman provinces, where they presided merely over the finances. Similar administrative functions, however, were entrusted to the eparchs of Egypt and the procurators of Noricum, Rætia, and a few other exceptional peoples.¶

But while Judæa was thus directly governed by Rome, a large measure of local self-government was allowed, especially to urban communities. In Jerus. the Sanhedrin was the supreme court of the nation, and as many judicial functions as possible were retained by it. Death sentences, however, required the governor's confirmation, and were executed by him (cf. Jos. *Ant.* XX. ix. 1, *BJ* II. viii. 1). The tolerant Roman rule showed much respect for the customs and prejudices of the Jewish people. It aimed at as large liberty as was consistent with order and tribute. Most of the difficulties in Judæa arose from the religious zeal and intractable disposition of the Jews themselves. On the other hand, their liberties were liable at any moment to be overruled, if necessity seemed to require it; and the procurators were generally men who grievously abused their authority. The nation itself also was divided, and in an almost constant state of tumult. The recollection of these facts is necessary in order to appreciate the position of Pilate when Christ was brought before his bar.

---

* Some count him the sixth procurator, reckoning as the first Sabinus who took charge during the absence of Archelaus (Jos. *Ant.* XVII. ix. 3, x. 1); but Sabinus, as procurator in Syria under Varus, merely acted to secure Cæsar's interests after the death of Herod, and while the cause of Archelaus was yet in doubt.

† Except the towns of Gaza, Gadara, and Hippos (Schürer, *HJP* I. ii. 39).

‡ Jos. also calls the governor ἔπαρχος (*Ant.* XIX. ix. 2, etc.), προστησόμενος (*Ant.* XX. vii. 1), ἐπιμελητής (*Ant.* XVIII. iv. 2), as well as ἡγεμών (*Ant.* XXVIII. iii. 1).

§ See PRÆTORIUM.

‖ See Schürer, *HJP* I. ii. 49–57; cf. Ac 21[31], Jn 18[12].

¶ Comp. authorities cited by Schürer, *HJP* I. ii. 45; also Mommsen, *Provinces of the Rom. Emp.* ii. 201.

Of Pilate's origin we know nothing,[*] though it has been inferred, from his *nomen* Pontius, that he belonged to an ancient Samnite family whose name frequently appears in Roman history.[†] His *cognomen* has, however, been derived from *pileatus*,—one who wore the *pileus*, the cap of manumitted slaves,—and the inference has been drawn that he was a freedman, or descended from one. But his appointment as procurator makes this improbable, since such officers were uniformly of equestrian rank.[‡] Hence others derived *Pilatus* from *pilum*, a javelin. His *prænomen* is unknown, nor does his name appear in history apart from his residence in Judæa. He was preceded in office by Coponius (A.D. 6–9?), Marcus Ambivius (A.D. 9–12?), Annius Rufus (A.D. 12–15?), and Valerius Gratus (A.D. 15–26), and was appointed (Eus. *HE* i. 9) in the twelfth year of Tiberius (A.D. 26), and continued in office ten years (Jos. *Ant.* XVIII. iv. 2).[§] The unusual length of time during which he and Gratus held office was, in accordance with the policy of Tiberius, based on the opinion that governors who had already enriched themselves, would be better for the people than new ones whose avarice was yet unsatisfied (Jos. *Ant.* XVIII. vi. 5). Tacitus (*Ann.* i. 80, iv. 6) also notices the long governorships under Tiberius. Pilate came therefore to Judæa contemporaneously with the appearance of John the Baptist, and his rule covered the period of Jesus' ministry and of the first establishment of Christianity in Judæa.

Pilate's administration was marked by events which show both the difficulties of his task and the small effort which he made to understand the Jews or accommodate himself to their prejudices. The first disturbance (Jos. *Ant.* XVIII. iii. 1, *BJ* II. ix. 2, 3) probably occurred soon after his entrance on office. To satisfy the Jews, the Romans had directed their soldiers not to carry to Jerus. upon their standards the usual image of the emperor; but Pilate sent the army to Jerus. to winter, and directed that the standards, with the images upon them, should be taken by night into the sacred city. This seemed to the Jews a direct violation of their religious laws. Forthwith multitudes hastened to Cæsarea to implore the governor to remove the images. For five days he refused to heed them, and on the sixth he admitted them to his presence, but suddenly ordered his soldiers to surround them, and threatened them with instant death if they persisted in their request. To his astonishment the Jews threw themselves on the ground, and declared that they would rather die than endure the violation of their laws. Pilate, of course, had not intended so great a massacre, and was forced to direct the removal of the images. Another disturbance arose from Pilate's use of the money contributed to the temple treasury, to build aqueducts to Jerusalem. It has been suggested that his real object was to provide water for an army besieging the city (cf. Müller, *Pont. Pil.* p. 16). At any rate the project aroused violent opposition, and when Pilate came to Jerus. the people clamoured against his design. On this occasion, however, he silenced the tumult by introducing disguised soldiers into the crowd, who, at a signal, drew their clubs and scattered the multitude (Jos. *Ant.* XVIII. iii. 2). The incident, referred to in Lk 13^1, of the 'Galilæans whose blood Pilate mingled with their sacrifices,' is not mentioned by other authorities. Doubtless Pilate ordered them to be slain in the outer court of the temple, perhaps on account of some riot, while they were celebrating one of the feasts. This appeared to some an unusual judgment of Providence upon these men; and the incident illustrates the disturbed state of the country, the frequent severity of Pilate's measures, and the odium in which the governor was held. The sedition in which Barabbas took part (Mk 15^7, Lk 23^{19}) is another example of the turbulent state of the community; while still another incident, characteristic of Pilate's rule, is described by Philo (*ad Gaium*, 38). Philo makes Agrippa relate to Caligula that Pilate once hung gilt shields in the palace of Herod in Jerus., on each of which was inscribed the name of the donor and of him in whose honour the shield was dedicated. But even this aroused the fury of the Jews. Their chief men, including four sons of Herod, besought him to remove the objects of offence; and, when he refused, they wrote to Tiberius, who ordered the procurator to take the shields to Cæsarea. Philo makes Agrippa describe Pilate as 'inflexible, merciless, and obstinate.' He says that the Jews' threat to communicate with Tiberius 'exasperated Pilate in the greatest possible degree, as he feared lest they might go on an embassy to the emperor, and might impeach him with respect to other particulars of his government — his corruptions, his acts of insolence, his rapine, and his habit of insulting people, his cruelty, and his continual murders of people untried and uncondemned, and his never-ending, gratuitous, and most grievous inhumanity.' This is doubtless a one-sided representation. In the Gospels Pilate manifests a strong desire to do justice, and he was not more arbitrary or cruel than many other Roman officials. But he also appears in the Gospels, as in Philo, passionate and fierce, uniting obstinacy with weakness, seeking his ends by unworthy devices, and restrained in his desire to do justice by dread both of his turbulent subjects and of the effect of an appeal from them to the emperor. All accounts agree in testifying to the hearty dislike which existed between him and the Jews.

Pilate's share in the trial of Jesus is related briefly in Mt and Mk, but somewhat more fully in Lk; while Jn records further details which explain and confirm the Synoptic accounts. The governor evidently had some previous knowledge of Jesus, as his wife also probably had (Mt 27^{19}). The Lord's ministry indeed had been mainly in Galilee, so that probably He had only within a short period before his arrest come under Pilate's notice. But it is incredible, in view of the interest lately aroused by Jesus in Judæa, and the necessary watchfulness of the government, that His presence had not been reported to the procurator; and at the trial it is expressly stated that Pilate 'knew that for envy they had delivered him unto him' (Mt 27^{18}). But when, early in the morning, the representatives of the Sanhedrin, which had already condemned Jesus to death for blasphemy, brought Him to Pilate for permission to have Him put to death, and refused to enter the governor's residence lest they should be defiled (Jn 18^{28}), Pilate went out[*] to them and demanded what charge they brought against the prisoner. They seem to have expected him to confirm their sentence without inquiry, a fact which illustrates the large authority conceded by the Romans to the native court. But Pilate refused to act without reasons. When they suddenly cried, 'If this man were not an evil-doer, we should not have delivered him up unto thee' (Jn 18^{30}), he contemptuously remarked, 'Take him yourselves, and judge him according to your law,' thus forcing them to admit that they could not secure their purpose except through him. His position fully warranted this haughty expression of authority; but he was probably actuated in this instance by the desire to do justice, or at least to prevent the injustice which they intended (Mt 27^{18}). The Jews therefore, being forced to present charges, and knowing the uselessness of bringing the charge of blasphemy, made three accusations, viz. perverting the nation, forbidding to give tribute to Cæsar, and claiming to be Christ, a king (Lk 23^{2}). The latter two, and perhaps the first, were matters with which the civil authority would naturally deal. Pilate therefore asked Jesus, 'Art thou the king of the Jews?' Jesus replied in the affirmative, but to the accusing cries of the Jews He was silent. The governor was impressed by His demeanour, though acknowledging so grave a charge, as that of no ordinary prisoner. So he led Jesus within the palace, and privately examined Him (Jn 18^{33-38}).[†] In this interview the disposition and character of Pilate specially appear. Jesus freely answered his questions, and explained the entirely unworldly nature of His kingdom. He dealt with the Roman throughout as with one not actuated by malice, but placed in circumstances where he could escape guilt only by courageously obeying the truth (cf. also Jn 19^{11}). For this, however, Pilate was not prepared. His ejaculation, 'What is truth?' (Jn 18^{38}) was the utterance of a worldly mind, entirely sceptical of the worth of real religious and moral principles. But he was convinced that Jesus was politically harmless, and ought not to be sacrificed to Jewish malice and fanaticism. So he resolved to save Him. Yet he was afraid peremptorily to release Him: a fear which is perfectly intelligible in view of the evident determination of the chief priests, the serious charges they had presented, the large tolerance always shown to Jewish prejudices, as well as of the suspicious character of Tiberius and the excellent grounds of complaint which the Jews already had against the governor. Therefore Pilate began the series of feeble devices, which the Synoptists record, to secure the release of Jesus by a popular verdict, or at least to free himself from participation in His death. He first brought Him forth, and declared that he found no fault in Him (Jn 18^{38}). But this unexpected announcement evoked from the priests and bystanders the cry, 'He stirreth up the people, teaching throughout all Judæa, and beginning from Galilee even unto this place' (Lk 23^{5}). Hearing that Jesus was from Galilee, and impressed by the fury of their desire, Pilate thought to rid himself of the case by transferring it to Herod Antipas, who was then in Jerusalem. He was the more willing to do this because the relations between him and Herod had been strained, and he desired to show his friendliness. But Herod, perhaps out of compliment to Pilate, refused to accept jurisdiction, only indicating by his mockery of Jesus his contempt for the prisoner's claims (Lk $23^{7\text{ff.}}$). Pilate thus found himself compelled to adjudicate. He again declared his conviction of the prisoner's innocence, and appealed to Herod's refusal to pass sentence in confirmation of his own judgment. He proposed therefore to please the Jews by chastising Jesus, but his own conscience by releasing Him (Lk $23^{14\text{ff.}}$). It was a weak compromise, and certain to satisfy no one. Meanwhile the multitude, doubtless increased by new arrivals, some of whom hardly understood the purpose of the assemblage, began to clamour (Mk 15^{8}) that Pilate should, according to his custom at the feast,[*] set free some notable prisoner. Knowing the popularity of Jesus, Pilate hoped through this custom to prevent the purpose of the chief priests, and asked if he should release Jesus. But he was foiled by the priests persuading the people to demand the release of a certain Barabbas, who was probably popular as a leader of sedition against the government (Mt 27^{20}). It was apparently at this point that Pilate, having taken his seat on the chair of judgment (see GABBATHA),[†] received the message from his wife,[‡] which doubtless added a superstitious feeling to the force of his conviction that Jesus ought to be released (Mt 27^{19}). But he had already yielded his true ground and could not recover it. When again he asked whom they would choose for release, they unitedly cried 'Barabbas.' When he next inquired what they wanted him to do with Jesus, the cry arose, at the instigation of the priests, 'Crucify him.' Shocked by their fierceness, the governor protested against so extreme a penalty. 'Why? What evil hath he done? I have found no cause of death in him. I will chastise and release him' (Lk 23^{22}). But they clamoured for crucifixion. Pilate appears to have been simply overborne by their fierceness and the threatening aspect of affairs. His fault was moral weakness. Yet the peculiar character of his government and the known tolerance of Rome toward Jewish prejudices make it quite intelligible that unwillingness to anger the Sanhedrin should outweigh with such a man the feeble sense of duty. His handwashing (Mt 27^{24}, cf. Dt 21^{6-8} though the act was a natural symbol) was but the weak device of a superficial mind, as he sought to

---

[*] The Germanic legends mention several towns as the birthplace of Pilate. One of the most widespread locates his birth in Mayence, as the illegitimate child of a king (variously styled Cyrus, Tyrus, and Atus), who sent him, because of a murder, to Rome, whence, because of another murder, he was sent to Pontus, from which place he derived his name. There he served the emperor by conquering the wild tribes of that region; whereupon Herod made him his co-regent, and was in turn overcome by him. See G. A. Müller, *Pont. Pil.* p. 48 ff.

[†] See Pauly's *RE* under 'Pontii.'

[‡] The case of Felix, who was a freedman, is remarked upon by Tacitus as if quite unusual.

[§] He must have been removed early in A.D. 36, since Vitellius, after sending Pilate to Rome, attended a passover in Jerus. (Jos. *Ant.* XVIII. iv. 3), and shortly after began the expedition against Aretas, king of the Nabatæans, which, however, was prevented (*Ant.* XVIII. vi. 4) by the news of Tiberius' death (early in A.D. 37). Pilate's appointment therefore is to be dated A.D. 26, since Josephus states that he ruled ten years.

---

[*] Being only a procurator, Pilate had no quæstor, and therefore conducted the trial himself.

[†] This narrative of John's is absolutely necessary to explain the Synoptic account of Pilate's conduct.

---

[*] The origin of this custom is unknown. Schürer (*HJP* I. ii. 60) states that it 'was grounded on a special authorization of the emperor, for the right of remitting a sentence was not otherwise given to the governors.' He cites Hirschfeld, *Sitzungsb. d. Berl. Akad.* 1889, p. 439; and Merkel, *Abhandl. aus d. Gebiete des. röm. Rechts*, 1 Heft, 1881. Friedlieb (*Archäol.* 110) thinks it was done at every feast, but St. John (18^{39}) limits it to the passover. Some suppose it was a Jewish custom retained by the Romans, and Pilate's language in Jn ('Ye have a custom,' etc.) seems to confirm this view. Others think it was of Roman origin, and connect it with Livy's statement (v.^{13}) that, at the feast of the gods called *Lectisternium*, prisoners were freed.

[†] The *βῆμα* (Mt 27^{19}), which had been put on 'a place called the Pavement, but, in the Hebrew, Gabbatha' (Jn 19^{13}). Those who identify Pilate's residence with the fortress Antonia suppose this place to have been the elevated, paved ground between the fortress and the temple (see PRÆTORIUM). Those who identify Pilate's residence with Herod's palace suppose the *βῆμα* to have been placed on a mosaic floor (*λιθόστρωτον*, 'spread with stones'), which was called in Aram. *Gabbatha* (גַּבְּתָא 'elevation') from the elevated position which it, with perhaps the *βῆμα* upon it, occupied. Cæsar (Suet. *Jul.* 46) is said to have carried a portable pavement on which to place his judgment-seat; and St. John's mention of the pavement with the *βῆμα* seems to imply that it had some connexion with the delivery of a judicial sentence, and gave formality to Pilate's final decision. See GABBATHA.

[‡] Originally magistrates were not allowed to take their wives to the provinces, but the rule had ceased to be observed, as is shown by the failure of an effort to enforce it mentioned by Tacitus (*Ann.* iii. 33, 34).

calm his conscience by throwing the guilt of the transaction upon others.

But, though Pilate yielded to their request, and delivered Jesus to his soldiers to be scourged preparatory to crucifixion, St. John's narrative (19^{1-16}) shows that the governor's conscience was not yet silenced. Once again he sought to satisfy the Jews by the spectacle of Jesus bleeding and mocked, declaring that even yet he had discovered in the prisoner, though under torture, no cause of death. When they still cried 'Crucify him,' Pilate became sullen and angry. In bitter satire, and as though about to dismiss the whole case, he bade them do the foul deed themselves. Then first they brought forward a religious charge, apparently feeling that now they needed only to work on the governor's sentiments and make him realize how serious the case appeared to them. 'We have a law, and according to our law he ought to die, because he made himself the Son of God.' But the words roused afresh Pilate's superstition. Again, and now with evident anxiety and fear (Jn 19^{8}), he privately examined Jesus, this time concerning His origin. The silence of Jesus to these inquiries further wrought on Pilate's mind, and, though he tried to induce Jesus to speak by boasting of his own power, he again made an effort to release Him. But the Jews, now fully realizing that they must conquer the impression which Jesus had made on Pilate by bringing to bear a stronger motive, taunted the governor with infidelity to the emperor in favouring a pretended king; and this appeal to Pilate's political ambitions proved decisive. He resolved to silence his convictions. Resuming his seat on the *Bema*, he satirically and sullenly presented Jesus to them as their king. Thereupon he had at least the grim satisfaction of hearing his turbulent subjects vigorously forswear their political freedom and profess their allegiance to the emperor (Jn 19^{15}). Then he finally delivered Jesus to crucifixion; but it was quite in keeping with Pilate's character and with the violence which he had done to his own convictions, that he obstinately refused to change the title on the cross, its very offensiveness to the Jews being a merit in his eyes (Jn 19^{22}).

Thus Pilate appears a typical specimen of a worldly man. The good in him was unsupported by moral principle, and overborne by personal and political considerations. Compelled to take the leading part in a transaction where high moral qualities were supremely demanded, he proved himself to be without them, and made a great crime possible by his feebleness of character. This is quite consistent with his bravado and recklessness on other occasions. Christ's judgment upon Pilate (Jn 19^{11}) is also the verdict of history.

Pilate's rule was brought to its close by an ill-judged attempt to suppress a harmless movement in Samaria (Jos. *Ant.* XVIII. iv. 1). A certain impostor summoned the Samaritans to Mount Gerizim by promising to show them the sacred vessels which Moses was alleged to have hidden there. They came armed, and collected in a village called Tirabatha. But Pilate fell upon them, and caused many, both then and subsequently, to be slain. Thereupon the Samaritans appealed for redress to Vitellius, the legate in Syria, pleading that no political sedition had been intended. Vitellius ordered Pilate to repair to Rome to answer the complaints against him; but before the procurator reached the capital, Tiberius had died. Thereafter Pilate disappears from authentic history. Traditions, however, concerning him existed in the Church, and finally took the shape of fantastic legends. Eusebius (*HE* ii. 7 and *Chron.*) relates, on the authority of certain unnamed earlier writers, that Pilate fell into such misfortunes under Caligula that he committed suicide; and later authorities repeat the statement. The Apocr. literature elaborated the story (see Tischendorf, *Evang. Apoc.*, Ante-Nicene Fathers, vol. viii.). According to one version ('*Παράδοσις Πιλάτου*'), Tiberius summoned Pilate to Rome to answer the charge of crucifying Christ. When, at the examination before the Senate, Tiberius uttered Christ's name, the statues of the gods fell to the ground; whereupon Tiberius ordered war to be made against the Jews, and Pilate to be beheaded. The latter, however, with his wife, died a penitent, and was assured by a voice from heaven of his forgiveness. According to another and probably later account (*Mors Pilati*), Pilate appeared before Tiberius in the Saviour's tunic, which protected him from the emperor's fury. When he was stripped of it, Tiberius condemned him to death, but Pilate killed himself. His body was cast into the Tiber, but the evil spirits so disturbed the waters that the Romans carried the body to Vienne and sank it in the Rhone.[*] Thence, for the same reason, it was removed to the territory of Losania (Lausanne), but was finally sunk in a pit surrounded by mountains. Thus the legend connected itself with the mountain opposite Lucerne (supposed to have been named originally *Pileatus*, because surmounted often by a hat-shaped cloud, but corrupted by connexion with the legend into *Pilatus*; see Ruskin, *Mod. Painters*, v. 128; Müller, *Pont. Pil.* pp. 52, 53) where the body of Pilate is said to lie in a lake on the mountain, and at times emerge and go through the motion of washing the hands. The legend exists in various forms, however (see Müller, *ib.*), and attached itself to several localities. In one of the later accounts Pilate is said to have been executed by Nero (see Schürer, *HJP* I. ii. 88 n.). The 'tendency' of the earlier legends was to represent the Roman Government in its treatment of Pilate as vindicating the Christians and Christ; while the disposition to represent Pilate as becoming himself a Christian[†] explains, perhaps, the belief of the Coptic Church that he died a saint and martyr.[‡]

Pilate's wife is said to have been named Claudia Procula or Procla. Christian tradition made her a proselyte to Judaism (*Gosp. of Nic.* 2). That she became a Christian is also a very old tradition (Orig. *Hom. on Mt.* 35). In the Gr. Church she became a saint, honoured on Oct. 27th. Some have even identified her with the Claudia of 2 Ti 4^{21}. Her dream may be assumed to indicate that she had heard of Jesus and His beneficent life and deeds.

That Pilate made a report to Tiberius concerning Jesus is affirmed by Justin (1 *Ap.* 35) and Tertullian (*Ap.* 21), as well as by later writers (*e.g.* Eus. *HE* ii. 2), and Apocr. literature. Some report from the governor to the emperor is probable; but it is doubtful if the early Fathers rested their appeal to it on any certain knowledge of its existence, or of its preservation in the archives. Certainly the extant *Acta Pilati* are spurious. Eusebius relates (*HE* ix. 5) that in the great persecution under Maximin, *Acts of Pilate* derogatory to Christ were forged and circulated by the pagans; but none of these have survived.

LITERATURE.—G. A. Müller, *Pontius Pilatus der fünfte Prokurator von Judäa* (Stuttgart, 1888), gives a table of earlier literature, enumerating 110 treatises and articles. The 17th

G. T. PURVES.

PILATE, ACTS OF.—See last paragraph of preceding art. and NICODEMUS (GOSPEL OF).

PILDASH (פִּלְדָּשׁ, *Φαλδάς*).—One of the sons of Nahor, Gn 22^{22} (J). The personal name פלדשו has been read in the Nabatæan inscriptions (*ZDMG* xiv. 440). The proposal of Knobel to connect *Pildash* with the Ῥιπάλθας of Procopius (*de Ædificiis*, ii. 4) is rejected by Dillmann.

PILHA (פִּלְחָא, B *Φαδαεὶς*, A *Φαλαεί*).—One of those who sealed the covenant, Neh 10^{24}.

PILL.—See PEEL.

PILLAR.—**1.** מַצֵּבָה, Arab. *nuṣub* or *nuṣb*, plur. *anṣâb*, from the Semitic root נצב, meaning 'to set upright.' **2.** נְצִיב, from the same root, employed in Gn 19^{26} to describe the pillar of salt into which Lot's wife was transformed. **3.** עַמּוּד, rendered in Greek by *στήλη* (also employed by LXX in Gn 19^{26}). This Hebrew word occurs in Jer 27^{19} in the sense of 'column,' which is probably its only signification, whereas מַצֵּבָה means any upright stone. More frequently עַמּוּד is rendered by the Greek *στύλος* (Ex 13^{21}, Jg 20^{40}, Job 27^{11}), or by the word *κίων*, Jg $16^{25.26}$. **4.** חַמָּן (used in plur.), pillar dedicated to sun-worship. Cf. the Carthaginian בעל חמן, Baethgen, *Beiträge zur sem. Rel.* p. 25 ff. (cf. חַמָּה 'sunglow' = sun in Job 30^{28}). On ָן see Gesen.^{26} § 85 n. The plur. occurs in Ezk $6^{4.6}$, Is 17^8 27^9, Lv 26^{30}, 2 Ch $14^{4.7}$. It may have been a later equivalent of מַצֵּבָה (so Kittel). LXX did not understand the term, variously rendering by *ξύλινα χειροποίητα*, *τεμένη*, *βδελύγματα*, and *εἴδωλα*.

The term מַצֵּבָה is nearly always used in association with religious cultus,[*] and signifies the upright stone which, in the pre-exilian and pre-Deuteronomic worship of Israel, was the never failing accompaniment of the Heb. sanctuary or *bāmāh*. It consisted of rough unhewn stone, and was the symbol of the Divine presence or *numen*, which was considered in some sense to reside in or be attached to it (see Jos $24^{26.27}$). Upon it the blood of the sacrificed victim or the oil of the vegetable offering was poured or smeared (cf. Gn 28^{18}).

There is clear evidence that in the primitive sanctuary of the early Semites the upright stone served as altar and Divine symbol in one; but in the later and more developed form of the cultus, both among Semites and other races, the altar and stone-symbol came to be separated the one from the other. This probably arose from the fact that it was found convenient to have a separate place for the reception and slaughter of the victim, and to this another motive came to be superadded in connexion with the larger and more important sanctuaries, viz. the need of having an erection which should be *conspicuous* to a large concourse of beholders who witnessed in silence the solemn act of slaughter. The further need to provide for the reception and disposal of the blood gave rise to special arrangements in this particular apparatus of worship. That the distinction between altar and stone-symbol arose very early in the history of primitive Israel is clearly revealed by the facts of language, since it is quite evident that מִזְבֵּחַ 'altar' or place of slaughter, belongs to early as well as late Hebrew. These views are established by archæological evidence. Primitive dolmens have been discovered provided with hollows formed for drink-offerings, and intended to serve as altars. Stones were also used by the ancient Palestinian inhabitants for the worship of ancestral manes as well as to mark the place of burial. See Nowack in *Heb. Archäol.* i. p. 92, who cites from the researches of Noetling and Schumacher in *ZDPV* ix. 268, and *Zeitsch. für Ethnol.* xix. 37 ff.; and Conder, *Heth and Moab*, pp. 238, 266 ff. The Rev. James Sibree has informed the present writer that many similar stones have been found in Madagascar.

Much obscurity hangs over the origin of the unhewn stone representation of deity. It has been generally held that that origin is to be found in the primitive fetish worship of which many illustrations have been collected by Prof. Tylor[*] and other writers from Africa, India, and ancient Hellas. Theophrastus (4th cent. B.C.) describes the superstitious Greek as passing the anointed stones in the street, taking out his oil-phial and pouring its contents on them, and then, after falling on his knees to worship, going on his way (*Char.* xvi.). Survivals of stone-worship were to be found even in quite recent times among the remote mountain peasants of Norway (Tylor, *ib.* p. 167). Accordingly the employment of the stone-symbol among the primitive Semites may be regarded as part of a well-nigh universal tradition of antiquity. In ancient Arabic polytheism we find the stone *nuṣb* or the group of *anṣâb*. The blood of the sacrificial victim was smeared upon the stone. The idea involved in this act was evidently, as Robertson Smith suggests, that of bringing 'the offering into direct contact with the deity, and in like manner the practice of stroking the sacred stone (*e.g.* that of the Kaaba) with the hand is identical with the practice of touching or stroking the garments or beard of a man in acts of supplication before him.'

---

[*] The exception Is 6^{13} is far from certain. The last clause of the verse is omitted in LXX BA* though supplied in Luc. text and by a later hand in A. The preceding relative clause, with its ἅπ. λεγ. שלכת and the unique use of מצבת, appears to the present writer to have been mutilated at some early date.

[*] *Primitive Culture*, vol. ii. p. 161 ff. It is by no means easy to define the meaning of 'fetish.' Usually it is explained as meaning the material thing, as a stone, which is made the object of worship. Others deny this, treating the fetish as a magical 'medium whereby one is placed in closer connexion with the deity, and in which divine powers reside.' See Chantepie de la Saussaye, *Lehrbuch der Religionsgesch.*² i. p. 14. This writer remarks with much truth that it is not any or every object of sense-perception to which the term can be applied, 'but only the individual, one might say, accidental object which attracts the attention of the savage.' There is no essential distinction between the fetish and the idol. The distinction is merely one of external form. The former is a rude natural object accidentally found, the latter is carved or painted by human hands. In both cases the spirit, which is the object of worship and whose help is sought, is supposed to be in some way incorporate in the material. Siebeck, *Lehrbuch der Religionsphilosophie*, p. 64, contrasts this view with the more advanced conception which regards the idol as the *symbol* and not the seat of deity. It may here be remarked, in order to prevent misunderstanding, that the expression 'stone-symbol' is not used in this exclusive sense in this article. The stone among the early Semites *not only represented but incorporated* the *numen* of the deity. See Robertson Smith, *RS*² p. 204 ff.

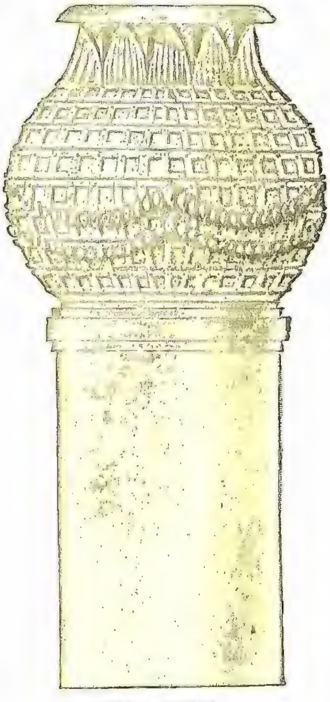
The stone might represent a male or female deity, but it must not be inferred that the plurality of stones represented always a plurality of deities. Probably it represented as a rule a single object of worship, just as the twelve stones erected by Joshua at Gilgal (Jos 4^{20}), and the same number by Moses (on the occasion of the covenant sacrifice at Sinai, Ex 24^{4}), for the twelve tribes of Israel, represented the one God, Jehovah. According to Wellhausen (*Reste arab. Heid.*^{2} p. 102) it was customary in oaths to swear 'by the *anṣâb* which stand around such and such a god.' In an interesting passage in which Herodotus describes the mode in which the ancient Arabs ratify a solemn covenant (iii. 8), he speaks of seven stones on which the sacrificial blood was smeared in honour of Dionysus and the heavenly (goddess), probably meaning the sun and moon (so Abicht). In the interesting narrative of Nilus quoted by Robertson Smith (*RS*^{2} p. 338), the camel chosen as a victim is bound upon a rude altar of stones piled together. Probably this may be regarded as the most primitive type of Arabian or Semitic sacrifice.

The sacred stone (or stones) was not conveyed by the nomadic clan from place to place in its wanderings, like an ark or some movable *simulacrum*, but remained stationary, since the stone may be considered to have focussed the presence and personal power of the deity that owned and occupied the *Temenos*, *Ḳodesh* (or *Ḥaram*), as the hallowed spot was named by Greek or Semite respectively. Such a spot was frequently one of special fertility accompanied by a sacred spring and tree. Frequently the *maẓẓēbā* consisted of a large natural upright rock of irregular shape. The two pillars of Heracles (the Greek equivalent of Baal) consisted probably of enormous cliff-like rocks situated by the Straits of Gibraltar. Numerous examples of such natural blocks of stone *in situ* are given in *RS*^{2} p. 110 (see especially the footnote). Among these is the notable stone-symbol of the goddess *al Lât* (see *Kinship and Marriage*, p. 292 ff.). Doughty gives a description of his visit to *eṭ-Ṭâif*, where he saw this and two other sacred stones (*Arabia Deserta*, ii. p. 515 ff.). The interesting fact that goddesses were also worshipped under these stone-symbols clearly proves that Movers is wrong in ascribing to them a phallic origin and character.[*] They can only be explained as one of the many forms of fetishism out of which polytheistic cultus grew.

Any stone of this character would mark a *Bêth-el*. Hence such stones came to be called by the Greeks βαίτυλοι or βαιτύλια.[†] In Is 57^{6} we have an interesting reference to the wide prevalence of this worship of sacred stones, on which drink-offerings were poured and to which meal-offerings were offered. In the wâdis, the winter-torrents made these boulders smooth and round. See Cheyne's note, *ad loc.*, in *SBOT*.

It was not at every spot that such sacred pillars were erected. There must be a special manifestation of the Divine presence in order to render the worship valid, because the place had thus become invested with special sanctity. Not simply fertile oases with trees and flowing spring coming from the depths of the soil, but also special events, as battles, signal deliverances and visions, were tokens of God's presence. Thus after the battle of Michmash, Saul ordered a great stone to be rolled (1 S 14^{33}) which served as an altar (v.^{35}); Bethel, according to JE, became a consecrated spot through the vision of Jacob, who in consequence set up the stone pillar and poured oil upon it (Gn 28^{18}).

These passages sufficiently illustrate the primitive character of the pre-exilian Hebrew *maẓẓēbā* which formed the indispensable accompaniment of every sanctuary (Hos 3^{4}). The early pre-exilian code of legislation preserved in Ex 20^{25} sought to keep intact the stone's primitive condition. It was to remain unhewn and no iron instrument was to desecrate it, either because the stone itself was sacrosanct like the sacred enclosure in which it stood, or perhaps, as Nowack suggests (*Heb. Archäol.* ii. p. 17), because the profaning hand of man drove the *numen* out of the stone. If we are to believe the statement of the Mishna tract *Middoth* (iii. 1), the altar of burnt-offering in Herod's temple was formed of unhewn stones. Throughout the earlier portion of OT narrative we constantly meet with allusions to the stone pillars of the local sanctuaries, *e.g.* Shechem (Jos 24^{26}), Ramoth-gilead (Gn 31^{45}), Gilgal (Jos 4^{5}), Mizpeh (1 S 7^{12}), Gibeon (2 S 20^{8}), En-rogel (1 K 1^{9}). Sometimes the stone gave the name to the spot, as Eben-'ezer (1 S 7^{12}, cf. 4^{1}). Here again, as in the case of 1 S 14^{33} (already mentioned), the erection of the stone at a particular spot follows the manifestation of Divine power in His people's signal victory. That the rough stone (*maẓẓēbā*), as the symbol of Jehovah, differed in no respect from that which was erected to represent Baal, is quite certain. Baal worship and Jehovah worship at the local *bāmôth* were inextricably blended in the pre-Deuteronomic period, as the oracles of Hosea clearly testify (Hos 2^{16} the genuineness of which Wellhausen and Nowack unnecessarily surrender). The *maẓẓēbôth* of Baal were destroyed in Samaria by the reforming zeal of Jehu (2 K $10^{26.\,27}$).



BRAZEN PILLAR.

Whether there is any reference to the stone-symbol in the designation of Jehovah by the name 'rock' in many poetical passages in the OT (Ps

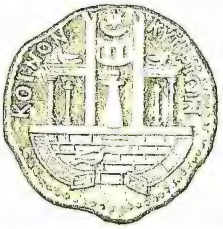
---

[*] Comp. *RS*^{2}, p. 456 ff. (additional Note D).

[†] On these *bêtyls* as wonder-working stones endowed with magic powers, see Pietschmann, *Gesch. der Phönizier*, p. 206, and François Lenormant, *Revue de l'histoire des religions*, iii. 31–53.

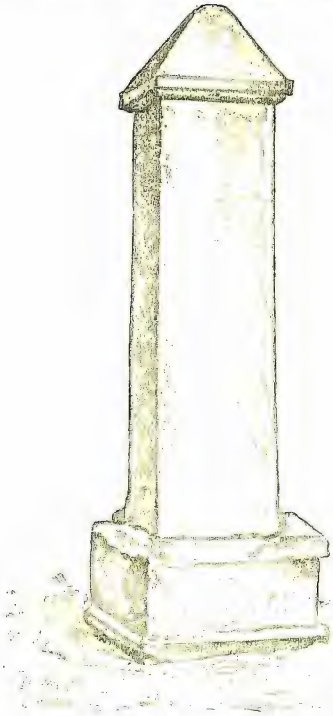
18^{32}, 1 S 2^2, Dt $32^{4ff.}$, Is 30^{29}), it is not easy to determine. The name for rock here is צור, which also enters into proper names which have their parallels in Assyrian (Schrader, *COT* ii. p. 326). The balance of evidence is on the whole against this attractive supposition. In the first place, the occurrence of such names in Hebrew is late (Buchanan Gray observes that they occur only in P and never in JE or Judges[*]). In the second place, צור is not the term associated with the sacred symbol by the Hebrews, but אֶבֶן ; but אֶבֶן is never employed in personal proper names. Probably, therefore, we should regard the use of צור in the personal names and in the poetical passages as figurative only, Jehovah being regarded as a safe and strong place of refuge (Ps 27^5 61^3), or as affording shadow from oppressive heat, cf. Is 32^2. See, further, art. Rock.

In Phœnician cultus we frequently notice the presence of *twin pillars.* Thus we find twin pillars erected in Solomon's temple[†] by Hiram the Tyrian artificer (1 K 7^{15-21}). Similar twin pillars are exhibited on coins which portray the temple at Paphos, and also they represented the deity Melkarth at Tyre. The latter are specially described by Herodotus (ii. 44), who paid a personal visit of inspection to this famous Tyrian shrine of Hercules (Melkarth). According to Herodotus, this temple was sumptuously wrought and furnished. One of the pillars was of refined gold, and the other of emerald (or more probably, as Abicht suggests, of green glass), the latter emitting a bright light at night-time, perhaps for the mariners at sea. To the same category belong the bronze pillars of the temple of Hercules at Gades (גָּדֵר), another Phœnician settlement, described by Strabo.



TWIN PILLARS IN TEMPLE OF APHRODITE AT PAPHOS.

Respecting Phœnician stones, sometimes called נציב, see Pietschmann's *Gesch. der Phönizier*, pp. 204–213. Among the varied forms of these Phœnician *stelæ*, some of which were worked into a square shape tapering at the top (see illustration below), special mention should be made of the *votive stelæ*, erected by individuals as the result of a vow to the deity in order to secure some desired object. Many of them have no inscription. Others bear a legend which would nearly always be somewhat of the following character: 'To the Rabbat, the Tanit-P'nê-Ba'al and the Adon, the Baal-Ḥammon, as N.N. son of N.N. has vowed, since they have heard his voice; may they bless him.' It is possible that this may have been the real character of the memorial stone erected by Absalom (2 S 18^{18}, 'Now Absalom in his life time had reared up for himself the *mazzébeth* which is in the king's dale; for he said, I have no son to keep my name in remembrance; and he called the *mazzébeth* after his own name, and it is called Absalom's monument (יָד) unto this day'). It may have been rather a votive stone than merely memorial, erected in anticipation of his attempt to seize the throne. There is no necessity, with Löhr, to suppose that this *mazzēbā* was originally the mark of an old Canaanite sanctuary, and that its significance as a Divine symbol has been transformed into something else by the writer; see Smend, *Alttest. Religionsgesch.*^{2} p. 132 and footnote.



PHŒNICIAN MAZZEBAH.

The erection of the *mazzēbā* as a stone-symbol was forbidden in the Deuteronomic code (Dt 16^{22}, 'Neither shalt thou set thee up a *mazzēbā*, which the Lord thy God hateth'), which belongs to about the year B.C. 621 in Josiah's reign. Hereafter it became illegitimate. The reference to the pillar to Jehovah at the border of Egypt in Is 19^{19}, 'there shall be a *mazzēbā* at the border [of Egypt] to the Lord,' must be regarded as pre-exilian and pre-Deuteronomic, though it is probable that the chapter in which it occurs has been affected by later influences. See art. Altar.

Literature.—Besides the literature referred to, consult Wellhausen, *Reste ar. Heid.*^{2} pp. 101, 141; Dillmann on Gn 28^{18}, Dt 16^{21}; Driver on Dt 16^{21}; Smith on 1 S 6^{14}; Conder, *Syrian Stone Lore*, new ed. 1896, p. 86.

Owen C. Whitehouse.

PILLAR, PLAIN OF THE.—In Jg 9^6 we read that the men of Shechem and all the house of Millo made Abimelech king 'by the plain (AV; RV 'oak,' RVm 'terebinth') of the pillar that was in Shechem' (עִם־אֵלוֹן מֻצָּב אֲשֶׁר בִּשְׁכֶם ; LXX B *πρὸς τῇ βαλάνῳ τῇ εὑρετῇ τῆς στάσεως τῆς ἐν Σικίμοις* [A om. *τῇ εὑρετῇ* and the second *τῆς*]; Aq. *ἐπὶ πεδίου στηλώματος*; Vulg. *juxta quercum quæ stabat in Sichem*). The correct rendering is undoubtedly 'the terebinth of the pillar' (see Oak No. 3 and Plain No. 2), although it is doubtful whether this can be obtained from the MT מֻצָּב. The latter word is held by some (*e.g.* Studer) to be a noun synonymous with מַצֵּבָה; but even so the absence of the article has to be accounted for. It is possible that, inserting the article, and punctuating differently, we should read הַמְּצָב (cf. 1 S 13^{23} $14^{1ff.}$, 2 S 23^{14}); but, upon the whole, the best course appears to be to emend, with Moore (followed by Budde), to הַמַּצֵּבָה 'the *mazzēbā* terebinth.' Abimelech, as Moore appositely points out, was thus acclaimed at the sanctuary of Shechem, as Saul was at that of Gilgal (1 S 11^{15}). The name was in all probability purposely obscured by the Massoretic reading and punctuation מֻצָּב. The *mazzēbā* mentioned in Jg 9^{6} is perhaps the same as is called in Jos 24^{26} 'a great stone' (אֶבֶן גְּדוֹלָה).

[†] On the difficulties of the text of 1 K 7^{15-22} dealing with the two pillars in the portico of Solomon's temple, Jachin and Boaz, see Klostermann, Kittel (cf. Jer 52^{21-23}), and Benzinger, *ad loc.* The last is especially useful on the archæological details and religious significance. See also the figured representations in his *Commentary*, p. 44, and in his *Heb. Archäol.* pp. 245, 249 f. The Babylonian parallels to the names of the two pillars may be found in Schrader, *COT* i. p. 174.

J. A. SELBIE.

PILLOW.—**1.** כְּבִיר 1 S $19^{13.\ 16}$ [only]. Michal, according to AV and RV, put a pillow of goats' hair at the head of the teraphim which she had laid in David's bed. The LXX (ἧπαρ) reads כְּבִיר as כְּבַד (constr. of כָּבֵד 'liver'); and this is adopted by Jos. (*Ant.* VI. xi. 4), who describes, somewhat fancifully, how the palpitation of the goat's liver under the bed-clothes conveyed to Saul's messengers the impression that David was gasping for breath. The root כבר, from which כְּבִיר is derived, probably means to 'intertwine *or* net,' so that כְּבִיר הָעִזִּים would signify something woven or netted from goats' hair. Hence one or other of the two renderings proposed in RVm ('quilt *or* network') should probably be adopted in preference to the text. A number of commentators (*e.g.* Sebastian Schmidt, Ewald, Keil) think the reference is to a mosquito-net (κωνωπεῖον) spread over the face of a person sleeping. But, as Driver points out, in Jth 10^{21} 13^{9}, where this Greek term is used of the CANOPY (wh. see) of Holofernes' bed, the κωνωπεῖον is fixed upon the στύλοι or bedposts. In favour of the rendering 'quilt' we have the employment of a cognate Heb. term מַכְבֵּר in 2 K 8^{15} for the coverlet which Hazael used to smother Benhadad. But it must be confessed that the description of Michal's action in 1 S 19^{13} is not clear enough to determine the sense of כְּבִיר. The following term מְרַאֲשֹׁתָיו (AV 'for his bolster,' RV 'at the head thereof') does not define the position in which the כְּבִיר was placed with reference to the head, whether over, or under, or around it; it simply implies proximity (see, further, Driver, Löhr, and H. P. Smith, *ad loc.*). **2.** It is this word מְרַאֲשׁוֹת which is rendered by AV 'pillow' in Gn $28^{11.\ 18}$, but RV gives more correctly 'under his head' (LXX πρὸς κεφαλῆς αὐτοῦ). The other occurrences of the Heb. expression in the same sense are 1 S $26^{7.\ 11.\ 16}$, in all of which AV has 'at his bolster,' RV 'at his head' (in v.^{12} read מִמְּרַאֲשֹׁתָיו for מְרַאֲשֹׁתֵי שָׁאוּל; AV 'from Saul's bolster,' RV 'from Saul's head'; LXX ἀπὸ πρὸς κεφαλῆς αὐτοῦ); 1 K 19^{6}, where both AV and RV render מְרַאֲשֹׁתָיו by 'at his (Elijah's) head' (AVm 'bolster'; LXX πρὸς κεφαλῆς αὐτοῦ). **3.** כְּסָתוֹת (LXX προσκεφάλαια) Ezk 13^{18} (AV, RV 'pillows'). The meaning appears to be 'fillets' or 'bands,' used as amulets or charms, for instance in the process of divination. See art. KERCHIEF, also PHYLACTERIES, p. 872^{b}, and cf. the Comm. of Davidson or Bertholet, *ad loc.* **4.** προσκεφάλαιον. 'Pillow' is the correct tr. of this word in 1 Es 3^{8}, where we are told that the three pages of Darius each wrote his sentence, sealed it up, and put it under the king's pillow. The only other Biblical occurrence of this Gr. term (in addition to the LXX of Ezk $13^{18.\ 20}$ above) is Mk 4^{38}, where we read that Jesus was in the stern asleep 'on a pillow' (so AV, but RV 'on the cushion,' Gr. ἐπὶ τὸ προσκεφάλαιον). The reference appears to be to the cushion used by rowers (Cratin. *Hor.* 18, Hermipp. *Strat.* v.); see the Comm. *ad loc.*

J. A. SELBIE.

PILTAI (פִּלְטָי, B om., A Φελητεί).—The head of the priestly house of Moadiah in the time of Joiakim, Neh 12^{17}. It is possible that we should emend to פַּלְטִי, *Palti*; cf. Nu 13^{9}, 1 S 25^{44}, 2 S 23^{26}.

PIN.—Jg $4^{21.\ 22}$ RV for AV 'nail.' The Heb. is יָתֵד (LXX πάσσαλος). In 5^{26}, by an unaccountable inconsistency, RV retains 'nail,' although the Heb. is the same, and relegates 'tent-pin' to the margin. On the other uses of the word יָתֵד see art. PADDLE. The tent-pins, to which the ropes of the tent were fastened (Is 33^{20}), were not of metal but of wood, as among the Bedawîn at the present day (see Moore, *ad loc.*). For the question whether the description of Jael's action in $4^{21.\ 22}$ is not due to a prosaic misunderstanding of 5^{26} (Wellh. *Comp.* p. 222; W. R. Smith, *OTJC*^{2} p. 132; Stade, *GVI*^{2} i. p. 178 n.), see artt. JAEL and SISERA.

PINE TREE.—The tr^{n} in AV of two Heb. expressions—**1.** עֵץ־שֶׁמֶן *'ēẓ-shemen* (Neh 8^{15}), RV 'wild olive.' We incline to the rendering 'fatwood trees' for this expression in this and the other passages in which it occurs. This would include all the resinous trees of Palestine and Syria, especially the pines. See OIL TREE.

2. תִּדְהָר *tidhhār* (Is 41^{19} 60^{13} RVm 'plane'). There is nothing in the etymology to indicate the tree intended. *Dardâr* in the Arab., which is used for both the elm and the ash, is cited by the *Oxf. Heb. Lex.*; but this is from a different root, *dărdăr*, not *dăhăr*, and really sheds no light on the question. Theodotion (Q^{mg}) transliterated תדהר by θαδδάρ, while Symmachus rendered it πτελαίαν, *i.e.* πτελέαν, 'elm.' In the LXX there are five trees named where there are three in MT; possibly two of the names are doublets. The reading of RVm (and Cheyne) 'plane' does not seem to have any foundation. The same is true of Gesenius' rendering 'oak.' This he obtains from the radical signification of *dahr* (Arab.) = 'age' or 'duration'; but the Heb. [דָּהַר] *dāhar*, has not, so far as we know, any such meaning. Perhaps the best refuge for our ignorance would be a textual or marginal transliteration *tidhhār*, as suggested in the case of *tĕ'ashshûr* in the same passage (see BOX TREE), and *'algummîm* (see ALGUM).

G. E. POST.

PINNACLE (πτερύγιον, diminutive of πτέρυξ, 'wing'; so lit. 'little wing'; Vulg. *pinnaculum* and *pinna* respectively in Mt 4^{5} and Lk 4^{9}, the only two places where the Gr. word occurs in NT).—That part of the temple enclosure (τὸ ἱερόν, not ὁ ναός) to which the devil took our Lord for the purpose of tempting Him.

πτερύγιον is used in the LXX to translate the following Heb. words:—**1.** כָּנָף *kānāph*, wing or border, as of a garment, Nu 15^{38}, 1 S 15^{27} 24^{4}. **2.** סְנַפִּיר *ṣĕnappîr*, fin of a fish, Lv 11^{9}. Aristotle in περὶ ψυχῆς, i. 5. 14, has the word in this sense. **3.** קָצָה *ḳāẓāh*, Ex 28^{26} (AV 'border,' RV 'edge' of breastplate).

In NT it stands for some part of the roof of the sanctuary or of the temple proper, perhaps the S.E. corner, from which the widest and most impressive view was obtained. The part meant was well known, as the use of the article τὸ (πτερύγιον) shows, but the word is used in this connexion only, and we have no means of definitely fixing its connotation. Opinions, which differ widely, may be arranged in two main classes.

(*a*) Those which make the pinnacle a part of the sanctuary or temple proper (ὁ ναός). Meyer (on Mt 4^{5}) argues that the use of τοῦ ἱεροῦ, not τοῦ ναοῦ, shows that the temple proper cannot be meant; but he forgets in this criticism that ἱερόν is a general word which embraces the sanctuary and also the adjoining buildings; it therefore covers ναός, though it includes more. It has this more extensive meaning in Mt 12^{6} 24^{1}, Mk 13^{3}, Lk 21^{5} 22^{52}, though in some other passages it seems to denote the buildings around, to the exclusion of the temple proper, as in Mt $21^{12.14}$ 26^{55}, Mk 14^{49}, Lk 19^{47} 21^{37} 22^{53} 24^{53} etc. In Mt 4^{5} and Lk 4^{9} it may be used in the broad or in the narrow sense—the word itself proves nothing. The sense here must accordingly be ascertained from the context, or the probabilities of the case. Those who seek the pinnacle somewhere in the sanctuary differ as to its exact situation. (1) Luther, Beza, and Grotius place it on the parapet surrounding the roof; such a fence had by law (Dt 22^{8}) to be placed on the roof of all buildings, to prevent accident by falling. (2) The ridge or the highest point of the roof, say Fritzsche and Winer. (3) According to Paulus, it is the gable or pediment of the roof, and it gets its name from its shape ⋀. (4) Krebs, Keim, and generally the older expositors identify the so-called pinnacle with the roof. (5) Lightfoot (*Hor. Heb.* on Mt 4^{5}) holds that the summit of the אוּלָם (*'ulām*) or porch, which extended on both sides of the sanctuary on the east, is what we are to understand. This porch was, he says, like a wing of the temple, and the top of it was like its wing.

(*b*) Others hold that a part of some out-building is what is meant. Here again, as before, there are differences as to the details. (1) Wetstein and Michaelis think that Solomon's porch on the east of the temple (see Jos. *Ant.* XXI. ix. 7) is what is meant. (2) The Στοὰ βασιλική on the south side of the temple area (see Jos. *Ant.* XV. xi. 9) is what B.-Crusius, Arnoldi, and Meyer take the word to stand for. From this portico, according to the account of Josephus (see above), the view below is a deep and giddy one. This is the opinion to which Lightfoot is most inclined next to his own.

When, however, we remember that the sanctuary was on the highest of a series of terraces, so that its roof would command valleys and mountains around Jerus., and even beyond Jordan, it is much more natural and impressive to make the sanctuary roof the scene of this temptation. Meyer objects that, on account of its being covered with pointed spikes, put there to keep the birds away, Christ could not have been placed there; but the priests are known to have ascended to this roof (*Middoth*, ch. 4; *Tannith*, Talm. Bab. fol. 29).

T. W. DAVIES.

PINON (פִּינֹן).—An Edomite 'duke,' Gn 36^{41} (A Φινές, *D* Φεινών, E Φινών)=1 Ch 1^{52} (B Φεινών, A Φινών). It is the same name which appears in Nu 33^{42} as **Punon** (פּוּנֹן), one of the stations of the Israelites. See PUNON.

PIPE, in the sense of a tube, occurs in AV and RV of Zec 4^{2} (מוּצָקוֹת), and in AV (RV has 'spouts') of v.^{12} (צַנְתְּרוֹת) in connexion with the golden candlestick which the prophet saw in a vision, and which had a bowl at the top filled with oil for supplying its seven lamps by means of *pipes* leading to them. For 'pipe' in the sense of a musical instrument see MUSIC.

J. WORTABET.

PIRAM (פִּרְאָם 'wild ass'?).—The king of Jarmuth who joined other four kings against Gibeon, but was defeated by Joshua at Beth-horon and afterwards put to death at Makkedah along with his allies (Jos $10^{3ff.}$). According to Hommel (*Anc. Heb. Trad.* 223 n.), *Pir'am* is identical with *Pir'u*, the name of an Arabian king in the time of Sargon. Sayce (*EHH* 225 n.) compares the Egyp. *Pi-Romi.*

PIRATHON, PIRATHONITE (פִּרְעָתֹנִי, ὁ Φαραθωνείτης, Luc. Ἐφρααθωνίτης), Jg $12^{13.15}$.—Abdon, a minor judge, was a Pirathonite, *i.e.* a native of Pirathon 'in the land of Ephraim, in the hill-country of the Amalekites,' a district either anciently held by the Amalekites, or seized by them on one of their invasions from the south. Benaiah, one of David's mighty men, belonged to the same town, 2 S 23^{30}, 1 Ch 11^{31} ὁ Φαραθωνεί, 27^{14} ὁ ἐκ Φαραθών. It is generally identified with *Fer'ata*, 6 miles S.W. of Samaria (a site also proposed for Ophrah); some prefer *Fer'on*, due W. of Samaria. Smith suggests that Pirathon was a fortress at the head of the Wady Far'ah, *HGHL* 355, cf. 350 f.; Moore is inclined to look for it in Benjamin, as Abdon is a Benjamite family in 1 Ch $8^{23.30}$ 9^{36}. Pirathon was one of the places fortified by Bacchides, 1 Mac 9^{50} καὶ τὴν Θαμνάθα Φαραθών. It appears that καὶ τήν has fallen out of the text before Φ. here. The other fortresses in this verse are all ἐν τῇ Ἰουδαίᾳ, so that Φ. can hardly be the same as Pirathon above; unless the author made the mistake of introducing a Samaritan town into his list of Judæan forts. See also Jos. *Ant.* XIII. i. 3.

G. A. COOKE.

PISGAH.—This word (which always has the def. art. הַפִּסְגָּה) is not found by itself, but in the expressions רֹאשׁ הַפִּסְגָּה and אַשְׁדֹּת הַפִּסְגָּה. The first of these occurs in four passages, two of which refer to Moses (Dt 3^{27} 34^{1}). In art. NEBO (MOUNT) it is pointed out that 'the top (head) of Pisgah' and 'Mt. Nebo' are alternative designations (in D and P respectively) of the same spot, and the situation is described. The two other passages are Nu 21^{20} 23^{14}. In Nu 21^{20} a station in the journeyings of the children of Israel is described as 'the top of Pisgah which looketh down upon the desert' (AV 'toward Jeshimon,' cf. RVm); and according to Nu 23^{14} Balak brought Balaam, after sacrificing on the high places of Baal, or at Bamoth-baal (22^{41}), 'into the field of Zophim, to the top of Pisgah.'

The second expression is found Dt 3^{17} 4^{49}, Jos 12^{3} 13^{20}. RV renders 'slopes of Pisgah,' with 'springs' in the margin; AV has 'Ashdoth-pisgah,' except in Dt 4^{49}, where it has 'the springs of Pisgah.' In Jos 10^{40} 12^{8} הָאֲשֵׁדוֹת occurs by itself, and is rendered RV 'slopes,' AV 'springs'; and אֶשֶׁד is the first word of Nu 21^{15}—RV 'slope of the valleys,' AV 'stream of the brooks.' From these versions it will be seen that the unusual word from the root אשד has been variously interpreted. In Aramaic אשד means 'to pour' [it is the Targ. rendering of שפך in MT], and hence אֶשֶׁד and אֲשֵׁדוֹת are interpreted as places where water is poured down, *i.e.* the sloping sides of hills, or as pourings forth, *i.e.* streams or springs.

The AV, in treating it as a proper name, follows the LXX, which renders uniformly Ἀσηδώθ (Μηδώθ is a variant in B of Jos 12^{8} and A of 13^{20}). The hesitation of AV is like that of the Vulgate, which renders *radices montis Phasga* in Dt, and *Asedoth* in Joshua. The *Onomasticon* takes it as the name of a city in the tribe of Reuben, and adds 'adpellatur autem addito cognomento Asedoth Fasga, quod in lingua nostra resonat abscisum.' (Cf. Eus. [Lag. 206]: λέγεται δὲ Ἀσηδὼθ Φασγὼ ὅ ἐστι λαξευτή.) It also asserts (*s.v.* 'Abarim') that a district was still called Φασγώ, Fasga (*Onom.* Lag. ed. pp. 124, 125, 237). No trace of such a district has been found on the eastern side of the Dead Sea, but a very similar name is applied to a promontory on the western shore (*Ras Feshkah*); and in its neighbourhood is the Neby Musa of Moslem tradition.

The renderings of LXX for Pisgah call for some comment. In the second group (those containing *'Ashdôth-happisgāh*) we find Φασγά or Φασχά three times, and τὴν λαξευτήν in Dt 4^{49}. In the first group (those containing 'top of Pisgah') we find Φασγά once (Dt 34^{1}), but Nu 21^{20} τοῦ λελαξευμένου, and Nu 23^{14}, Dt 3^{27} (both B) Λελαξευμένου.

The root פסג occurs only once in the Massoretic text of OT (Ps 48^{14}) in Targ. Jerus. as a verb 'to divide' (MT בתר and the ἅπ. λεγ. בתר of Gn 15^{10}), and פסגא denotes 'a portion.' The word λαξεύω (which is used of hewing and dressing stone) is the LXX rendering of the MT פסל in the command to hew the second tables of stone (Ex 34$^{1.4}$, Dt 10). In the *Onomasticon* it is regarded as a translation of Pisgah, and the '*abscisum*' of Jerome (see the passages given above) seems to indicate a mountain with precipitous sides. Pisgah as seen from the heights of the Moabite plateau would not suggest the idea of a mountain cut off from its fellows, but as seen from the Dead Sea and Jordan Valley its steep sides justify the epithet '*abscisum*,' which may be taken as an interpretation of λαξευτήν and Pisgah. There is another alternative suggested by the similarity between פסל and פסגה, viz. that the LXX translation is due to a confusion of consonants. It may further be noted that the different renderings of the LXX are not found in different books, but that in both Numbers and Deut. Pisgah is translated in one place as a proper noun, and in others explained by the Greek verb λαξεύω.

A. T. CHAPMAN.

PISHON (פִּישׁוֹן, Φεισών, *Phison*).—See EDEN. In Assyrian *pisannu* means 'water-channel.'

PISIDIA (Πισιδία) was a country in the southern part of Asia Minor, bounded by Lycia on the west, Phrygia on the north, and Pamphylia on the south, while on the east it passed in a vague, indefinite way into the land of the Isaurian or Tracheiotic tribes. Its greatest length, east to west, was about 120 miles, and its greatest breadth about 50. On the north and south Pisidia was originally well defined by its relation to the Taurus mountains: in this part Taurus is a broad tract of many lofty ridges intersected by valleys, some of large size along the course of considerable rivers or the margin of lakes, others mere glens among the hills. Where the mountains are merged definitely in the great plateau on the north, or sink to the level coast-land on the south, Pisidia ended. Several of those large valleys bore special names, such as Kabalis, Milyas the land of the Milyes or Milyai, the country of the Etenneis (more strictly Hetenneis, transformed in Greek into two separate names attached to two parts of the country, Etenneis and Katenneis), the country of the Orondeis, the country of the Homonades: sometimes those districts were called by their special names, but often they were summed up as parts of Pisidia.

In the course of Roman history the name Pisidia was changed from a strictly geographical to a political term. Pisidia was merely a part of the great province Galatia in the 1st cent. after Christ. In A.D. 74 the larger half of Pisidia was taken from the province Galatia and attached to the new double province of Lycia-Pamphylia. It was then reckoned part of Pamphylia; and that name now gradually came to be used as including many cities which previously were purely Pisidian; while the name Pisidia was more especially applied to the part of that country which was still in the province Galatia, and Pisidia steadily encroached on PHRYGIA until in practice the whole of Galatic Phrygia was called Pisidia. Antioch and Apollonia, originally cities of Phrygia, then came to be called cities of Pisidia. Still later, probably under Diocletian, the whole of southern Galatia was formed into a province Pisidia, to which were attached western Lycaonia and another slice of Phrygia with the cities of Apamea and Metropolis. Thus we find Iconium called a city of Pisidia in the 4th cent. by Ammianus Marcellinus. About 372 another new province Lycaonia was constituted out of parts of the provinces Isauria, Pisidia, and Galatia (eastern Lycaonia and Isauropolis from the first, western Lycaonia and parts of eastern Pisidia from the second, Glavama or Egdaumana from the third); and henceforth the name Pisidia was used to denote the diminished province with Antioch as capital.

In the time of St. Paul, Pisidia was still used in its old and strict sense to indicate the whole great group of mountain valleys in the Taurus, which politically formed part of the province Galatia. Paul traversed Pisidia on his way from Perga to Antioch (Ac 13^{14}), and again on his return journey from Antioch to Perga (Ac 14^{24}). On the former occasion Pisidia is not named, probably for the reason that Paul and Barnabas were going straight to Antioch and did not preach by the way. On the second occasion 'they passed through Pisidia and came to Pamphylia'; the two names are here used as political terms, one being a region of the province Galatia (see vol. ii. pp. 87, 90 f.), the other the small procuratorial province on the coast.

In Ac 13^{14} the true text is 'Pisidian Antioch'* (not Antioch of Pisidia), that being a way of distinguishing it from the many other Antiochs, abbreviated from the fuller description 'a Phrygian city towards Pisidia': the region (of the province) of which Antioch was metropolis is mentioned Ac 13^{49}: it was (Galatic) PHRYGIA.

If Paul preached in Pisidia, the brevity of the reference rather suggests that the work was unimportant and unsuccessful. He found there no 'door opened unto him' (2 Co 2^{12}). A rude, little-educated, rustic population was not favourable to his teaching; and there is no reason to think that Pisidia was early Christianized. The only part where there are any pre-Constantinian Christian inscriptions, is that which lies closest to Apamea;† and the new religion is likely to have spread there from that great seat of early Christianity (see PHRYGIA).

Yet a Pauline tradition seems either to have remained alive from the first or to have grown up later in Pisidia. The modern name of the imposing but wholly desolate and unpopulated ruins of Adada is Kara Bavlo. The word Kara (literally 'black,' metaphorically in common usage 'terrible' or 'strong') is often applied to ancient sites. The name Bavlo is now applied to the modern town 5 or 6 miles south of Kara Bavlo, which has replaced it as the seat of government. Plainly the name was carried with the population from the old site to the new; and the old city was henceforward distinguished as Kara Bavlo. Now it is evident and certain that Bavlo is merely the modern pronunciation of the apostle's name Παῦλο'; and clearly this name was the popular local designation of Adada, derived from the patron saint. And it is highly probable that this local identification of Adada with the apostle's name is to be connected with the fact that Adada is the one important city in Pisidia on the direct road from Perga to Antioch; and that the name attests a local legend that St. Paul passed that way and taught in the city. A remarkable and very early ruined church stands near the road leading to the south about a mile or two from the city.

One other trace of Pisidia has been left on the NT. When St. Paul speaks of the 'perils of rivers' and 'perils of robbers' which he had been exposed to, no locality is likely to have been so prominent in his mind as Pisidia. It was still barely conquered when he traversed it. Augustus had found it necessary to plant in it several colonies, Cremna, Comama, Olbasa, Parlais, to keep down its unruly tribes. Its mountain fastnesses were the natural haunt and refuge of robbers; and the inscriptions bear testimony to this. Some examples are quoted in the *Church in the Roman Empire before 170*, p. 23 f.; see also Conybeare and Howson's scholarly work on St. Paul (though it indicates a different route across Pisidia).

* Ἀντιόχειαν τὴν Πισιδίαν, ℵABC, Tisch., Westcott and Hort, etc.

† Ramsay, *Cities and Bishoprics of Phrygia*, pt. ii. p. 498.

LITERATURE.—As to Pisidian ethnology and language hardly anything is known; Ramsay, 'Inscriptions en Langue Pisidienne,' in *Revue des Universités du Midi*, 1895, p. 353, has published the only known monuments of the language; but they contain hardly anything more than proper names, revealing a few grammatical forms. The proper names, Grecized in form, which occur in Greek inscriptions, are of remarkable and peculiar character: many Greek inscriptions of Pisidian cities are given by Sterrett in his *Wolfe Expedition* and his *Epigraphic Journey in Asia Minor*; by Lanckoronski, *Städte Pamphyliens und Pisidiens* (containing also splendid accounts and photographs of sites and monuments).

W. M. RAMSAY.

PISPAH (פִּסְפָּה, B *Φασφαί*, A *Φασφά*).—An Asherite, 1 Ch 7^{38}.

PIT in OT represents twelve Heb., and in NT two Gr. words. **1, 2.** From the root באר, only in Piel, 'make distinct *or* plain':—(*a*) בְּאֵר (possibly from idea of *coming to light* or *appearing*), commonly rendered 'well,' indicating a deep shaft containing water. It corresponds with Arab. *bi'r*. It is once used of the *pits* whence bitumen was taken, בֶּאֱרֹת חֵמָר (Gn 14^{10}). The dark, cold depths, from which, if one fell in, escape would be so difficult, doubtless suggested the figures 'pit of destruction' (Ps 55^{23}), 'pit' (Ps 69^{15}), 'narrow pit'(Pr 23^{27}). (*b*) בּוֹר the usual word for 'cistern,' which should take the place of 'pit' (RVm) in Lv 11^{36}, 1 S 13^{6}, 2 K 10^{14}. When empty, the *bōr* was frequently used as a place of confinement (Gn 37$^{22ff.}$, Zec 9^{11}). It is rendered 'dungeon' in Gn 40$^{15ff.}$, Is 24^{22} RVm, La 3$^{53.55}$; so also Jer 38^{6} (RVm 'pit'), which may explain the figure in Ps 40^{2}. בֵּית הַבּוֹר (Ex 12^{29}, Jer 37^{16}) is a prison cell. Thus it comes to be used for the universal prison of the tomb (Pr 1^{12}, Ps 28^{1} 30^{3}, Is 14^{15} 38^{18}, Ezk 26^{20} etc.). The pit in which Benaiah slew the lion (2 S 23^{20}, 1 Ch 11^{22}) and the pit, prepared against the necessities of a dreaded siege, into which Ishmael cast his slaughtered victims (Jer 41$^{7.9}$), were probably large empty reservoirs. The hole out of which stones have been quarried (Is 51^{1}) is often used as a cistern.

3. גֵּב (from גוב 'to dig') corresponds with the Arab. *jubb*, a deep well or cistern or ditch. The word occurs in 2 K 3^{16}, where the most likely sense is 'trenches' (RV), and in Jer 14^{3}, where 'pits' should surely be 'cisterns' (possibly also in same sense [so Klost.] in Jer 39^{10} 52^{16} ∥ 2 K 25^{12}).

4. גֶּבֶא (from גָּבָא ? 'to gather together') a cistern, as in Is 30^{14} RV; but in Ezk 47^{11} probably a marsh or pool.

5. גּוּמָּץ (an Aram. loan-word) occurs only in Ec 10^{8} 'He that diggeth a pit shall fall into it'; cf. the parallel in Pr 26^{27}, where the word used is שַׁחַת; root גמץ Syr. and Aram. = 'to dig.'

6. פַּחַת (from an unused root פָּחַת 'to excavate'), probably an excavation, or deep cleft with gloomy recesses in which one might hide (2 S 17^{9}). It is rendered 'hole' in Jer 48^{28}, and doubtless because of its forbidding aspect it is associated with those things which inspire terror (Is 24^{17}, Jer 48^{43}, La 3^{47} RV, etc.). Into some such opening the body of Absalom was thrown (2 S 18^{17}).

7. שְׁאוֹל. In each of the three cases where AV renders 'pit' (Nu 16$^{30.33}$, Job 17^{16}) 'Sheol' is preferable (see art. HADES).

8. 9. 10. From the root שׁוּח 'to sink or subside':—(*a*) שׁוּחָה, in Jer 2^{6} of the pits which enhanced the perils of the desert march; fig. in Pr 22^{14} 23^{27} (AV and RV 'ditch'), Jer 18$^{20.22}$. (*b*) שַׁחַת, the pit in which snares are set to take wild beasts, and so metaph. the cunning designs of a man's foes to compass his undoing (Ps 7^{15} (ditch) 9^{15} 35^{7} 94^{13}, Pr 26^{27}, Ezk 19$^{4.8}$). It is also used as equivalent to *the grave*, which is destined to entrap all living (Job 33$^{18ff.}$, Ps 30^{9} 55^{23}). 'Pit' (RVm) should take the place of 'corruption' in Job 17^{14}, Ps 16^{10} 49^{9}, and Jon 2^{6} (RVm); of 'destruction' Ps 103^{4}, and of 'grave' Job 33^{22}. In Job 9^{31} it seems to indicate a receptacle of filth, while in Is 51^{14} it clearly denotes a dungeon. (*c*) שִׁיחָה occurs thrice (Ps 57^{6} 119^{85}, Jer 18^{22}), fig. in each case, of the subtle and malevolent schemes of enemies.

11. 12. From the root שָׁחָה 'to bow down':—(*a*) שְׁחוּת only once, fig. (Pr 28^{10}). (*b*) שְׁחִית (Ps 107^{20}, La 4^{20}). In the former case, instead of 'destructions,' we may read with Delitzsch (*in loc.*) 'pits,' referring to the sufferings into which they had sunk. In the latter it again refers to the successful designs of the enemy.

In the NT the terms used are—**1.** *βόθυνος* (= *βόθρος*, any hole or hollow in the ground, as, *e.g.*, the trench in which a tree is planted), Mt 12^{11}. In Mt 15^{14}, Lk 6^{39}, AV renders 'ditch'; RV uniformly 'pit.'

2. *φρέαρ*, an artificial well, cistern, reservoir, or, generally, pit. In Lk 14^{5} (RV), where the empty well is doubtless intended, and Jn 4$^{11.12}$ it is rendered 'well.' In Rev 9$^{1ff.}$ it is used figuratively of the pit of the abyss. Empty wells are often left uncovered and unguarded near the villages, and especially around deserted sites in Palestine, and form a serious danger to the traveller, particularly in the dark. See, further, the following article.

W. EWING.

PIT (metaphorical).—As might be expected, the metaphorical use of this word is most frequent in the poetical and prophetical books of the Bible, and in passages where an elevated style is natural. It stands in the EV (see the preceding article) for a number of Heb. words, and the utter lack of consistency in the translation is well exemplified in Pr 22, in the 14th verse of which 'pit' is the rendering of שׁוּחָה, whilst in 23^{27} בְּאֵר is represented by 'pit,' and שׁוּחָה by 'ditch.' The shades of meaning may be classified as follows:—

1. In a solitary instance, Is 51^{1}, 'the hole of the pit (בּוֹר)' refers to Sarah, the ancestress of the nation, the quarry from which it was digged.

2. Very frequently the *pit* is a stratagem or device by which an enemy is injured. Ezk 19$^{4.8}$ justifies the conclusion that the figure was suggested by the pits in which wild animals are captured. The Heb. words used in this sense are—בְּאֵר, בּוֹר, פַּחַת, שׁוּחָה, שַׁחַת, שְׁחוּת, שְׁחִיתָה, שִׁיחָה. See Ps 9^{15} 35^{7} 119^{85}, Pr 22^{14} 23^{27} 28$^{10.17}$ etc.

3. From this sense the transition is easy to that of the miserable condition or the ruin into which one falls—the roaring pit (בּוֹר שָׁאוֹן) of Ps 40^{2}, the watery pits (מַהֲמֹרוֹת) of Ps 140^{10}, the *βόθρος* of Sir 12^{16}, the *βόθρος ᾅδου* of Sir 21^{10}.

4. A wretched underground dungeon thoroughly deserves this name. It is found at Is 24^{22} (בּוֹר), Zec 9^{11} (בּוֹר), Wis 10^{13} (*λάκκος*, here used, is the LXX rendering of בּוֹר, Joseph's dungeon, Gn 41^{14}).

5. The *grave* is often entitled 'the pit.' Here, again, a variety of Heb. words are employed—בְּאֵר, בּוֹר, בְּאֵר שַׁחַת, שְׁאוֹל, שַׁחַת, שַׁחַת בְּלִי. Such passages as Ezk 32^{23} call up the picture of a huge *columbarium* with graves in the sides. But here and elsewhere it is not easy to distinguish between this signification and the one mentioned under No. 6.

6. Hades, the realm of shades, situated beneath the earth, and tenanted by thin, unsubstantial ghosts, bears this name. At Is 14^{15} the *pit* (בּוֹר) is obviously the same as 'hell,' *i.e.* Hades (שְׁאוֹל).

7. In the Apocalypse the abode of the devil and his angels is conceived of as a vast underground abyss, communicating with the surface of the earth by a great shaft, which is opened or closed from above by God's angels sent forth for the purpose. For this *pit*, or *bottomless pit*, φρέαρ, φρέαρ τῆς ἀβύσσου, ἡ ἄβυσσος, see Rev $9^{1.2.11}$ 11^{7} 17^{8} $20^{1.3}$, and cf. art. ABYSS. J. TAYLOR.

PITCH (זֶפֶת, כֹּפֶר, πίσσα) may denote either *mineral* pitch (bitumen), or the *vegetable* pitch obtained from resinous trees. Pliny (*Nat. Hist.* xiv. 25, xvi. 23) reserves the word *pix* for the latter, while the former is called *pissasphaltus*. The words rendered 'pitch' in Scripture apparently refer to mineral pitch, an inflammable, viscous substance, composed of a mixture of hydro-carbons, and found now in a more liquid, now in a more solid state (see BITUMEN).

כֹּפֶר occurs in Gn 6^{14} as the name of the substance with which the ark was covered both within and without. The word has a variety of meanings elsewhere in OT, and its usage here is connected with the simple sense of the verb כָּפַר ('to cover'), which appears in the same verse as the cognate of the noun, and is tr^{d} 'to pitch.' LXX has ἀσφαλτώσεις τῇ ἀσφάλτῳ, and ἄσφαλτος is elsewhere the rendering of חֵמָר ('bitumen').

זֶפֶת in Ex 2^{3} is one of the substances with which the ark of bulrushes was daubed, the other being חֵמָר. It might seem from the Hebrew as if two distinct substances were referred to, but LXX combines both in the translation ἀσφαλτοπίσσα. The distinction between זֶפֶת and חֵמָר is probably that between the more liquid and the more solid varieties of bitumen.

In Is 34^{9} זֶפֶת (LXX πίσσα) occurs twice in the prediction of the desolation of Edom. 'The streams thereof shall be turned into pitch, . . . and the land thereof shall become burning pitch.' The mention of 'brimstone' in the same verse, and the fact that bitumen occurs along with sulphur near the Dead Sea, suggest that here also bitumen is meant.

In Apocr. πίσσα occurs thrice. Sir 13^{1} refers to the defilement caused by touching pitch. In Three^{23} pitch is mentioned among the substances used in kindling Nebuchadrezzar's fiery furnace. Bel^{27} describes how Daniel slew the dragon by putting into its mouth lumps of pitch, fat, and hair, that had been boiled together. JAMES PATRICK.

PITCHER (כַּד *kad*, LXX ὑδρία; in La 4^{2} נֵבֶל, LXX κεράμιον, as in NT).—A vessel for holding water (Gn $24^{14ff.}$), carried by girls on their shoulders (v.^{15}). These vessels were made of earthenware (Jg $7^{19.20}$), and sufficiently wide-mouthed to admit a torch (Jg $7^{16.19.20}$). It was in a *kad* that the widow of Zarephath kept her meal (1 K 17^{12}), although the word is translated 'barrel' in AV and RV; and the vessels of water (also called 'barrels') which Elijah caused to be poured over his sacrifice at Carmel were *kaddîm*. In the figurative description of death in Ec 12^{6} the pitcher is said to be broken at the fountain. The *nēbel* of Jeremiah was an earthen vessel in shape resembling a skin bottle, and probably had a narrower neck than the *kad*. As both vessels were made to be carried, they had usually a pair of handles. The pitcher borne by the man who led the apostles to the place where the Passover was to be prepared was a κεράμιον (Mk 14^{13}, Lk 22^{10}). The Samaritan woman's waterpot was a *hydria* of earthenware (Jn 4^{28}), smaller than the stone *hydriæ* of Cana (Jn 2^{6}), which do not seem to have been equally portable. In Is 5^{10} κεράμιον of LXX represents Heb. בַּת (EV 'bath'); in Jer 35^{5} it represents *nēbel* (RV 'pots,' AV 'bowls').

The Egyptian *gad* or *gai* (Copt. ⲕⲉⲗⲱⲗ) was an earthenware vessel resembling the *kad*, with side handles, and sufficiently wide-mouthed to serve as a receptacle for fruit or other solids (*Papyrus Anastas.* iv. 14), while commonly used for water or beer, as in the story of Anpu and Bata. Pitchers of this kind have been figured by Bliss (*A Mound of Many Cities*, pp. 118, 120), and by Petrie in his sketches of Palestinian pottery; see *Tell el Hêsy*, p. 40, pl. vii. figs. 123, 125, ix. fig. 190. See art. POTTERY.

The English word 'pitcher' is derived from the French. The vessel is called *pichier* in the Languedoc, and this has its root in the Latin *picarium* or *bicarium*, from which we also have got the word 'beaker.' The word does not occur in Middle English to the writer's knowledge, the water vessel being an *euwere* or ewer; see *Boke of Curtasye*, 641. It had, however, become common in Elizabethan English, as in the familiar Shakspearean phrase in *Taming of Shrew*, IV. iv. 52, and *Richard III.* II. iv. 37. A. MACALISTER.

PITHOM (פִּתֹם; B Πειθώ, A Πιθώμ).—In Ex 1^{11} it is said that the Israelites built for the Pharaoh of the Oppression the cities of 'Pithom and RAAMSES,' to which the LXX adds, 'and On, which is Heliopolis.' They are called עָרֵי מִסְכְּנוֹת, usually rendered 'treasure (AV) *or* store (RV) cities,' but the exact signification of the term is doubtful, and the LXX makes it πόλεις ὀχυραί, 'strong *or* fortified cities' (see also 1 K 9^{19}, 2 Ch 8^{4}, where the same Heb. is tr., in the first passage π. τῶν σκηνωμάτων, and in the second π. ὀχυραί). The site of Pithom has been the subject of much controversy, which, however, has been finally set at rest by the excavations of Dr. Naville for the Egypt Exploration Fund in 1883.

Herodotus (ii. 158) describes the canal made by Necho to connect the Red Sea with the Nile as starting 'a little above Bubastis' (now Zagazig), and passing 'Patumos, a city in the Arabian nome' (Πάτουμον τὴν Ἀραβίην πόλιν). 'Arabia,' or the Arabian nome, was the 20th nome of Lower Egypt, called Sopd-Qemhes in Egyptian, whose capital was Qosem or Goshen, now Saft el-Henna. Patumos is evidently the Pa-Tum or Pi-Tum, 'the house of Tum'—the ancient sun-god of Heliopolis—of the Egyptian texts. At Dendera the city of Pi-Tum is described as in the land of Ro-Abt, 'the entrance to the East,' a name which Dr. Naville suggests may be the origin of the Greek 'Arabia,' when used to denote the 20th nome (see Mariette's *Denderah*, iv. 75. 12). The name Pi-Tum is first found in monuments of the age of the 19th dynasty; thus a letter dated in the 8th year of Meneptah II. the son and successor of Ramses II., and translated by Brugsch (*History of Egypt*, Eng. tr. 2nd ed. ii. p. 133), speaks of Edomite nomads being allowed to pass the Khetam or 'fortress of Meneptah in the land of Thuket' (Succoth), which protected the eastern frontier of Egypt, and to feed their flocks near 'the lakes (*birkata*) of Pi-Tum of Meneptah in the land of Thuket' (*Select Papyri in the Hieratic character from the Collections in the British Museum*, pl. cxxv.–vi.).

Chabas had already, in 1864, pointed out that the Pithom of the OT must correspond with an Egyptian Pi-Tum, and suggested that its site should be sought at Abu-Kêshêd or Tel el-Maskhûta in the Wady Tumilât, 17 kilometres south-west of Ismailiya (*Mélanges*, p. 162), a suggestion which he afterwards withdrew in favour of Tmui el-Emdid, the ancient Thmuis. So far as the form of the name was concerned, however, the conclusion of Chabas was soon afterwards confirmed by the publication of various geographical texts by Brugsch, Dümichen, Mariette, and others, from which it appeared that the capital of the 8th nome of Lower Egypt, Nefer-Abt, had the civil name Thuket and the sacred name Pi-Tum. Tum, the setting sun, was worshipped there under the form of a serpent, and its chief temple was accordingly termed Pi-Qereḥt, 'the house of the snake.' According to Brugsch (*Zeitschrift für Ægypt. Sprache*, 1876, p. 127), the sacred lake or canal bore the name of 'Crocodile Lake' (*Kharmu*), the domain-land being Annu or On.

Brugsch first showed that Thuket is the biblical SUCCOTH, the Egyptian *th* being, as elsewhere, represented by the Hebrew ס, and the vocalization of the name having been assimilated to that of the word which means 'booths' in Hebrew (*Zeitschr. für Ægypt. Sprache*, 1875, p. 7). Succoth was the first stage of the Israelites in their flight from Egypt before they encamped at ETHAM, the Egyptian Khetam or 'fortress,' which commanded the approach to 'the wilderness' (Ex 12^{37} 13^{20}). Pithom, accordingly, must have been in or adjoining the land of Goshen.

When the Fresh-water Canal was made almost on the lines of the old canal of Seti I. and Necho, it passed through the Wady Tumilât, and skirted the ruins of Tel el-Maskhûta ('the mound of the Image'). Various monuments of the age of Ramses II. were discovered in the Tel, including the one from which it derived its name, and were removed to Ismailiya. Lepsius had already proposed to see in the Tel the site of the city of Raamses (*Chronologie*, p. 348); and Maspero, who published some of the inscriptions in 1877 (*Revue archéologique*, nouv. sér. xxxiv. p. 320), arrived at the same conclusion. But the study of the monuments at Ismailiya, all of which were dedicated to Tum by Ramses II., led Dr. Naville to suspect that the Tel really represented Pithom, and not Raamses, and accordingly he commenced excavations on the spot. The result was the discovery of a temple, as well as of storehouses, private habitations, the walls of the city, and various inscriptions. The city and temple proved to have been built by Ramses II. of the 19th dynasty, and to have lasted down to the Roman era. They proved also to be the Pi-Tum or Thuket of the hieroglyphic texts.

The discovery was important, as it not only settled the site of Pithom, and so threw light on the route of the Israelites, but it also showed that Ramses II., the builder of Pi-Tum, must have been the Pharaoh of the Oppression. Unless we deny the historical character of Ex 1^{11}, the date of the Exodus is definitely fixed.

Dr. Naville's discoveries further showed that Pithom changed its name in the Greek age. It became Heroopolis, which the Romans abbreviated into Ero, as is proved by inscriptions, which confirm the statement of Stephanus Byzantinus (*s.v.*) that the Heroonpolis of Strabo was also known as Hêrô. An explanation is thus afforded of the reading of the LXX in Gn 46^{28} 'he sent Judah before him unto Joseph to meet him at Heroonpolis in the land of Ramesses,' where, it is noticeable, the Coptic version substitutes 'Pithom the city' for Heroonpolis. D'Anville (*Mémoires sur l'Égypte*, p. 121 ff.) long ago suggested that Heroopolis was to be sought at Tel el-Maskhûta, and the suggestion was adopted by Quatremère, Champollion, and others. In the inscription of the obelisk of Hermapion, quoted by Ammianus Marcellinus (Champollion, *Grammaire égyptienne*, p. 361), 'the son of Tum' is translated 'son of Hêrôn' (or 'Hêrô'). Pi-Tum or Heroopolis was the capital of the 8th nome of Lower Egypt; consequently Herodotus was mistaken in placing Patumos in 'Arabia.' It adjoined the Arabian nome, but was not actually in it. The high priest of its temple had the title of *Herti-sonti*.

The city was in the form of a square, containing about 55,000 square yards. The temple of Tum occupied a small space in the south-western angle of the enclosure, and seems never to have been finished. To the north was a series of brick buildings, in which Dr. Naville sees storehouses in which the provisions were gathered 'necessary for armies about to cross the desert, or even for caravans and travellers which were on the road to Syria.' The chambers composing them had thick walls, and were without communication with one another, the access to them being from the top. The whole city was ruthlessly levelled when the Romans formed a camp on the site of it, and founded the later Heroopolis on the north-eastern edge of the camp immediately to the south of the present Fresh-water Canal.

Brugsch, *Dictionnaire géographique de l'ancienne Égypte*, 1879; see also Driver in Hogarth's *Authority and Archæology*, 1899, pp. 54 f., 61, 68; Ball, *Light from the East*, p. 109 f.; Dillm.-Ryssel on Ex 1^{11}.

A. H. SAYCE.

PITHON (פִּיתוֹן).—One of the sons of Micah, the son of Merib-baal, 1 Ch 8^{35} (BA Φιθών) ‖ 9^{41} (פִּיתֹן, B Φαιθών, A Φιθών).

PITIFUL.—Pity is the same word as piety, the Eng. having followed the Old Fr. in separating the one word *pictas* into *piété* 'piety,' and *pitié* pity. The adj. 'pitiful' was formed after the separation, and is simply 'full of pity.' But pity may be given or received, and 'pitiful' is used about 1611 in three ways: (1) showing pity, compassionate; (2) exciting or deserving * pity, miserable; (3) contemptible, despicable, the modern use of the word. Shaks. has all three—

(1) *Rich. III.* I. iii. 141—

> 'I would to God my heart were flint, like Edward's;
> Or Edward's soft and pitiful, like mine.'

(2) *Othello*, I. iii. 161—

> ''Twas passing strange,
> 'Twas pitiful, 'twas wondrous pitiful.

(3) *Hamlet*, III. ii. 49—'That's villainous; and shows a most pitiful ambition in the fool that uses it.' In AV 'pitiful' is used only in the first sense, *compassionate*; La 4^{10} 'The hands of the pitiful women have sodden their own children' (נָשִׁים רַחֲמָנִיּוֹת, LXX γυναικῶν οἰκτειρμόνων); Sir 2^{11} 'The Lord is . . . very pitiful'; Ja 5^{11} 'The Lord is very pitiful' (πολύσπλαγχνος, RV 'full of pity'); 1 P 3^{8} 'Be pitiful' (εὔσπλαγχνοι, RV 'tender-hearted').

The subst. 'pitifulness' occurs in Job 16^{heading} in the sense of misery.

J. HASTINGS.

PITY.—See COMPASSION. In Ezk 24^{21} 'that which your soul *pitieth* (marg. 'pity of your soul') is equivalent to 'object of affection' (cf. v.^{25}). There is a play upon words in the Heb. (*maḥmad 'ênêkhem umaḥmal naphshĕkhem*).

PLACE OF TOLL.—See TOLL (PLACE OF).

PLAGUE (*i.e.* πληγή 'blow,' 'stroke').—A general term for a penalty inflicted by God. It is often used as a synonym of 'pestilence,' but is usually more comprehensive and used of other punishments as well as diseases. It is employed to indicate the last of the Egyptian plagues (Ex 11^{1}), and is here the tr. of נֶגַע *nega'*, literally 'a stroke.' In Lv 13 and 14 this word occurs 59 times as descriptive of leprosy, as also in Dt 24^{8}. It is used (in the verbal form) of Divine chastisement in general in Ps $73^{5.14}$, as a synonym of 'pestilence' in 1 K 8^{37-38} and Ps 91^{10}, and it denotes the punishment inflicted on Pharaoh in the matter of Sarah in Gn 12^{17}.

The word נֶגֶף is six times translated 'plague.'

---

* Cf. Fuller, *Holy Warre*, 4, 'We leave them in a state most pitifull, and little pitied.'

It is used in Jos 22^{17} of the plague of Baal-peor; in Nu 16^{46-47} [Heb. 17^{11-12}] of that following the rebellion of Korah. Elsewhere its meaning is more general, as in Ex 12^{13} 30^{12}, Nu 8^{19}. The verb נגף (AV 'plague') in Ps 89^{23} is tr^{d} by RV 'smite.'

In Nu 11^{33} the judgment at Kibroth-hattaavah is called מַכָּה *makkāh*, a word usually translated 'wound,' 'smiting,' 'chastisement,' etc. In Dt 28^{61} it is employed for any disease inflicted as a penalty, as in Lv 26^{21}, Dt 28^{59} 29^{22}. In 1 S 4^{8} it refers to the plagues of Egypt, and in Jer 49^{17} 50^{13} is used of the plagues to be inflicted on Babylon and Edom, over which the enemies of these countries are to hiss in derision and astonishment.

In 22 other passages 'plague' is the rendering of מַגֵּפָה *maggēphāh*, used of the Egyptian plagues in Ex 9^{14}; of the disease that slew the spies, Nu 14^{37}; or that which slew the rebels who followed Korah, Nu $16^{48. 49-50}$ [Heb. $17^{13. 14. 15}$]; of Baal-peor, Nu $25^{8. 9. 18}$ 26^{1} 31^{16}, Ps 106^{29-30}; of the infliction on the Philistines, 1 S 6^{4}; and of that which followed David's census, 2 S 24^{21-25}, 1 Ch 21^{17-22}. It is also prophetically employed of the punishment of those that neglect the ceremonial law, Lv $14^{12. 15. 18}$.

'Plague' in Hos 13^{14} is *deber*, usually tr. 'pestilence.' In 1 Co 15^{55} κέντρον, 'sting,' appears to be the rendering of דֶּבֶר; the LXX in Hosea uses κέντρον as the translation of קֶטֶב, and δίκη as that of *deber*.

In NT the issue of blood is called a 'plague' in Mk 5^{29-34}, where the Greek term is μάστιξ, literally a 'scourge.' This word is used of other diseases in general in Mk 3^{10}, Lk 7^{21}. In RV the word πληγή is 12 times rendered 'plague' (AV wants it in 9^{18}). See, further, MEDICINE, p. 324.

A. MACALISTER.

PLAGUES OF EGYPT.—The judgments inflicted upon the Egyptians by God on account of their oppression of the Israelites and refusal to release them. They are detailed in Ex 7^{8}–12^{31}, and given in epitome in Ps 78^{42-51} 105^{27-36}. In the longer narrative ten successive plagues are enumerated: (1) the turning the river into blood, (2) frogs, (3) lice, (4) flies, (5) murrain, (6) boils, (7) hail, (8) locusts, (9) darkness, (10) the slaying of the first-born. In Ps 78 the list consists of 1, 3, 2, 8, 7, 5, 10; that in Ps 105 includes 9, 1, 2, 4, 3, 7, 8, 10. Philo gives them in the following order: 1, 2, 3, 7, 8, 9, 4, 5, 10, but that is to suit an obviously artificial classification (*Vit. Mos.* i. 17). The Jewish teachers use as a mnemonic the words דצך עדש באחב, the initials of the plagues in the order given in the text.

Egyptian history is silent concerning these as well as the other incidents of the Exodus; but that is not surprising. There were, however, evidently several ancient versions of the story, which have been collated and combined by those to whom we owe the text in its present form. It is probable that the groundwork of the narrative (J) was a document giving an account of *seven* plagues, viz. 1, 2, 4, 5, 7, 8, 10. The infliction of each of these is preceded by an interview of Moses with Pharaoh at which its onset is threatened; and the sign is brought to pass by Jahweh directly (see art. MOSES, p. 439^{b}). With this is combined another version (E), whose record embraced *four*, possibly *six* plagues, viz. 1 (Ex $7^{15b. 17b. 20b}$), 7 (8^{22-23}), 8 (10^{12-14}), 9 (10^{20-23}); there are also traces of its influence in the account of 10, and perhaps in that of 3. Moses in these is the thaumaturgist, and works by stretching forth his hand or his rod (see art. MOSES, p. 441^{a}). The third component document (P) couples Aaron with Moses; and, in general, attributes the carrying out of the miracle to him and his rod. The accounts of *six* plagues 1, 2, 3, 5, 6, 10 seem to be taken in whole or in part from this (see art. MOSES, p. 443^{a}). It will be seen from this analysis that 3 and 6 are peculiar to P, 4 to J, and 9 to E. 1, and possibly 10 are found in all three, 2 and 5 in P and J, and 7 and 8 in J and E. This list suggests the possibility that the list set forth in the Massoretic text may contain reduplicated narratives.

The district affected by the plagues is called in Ps $78^{12. 43}$ 'the Field of Zoan' (שְׂדֵה־צֹעַן). This may be either a limitation to the eastern part of Lower Egypt, or, more probably, a poetical synecdoche. J and P in several places refer the influence of these visitations to all the land of Egypt, meaning probably Lower Egypt. In 4, 5, 7, 9, 10 the immunity of the land of Goshen is specially mentioned. The interval between the first plague and the Exodus is not stated. The actual duration of the 1st and 9th plagues is given, but not of the others. It has been supposed that the first was connected with the early stages of the Nile overflow, possibly the end of June, and that the others occurred at intervals between that time and the following Passover, which was the definite terminus in point of time. The presumption in the narrative is that of a fairly regular and quick succession of stroke upon stroke.

The plagues have been variously classified. Philo divides them into four groups: 1st, those in which God asserts His power over the grosser elements, earth and water, intrusting the bringing of the plagues to Aaron (=1, 2, 3); 2nd, plagues of air and fire inflicted by Moses (=7, 8, 9); 3rd, one plague hurtful to mankind inflicted by both together (=5); 4th, those inflicted directly by the hand of God (=4, 6, 10). The first three were admonitory, characterized by uncleanness and discomfort; those following were more or less destructive to property and injurious to man, leading up to the overwhelming catastrophe of 10.

The story of the plagues is preceded by the account of a series of signs which Moses was instructed to perform: these were twofold: (1) two were for the purpose of attesting the reality of his Divine mission to his own countrymen; (2) the other was for the purpose of influencing Pharaoh. With the former pair, the conversion of his *own rod* into a serpent, and the leprous hand, we are not at present concerned. The last, the conversion of *Aaron's* rod into a serpent, is a part of the same group of signs as the plagues. This sign Moses caused to be performed in the presence of the advisers of Pharaoh, who are called חֲכָמִים *ḥăkāmîm* 'learned men,' מְכַשְּׁפִים *mĕkashshĕphîm* or 'sorcerers,' and חַרְטֻמִּים *ḥarṭummîm* or 'sacred scribes.' While the first two names are undoubtedly Semitic, the last may possibly be the name of an order of Egyptian priests, a derivative of the native name *ḥrdot*, but this is unlikely. In the Gr. these are called ἐπαοιδοί [in Dn 1^{20} σοφισταί]; see, further, in vol. ii. p. 773^{a} note **. There is a tradition that two of these were chosen to confront the two wonder-working Israelites, namely, Jannes and Jambres (see vol. ii. p. 548). These last two names occur in very many forms both in Jewish and Gentile literature. When these variants are compared, the constant elements are *Ane* or *Ani* and *Mre* or *Mri*, which are two of the commonest names found on the monuments of the 19th and of the immediately succeeding dynasties. In Lieblein's list, *Ani* or some allied form of the name occurs 24 times, and *Mri* 23 times. The *Gospel of Nicodemus* calls them ἄνδρες θεράποντες. It is suggestive that *Ambres* was the name of an Egyptian medical book known to Numenius and Clement (see Horapollo, i. 38).

The first sign, that of changing a rod into a serpent, was the converse of the common magical trick of rendering snakes rigid like rods. The African *Psyllæ*, who had control over serpents either by natural power or artificially by the use of herbs (Ludolf, *Hist. of Ethiopia*, Gent's tr. ix. p. 49), are mentioned by many classical writers: Herodotus (iv. 173), Dio Cassius (li. 14), Lucan (*Phars.* ix. 890, 925), Ælian (*de Nat. Anim.* xvi. 27), Vergil (*Æn.* vii. 753), Solinus Polyhistor (*Memor.* xl.), Aulus Gellius (xvi. 2), Silius Italicus (i. 411, iii. 302, v. 354, viii. 498), Pliny (vii. 2), and several others. The same form of serpent-charming is still practised in Egypt and North Africa, and has been described by several travellers, for example, von Schubert (ii. 116), Trotter (p. 174), Antes (p. 15), etc. For other observations on the snake as symbol and wand, see Böttiger's *Kleine Schriften*, 1837, p. 112. The writer has seen both a snake and a crocodile thrown by hypnotism into the condition of rigidity in which they could be held as rods by the tip of the tail.

(1) The First Plague, **the defilement of the river**, was a severe blow to Egyptian prejudices. The river was a god to whom offerings were made (Stern, *Zeitschr. Ægypt. Spr.* 1873, 129) and adorations addressed (Maspero, *Hymne au Nil*, 1868). According to the narrative in J and E, the transformation was confined to the water of the river, killing its fish ($7^{17-18. 21. 24. 25}$), but P states that it extended to the canals, pools, ponds, and cisterns of wood and stone (v.^{19}). It is noteworthy that vessels of earthenware are not mentioned, and perhaps this may be connected with the statements of Alpinus (*Med. Æg.* i. 16*b*), Norden (i. 52), Sonnini (i. 124), Troilo (472), and Volney (i. 20), that it is only in earthenware vessels that the discoloured waters of the Nile-flood become clear and can be kept clear. See also Galen, *de Simpl. Med. Facult.* i. 3, § 2. The former narrative (JE) says that the people dug beside the river for supplies, and although it says nothing of the kind of water in these wells, it does not say that it was blood; the latter (P) declares that the water in these also was changed into blood, and Philo paraphrases this by comparing these wells to blood-vessels, from which the blood was flowing, as in a hæmorrhage. Volney says that the water found by digging wells is brackish and unfit for use (i. 16). Such a change was plainly miraculous, and this is also shown by its definite duration of seven days and its sudden disappearance.

In the normal condition of the river, as its waters rise in the third week of June, they become discoloured. This has often been described by travellers. Abd-al-latîf says that the water becomes green from the fragments of vegetable matter suspended in it, and remains discoloured until August (de Sacy's tr., p. 333), and Makrizi refers to this alteration in colour and to the offensive exhalations from the water at a later stage (quoted by de Sacy, p. 345). Vansleb adds that in process of time the water changes in colour from green to a dull ochreous red (1677, p. 53). Many other travellers confirm this observation. See Maillet, p. 57; Tourtechot, 14; Hartmann, 128; Pococke, i. 199; Savary, 1786, ii. 179. The last author speaks of the unwholesomeness of the waters in this stage, and this is confirmed by Pruner (p. 21). These changes in colour are probably due to the wasting down of some great accumulation of vegetable matter high up in the river, like the *Sudd* or great Nile dam described by Sir S. Baker (*Lake Albert Nyanza*, ii. p. 329). Ehrenberg attributes the red coloration to a minute organism, *Sphæroplea annulina* Agardh, which multiplies in the water after the inundation, and he has described a large number of cases of red discoloration of water in Poggendorf's *Annals* for 1830, p. 477. This reddening of ponds by minute organisms is not uncommon. Swammerdam tells us that he saw a pool in the Bois de Vincennes made crimson by minute crustaceans. Schuyl describes the same at Leyden, and Hjaerne at Dalecarlia (*Bybel der Natuure*, 1737, pp. 89, 90). The present writer has seen a similar discoloration in a pool in the Phœnix Park, Dublin, on account of enormous quantities of a species of *Peridinium*. The example in 2 K 3^{23} may be quoted here. It has recently been shown that in many of these coloured animals the pigment is contained in parasitic bacteria.

Changes in the water of the Nile were not unknown in the legendary history of Egypt. Manetho states that in the days of Nephercheres (about B.C. 4000) the Nile for eleven days flowed with honey. Eusebius mentions the same change as occurring in the reign of a nameless king 200 years earlier.

The plague must have been a serious calamity to the whole population, not only on account of the lack of water, but also because of the killing of the fish, as these formed an important element in the diet of the Egyptian. There is a little obscurity in the description, arising probably from the different standpoints of the original authors of the narratives. In v.^{17} Moses was instructed to say to Pharaoh that he would cause the plague by smiting with his rod on the waters (E), while in v.^{19} (P) Aaron is instructed to bring the plague by stretching forth his rod.

The plague lasted seven days and was apparently then suddenly removed. It was imitated by the magicians, which seems to imply that not all the water of the land was transformed. As to the time of year of its occurrence, if the phenomenon had any relation to the natural discoloration, it probably took place about the height of the flood in the month of Epiphi (beginning June 25), or, if Ehrenberg's hypothesis be adopted, probably in the month of Thoth, beginning about the 29th August.

(2) The Second Plague, that of the **frogs** (Ex 8^1, J, P), was preceded by an interview with Pharaoh, at which Moses announced the visitation. This was at once brought upon the land by the agency of Aaron stretching forth his hand. Frogs are in most years plentiful in the Nile, and the ponds and canals connected with it, but do not usually wander far from the water; but now they suddenly swarmed on the land, invading the houses, even the bed-chambers, ovens, and kneading-troughs. In Ps 78^{45} they are said to have destroyed the Egyptians, hence some Rabbinical authorities suppose these were other than ordinary frogs, but the word used, *ẓĕphardēaʿ* (LXX βάτραχος), is the name of the ordinary amphibian. It was noticed by some Hebrew writers that while the word is used in the plural in general, it is singular in v.^{6}, literally, 'and the frog ascended,' hence Akiba says in *Semoth Rabbah* that there was but one frog, so rapidly prolific that it filled the whole land. The word is obviously used as a collective, as it occasionally is in Arabic. The magicians imitated the miracle, but, as more than one commentator remarks, when the land was full of frogs, who could tell those brought by the Israelites from those of their Egyptian imitators? The plague must have been one of great irritation, not only from the discomfort, but from the croaking noise which at times frogs utter continually. The Nile frogs make a sharp sound like two pieces of wood striking together (Hasselquist, pp. 68, 254, 304). The frog was not reckoned unclean by the Egyptians, nor was it specially venerated in Lower Egypt as far as is known. In the Egyptian language the figure of a frog was used as a numerical symbol for 100,000 with the phonetic value *hfnu*. In Upper Egypt there was an obscure goddess represented with a frog's head and named

Ḥkt, but we know little of her, except that in the Middle Empire the superintendents of nomes in Upper Egypt are called her priests, especially about the 12th dynasty. Horapollo says that the frog was the symbol of Ptaḥ because it is the representative of man in embryo (*Hierogl.* i. 25), but there is no native confirmation of this. A frog-headed figure, called 'Ka, the father of waters,' is figured by Wilkinson and thought by him to be a form of Ptaḥ (iii. 15). In *Papyrus Ebers* lii. a frog boiled in oil is recommended as an external application for swelling of the abdomen.

Several species of frog inhabit the Nile, the commonest being *Rana esculenta*, *R. Nilotica*, and *R. Mosaica*. They are called in Egyptian *'bĕnh* and in Coptic ⲭⲣⲟⲩⲣ. The sagacity of the Egyptian frog is said to exceed that of all others. See Ælian, *Variæ Historiæ*, i. 3.

Plagues of frogs were known in ancient times. Pliny (viii. 43), Orosius (iii. 23), Ælian (*de Nat. Anim.* ii. 36), Diodorus (iii. 29) give instances of these. Athenæus quotes from Heraclides Limbus an account of an invasion of frogs in Pæonia and Dardania, which drove out the inhabitants; and Justinus, in his epitome of Trogus Pompeius (xv. 2), speaks of a similar occurrence in Thracia Abderitis. Showers of frogs are often referred to by the old writers. Ælian tells us that he experienced on his way to Dicæarchia a fall of rain mixed with tadpoles and mud (*Hist. Anim.* ii. 56). Several such occurrences are referred to in Beyerlinck's *Theatrum*, under the head of *Pluviæ extraordinariæ*. See also Valentinus Albertus, *de Pluvia Prodigiosa*. Similar occurrences are reported in recent times, one in London, in the *Mirror* for 4th Aug. 1838. Several others are collected in Andrews' *Book of Oddities*, 1892, and some well-authenticated Scottish instances are given in the *Glasgow Herald* for 19th July 1894 and several succeeding issues. A plague of toads in the upper Nile Valley is reported by Haggard (*Under Crescent and Star*, 1895, p. 279). For Egyptian frogs see Seetzen (*Reisen durch Syrien*, etc., 1854, iii. pp. 245, 350, 364, 490, 501); see also Cameron, *Across Africa*, i. 267.

At Moses' entreaty the frogs were removed, and their dead bodies were gathered in heaps which made the land to stink, and probably gave rise to plagues. Appius tells us that when the people of Antareia had offended Apollo, he sent, among other plagues, an immense host of frogs, which, when they decomposed, poisoned the waters and caused a pestilence which drove them from their homes (*de rebus Illyricis*, 4). See also Ælian, *de Nat. Anim.* xvii. 41.

(3) (4) The Third and Fourth Plagues consisted of *insect pests*, the former of כִּנִּים *kinnîm*, or כִּנָּם *kinnām*, tr. lice AV and RV, 'sand flies or fleas' RVm; the latter of עָרֹב *'ārôbh*, tr. flies AV and RV. The account of the Third Plague is derived from P (Ex 8^{16-19}), that of the Fourth from J (v.$^{21-31}$). The *kinnah* was probably a stinging fly, mosquito or gnat, such as was, and still is, common in Egypt (Herodotus, ii. 95). A cognate word is applied in *Peah* to a grain-fly. This plague was sent without any warning to Pharaoh, and was brought about by Aaron smiting the dust with his rod, as God commanded him. The insects attacked man and beast (v.^{17}), devouring them (Ps 78^{45}). The interpretation in AV and RV, 'lice,' is an ancient one, as it is found in Jos. *Ant.* II. xiv. 3, and in many other Jewish writings. LXX renders the Heb. words by σκνῖφες, σκνῖπες, or κνῖπες, the name given to small insects found in figs and other fruits (Theophrastus, *Hist. Plant*, ii. 9, iv. 17), and the Vulgate calls them *ciniphes*. Κνῖπες and ψῆνες are mentioned by Aristophanes as fig-parasites (*Aves*, 590). Philo (*Vita Mosis*, i. 17) says that they were small insects which not only pierced the skin, but set up intolerable itching and penetrated the eyes and nose. Origen describes them as little flying insects (*Hom. in Ex.* iv. 6). That they were not lice in the ordinary sense of the word is shown by their attacking beasts as well as men, for none of the three species of human pediculi will live and multiply freely on animals. It has been argued in favour of the ordinary interpretation that they came out of the dust, but while lice are not generated naturally in dust, the eggs of some species of the common small stinging flies are found in dried pools. Most travellers in Egypt speak of these gnats as one of the most troublesome of pests (see Troilo, 774; Prosper Alpinus, *Hist. Nat. Ægypti*, i. 4. 3; Wittman, ii. 135; Scholz, 93; Lepsius, 93; Russegger, iii. 13; Lane, i. 4, and others). Such flies are always worst after the recession of the inundation in October (Hartmann, i. 250), the larvæ living in pools and the perfect insects emerging as these dry up.

The magicians were unable to cope with these insects or to produce them, as they themselves were attacked by them, so they called them the 'finger of God.' In Egyptian *dd ntru*=the phrase in the text, is found in several papyri (see Papyrus 438 Boulaq), and is used of anything sent by the divinity. The magicians meant thereby that the plague was sent by their own gods, not by Moses.

The account of the plague is imperfect, as there is no mention of Pharaoh's entreaty for its removal, or of Moses' intervention for this purpose; but in the case of the Fourth Plague, that of the *'ārôbh* or 'swarms' ($8^{20ff.}$, P), these lacunæ are supplied. There Moses is recorded to have threatened the infliction, and the LORD is said to have brought up the swarms, and at Pharaoh's entreaty they were afterwards removed. The nature of these pests is not mentioned, nor is there any reference to the magicians. These insects are called by LXX and Symmachus κυνόμυια, 'dog-flies,' interpreted by Jerome in the last paragraph of his epistle to Sunnia and Fretela '*omne genus muscarum*,' as if it were κοινόμυια. Aquila in Ps 78 calls them πάμμικτος, 'a mixed multitude,' a word used of crowds of men by Æschylus, *Persæ*, 53, 'a motley host.' Josephus (*Ant.* II. xiv. 3), Jerus. Targums, Sa'adya, and other Hebrew authorities call them different kinds of pestilent animals, but, as Knobel remarks, some *particular* creature must be meant.

Flies of many kinds abound in Egypt and are common pests, as testified by Sonnini (ii. 320), Carne (i. 77), Rüppell (73), etc. Such swarms are often brought up by the south wind, filling the houses and appearing in clouds. Comparison of the descriptions of these two plagues given in the passage renders it probable that 3 and 4 are both accounts of the one plague given by different writers. Ps 105 groups them together, while Ps 78 makes no mention of the *kinnîm*. With this plague began the sundering of the land of Goshen from the rest of Egypt.

(5) (6) In like manner there is a probable connexion between the Fifth Plague (Ex $9^{1ff.}$, J), the murrain, and the Sixth (9^{8}, P), the boils. Neither of these is explicitly mentioned in Ps 78 or 106, unless they are the 'evil angels' mentioned between the hail and the tenth plague in the former; and, considering the connexion between disease and demonology in the Jewish mind, this is probable. Plague 5 was heralded by an announcement to Pharaoh, while there was no such for 6. The Fifth was sent directly from the hand of the LORD, while Moses and Aaron are the instruments in the Sixth. It is also explicitly stated that 6 was upon beast as well as man (v.^{10}). All these considerations strengthen the probability that these

are respectively the Jahwistic and Priestly records of the one plague.

The nature of the murrain is not given; it was דֶּבֶר כָּבֵד מְאֹד 'a very grievous pestilence' (see PESTILENCE and PLAGUE, pp. 755, 865), but the word *deber* is too general to give a definite idea of its species. Leyrer has conjectured that it might be anthrax or milzbrand (Herzog, *RE*, viii. p. 251). It was a disease affecting flocks, herds, camels, horses, and asses, evidently very fatal (though v.^{26} shows that 'all' is not literally intended). Severe cattle plagues have been recorded in Egypt by many writers. Pruner says that splenic fever, anthrax, and rinderpest occasionally prevail, and speaks of an epidemic of the last in March 1842, which lasted nine months, and was very destructive, but it did not affect camels or horses. Camels are not very liable to epizootic diseases, but suffer sometimes from tuberculosis, and often from itch (102 ff.). They were, however, at the time of Moses not plentiful in Egypt, if they were found there at all (see Chabas, *Études sur l'Antiquité Historique*, 1873, p. 398 ff.; and Dillm. on Gn 12^{16}). Lepsius mentions the same outbreak of cattle-plague in 1842, which had been fatal to 40,000 oxen (p. 14); and it is also graphically described by Mrs. Poole (*The Englishwoman in Egypt*, i. 59, 114; ii. 32).

We have no mention of the removal of this plague, which probably worked itself out; but immediately succeeding it, if not a part of the same infliction, was the outbreak of the שְׁחִין *shĕḥîn* or 'boils' on mankind and beast. This came without warning, Moses and Aaron being instructed to sprinkle handfuls of the ashes of a furnace towards heaven. Although probably for the most part derived from P, there are signs of the influence of E in v.^{8}. This plague affected all classes, but we do not read that it was very fatal. Its nature has been discussed already in MEDICINE, p. 324, and references to similar diseases in Egypt will be found in Niebuhr (*Descr. d'Arabie*, i. 133). Little blister-like swellings on the skin are described by Döbel (*Wanderungen*, ii. 184); a more severe form is recorded by Berggren (*Reisen in Æg.* ii. 121). Similar diseases are described by Vansleb (*Voyage en Egypte*, 1677, p. 58), Volney (*Travels*, Eng. tr. i. 248), Wittman (who notices the pestilential effects produced by the putrid carcases of camels, horses, etc., around the Ottoman camp, leading to malignant fever, etc., and whose 'Medical Journal' is most valuable), *Travels with the Turkish Army*, 1803; Russegger (i. 247); Seetzen (*Reisen*, iii. 204, 209, 377), etc. In view of the recently discovered capacity of mosquitos and gnats to carry contagion, it is striking to note that disease of man and beast so quickly followed the swarms of flies. Josephus puts the distemper of animals as a supplement to the plagues of the swarms.

(7) (8) Egypt was essentially an agricultural country, as we can gather from the monuments, especially from the tomb-pictures; therefore the two plagues which followed affected the material prosperity of the country in its most vital point. The Plague of the hail was foretold to Pharaoh by Moses at his next interview (9^{18}, J), and by the warning he gave the Egyptians the opportunity of saving their cattle. On the day following, Moses, by God's command, stretched forth his hand to heaven (v.^{22}, E), and the storm of lightning and hail burst over the land, beating down the crops, breaking the trees, and killing the cattle left by the murrain (v.^{25}). Visitations of this kind, though not unexampled, are exceedingly rare in Egypt (see HAIL, vol. ii. p. 282). Pruner saw hail showers only three times in twelve years, and these were slight, while he knew of only one fatal case of lightning stroke in that time (p. 36). Sonnini describes a thunderstorm accompanied by snow (hail?) in January (ii. 133), Niebuhr in December (i. 497), as also Thevenot (i. 344). Wittman says that on 20th November 1801 'we had a tremendous storm of rain, thunder, and lightning, which began at two o'clock and continued near two hours' (p. 577). Another storm occurred in March. Lepsius relates that in December 1843 there was a sudden storm growing into a hurricane 'such as I had never seen in Europe,' and a hail which made the day dark as night (p. 26). Monconys also describes a lightning storm in January (p. 180); Pococke notes lightning and rain in the Fayyum in February (p. 92). Seetzen experienced it also in March (iii. 98); Vansleb heard thunder only twice in Egypt, in January and May 1673 (p. 39).

The destruction of the cattle was due to their being in the field in spite of the warning. Niebuhr says that the herds are put out in the field from January to April (i. 142), and Hartmann that they are generally kept in their stalls from May to the end of November (i. 232). See also Diodorus Siculus, i. 36). The date of this plague is fixed by v.$^{31.32}$ (E), which say that it happened when the barley was in the ear and the flax in bud ('bolled,' AV), but the wheat and spelt were not yet in ear, or sufficiently forward to be destroyed. Flax is sown usually in mid-November or December, rarely as late as in January (Russegger, i. 231), and flowers in February (v. Schubert, ii. 137; Forskål, *Flora*, p. xliii) or March (Russegger); it is usually pulled in April (Seetzen, iii. 241), according to Wilkinson about 110 days after sowing. Knobel quotes Sicard for its flowering as early as December, but this must have been exceptional. Denon found the barley in flower in December (p. 143). Sonnini says that the barley is nearly a month earlier than the wheat (ii. p. 20), and Brown, that the wheat is beginning to bud at the end of January (ii. p. 138). Wheat, spelt, and barley are generally sown in November. The barley harvest is early in March, sometimes 90 days after sowing. In Olivier's journey to the Pyramids in April, he found the barley already cut, the flax mostly pulled, but the wheat was ripening (iii. 125). Von Schubert (ii. 175) and Forskål confirm these observations, and state that the barley is ripe by the end of February or beginning of March, while the wheat is not ripe until April (*Flora*, p. xliii). The spelt (AV 'rye') ripens at the same time as the wheat (Forskål, p. xxvi). The deduction from these data is that the plague took place probably about the middle of January. Confirmatory observations as to the ripening of crops in Egypt will be found in Radziwill (*Hierosolymita Peregrinatio*, Brunsberg, 1601, 159), Nordmeyer (*Comment. Calendar Ægypt.*, Göttingen, 1792, 23–29), Shaw (ii. 171).

The Eighth Plague, that of locusts (Ex 10$^{4-6.12-15}$, J, E) followed while yet the devastation of the last plagues was fresh in the memories of the people, who said to Pharaoh, 'Knowest thou not that Egypt is destroyed?' (v.^{7}). Pharaoh was warned of its imminence, but Moses and Aaron were driven from his presence (v.^{11}). The plague followed the stretching forth of Moses' hand (v.^{12}) or rod (v.^{13}) over the land, and the locusts were brought from the Arabian side by an east wind. The coming of locusts from the East has been mentioned by Shaw, as it was in olden time by Agatharchides (*Mare Rubrum*, ch. v.) and Diodorus (iii. 29). Strabo likewise speaks of the locust-eaters of the Galla country, to whom the west wind drives the great clouds of these insects on which they live, and the unwholesome nature of that food (xvi. p. 772).

The species of locust was the אַרְבֶּה *'arbeh*, or common migratory locust (see above, p. 130^{a}).

The peculiarity of the plague was their coming in such immense numbers, for Egypt is by no means so liable to devastation by locusts as Syria; and they swept clean all the remnants of vegetation that the hail had left, including the wheat and the spelt. The ground was darkened, that is, concealed by the multitude of the locusts. Burckhardt has described such a locust-plague in the Ḥaurân (*Syria*, p. 381). Lepsius also, in March 1843, while engaged in opening a sarcophagus in a mummy pit, was suddenly overshadowed by a cloud of locusts from the south-west, which darkened the heavens (p. 45). Denon saw in May an immense mass of locusts flying from east to west a little over the ground (p. 286). Volney's description of the locust-plague in Syria is well known (i. 305).

At Pharaoh's entreaty Moses prayed for their removal, which was accomplished by a strong wind from the Mediterranean, which swept them into the Red Sea, for, destructive as they are, they are the sport of the winds so much that 'tossed like a locust' is a proverbial expression (Ps 109^{23}).

For other references to locusts in Egypt see Tischendorf's *Reise im Orient*, i. 252; Shaw, 165; Hasselquist, 254; Niebuhr, 168; Forskål, 81.

(9) **The Plague of darkness** was sent without warning, and was brought on by Moses stretching forth his hand (10$^{21-23}$, E). For three days the land was covered with a palpable cloud which shut out all light from sun, moon, and stars. This condition is described in the words וְיָמֵשׁ חשֶׁךְ 'that one may feel (the) darkness' (LXX *ψηλαφητὸν σκότος*). Of this plague there is a graphic account in Wis 17.

It has been supposed that the author of J did not know of this plague, from the words 'only this once' in v.^{17}, but it may have been immediately after the locusts, as if a part of the same visitation. The condition of darkness referred to is strikingly like that brought about by the severer form of the electrical wind *ḥamsin*. This is a S. or S.W. wind that is so named because it is liable to blow during the 25 days before and the 25 days after the vernal equinox (*ḥamsin*=50). It is often not so much a storm or violent wind as an oppressive hot blast charged with so much sand and fine dust that the air is darkened. It causes a blackness equal to the worst of London fogs, while the air is so hot and full of dust that respiration is impeded. There are excellent accounts of these storms of darkness in Prosper Alpinus, *Medic. Ægypt.* i. 7; Savary, ii. 229; Niebuhr, i. 468; Legh, 48; v. Schubert, ii. 409; Ruppell, 270; Sonnini, ii. 166; Pruner, 35; Wittman, ii. 54; Volney, i. 47; Pococke, i. 306. Denon says that it sometimes travels as a narrow stream, so that one part of the land is light while the rest is dark (p. 286). In such a way the Land of Goshen was left unclouded while the rest of Egypt was dark. As the first plague showed God's power over the river, so did this over the light of the sun, who as *Ra* was one of Egypt's chief deities. At Pharaoh's request this plague was also removed. Three days is not an uncommon duration for the *ḥamsin*.

(10) **The Death of the Firstborn.**—In his last interview with Pharaoh, Moses was dismissed from his presence with the threat of death if he again appeared on behalf of Israel, whereupon he announced God's last judgment (11^{4}). The plague followed at midnight on that day. God claimed all the firstborn of humanity as His own, and ordained that in Israel they were to be redeemed by sacrifice (13^{13}). In this plague the unredeemed firstborn of Egypt were sacrificed in one great slaughter. It affected all classes from Pharaoh on the throne to the maid at the mill (11^{5}, J), to the captive in the prison (12^{29}, J, P) as well as the domestic cattle. By this final catastrophe the obstinacy of Pharaoh was overcome, and, as Moses had foretold, the Egyptians not only freed Israel, but commanded their exodus.

There are many traditional and historical records of sudden outbreaks of plague. See Syncellus (i. 101–103), Diodorus (40), Thucydides (ii. 48), Procopius (ii. 22), etc. Modern outbreaks in the month of April, or a little after the vernal equinox, are reported by Bruce (iii. 715), Sonnini (i. 277), Tobler (*Lustreise*, i. 137), Legh (113). It is worthy of note that many authorities say that the plague often is worst at the time of the *ḥamsin* wind (Prosper Alpin. i. 7; Thevenot, i. 375; v. Schubert, ii. 138; Lane, i. 3; and Pruner, p. 419). The coexistence of cattle disease with the plague is mentioned by Döbel (*Wanderungen*, ii. 205).

The account of this plague bears internal evidence that it is compiled from materials from all three sources.

This catastrophe has been regarded by some as a sudden outbreak of *pestis siderans*, but according to the narrative it cannot have been a natural plague, but on account of the peculiarities in its course and incidence it was evidently a direct interposition, and one the memory of which was meant to have a lasting effect on the conduct of Israel (13$^{14.15}$).

In reviewing the narratives of these Divine judgments, we have seen not only that there are reasons to believe that they consisted of eight episodes, 1, 2, 3 (4), 5 (6), 7, 8, 9, 10, but that there is a certain thread of connexion running through the series. If the first took place towards the end of the period of high Nile in August, it is probable that the second occurred in September, which is still the month when frogs are most abundant. The insect plagues may conjecturally be supposed to follow in October or November, and the disease plagues in December. The notes of time of the hail-plague give us surer ground to refer it to January. The locusts and the darkness intervened between this and the 14th of Abib (the date of the Exodus).

In some of the series, and possibly in all, it is to be noted that the Divine power used the ordinary seasonal phenomena in a miraculously intensified form as the instrument of judgment. If the narrative of J, which confines the blood-change to the Nile, be taken as the oldest account, it is possible that it may have been due to some special detachment of a dam of vegetable matter like the *Sudd* above referred to. This, with the organisms which must exist in myriads in it, might well have caused the discoloration and fœtor of the waters. Such a mass of organic matter with its concomitant animal life would be the condition under which frogs would multiply rapidly, and may have been the antecedent used to bring about the condition of the Second Plague. The decomposing masses of frogs could not fail to have been the best possible breeding grounds of very many kinds of insects, a veritable 'motley multitude' fulfilling the name of the Fourth Plague. The results of recent bacteriological observations show how great a factor in the spread of disease these insects are, and so 5 and 6 would follow as the sequences of 3 and 4. The Seventh inaugurates a new series, and is followed by the two other plagues, depending on atmospheric conditions. The onset of the east wind brought the locusts, and the shift to the west removed them, while the dropping of the wind to the south-west brought up the dreaded *ḥamsin*, carrying the plague in its train.

In the Apocalyptic visions of the trumpets and vials (Rev 8 ff.) much of the imagery is taken from the story of the Plagues in Egypt.

LITERATURE.—Abd-al-latif, *History of Egypt*, French tr., Paris, 1810; Antes, *Manners and Customs of the Egyptians*, London, 1800; Berggren, *Reisen in Europa u. im Morgenlande*,

There is very little of value in the Talmudic or Rabbinic literature.

A. MACALISTER.

PLAIN.—This word (as a subst.) stands in AV, in some cases inaccurately, for several very different terms in the Heb., which it has been the aim of RV, though with only partial success, to express and distinguish correctly. The following are the words which are tr^{d} 'plain' in AV:—

1. אָבֵל 'meadow' in Jg 11^{33} ('the plain of the vineyards,' RV 'Abel-cheramim').

2. אֵלוֹן 'oak' (in accordance with an old Jewish interpretation), in 'plain(s) of Moreh,' Gn 12^{6}, Dt 11^{30}, and 'of Mamre,' Gn 13^{18} 14^{13} 18^{1}, RV in each case 'oak(s),' marg. 'terebinth(s)'; also in Jg 4^{11} $9^{6.37}$, 1 S 10^{3} (RV as before). See MOREH.

3. בִּקְעָה (from בָּקַע 'to cleave'), *a broad plain between hills* ('a surrounding of hills seems necessary to the name Biḳ'ah, as if land *laid open* in the midst of hills,' *HGHL* 655, where mention is also made of a small upland plain, surrounded by mountains, on the E. of Jordan, called the *Beḳ'a*, or [dimin.] the *Buḳei'a*; see also Stanley, *SP*, App. § 5). In AV *biḳ'āh* is rendered 'plain' in Gn 11^{2}, Neh 6^{2} ('the plain of Ono'), Ezk $3^{22.23}$, Am 1^{5} (RV 'valley'), Dn 3^{1} (Aram. בִּקְעָא,—'the plain of Dura'). Elsewhere in AV and RV 'valley,' by which, however, must then be understood not a ravine (גַּיְא), but a *broad vale*. The *Biḳ'āhs* mentioned by name in the OT are those of Jericho, Dt 34^{3} ('the Kikkār [see below], (even) the *plain* of Jericho'); of Mizpeh, Jos 11^{8} (prob. the *Merj 'Ayūn*, N.W. of Dan, between the Litāni and the Ḥasbāni); of Lebanon, Jos 11^{17} 12^{7} (probably the broad flat plain between Lebanon and Hermon, even now called in Arabic by a nearly corresponding word, *el-Beḳā'a*); of Megiddo, 2 Ch 35^{22}, Zec 12^{11} (the plain of Esdraelon, girt by hills on all sides; see *HGHL* 385 f.); of Ono, Neh 6^{2} (7 m. S.E. of Joppa); of Aven, Am 1^{5} (the broad plain between Lebanon and Hermon; see AVEN); and of Dura, Dn 3^{1} (near Babylon). *Biḳ'āhs* without names are referred to in Gn 11^{2}, Ezk $3^{22.23}$ 8^{4} $37^{1.2}$ (in the vision of the dry bones: prob. the same as the *biḳ'āh* of 3^{22} etc.); the word occurs also, without reference to specific localities, in Dt 8^{7} 11^{11}, Ps 104^{8}, Is 40^{4} (see RVm), 41^{18} 63^{14} (all). The retention of the two renderings 'plain' and 'valley' in RV is to be regretted; but it is no doubt due, at least in part, to the fact that there is no exactly corresponding English term. 'Plain' is, on the whole, preferable to 'valley.'

4. כִּכָּר (properly *a round*, *e.g.* of metal, *i.e.* a 'talent,' or of bread, *i.e.* a loaf or round cake), used specifically of the 'round,' or as we should probably say, the 'oval,' of Jordan, the (approximately) oval or oblong basin into which the depression (*el-Ghôr*) through which the Jordan flows expands, as it approaches the N. end of the Dead Sea: it must also, if the 'cities of the *kikkār*' are rightly placed at the S. end of the Dead Sea, have included the Dead Sea itself.[*] The expressions used are 'the *kikkār* of Jordan,' Gn $13^{10.11}$, 1 K 7^{46} (=2 Ch 4^{17}), and 'the *kikkār*' alone, Gn 13^{12} $19^{17.25.28.29}$, Dt 34^{3} (cited above), 2 S 18^{23}. The word occurs also, perhaps in the same sense, in Neh 3^{22}; but probably in a more general sense in 12^{28} (see Comm.: AV 'the plain country'). In RV always 'Plain' (usually with a capital P) Cf. *SP* 284, 287, 488; *HGHL* 505 f. No doubt this is the region meant by ἡ περίχωρος τοῦ Ἰορδάνου in Mt 3^{5}; for LXX renders כִּכָּר by ἡ περίχωρος in Gn and 2 Ch (ἡ π. τοῦ Ἰορδάνου in Gn $13^{10.11}$), and by τὰ περίχωρα in Dt.

5. מִישׁוֹר *a smooth and level tract of country* (from יָשַׁר 'to be level'): the general meaning of the word appears well from Ps 26^{12} 27^{11} ('a path of *evenness*'), 143^{10} (RVm), also from 1 K $20^{23.25}$ (where it is opposed to the 'hills'), Is 40^{4} RVm ('level'; ‖ בִּקְעָה), Zec 4^{7}. With the art., this word is used specifically of the elevated plateau, or table-land, of Reuben or Moab, E. of the Dead Sea, Dt 3^{10} 4^{43}, Jos $13^{9.16.17.21}$ 20^{8}, Jer $48^{8.21}$ (in the prophecy on Moab), 2 Ch 26^{10}. AV and RV in all these passages render 'plain,' except Dt 4^{43}, Jer 48^{21} 'plain country,' and 2 Ch 26^{10} AV 'plains.' RV has sometimes the marg. 'Or, *table land*.'

6. עֲרָבָה *steppe* (in poetry, Is $35^{1.6}$ 40^{3}, Jer 17^{6} *al.*), with the art., as a proper name, הָעֲרָבָה, the 'Ărābāh, the name given to the gravelly, sandy, and generally unfertile floor of the valley through which the Jordan runs, and which extends southwards to the Gulf of 'Aḳabah (see ARABAH; and *HGHL* 483 f.), now called *el-Ghôr* (the Hollow, or Depression), in AV nearly always 'the plain,' in RV 'the Arábah,' Dt $1^{1.7}$ 2^{8} (here of the same valley, S. of the Dead Sea, now *el-'Arăbah*), $3^{17.17}$[†] $4^{49.49}$ 11^{30} (AV 'the champaign'), Jos 3^{16} 8^{14} (see Dillm.) $11^{2.16}$ $12^{1.3.3.8}$ $18^{18.18}$ (AV 'Arabah,' RV 'the Arabah'), 1 S 23^{24}, 2 S 2^{29} 4^{7} 15^{28}, 2 K 14^{25} 25^{4} (=Jer 39^{4}=52^{7}), Ezk 47^{8} (AV 'the desert'), Am 6^{14} (AV 'the wilderness'), Zec 14^{10}, RV (fig. of a *level*; MT, however, as Baer shows, points both here and in Is 33^{9} without the art., *i.e.* 'like a steppe'); see also Is 33^{9} RVm.

The same word, in the plural, occurs also in the two expressions, 'the plains—better *steppes*, or *desert parts*—of Moab,' Nu 22^{1} $26^{3.63}$ 31^{12} $33^{48.49.50}$ 35^{1} 36^{13}, Dt 34^{1} (see Driver), v.^{8}, Jos 13^{32}, and 'of Jericho,' Jos 4^{13} 5^{10}, 2 K 25^{5} (Jer 39^{5} 52^{8}), of the parts of the same depression, on the opposite sides of the Jordan, in the latitude of Jericho. In the case of the plur., RV retains the rendering 'plains': in 2 S 15^{28} 17^{16} ('plains of the wilderness'), however, it follows the Kethibh (עַבְרוֹת for עַרְבוֹת), and renders 'fords' (with marg. 'plains'). There may not be a precise English equivalent; but 'plains,' it should be remembered, does not at all express the distinctive idea of the Hebrew word (bare, desolate, and unfertile soil; cf. *HGHL* 483, 485).

7. הַשְּׁפֵלָה (from שָׁפֵל *to be low*), the *lowland*, the technical designation of the low hills and flat valley land stretching down towards the Mediterranean Sea in the W. and S.W. of Judah. This term is in AV rendered 'plain' only in Jer 17^{26}, Ob ^{19}, Zec 7^{7}; 'low plains' in 1 Ch 27^{28}, 2 Ch 9^{27}; 'vale' in Dt 1^{7}, Jos 10^{40}, 1 K 10^{27}, 2 Ch 1^{15}, Jer

---

[*] Cf. under LOT, pp. 150, 151.

[†] Here, as also 4^{49b}, Jos 3^{16} 12^{3b}, 2 K 14^{25}, the 'Sea of the Arabah,' *i.e.* the Dead Sea; cf. Ezk 47^{8}, Am 6^{14}.

33^{13}; 'valley(s)' in Jos 9^1 $11^{2.16.16}$ 12^8 15^{33}, Jg 1^9, Jer 32^{44}; 'low country' in 2 Ch 26^{10} 28^{18}: in RV it is rendered uniformly 'lowland.' The reference in all these passages is the same, except in Jos $11^{2.16b}$, where the context shows that a locality further to the N. must be intended, probably a group of similar low hills, between Carmel and the high central range of Samaria (*HGHL* 49 and 203 n.). The LXX represents השפלה mostly by ἡ πεδινή (cf. 1 Mac 3^{40}), but by ἡ Σεφηλα in Jer 32^{44}, 33^{13}, Ob ^{19}, 2 Ch 26^{10}, which also occurs in 1 Mac 12^{38} (AV 'Sephela,' RV 'the plain country').

The region commonly known as 'the Shephēlāh' must have been a fairly definite one: in Jos $15^{33\text{-}44}$ it forms a distinct district of Judah (side by side with the 'Negeb,' v.$^{21\text{ff.}}$, the 'hill country,' v.$^{48\text{ff.}}$, and the 'wilderness,' v.$^{81\text{f.}}$), and 39 (40) Judahite cities contained in it are enumerated, those at present identified being (beginning at the N.) Gimzo (a little S.E. of Lydda), Aijalon, Gedērah, Eshtaol, Ẓor'ah, Beth-shemesh, 'En-gannim, Ẓanoaḥ, Jarmuth, Socoh, 'Adullam, Marēshah, 'Eglon and Lachish (W.S.W. of Marēshah), and Beth-tappuaḥ (a little W. of Ḥebron): Adida (included in it in 1 Mac 12^{38}) is a little N. of Gimzo (Ḥaditheh); Emmaus (*ib.* 3^{40}) is very near Aijalon; and Timnah (2 Ch 28^{18}) is close to 'En-gannim. All these cities are between the high central range of Judah on the E. and the Philistine plain on the W. The W. limit of the 'Shephēlāh' has, however, been disputed. It has generally (*e.g.* by Dillm. on Jos 15^{33}) been held to include the Philistine plain, and the Phil. cities are certainly enumerated after those of Judah in Jos $15^{45\text{-}47}$; on the other hand, Ob ^{19}, Zec 7^7, and 2 Ch 28^{18} imply that it was outside the Phil. territory. Hence G. A. Smith insists strongly that though the term may sometimes have been used more widely, it was limited more properly to the intermediate region indicated above, consisting of a mass of 'low hills,' varied often by stretches of 'flat valley land,' which, as viewed from the Phil. plain and the sea, appear 'buttressing the central range all the way along,' but which are separated from it in fact by a well-defined series of valleys, running from Aijalon to near Beer-sheba' (*HGHL* 49, 211 ff.; cf. Buhl's criticism, *Geogr.* 104, with Smith's reply, *Expositor*, Dec. 1896, pp. 404–406). This 'maze' of hills 'curves round the Phil. plain from Jaffa to Gaza like an amphitheatre': it is pierced by five important valleys running up from the plain into the heart of Judah: viz. (1) the road from Joppa and Lydda, through the hollow Vale (עֵמֶק) of Aijalon, and then up through the hills, past the two Beth-ḥorons, to Gibe'on and Michmash; (2) the Wādy eṣ-Ṣurār, or valley (נַחַל) of Soreḳ, up past Beth-shemesh and Ḳiriath-je'arim, to Jerusalem (the course taken by the modern railway from Jaffa); (3) the Wādy eṣ-Sunṭ, leading up from Tell eṣ-Ṣāfi, through the Vale (עֵמֶק) of Elah, past Socoh, and then either up the Wādy el-Jindy to Bethleḥem, or (turning S.) along the Wādy eṣ-Ṣur, past 'Adullam, to Ḳe'ilah; (4) the Wādy el-Afranj leading up from Ashdod, past Eleutheropolis, to Beth-tappuaḥ and Ḥebron; and (5) the Wādy el-Ḥesy, starting a little N. of Gaza, passing Lachish, and leading up to a point 6 miles S.W. of Ḥebron. The historical and strategical importance of these valleys is well drawn out in *HGHL* 209–236: the first, especially, is a route along which have passed many times the hosts of both invading and defeated foes.

8. τόπος πεδινός, Lk 6^{17}; RV 'a level place.'

Of the words rendered 'plain,' even in RV (Nos. 3, 4, 5, 6), each, it will now be seen, has a definite and distinctive meaning of its own: the environs of Jericho are indeed described (from different points of view) as a *kikkār*, a *biḳ'āh*, and *'ărābōth*; but the *mishōr*, for instance, could never have been called a *biḳ'āh*, nor could a *biḳ'āh*, speaking generally, have been called an *'ărābāh*; and the 'plain' (*mishōr*) inhabited by the Moabites (Jer 48^8) was geographically quite distinct from the 'plains' (*'ărābōth*) of Moab. The only term which really corresponds completely to our 'plain' is *mishōr*. S. R. DRIVER.

PLAIN.—The only unfamiliar occurrence of the adj. is in Gn 25^{27} 'Jacob was a plain man, dwelling in tents.' As RVm ('or *quiet* or *harmless*, Heb. *perfect*') shows, the Heb. (תָּם) is the epithet so frequently applied to Job and tr^d 'perfect' (Job $1^{1\text{-}8}$ 2^3 8^{20} $9^{20.21}$; cf. 9^{22}, Ps 37^{37} 64^4). The idea expressed by the word is completeness or flawlessness. 'In the present context,' says Dillmann, 'it can neither mean morally blameless nor ἄπλαστος, ἁπλοῦς, *simplex*, simple, unsophisticated; for Jacob, in what follows, appears always, on the contrary, as sly and cunning.' He compares the German *fromm* (pious), and considers the meaning to be ἥμερος, 'quiet' or 'peaceful,' in antithesis to 'wild.' The tr. 'plain' is from the Geneva Bible, which has the marg. alternative 'simple and innocent.' 'Simple' is Tindale's word, and the marg. note in Matthew's Bible reads, 'He is simple that is without craft and decept and contynueth in belevyng and executynge of godes wyll.' J. HASTINGS.

PLANE TREE.—Gn 30^{37}, Ezk 31^8, AV 'chestnut,' Sir 24^{14}. See CHESTNUT.

PLANT, PLANTS.—See NATURAL HISTORY.

PLAY.—The verb to play had a wider use formerly than now. Tindale has: Ex 1^{10} 'Come on, let us playe wisely with them, lest they multiply'; Ex 5^5 'Beholde, there is much people in the londe, and ye make them playe and let their worke stonde'; Ex 10^2 'the pagiantes which I have played in Egipte, and the miracles which I have done amonge them.' And in AV to 'play' is used in the sense of to 'sport,' not only of 'boys and girls' (Zec 8^5) or a 'sucking child' (Is 11^8), but of men and women in worship. Thus Ex 32^6 'The people sat down to eat and to drink, and rose up to play' (לְצַחֵק,* quoted in 1 Co 10^8 παίζειν); 1 S 18^7 'The women answered one another as they played' (הַמְשַׂחֲקוֹת,† RV 'in their play'); 2 S 6^5 'And David and all the house of Israel played before the Lord on all manner of instruments made of fir wood [or, better, 'with all their might, even with songs,' reading, with parallel passage in 1 Ch, בְּכָל־עֹז וּבְשִׁירִים instead of בְּכֹל עֲצֵי בְרוֹשִׁים], even on harps,' etc. (the playing here is not playing *on* the instruments as AV, but sporting and dancing to the accompaniment of the music on the instruments, as shown in 1 Ch 13^8; RV 'with all manner of instruments'). See GAMES.

The phrase 'play the man' occurs in 2 S 10^{12} 'Be of good courage, and let us play the men for our people' (חֲזַק וְנִתְחַזַּק, LXX ἀνδρίζου καὶ κραταιωθῶμεν), a phrase which comes from the Douay Bible, where, however, it is the tr. of the first

---

[*] This verb צחק in its Qal conjug. is the usual verb in Gn (where alone it is found) meaning to laugh (Gn 17^{17} $18^{12.13.15\,bis}$ 21^6); in its Piel conjug. it occurs Gn 19^{14} 21^9 (RVm 'play') $39^{14.17}$ (followed by בְּ) where it is tr. 'mock'; 26^8 'sport'; and Jg 16^{25} 'make sport.'

[†] This, a later form of צחק, is the verb translated 'play' (in the sense of sport) throughout the rest of OT (except Is 11^8 'the sucking child shall play on the hole of the asp,' שִׁעֲשַׁע), 1 S 18^7, 2 S 2^{14} $6^{5.21}$, 1 Ch 13^8 15^{29}, Job 40^{20} 41^5 (here and in the following passage with בְּ='play with.' Followed by לְ, שׂחק means 'mock at,' *e.g.* Ps 37^{13} 59^8, Pr 31^{25}, Job 5^{22}. Margoliouth surely forgets this when [p. 17 of *The Origin of the 'Original Hebrew' of Ecclesiasticus*] he renders שׂחק לְ 'played with'), Ps 104^{26}, Zec 8^5.

Heb. word, 'Play the man, and let us fight for our people,' after Vulg. 'Esto vir fortis et pugnemus.' The phrase is not uncommon, especially in echoes of this passage, as Foxe, *Martyrs*, vii. 550, 'At the stake Latimer exhorted his fellow-sufferer, Be of good comfort, Master Ridley, and play the man'; Herbert, 'The Church Porch,' lxxvii.—

> 'In brief, acquit thee bravely, play the man:
> Look not on pleasures as they come, but go;
> Deferre not the least virtue: life's poore span
> Make not an ell by trifling in thy wo.'

J. HASTINGS.

PLEAD.—To plead in AV never means to pray or beseech, but always to argue for or against a cause. Thus Job 16^{21} 'O that one might plead for a man with God,' and 19^{5} 'If indeed ye will magnify yourselves against me, and plead against me my reproach.' The verb most frequently tr. 'plead' is רִיב, which is also rendered 'contend,' 'strive with' or 'strive against,' etc. It is the verb used in Job 13^{19} 'Who is he that will plead with me' (RV 'contend with me'); Is 1^{17} 'Plead for the widow'; 3^{13} 'The Lord standeth up to plead'; Jer 2^{9} 'I will yet plead with you, saith the Lord'; 2^{29} 'Wherefore will ye plead with me?'; Hos 2^{2} 'Plead with your mother, plead.' Amer. RV usually prefers 'contend.'

The subst. 'pleading' has the same meaning in Job 13^{6} 'Hearken to the pleadings of my lips' (רִבוֹת).

Plead is to be traced back to Lat. *placitum*, an opinion (fr. *placere*, to please); in Low Lat. a writ summoning a court of justice, in the form *quia tale est nostrum placitum*, 'for such is our pleasure.' Then *placitum* came to mean the court so convened, and also the pleading or business done at it. *Placitum* became *plait* in Fr., whence Eng. 'plea' and 'plead.' An older spelling of plead is 'pleate,' found in Ps 35^{1}, Pr. Bk. (in mod. editions printed 'plead'). J. HASTINGS.

PLEASURE as a verb is found in 2 Mac 2^{27} 'for the pleasuring of many' (*διὰ τὴν τῶν πολλῶν εὐχαριστίαν*, AVm 'to deserve well of many,' RV 'for the sake of the gratitude of the many'); and 12^{11} 'promising both to give him cattle, and to pleasure him otherwise' (*ὠφελήσειν αὐτούς*, RV 'to help his people'). The Rhemish translators speak (on Lk 16^{9}) of 'the farmers whom the il steward pleasured.' Cf. Shaks. *Timon*, III. ii. 63—'I count it one of my greatest afflictions that I cannot pleasure such an honourable gentleman.' J. HASTINGS.

PLEDGE.—1. חֲבֹל (once Ezk 18^{7} חֲבֹלָה) noun, חָבַל verb (LXX *ἐνεχύρασμα, -μός, ἐνεχυράζω*). The primary meaning of this root is 'to bind,' hence 'to hold one by a pledge.' The taking of a pledge for the repayment of a loan was sanctioned by the Law (Ex 22^{26} [Book of the Covenant], cf. Dt $24^{6.\ 10\mathrm{ff.}}$, where, however, in v.$^{10\mathrm{ff.}}$ the term for 'pledge' is עֲבֹט, see below); but it was enacted that when this pledge consisted of the large square outer garment or cloak called *simlah* or *salmah*, it must be returned before nightfall, since this garment often formed the only covering of the poor at night (cf. the reproaches uttered in Am 2^{8}, Job 22^{6} 24^{9}, and see Ezk $18^{6.\ 12.\ 16}$ 33^{15}). In Pr 20^{16} we read, 'Take his garment that is surety for a stranger, and hold him in pledge (AV and RVm 'take a pledge of him') *that is surety* for strangers' (m. 'a strange woman' [following *Ḳerê*], so AV, omitting 'that is surety'). The same saying recurs in 27^{13}, where both AV and RV have 'a strange woman.' The Heb. reads (לְ)קַח־בִּגְדוֹ כִּי־עָרַב זָר וּבְעַד נָכְרִיָּה (נָכְרִים) חַבְלֵהוּ; LXX of 27^{13} (20^{16} is wanting) *ἀφελοῦ τὸ ἱμάτιον αὐτοῦ, παρῆλθεν γάρ· ὑβριστὴς ὅστις τὰ ἀλλότρια λυμαίνεται.* This appears to be a reflection on the folly (cf. Pr 22^{27}) of becoming responsible for another man's debt (see Toy, *ad loc.*, who would read, 'for a stranger *or* strangers' [masc. sing. or plur., not fem. sing.] in both passages). It was forbidden to 'take the mill or the upper millstone to pledge,' as this was tantamount to taking 'a man's life to pledge,' Dt 24^{6} (see Driver's note). A similar provision is found in v.^{17}, which forbids taking the widow's garment (בֶּגֶד) in pledge; cf. Job 24^{3}, where the taking of the widow's ox is condemned.

2. עֲבֹט occurs four times, Dt $24^{10.\ 11.\ 12.\ 13}$ (LXX *ἐνέχυρον*). In vv.$^{10.\ 11}$ it is prescribed that when an Israelite lends to his neighbour on the security of a pledge, he is not to go into the house for the purpose of fetching his pledge, but the borrower is to have the right of selecting the article. Vv.$^{12.\ 13}$ contain the same provision as Ex $22^{26\mathrm{f.}}$ (see above). The primary sense of the root עבט (Qal 'borrow or pledge,' LXX *δανείζομαι*; Hiph. 'lend on pledge,' LXX *δανείζω*) is doubtful.

The word 'pledge' is also introduced by RV in Hab 2^{6} as tr. of עַבְטִיט in the phrase וּמַכְבִּיד עָלָיו עַבְטִיט (LXX *καὶ βαρύνων τὸν κλοιὸν αὐτοῦ στιβαρῶς*): RV 'and that ladeth himself with pledges' (*sc.* which he has taken from the nations, and whose restitution is at last compelled [cf. Job $20^{10.\ 15.\ 20}$]). AV 'thick clay' and Vulg. *lutum denseum* are due to understanding עַבְטִיט as two words, עַב (constr.) and טִיט 'clay,' cf. Ex 19^{9} בְּעַב הֶעָנָן 'in a thick cloud.'

3. עָרַב, Qal and Hithp., 'to be surety,' 'to give a pledge,' 'to make a wager.' Thus in 2 K 18^{23} = Is 36^{8} the Rabshakeh says in his message to Hezekiah, 'Now, therefore, I pray thee, give pledges (AVm 'hostages') to my master the king of Assyria' (הִתְעָרֶב, *μίχθητε*). The correct sense is undoubtedly that given in RVm 'make a wager,' by handing over a pledge to be forfeited in case of failure to furnish men to mount the 2000 horses offered by the Assyrian king. The noun עֲרֻבָּה is tr. 'pledge' in 1 S 17^{18} 'Look how thy brethren fare and take their pledge' (אֶת־עֲרֻבָּתָם תִּקָּח, A *ὅσα ἂν χρήζωσιν γνώσῃ*, Luc. *καὶ εἰσοίσεις μοι τὴν ἀγγελίαν αὐτῶν*), *i.e.* 'bring back some token of their welfare' (Driver), which had probably been agreed upon beforehand. This yields an excellent sense, and there appears to be no sufficient reason (with many scholars, including H. P. Smith) to doubt the correctness of the MT. The cognate form עֵרָבוֹן (LXX *ἀρραβών*, cf. the NT use of this word for the 'earnest' of the Spirit in 2 Co 1^{22} 5^{5}, Eph 1^{14}; see art. EARNEST) is used in Gn $38^{17.\ 18.\ 20}$ of the pledge (consisting of his staff and signet ring) which Judah gave to Tamar as security for the fulfilment of his promise to send her a kid. J. A. SELBIE.

PLEIADES.—The three passages (Am 5^{8}, Job 9^{9} 38^{31}) which contain the proper noun כְּסִיל (*Kĕsîl*, Orion) also mention כִּימָה (*Kîmā*), and the Eng. Versions have in each case taken the latter to be the Pleiades, their rendering, 'the seven stars,' in the first of these passages, obviously pointing to the asterism which they call Pleiades in the other two.* The Pleiades are a group of stars, seven larger and some smaller, in the constellation of the Bull, near the ecliptic, belonging to the northern hemisphere. To the ancients the rising and setting of this group announced respectively the beginning and end of the season of navigation. Hence their name is usually derived from the Greek *πλέω*, 'to sail,' though others would connect it with *πλέος*, 'full,' and understand the reference to be to their being apparently closely packed together. Josephus, in one of his rare references to astronomical phenomena, employs 'the setting of the Pleiades' to mark a date (*Ant.* XIII. viii. 2). The common Arabic name for these stars is *el-negm*, *i.e.* the star group *par excellence*, because they serve the nomads and peasants as calendar and time-measurer, especially by their monthly conjunctions with the moon. It has been shown recently that in Egypt the rising of the Pleiades was watched for astronomical purposes 'even in pyramid times,' and that three Greek temples—the archaic temple to Minerva at Athens (B.C. 1530), the Hecatompedon (B.C. 1150), on whose site the Parthenon was subsequently built, and the temple of Minerva at Sunium (B.C. 845)—were orientated, the first two to the rising and the third to the setting of η Tauri in the Pleiades [see Lockyer, pp. 418, 419].

---

* Lockyer, *The Dawn of Astronomy*, p. 134, remarks: 'The seven stars are held by many to mean the Pleiades, and not the Great Bear; but this, I think, is very improbable.' Yet Lockyer has admitted, p. 133, that the Pleiades are mentioned in Job 38^{31}, and there is no good reason why the original word should have diverse senses in the two passages.

The verb *kûm*, from which *Kîmā* must be derived, is not found in biblical Hebrew. In Syriac the cognate verb is frequently employed in the sense of 'heaping up.' In Arabic *kumat* = 'a heap.' In Assyrian *kimtu* = 'a family.' The name *Kîmā* would thus seem peculiarly appropriate to the Pleiades. The ancient VSS of the Bible, though somewhat wavering, are on the whole in favour of the identification. The LXX at Job 9^9 has Ἀρκτοῦρον, at Job 38^{31} Πλειάδα, at Am 5^8 it follows a corrupt text. The Pesh. and the Targ. retain the Hebrew word. Aq., Symm., and Theod. all use Πλειάδα at Am 5^8. Jerome varies between *Hyades* (Job 9^9), *Pleiades* (Job 38^{31}), and *Arcturus* (Am 5^8). An attempt has been made by Hoffmann ('Versuche zu Amos,' *ZATW*, 1883) to prove that *Kîmā* is Sirius. The chief arguments are that Sirius, Orion, the Hyades, and the Pleiades—the order which, on this interpretation, is followed at Job $38^{31.32}$—are ranged in the sky in this order, almost in a straight line; and, moreover, that an accurate picture of natural phenomena is thus obtained. 'Dost thou keep bound the refreshing influences of Sirius, and dost thou let loose the outpourings of Orion?' The reference would then be to the rise and overflow of the Nile, which was heralded each year by the heliacal rising of Sirius on the day of the summer solstice. But this interpretation depends partly on the conjectural alteration of the word מוֹשְׁכוֹת into מסכות, which we have felt constrained to reject [see art. ORION], and partly on a mistaken derivation and explanation of מַעֲדַנּוֹת (LXX δεσμόν), which does not mean outpourings, but 'bands,' 'links,' 'knots.'

As might have been expected, this conspicuous group of stars arrested the attention and exercised the imagination of many peoples. The Australian saw in them a group of girls playing the corroboree. The North American Indian thought of them as dancers. There is some reason for believing that at one time in Egypt they were connected with Isis. The Greeks represented them as sisters flying before Orion: the maidens prayed for deliverance from the giant hunter, and were heard by the gods, who changed them into doves, and placed them amongst the stars. In this mythology their names are Electra, Maia, Taygete, Alcyone, Celæno, Sterope, and Merope. The Arabs pictured them as a group of riders mounted on camels; and Wetzstein (in App. to Delitzsch's *Book of Job*) points out that they named the star immediately in front of the cluster *ḥadi*, *i.e.* the singer who rides in front of a troop of camels and stimulates them to swift movement by his song. The Persians compare them to a cluster of jewels or a necklace. Their mention in the Bible has no mythological tinge. At Am 5^8, Job 9^9, the constellations are adduced as forming part of that wonderful complex of creation the existence of which bears testimony to the Maker's almightiness. At Job 38^{31} they are signs of the seasons, and the recurrence of these seasons year by year is altogether beyond the control of man. He cannot tie the bands which hold this group together—another proof of that impotence which should lead him willingly to submit to God.

LITERATURE.—Hoffmann's article quoted above; Cheyne, *Job and Solomon*, 1887, p. 290; Cox, *Book of Job*, 1885, p. 518; Delitzsch, *Book of Job*, Eng. tr. 1866; Com. on *Job* by A. B. Davidson (1884), or E. C. S. Gibson (1899). Duhm, *Das Buch Hiob*, 1897, follows Gustav Bickell, *Das Buch Job*, 1894, in omitting the verse Job 9^9 from the text.

THE END OF VOL. III.

A

Dictionary of the Bible

VOLUME IV

PREFACE

In issuing the last volume of the Dictionary of the Bible, the Editor desires to record his sense of the goodness of God in enabling him to carry it through to the end, and to beseech His blessing on the use of it, that His Name may be glorified. He desires also very heartily to thank all those who have been associated with him in its production. He thanks the Publishers for their confidence at the beginning, for the liberty they have left him, and for the perfect courtesy of all their intercourse with him. He thanks the Printers also, Messrs. Morrison & Gibb, and their employees, for their skilful workmanship and their patient personal interest. And he thanks all the Authors. Chosen because they were believed to be able to give the best account of the subjects entrusted to them, they have done their work in such a way as to vindicate their choice; while the relations between them and the Editor have been most agreeable throughout. He thanks them all, but especially those with whom he has been most closely associated in the oversight of the work—Dr. John A. Selbie, Dr. S. R. Driver, Dr. H. B. Swete, and Dr. W. Sanday. There is another, Dr. A. B. Davidson, but he has passed beyond the voice of earthly gratitude.

⁂ While this volume completes the Dictionary as announced, an Extra Volume is in preparation, to contain Indexes and certain subsidiary articles of importance.

LIST OF ABBREVIATIONS

I. GENERAL

Alex. = Alexandrian.
Apoc. = Apocalypse.
Apocr. = Apocrypha.
Aq. = Aquila.
Arab. = Arabic.
Aram. = Aramaic.
Assyr. = Assyrian.
Bab. = Babylonian.
c. = *circa*, about.
Can. = Canaanite.
cf. = compare.
ct. = contrast.
D = Deuteronomist.
E = Elohist.
edd. = editions or editors.
Egyp. = Egyptian.
Eng. = English.
Eth. = Ethiopic.
f. = and following verse or page; as Ac $10^{34\text{f.}}$
ff. = and following verses or pages; as Mt $11^{28\text{ff.}}$
Gr. = Greek.
H = Law of Holiness.
Heb. = Hebrew.
Hel. = Hellenistic.
Hex. = Hexateuch.
Isr. = Israelite.
J = Jahwist.
J″ = Jehovah.
Jerus. = Jerusalem.
Jos. = Josephus.
LXX = Septuagint.
MSS = Manuscripts.
MT = Massoretic Text.
n. = note.
NT = New Testament.
Onk. = Onkelos.
OT = Old Testament.
P = Priestly Narrative.
Pal. = Palestine, Palestinian.
Pent. = Pentateuch.
Pers. = Persian.
Phil. = Philistine.
Phœn. = Phœnician.
Pr. Bk. = Prayer Book.
R = Redactor.
Rom. = Roman.
Sam. = Samaritan.
Sem. = Semitic.
Sept. = Septuagint.
Sin. = Sinaitic.
Symm. = Symmachus.
Syr. = Syriac.
Talm. = Talmud.
Targ. = Targum.
Theod. = Theodotion.
TR = Textus Receptus.
tr. = translate or translation.
VSS = Versions.
Vulg. = Vulgate.
WH = Westcott and Hort's text.

II. BOOKS OF THE BIBLE

Old Testament.

Gn = Genesis.
Ex = Exodus.
Lv = Leviticus.
Nu = Numbers.
Dt = Deuteronomy.
Jos = Joshua.
Jg = Judges.
Ru = Ruth.
1 S, 2 S = 1 and 2 Samuel.
1 K, 2 K = 1 and 2 Kings.
1 Ch, 2 Ch = 1 and 2 Chronicles.
Ezr = Ezra.
Neh = Nehemiah.
Est = Esther.
Job.
Ps = Psalms.
Pr = Proverbs.
Ec = Ecclesiastes.
Ca = Canticles.
Is = Isaiah.
Jer = Jeremiah.
La = Lamentations.
Ezk = Ezekiel.
Dn = Daniel.
Hos = Hosea.
Jl = Joel.
Am = Amos.
Ob = Obadiah.
Jon = Jonah.
Mic = Micah.
Nah = Nahum.
Hab = Habakkuk.
Zeph = Zephaniah.
Hag = Haggai.
Zec = Zechariah.
Mal = Malachi.

Apocrypha.

1 Es, 2 Es = 1 and 2 Esdras.
To = Tobit.
Jth = Judith.
Ad. Est = Additions to Esther.
Wis = Wisdom.
Sir = Sirach or Ecclesiasticus.
Bar = Baruch.
Three = Song of the Three Children.
Sus = Susanna.
Bel = Bel and the Dragon.
Pr. Man = Prayer of Manasses.
1 Mac, 2 Mac = 1 and 2 Maccabees.

New Testament.

Mt = Matthew.
Mk = Mark.
Lk = Luke.
Jn = John.
Ac = Acts.
Ro = Romans.
1 Co, 2 Co = 1 and 2 Corinthians.
Gal = Galatians.
Eph = Ephesians.
Ph = Philippians.
Col = Colossians.
1 Th, 2 Th = 1 and 2 Thessalonians.
1 Ti, 2 Ti = 1 and 2 Timothy.
Tit = Titus.
Philem = Philemon.
He = Hebrews.
Ja = James.
1 P, 2 P = 1 and 2 Peter.
1 Jn, 2 Jn, 3 Jn = 1, 2, and 3 John.
Jude.
Rev = Revelation.

III. ENGLISH VERSIONS

Wyc. = Wyclif's Bible (NT *c.* 1380, OT *c.* 1382, Purvey's Revision *c.* 1388).
Tind. = Tindale's NT 1526 and 1534, Pent. 1530.
Cov. = Coverdale's Bible 1535.
Matt. or Rog. = Matthew's (*i.e.* prob. Rogers') Bible 1537.
Cran. or Great = Cranmer's 'Great' Bible 1539.
Tav. = Taverner's Bible 1539.
Gen. = Geneva NT 1557, Bible 1560.
Bish. = Bishops' Bible 1568.
Tom. = Tomson's NT 1576.
Rhem. = Rhemish NT 1582.
Dou. = Douay OT 1609.
AV = Authorized Version 1611.
AVm = Authorized Version margin.
RV = Revised Version NT 1881, OT 1885.
RVm = Revised Version margin.
EV = Auth. and Rev. Versions.

IV. FOR THE LITERATURE

AHT = Ancient Hebrew Tradition.
AJSL = American Journal of Sem. Lang. and Literature.
AJTh = American Journal of Theology.
AT = Altes Testament.
BL = Bampton Lecture.
BM = British Museum.
BRP = Biblical Researches in Palestine.
CIG = Corpus Inscriptionum Græcarum.
CIL = Corpus Inscriptionum Latinarum.
CIS = Corpus Inscriptionum Semiticarum.
COT = Cuneiform Inscriptions and the OT.
DB = Dictionary of the Bible.
EHH = Early History of the Hebrews.
GAP = Geographie des alten Palästina.
GGA = Göttingische Gelehrte Anzeigen.
GGN = Nachrichten der königl. Gesellschaft der Wissenschaften zu Göttingen.
GJV = Geschichte des Jüdischen Volkes.
GVI = Geschichte des Volkes Israel.
HCM = Higher Criticism and the Monuments.
HE = Historia Ecclesiastica.
HGHL = Historical Geog. of Holy Land.
HI = History of Israel.
HJP = History of the Jewish People.
HPM = History, Prophecy, and the Monuments.
HPN = Hebrew Proper Names.
IJG = Israelitische und Jüdische Geschichte.
JBL = Journal of Biblical Literature.
JDTh = Jahrbücher für deutsche Theologie.
JQR = Jewish Quarterly Review.
JRAS = Journal of the Royal Asiatic Society.
JRL = Jewish Religious Life after the Exile.
JThSt = Journal of Theological Studies.
KAT = Die Keilinschriften und das Alte Test.
KGF = Keilinschriften u. Geschichtsforschung.
KIB = Keilinschriftliche Bibliothek.
LCBl = Literarisches Centralblatt.
LOT = Introd. to the Literature of the Old Test.
NHWB = Neuhebräisches Wörterbuch.
NTZG = Neutestamentliche Zeitgeschichte.
ON = Otium Norvicense.
OP = Origin of the Psalter.
OTJC = The Old Test. in the Jewish Church.
PB = Polychrome Bible.
PEF = Palestine Exploration Fund.
PEFSt = Quarterly Statement of the same.
PSBA = Proceedings of Soc. of Bibl. Archæology.
PRE = Real-Encyclopädie für protest. Theologie und Kirche.
QPB = Queen's Printers' Bible.
RB = Revue Biblique.
REJ = Revue des Études Juives.
RP = Records of the Past.
RS = Religion of the Semites.
SBOT = Sacred Books of Old Test.
SK = Studien und Kritiken.
SP = Sinai and Palestine.
SWP = Memoirs of the Survey of W. Palestine.
ThL or *ThLZ* = Theol. Literaturzeitung.
ThT = Theol. Tijdschrift.
TS = Texts and Studies.
TSBA = Transactions of Soc. of Bibl. Archæology.
TU = Texte und Untersuchungen.
WAI = Western Asiatic Inscriptions.
WZKM = Wiener Zeitschrift für Kunde des Morgenlandes.
ZA = Zeitschrift für Assyriologie.
ZAW or *ZATW* = Zeitschrift für die Alttest. Wissenschaft.
ZDMG = Zeitschrift der Deutschen Morgenländischen Gesellschaft.
ZDPV = Zeitschrift des Deutschen Palästina-Vereins.
ZKSF = Zeitschrift für Keilschriftforschung.
ZKW = Zeitschrift für kirchliche Wissenschaft.
ZNTW = Zeitschrift für die Neutest. Wissenschaft.

A small superior number designates the particular edition of the work referred to, as *KAT*^{2}, *LOT*^{6}.

DICTIONARY OF THE BIBLE

PLEROMA (πλήρωμα; Lat. *plenitudo, supplementum, pleroma*; AV and RV 'fulness').—A word of common Greek usage, which is raised to a semi-technical meaning in relation to God in certain books of the NT connected with Asia Minor (Ephesians, Colossians, John (prol.)). This meaning may have been given to it first by St. Paul; but his absolute use of it in Col 1^{19}, without any explanation added, suggests that it was already in use among the false teachers against whom he is writing. Lightfoot conjectures that it had a Palestinian origin, representing the Hebrew מלא.

The word itself is a relative term, capable of many shades of meaning, according to the subject with which it is joined and the antithesis to which it is contrasted. It denotes the result of the action of the verb πληροῦν; but πληροῦν is either (*a*) to fill up an empty thing (*e.g.* Mt 13^{48}), or (*b*) to complete an incomplete thing (*e.g.* Mt 5^{17}); and the verbal substantive in -*μα* may express either (1) the objective accusative after the verb, 'the thing filled or completed,' or (2) the cognate accusative, 'the state of fulness or completion, the fulfilment, the full amount,' resulting from the action of the verb (Ro 11^{12} 13^{10} 15^{29}, 1 Co 10^{26}). It may emphasize totality in contrast to its constituent parts; or fulness in contrast to emptiness (κένωμα); or completeness in contrast to incompleteness or deficiency (ὑστέρημα Col 1^{24}, 2 Co 11^{9}, ἥττημα Ro 11^{12}). A further ambiguity arises when it is joined with a genitive, which may be either subjective or objective, the fulness which one thing gives to another, or that which it receives from another.

In its semi-technical application it is applied primarily to the perfection of God, the fulness of His Being, 'the aggregate of the Divine attributes, virtues, energies'; this is used quite absolutely in Col 1^{19} (ἐν αὐτῷ εὐδόκησεν πᾶν τὸ πλήρωμα κατοικῆσαι), but further defined (1) as πᾶν τὸ πλήρωμα τῆς θεότητος, 'the whole completeness of the Divine nature,' in Col 2^{9}, (2) as πᾶν τὸ πλήρωμα τοῦ θεοῦ, 'the whole (moral) perfection which is characteristic of God,' in Eph 3^{19}. Secondarily, this same πλήρωμα is transferred to Christ; it was embodied permanently in Him at the Incarnation (Col 1^{19}); it still dwells permanently in His glorified Body, ἐν αὐτῷ κατοικεῖ σωματικῶς (Col 2^{9}); it is τὸ πλήρωμα τοῦ χριστοῦ (Eph 4^{13}), the complete, moral, and intellectual perfection to which Christians aspire and with which they are filled (Eph 4^{13}, Col 2^{9} ἐστὲ ἐν αὐτῷ πεπληρωμένοι. Cf. Jn 1^{16} ἐκ τοῦ πληρώματος αὐτοῦ ἡμεῖς πάντες ἐλάβομεν, where πλήρωμα is the state of Him who is πλήρης χάριτος καὶ ἀληθείας, 1^{14}, cf. Lk 2^{40} πληρούμενον σοφίας). This indwelling emphasizes the completeness with which the Son represents the Father; it is the fulness of life which makes Him the representative, without other intermediary agencies, and ruler of the whole universe; and it is the fulness of moral and intellectual perfection which is communicable through Him to man; it is consistent with a gradual growth of human faculties (Lk 2^{40}), therefore with the phrase ἑαυτὸν ἐκένωσεν of Ph 2^{7}, which is perhaps intended as a deliberate contrast to it [KENOSIS]. One further application of the phrase is made in Eph 1^{23}, where it is used of the Church, τὸ πλήρωμα τοῦ τὰ πάντα ἐν πᾶσιν πληρουμένου. Here the genitive is perhaps subjective—the fulness of Christ, His full embodiment, that fulness which He supplies to the Church—emphasizing the thoroughness with which the Church is the receptacle of His powers and represents Him on earth. The analogy of the other uses of the word with the genitive of the person (Eph 3^{19} 4^{13}), and the stress throughout these books on Christians being filled by Christ (Eph 3^{19} 4^{13} 5^{18}, Col 1^{9} 2^{10} 4^{12}, Jn 1^{16} 3^{34}), favours this view. But the genitive may be objective, 'the complement of Christ,' that which completes Him, which fills up by its activities the work which His withdrawal to heaven would have left undone, as the body completes the head. The analogy of the body, the stress laid on the action of the Church (Eph $3^{10.\,21}$), St. Paul's language about himself in Col 1^{24} (ἀνταναπληρῶ τὰ ὑστερήματα τῶν θλίψεων τοῦ χριστοῦ), support this, and it is impossible to decide between the two. The former view has been most common since the thorough examination of the word by Fritzsche (*Rom.* ii. pp. 469 ff.) and Lightfoot (*Col. ad loc.* and Additional Note), and is still taken by von Soden (*Hand-Comm. ad loc.*) and Macpherson (*Expositor*, 1890, pp. 462–472). But the latter view, which was that of Origen and Chrysostom, has been strongly advocated of late by Pfleiderer (*Paulinism*, ii. p. 172), T. K. Abbott (*International Critical Comm. ad loc.*), and most fully J. A. Robinson (*Expositor*, 1898, pp. 241–259).

Outside the NT the word occurs in Ignatius in a sense which is clearly influenced by the NT, and apparently in the meaning of the Divine fulness, as going forth and blessing and residing in the Church (*Eph.* Inscr. τῇ εὐλογημένῃ ἐν μεγέθει θεοῦ πατρὸς πληρώματι, and *Trall.* Inscr. ἣν καὶ ἀσπάζομαι ἐν τῷ πληρώματι, almost = ἐν Χριστῷ [but see Lightfoot, *ad loc.*]).

In Gnosticism the use becomes yet more stereotyped and technical, though its applications are still very variable. The Gnostic writers appeal to the use in the NT (*e.g.* Iren. I. iii. 4), and the word retains from it the sense of totality in contrast to the constituent parts; but the chief associations of *πλήρωμα* in their systems are with Greek philosophy, and the main thought is that of a state of completeness in contrast to deficiency (*ὑστέρημα*, Iren. I. xvi. 3; Hippol. vi. 31), or of the fulness of real existence in contrast to the empty void and unreality of mere phenomena (*κένωμα*, Iren. I. iv. 1). Thus in Cerinthus it expressed the fulness of the Divine Life out of which the Divine Christ descended upon the man Jesus at his baptism, and into which He returned (Iren. I. xxvi. 1, III. xi. 1, xvi. 1). In the Valentinian system it stands in antithesis to the essential incomprehensible Godhead, as 'the circle of the Divine attributes,' the various means by which God reveals Himself: it is the totality of the thirty æons or emanations which proceed from God, but are separated alike from Him and from the material universe. It is at times almost localized, so that a thing is spoken of as 'within,' 'without,' 'above,' 'below' the Pleroma: more often it is the spirit-world, the archetypal ideal existing in the invisible heavens in contrast to the imperfect phenomenal manifestations of that ideal in the universe. Thus 'the whole Pleroma of the æons' contributes each its own excellence to the historic Jesus, and He appears on earth 'as the perfect beauty and star of the Pleroma' (*τελειότατον κάλλος καὶ ἄστρον τοῦ πληρώματος*, Iren. I. xi. 6). Again, each separate æon is called a *πλήρωμα* in contrast to its earthly imperfect counterpart, so that in this sense the plural can be used, *πληρώματα* (Iren. I. xiv. 2); and even each individual has his or her Pleroma or spiritual counterpart (*τὸ πλήρωμα αὐτῆς* of the Samaritan woman,—Heracleon, *ap.* Origen, xiii. p. 205; *ap.* Stieren's *Irenæus*, p. 950). Similarly it was used by Ophite writers as equivalent to the full completeness of perfect knowledge (*Pistis Sophia*, p. 15). It thus expressed the various thoughts which we should express by the Godhead, the ideal, heaven; and it is probably owing to this ambiguity, as well as to its heretical associations, that the word dropped out of Christian theology. It is still used in its ordinary untechnical meaning, *e.g.* Theophylact (p. 530) speaks of the Trinity as *πλήρωμα τοῦ θεοῦ*; but no use so technical as that in Ignatius reappears.

For fuller details cf. Suicer's *Thesaurus*, *s.v.*; Lightfoot, *Col.* ('Colossian Heresy' and Additional Note); Smith's *Dict. Christ. Biogr. s.vv.* 'Gnosticism,' 'Valentinus'; *Cambridge Texts and Studies*, i. 4, p. 105.
W. LOCK.

PLOUGH, PLOUGHSHARE.—See AGRICULTURE in vol. i. p. 49.

PLUMBLINE, PLUMMET.—A line or cord with a heavy weight attached, used by masons when erecting a building, to ascertain if the walls are perpendicular. The plumbline used by the Syrian masons is a cord passing freely through a hole in the centre of a cylindrical piece of wood about 3 in. long; at one end of the cord is a hollow cone of copper filled with lead. The cord is fastened to a ring inserted into the centre of the base of the cone-shaped plummet, the diameter of the base being the same as the length of the cylinder of wood. One end of the piece of wood is applied to the face of the wall, and the plummet is allowed to descend slowly. If the rim of the base just touches the surface of the stones the wall is perpendicular. Several Heb. words are rendered plummet or plumbline. 1. אֶבֶן, literally, a stone, probably showing that the original plummet was a suspended stone, Is 34^{11}. In Zec 4^{10} the expression אֶבֶן הַבְּדִיל (see Nowack, *ad loc.*), a stone of tin, a plummet, is used. 2. אֲנָךְ Am $7^{7.8}$. The etymology of this word is doubtful. There are similar words in cognate languages for 'lead,' 'tin' (cf. *Oxf. Heb. Lex. s.v.*). 3. מִשְׁקֹלֶת in 2 K 21^{13}, מִשְׁקָלֶת Is 28^{17}, a weight. In all the Scripture references to 'plummet' or 'plumb-line,' the term is used metaphorically, *e.g.* in Am 7^8, where J″ is to set a plummet in the very midst of His people (*i.e.* apply to it a crucial moral test), and whatever does not conform to its standard will be destroyed (Driver, *ad loc.*).
W. CARSLAW.

POCHERETH - HAZZEBAIM. — Amongst the 'children of Solomon's servants' who returned with Zerubbabel are mentioned the בְּנֵי פֹּכֶרֶת הַצְּבָיִם, Ezr 2^{57}=Neh 7^{59} (בְּנֵי פ' הַצְּבָיִים). The LXX, misunderstanding the passage, divides into two proper names (in Ezr B *υἱοὶ Φασράθ*, *υἱοὶ Ἀσεβωείν*, A *Φακεράθ*, *Ἀσεβωείμ*; in Neh B *υἱοὶ Φακαράθ*, *υἱοὶ Σαβαείμ*, A . . . *Φαχαράθ* . . .). In 1 Es 5^{34} the LXX has *υἱοὶ Φακαρὲθ Σαβ(ε)ίη*. See PHACARETH. The Heb. *pochereth-hazzebaim* means 'hunter of gazelles.'
J. A. SELBIE.

POET.—Only Ac 17^{28} 'As certain even of your own poets have said, For we are also his offspring.' By 'your own poets' (*οἱ καθ' ὑμᾶς* [WH marg. *ἡμᾶς* after B, 33 etc., Copt.] *ποιηταί*) Lightfoot thinks St. Paul meant poets belonging to the same school as his Stoic audience (*Dissertations on Apost. Age*, p. 288 f.). The words have been traced to Cleanthes' *Hymn to Zeus*, 5, where we read, 'For Thine offspring are we (*ἐκ σοῦ γὰρ γένος ἐσμέν*), therefore will I hymn Thy praises and sing Thy might forever. Thee all this universe which rolls about the earth obeys, wheresoever Thou dost guide it, and gladly owns Thy sway.' Than in this 'sublime hymn,' says Lightfoot (*Dissert.* p. 306), 'heathen devotion seldom or never soars higher.' Cleanthes belongs to the 4th cent. B.C. The exact words of St. Paul's quotation (*τοῦ γὰρ καὶ γένος ἐσμέν*) have been found in another Stoic's writings, the *Phænomena* of Aratus of Soli (of the 3rd cent. B.C.), and the form of the apostle's expression, '*some* of your own poets,' may mean that he knew the words to be found in more than one poet.

In 1 Co 15^{33} and Tit 1^{12} quotations have been discovered from other Greek poets, but they partake rather more of the character of common proverbs than the quotation from Cleanthes or Aratus. The first (*φθείρουσιν ἤθη χρήσθ' ὁμιλίαι κακαί*) has been traced to the *Thais* of Menander, a comic poet of the 3rd cent. B.C. The line is iambic trimeter, and the form *χρήσθ'* of the TR is necessary for the scansion; *χρηστά* is, however, the form in almost all MSS, and adopted by almost all editors, so that the feeling for the metre of the line was not present when the apostle wrote. The second (Κρῆτες *ἀεὶ ψεῦσται, κακὰ θηρία, γαστέρες ἀργαί*) is a complete hexameter verse, and comes from the Περὶ *χρησμῶν* of Epimenides, who lived about B.C. 600. It is also found in the *Hymn to Zeus* of Callimachus.

These fragments of Greek verse exhaust the poetry (if the word is to be used in its usual connotation) of the NT. It is extremely probable, however, that many of our Lord's sayings were cast in the forms of Hebrew poetry. See the articles by Briggs on 'The Wisdom of Jesus the Messiah' in the *Expos. Times*, vol. viii. (1897) pp. 393 ff., 452 ff., 492 ff., vol. ix. (1898) 69 ff., and less fully in his *Study of Holy Scripture* (1899), p. 373 ff.

POETRY (HEBREW).—

Introduction.
i. The Form of Heb. poetry.
  A. Poems written in Prose.
  B. Poems written in Verse.
    1. The External evidence.

  - 2. The rules for the form of Heb. poetry: (*a*) the line; (*b*) the verse; (*c*) parallelism; (*d*) metre: the *ḳinah* and other kinds of verse; (*e*) the scale for the lines; (*f*) strophes; (*g*) subordinate matters of form.
- ii. The Material of Heb. poetry.
  - *A.* The different species of poetry.
  - *B.* The employment of poetry.
    - 1. Folk-poetry: (*a*) in family life; (*b*) in the life of the community; (*c*) in the religious life; (*d*) in the national life.
    - 2. The poetry of the Prophets.
    - 3. Artistic poetry.

Poems are works of art, whose substratum is supplied by human speech. Since they make their impression only through oral utterance, which from its very nature dies away, they require for their perpetuation—differing in this from the works of plastic art—the medium of writing. By the signs of the latter they can afterwards be reproduced with more or less fidelity, in proportion to the sufficiency of the system of writing and the state of preservation of the script in which it has reached us. Like every work of art, the poem has for its chief source the creative imagination of its author; in every instance a strong element of invention enters into its construction. Its aim is æsthetic enjoyment, it seeks to work upon the senses, the emotions, the imagination, of the hearer. An ulterior purpose, namely, to influence directly the will and conduct of those who happen to make acquaintance with the poem, is, strictly speaking, outside the scope of poetry, as of art in general. But although a discourse whose interest is judicial, political, or social, has certainly, in spite of all the rhetorical art expended upon it, no claim to be called a poem, yet the border-line is a shifting one. There are edifying, didactic, political compositions, which in spite of their underlying 'tendency' do not cease to be poems in the fullest sense, while the claim of others to this title may be disputed.

The aim of poetry may be reached without the employment of special, external, palpable means such as distinguish the language of poetry from that of daily use. There are poems free from the trammels of verse, composed in simple prose, nay, in recent times the employment of the prose form in poetry is more common than that of verse. This is the case above all with the drama, and in the next place with the epos in the form of the novel; it is only for lyric poetry that the use of the prose form constitutes a great exception.* In ancient times the employment of verse was the rule for every species of poetry; where the prose form prevails, it will generally be found to be in compositions which lie upon the dubious borderline referred to above.

The question *whether poetry has a place in the Holy Scriptures* could be raised as long as men held fast to the strict verbal inspiration doctrine. From that standpoint the admixture of so strongly human and subjective an element might appear to contradict the purely Divine and objective origin of the words of the Bible. Better knowledge now teaches us that no device of human language is to be declared incapable of employment in Scripture. Yet poetry will not be the rule there, for neither of the two collections of books that make up the Bible is arranged from the point of view of art, but from that of religious value; they are collections not of national *belles lettres* but of Sacred Writings. At the same time, however, *the Old Testament* embraces all that has come down to us of the literature of the people of Israel in its early days, so that for our knowledge of the poetry and the poetical art of the ancient Hebrews we have to turn solely to this collection of their Sacred Writings.

i. THE FORM OF HEBREW POETRY.—*A. POEMS WRITTEN IN PROSE.*—Prose-poems are not absent from the OT, yet the border-lines for their recognition are hard to draw. If all fiction could be called poetry, then the tale of the woman of Tekoa (2 S 14^{5-7}) would have to be included in this category, and still more the story told by the prophet Nathan (2 S 12^{1-4}). But in both these narratives we have simply rhetorical artifices, both give themselves out in the first instance as bare statements of actual occurrences. It is otherwise with Jotham's fable (Jg $9^{8\text{ff.}}$), which presents itself within the framework of his address as a didactic composition, and is to be placed on the same plane as the parables of Jesus in the New Testament. The Books of Jonah, Ruth, Esther, and the Daniel narratives in Dn 1–6, are regarded by modern OT science as products of Jewish novel-writing, of which further instances, outside the Canon, have come down to us in the Books of Judith, Tobit, 2 Maccabees, etc.* But their quality as poetry stands and falls with the verdict reached by criticism, for, the moment their contents are declared to be historical, they lose all claim to this title. In any case, it is to be observed that these prose-poems one and all belong to a late period; but, on the other hand, the prologue and the epilogue of the Book of Job, which in contradistinction from the speeches in chs. 3–41 are composed in prose, show that the date alone does not decide the procedure in this matter. The reason for this difference of form will have to be examined below (see pp. 9^{b} and 10^{a}).

B. POEMS WRITTEN IN VERSE.—1. *The External Evidence.*—Far more prominent are the poems composed in verse, and of these alone we mean to speak in what follows. That the ancient Hebrews possessed and consciously employed in poetry prescribed poetical forms constructed for that special purpose, may be proved with certainty from the OT itself. The evidence is found first of all in the peculiar expressions used to designate poetry, the poet and his activity (cf. especially the roots משל and שיר), in the application of these peculiar terms to certain compositions (cf. the numerous introductions and superscriptions, such as Ex 15^{1}, Jg 5^{1}, Nu $21^{17.\,27}$), in the statement that certain passages were recited to the accompaniment of music, and sometimes of dancing, *e.g.* Ex 15^{20}, 1 S 18^{6}; cf. also many of the titles of the Psalms. We are carried a point beyond this by the alphabetical poems, in which equal poetical units are clearly separated from one another through their initial letters being arranged so as to form the Heb. alphabet. Most important are Pss 111 and 112, in which each several line bears a new letter, and next to these are to be reckoned those poems in which, like Pss 25. 34. 145, Pr 31^{10-31}, a letter is given to each verse. The Synagogue tradition (*Shabbath* 103*b*, *Sopherim*, ch. 12; cf. Strack, *Prolegom. crit. in Vet. Test. Heb.* p. 80) at least testifies to and enjoins the writing in distinct lines of the songs Ex 15, Dt 32, Jg 5, 2 S 22, no doubt because these are called 'songs' in the titles they bear. But this is to recognize expressly the poetical form of these passages.

2. *The rules for the form of Heb. poetry.*—**a.** The line.—Far more uncertain than the fact that the Hebrews possessed a form of composition specially devised for use in poetry is the question as to the rules of this form, or, in other words, as to the metrical system of the ancient Hebrews. On this subject there is no tradition worthy of the name, rather must the laws of Heb. metre be deduced from the poems themselves. Fortunately,

---

* Cf. *e.g.* Hardenberg (Novalis), *Hymnen an die Nacht.*

* Cf. C. A. Briggs (*General Introd. to Study of Holy Scripture*, New York, 1899, p. 341 ff.), who calls these books 'prose works of the imagination.'

there are two factors that from the first stand out as indubitably established. The first of these is the *line* (στίχος), externally authenticated, as has just been said, by Pss 111 and 112, as well as by the circumstance that in the MSS some poems are written stichically, and latterly also by the newly discovered fragments of the Heb. Sirach, which are likewise written in *stichoi*. It is the fundamental rule of all metrical composition, the one indispensable condition, that the continuous flow of the discourse should be divided into short word-groups, which, as far as the sense is concerned, have a certain independence. It is only in highly developed forms of poetry that the independence of the lines, in this matter of the sense, is more or less superfluous. The limit for the length of these lines is one imposed by nature, namely, that each line should be capable of being pronounced in *a single* easy breath. Such lines detach themselves from one another with perfect clearness in all the poetical parts of the OT, and there cannot be a moment's doubt that it is not the logic of the discourse but an artificial design that has divided the flow of the language in this way. In Hebrew, especially, the end of the line uniformly coincides with a break in the sense, and even the accentuation of our texts is seldom wrong as to the correct division. It is possible to have poems which employ no other method as to their form than such a separation into the briefest units that give a complete sense, although these do not stand in an exact rhythmical relation to one another or mutually unite themselves into uniform groups. This is exemplified, for instance, in a number of Goethe's finest poems, such as *Der Gesang der Geister über den Wassern*, *Grenzen der Menschheit*, *Ganymed*, *Prometheus*, etc.

b. The verse.—As well established as the line is the second higher poetical unit, the *verse*. In Heb. poetry a plurality of lines, in by far the majority of instances two of these, regularly combine to form a verse. This unit is likewise witnessed to by tradition. The sign for the close of the verse (the double point סוף פסוק) is undoubtedly the earliest addition made to the consonantal text, and is handed down along with the latter, where accents, vowels, and diacritical points are wanting. The division by פסוקים is already witnessed to in the Mishna (*Megillah* iv. 4). The verse-division, to be sure, is not confined to the poetical sections of the OT, but is carried through everywhere. But it is a circumstance of extreme importance that in the poetical sections the verse-divider does not stand at the close of each *stichos*, but regularly (with extremely rare exceptions) includes several of these. And though it happens frequently that several metrical verses are combined in a single Massoretic verse, on the other hand it is one of the rarest occurrences to find the verse-divider wrongly separating *stichoi* of the same verse from one another.

c. Parallelism.—The connecting agency, however, which unites the verse-members so as to form the verse, was not clearly recognized and defined till last century. The merit of this belongs to Bishop Lowth in his epoch-making book, *De sacra poesi Hebræorum*, which appeared in the same year (1753) as Astruc's *Conjectures*. There in his Prælectio xix., p. 237,* he says:—

> 'Poetica sententiarum compositio maximam partem constat in æqualitate, ac similitudine quadam, *sive parallelismo*, membrorum cujusque periodi, ita ut in duobus plerumque membris res rebus, verbis verba, quasi demensa et paria respondeant.'

From this passage came the term *parallelismus membrorum*, which has since then been generally employed. We have to do here not with a formal contrivance like rhyme, assonance, alliteration, regularly changing length of the lines (cf. the dactylic distich), but with a connexion by means of the sense, which finds its full expression only in parallelism, and, at the same time, in parallelism separates itself from what precedes and what follows. Lowth continues quite correctly—

> 'Quæ res multos quidem gradus habet, multam varietatem, ut alias accuratior et apertior, alias solutior et obscurior sit';

but by distinguishing three kinds of parallelism, *synonymous*, *antithetic*, and *synthetic*, as well as by the very name 'parallelism,' which was capable of being misunderstood, he contributed at the same time to encourage too narrow a conception of the phenomenon.* Nor is it any advantage to complete the scheme, as H. Ewald in particular has sought to do; all this has only a casual value as compared with the general principle established, that the individual *stichoi*, which themselves each form a unit of sense, combine in the verse to form a larger unit. The possible variety of relation between the *stichoi* is endless.

A wider background for this phenomenon has lately been gained by observing that the same rule holds good in the poetry of the ancient Babylonians and Assyrians, and, perhaps in a less developed form, also in that of the ancient Egyptians. Schrader † assumes that Israel took over this principle, along with much else, from Mesopotamia, and Briggs (*op. cit.* p. 368) also considers this extremely probable. Still the possibility remains that this poetical rule is the common heritage of a large group of the nations of antiquity.‡

It is radically wrong to see in the parallelism merely a rhetorical phenomenon, and to disregard it accordingly, as need may be, in conducting metrical investigations. In this way one overlooks the fact that the parallelism is founded on the previous separation of the *stichoi*. It is possible, of course, to take the sense-parallelism and apply it to a prose composition, at the same time dispensing with a uniform separation into lines, and in this way to weaken it down to a purely rhetorical form, but, when coupled with that separation, the parallelism assumes the character of a fixed device of art. The best proof of this is found in the circumstance that for nearly 2000 years men felt and recognized the Psalms and other poetical portions of the OT to be poems, without having any clear consciousness of the device employed to constitute them so. It is a specially happy providence that this device is so connected with the contents that it had practically to be handed down along with these.

---

* Compare with this the more detailed discussion in the *Preliminary Dissertation* to Lowth's works on Isaiah, 1778 [German by Koppe, 1779 ff.].

* Still the distinguishing of three possibilities has a certain logical value. In the unpublished second part of the present writer's *Akademische Antrittsvorlesung*, 1873 (cf. *SK*, 1874, p. 764, Anm.), an attempt is made to explain the *parallelismus* by going back to the word מָשָׁל as a term for poetical discourse. If this Heb. word means originally 'comparison, likeness,' bipartition and parallelism find their ground in the nature of the case. The result of a comparison may be one or other of three kinds. It may disclose (1) equality or resemblance, *e.g.* Pr 10^{26} $11^{16.22.30}$, (2) inequality, unlikeness, or opposition, *e.g.* Pr $10^{1\text{-}25}$, (3) a more or less, a better or worse, etc., by which a movement, a progress is given, *e.g.* Pr 12^{9} $15^{16.17}$ 16^{8} 17^{1} 19^{1}, as also 11^{31} 15^{11}. There can be hardly any doubt that the parallel verse exhibits its greatest independence and purest development in the various apophthegms of Pr 10 ff., which all fall under this threefold scheme. The circumstance that, at least in their written form, these belong to the later products of Hebrew literature, is certainly no adequate objection to the view put forward in the above-cited lecture, that the fundamental rule for the form of Heb. poetry is borrowed from the apophthegm. Yet it is so hopeless a task to reach any probable pronouncement regarding these first beginnings that the present writer is no longer disposed to maintain that former view.

† His article in the *Jahrb. f. prot. Theol.* i. (1875) p. 121 ff., is still well worthy of study.

‡ Cf. W. Max Müller, *Die Liebespoesie der alten Ægypter*, 1899, p. 10, Anm. 1.

d. Metre: the Ḳinah and other kinds of verse.—From what has just been said, it is self-evident that *the length of the lines* is not a matter of indifference. These must be fashioned in a certain uniform relation to one another, in order to produce the impression of rhythmic units. The sure proof that the Heb. poet consciously fixed the length of the lines is found in the circumstance that for a special occasion that presented itself in the life of the people he uniformly chose a special length of line. This is established in the case of the קִינָה, the Hebrew lament for the dead, *i.e.* the songs which women as mourners (מְקוֹנְנוֹת Jer 9^{16}) sang at funerals in ancient Israel. These were uniformly composed in verses of two members, the length of the first of which stands to that of the second in the proportion of 3 : 2, giving rise to a peculiar limping rhythm, in which the second member as it were dies away and expires. These verses are very sharply distinguished from the others, in which equal length of verse-members in the same verse is the rule. For proof of the correctness of these observations the present writer's art. 'Das hebräische Klagelied' in *ZATW*, 1882, pp. 1–52, may still suffice, if it be read with care. It will not do either to unite the two unequal *stichoi* into a single 'long line,' or to pronounce it a matter of indifference whether the longer line comes first or last.[*] Equally established beyond all doubt is the original connexion of this kind of verse with the popular lament for the dead. When Briggs (*op. cit.* p. 381) says, 'there is no propriety in the name,' and, further, supposes that the name was given to it by the present writer 'because apparently he first noticed it in the Book of Lamentations,' the one remark is as mistaken as the other. The second of the two merely proves that Briggs has not followed our argument, which is founded rather upon the fact that the prophets, whenever they introduce the mourning women speaking in person (Jer $9^{18.\ 20}$ 38^{22}),[†] or when they themselves in their symbolical actions assume the rôle of the mourning women (Am 5^1, Ezk 19, etc.), uniformly choose this measure.[‡] The objection that David does not employ it in his lament for Saul and Jonathan (2 S $1^{17ff.}$) can be urged only by one who holds that David meant to take the place of the mourning women at the obsequies, or to attach himself to their lamentations. And when Grimme (*loc. cit.* p. 549) suggests that the earliest employment of this measure should rather be sought for in the oracles of the priests, not only must we first wait for proof that the ancient oracles were composed in it,[§] but must ask, further, which was the earlier in Israel, the funeral or the oracle, and whether it is likely that this form of verse was originally learned by the mourning women from the lips of the priests as they pronounced their oracles, to be afterwards copied from the women by the prophets. Woman is the most conservative of all social forces, and if even at the present day in an Arab nursery the *ḳinah* verse is still to be heard from the lips of the mother (as reported by Snouck-Hurgronje), there is nothing more probable than that in this a recollection has been preserved of a time when it was *par excellence* the verse of women.[*]

But now that it has been thus shown that in one particular case Hebrew poets consciously fixed the length of their verses and shaped it accordingly, we must conclude that in the case of other verses (or lines) as well they had a clear consciousness of one or more different lengths. And, as a matter of fact, examination shows that throughout wide tracts the individual lines have the usual length of the first member of the *ḳinah* verse; amongst others this is by far the predominating length all through the Book of Job. Elsewhere we may observe a longer line than the prevailing one, something like double the length of the shorter *ḳinah* line.

e. The scale for the lines.—But although one cannot avoid recognizing the facts just mentioned, it yet remains a very difficult task to determine the *scale* by which the Heb. poet measured the length of his lines. Here comes in the attempt to establish a metrical system for Heb. poetry, which during the last centuries has again and again attracted amateurs and scholars. The theories put forward as the basis of this system exhaust all the possibilities that are to hand, and at the present day almost all of them still stand unreconciled side by side. Some have counted, marked quantity, accented, or combined the first or the second of these processes with the last. Others have taken now the syllable and now the word as the fundamental unit. Others have sometimes been content to take the traditional pronunciation with the vocalization and accentuation, and to interpret metrically, and reduce to rule what lies before us in the Massoretic text. At other times, upon the ground of a fixed theory, all liberties with the text have been considered allowable, the accent has been shifted, the vocalization altered in whole or in part, and changes of the consonantal text proposed to a greater or less extent. Systems have been constructed, which leave much licence open, licence partly of a purely arbitrary kind and partly in strict subordination to the system; there have been other systems, again, which permit no deviation to the right hand or to the left, but yield metres carried through with the utmost rigour. Space forbids our going into all these manifold attempts, nor does the case require it.[†] We must confine ourselves to a brief description of the most important of the systems put forward at present, indicating at the same time the difficulties involved, and we shall finally draw a number of conclusions whose probability we believe it necessary to maintain.

J. Ley[‡] operates with the *word-accent*. Every word that conveys an idea has a tone-syllable, certain words may have more than one. Every tone-syllable forms, along with the preceding unaccented syllables and the following syllable of the falling tone, *one* metre. The number of unaccented syllables makes no difference, so that a significant word of a single syllable may have the same metrical value as a whole series of syllables. The kind of verse is determined by the number of such metres, as pentameter, hexameter, octameter, decameter, and, further, assumes a much greater variety of forms through the possibility of divers cæsuras. The unit ('verse') for Ley (1887) is the verse formed by parallel lines; the cæsuras serve to divide the individual lines from one another. In this way it becomes possible to unite lines of very different lengths in the same verse. Ley accepts the traditional vocalization and accentuation, but has lately proposed a moderate number of changes of the text.

---

[*] Both these things have been done recently by Grimme (*ZDMG*, 1896, p. 545 f.). The examples he adduces in justification of his procedure appear to us to be altogether inadequate. Some of them are due to faulty scansion, in others a false length is given to the lines by a wrong division of the context, some are cited from a corrupt unemended text, others are to be explained in accordance with *ZATW* ii. p. 7, No. 3. No agreement seems possible between the present writer and Grimme, for not only would this necessitate the acceptance of the metrical system of the latter, but Grimme's 'fünf-hebiger Vers' is something quite different from the *ḳinah* verse.

[†] Cf. *ZATW*, 1883, p. 299 ff.

[‡] Grimme (*ZDMG*, 1897, p. 693) declares that one might as well assert that the Greek hexameter is properly a mourning strain because it is in it that the women lament for the dead Hector. Yes, no doubt, were it not that the rest of the Iliad also is written in hexameters. In the same place he seeks to prove that Jer $9^{1\text{-}18}$ is wholly composed in the *ḳinah* measure, but his argument breaks down completely. Only 8^{23}–9^5 was originally an independent poem in this measure.

[§] The examples which Grimme (*ZDMG*, 1897, p. 707 f.) brings forward and scans exactly (Gn 25^{23} $27^{28f.\ 39f.}$) may be, according to his system, pentameters, but they have nothing whatever to do with the 'mourning verse' noted by the present writer.

[*] For the later history of the *ḳinah* measure in the OT cf. the present writer's art. 'The Folk-Song of Israel in the mouth of the Prophets' in *The New World*, 1893, p. 28 ff.

[†] Cf., for the earlier attempts, Saalschütz, *Von der Form der heb. Poesie*, 1825; Budde, 'Ueber vermeintliche metrische Formen in der heb. Poesie,' in *SK*, 1874; Briggs, *General Introduction*, p. 361 ff. All the modern systems are fully explained and criticised in Ed. König's *Stilistik, Rhetorik, Poetik*, etc., 1900.

[‡] *Grundzüge des Rhythmus, des Vers- und Strophenbaues in der heb. Poesie*, 1875, *Leitfaden der Metrik der heb. Poesie*, 1887, and a great number of articles in various periodicals. Ley has constantly sought to perfect his system.

G. Bickell[*] applies the Syriac metre to the OT, holding the next to the last syllable, as in Syriac, to be as a rule the tonic one, and frequently altering the vowel-pronunciation. He *counts the syllables* of each line, and then makes rises and falls interchange with perfect regularity, in such a way that all lines with an even number of syllables are trochaic, and all with an odd number iambic. He everywhere ends by carrying through with the utmost exactness the metre assumed, and in order to reach this result proposes numerous alterations on the consonantal text, when the liberties taken with the vowel-pronunciation prove insufficient.

H. Grimme[†] bases his system upon a new theory of the accent and the vowels, which above all attributes to the vowel-signs a very different value from that assigned to them on the doctrine held in other quarters. He thus abides by the traditional written signs, but understands them quite differently. His metrical system is at once *quantitative* and *accentual*. It is quantitative, because, in accordance with an ingeniously carried out system of '*moræ*,' he attributes to each syllable and to each syllabic beat a definite quantity, a definite number of '*moræ*' (Lat. *mora*, 'lapse of time,' 'stop'). Every final principal-tone syllable of a '*Sprechtakt*' counts as a rise; whether other syllables are to be reckoned rises or not is determined by counting, according to fixed rules, the value of the '*moræ*' of the syllables which fall within the same sphere. The number of rises determines the species of verse. Grimme recognizes verses (*i.e.* lines) with 2, 3, 4, 5 rises, but the verse with 2 rises occurs only as an accompanying metre to that with 4 and 5 rises. Grimme, like Ley, is relatively sparing in the matter of changes of the text.

All the above systems are worked out with extreme care, and in the opinion of their authors leave no unexplained residuum. The earliest two (those of Ley and Bickell) have each found many adherents, the third is yet too recent to have done so. Still, in the majority of instances, perhaps even without exception, the declarations of adherence given in by other writers have regard merely to the acceptance of a metrical system and to principles, but not to the complete systems elaborated by their respective authors. Thus C. A. Briggs, the principal English-speaking champion of Hebrew metre, declares that his views 'correspond in the main with those of Ley.'[‡] A similar attitude towards Duhm (*i.e.* Bickell) is assumed by Cheyne.[§] As a matter of fact, in these systems the leading possibilities are represented in such a way that everyone will feel himself more or less in sympathy with one view or another.

The circumstance that theories so diametrically opposed are able time after time to maintain themselves side by side, and that each of them can be held up as the infallibly correct one, is due to the peculiarly unfavourable conditions under which we have to work in this matter. (*a*) We have to do with a text originally written without vowels, and whose living sound was first marked at a very late period by additional points and lines. One is entitled to question the correctness of this vowel-pronunciation and accentuation, and there will be a disposition to draw the boundaries of this incorrectness narrower or wider according to the needs of a metrical system, without its being possible for an opponent to adduce conclusive evidence in favour of the contrary position. (*b*) It is equally certain that the consonantal text of the OT has suffered seriously, not only through mistakes but frequently also through conscious well-intentioned editing. Since the latter was always undertaken from religious points of view and would have little regard to the artistic form of the poems included in the collection of Sacred Writings, its employment must have been fraught with specially serious issues in the sphere with which we are dealing. Here again it is impossible to set objective limits to the changes which, upon the ground of an assumed metre, may be proposed with a view to the restoration of the original text. But, on the other hand, a metrical system which finds an easy application to the traditional text, including all the disfigurations it has undergone in the course of time, only shows by this that it is itself untenable. (*c*) Finally, all information about the music of the ancient Hebrews has been lost to us. But music was originally always combined with poetry, and protected the metrical form, just as, on the other hand, it helped what was defective.[*] This aid, too, we must entirely dispense with.

Under such conditions subjectivity finds here an open field without any sure boundaries. But this awakens the imagination and fires the courage. Besides, we have here to do with a subject akin to mathematics, a subject giving scope for playing with numbers. It is a fact perhaps too little observed, that all departments of study akin to this offer a special incentive to the ingenuity. We need only recall the subject of Chronology. One must have at some time gone deeply for himself into the question of Hebrew metre and triumphed over the temptation to lose oneself there, before he can understand the attraction wielded by such speculations. Since the present writer has had this experience he has no finished metrical system to offer, nor can he attach himself unreservedly to any of the others that have been proposed, although he cheerfully concedes that to each of the above-named champions of metre we are indebted for much stimulus and help. He can therefore merely indicate what he considers probable, and emphasize some points which appear to him worthy of attention.

(1) As regards *the scale for the length of the lines*, the vastly preponderating probability appears to belong to the theory of Ley, who counts the 'rises' without taking account of the 'falls.' In favour of this there is first of all the practice of vowelless writing, with irregular, in olden times doubtless very sparing, introduction of the vowel-letters, as contrasted with the regular employment

---

of these for the long vowels in Arabic. An exact measurement of a verse by syllables could hardly have been carried out with such a method of writing, and, conversely, if it came into use, it must in course of time have brought about a corresponding transformation of the writing. Further, great weight must be laid upon the circumstance that the lines (*stichoi*) in Hebrew are without exception separated from one another by the sense. Where a perfectly exact, rigorously self-asserting system of metre is used, in course of time the separating of units of sense into single lines comes to be regarded as superfluous, and the sense flows over from one line into another. We may compare, for instance, classical hexameters or ode-measure, and modern rhyming verse. The same view is favoured if we compare the Bab.-Assyrian and Egyptian poetical methods which, so far as one can yet see, are likewise to be brought under the above rule.[*] In general it may be added that a comparison ought to be made neither with extremely refined systems like the classical, nor decaying ones like the Syrian, but with primitive systems, even if these stand ethnologically far apart. The two-membered alliterative verse of the ancient Germans, which likewise takes account only of rises, appears to us to present the closest analogy, when, that is to say, it is looked at from the purely formal point of view, and without regard to the peculiar device by which the lines are connected.

(2) As regards *the non-accenting or the accenting of words*, much latitude must be conceded to the living language and to music, so that it would be very difficult to lay down strict and inviolable rules according to which this or that word is under certain circumstances to be non-accented or accented. In this way verse-members which appear to the eye very unequal may yet from the rhythmical point of view be counted of equal value.[†]

(3) We have, moreover, *no certain guarantee for the intention to carry through with perfect uniformity the measure which in general rules in a poem*. It is possible that it was considered legitimate to admit at times a line with four rises beside one with three, and conversely to introduce a whole verse with a different length of line, or finally to put a verse of three lines alongside of others with only two. On this whole subject cf. what W. Max Müller (*op. cit.* p. 11) has established for Egyptian, and Zimmern (*ZA* xii. 382) for Babylonian poetry.

(4) In general, one receives the impression that *in the older poems greater freedom rules than in the later ones*.[‡] An unerringly regular parallelism, exact counting of the rises in verses of uniformly identical construction, all this is, nearly without exception, the mark of later poems. The gap was, no doubt, filled up by music, which always accompanied poetry in early times, whereas in later times learned scansion with the pen in the hand and without regard to musical sound appears to have been the rule. But, on the other hand, one is entitled to make stricter demands on lyrical poetry in the narrowest sense, especially on dance-songs such as perhaps meet us in Canticles, than on longer didactic poems like the Book of Job, which can hardly at any time have been sung.

(5) The more decided and sharply cut any particular measure is, the more confidently may this be used *as a medium for restoring the text*. Thus, for instance, one may undertake the work of textual criticism on the *ḳinah*-measure with surer results than in the case of an evenly-flowing measure, because the peculiar limping form of the *ḳinah* must have demanded closer attention on the part of the poet. In any case, we should do well, in all textual criticism which deals with anything beyond superfluous expletives, to assure ourselves of strong support on other grounds besides metrical, and not repose too much confidence in emendations based on metrical grounds alone.

(6) Finally, it must always be kept steadily in view that the quality and the effect of poetry are still in by far the majority of instances secured for the texts by the *parallelism*, even where regularity in the measure is not carried out. Hence one must guard against assigning too great importance to metrical regularity.

f. Strophes.—We must deal more briefly with the use of *strophes*, *i.e.* larger formal units embracing several verses. The first to put forward a special strophe-theory was Fr. Köster in his article, 'Die Strophen oder der Parallelismus der Verse der heb. Poesie,' in *SK*, 1831, pp. 40–114. His example was widely followed, and, long before the stricter verse-theories were put forward, the division of the OT poems into strophes of lengths more or less equal or artistically interchanging was prosecuted as nothing short of a pastime. The results correspond exactly to those described above (pp. 6 and 7^a) in the case of verse-theories. The variety of conclusions and the contradictions between them are perhaps even greater in this instance than in that. Here too in varying degrees may be seen mere strophic arrangement of the material received from tradition, alternating with a re-shaping of the text based upon a settled theory; great irregularity alternating with the strictest attention to rule; simplicity in the form obtained alternating with the extreme of artificiality; recognition of the parallel verse as the basis of the strophe alternating with acceptance of the line as the fundamental unit, reaching even to the denying and destruction of the parallel verse, etc. At present, in addition to the before-named leading upholders of different verse-theories, who also all put forward a special strophe-theory, the most prominent place is occupied by *D. H. Müller*, with a most ingeniously worked-out strophic system based upon three fundamental principles—the *responsio*, the *concatenatio*, and the *inclusio*.[*] In opposition to the line followed by him, a disposition at present prevails, following the lead of Bickell, Duhm, and others, to rest content, wherever possible, with the simplest strophic framework, consisting of four lines, equal to two verses each of two parallel members.

That Hebrew poetry has a strophic arrangement is generally taken for granted as self-evident. The right to make this assumption is open, however, to serious question. It scarcely needs to be proved that there is such a thing as poetry that makes up verses but not strophes. But in this case the postulate of strophes is already satisfied beforehand. For the parallel verse is really a strophe, a higher unit produced by the union of smaller units, the lines. No metrical forms are shown by experience to resist more the reduction to a strophic formation than such double structures which have an inward completeness of their own. It may suffice to remind the reader of the two-membered alliterative verse of the Old German poetry and the dactylic distich of the Greeks and Romans. Upon this ground one may not, indeed, be able to dispute the possibility of strophes of a higher order, but in all probability these will form the exception, and parallel verses without any further union will be the rule.

---

[*] For the former cf. H. Zimmern, *ZA* viii. 121 ff., x. 1 ff.; for the latter W. Max Müller, *Die Liebespoesie der alten Ægypter*, 1899, p. 10 ff. Whether, in this state of things, the actual relation of the falls to the rises can be reduced to summary formulæ is another question. This will depend mainly upon the structure of the particular language. Thus Zimmern now (*ZA* xii. 382 ff.) thinks he can build the Bab. poetic rhythm practically upon the foundation of the *Ionicus a minori*. But when the result is to obtain in all six different feet admissible in the same verse, when from one to three falls are possible between two rises, when occasionally (cf. *Schöpfung*, iv. 4, p. 389) two more falls are elided in accordance with an assumed licence, there is certainly enough of field-room. Zimmern (p. 383) tells us that Sievers has succeeded in 'proving' the existence in Heb. poetry of a pronounced 'uniform rhythm.' Since his observations for Babylonian are based upon work carried on in common with Sievers, and he several times emphasizes the agreement between it and Hebrew, the above remark as to Zimmern's scheme will probably hold good also of Sievers' observations on Hebrew, with which the present writer has not yet made acquaintance.

[†] Cf. for instance in the Old Germ. poem *Heliand* v.^{22} with v.^{5} or v.^{9}, or the two halves of v.^{39} or v.^{269} with one another.

[‡] W. Max Müller (*op. cit.* p. 10) says rightly: 'To me it is a very suspicious circumstance that the Song of Deborah and the latest Psalms still continue to be measured *in one and the same fashion*.'

[*] *Die Propheten in ihrer ursprünglichen Form*, 2 vols., Wien, 1896, *Strophenbau und Responsion*, Wien, 1898. Müller's system has been adopted and contributions made in support of it by F. Perles, *Zur heb. Strophik*, Wien, 1896, and J. K. Zenner, *Die Chorgesänge im Buche der Psalmen*, 2 parts, Freiburg i. B., 1896.

Further, the strophe-theory finds, at all events, no support from *tradition*. In particular, the term סלה (appended 71 times in the Psalms and in Hab 3) cannot be urged in its favour. No significance attaches to the so-called *alphabetical poems*, a species of acrostics in which the letters א–ת are made to succeed one another at the opening of sections of equal length. These prove, as was emphasized above (p. 4^a), the presence of *stichoi* (in Pss 111, 112), but nothing more. If we can distinguish the single *stichos*, we can also count, according to the length designed for the poem, two (Pss 25. 34. 145, Pr 31^{10-31}) or four (Ps 9 f. 37) *stichoi*, and, if the *ḳinah*-measure is an established fact (cf. La 3, where each verse bears a letter, but each letter is repeated three times), we may include two (La 4) or three (La 1. 2) of these verses under a single letter. At most it may be said that the verse as a unit is witnessed to when in Ps 119 the same letter commences eight successive verses of two lines each. But this is yet a long way from the same thing as a strophe of eight verses or sixteen lines.[*]

It is generally left entirely out of sight that any new metrical unit must have a new formative medium. No one thinks of proving the existence of the latter. True, indeed, one framework of this kind is occasionally to be encountered in the OT, namely, the *recurring verse* or *refrain*. It must be admitted that this is in a high degree adapted to mark off strophes, especially when, as in Ps 42 f. ($42^{6.11}$ 43^5), at regular intervals it interrupts a sharply defined measure in the other verses by a different structure of verse. With always diminishing strength and importance the refrain occurs, further, in Pss 80. 46. 39. 57. 59. 49. 99. 56. 62. 67. But even if one were disposed to assume and carry through a fixed strophic structure in all these poems, upon the ground of the refrain, after all only about a dozen of the hundreds of Heb. poems would have been proved to be strophic, while the conclusion regarding the others must at best be to the effect that they are not constructed strophically.

As a special basis for the division into strophes, it is the custom simply to fall back everywhere upon the contents. A metric strophe is supposed to coincide with a section constituted by the sense, the supposition being that the poet divided his material into sections whose length, in virtue of certain rules, showed a rhythmical correspondence with one another. This assumption, however, is all the harder, since *the contents* have already done their part in the formation of the parallel verse. Not only so, but this very parallelism gives to Heb. poetry in general the impression of aphorisms linked together, and renders it extremely difficult for the poet to exhibit a finely-articulated strictly progressive development of thought. Still the possibility of the nearest and easiest approach to this may be conceded, namely, that a single repetition of the parallelism, combining two verses of two lines, might fall rhythmically upon the ear, and that at the same time an idea seemed to exhaust itself in two parallel verses.[*] Deeper-reaching divisions of the sense could scarcely succeed in striking the ear as rhythmic units.

On the other hand, it is equally true that the theory of strophes is not to be refuted by postulates; the evidence of facts must decide. But any one who has convinced himself from the literature of the subject what finely artificial structures, with ever new forms, have been successively proved to underlie the same poems, and after being long forgotten have had their place taken by as artificial successors, will not waive his right to a radical scepticism on this subject. The charm of playing with numbers makes itself felt here almost more strongly than in the instance of verse; and the results, the more artistically these work themselves out, as in recent times those of Müller and Zenner, make their impression much more, being carefully printed, upon the eye, than upon the ear. The following sentences may serve for guidance and caution in this sphere of inquiry.[†]

(*α*) Under no conditions must the search for strophes lead to the abandonment of the certainly ascertained unit, the parallel verse, as has been frequently done (*e.g.* by Delitzsch, Merx, Diestel). Never must the end of a strophe break up a verse, and the verse, not the *stichos*, must remain the measure of the strophe.

(*β*) A great risk incurred by the search for strophes is this, that in their favour the *sense* of a poem might be divided wrongly and thus the poem receive a wrong interpretation. The endeavour should be to get first at the sense and its pauses, and then to ask whether strophe-like forms are the result.

(*γ*) We must not obstinately persist in carrying through rigorously a division which upon the whole is uniform, such as that into four lines. The possibility is not absolutely excluded that it was considered legitimate to interrupt this uniformity occasionally by verses of two or of six lines. This practice is assumed by Zimmern for Bab. poetry (cf. p. 7^a footnote *), and, as another instance, it may be frequently noted in the Old Germ. poetry. Hence we must be cautious in the way of excising or of adding lines and verses, upon the ground of the strophic measure.

(*δ*) Conversely, a succession of sections of the most varied extent are not to be called strophes, by a misapplication of a term which denotes a rhythmic whole. This practice has been frequently followed, and is so still.[‡]

(*ε*) We must not demand strophes everywhere, but must, in the first place, make a distinction according to the different species of poetry. That dance-songs such as are found in Canticles should be strophic is not indeed necessary, but is extremely probable; that the Book of Job should exhibit strophes throughout is the unlikeliest thing in the world. Likewise the age of the poem must be taken into account; strophes and a more regular structure of these will be looked for rather in later than in earlier times.

---

[*] A device of a precisely similar kind has lately been shown to exist in the Bab.-Assyr. literature (*ZA*, x. 1 ff.). Every 11th time the same syllable stands at the commencement of a two-membered verse, and the initial syllables of 25 sections each of 11 verses form a connected sentence. Yet Zimmern does not think of taking each of these long sections as a strophe, but concludes that every two verses make a strophe (of 4 lines), and that the 11th verse always stands by itself. It may be modestly asked whether each verse should not rather be taken by itself and the strophic structure given up.

[*] Cf. the Otfried strophe of the Old High Germ. poetry, which consists of two rhyming couplets.

[†] Cf. earlier statements of the present writer's views in *ZATW*, 1882, p. 49 ff., and *Actes du sixième Congrès international des Orientalistes*, Leyden, 1884, p. 93 f.

[‡] Thus C. A. Briggs (*op. cit.* p. 399) cites, as 'a fine specimen' of Old Egypt. strophe-formation, a poem whose twenty strophes exhibit the following number of lines: 12, 14, 8, 7, 13, 8, 9, 11, 9, 15, 14, 9, 10, 5, 11, 13, 10, 5, 10, 18. So we find strophes of from 5 to 18 lines ranged side by side!

(ζ) Above all, we may recognize in a regular interchange of the length of lines an indication pointing to strophe-formation, because we have here a new formative method. Hence it is no fortuitous circumstance that the *ḳinah* verse which is composed of unequal members lends itself with special readiness to strophe-like forms such as meet us in La 1. 2. 4 and Ps 42 f. For here the equiponderance is restored by repetition of the unequal pairs.

Upon the whole, in this matter too little will do less harm than too much, and doubt will be more prudent than blind confidence.

g. Subordinate matters of form.—*Rhyme*, as well as the other things we have spoken of, has frequently been claimed as a medium employed in Heb. poetry.* The Heb. language has at its disposal a great number of sonorous endings and flexional additions used to denote a particular grammatical or logical relation. These would supply quite extraordinary facilities for the employment of terminal rhyme for poetical purposes. Yet, as is generally admitted, rhyme never became the prevailing medium of poetry. But it is self-evident that, where the same logical relations govern a series of lines, rhyme *must* come in with more or less regularity. As illustrations, Job 10^{9-18} (cited by Sommer) and Ps 6 (cited by Briggs) may serve, although in neither instance is the rhyme satisfactory throughout. Here and there the poet himself may have been conscious of it and thus indulged in a species of by-play; but in reality the occurrence of rhyme has scarcely any more significance than attaches to J. Chotzner's (*PSBA*, Jan. 8, 1884) collection from the OT of a whole series of the finest dactylic hexameters. In spite of these, one will hardly agree with Chotzner's conclusion that the Greeks borrowed the hexameter of the Homeric poems in Asia Minor from their Heb. slaves (Jl 3^{6}). Thus, then, textual alterations ought not to be proposed in certain passages in order to make the rhyme frequently occurring in these perfectly uniform.

Assonance and *Paronomasia* play a large and unquestionably a conscious rôle in the OT. But they belong to rhetorical, not to strictly poetical devices. All these phenomena receive exhaustive treatment in the Dissertation of I. M. Casanowicz, *Paronomasia in the Old Test.*, Boston, 1894.

That, finally, Hebrew, like other languages, has in a certain measure its peculiar poetical vocabulary and grammar is a matter of course, but can be simply mentioned here.

ii. THE MATERIAL OF HEBREW POETRY.—*A. THE DIFFERENT SPECIES OF POETRY.*—In the literature of Israel the *drama* is wholly wanting. This peculiarity it shares with the whole Semitic literature, whereas in that of the Indo-Germanic peoples the drama three times over sprang up quite fresh and independent from the germ, namely on Indian, Greek, and German soil. This may perhaps be set down to a certain one-sidedness of disposition, a want of objectivity on the part of the Semites. The belief, to be sure, has often been cherished that precisely the OT itself forms an exception to this rule, and that it contains two dramas, *Canticles* and *Job*. In the case of the former of these, this opinion is based upon a false conception of the book, which is rather a collection of lyric (in fact, marriage) songs;† in the case of the latter it is based upon a false definition of the drama.* It is only in chs. 3–41 that the Book of Job is disposed as a dialogue, and this disposition it shares with the majority of Plato's philosophical works, which no one thinks it necessary on that account to call dramas. Nay, the latter from beginning to end follow the method of dialogue, whereas in Job the whole *action*, from which the drama takes its name, is given in narrative form in chs. 1. 2. 42.†

Further, L. Diestel (art. 'Dichtkunst' in Schenkel's *Bibel-Lexicon*, i. [1869] p. 609) denies that anywhere in Semitic literature can the *epos* be found any more than the drama. This has since been shown to be incorrect, as on Bab.-Assyrian soil quite an extensive epic literature, whose contents are mythological, has been found composed in poetic form. But for Heb. poetry, so far as this is represented in the OT, Diestel's contention remains true. The OT enshrines a small number of historical poems or fragments of such—it may suffice to name the Song of Deborah in Jg 5—but this is lyric, not epic, poetry. Pss 105–107 are quite secondary productions, versification of the ancient popular history for liturgical purposes; they are litanies, not epics. The Jewish works of fiction of later times, the Books of Ruth, Jonah, Esther, Dn 1–6‡ are wholly in prose. The strongest evidence is furnished by the narrative proper in the Book of Job, the so-called prologue and epilogue in chs. 1. 2. 42. Although it is practically certain that these were borrowed from the mouth of the people,§ and are thus no secondary work, but an original one composed in the form current among the people for such subjects, these passages are written in prose, although this is unusually lofty or, if one will, has the breath of poetry. They share also with other narrative passages the characteristic that the *direct speech* of the parties acting occasionally reaches at the most critical points poetic expression (Job 1^{21}, cf. elsewhere Gn 9^{25-27} $21^{6b.\,7}$ 25^{33} $27^{27-29.\,39f.}$, Jg 15^{16}). It is difficult to regard these intermingled lines of verse as the last remnants of an originally poetic composition. We may rather find here an indication that poetry had with the Hebrews a wholly subjective, *i.e.* lyric, tinge, but that it was not in use for objective epic description. We must reckon with this fact, without being able to offer any sufficient explanation of it. Perhaps, however, in this matter the common Semitic tendency is upon the side of the Hebrews, the exceptional development upon that of the Babylonians and Assyrians.‖

Such we consider to be the state of the case, and C. A. Briggs alone appears to come to a different conclusion. But even when he represents Jotham's fable (Jg 9^{8-15})—to take the most extensive illustration—as written in metre (see his metrical division of it, *op. cit.* p. 416 f.), this does not go essentially beyond what was said above. For here we have direct address and at least gnomic poetry, even if it is written in prose. ¶ But when the two Creation narratives (P's in Gn 1 and J's in 2^4–4), as well as the two forms of the story of the Flood (Gn 6–8), are declared to be poetical passages, metrically composed (Briggs, *op. cit.* p. 559 f.), this gives rise to a new, otherwise unheard of, state of things. *Before* any examination of these passages, the objection lies to hand that one cannot see why then Gn 9 and 11^{1-9} are not to be regarded as poetical, and, most pertinently of all, ch. 5, the Sethite table which forms the transition to the story of the Flood. But when one looks more closely at the passages in question, it becomes plain that the whole doctrine of the form of Heb. poetry, as explained above, must be radically transformed before these narratives can be forced into metrical forms. We find them dominated neither by stichical division nor by parallelism. Nothing is proved by the circumstance that here and there the tone of the language rises and takes a certain poetical flight, or that here and there a few lines are capable of scansion, or that the relation between certain clauses may claim the name of parallelism. In reality the primitive history of both sources (P and J) is, so far as the form is concerned, not otherwise constructed than the following history of the patriarchs, etc., and is transmitted to us as history, not poetry, just as strictly as that is.* The conclusion, then, holds that the poetically composed epos as well as the drama is wanting in Hebrew literature.

---

* Cf., for early times, G. Sommer, *Biblische Abhandlungen*, 1846, p. 85 ff., and for modern, C. A. Briggs, *op. cit.* p. 373 ff.

† Cf. the present writer's Commentary on Canticles in the *Kurzer Hdcomm. z. AT*, xvii. (1898) p. xii ff.

* Cf. the present writer's Commentary on Job in Nowack's *Handkomm.* ii. 1 (1896), p. vi f. J. Ley's rejoinder (*Neue Jahrb. f. das klass. Altertum*, etc., Leipzig, Teubner, Jahrg. 1899, ii. Abth. p. 295 ff.) only shows that he has not rightly apprehended the point on which we are at issue.

† The above remarks are not of course meant to exclude the recognition of a dramatic element in many passages in the OT, including even the Bk. of Job. The present writer could assent to the remark of C. A. Briggs (*op. cit.* p. 419), 'the dramatic element is quite strong in Hebrew poetry,' but not to the heading 'Dramatic Poetry,' nor to the statement (p. 420) that the dramatic element reaches its climax in the Song of Songs.

‡ Cf. above, p. 3^{b}.

§ Cf. Budde, *Comm.* p. vii ff.

‖ So also Grimme, *ZDMG*, 1897, p. 684.

¶ Parallelism proper is wanting, it is simply the rhetorical construction, with fourfold repetition of the same scene (cf. such a passage as Job 1^{13-19}) that gives the appearance of rhythm. The alterations made by Briggs on v.^{15} are warranted, however, even without a metrical scheme, only we must read נִמְצָא and

Accordingly, only *one* of the leading varieties of poetry, the earliest and the simplest of them, was cultivated in Israel, namely the *lyric*. At the same time it must not be forgotten that a secondary variety of this, namely *gnomic* poetry, which we might call 'thought-lyric,' likewise attained to a rich development.

B. THE EMPLOYMENT OF POETRY.—For the sake of brevity, we shall seek here to combine as far as possible a sketch of the history of OT poetry with a schematic survey of the poems that have come down to us. Only the folk-poetry of early times needs to be handled in any detail; the other survivals of Heb. poetry will be found treated of in this Dictionary in separate articles.

1. *Folk-Poetry.*—This is everywhere the oldest form of poetry. Poetry as an art never makes its appearance till later epochs. The saying of J. G. Hamann (1730–1788), 'Poetry is the mother-tongue of the human race,' which was more fully explained and established by his pupil J. G. Herder (1744–1803), and has in recent times been emphatically asserted especially by Ed. Reuss (cf. Herzog's *RE*^{2} v. [1879] p. 671 f.), finds everywhere its complete justification. Poetry is in point of fact older than prose; all the most ancient utterances of different nations are couched in poetry. One may lay down the rule: *in the case of a primitive people all discourse that is intended for publicity or for memorial purposes will be found clothed in a poetical form.* To these two categories belongs everything of a religious character, and it must be borne in mind that in the life of ancient peoples much that appears to us secular bears the stamp of religion. In this way poetry has its home in Israel as elsewhere:—

(*a*) *In family life.*—What specially come into view here are the *wedding-song* and the *lament for the dead.* Of the former of these we possess a whole collection of fine specimens, which, thanks to a mistaken exegesis, found their way into the Canon of the Sacred Writings, in the book which is called in Hebrew שִׁיר הַשִּׁירִים and, in English, Canticles or the Song of Solomon. Though these songs are of late origin, yet they will have preserved, as genuine folk-songs, the quality of early times with essential fidelity.* A *contrafactum* † of the wedding-song of older days is exhibited by the prophet Isaiah at the beginning of his Parable of the Vineyard ($5^{1ff.}$).—Of the lament for the dead we possess only *contrafacta*, applied to historical persons and personifications, first in the mouth of the prophets and then in the Book of Lamentations (chs. 1–4). See fuller details on this point above, i. *B* 2 **d**, p. 5. In the case of lamentations for the dead, women alone were the composers and the performers (מְקוֹנְנוֹת, חֲכָמוֹת, Jer 9^{16}), who sought to increase their collection of dirges and handed down their art by instruction (v.^{19}). At weddings, on the other hand, young men and young women seem to have contended for the pre-eminence.‡ From the official lament we ought certainly to distinguish exceptional cases when an accomplished friend might dedicate a eulogy to the dead, such as has come down to us in David's fine lament for Saul and Jonathan (2 S $1^{17ff.}$), and in a lament for Abner of which at least a few lines have survived (2 S $3^{33f.}$). Whether it was the custom to use songs to celebrate other important events and festivals in the family life, such, for instance, as weaning (cf. Gn 21^8) and circumcision, we have no means of determining.

(*b*) *In the life of the community.*—That even the industrial life of the Israelitish farmer and nomad was interpenetrated with song we may assume without further question. Examples are thinly scattered. From the earliest times we have the *Song of the Well* (Nu $21^{17f.}$).§ From the life of the agriculturist Is 65^8 has preserved some words of a *vintage blessing.* Harvest songs, too, may be taken for granted, in view of the harvest feasts and the proverbial joy of harvest (Is 9^3), and perhaps the feast of sheep-shearing (1 S $25^{4ff.}$, 2 S $13^{23ff.}$) had also its special songs. If our interpretation of the difficult text Jg 5^{11} is correct, the rehearsal of songs is presupposed even there as part of the shepherd's life. People did not like to be made 'the subject of verse' (מָשָׁל, cf. Is 14^4, Mic 2^4, Hab 2^6) or 'of music' (נְגִינָה, cf. La 3^{14}, Job 30^9, Ps 69^{12}). Hence the '*taunt-song*' must have been much in vogue. Even for early times its use is not to be denied, while for a later period a short specimen of quite a unique kind has been preserved in the song upon the forgotten courtezan, Is 23^{16}, which sounds as if it belonged to the category of *drinking-songs* mentioned in Ps 69^{12}, but presupposed also in Am 6^5 and 2 S 19^{35}. At least no banquet proper (מִשְׁתֶּה, *συμπόσιον*) can well have been without music, including songs. It is not necessary to suppose, indeed, that on such occasions only pronounced drinking-songs were sung; rather will the want have frequently been met in early times by national songs. A special class of composers and singers, whose services were called into requisition on such occasions, is named in Nu 21^{27} (הַמֹּשְׁלִים). By this Hebrew name we are to understand a guild of 'travelling singers,' rhapsodists such as flourished in ancient Greece and on German soil, who not only had a rich repository of national saga and heroic poems, but also treated their

---

וַתֹּאכַל 'and there came out fire and devoured.' By the way, Grimme (*ZDMG*, 1897, p. 512), too, represents Jotham's fable as written in verse, although he gives a somewhat different arrangement of it.

* It appears to us that Briggs is in general inclined to draw too lightly the boundaries of poetical form, confusing, as he does, rhetorical and metrical forms. This remark applies also very specially to many NT passages to which he gives a metrical arrangement.

* Cf. Budde, 'Das Hohelied' in *Kurzer Hdcomm.*

† This is the name applied to the church songs of the close of the Middle Ages, which were composed in imitation of the measure, melody, and words of familiar secular songs.

‡ Cf. the description, for modern Syria, by Wetzstein (*Ztschr. f. Ethnol.*, 1873, p. 287 ff.).

§ For evidence that this is not a properly historical poem, but a song such as it was customary to sing at the discovery of new springs in the desert, as well as for an attempt to restore its original form, see Budde in *The New World*, 1895, p. 136 ff.

audience to songs of a more or less wanton or frivolous character. At the royal court 'singing men and singing women' are taken for granted as part of the regular *personnel* (2 S 19^{35}). To the category under consideration belongs also the single certain ancient trace of *gnomic poetry* which has come down to us, namely Samson's riddle (Jg 14^{14a}), along with its solution, and Samson's reply in v.^{18}. Such displays of wit may have been much in vogue as 'social games' at merrymakings. That, along with these, proverbs and wise saws also had wide currency among the people we may take for granted. No doubt the collection of these in the Book of Proverbs dates from later times, but all the same this may embody very ancient material, altered or not, as the case may be. The oracle, which under the title of 'the last words of David' interrupts the context in 2 S 23$^{1-17}$, must have a late date assigned to it; the saying of Jahweh about Moses in Nu 12$^{6-8}$ appears to have been before the mind's eye of the writer. Another example of the same species is found in the words of Samuel in 1 S 15$^{22f.}$ It must be added that all three of the last cited passages tend to pass over into the following divisions—the religious, the national, and the prophetical.

(*c*) *In the religious life.*—In the first place it is extremely probable that the ancient *priestly oracle*, where it did not simply, by the casting of the lot, give the answer 'yes' or 'no' to the question put, was couched in verse. A classical example is furnished by Gn 25^{23}, an oracle, indeed, which belongs at the same time to our next division. Likewise for the cultus proper we have examples that are both ancient and certain. These are, in the first place, *the Aaronic blessing* (Nu 6$^{24-26}$), then *the formulæ pronounced at the taking up and the setting down of the ark of J"* (Nu 10$^{35f.}$),* and finally *Solomon's words in dedicating the temple* (1 K 8$^{12f.}$), which must be supplemented and restored after the LXX (8^{53}). How far the religious service, *i.e.* in particular the sacrificial actions, was even in ancient times embellished by special songs, cannot now be determined. All that have come down to us emanate exclusively from the temple at Jerusalem in post-exilic times, as far at least as the form in which they now lie before us is concerned. But as surely as the religious gatherings were joyous feasts (Dt 12$^{7.12.18}$), with equal certainty may we conclude that even in early times music and poetry must have assumed their rôle at these, whenever any sanctuary obtained a name and a brilliant equipment, and considerable bodies of worshippers came together.

(*d*) *In the national life.*—Here we may distinguish the state of rest on the one side, and of activity, *i.e.* war, on the other. To the first category belong the extremely numerous *eulogistic and denunciatory sayings* in which a people celebrates its own qualities and its superiority to other peoples; or separate divisions or groups of a people may express their own distinctive characteristics. This species of poetry is extraordinarily widespread and everywhere highly developed, but most of all amongst Israel's relations, the ancient Arabs. It may exhibit all degrees, from empty unmeaning braggadocio up to the finest and loftiest poetical utterance. In the OT it begins with the boastful *song of Lamech* (Gn 4$^{23f.}$), which occurs in the primitive genealogical table inherited from the Kenites (קין), and is a genuine type of the original form of this species as found in the mouth of a small tribe. Then come the *sayings of Noah* (Gn 9$^{25-27}$), in which Israel (שׁם) maintains its prestige over against the wealthy Phœnician (יפת) and the slave Canaan (כנען). Here for the first time this species clothes itself in the form of the 'blessing,' in which, suitably to the quality of our sources, which look at everything from the religious view-point, it meets us in by far the majority of instances. The characteristic of his half-brother *Ishmael* is defined by Israel in the words put into the mouth of Jahweh in Gn 16$^{11f.}$, which can hardly have retained their original form. So Israel states his relation to his twin brother *Edom* in the oracle of Gn 25^{23}, and separately for each in the double blessing of 27$^{27-29}$ and v.$^{39f.}$, very much, of course, to the prejudice of the brother. The more extensive *oracles of Balaam* (Nu 23$^{7-10.18-24}$ 24$^{3-9.15-24}$), which show indications that they have undergone several expansions, make glorious promises to Israel, in contrast to Moab, and even, further, to other nations. But this species shows its finest development in the two poems in which each of the tribes of Israel has its dignity and its special quality assigned to it in relation to the other tribes, namely the *Blessing of Jacob* (Gn 49) and the *Blessing of Moses* (Dt 33). It is by no accident that these two oracles have been put into the mouth of these two particular men, for Jacob is the fleshly and Moses the spiritual father of Israel, and they alone can pass judgment upon all their sons. The Blessing of Moses presupposes the Blessing of Jacob, and on the basis of the altered relations brought about by time (perhaps in the first half of the 8th cent.) gives it a new form. Thus, then, from the two sources, J and E, the older and the younger compositions are taken over. The older, the Blessing of Jacob, may have been compiled from separate sayings that were current about the different tribes. The self-consciousness of the tribe in which the finished poem took its rise, namely Judah, at last gave the general tone to the whole. Numerous sayings of the same kind, characterizing towns and hamlets, meadows, and clans, must have been current. A relic of these has survived in the now sorely mutilated saying about the city of Abel-beth-maacah, 2 S 20$^{18f.}$.

The principal specimen of the real historical folk-song is the fine *Song of Deborah*, Jg 5. This attaches itself closely, at the same time, to the preceding species, being as it is a poem in which praise and blame are distributed, from v.^{12} onwards. First of all, praise is given to Deborah, who by her recruiting-song has called to the battle, and then to Barak as the commander (v.^{12}). This is followed by an enumeration of the tribes who put in an appearance (vv.$^{13-15a}$), with censure and ridicule of those who kept at a distance (vv.$^{15b-17}$). Next a tribute is paid to the valour of the tribes of Zebulun and Naphtali (v.^{18}), the city of Meroz is cursed (v.^{23}), while to the Kenite woman Jael is awarded the palm for the greatest deed of personal heroism (v.$^{24ff.}$). We have here, at least from v.^{6} onwards, the primitive mode of a song that grew up in the life of the nation as a whole. We are directly reminded of the distribution of the rewards of victory after the battles of Platæa and Mykale. Of other war-songs we possess only fragments (Nu 21$^{14f.27-30}$, Jos 10$^{12f.}$) or very brief extracts compressed into a single verse, such as *the Song at the Passage of the Red Sea* (Ex 15^{21}), and that which was sung in honour of *Saul and David when they defeated the Philistines* (1 S 18$^{6f.}$). Similarly, the substance of a *song of triumph over Samson* is put into the mouth of the Philistines in Jg 16$^{23f.}$. On the other hand, it is clear that the *Song contained in Ex 15$^{1-20}$* is a late composition in Psalm style, expanded from the short v.^{21} and really meant to take the place of this; and in like manner *David's triumphal song* in 2 S 22 = Ps 18 is a late insertion.

As a feature of the real life of ancient times it is to be noted that in Ex 15^{21} as well as in 1 S 18$^{6f.}$ it is the women, or rather the maidens, who meet the returning warriors with songs, and the same custom is presupposed in Jg 11^{34}, in the story of Jephthah. Among the Arabs at the present day a victory is still followed by a sword-dance, performed by a maiden to the accompaniment of a song.

---

* Cf. further, *Actes du dixième Congrès de Orientalistes*, iii. (Leyden, 1896), p. 18 ff.

It is an extremely important circumstance that Nu 21^{14}, according to the note wherewith it is introduced, is derived from ספר מלחמות יהוה, **the Book of the Wars of Jahweh**, *i.e.* of the wars of Israel, which, as such, are the wars of Israel's God (cf. 1 S 25^{28}). We have thus to do here with a collection of ancient war-songs which already lay before the ancient historian as a source, and thus to a certainty mark the beginning of writing amongst the Hebrews. Side by side with this source we read in Jos 10^{13b} of a ספר הישר or **Book of the Upright**, from which v.$^{12-13a}$ is said to be cited. From it, according to 2 S 1^{18}, is cited also *David's lament for Saul and Jonathan*, no less than *Solomon's words in dedicating the Temple*, according to the LXX of 1 K 8^{53}, where ἐν βιβλίῳ τῆς ᾠδῆς = בְּסֵפֶר הַשִּׁיר, and the last Heb. word is doubtless corrupted from הַיָּשָׁר. Here, then, we have to do with an ancient song-book, which contained more than war-songs, and whose composition, or at least completion, must be brought down as far as the time of Solomon. We have no room to complain that more of the contents of these two books have not come down to us, when we consider that Charlemagne's collection of Old German songs has been completely lost.

2. *The Poetry of the Prophets.*—That the prophets availed themselves of poetical composition is self-evident from the first. For their utterances were intended for publicity, and, as time went on, more and more for being treasured in the memory, while at the same time the prophetic movement grew out of the popular soil, which was completely saturated with poetry.* The prophets have accordingly not suffered to escape their notice any of the manifold forms of poetry that unfolded themselves in the midst of the people. At the same time, thanks to the great variety of entrances upon the scene made by the writing prophets of whose literary activity more extensive remains have come down to us, we must, even in the matter of poetical form, distinguish a number of possibilities which show a marked divergence from one another.

(*a*) The prophet may adopt the poetical forms current in other social circles, and come forward himself as a poet, thus playing a strange part, as in the extremely frequent prophetical laments (cf. above, i. *B*, d), or the isolated marriage-song, Is 5$^{1f.}$ (cf. above, ii. *B*, a). But, even apart from these special cases, later prophecy has a special fondness for interrupting a prophetical address by songs, whether these are sung by the prophet himself, as happens with special frequency in Deutero-Isaiah, or are put into the mouth of other persons, as happens repeatedly in Is 24–27, and as has been done by a redactor in Is 12. In all these instances the language necessarily follows the laws of strictly poetical composition, because it attaches itself to fixed forms taken as a model.

(*b*) The prophet may communicate Divine oracles, which he has himself received. Here again strict, measured form is natural.

(*c*) The prophet may speak in his own name, taking for his basis, and expanding, Divine oracles. Betwixt these last two possibilities the great mass of prophetical passages continually oscillates; and transition cases occur, in which it is impossible to draw the boundaries sharply.

(*d*) The prophet may himself tell of his entrance upon office and what happened in connexion with it, such as the conversations he held. To this category belong, for instance, the accounts of visions such as we have in Am 7 ff., the appearances beheld by an Ezekiel or a Zechariah, etc., but no less the experiences of Hosea (chs. 1–3), not to speak of the little Book of Isaiah, whose kernel is the story of the prophet's meeting with king Ahaz (6^{1}–9^{6}), and some things related of Jeremiah (*e.g.* 18$^{1ff.}$).

(*e*) Another author may tell about the prophet in such a way that the latter becomes the hero of the story. In such instances it is relatively indifferent if occasionally it is the prophet who speaks of himself in the third person, but this is scarcely a likely contingency. To this last category belong Am 7$^{10ff.}$, Is 20, and in a much less degree chs. 36–39, but, above all, large sections of the Book of Jeremiah, particularly from ch. 26 onwards. If these last-named sections at last expand into a life of Jeremiah, nay, into a history of his times, if Is 36–39 was mainly taken from a popular work of history and appended to the older Book of Isaiah, it is evident that we have now reached the sphere of prose pure and simple. But even in these sections there are prophetical discourses which by a stretch may be said to lead us back to the realm of poetry.

Besides, personal endowments must be taken into account. One might have the full consciousness of a call to the prophetic office and yet be no born poet. Then it might happen that at one time the prophet would put on the unwonted poetic harness and go earnestly to work for a while, only to relapse presently into heedlessness, while at another time he would disdain to use it at all and would employ prose. Something of this kind may be observed, for instance, in Ezekiel.

Under such conditions the literary form in the prophetic writings continually vacillates to and fro, and we meet also with transition forms betwixt prose and poetry, which it is difficult to class with certainty. The possibility of a careless treatment of poetical rules, giving rise to an imperfect type or mixed species of discourse, is open to Hebrew as well as to any other language, nay, it lies nearer to hand in it than in many other languages. The stichic structure only needs to be neglected for the discourse to flow on with tolerable freedom from restraint, while the parallelism is retained as far as possible and by its peculiar undulating progress always makes itself felt. Grimme (*ZDMG*, 1897, p. 683 f.) is wrong, then, when he rejects *in toto* the idea of a 'rhythmic prose'; the dilemma by which he attempts a *reductio ad absurdum* of it is not cogent for those who do not accept his system. His argument fails in particular to do justice to the parallelism of the thought. For an analogy to the above-named mixed species, we may compare our own doggerel verse or rhymed prose.

For the prophetical books, then, a sliding scale must be adopted, with many indefinable transitions. The poetical form will be most strictly observed in the cases described above under (*a*) and, a little less, (*b*); the prophet himself will move with more freedom in those included under (*c*); the instance cited under (*d*) will give ample scope for the intermixture of prose; finally, in the last case prose will be the form started with, which will only occasionally make way for poetry. Details would be out of place here.

3. *Artistic Poetry.*—To this category belong in a certain sense the whole of the poetical books, for these were all either composed or collected in full view and with clear consciousness of their artistic

---

* Cf., for the origin of earlier and later prophecy, the present writer's American Lectures, *The Religion of Israel to the Exile*, New York and London, Putnam, 1899, Lect. iii. and iv.

form. This took place, without exception, in later post-exilic times. But at the same time there is scarcely one of them which had not its roots in the ancient folk-poetry. Along with lyric poetry, the gnome and the Wisdom literature occupy the forefront in this arena.

(*a*) *Lyric Poetry*.—(1) **The Song of Songs.**—This belongs, as was pointed out above (p. 10), wholly to the realm of folk-poetry. It is a collection of popular wedding-songs, belonging to a late period. But it owed its retention in the Canon simply to the circumstance that it was taken to be an extremely ingenious allegorical poem with a religious meaning, and that its author was assumed to be Solomon. It is not an impossible suggestion that, because of this conception, the book underwent here and there editorial revision.* See, further, art. SONG OF SONGS.

(2) **The Book of Lamentations.**—Here, truly, poetry as an art rules, till artificiality is reached in the alphabetic arrangement. But this art is based on the employment by the prophets of the popular lament for the dead, and is an imitation of the latter. A higher degree of art than that found in chs. 1. 2. 4 is present in ch. 3, which is meant to be, as it were, a central peak between the other chapters; ch. 5, again, is popular, and alien in subject and form from the rest.† See, further, art. LAMENTATIONS.

(3) **The Psalms.**—In this collection we have to recognize the Temple hymn-book of the post-exilic community, the religious lyric with artistic development. Only in a single instance has a secular song strayed into this company, namely Ps 45, also a wedding-song, but one of quite an artificial character. More frequent is gnomic poetry, although with a decidedly religious application; cf. *e.g.* Ps 1. But even here the popular basis is not wanting. In its purest form this meets us in the collection known as the *Pilgrim Songs*, Pss 120–137. Psalms outside the collection proper are found in Hab 3, which exhibits the same kind of titles and technical terms as meet us in the Psalms; in 2 S 22=Ps 18; in 1 S 2^{1-10} wrongly put in the mouth of Hannah; further, suitable to the situation are Ex 15^{1-20} (cf. above); the Song of Moses, Dt 32; Is 12. Perhaps also Nah 1 was originally an alphabetical psalm (see art. NAHUM for a defence of this view). In the so-called *Psalms of Solomon* (which see) there has come down to us, although only in the Greek language, another small collection of psalms from the 1st cent. B.C. The title 'Psalms of *Solomon*' expresses nothing more than that they are secondary, as compared with the canonical Psalms, which as a whole are attributed by tradition to *David*.

On the titles found in the Book of Psalms see art. PSALMS, p. 153 ff.

(*b*) *The Wisdom Literature*.—(1) **The Book of Proverbs** unites in itself *gnomic poetry* of the most diverse kinds and with the most varying degrees of development. The basis and the kernel (chs. 10–22^{17}, also chs. 25–29) are supplied by the two-line *māshāl*, which in form and contents is certainly the oldest structure of this species, and in its origin is distinctly popular. To this were appended, towards the end, more elaborate species, apophthegms expressed at greater length, enigmatical and numerical sayings, and finally (31^{10-31}) an alphabetical eulogy of the virtuous woman. At the beginning of the book (chs. 1–9) we have a connected series of pædagogical-philosophical didactic discourses, in which Wisdom and Folly personified are introduced. For details see art. PROVERBS.

(2) **The Book of Job** is based upon a popular story, and gives to the problem raised in this a new turn which it carries artistically through the conversations of chs. 3–42^{6}. The form adopted is essentially the same as is found in Pr 1–9, but the poet has succeeded in giving to this a lyric movement throughout, and has even cast the different speakers in so plastic a mould and kept them so well apart as to give rise to the appearance of a dramatic performance (cf. above, p. 9). Beyond any doubt, the Book of Job is the highest product of the poet's art to be found in the OT. It brings to a focus, as it were, all that Heb. poetry could contribute, and stands out as one of the noblest poetical compositions of any age, or any people. See, further, art. JOB.

(3) **Qoheleth.**—This book takes its place as a counterpart to Pr 1–9, as a philosophical didactic poem, but has an essentially different point of view. Belonging to a very late period, it does not stand high poetically; both language and verse-structure leave much to be desired. See, further, ECCLESIASTES.

(4) To the same species belongs the **Book of Sirach.** This is probably older than Qoheleth, it stands higher as regards language and form; from the religious standpoint it is more valuable, if less original in its views. It concerns us here because recently a considerable part of its contents has been recovered in the original Hebrew (see SIRACH). With this book we may bring our survey to a close.

K. BUDDE.

POISON (חֵמָה *ḥēmāh*, 5 times, Dt $32^{24.33}$, Job 6^{4}, Ps 58^{4} 140^{3}; רֹאשׁ *rō'sh*, in Job 20^{16}; LXX *θυμός* except in Ps 140^{3}, where it is *ἰός* as in NT; Vulg. *indignatio* Job 6^{4}, *caput* Job 20^{16}, *furor* Dt 32^{24}, Ps 58^{4}, *venenum* Dt 32^{33}, Ps 140^{3}, Ro 3^{13}, Ja 3^{8}).—The commonest signification of *ḥēmāh* is fury or the heat of anger, in which sense it occurs over 100 times in the OT. In some of these passages the ideas of anger and of poison are united, as in Is 51^{17-22}, where the cup of God's wrath is spoken of; see also Job 21^{20}, Jer 25^{15}, etc. Luther translates 'fervent lips' of Pr 26^{23} by *giftiger Mund*. The Greek word *θυμός* likewise primarily means that part of human nature which is affected with passion or anger. The Hebrew idea is therefore that poison is a substance which causes fatal heat and irritation, and in nearly every instance in the OT the material referred to is the venom of serpents or scorpions; see Dt $32^{24.33}$, Job 6^{4} 20^{16}, Ps 58^{4} 140^{3}, and in the NT Ro 3^{13}.

Six species of poisonous snakes occur in Palestine, *Vipera Euphratica*, *V. Ammodytes*, *Daboia xanthina*, *Echis arenicola*, *Naja Haje*, the hooded cobra common in the southern border countries, but not often found in the cultivated tracts; and *Cerastes Hasselquistii*, the horned viper, very common, and often found lurking in hollows of the ground. Tristram has seen it in the imprints made on soft ground by camels. The Israelites were therefore well acquainted with the effects of poisonous wounds inflicted by these, as well as by the scarcely less dreaded centipedes and scorpions. In Egypt poison was likewise chiefly associated with serpent bites. In the Book of the Dead (c. 149, l. 27 ff.) the poison of the serpent *Rtwk* is called *shmnt*, which comes from a root which also means to be hot, or to produce fever.

The natives of the neighbouring countries had, like most races of savage or semi-civilized man, learned to utilize this poison to render their darts and arrows more destructive. This was an ancient practice (cf. *Odyssey*, i. 261; Soph. *Trachiniæ*, 574), and it is referred to in Job 6^{4}. This usage has shown itself in the change of meaning in the word *τοξικός*, possibly also in that of *ἰός*, although it is now generally held that in its Homeric sense as an arrow it is connected with the Sanskrit *ishus*, while in its Sophoclean sense as a poison, ‘*εἶτα φοινίας ἐχθρᾶς ἐχίδνης ἰὸς*,’ it is related to the Sanskrit *vishas*.

---

* Cf. the present writer's *Comm.*, p. xx f.

† Cf. *Kurzer Hdcomm.*

The poison of insect bites is mentioned directly in Wis 16^{9} and implicitly in other passages. The word *rōʼsh* occurs 11 times, but is usually translated ‘gall’ (‘venom’ in Dt 32^{33}, ‘poison’ in Job 20^{16}, ‘hemlock’ in Hos 10^{4}). It was most probably a poisonous plant, and one which communicates its bitterness and poisonous properties to water (Jer 8^{14} 9^{15}); but in the absence of more definite information it is not easily identified. Perhaps the poppy is the plant indicated (see GALL in vol. ii. 104), but the grapes of gall of Dt 32^{32} are most probably the fruit of *Calotropis procera*.

Metaphorically, the influence of evil speech is said to be the deadly poison of that unruly evil, the tongue, Ja 3^{8}. The forked tongue of the snake was believed to be the darter of its venom before the structure of the poison fangs was known; cf. Job 20^{16} ‘he shall suck the poison of asps, the viper's tongue shall slay him.’

The administration of poison internally for suicidal or homicidal purposes is not mentioned in NT or OT. In 2 Mac 10^{13} there is, however, one instance given—that of the suicide of Ptolemy Macron. Poisoning and sorcery were, as they still are in savage and semi-savage countries, closely connected in ancient times and in the NT. Sorcerers are called *φαρμακοί*, as in LXX Ex 7^{11} 9^{11} 22^{18} and eight other passages, as well as in Rev 21^{8} 22^{15}; and sorcery is *φαρμακία* in Gal 5^{20}. Sorcery in the OT is, however, more directly connected with incantation, as implied by its root כִּשֵּׁף. See MAGIC, vol. iii. p. 210. Josephus (*Ant.* XVII. iv. 1), in describing the death of Pheroras, says that the Arabian women were skilful in compounding poisons; but the art of poisoning was in ancient times much more commonly employed among Indo-European than among Semitic peoples.

In the appendix to St. Mark's Gospel (16^{18}) one of the promises made to ‘those that believe,’ is that if they drink any deadly thing (*θανάσιμόν τι*), it shall not hurt them—a promise which, according to Papias (*ap.* Eus. *HE* iii. 39), was fulfilled in the case of Joseph Barsabbas.

The word ‘poison’ in English is borrowed from the French *poison*, which originally meant a potion or remedy. In the *Roman de la Rose*, l. 2043, it is thus used—

> ‘Car ge sais par quel poison
> Tu seras tret à garison’;

but from the 13th cent. it has been used in English in the sense of a deadly drug. See the passage in Langtoft's *Chronicle*, where he describes the administration of ‘puson’ to Ambrosius. This, though written in a sort of French, is the work of an Englishman; see also Britton, ed. Nichols, i. 34, where the word is spelled ‘poysoun.’

For notes on the history of poisons in ancient times see Schulze, *Diss. sistens toxicologiam veterum plantas venenatas describentem veteribus cognitas*, Halæ, 1788. A. MACALISTER.

POLE.—The brazen serpent was displayed upon a pole (Nu $21^{8.\,9}$ AV, the only occurrence of the word ‘pole’ in the Bible). The Heb. is נֵס (LXX *σημεῖον*), which appears to mean primarily ‘a flagstaff,’ and is used in a transferred sense for the banner itself. RV tr. ‘standard.’ See, further, art. BANNER.

POLL.—The poll (of Teut. origin, Scotch *pow*) is the head, especially its rounded back part. Thus Shaks. *Hamlet*, IV. v. 196—‘All flaxen was his poll’; and Bacon, *Essays*, p. 122, ‘Not the hundred poll will be fit for an helmet.’ The word is thence used in very early English for the person, as Piers Plowman, B. xi. 57, ‘Pol bi pol’=individually. A poll-tax is a tax on each person, and a poll or polling is a census or record of persons. The subst. is used in AV only in the phrase ‘by the poll’ (Nu 3^{47}) or ‘by their polls’ (Nu $1^{2.\,18.\,20.\,22}$, 1 Ch $23^{3.\,24}$). Cf. Shaks. *Coriol.* III. iii. 9—

> ‘Have you a catalogue
> Of all the voices that we have procured
> Set down by the poll?’

The Heb. word is always גֻּלְגֹּלֶת *gulgoleth*, which in the places where it is rendered ‘poll’ as well as in Ex 16^{16} (AV ‘for every man,’ AVm ‘by the poll or head,’ RV ‘a head’) and 38^{26} (AV ‘A bekah for every man,’ AVm ‘a poll,’ RV ‘a head’) means the head or the person in counting, taxing, etc., but elsewhere means the head as severed from the body (2 K 9^{35}, 1 Ch 10^{10}), or the skull as broken with a stone (Jg 9^{53}). The idea in the Heb. word as in the Eng. is *roundness.**

To ‘poll the head’ is to make it look more rounded by cutting off the hair. The expression occurs in 2 S $14^{26\,ter}$ (Heb. [גִּלַּח] in Piel, usually tr. ‘to shave’) and Ezk 44^{20} (Heb. כָּסַם, its only occurrence); and ‘to poll’ by itself in Mic 1^{16} ‘Make thee bald and poll thee for thy delicate children’ (Heb. גָּז, usually to ‘shear’). Cf. Wyclif's (1388) tr. of Job 1^{20} ‘Thanne Joob roos, and to-rente his clothis, and with pollid heed he felde doun on the erthe’; and 1 Co 11^{5} (1380), ‘Forsoth ech womman preiynge, or prophesyinge, the heed not hilid, defoulith hir heed; forsoth it is oon, as yif sche be maad ballid, *pollid, or clippid.*’

In Jer 9^{26} 25^{23} 49^{32} RV changes ‘that are in the utmost corners’ into ‘that have the corners of their hair polled,’ in accordance with AVm. See HAIR, vol. ii. p. 284^{a}. J. HASTINGS.

POMEGRANATE (רִמּוֹן *rimmōn*, *ῥόα*, *granatum*).—There can be no doubt of the identity of this tree. Its Arab. name, *rummân*, is plainly of the same origin. Its botanical name is *Punica Granatum*, L., of the order *Granateæ*. It is 10–15 feet high, with oblong lanceolate deciduous leaves, a woody-leathery top-shaped calyx, five to seven scarlet petals, very numerous stamens in several rows, and an ovary with two tiers of cells, three in the lower and five in the upper tier. The fruit is apple-shaped, crowned by the lobes of the woody calyx, yellowish or brownish, with a blush of red, and contains very numerous angular seeds, surrounded by a juicy pulp. It grows wild in N. Syria and possibly in Gilead. The fruit is of two varieties, the sweet and the acid. The pomegranate is repeatedly mentioned in the Ḳoran as one of the trees of Paradise. It is constantly alluded to in Arab stories.

The Scripture allusions to the pomegranate are also frequent. The spies brought pomegranates (Nu 13^{23}). The Israelites in the wilderness of Zin (Nu 20^{5}) lamented the pomegranates of Egypt, along with its figs and vines. Moses, in recounting the good things of Canaan, did not forget them (Dt 8^{8}). Saul abode under a pomegranate tree (1 S 14^{2}). Solomon compares the temples of his bride to a piece of the fruit (Ca 4^{3}), and her whole person to an orchard of them (v.^{13}). The beautiful flower is alluded to (6^{11} 7^{13}), and the juice or wine as a beverage (8^{2}). The withering or barrenness of this tree was a sign of desolation (Jl 1^{12}, Hag 2^{19}). The fruit was embroidered (Ex 28^{33}), and sculptured (1 K 7^{18}, etc.). It was also sculptured on the Egyptian monuments. It is mentioned in Sir 45^{9}. Numerous places were named from this tree, as Rimmon (Jos 15^{32}), Gath-rimmon (21^{25}), En-rimmon (Neh 11^{29}). The pomegranate is as extensively cultivated and as highly prized now as in ancient times. The beautifully striped pink and crystal grains are shelled out, and brought to table on plates. The acid sort is served with sugar. Rose-water is sometimes sprinkled over the grains. The juice of the acid sort is sweetened as a beverage, and also used in salads. The rind is used in tanning. It is also a powerful anthelmintic, principally against the tape-worm. A knife used in cutting the rind turns black, as does also the section of the rind, from the formation of tannate of iron. G. E. POST.

---

* This perhaps explains the name GOLGOTHA, ‘the place of a skull,’ Mt 27^{33}, Mk 15^{22}, Lk 23^{33} (RV), Jn 19^{17}.

POMMEL (from Old Fr. *pomel*, dim. of *pomme*; Lat. *pomum*, an apple) is the tr. in 2 Ch $4^{12\,bis.\,13}$ of גֻּלָּה *gullah*, which in the parallel passage, 1 K $7^{41\,bis.\,42}$, is tr. 'bowl.' RV gives 'bowl' in 2 Ch also. The reference is to the 'bowl- or globe-shaped portion of capitals of the two pillars in the temple' (*Oxf. Heb. Lex.*), so that *pommel* (which like the Heb. word contains the idea of roundness) is not unsuitable. Wyclif uses the word, not only of the round end of the handle of a sword, but of the whole handle, Jg 3^{22} 'the pomel (1388 *ether hilte*) folwide the yren in the wound.' In Pr 25^{11} (1388) he uses it in the orig. sense of an apple, 'A goldun pomel (Vulg. *mala aurea*) in beddis of silver is he that spekith a word in his time.'

J. HASTINGS.

POND.—See POOL.

PONTIUS PILATE.—See PILATE.

PONTUS (Πόντος) was a name used in a vague and loose way to designate certain large tracts of country in the north-eastern part of Asia Minor adjoining the Black Sea (which was often called by the Greeks '*the* Sea'). Originally, the name was applied to all or any part of the Black Sea coasts; and the Attic orators regularly use it of the Tauric Chersonese (Crimea) and the Cimmerian Bosporus;[*] and comparatively late writers also, such as Trogus, Diodorus, etc., sometimes apply the name to those remote parts. Herodotus, vii. 95, on the other hand, speaks of the Greeks of Pontus contributing 100 ships to the fleet of Xerxes in 480 B.C., obviously meaning the south Euxine coasts in general; and Xenophon in the *Anabasis* uses it of the eastern parts of the south coast. The term, as thus applied, was rather a mere description than a real name. It was only at a late period, and through political circumstances, that 'Pontus' began to have a definite sense as a geographical name.

i. THE FIRST KINGDOM OF PONTUS.—In the confusion that followed on the death of Alexander the Great, an adventurer named Mithridates managed to found a new state beyond the Halys in north-eastern Asia Minor, about B.C. 302. He assumed the title of king probably towards the end of B.C. 281, and was afterwards known as Ktistes, 'the Founder.' In later times the vanity of the dynasty descended from him invented the story of a legendary kingdom in older times, ruled by a Persian noble family; but that older kingdom rests on no historical basis. The kingdom ruled by the Mithridatic dynasty was, to a great extent, part of the country previously called Cappadocia: it also included some of the mountain tribes near the Black Sea coasts, and part of Paphlagonia. But, as a political unity, it required a name. Polybius in the 2nd cent. B.C. called it 'Cappadocia towards the Euxine,' and Strabo mentions that some called it 'Pontus,' and some 'Cappadocia towards the Pontus.'[*] Such elaborate names could never establish themselves in common use: Cappadocia was fixed as the name of the kingdom which included the centre and south of the country hitherto embraced under that title, and Pontus as the name of the northern kingdom which was ruled by the Mithridatic dynasty for 218 years, B.C. 281-63. The extent of the name varied according to the varying bounds of the kingdom, which was sometimes larger (including Armenia Minor, etc.), sometimes smaller.

The meaning of the name Pontus changed in B.C. 64. It had previously designated a kingdom, and that kingdom in that year ceased to exist. The Romans then incorporated part of the former kingdom in the empire, constituting it along with BITHYNIA as the double province *Bithynia et Pontus*, which continued to exist with hardly altered limits for more than three centuries until the reorganization of the provinces by Diocletian.

The rest of the old kingdom of Pontus was broken up by Pompey into a number of parts, which were treated in diverse ways; several self-governing cities were constituted; Comana was governed by a priest; Gazelonitis and Pontic Armenia were bestowed on Deiotarus, the Galatian chief and king. The rapid vicissitudes of that part of Pontus in the following years cannot here be followed up in detail. Pharnaces, son of Mithridates the Great, had been made by Pompey king of Bosporus, ruling over the countries on the north-eastern coasts of the Euxine; but he took advantage of the civil wars to reinstate himself in his father's realm of Pontus, till he was defeated by Cæsar in B.C. 47. The kingdom of Pontus was reconstituted by Antony in B.C. 39, and given first to Darius, son of Pharnaces, and afterwards, in B.C. 36, to Polemon.[†] Polemon founded a dynasty of kings who ruled over Pontus until A.D. 63.

ii. HISTORY OF PONTUS IN NEW TESTAMENT TIMES.—The new Pontic dynasty touched Christian history in several noteworthy ways; and it also was distinguished by coming into relationship with the reigning emperors, Caligula and still more nearly Claudius. The second wife of Polemon I. was Pythodoris, daughter of Antonia and granddaughter of Antony the Triumvir. Pythodoris reigned as queen of Pontus in her own right after her husband's death in B.C. 8 until some time after A.D. 21; but the history of the kingdom is quite unknown in her reign, and an interval seems to have occurred at her death. Her daughter Tryphæna reigned in association with her own son, Polemon II., during part of the reigns of Caligula, Claudius, and Nero. The one date which is certain is that Caligula[‡] made Polemon II. king of Pontus and Bosporus in A.D. 38. Previously, Tryphæna seems to have lived for some time in Cyzicus, and she had married Cotys, king of Thrace (who died in A.D. 19). She perhaps retired to the neighbourhood of Iconium at some time during the reign of Claudius. Her father, Polemon I., had at one time governed a kingdom or state in the south, containing Iconium and great part of Cilicia Tracheia; and presumably some estates near the city may have remained in possession of the family.[*] The remarkable story contained in the *Acta Pauli et Theclæ* mentions this queen Tryphæna as present at a great imperial festival in Pisidian Antioch under the reign of Claudius, and calls her a relative of the emperor. She could hardly be present at that festival of the provincial cult of the emperor, unless she were resident in the southern part of the province Galatia (of which part Antioch was capital), or, perhaps, on the frontier in the Cilician kingdom, which was given to Polemon by Claudius in 41 (see below); and she was a near connexion of the emperor Claudius, whose mother was Antonia, half-sister of Tryphæna's grandmother.

---

[*] Bosporus was the term which afterwards was employed to designate those regions when formed into a kingdom.

[*] Καππαδοκία ἡ περὶ τὸν Εὔξεινον, Polyb. v. 43. 1; ἡ πρὸς τῷ Πόντῳ Καππαδοκία, Strab. p. 534.

[†] Son of Zenon, the rhetor of Laodicea in the Lycus valley, see vol. ii. p. 86.

[‡] Caligula's grandmother, Antonia, was half-sister of Tryphæna's grandmother. The first year of Tryphæna and Polemon ended (according to the current Pontic year) in autumn 38; and their coins are known as late as their eighteenth year (Imhoof-Blumer in *Zft. f. Numism.* xx. p. 268; Wroth, *Catalogue of Brit. Mus., Pontus*, p. 47), A.D. 54–55.

The residence of Tryphæna near Iconium under Claudius can only have been temporary, as she appears with the title of queen on Pontic coins in the year A.D. 54–55, when Nero was emperor. According to the story (which is probably founded on fact) in the *Acta* above mentioned, she protected Thecla, St. Paul's Iconian convert, and was converted to Christianity by her protégée. The name Tryphæna evidently lasted in Christian tradition; and we find a martyr Tryphæna at Cyzicus, which was at one time very closely associated with the queen (*Acta Sanct.* 31 Jan. p. 696).

The dynasty of Polemon is also connected with the legends about the Apostle Bartholomew. According to one legend he preached in Bosporus, the kingdom of Polemon I., and from A.D. 38 to 41 of Polemon II.; and afterwards in Armenia Magna, where he suffered martyrdom in the city Ourbanopolis. Now Polemon II. received a Cilician kingdom in exchange for Bosporus in A.D. 41; and the capital of that kingdom was Olba, a Hellenized form of a native name Ourwa or Oura, called also Ourbanopolis.[†] His brother Zenon was made king of Armenia Magna in A.D. 18 under the name of Artaxias.

Another legend makes Bartholomew preach in Lycaonia, or in Upper Phrygia and Pisidia. Part of Lycaonia with Iconium was ruled by Polemon I., and the inhabitants of Iconium considered it a Phrygian city. The most probable foundation for this legend is that Bartholomew preached to the Phrygian tribe called the Inner Lycaones; see Ramsay, *Cities and Bishoprics of Phrygia*, pt. ii. p. 709. A third legend transports the scene of Bartholomew's preaching to India, but still assigns the name Polemios or Polymios to the king of the country, and Astreges or Astyages to his brother; and these are evidently mere distortions of the names Polemon and Artaxias.

It seems impossible that so many links should have been forged by tradition connecting the dynasty of Polemon with the early history of Christianity, unless there had been some historical reality out of which legend could draw its material. It would be out of place to investigate the subject further here. The discovery of the first traces of connexion was made by von Gutschmid in the *Rhein. Museum*, 1864, p. 170 (where he wrongly made Tryphæna the wife of Polemon). See also Lipsius, *Apocryphen Apostelgeschichten*, ii. 2, p. 55 ff.; Ramsay, *Church in the Roman Empire before 170*, ch. xvi.; and on the Polemon dynasty, Mommsen, *Ephem. Epigraph.* ii. p. 259 ff.; Hill in *Numism. Chron.* 1899, p. 181 ff.; also many other recent papers quoted in these works.

In A.D. 63 the government of Nero came to the conclusion that the kingdom of Pontus had been raised to such a level of peace and order that it might safely be taken into the empire. The western part was incorporated as a region of Galatia, and the eastern part was incorporated in Cappadocia (see below). Polemon II. still retained the title of king, with a kingdom in Cilicia Tracheia, where he presumably went to reside after A.D. 64.

Polemon II. became connected with NT history in another way. In 41 the kingdom of Olba (including a large part of Cilicia Tracheia) was given him by Claudius in exchange for Bosporus;[‡] and he retained this Cilician kingdom at least as late as 68, for a coin of Olba bearing his name was struck under Galba (though he had lost the kingdom of Pontus in 63). Berenice, daughter of Herod Agrippa I. (Ac 12), sister of Herod Agrippa II. (Ac 26), and widow of her uncle Herod of Chalcis, married Polemon, king of Cilicia, after inducing him through desire of her wealth to submit to circumcision; but she soon tired of him and abandoned him, whereupon he ceased to conform to the Jewish law.[*] This is evidently the same Polemon II. who was king of Pontus. Josephus does not mention the date; and above, in vol. ii. p. 360 f., the view is stated (following Smith's *DB* ii. *s.v.* 'Pontus,' and other authorities), that the marriage with Polemon was earlier than the interview of St. Paul with Berenice and her brother Agrippa. But that early date for the marriage is not certain, for Josephus speaks of Polemon as being king of Cilicia, and presumably living there, when the marriage occurred; and this implies a date after A.D. 63, for up till that year Polemon doubtless lived in Pontus, and would have been called king of Pontus rather than king of Cilicia. Berenice had been long a widow, as Josephus says,[†] when she married Polemon: now her husband, Herod of Chalcis, died in A.D. 48–49.

Thus in the 1st cent. A.D. the name Pontus had two distinct meanings: it might denote either the kingdom of Polemon, or the Roman province united with Bithynia. Further, there were other two uses of the name in the 1st cent. after Christ which are revealed to us by inscriptions. The kingdom of Polemon, though called Pontus, did not embrace nearly all the old Mithridatic kingdom of Pontus. Apart from the Roman province Pontus, a great part of western Pontus had been attached to the province Galatia, one part in B.C. 2 (with the cities Amasia and Sebastopolis), another in A.D. 35 (with the city Comana Pontica).[‡] This district, then, had to be distinguished from Pontus the province and Polemon's Pontus, and the method of distinction is clearly shown in many authorities: the province was called Pontus simply, Polemon's Pontus was called Pontus Polemoniacus (a name which remained in use for centuries after the death of the last king Polemon), and the part included in the province Galatia was called Pontus Galaticus. Those names are used in Ptolemy's geography and in many inscriptions of the 1st and 2nd cents.: they may be compared with the division of Lycaonia during the same period into two parts, one ruled by king Antiochus and called Lycaonia Antiochiana or simply Antiochiana (a name that continued in use late in the 2nd cent. and occurs in Ptolemy), and one attached to the province Galatia and called Lycaonia Galatica or simply Γαλατικὴ χώρα (see LYCAONIA, and on another similar pair of parts see PHRYGIA).

Still a fourth Pontus is mentioned by Ptolemy and in inscriptions, as Pontus Cappadocicus. This included the regions that lay east of Polemoniacus, between the Euxine Sea and Armenia; and it had been comprised in the dominions of Polemon I., whose realm extended so far as to embrace even Bosporus. Some modern authorities consider on account of the name Cappadocicus that it was not in the dominions granted to Polemon II. in A.D. 38. Queen Pythodoris had married Archelaus king of Cappadocia after the death of Polemon I., and there is much obscurity as to the fate of the Pontic realm in the later years of the queen and immediately after her death until A.D. 38; and the opinion has been held by some that the eastern regions were attached to Cappadocia and assigned specially to Archelaus, so that at his death in A.D. 17 Pythodoris continued to reign over only the western part of Polemon's former kingdom. But this is very improbable; for Bosporus was included along with Pontus in the kingdom of Polemon II. from 37 to 41, and if so, eastern Pontus also would naturally be comprised in his dominions. Moreover, Archelaus' kingdom was made into a Roman province in A.D. 17, but Trapezus and Cerasus, two cities of Pontus Cappadocicus (Trapezus being made capital of it by Trajan), dated from A.D. 63 as era, and this era must according to analogy be interpreted as the year when they were taken into the Roman Empire by being incorporated in a province. Now A.D. 63 was the year when Polemon's Pontic kingdom was taken into the empire, and the cities of Polemoniacus date from that year as era (so Zela and Neocæsareia); hence Cerasus and Trapezus would seem to have been included in the kingdom of Polemon II.; and if so, then presumably all Cappadocicus was similarly included. The difference of name, Polemoniacus and Cappadocicus, in that case, probably began only in A.D. 63, and was due to the fact that the eastern half of the kingdom was attached to the province Cappadocia and named accordingly, while the western half was attached to the province Galatia, and retained its former name Polemoniacus in distinction from the older Pontus Galaticus. An inscription, dating probably between 63 and 78, mentions Pontus Polemoniacus and Pontus Galaticus as parts of the province Galatia;[*] but does not mention Pontus Cappadocicus, thus proving that the latter was not in Galatia; and, as we know that Trapezus by that time was Roman, Cappadocia is the only province to which it could have been attached. Such is the probable sequence of events.

---

[*] See GALATIA, vol. ii. p. 86.

[†] On these names for Olba see Ramsay, *Historical Geography of Asia Minor*, p. 364.

[‡] Dion Cass. 60. 8. See GALATIA, vol. ii. p. 86 f.

[*] Josephus, *Ant.* xx. vii. 3.

[†] Πολὺν χρόνον ἐπιχηρεύσασα, xx. vii. 3.

[‡] Gazelonitis must also be added, as stated above.

Subsequently, Pontus Galaticus and Polemoniacus, after being included in the united provinces of Galatia and Cappadocia from about A.D. 78 to 106, were attached permanently to Cappadocia, when the two provinces were again separated by Trajan. Such is the arrangement described by Ptolemy. Yet the three names, Pontus Galaticus, Polemoniacus, Cappadocicus, persisted, with their separate capitals, Amasia, Neocæsareia, Trapezus, implying that they were considered for administrative purposes as distinct regions of the vast province of Cappadocia, to which all three were henceforward attached.

iii. THE NAME PONTUS IN THE NEW TESTAMENT.—When the name Pontus occurs in the NT, what are we to understand by it amid this puzzling complicacy of three or even four distinct regions, all bearing the name? As we have seen, the simple name Pontus, without any qualifying epithet, was regularly employed to designate the Roman province united with Bithynia;[†] and the writers of the NT seem to have observed this rule of ordinary usage. In 1 P 1^1 Pontus is clearly the province. Few could doubt this; and Hort has proved it beyond all question in his posthumous edition of part of the Epistle. Similarly, when the Jew Aquila, who bore a Roman name, is called a man of Pontus, Ac 18^2, it is practically certain that the province Pontus is meant. The Roman name demands a Roman connexion. The suggestion that he was originally a slave from Pontus Polemoniacus, who had been set free in Rome, seems impossible, as the freedman would not retain his slave nationality: the statement that Aquila was a man of Pontus, implies a lasting and present characteristic. Equally improbable is it that Pontus Galaticus is meant; for in the imperial system that district was merely a part of the province Galatia. In fact, there is practically no doubt that the intention in Ac 18^2 is to state that Aquila, though in recent time resident in Rome, was a provincial from Pontus, and not one who originally belonged to the city. The question then arises whether Aquila was a *civis Romanus* of the province Pontus (as St. Paul was a *civis Romanus* of the province Cilicia). That, however, is impossible, for he ranked to the Romans as a Jew, not as a Roman: the edict of Claudius, Ac 18^2, would not have applied to him if he had been a Roman either by birth or as the freedman of a Roman master;[*] but, being a Jew by nation, a provincial residing in Rome, he was expelled by the terms of the edict.

The remaining case is not so clear. In Ac 2^9 among the Jews and proselytes in Jerusalem at the Feast of Pentecost are mentioned 'dwellers in Judæa and Cappadocia, Pontus and Asia.' That list presents many difficulties, and is probably not composed by the author of Acts, but quoted by him from an older authority to whom he was indebted for the account of an incident which he himself had not seen (see PHRYGIA, vol. iii. p. 867). Hence it is not possible to say whether Pontus there means the Roman province united with Bithynia, or the whole country with its three distinct parts. But the former is much more probable, for Jews tended to prefer the peaceful and civilized countries, finding them much more suitable for trade and residence; and therefore it is exceedingly unlikely that there were many, if any, Jews in Polemoniacus in the year A.D. 29 or 30. Pontus Galaticus with the great city of Amasia would be more likely to contain Jews. But there is no possibility of reaching certainty about that unique and peculiar passage; and, being unique, it is less important.

iv. SPREAD OF CHRISTIANITY IN PONTUS.—The Churches of Pontus addressed by St. Peter (1 P 1^1) were evidently mainly composed of converted pagans. When that Epistle was composed, it must be concluded that Christianity had already taken strong root in Pontus, as contrasted with its feeble hold on LYCIA and PAMPHYLIA, which are not addressed in the Epistle.[†] Pontus lay so far from the earliest lines of the Christian propaganda that the strength of the new religion in it is, certainly, to be regarded as an argument in favour of a date later than A.D. 64.[‡] It is highly probable that Christianity spread thither by sea from the Asian coasts, and even from Rome (as Hort in the remarkable essay appended to his posthumous edition of 1 Peter is inclined to believe), for it is improbable that any missionary movement occurred at so early a date on the lines leading north from Syria or Cilicia through the barbarous lands of Cappadocia and Pontus Polemoniacus. Thus it was the cities of the *Ora Pontica* or Pontic coast lands which earliest received the new religion; and probably Amastris was its chief centre at first. By A.D. 111–113 it had spread so strongly in the province Pontus that Pliny, governor of *Bithynia et Pontus*, when making a progress through Pontus, wrote to Trajan *Ep.* 96 (probably from Amastris, where he wrote the following letter, 98), giving a remarkable account of the spread of Christianity. He says that many persons, men and women, of all ages and every rank in the state, not merely in the great cities, but also in the villages and on farm lands, were affected by the new superstition, the temples were to a great extent deserted, the sacrificial ritual had been for a long time interrupted,

---

[*] *CIL* iii. Suppl. 6818, with the remarks in Ramsay, *Historical Geography of Asia Minor*, p. 253.

[†] Except, of course, where the context imposed another sense without any need for a distinctive epithet. Κοινὸν Πόντου on coins of Neocæsareia the capital of Polemoniacus means only that region: similarly, on coins of Zela τοῦ Πόντου. Πρώτη Πόντου on coins of Amasia means Pontus Galaticus.

[*] Many excellent authorities, in defiance of this obvious and inevitable fact, regard him as a freedman. See Sanday-Headlam, *Romans*, p. 418 ff.

[†] The failure of Cilicia is due to its being part of the province Syria-Cilicia, and not included in the special group of provinces contemplated, viz. Asia Minor.

[‡] See *The Church in the Roman Empire before 170*, p. 284.

and few persons were found to buy animals for sacrifice. This state of the province was of long standing (*diu*), and some who were accused declared that they had abandoned Christianity 20 or 25 years ago.[*] Hence we cannot believe that less than 40 to 50 years had elapsed since the evangelization of the province began. While it is evident that Pliny is speaking of the province in general, it is noteworthy that it was in Pontus that he finally became so strongly impressed with the evil, and wrote to Trajan for advice about it. Towards the middle of the 2nd cent. Lucian confirms the testimony of Pliny (not that any confirmation is needed to establish the truth of that official report), alluding incidentally to Pontus, the native country of Alexander the impostor of Abonouteichos, as 'filled full with Epicureans and atheists and Christians' (*Alex.* 25). Like Phrygia, Pontus appears in the 2nd cent. as a region where Christianity was so strong that its history was no longer that of a militant religion against paganism, but rather of a contest of sect against sect. The heretic Marcion was born at Sinope in Pontus about 120. Aquila, the translator of the OT into Greek, was also a native of Pontus.

From the coast lands of the province, however, Christianity spread inland only slowly. Incidentally we observe here that it is necessary to distinguish carefully between the different meanings of the name Pontus, for neglect to do so has led some good scholars into needless difficulties. Thus, when Gregory Thaumaturgus was made bishop of Neocæsareia in Pontus about A.D. 240, he is said to have found only seventeen Christians in the country;[†] and, though no reliance can be placed on the exact number, still a clear tradition, doubtless trustworthy, is implied that Gregory had gone to a practically pagan country. This has been often set in opposition to the facts implied in 1 P 1^{1} and in Pliny. But Gregory preached in Pontus Polemoniacus, whose capital was Neocæsareia, while the older authorities speak of the province; and the contrast between the rapid spread in the one and the failure in the other is due to the tendency of the new religion to be restricted to the imperial bounds, to prefer civilized regions to uncivilized (Polemoniacus being remote and backward compared to the province), and to flourish best in districts where there had long been a strong Jewish element to prepare the soil.

Still the inner lands of Pontus appear to have been Christianized to a considerable extent during the 3rd cent. by the work of Gregory Thaumaturgus and other less famous missionaries. Such martyrs as Theodorus Tiro at Amasia, Theodorus the Soldier at Heracleopolis[‡] and Eukhaita, with many others,[§] are mentioned in the latest persecutions under Diocletian, Maximian, and Licinius. Before the time of Constantine the ecclesiastical system in all the districts of Pontus had been organized to a very considerable degree of completeness, not indeed so perfectly as in Pisidia and Lycaonia, but more thoroughly than in Galatia (see GALATIA, vol. ii. p. 85). For example, Hierocles gives a list of five cities in Pontus Polemoniacus, and three of these were represented at the Council of Nicæa in A.D. 325. But, as a whole, the evidence points to the 3rd and even the 4th cents. as the period when Christianity spread through inner Pontus, while the 1st and 2nd cents. were the time when the sea-coast, *i.e.* the province Pontus, was evangelized. Hence it is on the coast, at Sinope, that we find an early martyr, like Phocas the bishop of Trajan's persecution.[*]

About A.D. 295 Diocletian reorganized the provincial system and broke up the large provinces. The Pontic districts were then completely rearranged. The province Pontus was partitioned between Paphlagonia and Diospontus. The latter, which was afterwards named Helenopontus, after the mother of Constantine, contained also parts of Paphlagonia, Pontus Galaticus, and Polemoniacus. Pontus Polemoniacus retained its name, but was reduced in size, losing Zela to Diospontus, and Sebasteia to Armenia Minor. Pontus Galaticus disappeared entirely, losing Amasia, etc., to Diospontus, Sebastopolis-Heracleopolis to Armenia Minor, Comana, Ibora, and Zela to Polemoniacus, and probably some parts to Galatia the Byzantine province. The ecclesiastical organization followed this new arrangement. W. M. RAMSAY.

POOL is the tr^{n} in OT of three Heb. words.—**1.** אֲגַם *'ăgam*, 'pond' of stagnant or muddy water, from [אגם] to be troubled or muddy. The 'ponds,' RV 'pools,' of Egypt (Ex 7^{19} 8^{5} διώρυγες, *paludes*), were probably the sheets of stagnant water left by the inundation of the Nile. In Ps 107^{35} 114^{8} the word is rendered 'standing water,' RV 'a pool of water' (λίμνη, *stagnum*); in Is 14^{23} 35^{7} 41^{18} 42^{15} 'pool' or 'pools' (ἕλος, *palus, stagnum*); and in Jer 51^{32} it is put for 'reeds,' or reedy places (συστέματα, *paludes*). In Is 19^{10}, whilst the Vulg. renders by *lacuna*, the LXX has ζῦθος, 'beer' (see art. FISH-POOL). **2.** מִקְוֶה *miḳveh*, or מִקְוָה *miḳvah*; a place where waters flow together, from קוה (Niph. 'assemble'). The word is tr^{d} differently upon each occasion of its use. In Gn 1^{10} it is rendered the 'gathering together' (of the waters) when the earth and the seas were created (τὰ συστέματα, *congregationes* [*aquarum*]). In Ex 7^{19} the 'pools,' RV 'ponds' (τὰ ἕλη, *lacus*), of Egypt were probably reservoirs for the storage of water, as opposed to the stagnant water (*'ăgam*) left by the inundation. In Lv 11^{36} it is translated 'plenty,' RV 'gathering' (of water) (συναγωγή, *congregatio* [*aquarum*]). In Is 22^{11} the 'ditch,' RV 'reservoir' (ὕδωρ, *lacus*), made between the two walls at Jerusalem appears to have been formed by damming up the valley.

3. בְּרֵכָה *bĕrēkhah*, a 'pool,' or an 'artificial tank'; hence the Arabic *birket*, and the Spanish *al-berca*. The LXX generally tr. the word by κολυμβήθρα, but in four instances (2 S 2^{13} 4^{12}, 1 K 22^{38}, 2 K 20^{20}) by κρήνη and in one (Ca 7^{4}) by λίμνη. The Vulg. has *piscina* and once (Neh 2^{14}) *aquæductus*. In the NT (Jn $5^{2.\,4.\,7}$ 9^{7}) κολυμβήθρα is used. In Ps 84^{6}, where the plural occurs, AV reads 'filleth the pools,' whilst RV has 'covereth it with blessings' (*i.e. bĕrākhôth* instead of *bĕrēkhôth*); with this may be compared the 'valley of Berachah,' κοιλὰς εὐλογίας, *vallis benedictionis*, 2 Ch 20^{26}.

The pools were formed by building a dam across a valley, or by excavation; and they were supplied by surface drainage, by springs, or by water brought from a distance by conduits. They allowed the water to deposit any sediment it contained; and they were often connected with aqueducts and baths. They also frequently supplied water for irrigation, and were open to the air. The pools near towns were usually rectangular in form, and had their sides lined with water-tight cement. They were sometimes surrounded by porticoes (στοαί), in which bathers undressed themselves and lounged before or after bathing. The pool of Siloam had four such porticoes, and remains of them have been found by excavation; Bethesda, which was a *double* pool, had five porticoes (Jn 5^{2}), one on each of the four sides, and the fifth in the middle between the two pools.

[*] *Viginti quoque*, editio princeps; *viginti quinque*, conjecture.

[†] Gregory Nyss. *Vit. Greg. Thaum.* xlvi. pp. 899, 954 (ed. Migne)

[‡] Wrongly called Heracleia in the extant *Acta* (the best being the Armenian, translated by Conybeare, *Monuments of Early Christianity*, p. 224): it bore the double name Sebastopolis-Heracleopolis, and was not far from Eukhaita; see *Acta Sanctorum*, 7 Feb. vol. ii. pp. 23, 891.

[§] In the *Martyrolog. Hieronym.* the martyrs' names are often very corrupt (see Duchesne's Index, *s.vv.* Amasia, Neocæsarea, Sebastia); see also the Syriac *Martyrology*, 18th Aug.

[*] The best *Acta* are the Armenian in Conybeare's *Monuments of Early Christianity*, p. 103; see also *Acta Sanctorum*, July 14. vol. iii. p. 600 ff.

Pools are mentioned in the Bible at Hebron (2 S 4^{12}), Gibeon (2 S 2^{13}), Samaria (1 K 22^{38}), and Heshbon (Ec 2^{6}); and in general terms in Is 14^{23} 19^{10} and Nah 2^{8}. At or near Jerus. there were several pools: the Upper P. (2 K 18^{17}, Is 7^{3} 36^{2}); the Lower P. (Is 22^{9}); the Old P. (Is 22^{11}); the King's P. (Neh 2^{14}); the P. of Siloah, RV Shelah (Neh 3^{15}), apparently the same as the P. of Siloam (Jn 9^{7}); the ‘P. that was made’ (Neh 3^{16}); ‘a’ P., RV ‘the’ P. made by Hezekiah (2 K 20^{20}); and the P. of Bethesda (Jn 5$^{2.4.7}$). Josephus also mentions the Serpents' P. (*BJ* v. iii. 2); Solomon's P. (*BJ* v. iv. 2); the P. Amygdalon, and the P. Struthius (*BJ* v. xi. 4). Many of the ancient pools may still be seen in Palestine. The best known are those at Hebron and Jerusalem, and the ‘pools of Solomon,’ near Bethlehem, which are possibly the ‘pools of water’ (Ec 2^{6}) that Solomon constructed to irrigate his gardens and orchards. These pools are three in number, and they have been formed by building solid dams of masonry across the valley of Urtas. They have a total capacity of 44,147,000 gallons, and are so arranged that the water from each of the higher pools can be run off into the one immediately below it. The water was conveyed to Jerusalem by a conduit.

C. W. WILSON.

POOR.—1. This word, especially when it represents the Heb. עָנִי, is used sometimes with a semi-religious connotation, the nature of which it is the object of the present article to explain. In order to understand the term satisfactorily, it is necessary to bear in mind the meaning of the cognate verb, Heb. עָנָה, Arab. ʿ*anā* (ʿ*anā*^{w}). The Arab. ʿ*anā* means *to be lowly, submissive, obedient*, especially by becoming a captive, and so the ptcp. is often used simply in the sense of *a captive**: the Heb. עָנָה means analogously *to be humbled*, Is 31^{4} (RV ‘abase himself’), in the causative conj. *to humble, mishandle*, esp. by depriving of independence, or liberty, or recognized rights (EV usually ‘afflict’): cf. Gn 16^{6} (RV ‘dealt hardly’), Jg 19^{24} (‘humble’), —in both, parallel with ‘do to her (them) that which is good in thy (your) eyes,’ Gn 31^{50} (of the maltreatment of wives by a husband), Ex 22$^{22.23}$ (of the ill-treatment of a widow or orphan), Jg 16$^{5.6.19}$ (of ill-using Samson); and often of the ill-treatment of a nation in bondage, as Gn 15^{13} (∥ ‘to serve’), Ex 1$^{11.12}$ (cf. v.^{13} ‘make to serve’); see also 2 S 7^{10} (Ps 89^{22}), Ps 94^{5}.†

2. The subst. ʿ*ānī* (EV mostly ‘afflicted,’ or ‘poor’) thus means properly *one humbled* or *bowed down*, especially by oppression, deprivation of rights, etc., but also, more generally, by misfortune: as the persons thus ‘humbled’ would commonly be the ‘poor,’ the term came to denote largely the class whom we should call the ‘poor,’ and ‘poor’ is thus one of the conventional renderings of the word: it must, however, be remembered that ʿ*ānī* does not really *mean* ‘poor,’ and that while in the English word ‘poor’ the prominent idea is the poverty of the person or persons so described, in the Heb. ʿ*ānī* the prominent idea is that of the ill-treated, or the miserable: in other words, the ʿ*ānī*, while often, no doubt, a person in need, was primarily a person suffering some kind of social disability or distress.

3. רָשׁ *rāsh*, is the Heb. word which expresses distinctively the idea of poverty; but this occurs only 1 S 18^{23}, 2 S 12$^{1.3.4}$, Ps 82^{3} (RV ‘destitute’), Ec 4^{14} 5^{8}, and 15 times in Proverbs. It is worth noticing (Rahlfs, p. 75) that ʿ*āshīr*, ‘rich,’ never appears as the opposite of ʿ*ānī*, while it is the true antithesis of *rāsh* (2 S 12$^{1.2.4}$, Pr 14^{20} 18^{23} 22$^{2.7}$ 28^{6}).

‘Poor’ is also sometimes the tr. of ʾ*ebyōn*, ‘needy’; and often that of *dal* (prop. *thin, reduced, feeble*): cf. Driver, *Parallel Psalter*, pp. 450, 452. ʾ*Ebyōn* is once opposed to ʿ*āshīr*, Ps 49^{2}; and *dal* is opposed to it 5 times, Ex 30^{15} Pr 10^{15} 22^{16} 28^{11} Ru 3^{10}.

It is to be regretted that there is no English word which would both suit all the passages in which ʿ*ānī* occurs, and also indicate its connexion with ʿ*ānāh*, ʿ*innāh*, and ʿ*ŏnī*.

4. In the laws of Ex 22^{25}, Lv 19^{10} (=23^{22}), Dt 15^{11} 24$^{12.14.15}$, now, ʿ*ānī* is used as a purely colourless designation of the persons whom we should describe as the ‘poor.’ But in the prophets and poetical books, esp. the Psalms, we see gradually other ideas attaching themselves to the term. Thus allusions are made, especially by the prophets, to the oppression of the ʿ*ăniyyīm*, at the hands of a high-handed and cruel aristocracy (Am 8^{4} [Heb. marg.], Is 3$^{14.15}$ 10^{2} 32^{7} [Heb. marg.], Ezk 16^{49} [in Sodom], 18^{12} 22^{29}; Job 24$^{4.9.14}$, Pr 30^{14}); so that they become the objects of special regard on the part of a righteous king (Jer 22^{16}, Ps 72$^{2.4.12}$), or individual (Ezk 18^{17}, Is 58^{7}, Zec 7^{10}, Ps 82^{3}, Pr 22^{22} 31$^{9.20}$; cf. Pr 14^{21} [Heb. text], Dn 4^{27}), and especially of Jehovah (Is 14^{32}, cf. v.^{30}; implicitly, also, in the other passages quoted).

5. Comp. the allusions to the oppressions of the ‘needy’ (אֶבְיוֹנִים) in Am 2^{6} 4^{1} 5^{12} 8$^{4.6}$, Is 32^{7}, Jer 2^{34} 5^{28} and elsewhere, and of the ‘reduced’ (דַּלִּים, EV ‘poor’) in Am 2^{7} 4^{1} 5^{11} 8^{6}, Is 10^{2} etc. (both words often in parallelism with ʿ*ăniyyīm*); and the manner in which it is promised that they will be in a special degree under the protection of the ideal king (Ps 72$^{4.12.13}$, Is 11^{4}), and that—like the ʿ*ăniyyīm* in Is 14^{30}—they will be the first to benefit, when society is regenerated, and J″ establishes His ideal kingdom (Is 14^{30} 25^{4} 29^{19}).

6. So in Ps 18^{27} God is spoken of as saving the ‘afflicted (*or* humbled) people’ (עַם עָנִי), but as abasing the ‘haughty eyes’; and in Is 26^{6}, when the tyrannical city has been destroyed, it is mentioned, as a special ground for satisfaction, that the ʿ*ānī* and the *dallīm* may then tread unmolested over its ruins. ʿ*Ānī* is used also of Israel, suffering in the wilderness or in exile or war, and regarded as implicitly or ideally righteous, and eliciting in consequence Jehovah's compassion, Ps 68^{10}, Is 41^{17} 49^{13} 51^{21} 54^{11}, cf. Hab 3^{14}. In Zeph 3^{12} the ideal Israel of the future, who survive after the coming judgment has removed from Jerusalem the ‘proudly exulting’ ones, so that none will any more be ‘haughty’ in God's holy mountain, are characterized as a ‘humbled and poor people’ (עַם עָנִי וָדָל), who will ‘take refuge’ in the name of J″, and (v.^{13}) be free from all iniquity. Perhaps, indeed, the expression means also Israel generally in Is 26^{6}.

7. These passages show that ʿ*ānī* (‘afflicted,’ ‘poor’), as also its frequent parallel ʾ*ebyōn* (‘needy’), and, though somewhat less distinctly, *dal* (EV also mostly ‘poor’), came gradually to imply more than persons who were merely in some kind of social subjection, or material need: they came to denote the *godly* poor, the suffering righteous, the persons who, whether ‘bowed down,’ or ‘needy,’ or ‘reduced,’ were the godly servants of Jehovah. It is evident that in ancient Israel, especially in later times, piety prevailed more among the humbler classes than among the wealthier and ruling classes: indeed the latter are habitually taken to task by the prophets for their cruel and unjust treatment of the former. In particular, as Rahlfs (p. 89) observes, ʿ*ānī* acquired thus, not indeed a religious *meaning*, but a religious *colouring*. This colouring appears most frequently in the Psalms: note the following passages, in which, if they are compared carefully with the context, it will become evident that the ʿ*ăniyyīm* (frequently ∥ with the ‘needy’) are substantially identical with those who are elsewhere in the same Psalms called ‘the godly,’ ‘the righteous,’

---

* See Rahlfs, עָנִי *und* עָנָו *in den Psalmen*, 1892, pp. 67–69.

† Comp. the cognate subst. ʿ*ŏnī*, *state of being humbled* or *bowed down*, EV ‘affliction,’ Gn 16^{11} 31^{42}, Ex 3$^{7.17}$, Is 48^{10} *al.*

'the faithful,' etc.: Ps 9^{12} (Heb. text*; RV) $10^{2.\ 9.\ 9.\ 12}$ (Heb. text*; RV) [comp. 9^{10} 'those that know thy name' and 'that seek after thee,' 10^{17} 'the humble' (see below)]; 12^{5} [see v.^{1} 'the godly,' 'the faithful']; 14^{6a} [v.^{b} 'for J″ is his refuge']; 18^{27} 22^{24} 25^{16} ('I am solitary and *'ānī*'; cf. 69^{29} 88^{15}), 34^{6} $35^{10.\ 10}$ (delivered by J″), 37^{14} (cf. v.^{12}), 40^{17} $=70^{5}$ ('I am *'ānī* and needy'; so 86^{1} 109^{22}), $74^{19.\ 21}$ 102^{title} 109^{16} 140^{12}; see also Is 66^{2}, Job 34^{28} $36^{6.\ 15}$ (cf. the cognate subst. *'ŏnī*, AV 'trouble,' or 'affliction,' in Ps 9^{13} 25^{18} 31^{7} 88^{9} $119^{50.\ 92.\ 153}$, of the Psalmists' own sufferings: also 44^{24} $107^{10.\ 41}$). Most of these passages—indeed, except Ps 18^{27}, probably all—are post-exilic; and reflect the social and religious conditions of the post-exilic community: the religious 'colouring' of *'ānī*, which had been previously in process of acquisition, was then confirmed. The troubles of which the *'ānī* complains are, however, not *poverty*, but chiefly social and religious wrongs.

8. From *'ānī* is to be carefully distinguished a word with which it has been sometimes very needlessly confused, *'ānāw*. While *'ānī* means one who is 'humbled' or 'bowed down' by adverse external circumstances, *'ānāw* means one who is 'humble' in disposition and character, 'humble-minded' (Cheyne, *OP*, 98), or, to speak more specifically, one who *bows* voluntarily under the hand of God, and is 'submissive to the Divine will' (Cheyne, *Introd. to Is.* 64 f., 266). It thus, unlike *'ānī*, has from the beginning an essentially moral and religious connotation. In AV and RV it is mostly rendered 'meek'; but meekness is predicated of a person's attitude towards other men, whereas *'ānāw* denotes rather a man's attitude towards God; so that 'humble' would be the better rendering. *'Ānāw* is less common than *'ānī*: it occurs in Nu 12^{3} (of Moses); in the prophets, Am 2^{7} 8^{4} (Heb. text †), Is 11^{4} 29^{19} 32^{7} (Heb. text ‡) 61^{1}, Zeph 2^{3}; in the poet. books, Ps 9^{18} (Heb. text ‡), 10^{17} 22^{26} $25^{9.\ 9}$ 34^{2} 37^{11} ('the humble shall inherit the earth'), 69^{32} 76^{9} 147^{6} 149^{4}, and the Heb. margin of Pr 3^{34} (opposed to לֵצִים 'scorners'), 16^{19} (opposed to 'the proud'; cf. Sir 10^{14} [Heb.]),—in all, of the 'humble,' either as victimized by wicked oppressors, or as the objects of Jehovah's regard, and recipients of His salvation.§ The cognate subst. *'ănāwāh* occurs Ps 18^{35} (of J″), 45^{4},‖ Zeph 2^{3} ('seek righteousness, seek *humility*'), Pr $15^{33}=18^{12}$ ('before honour is *humility*'), 22^{4}.

9. The Heb. marg. (*Ḳerê*) substitutes thrice (Am 8^{4}, Is 32^{7}, Ps 9^{18}) *humbled* ('poor') for *humble* of the text (*Kethîbh*); and five times (Ps 9^{12} 10^{12}, Pr 3^{34} 14^{21} 16^{19}) *humble* for *humbled* ('poor') of the text (*Kethîbh*),—in each case, it seems (cf. Rahlfs, p. 54 f.), deeming the correction to express an idea better suited to the context (in Am 8^{4}, Is 32^{7}, Ps 9^{18} the parallel clause has *needy*; in Pr 3^{34} 16^{19} *humble* forms evidently a juster antithesis to 'scorner' and 'proud' than *afflicted* or 'poor'). The correction is certainly right in Pr 3^{34} 16^{19}, probably also in Am 8^{4}; in the other passages it does not seem to be necessary.

10. The two terms which have been here discussed seem, in fact, to have been two of the more prominent and distinctive designations of a *party* in ancient Israel, which appears to have first begun to form itself during the period of the later pre-exilic prophets, but which, during the Exile and subsequently, acquired a more marked and distinctive character—the party, viz., of the faithful and God-fearing Israelites, who held together, and formed an *ecclesiola in ecclesia*, as opposed to the worldly and indifferent, often also paganizing and persecuting, majority. The Psalms, especially the Psalms of 'complaint,' abound with allusions to these two opposed parties, the opposition between which seems to have been intensified in the post-exilic period, till it culminated, in the age of Antiochus Epiphanes, in the struggle between the nationalists and the Hellenizers. The God-fearing party are described by many more or less synonymous designations, such as 'those that fear (or love) J″,' 'those that seek (or wait for) J″,' 'the servants of J″,' the 'godly' (*ḥăsîdîm*), the 'righteous,' etc.; from the point of view of their social condition they are specially the *'ăniyyîm* or (to adopt the conventional rendering) the 'poor,' from the point of view of their character they are the *'ănāwîm* or the 'humble.' The party opposed to them are the 'wicked,' the 'evil-doers,' the 'proud,' the 'haters,' 'enemies,' or 'persecutors' of the Psalmists and their co-religionists, who are described as 'seeking their life' and 'delighting in their hurt,' etc., and as setting themselves in various ways to dishonour Jehovah, and bring reproach upon His servants (cf. Cheyne, *JRL* pp. 114–125).* The former party was that out of which a considerable number of the Psalms appear to have sprung, especially those which possess a *representative* character, and in which the Psalmist seems to give expression not simply to his own experiences and spiritual emotions, but also to those of a circle of similarly circumstanced godly compatriots.

See, further, Grätz, *Die Psalmen* (1882), 20–37 (whose view, however, that the *'ănāwîm* were Levites, is not probable); Isidore Loeb, 'La Littérature des Pauvres' in *REJ*, 1890–92 (Nos. 40–42, 45, 46, 48), also published separately, Paris, 1892 (clever: exemplifies very fully the characteristics of the 'poor,' especially in the Psalms, but exaggerates the idealism of the Heb. poets, and also generalizes too freely); Rahlfs, *op. cit.* Hupfeld (on Ps 9^{13}) contended that עָנִי and עָנָו were used without any distinction of meaning, both signifying *afflicted*, with the collateral idea of *humble*; but this view is antecedently improbable, and not required by the facts.† Ges. (*Thes.*) treated both words as meaning properly *afflicted*, but regarded *'ānāw* as having always the collateral idea of *humble, meek*. Recent scholars, as Delitzsch and Cheyne (both on Ps 9^{13}), Lagarde, *Mitth.* i. 81, Rahlfs, pp. 62–66, 73–80 (cf. König, *Lgb.* ii. 134, 76), more correctly distinguish *'ānī*, 'bowed down,' from *'ānāw*, 'one who bows himself,'—Del. and Cheyne, however, thinking also that, as affliction is the school of humility, and a man may be 'bowed down' with consent of his own will, *'ānī* acquired secondarily the sense of 'humble.' It seems best, with Rahlfs, to keep the words entirely distinct: the *'ăniyyîm* were, no doubt, known to be also 'humble,' and so could be opposed to the 'proud,' Ps 18^{27}, or classed with the 'stricken in spirit,' Is 66^{2}; but the fact is not expressed by the term used. It would be easier, if necessary, to *read* one word for the other, than to give one word the meaning of the other. The LXX preserves, on the whole, a consciousness of the distinction between the two words: the translators render *'ānī* (*Kt.*) by πένης 13 times, by πτωχός 38 times, by ταπεινός 9–10 times, by πραΰς only Zeph 3^{12}, Zec 9^{9}, Is 26^{6}; and *'ānāw* (*Kt.*) by πραΰς 8 times, by πένης 3 times, by πτωχός 4 times, by ταπεινός 4 times: in view, however, of the frequency with which י and ו are confused in LXX (Driver, *Samuel*, lxv–lxvii), we cannot be sure that they always read the Heb. text exactly as we do. In the Targ., also (especially in the Psalms, Rahlfs, p. 56 f.), the greatly predominant rendering of *'ānī* is 'poor,' 'distressed,' etc., while that of *'ānāw* is 'humble' (עִנְוְתָן). And the Vulg. nearly always renders *ānī* by *pauper, egenus, inops*, but *'ānāw* by *mitis* or *mansuetus*.

S. R. DRIVER.

POPLAR occurs twice in EV (Gn 30^{37}, RVm 'styrax,' Hos 4^{13}). The Heb. לִבְנֶה, *libneh*, signifies 'a white tree.' The LXX in Genesis gives *στυράκινος*=*storax*, and in Hosea *λεύκη*='poplar.' The authority of the Arab. *lubna*, which signifies the *storax*, may be considered decisive as to the meaning of the Hebrew. *Styrax officinalis*, L., of the order

---

* The Heb. marg. (*Ḳerê*) has in these passages *the humble* (RVm 'meek'): see § 9.

† The Heb. marg. (*'ăniyyê*), followed by RV, yields, however, a more suitable sense here; it would also be better to read *'ăniyyê* in 2^{7} (cf. Is 10^{2}).

‡ Heb. marg. (*Ḳerê*) *the poor*; see § 9.

§ With Is 61^{1} (LXX, wrongly, πτωχοί, and so in the quotation, Lk 4^{18}) cf. Mt 11^{5}=Lk 7^{22}.

‖ Where 'ride on *on behalf of . . . meekness* (humility)' means that the king addressed is to take the field on behalf of the humble against their proud oppressors (see Cheyne or Kirkpatrick, *ad loc.*).

* Rahlfs, following Ewald, calls attention (pp. 5–29) to the numerous similarities of expression and situation characterizing in particular the group of Psalms, 22. 25. 31. 34. 35. 38. 40. 69. 71. 102. 109; he assigns the group (p. 30 ff.) to the close of the Exile or shortly after.

† The note is much abbreviated (the sentence on the original difference of עני and ענו being added) in Nowack's revised ed. of Hupfeld's *Comm.* (1888).

Styracaceæ, is a shrub or tree 6 to 20 feet high, with ovate to round-ovate leaves, glabrescent at upper, and white-woolly at lower, surface. It bears numerous snowy-white flowers, resembling orange blossoms, 1 to 2 inches broad, and a green drupe-like berry. The officinal storax is the inspissated juice of the inner layer of the bark. It has an agreeable vanilla-like odour. It was formerly employed in medicine as a stimulant expectorant, but is little used now. The name *libneh*, 'white,' is well justified by the snowy-white under surfaces of the leaves, and the wealth of beautiful white blossoms. No wild tree of the country is more ornamental than this. It is common in thickets from the coast to the subalpine regions. In Syria it is called *ḥauz*. It has been objected to the rendering 'styrax' (Hos 4^{13}) that it is not large enough to give the 'shadow' required, and that therefore 'poplar' should be retained. We have, however, indicated that *Styrax officinalis* attains a height of 20 feet, and such trees would give a better shade than the tall, cylindrical poplar. Moreover, the poplar is a tree of valleys and plains, growing only by water-courses, while *Styrax* grows on dry hillsides, in localities similar to those of the oak and terebinth. G. E. POST.

PORATHA (פּוֹרָתָא; B *Φαραδάθα*, ℵ *Φαραάθα*, A *Βαρδάθα*).—The fourth of the sons of Haman, who were put to death by the Jews (Est 9^{8}). The name is probably Persian, and the LXX reading suggests that the true form is Poradatha (פּוֹרְדָתָא='given by fate'?).

PORCH.—A covered entrance to a building. It is generally outside the main building, and so differs from vestibule which is inside, and from which doors open into the several apartments of the house. Two words in OT denote porch, viz. Heb. אֵילָם (*'êlām*), found in Ezk 40 only, and אוּלָם (*'ûlām*), which occurs in 1 K, 1 and 2 Ch, Ezk, and Joel. As to the identical meaning of these Heb. words see under ARCH.

There is another Heb. word מִסְדְּרוֹן (*misdĕrôn*), which EV tr. by porch (Jg 3^{23} 'Then Ehud went into the porch'). This word is not used elsewhere; and while we do know that some part of a house is denoted, we have no means of saying what part. The versions render little if any aid, nor do the cognates throw any light on the meaning. The root is סֵדֶר (*seder*), a row, series, order. So מִסְדְּרוֹן (*misdĕrôn*) might be expected, according to its etymology, to denote something built in line with or according to the form of something else, such as a wing, built along the outside walls of a porch, with sides at right angles to the main building.

The word *'ûlām* or *'êlām* is variously applied in OT.

1. It is used of the porch erected to the east of Solomon's temple, 1 K 6^{3} and 7^{19}, and 2 Ch 15^{8} $29^{7.17}$. It was 20 cubits long by 10 broad; its height is not given in 1 K, but in 2 Ch 3^{4} it is said to be 120 cubits high. Now, a porch 20 cubits long, 10 broad, and 120 high would be a monstrosity; indeed the whole verse as it stands is senseless. Kautzsch, Bertheau, Oettli, and Kittel attempt a reconstruction, and all agree that 120 for the height is an evident mistake; A of the LXX, the Syr., and Arab. versions have 20, which is likely enough to be correct, though Bertheau prefers reading 30. Aug. Hirt (*Der Tempel Salomo's*, p. 4), together with the above authorities, excepting Bertheau, decide for 20. If the text is to be upheld, it is to be explained, as by Ewald (*Gesch.* iii. p. 42), according to the well-known leaning of the Chronicler to exaggeration; but in this case the exaggeration is one which makes the writer ridiculous, and it is far better to emend the text. The similarly situated porch of Ezekiel's temple has the same name, Ezk 40^{48} 41^{15} (read with Cornill, sing. 'porch'). **2.** The same word is employed for each of the two porches belonging to Solomon's palace, the 'porch of pillars' 1 K 7^{6}, and the 'throne porch' (or place of judgment), 1 K 7^{7}. **3.** In Ezk the word stands for the two large apartments, one lying at the inner end of the outer gate, the other at the outer end of the inner gate. It is in this connexion that the form *'êlām* is mostly, though not exclusively, employed. Of these minor porches there were in all six: one at each of the three outer (N. E. S.), and one at each of the three corresponding inner gates.

In NT three separate Gr. words are translated in EV 'porch.'

1. Mk 14^{68} 'And he (Peter) went into the porch.' The Gr. word (*προαύλιον*) denotes a covered way leading from the street into the court of a house; a sort of passage. 'Forecourt' is the word given in RVm. **2.** Mt 26^{71} 'And when he (Peter) was gone out into the porch.' This passage is parallel with the former, and, though *πυλών* usually means door, doorway, there can be no doubt that it has here the same signification as *προαύλιον* in Mk. **3.** Jn 5^{2} 'Now there is in Jerus. by the sheep gate a pool, which is called in Heb. Bethesda, having five porches.' These porches (*στοαί*) are simply five covered ways joining the street with a pool. In three other places, in each case in the phrase '**Solomon's porch**,' is the word *στοά* found (Jn 10^{23}, Ac 3^{11} 5^{12}). This was a portico on the eastern side of the temple building, hence called by Jos. (*Ant.* XX. ix. 7) *στοὰ ἀνατολική*, and supposed by him to have survived the destruction of the temple in B.C. 586, and to go back to Solomon's own day (*ib.* XIV. xi. 5, XX. ix. 2; *Wars*, V. v. 1). It is generally agreed that this eastern porch, as well as the other porches existing in our Lord's time, were due to Herod's restoration; yet, if this porch was built so near the time of Josephus, it is singular that he should have thought it to be the work of Solomon. T. W. DAVIES.

PORCIUS FESTUS.—See FESTUS.

PORCUPINE.—See BITTERN.

PORPOISE.—See BADGER.

PORT.—This word has in its time played many parts. It has meant (1) carriage of the body, demeanour (from Lat. *portare*, to carry); (2) a harbour (from Lat. *portus*); (3) an entrance, a gate (from Lat. *porta*, through Fr. *porte*); and (4) a wine (from Oporto, in Portugal). Of these meanings (1) and (3) are now almost obsolete. In AV the only occurrence of the word is Neh 2^{13}, where it means 'gate,' the same Heb. word (שַׁעַר) being translated 'gate' in the same verse. In Ps 9^{14} Pr. Bk. there is an instance of the same meaning, 'That I maye shewe all thy prayses wyth in the portes of the daughter of Syon.' Knox often uses the word, sometimes adding 'gate' as if the classical 'port' might not be familiar. Thus, *Hist.* p. 408, 'They caused to keep the Ports or Gates and make good Watch about the Towne'; *Works*, iii. 311, 'Let every man put his sworde upon his thygh, and go in and out from porte to porte in the tentes; and let every man kil his brother, his neyghbour, and every man his nigh kynsman'; p. 323, 'They begynne to syncke to the gates of hell and portes of desperation.' Davies quotes Scott's line in *Bonnie Dundee*—

> 'Unheuk the West Port, and let us gae free.'

J. HASTINGS.

PORTER (שׁוֹעֵר, in Ezr 7^{24} Aram. תָּרָע; LXX *πυλωρός* and *θυρωρός*, NT *θυρωρός*) occurs frequently in our English versions, especially in the Bks. of Chronicles and Ezra-Nehemiah. It has always the sense of *gatekeeper* (French *portier*), being a derivative from *porta*, 'a gate.' Owing to the ambiguity of the Eng. word, which also means *the carrier of a burden* (French *porteur*, from *porter*, 'to carry'), it would have been well if 'gatekeeper' had been uniformly adopted as the rendering of the Heb. and Gr. terms. RV has at least 'doorkeepers' in 1 Ch 15^{18} 16^{38} 23^{5} $26^{1.12.19}$, 2 Ch 8^{14}.

For the employment of 'porters' in public or private buildings, as well as at sheepfolds (Jn 10^{3}), see art. GATE in vol. ii. p. 113^{a}; and for the duties and the organization of the Levitical 'porters,' see art. PRIESTS AND LEVITES. J. A. SELBIE.

POSIDONIUS (Ποσιδώνιος).—An envoy sent by Nicanor to Judas Maccabæus (2 Mac 14^{19}, cf. 1 Mac 7^{27-31}).

POSSESS.—The verbs *possidēre* and *possidĕre* are said to be distinguished in Latin, the former meaning to 'have in possession,' 'own,' the latter to 'take possession of,' 'win.' The Eng. verb 'to possess' adopted both meanings. In AV it nearly always means 'to take possession of,' 'win.' This is sometimes evident, as Nu 13^{30} 'Let us go up at once and possess it'; Jos 13^{1} 'There remaineth yet very much land to be possessed.' But sometimes it is not so, as Gn 22^{17} 'Thy seed shall possess the gate of his enemies'; Lk 18^{12} 'I give tithes of all that I possess'; 21^{19} 'In your patience possess ye your souls';* 1 Th 4^{4} 'That every one of you should know how to possess his vessel in sanctification and honour.' Cf. Fuller, *Holy Warre*, 14, 'The Saracens had lately wasted Italy, pillaged and burned many churches near Rome it self, conquered Spain, invaded Aquitain, and possessed some islands in the mid-land-sea'; and Ac 1^{18} Rhem. 'And he in deede hath possessed a field of the reward of iniquitie.'

Sometimes the meaning is to 'enter into possession,' 'inherit,' as Job 7^{3} 'So am I made to possess months of vanity' (כֵּן הָנְחַלְתִּי לִי); Zec 8^{12} 'I will cause the remnant of this people to possess all these things' (וְהִנְחַלְתִּי, RV 'I will cause . . . to inherit').

So 'to be possessed of' a thing is to inherit it, to have it in possession, Jos 22^{9} 'the land of their possession, whereof they were possessed.' Cf. Fuller, *Holy Warre*, 213, 'Charles subdued Manfred and Comadine his nephew . . . and was possessed of Sicilie, and lived there.' The active form is found in Knox, *Hist.* 265, 'Them hee possessed in the Land of Canaan.'

To be possessed with a spirit (of good† or evil) is in Ac 8^{17} 16^{16} simply to be 'held' by the spirit, but elsewhere means to be under the influence of a demon (*δαιμονιζόμενος*). See next article.

J. HASTINGS.

POSSESSION means the control or mastery of the will of an individual by another and superhuman personality. This is a familiar feature in early Jewish psychological beliefs, bound up with the prevalent demonology and angelology of pre-exilian and post-exilian Israel. See art. DEMON in vol. i., and for NT especially, p. 593.

That psychological relations were in primitive times construed in material and spatial forms need not be argued here. It is obvious even from a superficial examination of the language employed. Thus in 1 S 16^{16} the 'evil spirit from God' is said to be *upon* (עַל) Saul, and the same preposition is employed in Is 61^{1} of the spirit with which God inspires the prophet. Cf. the use of the phrase 'the hand of the LORD was upon . . .' The spirit of God passed into (צָלְחָה בְּ) Saul when he prophesied (1 S 10^{10} 18^{10}). On the other hand, in 1 S 16^{14} the evil spirit is said to terrify (בִּעֵת) Saul. In the vision of Micaiah the deceiving spirit proceeds from the presence of Jehovah, and is 'in the mouth' of His prophets (1 K 22^{22}).

The same language, therefore, is employed of Divine inspiration as of possession by an evil spirit. The supernatural agency was considered to pass into the individual and take possession of him, and he became visibly affected thereby. The lips of the prophet were for the time under the control of the Divine supernatural will, which spake by the mouth of the holy prophets (Lk 1^{70}; but the same power might also cause dumbness, cf. vv.$^{20.22}$). While admitting that in some cases we have no more than the inevitable language of metaphor, the cumulative evidence of analogy leads us to refrain from pressing this view unduly. Thus the necromancer was considered to be occupied for the time by the spirit of the dead, and was said to be בַּעַל אוֹב, though language in this case appears to invert the relation (see *Necromancy* under SORCERY). Similarly, the demon or evil spirit was believed to enter or pass out of the human subject or to be driven out. While subject to his influence, the individual was said to be *δαιμονιζόμενος* (in Arab. مجنون *mejnûn*, or possessed by a *Jinn*). Demon-possession was manifested by anything abnormal in personal appearance, especially in the strange look of the eyes. Among the many stories about Jân related by Doughty in his *Arabia Deserta* (vol. ii. p. 188 ff.) the following statement by Amm Mohammed is a good illustration:—

> 'Last year a jinn entered into this woman, my wife, one evening: and we were sitting here, as we sit now; I, and the woman, and Haseyn. I saw it come in her eyes, that were fixed, all in a moment; and she lamented with a labouring in her throat. . . . This poor woman had great white rolling eyes, and little joy in them' (p. 191).

Anything of an unhealthy nature, such as an uncanny expression; any disease, and especially epilepsy or insanity, was ascribed to demon-possession. Epilepsy, in fact, derives its name (*ἐπίληψις, ἐπιληψία*) from having been regarded as due to an assault by demons (cf. Mk 9^{18}). In New Hebrew the epileptic patient is called נִכְפֶּה 'overpowered' (cf. Syr. ܟܦܐ). In the NT the demon was said to 'bind' (*δεῖν*), seize and rend (*καταλαβεῖν* and *ῥήσσειν* in the graphic passage Mk 9^{18}), enter and pass out of (*εἰσέρχεσθαι* and *ἐξέρχεσθαι*) the human subject. The terms predicated of the human subject may be found in art. DEMON, vol. i. p. 593. Animals were likewise affected, Mk 5^{13}.

Among the Jews and other nations of antiquity magical formulæ were employed in which the potent names of supernatural powers were recited. Among the Jews this was chiefly the name of Jehovah varied in all possible forms, while among the Christians the name of Christ was so employed. See article MAGIC and also EXORCISM

---

* The Greek of this familiar passage is ἐν τῇ ὑπομονῇ ὑμῶν κτήσεσθε τὰς ψυχὰς ὑμῶν. There is a various reading κτήσασθε for κτήσεσθε well supported and adopted by Tischendorf. But with either form the meaning is 'gain possession of,' 'win' (RV), not 'hold in possession,' which would demand the perf. tense. The Vulg. gives *possidebitis*, after which Wyc. 'ye schulen welde'; Tind. has 'With youre pacience possesse youre soules,' and he is followed pretty closely by subsequent versions, the meaning probably always being 'win.' But that the modern misunderstanding is not very modern may be shown from Clement Cotton's tr. of Calvin's *Isaiah* 40^{2} (p. 400), 'He is earnest in giving of hope to the godly, wishing them to possesse their soules in patience, until the Prophets were sent unto them with this joyfull and comfortable message.' The Latin is *qua patienter devorent moræ tædium.*

† Cf. Tindale's *Works*, i. 97, 'The Faith only maketh a man safe, good, righteous, and the friend of God . . . and possesseth us with the Spirit of God.'

Other remedies of a material character were also used. It is doubtful whether in Ja 5^{14} there is anything of a magical or semi-magical character, implying a belief in demon-possession. It should be noticed, however, that in this case the 'name' was invoked, just as in exorcisms.

OWEN C. WHITEHOUSE.

POST.—i. *Door or gate-post.*—**1.** אַיִל, rendered 'lintel' in 1 K 6^{31} (RVm 'posts'), where, probably, the stone case of the door is intended; as also in Ezk 40 and 41, where RV prefers 'jambs' to AV 'posts.' It is derived from איל as indicating what *projects* in front of or around the door. **2.** אַמָּה (possibly from אֵם in a metaphorical sense), once rendered by AV 'posts' (Is 6^{4}); RV substitutes 'foundations.' **3.** מְזוּזָה, from an unused root זוז 'to move oneself about,' applied to the post on which the hinges turn. In later times the name was transferred to the small cylinder attached to the doorpost, containing a strip of parchment on which are written these two passages, viz. Dt 6^{4-9} and 11^{13-21}. Every pious person on passing out or in touches this reverently, and then kisses his finger. **4.** סַף, from root סָפַף 'to spread out,' rendered 'post' three times in AV (2 Ch 3^{7}, Ezk 41^{16}, Am 9^{1}). In each case RV rightly substitutes 'threshold.'

On the doorposts the blood of the lamb was sprinkled (Ex 12^{7} etc.); and here the words of the law were to be written (Dt 6^{9} etc., see No. **3**, above). Moslems copy the Jews in writing verses from the Koran on their doorposts. The German Temple Christians in Palestine have engraved a text of Scripture over every doorway in their colonies. A servant who wished not to avail himself of the law of freedom was brought by his master 'unto God,' 'unto the doorpost,' and had his ear pierced with an awl (Ex 21^{6}). A special sanctity seems in the East always to gather round the doorway (see art. THRESHOLD). To this it may be due that while the woodwork of the temple was of Lebanon cedar, the doorposts were made of native-grown olive (1 K 6^{33}).

ii. *Carrier of letters or despatches.*—רָץ, pl. רָצִים ('runners'), once (2 K 11^{13}) רָצִין, from רוץ 'to run.' The 'runners' formed the royal guard (1 S 22^{17}, see art. GUARD), kept the king's house, and were available for other service (1 K $14^{27ff.}$, 2 K 10^{25} $11^{4ff.}$). From them were chosen the couriers, who conveyed royal mandates throughout the kingdom (2 Ch 30^{6}, Est $3^{13.15}$). Those of the Persian monarch were mounted on 'swift steeds' (Est $8^{10.14}$ RV*). The swiftness characteristic of this service gives point to the saying of Job 9^{25} 'My days are swifter than a post.'

W. EWING.

POT.—See FOOD in vol. ii. p. 40, *s.* 'Vessels.'

POTIPHAR (פּוֹטִיפַר; LXX in Gn 37^{36} A Πετρεφῆς, E Luc. Πετεφρῆς, in 39^{1} ADE Luc. Πετεφρῆς;† Vulg. *Putiphar*).

The name is generally regarded (*e.g.* by Ebers, in Smith, *DB*² I. ii. 1794ᵃ) as a Heb. abbreviation of **Potiphera** פּוֹטִי פֶרַע, in which case it would be Egyp. *P'-dy-p'-R'*, and mean 'He whom the Ra (or the Sun-god) gave'; see Sethe, *De aleph prosthetico in lingua æg. verbi formis præposito*, 1892, p. 31 (a reference, for which the writer is indebted to Mr. F. Ll. Griffith), who quotes as parallel formations *P'-dy-'Imn* 'He whom Ammon gave,' *P'-dy-'st* 'He whom Isis gave.' Sethe also observes that in Greek transcriptions the first two syllables are commonly represented by Πετε-, as in Πετεφρῆς itself, Πετεῆσις, Πετεαστάρτη, Πετεχῶνσις, Πετόσιρις, etc., and refers, for a long list of such names, from papyri and other sources, to Parthey, *Æg. Personennamen*, 1864, p. 79 ff. Lieblein's proposal (*PSBA*, 1898, p. 208 f.) to identify 'Potiphar' with the isolated and uncertain *Pt-ber* (p. 24 n.*), does not make the etymology any clearer.

The name of the 'officer' (סָרִים, lit. *eunuch*) of Pharaoh, and 'captain of the body-guard' (שַׂר הַטַּבָּחִים; see vol. ii. p. 768^{a} n. ‡), to whom Joseph was sold by the Midianites (Gn 37^{36}), and who appointed Joseph to wait upon the prisoners confined in the state-prison (*ib.* p. 768 n. ‖), which was in his house ($40^{1ff.}$); in the existing text of Gn, also, the Egyptian who made Joseph superintendent of his household, and whose wife made the advances to Joseph which the latter rejected ($39^{1ff.}$).

It is doubtful whether these two personages are not in reality distinct. Gn 37^{36} $40^{1ff.}$ belong to E, and $39^{1ff.}$ to J; and there are strong reasons (cf. *ib.* pp. 767^{b}, 768 n. §) for supposing, as is done by nearly all modern critics, that the words 'Potiphar, an officer (eunuch) of Pharaoh's, the captain of the guard' in 39^{1}, are an addition made by the redactor, who identified Joseph's 'master,' mentioned in ch. 39, with Potiphar, the 'captain of the body-guard,' of 37^{36} $40^{3ff.}$; if this view be correct, the original narrative of ch. 39 (J) knew nothing of 'Potiphar,' but simply mentioned 'an' (unnamed) 'Egyptian,' to whom the Ishmaelites sold Joseph. It may be noticed that, in the existing narrative, the description, 'an Egyptian,' attached in 39^{1} to 'Potiphar, an eunuch of Pharaoh's,' etc., seems a rather pointless addition, whereas, standing alone, it would have an adequate *raison d'être*.

The 'captain of the guard' was not a specially Egyptian office; the same title (with only רַב for שַׂר) being used also of a chief officer of Nebuchadnezzar (2 K 25^{8} *al.*; see above, ii. 768^{a} n. ‡). The number of court- and state-officials mentioned in Egyp. inscriptions is very great (Ebers, *Æg. u. die Bb. Mose's*, p. 300; and esp. Brugsch, *Die Ægyptologie*, 1889, pp. 213 f., 222–227, 243 f., 299–301); but the office attributed to Potiphar does not appear to have been definitely identified: perhaps it was that of 'the general and eldest of the court' of the Hood-papyrus, an important official, whom Brugsch (p. 213) and Maspero (*Journ. As.* 1888 (xi.), p. 273) identify with the ἀρχισωματοφύλαξ, often mentioned in the Ptolemaic period; see Grenfell, *Greek Pap.* 1896, 38. 1, 42. 1; M. L. Strack, *Die dyn. der Ptol.* 1897, p. 219 ff., Inscr. Nos. 77 (=*CIG* 4677), 95, 97 (*CIG* 2617), 108 (*CIG* 4893), 109, 111, 171; Jos. *Ant.* XII. ii. 4 (cf. 2).* Eunuchs were apparently not as common in ancient Egypt as in other countries, though they seem to be represented on the monuments (Ebers, *l.c.* p. 298); it is, however, possible that *ṣārīṣ* is used in the more general sense of *officer*,—neither the 'captain of the body-guard,' nor the chief butler or baker (to both of whom the same term is applied in $40^{2.7}$), holding a kind of office which would be very naturally deputed to a eunuch (though cf. Jos. *Ant.* XVI. viii. 17,—cupbearers at Herod's court): Ges., however (*Thes.* p. 973), doubts this general application of the term; and LXX, at any rate, have σπάδων in 37^{36} and εὐνοῦχος in 39^{1}. If the name Potiphar did not occur in the original text of ch. 39, the question of his marriage does not arise; it may be mentioned, however, that (assuming the word *ṣārīṣ* to have its proper force) cases are on record, in both ancient and modern times, of eunuchs being married (Burckhardt, *Arabia*, i. 290; Ebers, p. 299).

On the narrative of ch. 39 enough has been said above, vol. ii. pp. 768^{a}, 772. It is remarkable that names of the form 'Potiphera,' 'Potiphar' (if this be rightly regarded as really the same name), appear first in the 22nd dyn. (the dyn. of Shishak),* and are frequent only in the 26th dyn. (B.C. 664–525); it is thus at least doubtful how far either one or the other really springs from the age of Joseph (see, further, vol. i. 665^b, ii. 775^a).

---

* The rendering '*swift* steeds' is probable, but not certain רֶכֶשׁ (a rare synonym of סוּס) denotes a species of horse possessed of some valuable quality, which may likely enough have been *swiftness*.

† The form Πεντεφρῆς is also found, as in ed. Ald., and a 15th cent. MS *ap.* Lagarde, *Gen. Graece* [cf. p. 20]; Philo, i. 134, 604 (Mang.); Cramer, *Anecd. Par.* ii. 174. 25 (Parthey, p. 78). But it is certainly false (Griffith).

* Of course שר המבחים means properly 'chief (or superintendent) of the slaughterers (*or* cooks [1 S 9^{23}])'; and, in spite of 2 K 25^{8} etc., it *might* in Genesis have this meaning (cf. LXX ἀρχιμάγειρος): in this case, the expression might (as Mr. Griffith suggests) denote the 'royal cook,' an official who acquired at Thebes in the New Empire many important administrative functions—leading expeditions to the quarries, investigating tomb-robberies, etc. (see Erman, *Ægypten*, Index, *s.v.* 'Truchsess'; and comp. above, vol. ii. p. 774, the note on *Āb*).

S. R. DRIVER.

POTIPHERA (פּוֹטִי פֶרַע; LXX A Πετρεφῆς, E Luc. Πετεφρῆς;† Vulg. *Putiphare*; on the etym. see under POTIPHAR).—The priest—*i.e.*, no doubt, the chief priest—of ON (which see),—*i.e.* of the famous and ancient temple of the Sun, at On,—whose daughter Asenath was given by Pharaoh to Joseph for a wife (Gn $41^{45.\,50}$ 46^{20}). S. R. DRIVER.

POTSHERD.—This is the translation in Job 2^8, Ps 22^{15}, Pr 26^{23}, and Is $45^{9\ bis}$ of חֶרֶשׂ *ḥeres*, which is rendered 'sherd' in Is 30^{14}, Ezk 23^{34}, but elsewhere (usually with כְּלִי) 'earthen vessel.' Potsherd occurs also in Sir 22^7 as tr. of ὄστρακον, which is the LXX word for *ḥeres* in Job 2^8, Ps 22^{15}, Pr 26^{23}, Is 30^{14}. The Eng. word, which is a sherd (shred) or fragment of pottery, is illustrated by Skelton's (Skeat's *Specimens*, 143)—

> 'But this madde Amalecke,
> Lyke to a Mamelek,
> He regardeth lordes
> No more than potshordes'—

and Spenser, *FQ* VI. i. 37—

> 'They hew'd their helmes, and plates asunder brake,
> As they had potshares bene.'

In translating, the distinction has to be made between 'earthen vessel' and 'fragment of earthen vessel.' The latter is the meaning, according to *Oxf. Heb. Lex.*, in Job 2^8 41^{22}, Is 30^{14}, Ezk 23^{34}. RV makes two changes. Job 41^{30} AV 'sharp stones are under him' is changed into 'his underparts are like sharp potsherds'; Pr 26^{23} 'a potsherd' becomes 'an earthen vessel.' J. HASTINGS.

POTTAGE (נָזִיד *nāzîd*, LXX ἕψημα, Vulg. *pulmentum*).—A kind of thick broth made by boiling lentils or other vegetables with meat or suet, usually in water, but sometimes in milk. Robinson says that lentil pottage made in this manner is very palatable, and that he 'could very well conceive, to a weary hunter, faint with hunger, they (lentils) might be quite a dainty' (i. 167). Thomson speaks of its appetizing fragrance, which it diffuses far and wide; and he gives an account of a meal in which this pottage was eaten out of a saucepan placed on the ground in the middle of the company, a cake of bread, doubled spoon-fashion, being dipped in the pot to carry the pottage to the mouth. 'European children born in Palestine are extravagantly fond of it' (*L. and B.* i. 252). The pottage prepared by Jacob was of the red lentil (see FOOD, vol. ii. 27), hence Esau's emphatic 'the red, this red' (Gn 25^{30}). For a mess of this, called in He 12^{16} βρῶσις μία ('a mess of meat'), Esau sold his birthright. Labat in his account of the visit of the Chevalier d'Arvieux to Hebron in 1660 says that at the entrance to St. Helena's Church, now a mosque, there is a great kitchen where pottage is daily prepared of lentils and other vegetables in commemoration of this event, which is supposed to have taken place here (?), and is freely distributed to all comers; 'We have partaken of it' (ii. p. 237). This practice does not seem to be kept up at the present day.

Pottage was known in Egypt at an early period, and was called *āshā* (Copt. ΟΟΥϢ). Wilkinson has copied a tomb-painting representing a man cooking this food (ii. 34, fig. 301, 9). In Palestine a variety of vegetables entered into its composition, as in Scotch broth. Apparently the globe cucumber (*Cucumis prophetarum*), a common plant about Samaria, was sometimes used to thicken it; and we are told in 2 K 4^{39} that one of the 'sons of the prophets' mistook פַּקֻּעֹת שָׂדֶה, probably the violently purgative *Citrullus colocynthis*, for this plant. The colocynth is common in the Shephēlah and about the shores of the lower Jordan Valley, but not in the middle higher lands (see FOOD, vol. ii. p. 28).

The prophet Haggai names pottage with bread, wine, and oil as the common articles of diet which a priest, bearing holy flesh, would be likely to touch inadvertently with the skirt of his garment (2^{12}). *Nāzîd*, being chiefly made of vegetables, differs from *pārāḳ* (only in const. *pĕraḳ*, Is 65^4 *Kethibh*), which seems to have been a kind of minced collops made of meat disjointed, or finely cut up and boiled in water (cf. 'mortrewes and potages' below). *Ḳerê* has *mĕraḳ*, as in Jg $6^{19.\,20}$, a name which is also applied to the same dish. Some suppose these to be soup poured over broken bread.

The word 'pottage' was originally the same as the French *potage* and spelled like it, as in Chaucer's *Prologue to the Pardoners Tale*, 82, and Piers Plowman, who writes 'potage and payn (bread) ynough' (Text B. xv. 310), 'mortrewes (pounded meat) and potages' (*ib.* xiii. 41). In the *Boke of Curtasye*, whose date is uncertain, probably about 1460, potage is the first course at dinner (iii. 765), and is to be eaten without 'grete sowndynge' (i. 69). In the 1557 ed. of Seager's *Schoole of Vertue* (iv. 444), it appears with two t's, and it is spelled as we now have it in all editions of the English Bible from 1560 to the present. In Russell's *Boke of Nurture*, dating from about 1460, there is a section on different kinds of potages. A. MACALISTER.

POTTER, POTTERY.—The art of the potter (Heb. יוֹצֵר or יֹצֵר, ptcp. of יָצַר 'to form *or* fashion'; Gr. κεραμεύς) can be traced back to a very early date in Egypt, and within recent years there have been considerable 'finds' in Palestine of specimens of pottery, some of which are much older than the date of the Israelite conquest. Upon the ground especially of the discoveries at *Tell el-Ḥesy* (? Lachish), Flinders Petrie has sought to construct a complete history of the pottery of Palestine, which he divides into three periods (see the following article, and compare Petrie and Conder in *PEFSt*, 1891, p. 68 ff.; also Nowack, *Lehrb. der Heb. Arch.* i. 265 ff.; Benzinger, *Heb. Arch.* 261 ff.). The products of the potter's industry would naturally be little used by the Israelites during the nomadic period of their existence, when vessels of skin or of wood must have been found more serviceable than those of earth (Nowack, *l.c.* p. 242; Benzinger, *l.c.* p. 214). Even after they entered Canaan, the Israelites appear to have been slow to adopt the vessels of the potter; a skin is still used for holding milk (Jg 4^{19}), wine (1 S 16^{20}), or water (Gn $21^{14f.}$); the Heb. in the first two of these passages is נֹאד, in the third חֵמֶת, the Gr. in all three is ἀσκός. The earliest mention of pottery in the OT is in 2 S 17^{28}, where, amongst the articles brought to David during his flight from Absalom, were ‘earthen vessels’ (כְּלֵי יוֹצֵר; B *σκεύη ὀστράκινα*, A om.).

---

* For the name 'Petu-baal' cited above, vol. ii. 774^a n. ¶, is very doubtful, Mr. Griffith informs the writer, in both meaning and date. It is properly *Pt-ber* (Lieblein, *Dict. des Noms Hiérogl.* No. 553); and 'though *ber* is the correct spelling for Baal, there is no determinative to show that it was intended for that. *Pt*, also, is not the same as *P'·dy* (in *P'·dy·'Imn*, etc., above); and it is difficult to find a meaning for it. The name is at present known only to occur once; and it may be wrongly copied, or may not be a compound at all. The period to which it belongs is also quite uncertain: it may be that of the Hyksos; but it may also be earlier, or much later.'

† Also Πεντεφρῆς, ed. Ald., and the MS cited p. 23 n. †; Euseb. *Præp. Ev.* ix. 21. 9; Cramer, *Anecd. Par.* ii. 175. 14; Fabric. *Cod. Pseudepigr.* ii. 86 (Parthey, p. 78).

Both in the OT and in the Apocrypha there are allusions to the various processes carried on by the potter. He treads the clay (חֹמֶר) with his feet (Is 41^{25}, Wis 15^{7}), kneads it like dough and places it upon the wheel, or rather wheels (אָבְנָיִם Jer 18^{3}; LXX *ἐπὶ τῶν λίθων*, implying a reading הָאֲבָנִים). The *’obnayim* (a dual form used elsewhere only in Ex 1^{16} of the ‘birth-stool’) consisted, as the name implies, of *two* discs of wood, connected by a wooden pivot, and arranged the one above the other, the under wheel being the larger of the two. The wheels, which were capable of being revolved in opposite directions, were set in motion by the foot of the potter, who sat at his work. All these points, as well as the processes of firing and glazing, are referred to in Sir $38^{29\text{ff.}}$ (cf. the illustrations in Wilkinson, *Anc. Egyp.* 1837, iii. 164). The first of these processes, the firing, perhaps explains Ps 22^{15} ‘My palate [reading חִכִּי for כֹּחִי ‘my strength’] is dried up like a potsherd’ (חֶרֶשׂ, *ὄστρακον*). The glazing process, in which the oxide of lead obtained in the course of refining silver was chiefly employed, gives point to the saying of Pr 26^{23} ‘Fervent [or perhaps ‘smooth,’ see Toy, *ad loc.*] lips and a wicked heart are like an earthen vessel overlaid with silver dross’ (כֶּסֶף סִיגִים מְצֻפֶּה עַל־חָרֶשׂ; LXX *ἀργύριον διδόμενον μετὰ δόλου ὥσπερ ὄστρακον ἡγητέον*).

Under the later kings the industry of the potter was so familiar as to furnish the prophets with figures in addressing their hearers. The classic instance of this is Jer 18, where the prophet describes how he paid a visit to the house of the potter,* and found him fashioning a work on the wheels. ‘And when the vessel that he made of the clay was marred in the hand of the potter, he made it again another vessel, as seemed good to the potter to make it’ (v.^{4}). The lesson drawn is, ‘Cannot I do with you as this potter? saith the LORD. Behold, as the clay in the potter’s hand, so are ye in mine hand, O house of Israel’ (cf. Is 29^{16} 45^{9} 64^{8}, Wis $15^{7\text{ff.}}$, and the famous argument of St. Paul in Ro $9^{20\text{ff.}}$, a passage which will be fully discussed in art. PREDESTINATION, along with which it will be well to refer to Sanday-Headlam’s ‘Romans’ in *Internat. Crit. Comm. ad loc.*). Again, in Jer $19^{1\text{ff.}}$ a potter’s earthen bottle (בַּקְבֻּק יוֹצֵר חֶרֶשׂ, LXX *βικὸς πεπλασμένος ὀστράκινος*) is purchased by the prophet, and afterwards broken in typical allusion to the approaching irretrievable ruin of the nation (cf. Ps 2^{9}=Rev 2^{27}, Is 30^{14}).

A guild of potters is mentioned by the Chronicler (1 Ch 4^{23}). In P the ‘earthen vessel’ (כְּלִי חֶרֶשׂ) is repeatedly mentioned: Lv 6^{28} [Heb. ^{21}] as used for boiling the flesh of the sin-offering; 11^{33} as defiled by contact with unclean animals; $14^{5.\,50}$ one of the two birds offered on behalf of the cleansed leper or leprous house is to be killed ‘in an earthen vessel over running water’ [*i.e.* so as to let the blood drop into the vessel and mingle with the water contained in it]; 15^{12} as defiled by an issue; Nu 5^{17} as used to contain the water in the jealousy ordeal. In all these instances the LXX has *σκεῦος ὀστράκινον* except in Lv 14^{5} and Nu 5^{17}, in both of which it has *ἄγγιον ὀστράκινον*. In Jer 32^{14} we read of a legal document (the deed of purchase of Hanamel’s field) being kept in an earthen vessel.

The figure of the potter at work is more or less consciously present in a number of instances where the verb יצר is employed to describe the Divine activity in creating or fashioning men or other objects: Jahweh forms man of dust from the ground, Gn 2^{7}; beasts and birds from the ground, v.^{19}; Israel as a people, Is 27^{11} $43^{1.\,21}$ 44^{21} $45^{9\,\mathit{bis},\,11}$ 49^{5} (even from the womb) 64^{7}; the individual Israelite, Is 43^{7}; Jeremiah in the womb, Jer 1^{5}; the eye of man, Ps 94^{9}; the locust, Am 7^{1}; Leviathan, Ps 104^{26}; the dry land, Ps 95^{5}; the earth, Is $45^{18\,\mathit{bis}}$; the mountains, Am 4^{13}; the universe (הַכֹּל), Jer 10^{16}=51^{19}. The figure appears to be lost sight of, and יצר simply=‘form,’ in such instances as Is 45^{7} the forming of light, Ps 74^{17} summer and winter, Zec 12^{1} the spirit of man, Ps 33^{15} the hearts of men. יצר is also used figuratively of fashioning, *i.e.* foreordaining, an event or situation, Is 22^{11} 37^{26} (=2 K 19^{25}) 46^{11}, Jer 33^{2}, cf. Ps 139^{6}.

The potter’s clay and the vessels fashioned from it are emblems in Scripture of what is feeble or of little value. In Dn 2^{41} the feet of the image seen in vision by Nebuchadnezzar are described as part of iron and part of potter’s clay (Aram. חֲסַף דִּי־פֶחָר; Theod. B simply *ὀστράκινον*, A$^{a?\,(\text{mg})}$ *ὀστράκινον κεραμίου*; LXX *ὀστράκου κεραμικοῦ*), which leads to the interpretation, ‘the kingdom shall be partly strong and partly broken’ (RVm ‘brittle,’ Aram. תְּבִירָה, Theod. *συντριβόμενον*, LXX *συντετριμμένον*). In La 4^{2} we have the forcible contrast: ‘The precious sons of Zion, comparable to fine gold, how are they esteemed as earthen pitchers, the work of the hands of the potter’ (לְנִבְלֵי־חֶרֶשׂ מַעֲשֵׂה יְדֵי יוֹצֵר, LXX *εἰς ἄγγια ὀστράκινα, ἔργα χειρῶν κεραμέως*). Again, in 2 Co 4^{7} St. Paul declares, ‘We have this treasure [*sc.* the ministry entrusted to him] in earthen vessels’ (*ἐν ὀστρακίνοις σκεύεσιν*), perhaps in allusion especially to the weak bodily frame of the apostle. ‘In a great house there are not only vessels of gold and of silver, but also of wood and of earth,’ 2 Ti 2^{20} (*σκεύη ὀστράκινα*); cf. also Is 29^{16} 45^{9}.

Zec 11^{13} is a difficult passage, especially when considered in connexion with Mt $27^{9\text{f.}}$. The Massoretic text is thus rendered in RV: ‘The LORD said unto me, Cast it unto the potter, the goodly price that I was prised (*sic*) at of them. And I took the thirty pieces of silver and cast them unto the potter in the house of the LORD.’ Instead of אֶל־הַיּוֹצֵר ‘unto the potter,’ Gesenius (*Thes.*) follows the Syr. in reading אֶל־הָאוֹצָר ‘into the treasury.’ This is adopted also by G. A. Smith, Wellhausen, Nowack, and others. The LXX has *εἰς τὸ χωνευτήριον*, ‘into the smelting furnace.’ The words אוצר and יוצר might all the more readily be confused owing to the tendency of א to pass into י between two vowels. It is not improbable, however, that the Massoretes purposely obscured the reading אוצר from a feeling that the paltry wage which was unworthy of the prophet’s acceptance could not fittingly be cast into the treasury of God. In like manner the chief priests in Mt 27^{6} say of the thirty pieces of silver returned by Judas, ‘It is not lawful to put them into the treasury, since it is the price of blood.’ Accordingly, they took counsel and bought with them the potter’s field to bury strangers in. In this Mt characteristically discovers a fulfilment of prophecy, and it is manifestly the prophecy of Zec 11^{13} that is in view, although it is attributed to Jeremiah, and quoted in a form that agrees neither with the MT, of which we have just quoted the translation, nor with the LXX. The substitution of *Jeremiah* for Zechariah is no doubt simply due to a *lapsus memoriæ*, which might occur all the more readily in view of the allusions to the *potter* in Jer 18 and 19, and the narrative of the purchase of a *field* from Hanamel in $32^{6\text{ff.}}$. The following are the readings of the LXX (B) of Zec 11^{13} and of the professed quotation in Mt $27^{9\text{f.}}$ (according to WH’s text)—

Zec 11^{13}.	Mt $27^{9\text{f.}}$
Καὶ εἶπεν Κύριος πρὸς μὲ, Κάθες αὐτοὺς εἰς τὸ χωνευτήριον, καὶ σκέψομαι (A	Καὶ ἔλαβον τὰ τριάκοντα ἀργύρια, τὴν τιμὴν τοῦ τετιμημένου ὃν ἐτιμήσαντο ἀπὸ

---

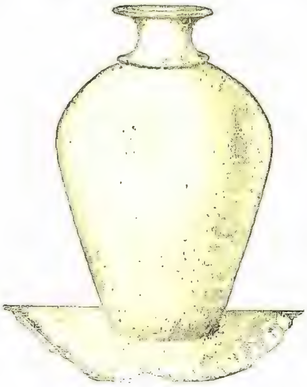
* Situated probably near the gate Harsith (Jer 19^{2} RV), or ‘gate of the potsherds’ (?), a name perhaps derived from the quantity of potsherds thrown out there. See HARSITH.

Zec 11^{13}.	Mt 27$^{9f.}$.
σκέψαι αὐτό) εἰ δόκιμόν ἐστιν, ὃν τρόπον ἐδοκιμάσθη (B$^{*\text{fort}}$ AℵQ *ἐδοκιμάσθην*) *ὑπὲρ αὐτῶν. καὶ ἔλαβον τοὺς τριάκοντα ἀργύρους καὶ ἐνέβαλον αὐτοὺς εἰς τὸν* (A om. *τόν*) *οἶκον* Κυρίου *εἰς τὸ χωνευτήριον.*	*υἱῶν* Ἰσραήλ, *καὶ ἔδωκαν* (A$^{*\text{vid}}$ *ἔδωκεν*, ℵ *ἔδωκα*) *αὐτὰ εἰς τὸν ἀγρὸν τοῦ κεραμέως καθὰ συνέταξέν μοι* Κύριος.

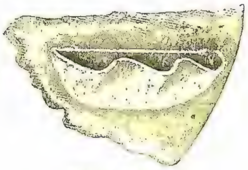
RV in Mt 'And they (marg. 'I') took the thirty pieces of silver, the price of him that was priced, whom (certain) of the children of Israel did price (marg. 'whom they priced on the part of the sons of Israel'), and they (marg. 'I') gave them for the potter's field, as the Lord appointed me.' The reading 'potter' is thus retained (although there appears to be in the context a consciousness also of the reading 'treasury'), the language is accommodated to cover the purchase by the priests of the potter's field, and the passage has manifestly a Messianic character imposed upon it (see, further, Wellhausen, *Die kleinen Propheten, ad loc.*, and arts. AKELDAMA, and QUOTATIONS E *d* and J *a*). J. A. SELBIE.

POTTERY.—Materials for the study of the pottery of Southern Palestine from 1700 to 300 B.C. were furnished by the systematic excavation of the mound Tell el-Ḥesy by Petrie and Bliss, 1890–93 (see art. LACHISH). At this site was found a series of superimposed mud-brick towns, eight in number, each distinguished by its own types of pottery. The already-dated foreign types (Greek and Phœnician) furnished a scale for approximately dating the local ware with which they were associated, or which they overlaid. The results obtained at Tell el-Ḥesy have since been confirmed and amplified by extensive excavations at three other mounds, Tell Zakarîya, Tell eṣ-Ṣafi, and Tell ej-Judeideh, as well as at Jerusalem. Briefly, these results are as follows. The pre-Seleucidan pottery may be divided into three groups—(1) earlier pre-Israelite; (2) later pre-Israelite; (3) Jewish.

(1) *The earlier pre-Israelite* ware has been found, unmixed with other styles, on the rock or virgin soil at three sites. The types include—(*a*) large bowls with very thick brims, the interior being faced with red or yellow and burnished with lines sometimes crossing; (*b*) large jars with flat disc bottom, invecked necks, and ornamented with a cable-moulding; (*c*) jars with surfaces scraped over with a comb and having ledge-handles of a wavy shape. These handles are typical of certain Egyptian pottery, regarded by Petrie as prehistoric; he suggests a Lybian origin. All these characteristics come down to later times, especially the patterned burnishing, which is found in a debased form in Jewish jars.

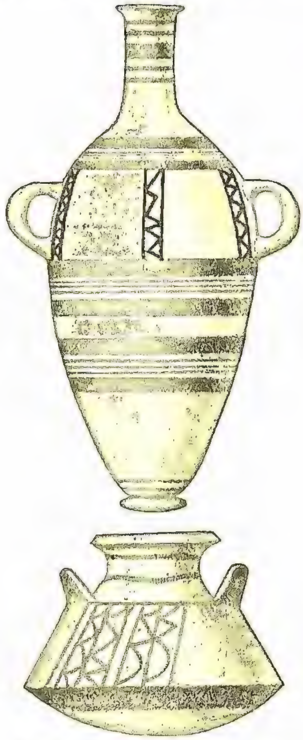


EARLY PRE-ISRAELITE JAR.

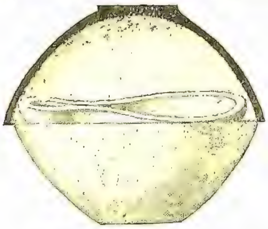


LEDGE-HANDLE.
(Early Pre-Israelite.)

(2) *The later pre-Israelite* ware comes down to Jewish times, and is found in connexion with known 'Phœnician' types, ranging from about 1400 to 1000 B.C., and with Mycenæan ware of the same period. The most characteristic native forms are—(*a*) the open lamps and bowls, both with rounded bottom, often found purposely buried in groups; (*b*) ware with painted ornament, consisting chiefly of birds, zigzags, and spirals; (*c*) small flasks with pointed bottoms; (*d*) stands for holding these; (*e*) female figurines (*teraphim*).



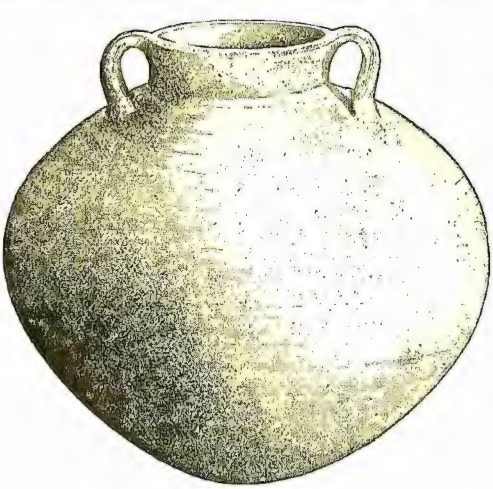
LATER PRE-ISRAELITE PAINTED WARE.



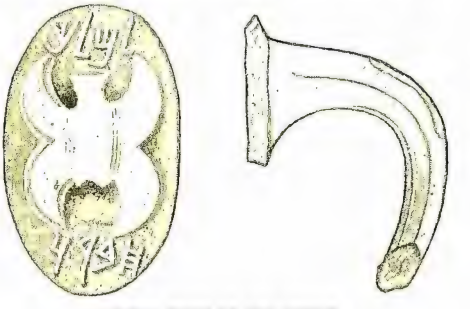
BOWLS (BURIED) WITH LAMP.

(3) The ware we call *Jewish* appears to be characteristic of the later Jewish monarchy, when the

local pre-Israelite and the Phœnician types had blended and had become debased. The commonest types are—(*a*) cooking pots (blackened with smoke), with large wide mouths and small handles; (*b*) open lamps, with thick disc bases; (*c*) tiny rude black jugs; (*d*) flasks with long neck and stand, out of all proportion to the small body; (*e*) large jars with ribbed handles, stamped. The stamps are of three classes: stars of various forms; ellipse containing name of the owner or maker in old Hebrew letters; royal stamps. The latter show a creature in two varieties, one with two expanded wings, the other with four. The second type is clearly a *scarabæus*. Above the symbol is invariably the legend למלך; below, the name of a town, as שוכה. As this ware appears to date from the time of the Jewish monarchy, the reading 'Belonging to the king of Shocoh' is untenable. Accordingly we should rather read: 'To the king: (dedicated by) Shocoh.' Thus far three names of known towns have been recovered, Shocoh, Hebron, and Ziph, as well as the name ממשת, which is not mentioned in the Bible. As to the exact meaning of the stamp, several hypotheses have been brought forward. From the discovery of these stamped handles at Jerusalem it has been argued that they belonged to jars containing oil, wine, or other tribute sent to the capital by the towns mentioned. The wide geographical distribution (such as the finding of the stamp with Shocoh at five different sites) suggests that the place-names were those of royal potteries, situated at Hebron, Ziph, Shocoh, etc.



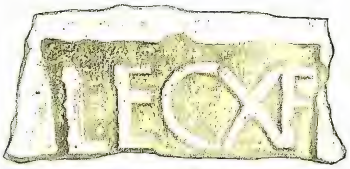
JEWISH COOKING POT.



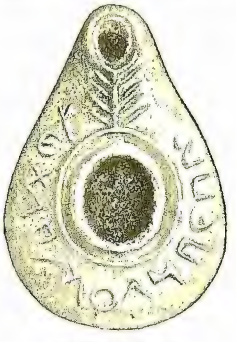
ROYAL STAMP ON JAR HANDLE.

Associated with the above-mentioned Jewish types we find Greek pottery, chiefly ribbed bowls, and large amphoræ with loop handles. The red and black figured ware was also imported.

The *post-Seleucidan* pottery of Palestine has not been as carefully studied as the earlier types. The Seleucidan forms are similar to those found at Alexandria. Rhodian jar-handles stamped with Greek names are common. Roman sites contain the well-known ribbed amphoræ, and tiles with the stamp of the tenth legion: LEG(IO) X. FRE(TENSIS), are common about Jerusalem. In Christian graves are found many closed lamps, stamped with elaborate patterns, sometimes showing crosses or a Greek inscription, as ΛΥΧΝΑΡΙΑ ΚΑΛΑ.



STAMP OF THE 10TH LEGION.



CHRISTIAN LAMP.

The same general type extended to Arab times. Finally, we have the Arab glazed ware, found in Crusading sites, such as Blanche Garde at Tell eṣ-Ṣafi.

LITERATURE.—Petrie, *Tell el-Hesy*; Bliss, *Mound of Many Cities*; Reports on the Excavations at Tell Zakariya, Tell es-Safi, and Tell ej-Judeideh, *PEFSt*, 1899–1900; also the forthcoming volume on these Excavations.

F. J. BLISS.

NOTE.—The above illustrations are reproduced with the kind permission of the Palestine Exploration Fund Committee.

POTTER'S FIELD. — See AKELDAMA and POTTER.

POUND. — See MONEY, vol. iii. p. 428^a, and WEIGHTS AND MEASURES.

POVERTY. — A. IN OLD TESTAMENT. — The paucity of abstract terms in Hebrew is illustrated by the fact that the words translated 'poverty' in EV occur chiefly in the Book of Proverbs, and other post-exilic works. These are (*a*) from חסר, 'to lack':—חֶסֶר, מַחְסוֹר (cf. הֹסֶר, חֶסְרוֹן), ἔνδεια, ὑστέρημα, etc., *egestas*, etc.; (*b*) from רוש:—רֵאשׁ, רִישׁ, רֵישׁ, πενία, *egestas*, etc. The poor are frequently mentioned, the following terms being so translated: (*c*) מַחְסוֹר [cf. (*a*)]; (*d*) רָשׁ, ptcp. of רוש [cf. (*b*)], πένης, πτωχός, etc., *pauper*, etc.; (*e*) from ענה 'be bowed down':—עֲנֵה (Aram.), עָנִי 'afflicted,' 'poor,' עָנָו 'humble,' 'lowly' (see art. POOR), πένης, πτωχός, πραΰς, ταπεινός, etc., *pauper*, etc.; (*f*) from אבה 'crave':—אֶבְיוֹן 'needy,' πένης, πτωχός, etc., *pauper*, etc.; (*g*) from דלל 'hang down':—דַּל 'weak, depressed,' in Gn 41^{19} of *lean* cows, πένης, πτωχός, ταπεινός, etc., *pauper*, etc.; (*h*) מִסְכֵּן (Aram.) only in

Ecclesiastes, ‘poor,’ *πένης*, *pauper*; (*i*) the obscure and doubtful חֵלְכָה, חֵלְכָּאִים, in Ps $10^{8.10.14}$, perhaps ‘hapless,’ *πένης*, *πτωχός*, *pauper*.

The *causes of poverty*, apart from sloth, thoughtlessness, and extravagance, were specially—(i.) Failure of crops and loss of cattle through bad seasons; thus the Shunammite left her homestead, by Elisha's advice, to avoid a famine (2 K 8^{1-7}, cf. Neh 5^{3}). At such times the townsfolk would suffer from the high price of food, and the falling off of trade through the destitution of the farmers. (ii.) Raids and invasions. (iii.) Loss of property through the violence of the nobles, supported by corrupted law courts, *e.g.* Naboth's vineyard (1 K 21) and the appropriation of the Shunammite's land during her absence. (iv.) Ruinous taxation and forced labour (*corvée*) (Neh $5^{4.5}$). (v.) Extortionate usury, which took advantage of the distress caused by bad seasons and heavy taxes to lend at high interest on the security of land. In many instances the debtors could not pay, and forfeited land and liberty to their creditors (Neh 5^{1-5}).

In considering the *character and extent of poverty*, stress must be laid on the influence of polygamy and slavery. The almost universal habit of early marriage which seems to have existed amongst freemen, together with concubinage and polygamy, checked the growth of that destitution amongst unmarried women which is the most painful feature of modern poverty. Indeed, if the principles of family and clan life had been loyally carried out, a free Israelite could want only when the whole family or clan were destitute. But actual practice mostly fell far short of this ideal.

Again, with us, the last resort of the poor is either the workhouse, or crime, or slow starvation; in ancient Israel, the destitute became slaves. Indeed, the class corresponding to the great bulk of our poorer workers for wages, both domestic and industrial, was the slave-class. Hence the article SLAVE deals with the condition of the greater portion of the poor. There were, however, slaves whose position was much more honourable and comfortable than that of English labourers, and there were poor who were not slaves. The existence of slavery added to the resources of the poor man by enlarging his credit: he and his family could offer their persons as security for loans.

Again, the mere lack of means, if it did not amount to absolute destitution, was far less distressing than with us, because so little was needed in the way of house, furniture, clothes, firing, or even food.

The classes of the poor most often mentioned are widows and orphans, and the *gērīm*, or resident aliens. The former suffered because the family ties were not as real as they were supposed to be, the latter because they had no actual family ties, and the bond of hospitality was soon strained to breaking point (Lv 19^{10}, Dt 14^{29}, Ps 94^{6}, Jer 22^{3}, Zec 7^{10}, Mal 3^{5}). See art. GER.

As regards poverty, however, the conditions were very different in the four great periods of OT history. (1) *The Nomadic period.* In a nomad tribe there were richer and poorer and slaves; but the bond of brotherhood in the tribe was kept alive by the constant necessity of mutual help and defence; and distressful poverty was possible for the individual only when the fortunes of the whole tribe were at a very low ebb.

(2) *The Judges and the Early Monarchy.*—During this period the clan and family system maintained a great, though perhaps diminishing, vitality; and its influence, as we have said, was against the growth of poverty. The great majority of free Israelite families held land; they might suffer from bad seasons, and from invasion, or the oppression of powerful fellow-countrymen;[*] whole families might be swept away by plague or famine, carried away captive by the enemy, or reduced to slavery by native oppressors; but with certain exceptions (see below) there was little permanent poverty. Gideon says (Jg 6^{15}) ‘My clan (*lit.* ‘thousand’) is the poorest (הַדַּל) in Manasseh, and I am the least in my father's house’; but the context shows that Gideon was fairly well off. It is probably not a mere accident that the first mention in history of a class of poor freemen comes soon after the establishment of the Monarchy. 1 S 22^{2} tells us that there resorted unto David ‘every one that was in distress (אִישׁ מָצוֹק), or in debt, or discontented.’

In this period, however, certain classes of landless poor seem to have arisen. When the frontier receded through the successful attack of a neighbouring tribe, the Israelite refugees would seek shelter amongst their brethren. They could not always be provided with land, and probably formed a large portion of the *gērīm*, the *gēr* in this case being an Israelite settled in a strange tribe. In this period, too, the Levites are apparently both landless and poor, *e.g.* Micah's Levite, Jg 17. 18, and the Levite of Jg 19, both of whom were *gērīm*; cf. LEVI. The scant references to the poor in the older (JE) legislation, the Ten Commandments, the Book of the Covenant, etc., *e.g.* Ex 22^{25} 23^{6}, indicate that poverty was not very widespread in this period.

(3) *The Later Monarchy.*—We learn from the prophets of the 8th cent. that as the Israelite kingdoms advanced in wealth and civilization, pauperism developed. The rich added ‘house to house, and field to field’ (Is 5^{8}), and the landless poor multiplied.

The growth in luxury led to an increase of the artisan class and the town population generally. When the tide of prosperity ebbed, these classes bore the brunt of bad times. The prophets tried to keep the land for the peasant farmers, but their efforts were futile. Deuteronomy shows that poverty was a serious and widespread evil (10^{17-19} $14^{28.29}$ 15. $23^{19.20}$ 24^{10-21} 26^{12-15}), and frequently refers to the Levites as an impoverished class ($12^{12.19}$ 18). The Deuteronomic legislation attempted to remedy the evil, but it came too late.

(4) *After the Exile.*—The community in Palestine was poor as a whole, and Neh 5 shows that the nobles and priests profited by the misfortunes of the peasants to absorb their land. The general tone of the Psalms, and the use of the term *‘ānāw*, ‘lowly,’ for the pious Jews, suggest that the bulk of the people were permanently poor. See art. POOR. The Priestly Code shows great consideration for the poor (Lv $5^{7.11}$ etc. 19^{9-15} 23^{22} 25).

As the Jews passed from the rule of the Persians to that of the Greek kings of Egypt and Syria, the bulk of the people, whether in the Dispersion or in Syria, became subject, in a measure, to the general conditions of social life; and the information as to the poor in the ancient classical world will apply to that extent to the scattered Jews. But in most cities, as in Alexandria, and in many country districts, the Jews formed communities bound by racial and religious ties. Such ties are very real, especially in small societies, when those who own them are in the midst of aliens of another faith. Poverty might be prevalent, but would be much alleviated by mutual helpfulness. In Jewish Galilee and Judah there were the agricultural settlements, where social conditions were comparatively simple; and the intensely Jewish city of Jerusalem, whose size implies a large poor population. The Bk. of Sirach, the work of a Jerusalem Jew, implies a measure of poverty and emphasizes the helplessness of the poor before the oppression of the rich (7^{32} $10^{30.\,31}$ $13^{3.\,18}$ 21^{5} 29^{22} 35^{13} 41^{2}); but conveys the impression that the wrongs and sufferings of the poor about B.C. 200 were far less grievous than in the time of Amos and Isaiah.

---

[*] Cf. Nathan's parable, in which the rich man robbed his poor neighbour (2 S 12^{1-6}).

As regards *provision for the poor*, there was first of all, perhaps most efficacious of all, the possibility of finding sustenance in slavery, a fate probably regarded with less horror, and carrying with it less disgrace, than the modern workhouse. Before this, the poor might have recourse to their family or clan. In early times, when each clan inhabited its own district, the claims of poorer members commanded recognition; but as time went on, and the clan system broke up, this resource became less and less to be relied on. The successive codes sought to remedy the evil by various enactments. In Ex 22^{25-27} loans are to be without interest, so also Dt $15^{7.\,8}$ $24^{10.\,13}$, Lv $25^{35.\,37}$; cf. Ps 15^{5} etc.; and in Ex 23^{11} the poor are to have the produce of the land in Sabbatical years, so also Lv 25^{6}. In Deuteronomy tithes are to be given to the poor (14^{28} $26^{12.\,13}$); who are to be entertained at the great Feasts ($16^{11.\,14}$; cf. Neh 8^{10}); to be allowed to glean, and to have something left to glean, to have the right to take what grew in the corners of fields, and any sheaves that might be forgotten ($24^{19.\,21}$); cf. Lv $19^{9.\,10}$, Ru 2^{2}. The most serious attempt to deal with poverty was the Law of the Jubilee Year in the Priestly Code (Lv 25^{25-54}; cf. Dt 15^{12-15}), which, if carried out, would have secured the periodical restoration of the landless poor to freedom and their return to the land, but this law remained an ideal. These various provisions were supplemented by ALMSGIVING (which see).

B. IN NEW TESTAMENT.—The term 'poverty, πτωχεία, *paupertas*, *inopia*, is used only in 2 Co $8^{2.\,9}$, Rev 2^{9}, where it has a general or figurative sense; but the 'poor,' *πένης* (2 Co 9^{9}), *πενιχρός* (Lk 21^{2}), *πτωχός* (frequently, especially in the Gospels and Ja 2), *pauper*, etc., are often mentioned. As regards poverty, the NT period did not differ in any essential features from the Greek period. On the one hand, the exactions of the Herodian and Roman officials were probably more severe than those of the Greek rulers; on the other, the duty of almsgiving was more diligently inculcated as a religious duty which would be richly rewarded. In this respect the Christian Church followed in the steps of the synagogue. The Church at Jerusalem made an abortive experiment in communism (Ac 2^{44} 4^{32}), which probably aggravated its poverty; and gave opportunity for the collection for 'the poor saints at Jerusalem' which St. Paul organized amongst his Gentile converts (Ro 15^{26}, Gal 2^{10}). The early Christian Churches followed the example of the synagogues in holding it a duty to provide for their poor (Ro 12^{13}, 1 Ti 6^{18}, 1 Jn 3^{17} etc.; cf. art. 'Alms' in Smith and Cheetham's *Dict. of Christian Antiquities*). But Ja 2^{2-6} shows that this duty was often neglected. In later times the Jews have usually set an example to Christendom by their care for their poor co-religionists.

While we read that 'the common people (*ὁ πολὺς ὄχλος*, Mk 12^{37}, cf. Jn 12^{9}) heard' Jesus 'gladly,' we are not told that His actual disciples were poor; they rather seem to have belonged to the lower middle class—fishermen owning boats, tax-collectors, etc. The early Church included many poor, and few rich, powerful, or distinguished members (1 Co 1^{26}); but Prof. Orr, in his *Neglected Factors in the Study of the Early Progress of Christianity*, maintains that the strength of the Church lay in the middle classes. Cf. ALMSGIVING, FAMILY, GLEANING, SABBATICAL YEAR, TITHES.

W. H. BENNETT.

POWER (chiefly חַיִל, כֹּחַ, עֹז; *δύναμις*, *ἐξουσία*).*—1. All the power in the universe is traced in Scripture to a spiritual source. God created all things by His word; and the word being the expression of the will, it is the spiritual God Himself who is the ground and origin of all that is (Gn 1. 2, Ps 33^{9} 148^{5}, Pr $8^{27\text{ff.}}$, Is $40^{12\text{ff.}}$, Jer 32^{17}, Jn $1^{3.\,10}$). While God is the Creator of the world, and continually rules all the agents in it for His own ends, there is real power made over to nature. There is no pantheistic identification of nature's power with God's. According to Gn 1, the earth has the function assigned to it of bringing forth grass and herbs, and the trees and all the living creatures bring forth fruit 'after their kind': nature follows its own laws (cf. He 6^{7}). Or, again, the sea has a place and power which are definitely fixed, indeed, but are thereby proved to be real (Job 38^{11}, Pr 8^{29}). In like manner there is true power, though it is derivative, committed to man. He was made 'in the image of God' (Gn $1^{26\text{f.}}$), and so his original endowment includes the gift of power like God's. It is proved by his exercising dominion over the other living creatures (1^{28}), and by his possessing freedom of choice ($2^{16\text{f.}}$). The power of man is lost by sin (Gn 2^{17}, 1 S 28^{20}, Ro $7^{18\text{ff.}}$ etc.). Nevertheless, he is treated in every condition as a rational and moral being; the wicked are commanded on almost every page of Scripture to bestir themselves, to repent and turn to God.

2. God continually upholds the world by His power in *Providence*, *i.e.* (*a*) in the *preservation*, (*b*) in the *government* of the creation. (*a*) The fact of the world's persistence amid change, and while everything in it is characterized by transiency, is referred to the direct action of the Divine Will (Gn 8^{22}, Ps $104^{29\text{f.}}$ 139, Jer 14^{22}, Ac 17^{28}, He 1^{3} etc.). Then (*b*) God's government of the world consists in His guiding all its processes for certain predetermined ends. Thus He causes grass to grow 'for the cattle,' and herb 'for the service of man' (Ps $104^{14\text{f.}}$). Human success is due to the favouring presence and power of God, and serves for the fulfilment of the Divine purposes, both as respects the earthly life (Jos $1^{11\text{ff.}}$) and the higher life of the soul (Ro $8^{28\text{ff.}}$, Ph 2^{13}). All the ways of men are justly recompensed by the Almighty (Jer 32^{19}). Wickedness is overruled and brought to naught on the earth, a feature of God's providential action which is naturally emphasized in OT. God fulfils His purpose of love in spite of all opposing agents, whether visible or invisible, angelic or Satanic (Ro $8^{38\text{f.}}$).

3. Special displays of power made by the Almighty. Israel was often saved by God from its enemies, the signal deliverance from Egyptian bondage which He effected for His people 'by a mighty hand and by an outstretched arm' being the type of these supernatural interventions (Dt 5^{15}). The chosen people were guided in their career, and kept together as a nation, a remnant at least being preserved. God revealed His laws and ordinances; and these, duly honoured, were calculated to realize the highest good to the nation, to impart the blessing of 'life' and all that that implies (Dt $28^{1\text{ff.}}$ $30^{15\text{ff.}}$, Ps $19^{7\text{ff.}}$, Pr 3). These influential manifestations of the Divine Will lead up to the completed revelation in Christ, who is superior to every world-power, and whose gospel is 'the power of God unto salvation to every one that believeth' (Ro 1^{16}). The full manifestation of His power occurs when 'the kingdoms of this world are become the kingdoms of our Lord, and of his Christ: and he shall reign for ever and ever' (Rev 11^{15}). The personality of Jesus in the

---

* Broadly speaking, *δύναμις* in NT is power, and *ἐξουσία* authority to wield it. See Mason, *Conditions of Our Lord's Life on Earth*, p. 98 f.; Lightfoot on Col 1^{13}; Swete on Mk 2^{10}.

Gospels presents throughout the characteristics of spiritual power. He exhibits the unequalled power of perfect righteousness and love, *e.g.* in drawing disciples to Himself with a few words (Mt $4^{18ff.}$, Mk 2^{14}), refuting learned and influential adversaries, so that they could not answer Him a word or venture to question Him (Mt 22^{46}, Mk 12^{34}, Lk 14^{6} 20^{40}), driving out of the temple a crowd of those who dishonoured the building (Mt 21^{12}), working miracles in kindness to men and for the furtherance of faith (Mt 11^{5} etc.), extending pity and forgiveness to penitent sinners, and thereby raising them to a new and better life (Lk $7^{47ff.}$). These qualities of holiness and love in Jesus appear at their best when He is under trial; His endurance of the cross proves them to be stronger than death. Hence it is when He is 'lifted up' that He 'will draw all men' unto Him (Jn 12^{32}). Then the resurrection of Christ proves His power over death and His glory as the triumphant Son of God (Ac 2, etc.).

4. Power restored in man. God works in man for the restoration of the soul's own power, and hence the believer should 'work out his own salvation with fear and trembling' (Ph $2^{12f.}$). At length the full power of the soul is recovered through the aid of the Holy Spirit (Ro $8^{1ff.}$, Gal $5^{16ff.}$). See HOLY SPIRIT. For the attainment of this end in man we have thus (*a*) the activity on God's side, and (*b*) the activity of man. (*a*) There is a providential leading or drawing by the Father before men can come to Christ (Jn 6^{44}). Then through the death of Christ believers become dead to the power of sin: there is a breach with it in principle (Ro 6), or sanctification is begun. 'Not that anything in human nature was actually changed as by magic in the moment when Christ died, but in the completion of this holy life there was established a universal and personal principle of victory (a *δύναμις σωτηρίας*), which is able wherever it is received to break sin in the *σάρξ* and kill the natural selfishness, so that the man may walk no longer *κατὰ σάρκα*, but *κατὰ πνεῦμα*' (Beyschlag). Furthermore, through the resurrection of Christ men obtain power to accept salvation (1 Co 15^{17}): faith not actuated by the risen, living Christ, but only by man's own natural endeavours, is 'vain' or powerless. The life of faith throughout its progress derives its power from the believer's communion with the risen and glorified Christ (Ro 5^{10}, 2 Co $3^{17f.}$, Gal 2^{20}). Again, our Lord's resurrection imparts the power of a great hope; Christians have a sure hope beyond the present world. And they are empowered in consequence to be righteous in the world and worthy of their high calling, so that their hope may be fulfilled. (*b*) On man's side there has to be fervent prayer accompanied with righteousness (Ja 5^{16}), faith which overcomes the world (1 Jn 5^{4}), and to which nothing is impossible (Mt 17^{20}); and love, which leads to the keeping of Christ's words (Jn 14^{23}), and which casts out fear (1 Jn 4^{18}). Or man has to walk in the Spirit (a process which presupposes the peace of forgiveness), and then he obtains the amplest power, shown by his not fulfilling the lust of the flesh (Gal 5^{16}), and by his bringing forth the varied fruits of the Spirit, or growing without cessation into the likeness of Christ (Gal $5^{22f.}$). By the interaction of these Divine and human means power is obtained by the Christian for the performance of any manifest duty, and the possession of sufficient power should be assumed. Christ is to him the Bread of Life, strengthening for the accomplishment of all righteousness (Jn $6^{27ff.}$, Ph 4^{13}), as food supplies the body with power for all its physical acts; though in neither case can we comprehend the steps of the process (so Dods in 'Expositor's Bible,' *John*, i. 220 n.).

A passage that has created much discussion is 1 Co 11^{10} 'For this cause ought the woman to have power (*ἐξουσίαν*, RV '*a sign of* authority') on her head because of the angels.' The apostle's argument seems to he, Because the woman was derived from (v.^{8}) and was created for (v.^{9}) the man, therefore she should have on her head a covering in token that she is under the authority of the man. The abstract 'authority' is put for the concrete 'sign of authority.' Then a new encouragement is added. If women will not do this out of natural seemliness, let them remember that the angels are present (cf. art. HEAD, vol. ii. p. 317^{a}) in their assemblies, and for their sakes, the messengers of order, cover their heads. This is the interpretation of almost all modern expositors. For the presence of angels at Divine worship, see especially Meyer, *in loc.*

For **Powers** see under DOMINION.

G. FERRIES.

POWER OF THE KEYS.—The ecclesiastical connotation of these words must not be altogether identified with the meaning of them in the NT passage (Mt 16^{19}) from which they are taken, although the first is included in the second. And the language about the keys in that passage must be distinguished again from the language about 'binding and loosing' which follows.

The image of the keys is not infrequent in Scripture (cf. Is 22^{22}, Rev 1^{18}). 'The key (מפתח, also קלידי) to the prophets, as well as to the Rabbis, was the symbol of physical and moral authority and power' (Wünsche, *Neue Beiträge*, p. 195). The kingdom of heaven, here to be understood of the Messianic theocracy about to be established, is likened to a house or palace, of which our Lord promises that St. Peter shall be the chief steward or major-domo, who is entrusted with full authority over everything which the house contains. The keys are not merely those of the outer doors of the house, which give the holder power to admit or to eject; the porter's office is only a part of the authority committed to St. Peter. They are the keys of inner chambers also, giving command, for example, of the 'treasures' from which it will be his duty (Lk 12^{42}) to feed the household. As the house is at the same time 'the kingdom,' it is evident that the authority is of very wide range. In the passage of Isaiah, which offers the nearest parallel (though it is to be observed that the sing. is there used, not the plur.), the thought of the key suggests an indisputable power of ingress and egress, both for the holder and for others at his discretion—a power (as interpreted in Rev 3^{2}) of granting or withholding opportunities and facilities of various kinds.

In this last view the 'power of the keys' leads on naturally to the power of 'binding and loosing,' which, though not the same as the power of the keys, may be regarded as one of the chief exercises of that power. The 'binding' and 'loosing' is not the binding and loosing of persons but of things—not 'whomsoever thou shalt loose,' but 'whatsoever.' To 'bind' (לאסור), in rabbinic language, is to forbid; to 'loose' (להתיר) is to permit. Lightfoot says that 'thousands of examples' of this usage might be produced. One instance may suffice. 'Concerning the moving of empty vessels [on the Sabbath day], of the filling of which there is no intention; the school of Shammai binds it, the school of Hillel looseth it' (Hieros. *Shabb.* fol. 16, 2, quoted by Lightfoot, *Exercit. upon St. Matt.* p. 238). It is the power of laying down the law for his fellow-disciples, like a true Rabbi, which is thus bestowed upon St. Peter. Or perhaps it is more exact to say that it is the power of interpreting in detailed application the law which God has laid down in general terms. Authority is given him to say what the law of God allows, and what it forbids; and the promise is added that his ruling shall be upheld in heaven,—and is consequently to be regarded as binding upon the consciences of Christians. The power of binding and loosing is in fact the power of legislation for the Church.

The gift of 'the keys' is not expressly bestowed on any one else besides St. Peter, but the legislative power is afterwards extended to others (Mt 18^{18}). It is not certain who are the persons there addressed. 'The disciples' mentioned in v.^{1} are doubtless the apostles, or at any rate include some of the apostles; but it is not easy to prove that the power of binding and loosing is there bestowed upon them exclusively. That opinion, however ancient and however widely held, involves the further conclusion that the promises which follow, and upon which the binding and loosing power is made to depend, are to be similarly restricted. It is, according to this interpretation, to the apostles alone that Christ promises that the prayer of two of them shall be heard, and that where two or three are gathered in His name, He will be there. This is difficult to suppose. We must accordingly conclude that the binding and loosing power first bestowed upon St. Peter is not represented in NT as an exclusive privilege of the apostles. It is the common privilege of the Christian society—even of a small branch of it—when acting in agreement (v.^{19}) and solemnly assembled in (or 'to') Christ's name as its ground of union (v.^{20}). In this case, however, the power appears to be connected with judicial discipline over individual members of the society. The 'binding and loosing' are not, in this case any more than elsewhere, to be interpreted as the absolving and retaining of sins; they seem to mean the prescribing what the offender is to do and not to do. But, in case of his refusal to comply with these requirements of 'the Church,' he is to be treated as 'a heathen man and a publican,' *i.e.* as excommunicate; and the resistance to the authority of the Church is to be considered as resistance to the will of Heaven. The prayer of the slighted Church will be heard, for Christ Himself is present at the gathering, and Heaven will give its sanction to the sentence (see interesting parallels in Wünsche, p. 218).

There is, accordingly, a close connexion between the authority to bind and loose and the authority to absolve and retain sins (Jn 20^{23}). The discipline which prescribes what the sinner must do, on pain of encountering a sentence at once earthly and heavenly, cannot but involve a 'power of the keys' in the (inaccurate) sense which that term has borne in the Church since patristic times.

Christians of all ages have rightly seen a signal instance of St. Peter's use of the keys in the admission of Cornelius to the Church. He thus 'opened' the door indeed to the Gentiles, 'and no man' has ever since 'shut' it to them. But there is no reason to think that this one act was all that was in our Lord's mind when He made the promise; nor is it likely that He referred only to the authority to baptize at discretion exercised by the apostle. The whole of his chief-stewardship was included in the promise; and both in his appointments of other Christians to sacred offices, in the administration of the Christian sacraments at large, and in his expositions of Christian truth, he was exercising the power of the keys.

An equally signal instance of 'binding and loosing' on a large scale is the regulation laid down by St. Peter, along with 'the apostles and the elders,' for the discipline of the Gentile Christians in regard to meats and manner of life (Ac 15^{28}). They 'loosed' for them all other kinds of food; they 'bound' for them 'things offered to idols, and blood and things strangled, and fornication.' Similarly, at a later time, St. Paul at Corinth 'loosed' even the eating of things offered to idols,—though he 'bound' it in certain circumstances (1 Co 10$^{25f.}$),—and laid down various rules concerning marriage (1 Co 7), and concerning public worship (1 Co 11–14). 'So ordain I in all Churches' is his formula (1 Co 7^{17}).

Of 'binding and loosing' in relation to the individual, the case which we are able to follow with the greatest degree of clearness is that of the incestuous man at Corinth; which recalls with remarkable exactness the language of Mt 18$^{18f.}$. St. Paul was evidently surprised that the Church of Corinth had not dealt with the case on its own responsibility. It ought to have 'mourned,' with a view to the removal of the offender (1 Co 5^{2}). The 'mourning' he would have expected was clearly a public and united humiliation of the Church before God, to the intent that God might 'take away' the man who had done the deed (see Godet, *ad loc.*). In answer to the solemn and concerted prayer, a stroke from heaven would have fallen upon him, as upon Ananias and Sapphira, or, without such prayer, upon the profaners of the Eucharist at Corinth itself (1 Co 11^{30}). Probably this appeal to God would have been preceded or accompanied by an act of formal separation from the sacramental fellowship of the Church; certainly by an exclusion of the sinner from social intercourse with the brethren (1 Co 5^{11}). As the Corinthian Church had not thus acted, the apostle informs them of his own intended procedure, with which he demands that they should co-operate. Though absent from them in body, he calls upon them to assemble; he himself will spiritually be present in the assembly, armed with 'the power (not merely with the authority) of our Lord Jesus.' The sentence which he has already passed upon the man 'in the name of the Lord Jesus' will then be formally pronounced. He will be 'delivered unto Satan for the destruction of the flesh, that the spirit may be saved in the day of the Lord.' Delivery to Satan was not a rabbinical formula for excommunication in any form (Lightf. *Excercitations, ad loc.*). The phrase is probably derived from Job 1^{12} 2^{6}. St. Paul seems to have intended that either by a judicial death, or by some wasting disease, the man should be so punished as to bring him to repentance (cf. 1 Ti 1^{20}). The discipline seems to have had the desired effect. The majority of the Corinthian Church (2 Co 2^{6}) administered a 'rebuke' to the man,—which was probably excommunication in its less severe form ('reproof with the Babylonian writers was the same with excommunication,' Lightf. p. 183). The man was overwhelmed with sorrow,—so much so that the apostle feared lest the excess of it should be fatal to his soul (2 Co 2^{7}). He bids the Corinthians therefore 'forgive and comfort him.' He himself, acting as Christ's representative (*ἐν προσώπῳ Χριστοῦ*) has already forgiven him, though he will not consider his forgiveness as absolute (*εἴ τι κεχάρισμαι*) until the Corinthian Church has joined in it. The solemn gathering 'in the name of the Lord,' the confidence that His 'power' would be present to ratify what was done by His representatives upon earth, the punishment and the release, all appear to be directly based upon the language of our Lord recorded by Mt.

Of the exercise of discipline in less unusual cases we naturally have scantier evidence in NT. Perhaps the most interesting reference to it is that in Ja 5$^{14f.}$. The sick man is there advised to call for the presbyters of the Church, who are to pray over him, 'anointing him with oil in the name.' In answer to this action of the Church represented by its local heads, the writer says that the sick man will recover (for to interpret *σώσει* and *ἐγερεῖ* otherwise seems impossible in the context), and adds that 'if he have committed sins,' *i.e.* obviously, grave and marked sins, 'he shall be forgiven' (*κἂν ἁμαρτίας ᾖ πεποιηκώς, ἀφεθήσεται αὐτῷ*). That the *ἀφεθήσεται αὐτῷ* is a promise of what God will do in answer to the prayer of the presbyters, and not an instruction to the presbyters themselves, seems to be required by the structure of the sentences. It is parallel in sense to *σώσει* and *ἐγερεῖ*. If St. James had intended the word to mean that the presbyters were to absolve the man, he would probably have put it in the imperative, like *προσκαλεσάσθω* and *προσευξάσθωσαν*. But the forgiveness of God is a blessing granted to the faithful prayers of the presbyters; and, in order to encourage such prayers, the apostle proceeds to insist upon the value of them. 'Confess therefore your sins one to another, and pray one for another,' he says, 'that ye may be healed.' By 'one to another' he means 'to your fellow-men,' *i.e.* not to God only. It is clear that he cannot mean mutual confession in the ordinary sense of the term, for (1) he assumes that the prayers to which he ascribes such efficacy are those of 'righteous men,' not those of men who 'have committed sins'; (2) the special object with which the prayers are to be offered (not indeed the contents of the prayers, which are directly connected with forgiveness) is 'that ye may be healed' (*ὅπως ἰάθητε*); if, therefore, the prayers are to be in the strict sense mutual prayers, it is implied that both parties, praying and prayed for, are alike sick, and the mutual confession would be only between sick man and sick man, which is absurd. Evidently, the sick man is exhorted to make his confession to the presbyters whom he has called in, and they in turn are exhorted to pray for his forgiveness, upon which his recovery is made to depend, and are reminded what power their prayers have, if only they are what they ought to be. The apostle selects from the OT history the example of one who exercised the 'power of the keys' upon a national scale, both 'shutting' and 'opening' the stores of heaven for his people. Though but 'a man of like passions with us,' Elijah by his (unrecorded) prayers shut up the rain from his guilty countrymen for three years and a half; and on their showing signs of repentance, he opened it again for them. We need not therefore wonder (such is St. James' argument) if, when we confess our sins to beings of the same make as ourselves, their intercession is able to obtain for us the remission of them. (On the rabbinic view of Elijah and the 'Keys,' see Wünsche, p. 195).

Our accounts of life within the Christian communities of the first age are so fragmentary that we cannot be surprised at not finding many references to the penitential discipline which existed among them. That there should have been some power on earth answering to what was occasionally exhibited even in OT times—as in the absolution of David by Nathan (2 S 12^{13})—is only what was to be expected in the covenant of grace. When Christ claimed to forgive sins as 'the Son of Man,' the multitudes 'glorified God which had given such authority *unto men*' (Mt 9^{8}). The last word may mean either that the authority to absolve was committed by God to men, to use on His behalf; or that by delegation of such an authority God had bestowed a blessing upon men: in other words, the 'men' spoken of may be either the holders of the authority, or those on whose behalf it was given. But in either case it was recognized that the assurance of forgiveness had been made accessible in a new way; and Christ, in His first appearance to the assembled Church after His resurrection, gave His disciples to understand that the authority which He had exercised in relation to absolving and retaining of sins was henceforth vested in them, as the continuators of His own mission (Jn 20$^{21f.}$). It is not an exhaustive interpretation of these words which would see in them only a commission to impose or to remove ecclesiastical censures. All acts of the Christian society, according to the NT conception of it, are fraught with spiritual efficacy.

It may be added that some eminent interpreters consider the 'laying on of hands' in 1 Ti 5^{22} to be the sign of absolution (see art. LAYING ON OF HANDS); but the interpretation is far from certain. A. J. MASON.

PRÆTORIAN GUARD.—See PRÆTORIUM.

PRÆTORIUM (Gr. *τὸ πραιτώριον*).—This Lat. word, adopted in the later Gr., signified originally the general's (*prætor's*) tent (*e.g.* Livy, *Hist.* vii. 12, x. 33). Then it was applied to the council, composed of the chief officers of the army, which assembled in the general's tent (*e.g.* Livy, *Hist.* xxvi. 15, xxx. 5, xxxvii. 5); then to the official residence of the governor of a province (*e.g.* Cic. *in Verr.* II. iv. 28, II. v. 35; Tert. *ad Scap.* 3); then, in the post-Augustan age, to any princely house (*e.g.* Juv. *Sat.* x. 161), and even to a large villa or country-seat (*e.g.* Suet. *Octav.* 72, *Calig.* 37, *Tib.* 39; Juv. *Sat.* i. 75; Statius, *Sylv.* I. iii. 25); and finally to the imperial bodyguard, whose commander was *præfectus prætorio* or *prætorii* (*e.g.* Tac. *Hist.* i. 20, ii. 11, 24, iv. 46; Suet. *Nero*, 9; Pliny, *NH* xxv. 2). No certain example occurs of its application either to the prætorian camp or barracks or to the emperor's residence in Rome, though it was often used of the emperor's residence away from Rome.

In AV the word appears only once (Mk 15^{16}); but in the Gr. of NT it is used in Mt 27^{27} (AV 'the common hall'; marg. 'governor's house'; RV 'the palace'), Mk 15^{16} (AV 'the hall, called Prætorium'; RV 'within the court which is Prætorium'; marg. 'palace'), Jn 18^{28} (AV 'the hall of judgment'; marg. 'Pilate's house'; RV 'palace'), 18^{33} and 19^{9} (AV 'judgment hall'; RV 'palace'), Ac 23^{35} (AV 'Herod's judgment hall'; RV 'Herod's palace'), Ph 1^{13} (AV 'in all the palace'; marg. 'Cæsar's court'; RV 'throughout the whole prætorian guard').

In the Gospels the term denotes the official residence in Jerus. of the Roman governor, and the various tr^{ns} of it in our versions arose from a desire either to indicate the special purpose for which that residence was used on the occasion in question, or to explain what particular building was intended. But whatever building the governor occupied was the Prætorium. It is most probable that in Jerus. he resided in the well-known palace of Herod, since Philo (*ad Gaium*, 31) states that Pilate hung there the shields which offended the Jews (see PILATE), and Josephus (*BJ* II. xiv. 8, II. xv. 5) speaks of Gessius Florus as living in 'the king's palace,' and since in Cæsarea (see Ac xxiii. 35) Herod's palace is known to have been used for the same purpose. Herod's palace in Jerus. was a magnificent structure in the upper or western part of the city, and was connected by a causeway over the valley of Tyropœon with the western wall of the temple. It is described by Josephus (*BJ* V. iv. 4, *Ant.* XV. ix. 3) in admiring terms. It was surrounded by a wall, rising to the height of 30 cubits, and adorned with towers at equal distances. The enclosure was large enough to contain a small army. The building had two marble wings, called by Herod the Cæsareum and the Agrippeum. It contained large rooms within and spacious porticoes without. It was sumptuously furnished, and was surrounded by a beautiful park. Here the governor with his guards lived when in Jerus., while the regular garrison occupied the castle of Antonia; and it was doubtless before this building that the Jews presented themselves with the demand for Jesus' execution. Tradition, indeed, has placed the residence of Pilate in the lower city, a short distance north of the temple. Not a few also have identified it with the castle of Antonia (Rosenmüller, *Alterthumskunde*, II. ii. 228; Caspari, *Introd.* p. 225; Wieseler, *Chron. Syn.*, Eng. tr. p. 372; Weiss, *Life of Christ*, iii. 346 n.; Westcott, *St. John*)—partly because tradition has located the house of Pilate near the site of the castle; partly because, since the castle was the regular barracks for the garrison, and was sufficiently large for the purpose, it is thought probable that the governor also used it; and also because many identify 'the place called the Pavement, but, in the Hebrew, Gabbatha,' with the elevated, paved area between the castle and the temple (see GABBATHA). But, for the reasons given above, the identification with Herod's palace is probably to be preferred (so Meyer, Winer, Alford, Schürer, Edersheim, and others). In like manner, as already observed, Herod's palace in Cæsarea was used as the Prætorium there. The expression in Ac 23^{35} ('Herod's Prætorium') is abbreviated from 'the prætorium of Herod's palace,' and thus describes both the particular building and the purpose for which it was used.

In Ph 1^{13} 'in the whole Prætorium' has been very variously explained. Many commentators, ancient and modern, have tr^{d} it 'palace' (so AV), coupling it with 4^{22}, where allusion is made to believers who belonged to 'Cæsar's household.' But no other instance appears of the application of the term to the emperor's residence in Rome. Such an application would have been intolerable to the Romans, since it would have shocked the republican traditions under which the empire was organized. Hence many, as Perizonius (*De orig. signif. et usu vocc. prætoris et prætorii*, 1687, *Disquisitio de prætorio*, 1690), Clericus, Michaelis, Hoeleman, Wiesinger, Milman, Weiss, Ellicott, Meyer, understand it of the barracks of the prætorian guard (*castra prætorianorum*). But Lightfoot (*Com. on Phil.* p. 99) has shown that neither can this use of the word be established. Wieseler (*Chron. d. Apost. Zeit.* p. 403), followed by Conybeare and Howson, refers it, not to the prætorian camp, but to the barracks of the palace guard, which Augustus established (Dio Cass. liii. 16) in the imperial enclosure on the Palatine hill; but, after the establishment of the *castra prætorianorum* by Tiberius, the word would naturally refer to it, if to any barracks. The following phrase (*τοῖς λοιποῖς πᾶσιν*) also more naturally describes persons than places, *λοιπός* being never in NT applied to places (Ellicott, *in loc.*). Presumably, therefore, 'prætorium,' too, is descriptive of persons. Hence Lightfoot has ably defended the meaning 'prætorian guard.' St. Paul is supposed to have been chained to soldiers of the guard, and thus, through the change of guards, his message spread throughout the whole body of soldiers. This meaning of Prætorium is frequent, and has been adopted in Ph 1^{13} in RV. Recently, however, Mommsen (*Sitzungsb. der König. preuss. Acad. d. Wissensch.* 1895, p. 495, etc.), followed by Ramsay (*St. Paul the Trav.* p. 357), has proposed another view. He considers it improbable that St. Paul was put in charge of the prætorian guard. He believes that Julius, the centurion who brought Paul to Rome, belonged to the corps of *milites frumentarii* or *peregrini*, a corps drafted from legions in the provinces, whose duty it was to supervise the corn supply, and also probably to perform police service: and that Julius probably delivered his prisoners to the commander of his corps, *princeps peregrinorum*, whose camp perhaps was already, as it was afterwards, on the Cælian hill. But while St. Paul was not in charge of the prætorian guard, his case came before the prætorian council, consisting of the *præfecti prætorio* and their assistants. This council then, according to Mommsen and Ramsay, is the *prætorium* alluded to by the apostle, and *τοῖς λοιποῖς πᾶσιν* refers to the audience at the trial.*

G. T. PURVES.

PRAISE IN OT.—'Praise,' whether as a verb or a noun, has various applications in the OT, but its commonest use is to denote an act of homage or worship offered to God by His creatures, particularly by man. The object of this article will be mainly to examine the meaning and usage of the terms which our English versions render by 'praise,' and to sketch, as far as the data enable us to do so, the occasions, the modes, and the history of praise in Israel.

i. THE TERMS.—1. הלל. The original sense of this root is perhaps 'break out (in a cry),' especially of joy (cf. the name *Hallel* applied to Ps 113–118, the Aram. הִילּוּלָא 'marriage-song,' and the Assyr. *alâlu* 'shout for joy'; see also Cheyne, *OP* 460), although it is possible that, as W. R. Smith (*RS*^{1} 411) suggests, among the Semites 'the shouting (*hallel*) that accompanied sacrifice may, in its oldest shape, have been a wail over the death of the victim, though it ultimately took the form of a chant of praise (*Hallelujah*).' The idea of *making a noise* is what appears to be prominent. The same writer points out that the roots הלל 'to chant praises' and ילל 'to howl' are closely connected, and he thinks it possible that shouting in mourning and shouting in joy may have both been primarily directed to the driving away of evil influences. The sense of 'praise' is conveyed by the above root in the Piel הִלֵּל. This may have for its object (1) *man or woman*: Gn 12^{15} (J) 'they praised (LXX *ἐπῄνεσαν*, AV 'commended') her (Sarah) to Pharaoh'; Pr 27^{2} 'let another man praise thee (LXX *ἐγκωμιαζέτω σε*), and not thine own mouth'; 28^{4} 'they that forsake the law praise (LXX *ἐγκωμιάζουσιν*) the wicked'; $31^{28.\,31}$ the virtuous woman is praised by her husband and by her works (LXX in both *αἰνεῖν*, but in v.^{31} a different reading from that of MT is followed: *καὶ αἰνέσθω ἐν πύλαις ὁ ἀνὴρ αὐτῆς*, 'and let her husband be praised in the gates'); Ca 6^{9} (here and in the following passages, unless otherwise noted, LXX *αἰνεῖν*) of the Shulammite; 2 S 14^{25} of Absalom's beauty (*αἰνετός*); 2 Ch 23^{12} of king Joash. (2) The object is once *a false god*: Jg 16^{24} of the Philistines praising (*ὑμνεῖν*) Dagon; (3) very frequently *God* (אֱלֹהִים or יהוה): Ps 69^{34} (where 'heaven and earth, the seas, and everything that moveth therein' are called on to praise Him; cf. Ps 148); often of public worship in the sanctuary: Is 62^{9}, cf. 64^{11} (*εὐλογεῖν*), Ps 22^{22} (*ὑμνεῖν*, cf. v.^{26} *ὁ ἔπαινός μου*) 35^{18} 84^{4} 107^{32} 109^{30} 146^{2} 149^{3}. Sometimes the object is 'the name of Jahweh *or* of God' (שֵׁם יהוה or שֵׁם אֱלֹהִים, *τὸ ὄνομα τοῦ θεοῦ*): Ps 69^{30} 74^{21} 145^{2} 148^{5}, Jl 2^{26}; or His word (דָּבָר, *λόγος*, *ῥῆμα*): Ps 56^{4} (*ἐπαινεῖν*) $^{10\,bis}$ [v.^{10b} may be an editorial addition, so Hupfeld, Cheyne *et al.*]; or the object may be unexpressed: Jer 31 [Gr. 38]^{7}, Ps 63^{5} (*ἐπαινεῖν*). The expression 'praise ye Jah' (Hallelujah, in Ps 135^{3} הַלְלוּ־יָהּ [*αἰνεῖτε τὸν Κύριον*], elsewhere always as one word הַלְלוּיָהּ, Ἀλληλουιά [once Ps 104^{35} הַלְלוּיָהּ, LXX omits here]) has generally a liturgical application and is mostly confined to late psalms. It occurs at the beginning of Ps 106. 111. 112. 113. 135. 146. 147. 148. 149, and at the end of 104. 105.

---

* Mommsen denies that *στρατοπεδάρχης* (AV captain of the guard), found Ac 28^{16} in some authorities (cf. Blass, *ad loc.*), but omitted by WH, Tisch., and RV, could have been applied to a *præfectus prætorio*. This reading is evidently 'Western,' and Mommsen finds in the text of the Stockholm Latin MS ('Gigas'), *princeps peregrinorum*, at least a 2nd cent. interpretation of it, one which confirms his inference that the *castra peregrinorum* had been established in Rome in St. Paul's time. Positive evidence, however, for the existence of this corps and camp, under this name, appears only in the time of Severus, and the Latin MS may interpret the Gr. text before it by the light of later custom; while *στρατοπεδάρχης* itself was evidently a popular title, and really supplies no information as to who took charge of the apostle.

106. 113. 115. 116. 117. 135. 146. 147. 148. 149. 150. See, further, art. HALLELUJAH. Instead of the direct object, הלל is generally followed, in the writings of the Chronicler, by ליהוה, in the account of the technical Levitical (or priestly) function of praising Jahweh: 1 Ch 16^{4} $23^{5.30}$ 25^{3}, 2 Ch 5^{13} 20^{19} 29^{30} (*ὑμνεῖν*) 30^{21} (*καθυμνεῖν*), Ezr 3^{11}; but the simple יהוה occurs in Ezr 3^{10}, as it does also in Neh 5^{13} (Nehemiah's own Memoirs). The object is unexpressed in Neh 12^{24} (Chronicler), cf. 1 Ch 23^{5}, 2 Ch 7^{6} ('when David praised by their ministry,' LXX *ἐν ὕμνοις Δαυεὶδ διὰ χειρὸς αὐτῶν*) 8^{14} 23^{13} ('the singers also played on instruments of music and led the singing of praise' וְהַמְשׁוֹרְרִים בִּכְלֵי הַשִּׁיר וּמוֹדִיעִים לְהַלֵּל, LXX *οἱ ᾄδοντες ἐν τοῖς ὀργάνοις, ᾠδοὶ καὶ ὑμνοῦντες αἶνον*) 31^{2}, in all of which הלל has its technical sense.—Similarly, the passive sense 'be praised' is conveyed by the Pual, and once (Pr 31^{30}) by the Hithpael: (1) of *human subjects* and *things*: Pr 12^{8} 'a man shall be praised (AV; RV 'commended,' LXX *ἐγκωμιάζεσθαι*) according to his wisdom'; Ps 78^{63} 'their maidens were not praised' (in marriage-song; see Cheyne *ad loc.*), so Aquila *οὐχ ὑμνήθησαν*, Symm. and Theod. *οὐκ ἐπῃνέθησαν*, but LXX *οὐκ ἐπένθησαν*, 'did not raise the dirge'; Ezk 26^{17} of Tyre the 'praised (AV; RV 'renowned') city' (LXX *ἡ πόλις ἡ ἐπαινετή*); (2) of *God*, only in ptcp. (מְהֻלָּל) with gerundive force = 'to be praised,' 'worthy of praise': 2 S 22^{4} (*αἰνετὸν ἐπικαλέσομαι Κύριον*) = Ps 18^{3} (*αἰνῶν ἐπικαλέσομαι Κύριον*), Ps 48^{1} 96^{4} (= 1 Ch 16^{25}) 145^{3} [in these last four the LXX has *αἰνετός*]; in Ps 113^{3} the subject is His name (*αἰνεῖται τὸ ὄνομα Κυρίου*).

The noun for 'praise' from the root הלל is תְּהִלָּה (once מַהֲלָל, Pr 27^{21} 'the fining pot is for silver and the furnace for gold, and a man [is to be estimated] according to his praise,' where לְפִי מַהֲלָלוֹ probably means 'according to his reputation' [so Toy *et al.*, cf. LXX *ἀνὴρ δὲ δοκιμάζεται διὰ στόματος ἐγκωμιαζόντων αὐτόν*; see *Oxf. Heb. Lex.* for other possible explanations]). The word תְּהִלָּה is used (1) of *praise offered to J"*, sometimes individual, but more frequently general and public: Ps 34^{1} 48^{10} (both *αἴνεσις*) 65^{1} ('unto Thee stillness is praise [לְךָ דֻמִיָּה תְהִלָּה], O God, in Zion,' but text and tr. are both doubtful; LXX *Σοὶ πρέπει ὕμνος*, 'praise is a fitting tribute to thee'; see Comm. *ad loc.*, and Driver, *Par. Psalter*), 71^{6} (*ὕμνησις*), ^{8} (*αἴνεσις*), 100^{4} (*ὕμνοι*); particularly of praise as *sung*: Ps 22^{3} ('O Thou that sittest [throned] upon the praises of Israel,' an imitation of יֹשֵׁב הַכְּרֻבִים, the idea perhaps being that the praises, ascending like clouds of incense, form, as it were, the throne upon which J" sits [so Kirkpatrick *et al.*, but see Duhm *ad loc.*, and cf. the LXX *σὺ δὲ ἐν ἁγίοις κατοικεῖς, ὁ ἔπαινος Ἰσραήλ*]), 33^{1} (*αἴνεσις*), 40^{3} (*ὕμνος*), 106^{12} Neh 12^{46} (both *αἴνεσις*), Is 42^{10} (*δοξάζετε τὸ ὄνομα αὐτοῦ*). (2) The word תְּהִלָּה is used for a *song of praise* in the title of Ps 145 (*αἴνεσις*); cf. the New Heb. name for the Book of Psalms, סֵפֶר תְּהִלּוֹת or ס' תְּהִלִּים, or תִּילִּין. (3) It is used of *qualities, deeds, etc., of J" which demand praise*: Ex 15^{11} נוֹרָא תְהִלֹּת 'terrible in praises' (*i.e.* in attributes that call for praise; LXX *θαυμαστὸς ἐν δόξαις*), cf. Ps 9^{14} ('that I may show forth all Thy praise'), 78^{4} ('telling the praises of the LORD'), 79^{13} ('we will show forth Thy praise'), 102^{21} ('that men may declare His praise in Jerusalem'), 106^{2} ('who can show forth all His praise?'), v. ^{47} = 1 Ch 16^{35} ('to triumph in Thy praise') [in the last six passages LXX *αἴνεσις*], Is 43^{21} ('this people shall show forth My praise,' LXX *ἀρετάς*), 60^{6} ('they shall proclaim the praises of the LORD,' LXX *τὸ σωτήριον Κυρίου εὐαγγελιοῦνται*), 63^{7} ('I will make mention of the praises of the LORD,' LXX *ἀρετάς*). (4) תְּהִלָּה may = *renown, fame, glory*, or *the object of these*: (*a*) of J": Hab 3^{3} 'the earth was full of His praise' (מָלְאָה הָאָרֶץ תְּהִלָּתוֹ, LXX *αἰνέσεως αὐτοῦ πλήρης ἡ γῆ*) ‖ 'His glory covered the heavens' (כִּסָּה שָׁמַיִם הוֹדוֹ, LXX *ἐκάλυψεν οὐρανοὺς ἡ ἀρετὴ αὐτοῦ*), cf. Dt 10^{21} 'He is thy praise,' Jer 17^{14} 'Thou art my praise' (both *καύχημα*); (*b*) of other objects: Israel or Jerusalem, Dt 26^{19} (*καύχημα*), Is 62^{7} (BA *ἀγαυρίαμα*, Theod. *καύχημα*), cf. 60^{18} ('thou shalt call thy walls Salvation and thy gates Praise,' *i.e.* probably 'thy fame or renown shall take the place of protecting walls'; LXX *κληθήσεται Σωτήριον τὰ τείχη σου, καὶ αἱ πύλαι σου Γλύμμα*), and 61^{11} (*ἀγαλλίαμα*); Moab, Jer 48 [Gr. 31] ^{2} (*ἀγαυρίαμα*); Damascus, 49^{25} [Gr. 30^{14}], LXX follows a different reading; Babylon, 51 [Gr. 28] ^{41} (*καύχημα*). Is 61^{3} 'the garment of praise' (מַעֲטֵה תְהִלָּה) is doubtful. It may = 'praise (renown) as a garment' (Delitzsch) or 'a splendid garment' (Dillmann), but perhaps the clauses should, with Bickell, Cheyne, Oort, Duhm, be arranged thus: שֶׁמֶן שָׂשׂוֹן תַּחַת מַעֲטֵה אֵבֶל תְּהִלָּה תַּחַת רוּחַ כֵּהָה 'oil of joy for the garment of mourning, a song of praise for a failing spirit.' The LXX has *δόξαν ἀντὶ σποδοῦ, ἄλιμμα εὐφροσύνης τοῖς πενθοῦσι, καταστολὴν δόξης ἀντὶ πνεύματος ἀκηδίας.*

In Lv 19^{24} the fruit of trees offered in the fourth year of their bearing is קֹדֶשׁ הִלּוּלִים ליהוה (lit. 'holiness of praise to J",' LXX *ἅγιος αἰνετὸς τῷ Κυρίῳ*), cf. Jg 9^{27} [the only other occurrence of the Heb. word], where the Shechemites hold a vintage rejoicing or merry-making (וַיַּעֲשׂוּ הִלּוּלִים, LXX B *ἐποίησαν ἐλλουλείμ*, A *ἐπ. χορούς*) in the house of Baal-berith.

2. The root ידה whose primary sense is 'throw *or* cast.' The only occurrence of the Qal is in Jer 50 [Gr. 27] ^{14} 'shoot at her' (Babylon; יְדוּ אֵלֶיהָ, LXX *τοξεύσατε ἐπ' αὐτήν*), but perhaps we should read here יְרוּ. This sense is borne also by the Piel in the only two passages where this stem occurs, namely, La 3^{53} (וַיַּדּוּ־אֶבֶן בִּי 'and they cast stone(s) at me,' LXX *καὶ ἐπέθηκαν λίθον ἐπ' ἐμοί*) and Zec 2^{4} [Eng. 1^{21}] (לְיַדּוֹת אֶת־קַרְנוֹת הַגּוֹיִם, LXX, by confusion with the Heb. word for 'hands,' reads *εἰς χεῖρας αὐτῶν τὰ τέσσαρα κέρατα*). All the other occurrences of the root show the Hiphil and Hithpael (the latter only in P, the Chronicler, and Daniel) stems, which have the sense of 'praise' or 'confess,' a sense which it is somewhat difficult to connect with the primary signification, although it has been suggested that the connecting link may be found in *gestures* accompanying the act of praise.

The Hiph. הוֹדָה (cf. Palmyrene מודא 'render thanks,' frequent in votive inscriptions) is used occasionally of praising *men*: Gn 49^{8} of Judah [with play upon name, '*Judah*, thee shall thy brethren praise' (*jōdûkha*), LXX *αἰνεῖν*]; Ps 45^{17} of the king (AV 'praise,' RV 'give thanks'); 49^{18} 'men praise thee when thou doest well to thyself' (both *ἐξομολογεῖσθαι*); Job 40^{14} of Job, spoken ironically by the Almighty (LXX *ὁμολογεῖν*, AV and RV 'confess'). This sense of 'confess' is borne by the Heb. word also in 1 K $8^{33.35}$ = 2 Ch 6^{24} (all *ἐξομολογεῖν*), ^{26} (*αἰνεῖν*), Ps 32^{5} (*ἐξαγορεύειν*), Pr 28^{13} (*ἐξηγεῖσθαι*); cf. [in Hithp.] Ezr 10^{1} (*προσαγορεύειν*), Neh 1^{6} $9^{2.3}$ (all *ἐξαγορεύειν*), Dn 9^{4} (LXX and Theod. *ἐξομολογεῖσθαι*) ^{20} (LXX *ἐξομολογεῖσθαι*, Theod. *ἐξαγορεύειν*), Lv 5^{5} 16^{21} 26^{40}, Nu 5^{7} (all *ἐξαγορεύειν*).—Much more frequently the object of praise is *God*: Gn 29^{35} where J explains the name *Judah* (which he takes as = 'praised,' as if from Hoph. of ידה) by the saying he puts in the mouth of Leah, 'this time will I praise (Heb. *'ôdeh*) the LORD' (*ἐξομολογήσομαι Κυρίῳ*); very frequently, especially in Ps and Ch, of praise offered in the ritual worship, the object being Jahweh explicitly or implicitly: *e.g.* Is 12^{1} (*εὐλογεῖν*), ^{4} (*ὑμνεῖν*), $38^{18f.}$ (*αἰνεῖν, εὐλογεῖν*), Jer 33 [Gr. 40] ^{11}, Ps 7^{17} 9^{1} $30^{9.12}$ $32^{5.11}$ (all *ἐξομολογεῖσθαι*). Ps 76^{10} 'surely the wrath of man shall praise Thee, the residue of wrath shalt Thou gird upon Thee' (AV and RVm 'restrain') is doubtful. The MT reads כִּי חֲמַת אָדָם תּוֹדֶךָּ שְׁאֵרִית חֵמֹת תַּחְגֹּר, LXX *ὅτι ἐνθύμιον ἀνθρώπου ἐξομολογήσεταί σοι, καὶ ἐγκατάλιμμα ἐνθυμίου* *ἑορτάσει σοι.* Duhm emends חֲמַת to אֻמּוֹת, and כִּי to כֹּל, and in the next clause follows the LXX in reading תָּחֹג לָךְ, thus obtaining the sense, 'all the tribes of men shall praise Thee, the residue of the tribes shall keep (pilgrimage) festival to Thee.' Wellhausen makes the same change, תָּחֹג לָךְ, in the last clause; on חמת he remarks that by this word the *pious* are meant, but that the pronunciation and the meaning of the word are quite uncertain. Ps 139^{14} reads 'I will praise (RV 'give thanks unto') Thee, for I am fearfully and wonderfully made' (lit. 'fearfully wondrous,' there being no 'made' in the Hebrew [Driver, *Par. Psalter*]). The LXX (BA *ἐξομολογήσομαί σοι ὅτι φοβερῶς ἐθαυμαστώθης*, but ℵ* *ἐθαυμαστώθην*), the Syr. and the Vulg. (*quia terribiliter magnificatus es*) have '*Thou* are fearfully wondrous,' and this is adopted by Wellh. in *SBOT*, *i.e.* נִפְלֵיתָ for נִפְלֵיתִי. The more radical emendations proposed by Duhm appear to be uncalled for.—In other instances the object is the *name* of God: Is 25^{1} (*ὑμνεῖν*), Ps 44^{8} 54^{6} 99^{3} 138^{2} 142^{7}; or His *wonders* (פֶּלֶא, *τὰ θαυμάσια*) Ps 89^{5} (all *ἐξομολογεῖσθαι*). Instead of a simple accusative, הודה may be followed by לְ, always referring to the ritual worship, *e.g.* לְשֵׁם Ps 106^{47} 'to give thanks unto Thy holy name,' cf. 122^{4} 140^{13} (all *ἐξομολογεῖσθαι*); לְזֵכֶר קָדְשׁוֹ (*τῇ μνήμῃ τῆς ἁγιωσύνης αὐτοῦ*) Ps 30^{4} 97^{12} (AV 'at the remembrance of His holiness,' RV 'to His holy name,' both *ἐξομολογεῖσθαι*); ליהוה 1 Ch $16^{4.\,7.\,41}$ (all *αἰνεῖν*), 23^{30} (*ἐξομολογεῖσθαι*), 25^{3} (where הודה and הלל occur together, LXX *ἀνακρουόμενος ἐξομολόγησιν καὶ αἴνεσιν*), 2 Ch 5^{13} (similarly *ἐξομολογεῖσθαι καὶ αἰνεῖν*) 7^{6} 20^{21} 30^{22} (Hithp.), Ps 33^{2} 92^{1} (all *ἐξομολογεῖσθαι*) 105^{1}=1 Ch 16^{8}=Is 12^{4} (*ὑμνεῖν*); cf. the familiar 'Give thanks to J" for He is good' (הוֹדוּ לַיהוה כִּי־טוֹב, *ἐξομολογεῖσθε τῷ Κυρίῳ, ὅτι χρηστός* or *ἀγαθός*) Ps 106^{1} 107^{1} $118^{1.\,29}$ 136^{1}, 1 Ch 16^{34} (here, perhaps by a scribal error, *ἀγαθόν*), cf. Jer 33 [Gr. 40] ^{11}.

It will be observed that very frequently both AV and RV render הודה by 'give thanks to' instead of 'praise,' and in many instances (2 Ch $7^{3.\,6}$ 20^{21}, Ps 7^{17} 9^{1} 33^{2} 44^{8} 45^{17} 52^{9} 54^{6} 57^{9} 108^{3} 109^{30} 111^{1} $118^{19.\,21}$ 119^{7} $138^{1.\,2}$ 139^{14} 142^{7} 145^{10}, Is $12^{1.\,4}$, Jer 33^{11}), although not uniformly, RV substitutes 'give thanks to' for AV 'praise.' It might be well to adopt this rendering in all instances where הודה describes a religious exercise, except those in which 'confess' is the appropriate sense, and to retain 'praise' for הלל.

The noun from this root is תּוֹדָה 'praise,' 'thanksgiving.' It is used of giving praise to J" by confession of sin: Jos 7^{19} JE; תֶּן־לוֹ תוֹדָה, *δὸς τὴν ἐξομολόγησιν*, cf. Ezr 10^{1}; but especially of the songs of thanksgiving, in liturgical worship: Ps 26^{7} (*αἴνεσις*), 42^{4} (*ἐξομολόγησις*), 69^{30} (*αἴνεσις*), 95^{2} 147^{7} (both *ἐξομολόγησις*), Jon 2^{9} (*αἴνεσις καὶ ἐξομολόγησις*), Neh 12^{27} (ℵ *ἐξομολόγησις*, BA om.). In all these instances both AV and RV have 'thanksgiving'; in Ps 100 title and v.^{4} (both *ἐξομολόγησις*) AV has 'praise,' RV 'thanksgiving.'—The word תּוֹדָה is used in Neh $12^{31.\,38.\,40}$ of the 'two companies that gave thanks' (שְׁתֵּי תוֹדֹת, *δύο περὶ αἰνέσεως*), and possibly a similar sense ('choirs') is intended in Jer 30 [Gr. 37]^{19} (AV and RV 'out of them shall proceed thanksgiving,' LXX B *ᾄδοντες*). In several instances תּוֹדָה means a thank-offering: Am 4^{5} (*ὁμολογία*), Lv $7^{12.\,13.\,15}$ (*θυσία* [*τῆς*] *αἰνέσεως*) 22^{29} (זֶבַח־תּוֹדָה, *θυσία εὐχή*), 2 Ch 29^{31} 33^{16} (both *αἴνεσις*), Ps $50^{14.\,23}$ (the latter verse reads in AV 'whoso offereth praise glorifieth Me,' RV 'whoso offereth the sacrifice of thanksgiving,' Driver [*Par. Psalter*] 'he that sacrificeth thanksgiving,' LXX *θυσία αἰνέσεως δοξάσει με*) 56^{12} 107^{22} 116^{17}, Jer 17^{26} (all *αἴνεσις*) 33^{11} (*δῶρα*). A doubtful form occurs in Neh 12^{8} 'Mattaniah who was over the thanksgiving,' AV and RV; AVm '*i.e.* the psalms of thanksgiving'; RVm '*or* the choirs.' The Hebrew is עַל־הַיְּדוֹת, for which LXX, evidently by a confusion with the Heb. word for 'hands,' gives *ἐπὶ τῶν χειρῶν*; the Vulg. has *super hymnos*. Ewald, Bertheau, Keil, and Oettli read the abstract noun הַיְּדוֹת, Olshausen reads the infin. הוֹדוֹת. It is not improbable that JEDUTHUN (which see) also belongs to this root, and that it was originally a musical term and not a proper name.

As 'give thanks to' was suggested above as the most suitable rendering for הוֹדָה in its liturgical sense, 'thanksgiving' might be adopted for תּוֹדָה, and 'praise' retained for תְּהִלָּה.

3. In two instances, Jg 5^{2} and Ps 72^{15}, where AV has 'praise,' RV substitutes 'bless,' which is the more exact rendering of ברך, the verb employed (LXX in both *εὐλογεῖν*).

4. זמר, only in Piel. According to Hupfeld (*Psalmen*, 1862, iv. 421 f.), the original reference of this root* (which in the Heb. literature known to us is used either of playing or singing [cf. Lat. *canere*]) is to the *hum* of a stringed instrument, and מִזְמוֹר, used in 57 titles as a designation of psalms, would be, properly, a song *sung to a musical accompaniment.* It is this word מִזְמוֹר which the LXX reproduces by *ψαλμός* (whence *psalm*) from *ψάλλω*, the usual LXX equivalent for זמר, and in Cod. Alex. (A) the Book of Psalms is entitled *ψαλτήριον* (whence *Psalter*). The word זמר, with two exceptions (Jg 5^{3}, in the Song of Deborah, 'I will sing praise [*ψαλῶ*] to the LORD,' ‖ שִׁיר; and Is 12^{5} 'sing [*ὑμνήσατε*] unto the LORD, for He hath done excellent things') is confined to the Book of Psalms, where it occurs in the following collocations: (*a*) with לְ and אֱלֹהִים or יהוה, usually rendered in EV by 'sing praise(s) unto'; LXX in this and in all the following constructions, unless otherwise noted, *ψάλλειν*: Ps 27^{6} 101^{1} 104^{33} 105^{2}=1 Ch 16^{6} (*ὑμνεῖν*) [in all these ‖ שִׁיר] 9^{12} 30^{5} [both ‖ הודה] 47^{6} ('to our king') 66^{4} $71^{22\mathrm{f.}}$ ('to Thee,' ‖ אוֹדְךָ) 75^{10} (‖ הִגִּיד) 146^{2} (‖ הִלֵּל); once אֶל־ instead of לְ, Ps 59^{18} 'unto Thee, O my strength, will I sing praises'; or with לְשֵׁם 'to the name of God': Ps 18^{50}=2 S 22^{50} (‖ אוֹדְךָ) 92^{2} (‖ לְהוֹדוֹת) 135^{3} (‖ הללויה);—(*b*) with an object, either a pronominal suffix, 'sing Thee,' 'praise Thee in song': Ps 30^{13} 57^{10} 108^{4} 138^{1} (all ‖ אוֹדְךָ); or an accusative, God or the Lord: Ps 47^{7} 68^{33} (‖ שִׁיר) 147^{1}; His name: 7^{18} (‖ אודה) 9^{3} 61^{9} 66^{4} 68^{5} (‖ שִׁיר); the glory of His name: 66^{2}; His power (גְּבוּרָה): 21^{14} (‖ שִׁיר); once the accusative of the song: 47^{8} (זַמְּרוּ מַשְׂכִּיל 'make ye melody with a skilful strain,' LXX *ψάλατε συνετῶς*);—(*c*) absolutely: 57^{8} (‖ שִׁיר) 98^{4} (‖ רוע, פצח, רנן) 108^{2} (‖ שִׁיר). Instrumental accompaniment to the song appears in 108^{3}, and the word is used directly of playing upon an instrument in 33^{2} 71^{22} 98^{5} 144^{9} 147^{7} 149^{3}.

Two nouns (besides מִזְמוֹר) from the root זמר are found in the OT.—(1) זִמְרָה, which is used of instrumental music in Am 5^{23}, where 'the melody of thy harps' (זִמְרַת נְבָלֶיךָ, *ψαλμὸν ὀργάνων σου*) is ‖ 'the noise of thy songs' (הֲמוֹן שִׁרֶיךָ, *ἦχον ᾠδῶν σου*); but of singing in Is 51^{3} (תּוֹדָה וְקוֹל זִמְרָה, *ἐξομολόγησιν καὶ φωνὴν αἰνέσεως*), and prob. in Ps 81^{3} (שְׂאוּ־זִמְרָה 'take up the melody,' *λάβετε ψαλμόν*) and 98^{5} (קוֹל זִמְרָה 'the voice of melody,' *φωνῇ ψαλμοῦ*). In both the last instances, however, there is, in any case, an instrumental accompaniment implied.—Like תְּהִלָּה and הוֹדָה (see above), זִמְרָה is used also for the *subject* of song: Ex 15^{2}, Is 12^{2}, Ps 118^{14} עָזִּי וְזִמְרָת(י) יָהּ 'Jahweh is my strength and my [theme of] melody.' It may be noted that while MT is exactly the same in all three passages, LXX reads in Exodus [*ὁ* Κύριος] *βοηθὸς καὶ σκεπαστής*, in Isaiah *ἡ δόξα μου καὶ ἡ αἴνεσίς μου* Κύριος, in Psalms *ἰσχύς μου*

---

* Its relation, if any, to זמר Qal='trim *or* prune' is obscure (see Hupfeld, *Psalmen*, *loc. cit. supra*, footnote). It is uncertain whether in Ca 2^{12} עֵת הַזָּמִיר means 'the time of the singing (of birds)' or 'the time of the pruning (of vines).' The LXX (*καιρὸς τῆς τομῆς*) and other versions take the latter view.

καὶ ὕμνησίς μου ὁ Κύριος.—(2) A by-form of the same word is זָמִיר. Its occurrences are: 2 S 23^{1} [in the epithet applied to David נְעִים זְמִרוֹת יִשְׂרָאֵל, AV and RV 'the sweet psalmist of Israel,' RVm 'pleasant in the psalms of Israel'; on the construction see Driver on 2 S 8^{10}. H. P. Smith, who renders 'the Joy of the songs of Israel' (cf. Cheyne, *OP* 22, 'the darling of Israel's songs'), thinks the translation 'the sweet singer of Israel' can hardly be obtained from the Heb. expression. The LXX has *εὐπρεπεῖς ψαλμοὶ* Ἰσραήλ]; Job 35^{10} ['none saith, Where is God my Maker, who giveth songs in the night'?, *i.e.* perhaps (Dillm., Dav.; differently Duhm), who by sudden acts of deliverance gives occasion for songs of triumph in the midst of the night of trial; LXX, reading or interpreting differently, *ὁ κατατάσσων φυλακὰς νυκτερινάς*]; Is 24^{16} ['from the uttermost parts of the earth have we heard songs (LXX *τέρατα*), Glory to the righteous']; Is 25^{5} ['the melody of the terrible ones' (זְמִיר עָרִיצִים) ‖ 'the noise of strangers' (שְׁאוֹן זָרִים; both wanting in LXX), *i.e.* their hostile song of triumph, 'shall be brought low']; Ps 95^{2} ['let us shout unto Him with melodies' (בִּזְמִרוֹת נָרִיעַ לוֹ; LXX *ἐν ψαλμοῖς ἀλαλάξωμεν αὐτῷ*) ‖ 'let us come to meet His face with thanksgiving' (נְקַדְּמָה פָנָיו בְּתוֹדָה; LXX *προφθάσωμεν τὸ πρόσωπον αὐτοῦ ἐν ἐξομολογήσει*)]; 119^{54} ['Thy statutes have been (the subject of) melodies to me' (זְמִרוֹת הָיוּ־לִי חֻקֶּיךָ; LXX *ψαλτὰ ἦσάν μοι τὰ δικαιώματά σου*)].

AV and RV usually render the verb זמר by 'sing praises.' For the nouns זִמְרָה and זָמִיר they give 'song,' except in Is 51^{3}, Am 5^{23} where both have 'melody,' Ps 81^{3} 95^{2} where both have 'psalm,' and Ps 98^{5} where RV has 'melody' and AV 'psalm' (for 2 S 23^{1} see above). Driver (*Par. Psalter*) consistently renders the verb throughout the Psalms by 'make melody,' and the nouns by 'melody,' and probably no closer equivalents in English could be found for the Hebrew terms.

5. שבח in Piel and Hithp. only; a late word, confined to Psalms (4 t.) and Ecclesiastes (once). Its Aram. form is found in Daniel (see below). It is doubtful whether it should be connected with שבח (Piel and Hiphil)='to still *or* calm' (in Pr 29^{11} of anger, in Ps 65^{8} 89^{10} of the sea). Gesenius would find the connecting link in the notion of *stroking* or *smoothing*, hence 'to soothe with praises' (cf. the expression used of prayer, חלה אֶת־פְּנֵי פ׳ 'to make the face of any one sweet *or* pleasant'). Its occurrences are: Ps 63^{4} ['my lips shall praise Thee' (LXX *ἐπαινεῖν*) ‖ 'I will bless Thee' (אֲבָרֶכְךָ) and 'I will lift up my hands' (אֶשָּׂא כַפָּי)] 117^{1} (ℵ *αἰνεῖν*, A *ἐπαινεῖν*) 147^{12} (*αἰνεῖν*; both ‖ הלל) 145^{4} (B *ἐπαινεῖν*, A* *αἰνεῖν*; ‖ הגיד), Ec 4^{2} (*ἐπαινεῖν*; 'I praised the dead which are already dead'), Dn 2^{23} (*αἰνεῖν*; ‖ הודה, of Daniel praising God when the secret of Nebuchadnezzar's dream had been revealed to him) 4$^{34. 37}$ (*αἰνεῖν*; in v.^{34} ‖ ברך 'bless' and הדר 'honour'; in v.^{37} ‖ רומם 'extol' and הדר; of Nebuchadnezzar praising God after the restoration of his reason) 5$^{4. 23}$ (Theod. in both *αἰνεῖν*, so LXX in v.^{23}, but in v.^{4} *εὐλογεῖν*; of Belshazzar and his guests praising the gods of gold and silver, etc.).—The Hithp. = 'make the subject of praise *or* boast' occurs in Ps 106^{47}=1 Ch 16^{35} (לְהִשְׁתַּבֵּחַ בִּתְהִלָּתֶךָ 'that we may make our boast of Thy praise'; LXX in Psalms *τοῦ ἐνκαυχᾶσθαι ἐν τῇ αἰνέσει σου*, in 1 Chronicles *καὶ καυχᾶσθαι ἐν ταῖς αἰνέσεσίν σου*).

The verb שבח in Piel is everywhere rendered in AV 'praise,' and so in RV except in Ps 117^{1} [but not, inconsistently enough, 147^{12}] 145^{4}, where we have 'laud.' This last term, which is that employed in Driver's *Par. Psalter*, might, with advantage, be adopted uniformly, at least in the Psalms, where there are so many words that receive in the English versions the one rendering 'praise.' See art. LAUD.

ii. HISTORY OF PRAISE IN ISRAEL.—Like sacrifice and other branches of the cultus, the praise offered to Jahweh had in early times a more unconventional and spontaneous character than it afterwards assumed, especially in the second Temple. From the first, both vocal and instrumental music were employed in this exercise, of which heartiness and loud noise (cf. the meaning of *tĕhillāh* above) were leading characteristics. A typical example is the song of the children of Israel after the passage of the Red Sea (Ex 15), which, although in its present form it contains much that belongs to a later age, yet is undoubtedly to some extent archaic, while the description of the part played by Miriam and the women, with their timbrels and dances (v.$^{20f.}$), may be regarded as a true picture of the manners in ancient Israel (cf. also the Song of Deborah in Jg 5, one of the most ancient of the undoubtedly genuine relics of early Heb. poetry). So in 2 S 6^{5} (=1 Ch 13^{8}) 'David and all the house of Israel played before the LORD with all their might, even with songs [reading, with 1 Ch 13^{8}, בְּכָל־עֹז וּבְשִׁירִים for בְּכָל־עֲצֵי בְרוֹשִׁים of 2 S 6^{5}, cf. the same phrase בְּכָל־עֹז used in v.^{14} of David's dancing] and with harps and with psalteries, and with timbrels, and with castanets, and with cymbals.' In short, praise to God, whether upon the occasion of any great act of deliverance, or when the people assembled at the sanctuaries either of the Northern or the Southern kingdom, partook largely of the noisy character of vintage and bridal rejoicings (Jg 9^{27}, Lv 19^{24}, Ps 78^{63}). When the prophet Amos denounces the crass unspiritual worship of his day, he delivers this message from Jahweh, 'Take thou away from Me the noise of thy songs, for I will not hear the melody of thy harps' (Am 5^{23}, cf. 8^{10}). Isaiah promises to the people, 'Ye shall have a song as in the night when a holy feast is kept, and gladness of heart as when one goeth with a pipe to come unto the mountain of the LORD, to the Rock of Israel' (Is 30^{29}). The author of La 2^{7} can say of the rude plundering Chaldæan soldiery in the temple, 'They have made a noise in the house of the LORD as in the day of a solemn assembly.' The same impression is conveyed by some of the phrases which occur in the musical titles of the *earlier* psalms. For instance, Ps 57. 58. 59. 75 are set to the tune of *Al-tashḥeth*, 'destroy not,' probably the opening words of a vintage song (Is 65^{8}). Cf., further, on this point W. R. Smith, *OTJC*^{2} 209, 223 f.

We should have *individual* songs of praise in the Song of Hannah (1 S 2$^{1ff.}$) and the Song of Hezekiah (Is 38$^{10-20}$), were it not that neither of these can be supposed to have belonged originally to their present context (see on the former, Driver, *Text of Sam.* 21 f., and on the latter, Cheyne, *OP* 117 f., and cf. the analogous cases of the Prayer of Jonah and the Psalm of Habakkuk).

As to the arrangements for praise in the pre-exilic Temple, we have no precise information. In particular, we are left very much in the dark as to how far any *special class* performed or directed this service. The statements on this subject contained in the Books of Chronicles are unfortunately of little use, owing to the tendency of the Chronicler to antedate the institutions of his own day. But while it will be generally admitted that the part he attributes to David is greatly exaggerated, it is probable enough that this king, whose skill as a musician is witnessed to in Am 6^{5}, as well as in 2 S 6$^{5. 14}$, used his talents in organizing the Temple music, whether he furnished to any appreciable extent the hymns used or not. It is undoubtedly the case that, down to the Exile, praise was the privilege of the congregation at large (Cheyne, *OP* 194), but this is not inconsistent with at least the rudiments of the elaborate system which we meet with in Chronicles having been in existence in pre-exilic times. It is hardly likely that the singers, who are first expressly named in Neh 7^{44} (=Ezr 2^{41}), and of whom 148 (128) returned, or were believed to have returned, with Zerubbabel, represent a class that had been instituted during the Exile, when no elaborate cultus was possible, or during the early years of the Return, when the circumstances were by no means favourable to such a new departure. It seems more reasonable to conclude that they were the representatives or descendants of singers who had performed this office in the pre-exilic Temple (see art. PRIESTS AND LEVITES, p. 74^{b}). But it is equally beyond question that after the Return the whole system of praise was re-organized by Ezra and Nehemiah.

At the Return the singers appear to have formed a single guild, 'the sons of Asaph'* (Neh 7^{44}=Ezr 2^{41}), and are distinguished from the Levites (Ezr $10^{23f.}$, Neh $7^{1.73}$. In Neh $12^{27f.}$ the musical service at the dedication of the wall is divided between the Levites and 'the sons of the singers'). Such passages as Neh $11^{15-19.\ 22.\ 23}$ $12^{8.\ 9.\ 24.\ 25}$, where the singers are included among the Levites, do not belong to the Memoirs of Nehemiah, at least in a pure form, and their account approximates to the condition of things represented in 1 Ch $15^{16ff.}$ 23^{3-5}, 2 Ch 29^{25} etc. (cf. Ezr 3^{10}, where 'the Levites the sons of Asaph' is the phrase of the Chronicler). The guild of Asaph at a later period shared the musical service with the Korahites (cf. 2 Ch 20^{19} and the titles of Ps 42–49 and 84. 85. 87. 88), who, by the time of the Chronicler, have become porters and doorkeepers (1 Ch 9^{19} $26^{1.\ 19}$ etc.). The Chronicler himself is acquainted with three guilds,—HEMAN, ASAPH, and JEDUTHUN or ETHAN (1 Ch $6^{33.\ 39.\ 44}$ 15^{17} $16^{41f.}$ $25^{1ff.}$), to whom a Levitical origin is attributed, Heman being descended from Kohath, Asaph from Gershom, and Ethan from Merari (1 Ch 6^{33-47}). These three the Chronicler characteristically represents as choirmasters appointed by David, to whom the whole organization of the service of praise is attributed, and who is said to have divided the singers into 24 courses (1 Ch $6^{31ff.}$ 15^{16-19} 16^{4} $25^{1ff.}$, 2 Ch 5^{12} 29^{25}, cf. Sir 47^{9}).

When we pass to the question of the use of a hymnal or similar forms in the Temple service, we encounter fresh uncertainties. Whatever view be taken of the contents of the Psalter (and there is a growing tendency to increase the proportion not only of post-exilic but of Maccabæan psalms), it will be generally admitted that, in its present form, the whole collection bears marks of having been intended for use in the *second* Temple. To what extent it may contain older (possibly even Davidic) psalms, which have been adapted for later congregational use, to what extent Nehemiah found the work of collecting already done for him, and how far a later hand, say that of Simon the Maccabee (Cheyne, *OP* 12 and *passim*), is responsible for the book as we now have it, are questions that cannot be said to be yet finally decided. Even so cautious a scholar as W. R. Smith was inclined to think that certain 'facts seem to indicate that even Book I. of the Psalter did not exist during the Exile, when the editing of the historical books was completed, and that in psalmody as in other matters the ritual of the second Temple was completely reconstructed' (*OTJC*^{2} 219). 'It would be absurd to maintain that there were no psalms before the Exile. But it is not absurd to question whether Temple-hymns can have greatly resembled those in the Psalter' (Cheyne, *OP* 213 f.).

It is a fair question whether praise was not offered in the SYNAGOGUE as well as in the Temple. This is usually denied (see Gibson, *Expositor*, July 1890, pp. 25–27, and cf. Schürer, *HJP* II. ii. 76, where the parts of the Synagogue service are enumerated), but Cheyne (*OP* 12, 14, 363) urges forcible considerations in favour of a different conclusion. There is all the less difficulty in conceiving of the Psalter as a manual of praise in the Synagogue when we observe that, even in post-exilic times, praise might be offered at other times and places than public worship. Thus, not only was Ps 118 sung in the Temple on high festival days (as on the eight successive days of the Feast of Booths and that of the Dedication), but the *Hallel* (Ps 113–118), of which it forms a part, was sung in two sections (113. 114. and 115–118) in every dwelling-place where the Passover was celebrated. It is to the singing of the second part of the *Hallel* over the fourth and last cup that the ὑμνήσαντες of Mt 26^{30}, Mk 14^{26} refers. Again, the 'Songs of the Ascents' (Ps 120–134) are perhaps most plausibly explained as 'Songs of the Pilgrimages,' *i.e.* songs with which the caravans of pilgrims enlivened their journey to the stated festivals. See, further, Duhm, 'Psalmen' (*Hdcom.*), p. xxiv.

How far in post-exilic times the general body of the people took part in the public service of praise is not clear, but the analogy of other parts of the ritual suggests that they participated in it to a very limited extent. In Sir $50^{16ff.}$ (referring to the time of Simon the high priest) the people 'fell down upon the earth on their faces to worship the Lord' and 'besought the Lord Most High in *prayer*' (cf. Lk 1^{10}, Ac 3^{1}). It is of *the sons of Aaron* that it is said that they 'shouted and sounded the trumpets of beaten work,' while '*the singers* also praised him with their voices.' This corresponds closely with 2 Ch 7^{3} 'all the people . . . bowed themselves with their faces to the ground upon the pavement and worshipped and gave thanks unto the LORD (וַיִּשְׁתַּחֲווּ וְהוֹדוֹת לַיהוה, *καὶ προσεκύνησαν καὶ ᾖνουν τῷ Κυρίῳ*), saying, For he is good, for his mercy endureth for ever.' Even this last formula appears to be in this instance not so much the language of praise as of *prayer*. A similar remark applies to 1 Mac 4^{55} 'all the people fell upon their faces and worshipped and gave praise (ηὐλόγησεν) unto heaven, which had given them good success.' So in 2 Ch 29^{28} '*all the congregation worshipped*, and *the singers sang*, and the trumpets sounded' (on all these passages see Büchler, as cited in the Literature below). On the other hand, that some part in the service of praise was taken by the people is clear from such a liturgical direction as 'let all the people say Amen, Hallelujah' (Ps 106^{48}, cf. 1 Ch 16^{36}, where the citation of this Psalm is followed by the affirmation, 'and all the people said Amen, and praised the Lord'). Moreover, it is extremely probable that, in antiphonal psalms like Ps 118, the congregation as well as the Levitical choirs took part. Büchler (*ZATW* xix. [1899] p. 103 n.) will have it that the call in Ps 150^{3} 'praise him with the sound of the trumpet' (*shôphār*, 'horn,' mainly a secular instrument, whereas the official sacred trumpet is *ḥăzôẓĕrāh*, cf. Driver, *Joel and Amos*, p. 144 f.) is addressed not to the Levites but to the congregation. He compares Ps $81^{3f.}$, and Jth $16^{1ff.}$ where Judith leads off and all the people take up the song.

Many psalms, *e.g.* 95. 96. 98. 99. 100, not to speak of the Hallelujah psalms (which are all post-exilic), were evidently composed from the first for liturgical use, and others may have been transformed from a more private and individual use to be the expression of the church-nation's praise. It is of course only to a limited extent that the Talmudic accounts of the service of praise in the Temple can be accepted as correct even for the closing period of OT history, but there is good reason to believe that the list given in *Tamid* (vii. 4) of the psalms that were sung on each day of the week, at the morning sacrifice, is an ancient one. These psalms were as follows: Sunday 24 (B *τῆς μιᾶς σαββάτων*), Monday 48 (B *δευτέρᾳ σαββάτου*), Tuesday 82, Wednesday 94 (B *τετράδι σαββάτων*), Thursday 81, Friday 93 (B *εἰς τὴν ἡμέραν τοῦ προσαββάτου ὅτε κατῴκισται ἡ γῆ*), Sabbath 92 (Heb. שִׁיר לְיוֹם הַשַּׁבָּת, B *εἰς τὴν ἡμέραν τοῦ σαββάτου*). See, further, Neubauer, *Stud. Bibl.* ii. 1 ff. The singing and playing of the Levites on these occasions was accompanied by the blowing of silver trumpets (*ḥăẓôẓĕrôth*) by two priests (cf. Nu 10$^{1-10}$, Ezr 3^{10}, Neh 12^{35}, 1 Ch 15^{24} 16^{6}, 2 Ch 5^{12} 7^{6} 29$^{26-28}$, Sir 50^{16}).

---

* This guild gives its name to one of the collections in the Psalter, consisting of Ps 50 and 73–83.

LITERATURE.—On the Heb. terms see the *Oxf. Heb. Lex.*, to which the first part of the present article has very special obligations. On the history, etc., of praise: Büchler, 'zur Gesch. d. Tempelmusik u. d. Tempelpsalmen,' in *ZATW* XIX. [1899] i. 96 ff., ii. 329 ff., xx. i. 97 ff.; Köberle, *Die Tempelsänger im AT*, 1899; Cheyne, *OP*, 1889, *passim*; W. R. Smith, *OTJC*^{2}, 1892, esp. pp. 190–225; Van Hoonacker, *Le sacerdoce lévitique*, 1899, *passim*; Nowack, *Lehrb. d. Heb. Arch.*, 1894, i. 271 f.; Schürer, *GJV*^{3}, 1898, ii. 240 ff., 293 ff. [*HJP* II. i. 225 ff., 290 ff.]; and the Commentaries on the Psalms.

J. A. SELBIE.

PRAISE IN NT.—Praise (*αἶνος, ἔπαινος* (1 P 2^{14}=תְּהִלָּה), *αἴνεσις, δόξα, ἀρετή, αἰνεῖν, ἐπαινεῖν, δοξάζειν*) plays a large part in the NT, both the praise of God by angels and by men, and the praise of man by God and his fellow-man.

i. The praise of God is the work of the angels (Lk 2$^{13.14.20}$ 19^{38}), and also of man. The chief object of the existence of the redeemed is to show forth the praises of Him who called them out of darkness into light (1 P 2^{10}): Gentiles join now in the work of praise (Ro 15$^{9-11}$); and all, Jew and Gentile alike, exist to the praise of the glory of His grace (Eph 1$^{3-14}$, Ph 1^{11}, 2 Th 1^{10}, 1 P 2^{12}): Christians offer their sacrifice of praise to God (He 13^{15}): universal praise will be the characteristic of the last day (Rev 19^{8}): whereas failure to give God praise for His mercies is the note of heathenism (Ro 1^{21}, Rev 11^{17} 14^{7} 16^{9}, cf. Ac 11^{23}). The *subjects* of praise are God's intrinsic excellences (*ἀρετάς*, 1 P 2^{10}, where see Hort); His universal gifts of creation, of providence, of redemption (Rev 15$^{3.4}$, Ac 2^{44} and *passim*); His promises to individuals (Ro 4^{20}); His blessings to individuals, especially for the miracles of our Lord's lifetime (Lk 18^{43} 19^{37}, cf. 2 Co 1^{3}). One idiomatic phrase in the mouth of the 'Jews' *δὸς δόξαν τῷ θεῷ* (Jn 9^{24} 'Give God the praise' AV, 'Give glory to God' RV) is remarkable, meaning, 'Confess thy sins' (cf. Joshua's words to Achan in Jos 7^{19}), and implying that truthful confession of the real facts of life brings glory to God.

The *tone* of praise to God is specially marked in the Gospel of St. Luke, the Acts, the Ep. to the Ephesians, and the Apocalypse. It finds its expression in semi-rhythmical language and formal hymns (see HYMN), and also in doxologies. The latter were primarily liturgical (cf. 2 Co 1^{20} *δι' αὐτοῦ τὸ Ἀμὴν τῷ θεῷ πρὸς δόξαν δι' ἡμῶν*), and are adaptations from existing Jewish liturgies. The fountainhead of them may perhaps be traced to 1 Ch 29^{10}, from which originated two types—(*a*) beginning with the word 'Blessed' (*εὐλογητός*, *i.e.* blessworthy, worthy of receiving blessing), implying 'an intelligent recognition of His abiding goodness, as made known in His past or present acts,' Lk 1^{68}, 2 Co 1^{3} 11^{31}, Ro 1^{25} 9^{5}, Eph 1^{3} (where see Lightfoot), 1 P 1^{3} (where see Hort); (*b*) ascribing to God glory (power, might, dominion) for ever. This is the commoner type in the NT and in subsequent Christian liturgies: the simplest form *ᾧ ἡ δόξα εἰς τοὺς αἰῶνας· ἀμήν* (Ro 11^{36}) is varied by the several writers to suit the exact context (Gal 1^{3}, Ro 16^{27}, Ph 4^{20}, Eph 3^{21}, 1 Ti 1^{17} 6^{16}, 2 Ti 4^{18}, He 13^{21} [see Westcott, Additional Note], 1 P 4^{11} 5^{11}, 2 P 3^{18}, Jude ^{25}, Rev 1^{6} 5^{13} 7^{12}), and it left its ultimate mark on the Lord's Prayer in the addition of the doxology, perhaps originally made when that prayer was used in Eucharistic worship (Chase, *The Lord's Prayer in the Early Church*, 'Texts and Studies,' I. iii. pp. 168–174).

On praise as a part of public worship, see art. CHURCH in vol. i. p. 428^{a}, art. HYMN in vol. ii., and cf. the preceding article.

ii. 'The idea of man as praised by God is not distinctly recognized in the OT' (Hort on 1 P 1^{7}). There God is spoken of as well pleased with men; but the NT goes beyond this in the word 'praise,' which implies not only moral approbation, but the public expression of it. The difference may have arisen from our Lord's life; He had moved about among men, accepting praise and homage where it was simple and genuine (Mt 21^{16}); giving His own praise without stint to John the Baptist (Mt 11^{11}), to all acts of faith (Mt 8^{10} 9^{22} 15^{28} 16^{8}, Lk 7^{9}), to good and loyal service (Mt 25$^{21.23}$, Lk 19^{17}), to all generosity of gift (Mk 12^{43} 14^{6}), to self-devotion (Lk 10^{41}), to prudence (Lk 16^{8}). Hence the ascended Lord is represented as sending His messages of praise as well as of blame to the Seven Churches of Asia (Rev 1^{4}); and the praise of God is the ultimate verdict to which Christians appeal (1 P 1^{7}), which will correct hasty judgments of men, and be the true praise exactly appropriate to each man's actions (1 Co 4$^{1-5}$ *ὁ ἔπαινος*): the true Jew, who bears rightly the name of Judah (='praised'), is he whose praise comes from God not from men (Ro 2^{29}, where see Gifford in '*Speaker's' Com.*).

The praise of man *by his fellow-men* is naturally of more doubtful value. On the one hand it is liable to be unreal, shallow, flattering, and to lead to a false self-satisfaction; our Lord avoided the shallow praise of the crowds, and of individuals who did not weigh the meaning of their words (Lk 18^{19}); He warned His followers against the desire for such praise (Mt 6^{1}, Lk 6^{26}); He traced the rejection of the truth by the Pharisees to the fact that they sought honour from each other, and did not seek the honour that comes from the only God (Jn 5$^{41-44}$, cf. 12^{43}): St. Paul refused to seek glory from men (1 Th 2^{6}), and was ever on his guard against pleasing men (Gal 1^{10}).

On the other hand, St. Paul appeals to the consideration of any praise of men as a proper incentive to Christians (*εἴ τις ἔπαινος*, Ph 4^{8}): the proper function of human government is the praise of well-doers (Ro 13^{3}, 1 P 2^{14}): St. Paul praises whole Churches for their virtues (1 Co 11^{2} and *passim*): he lavishes the highest praises on each of his fellow-workers (1 Co 4^{17} and *passim*): their praise runs through all the Churches (2 Co 8^{18}): his aim is, and that of all Christians should be, to provide things honest in the sight of men as well as of God (2 Co 8^{21}, Ro 12^{17}). Praise of men is treated as a danger when it stands in antithesis to the praise of God; but when it reflects the praise of God in the mirror of the Christian's conscience, it is a welcome incentive to good.

W. LOCK.

PRAYER.—An attempt will be made to treat the subject historically, keeping separate the evidence supplied by different portions of the Bible as to human practice and Divine teaching on the subject of Prayer. With regard to the OT, it will be assumed, for the purpose of the article, that the books which it contains, whatever their respective dates may be, are on the whole trustworthy guides as to the religious beliefs and practices of the periods which they describe.*

---

* It can scarcely be denied, however, that a writer like the Chronicler is apt to antedate the beliefs and practices of his own age.

I. IN THE OLD TESTAMENT.—i. *Prefatory.*—It will first be necessary to limit the subject of inquiry. Prayer (תְּפִלָּה) may be understood widely, so as to include every form of address from man to God, whatever its character. Hannah's song (1 S 2) is a thanksgiving, yet it is introduced by the words 'Hannah prayed and said,' and the prayer of Hab 3 is a psalm. But address by way of petition must form the main subject of this article, though it is impossible to isolate this division of prayer, see, *e.g.*, Is 63^{7}–64^{12}, where praise, thanksgiving, pleading, confession, and supplication are blended.

Certain axioms with regard to prayer are taken for granted, viz. (1) God hears prayer; (2) God is moved by prayer; (3) prayer may be not merely a request, but a pleading, or even an expostulation. It may here be added that OT prayer is little occupied with what becomes the main subject of prayer in NT, viz. spiritual and moral needs. This remark, however, applies only partially to the Psalms.

The terms for 'prayer' must next be considered. The verbs are: 1. קָרָא בְּשֵׁם (Gn 4^{26}, where see Dillmann's note), or simply קָרָא; this is the oldest and simplest phrase. It is perpetuated in NT (ἐπικαλεῖσθαι τὸ ὄνομα, Ac 2^{21} 9^{14} *al.*). The correlative word is עָנָה 'answer' (sometimes wrongly, *e.g.* Hos $2^{21.\,23}$, tr. 'hear'), Gn 35^{3} and Psalms, *passim.* It signifies an answer either by external or spiritual help, or by inward assurance. 2. הִתְפַּלֵּל primarily of intercessory prayer, Gn 20^{7}, Job 42^{10}, but also of prayer generally, 1 S 1^{27} and elsewhere. From this verb comes the common name for prayer in its widest sense, תְּפִלָּה, noticed above. 3. פָּגַע, lit. 'to fall upon,' so 'to approach' in order to supplicate. See Is 53^{12}, where the 'approaching' is on behalf of others, and cf. ἐντυγχάνειν in NT. 4. שָׁאַל 'to ask' (α) for some grace or deliverance, (β) for information or guidance. The correlative is again עָנָה 1 S 28^{6}. 5. חִלָּה אֶת־פְּנֵי י״ Ex 32^{11}, an anthropomorphic phrase ('make the face sweet *or* pleasant'), never literally tr. in AV, but rendered 'beseech,' etc. 6. זָעַק 'cry,' used of those who pray for the redressing of a wrong.

Another detached point may be taken before entering on the historical treatment, viz.—

Postures in Prayer.—(1) *Standing.* This was the commonest attitude, *e.g.* Abraham, Gn 18^{22}; Hannah, 1 S 1^{26}. It continues in NT times (but cf. below on Acts); and in Jewish usage the *Shemoneh Esreh* had the name of *Amidah* (standing), because the congregation stood during their recital.

(2) *Kneeling*, Ps 95^{6}; Solomon, 1 K 8^{54}; Daniel, Dn 6^{10}; see, further, art. KNEEL.

(3) *Prostration, i.e.* kneeling with face bent to the ground in case of urgency, Nu 16^{45}, 1 K 18^{42} (and in NT Mt 26^{39}).

(4) *Sitting*, 2 S 7^{18}, a doubtful instance (but see H. P. Smith, *ad loc.*). In addition to these postures of the body the attitude of the hands should be noticed. These were: (1) *lifted*, Ps 63^{4} (cf. 1 Ti 2^{8}), and (2) *spread out, i.e.* with open upturned palms symbolical of the act of receiving from God, Ex 9^{29}, Is 1^{15}.

ii. *Patriarchal Religion.*—Leaving these prefatory matters, we come to prayer as it appears in patriarchal religion. 'Then began men to call upon the name of the LORD' (Gn 4^{26}). This first notice is of real importance. There had been abundant consciousness of God before, but tradition fixed the commencement of habitual prayer at the beginning of the third generation. Thence we pass over a long interval to Abraham, and enter with him into the fullest and freest exercise of prayer. (1) His prayer is dialogue. It consists not merely in man drawing near to God, but God to man, inviting it and disclosing His purposes. The same thing occurs in the case of Moses, and something of the kind is supposed in certain psalms, where God Himself speaks, *e.g.* Ps 91. (2) Intercession is prominent in patriarchal prayer, Gn 17^{18} 18^{23-32} 20^{7}; cf. below on prophets as intercessors. (3) There are also personal prayers: Gn 15^{2}, a prayer for a son; Gn 24^{12}, Eliezer's on his journey; more prominent still in Jacob's life. Jacob's first prayer was a vow, Gn 28^{20}; his prayer in Gn 32^{9-12} is in fear of Esau; his wrestling with the angel (32^{24}) is described in Hos 12 ('made supplication') as involving prayer. (4) Patriarchal blessings are prayers. When man blesses man, it is (*a*) primarily a vision of the Divine purpose for the person blessed and a declaration of it; it is prophetic (*e.g.* Gn 49^{1}), but it is (*b*) also a prayer. This is especially clear in a blessing attributed to the next period, Dt 33, *e.g.* v.^{11}. As blessing is partly prayer, so also is cursing, as will be seen in considering the imprecatory psalms; cf. also Neh 13^{29}; Sir 4^{6}, where the curse is called a supplication. (5) The oath in Gn 14^{22} ('I have lift up mine hand') is a kind of prayer, being an imprecation, not on another, but on the speaker in case of his failing in his intention. The phrase becomes so fixed in common use that without regard to its original meaning it is even used of God Himself, Ezk 36^{7}. (6) The vow. See art. VOW.

iii. *The Law.*—The evidence of the Law as to prayer is negative. With one exception (Dt 26^{1-15}), there is nothing about prayer in the Law. There is no ordinance as to the employment of the formulæ (or charms) common in the ritual of other nations. This did not tend to the undervaluing of prayer, but rather kept it in its proper place. It is not recognized as a means of doing service, but it is left to be a spontaneous expression of human needs. The lasting effect of this negative teaching may be seen in *Berakhoth* iv. 4. If prayers are said only to fulfil a duty (as a charge), they will not be heard by God. But to return to the exception, the formulæ of worship in Dt 26. Even these are not strictly prayers, vv.$^{5-11}$ are a thanksgiving, vv.$^{13.\,14}$ a profession of past obedience, and v.^{15} alone contains supplication. Vv.$^{13.\,14}$ are strangely like the so-called prayer of the Pharisee in Lk $18^{11.\,12}$. There also is the claim of past obedience, and in respect to the same point, viz. the payment of tithe (the hallowed things). But we cannot doubt that private prayer was habitually connected with sacrifice from early times. Instances are spread over the OT, *e.g.* Abraham (Gn 12^{8}), Solomon (1 K $3^{4.\,5}$), Job (42^{8}). There remains for consideration the typical character of incense. Incense (see INCENSE) was taken up into Hebrew usage from the stock of primitive religious customs among the nations around, and was originally an anthropomorphic form of propitiation by sweet odours (cf. Dn 2^{46}). But as time went on it was regarded as typical of prayer and associated with it. See Ps 141^{2}, and in NT Lk 1^{10}, Rev 5^{8} 8^{3}. But if the Law teaches nothing about prayer, the lawgiver teaches much. No biblical life is fuller of prayer than that of Moses. The history of his call (Ex 3. 4) gives prayer in the form of 'colloquy' with God as noticed above. There are his private prayers in times of difficulty (Ex 5^{22}, Nu 11^{11-15}), and, above all, his frequent intercessory prayers (1) for Pharaoh to obtain relief from plagues; (2) for Israel in all the times of the murmuring and rebellion, *e.g.* Ex 32^{11-13}. What Moses did not lay on Israel as a precept he taught them by example, though it may be doubted whether access to God in prayer was not looked upon as the prerogative of a prophet.

iv. *The Period of the Kingdom.*—This may be taken next, though in the intermediate time Jos

7$^{6-9}$ 10^{14} and Jg 6 are to be noted, and the raising up of judges is almost always introduced by the phrase, ‘the children of Israel cried unto the Lord.’ Samuel next appears to carry on the great intercessory tradition. In Jer 15^{1} Moses and Samuel stand together as chief representatives of this form of prayer. And the narrative justifies the Divine words. Twice over Samuel makes great efforts of intercession for the nation (1 S 7$^{5-12}$); and again in regard to their desire for a king throughout chs. 8 and 12. He testifies himself to his continuous pleading for them, and expresses his sense that it is part of the obligation of his prophetic office, ‘God forbid that I should sin against the Lord in ceasing to pray for you’ (1 S 12^{23}). Besides his national, there is also his personal intercession. The rejection of Saul grieved Samuel, and he cried unto the Lord all night, 15^{11}. And something of prayer is implied in the mourning for Saul, recorded in 15^{35} and 16^{1}. David, being himself regarded as a prophet, is represented as praying without an intercessor. This appears in 2 S 7$^{18-29}$. It is hardly necessary to prove that both the lesser and the greater prophets of the kingly period are regarded as intercessors. It is mainly in this character, as intercessor for a nation perishing by famine, that Elijah stands before us in the great drama of 1 K 18. And the test which is there applied to decide between Jehovah and Baal is, which of the two hears prayer. Intercession, as part of the prophetic function, will come out more clearly still when we deal with the prophets who have left writings; but there is a special interest in finding it in men of action, such as Samuel, Elijah, Isaiah, Jeremiah, and another leader who was not a prophet, namely, Nehemiah. Their prayer is not merely to put the matter in the Lord’s hand, but to strengthen themselves for action.

The Books of Samuel and Kings contain prayers which suggest the subject of the place of prayer. The ark denoted the local presence of God, and therefore the place of prayer. So Hannah (1 S 1) and David (2 S 7) resort thither. But as sacrifice is offered at ‘high places,’ prayer may be offered there also. So Samuel at Mizpah (1 S 7^{5}), and Solomon at Gibeon (1 K 3). When the temple is dedicated, it is as a house of prayer, if, notwithstanding its affinities to Deut., we may take 1 K 8 as in some degree representing the mind of the founder. If, however, the prayer belongs in form and spirit to another period, it is no less worthy of attention in two important respects. (1) At the dedication of the centre of a great sacrificial cultus, not a word is said in the prayer about the sacrifices, but only about prayer to be offered there, or ‘toward’ that ‘place.’ For prayer ‘toward’ a place, cf. Ps 28^{2}, Dn 6^{10}; and, even for Islam, Jerusalem was at first the Kibla. The temple is the house of prayer in Is 56^{7}; and it will be seen to have been so regarded in NT. (2) The other point to notice in Solomon’s prayer is the apparent conflict of two conceptions—that of some local habitation of God therein, and that of the impossibility of limiting His presence.—We have also two prayers attributed to Hezekiah—the first in Is 37$^{16-20}$, offered in the temple, a prayer for God’s glory in the spirit of Ps 115; the second (Is 38^{3}) a prayer for himself, recalling his righteousness in the spirit of Ps 26, yet none the less accepted.

v. *The Exile and Return.*—Ewald (*Hist. Isr.* (Eng. tr.) v. 23) has justly emphasized the importance assumed by prayer in this period. There were two main causes for this. (1) The necessary cessation of sacrifice after the destruction of the temple. This threw the burden of worship wholly on prayer. (2) A sense of abandonment by God, which produced earnestness in seeking for an explanation of His dealings, and a return of His favour. The evidence in support of Ewald’s assertion is twofold—(*a*) the great prayers extant from this period; (*b*) the personal habits of individuals recorded in the narrative. (*a*) *Great prayers extant.* First and greatest is Is 63^{7}–64^{12}. The prophet comes forward and ‘leads the devotions of the Church of the Exile.’ The prayer is remarkable as appealing to the Fatherhood of God, 63^{16} 64^{8}. The other four are, Ezr 9$^{5-15}$ chiefly confession; Neh 1; Levites’ prayer in Neh 9, in the form of historical retrospect (cf. Ps 106); Daniel’s confession, Dn 9. On these last four some general remarks may be made. Confession is prominent, acknowledgment of the sin of Israel and the righteousness of God. They are cast in the same model, and contain the same phrases. Fasting has become connected with prayer (cf. Zec 7^{5}). The confession in these prayers is representative confession, *e.g.* Nehemiah (Neh 1^{6}) takes the sins of Israel upon himself and confesses them as a whole. He is an intercessor, but he does not stand apart; he regards himself as involved in the guilt. (*b*) *Personal habits of individuals.* Ezra at the river Ahava (Ezr 8$^{21-23}$) relies on prayer for the safety of his expedition. As to Nehemiah, it is unnecessary to show in detail that constant prayer is the characteristic of his journal. It is his resource in difficulty and discouragement, and takes a distinctly personal character, ‘remember me, O my God.’ Again, Dn 6 is an illustration of how prayer to God had become a distinctive mark of the Jews in exile. In it the enemies of Daniel decide to find their opportunity, and on it base their attack. In this narrative (Dn 6^{10}) we first find unmistakable mention of the hours of prayer as afterwards practised by the Jews, though perhaps Ps 55^{17} may be taken to denote them. As is usually the case in ritual, an endeavour was made to find sanction for the three hours of prayer in the earliest times, and Gn 19^{27} 24^{63} 28^{11} were referred to by the Jews for this purpose.

vi. *The Prophets.*—‘The Latter Prophets,’ *i.e.* the prophetic writings, may now be considered as a whole, and without reference to date, in order to see what special characteristics are to be attributed to the prayers of prophets. It has already been seen that the latter were intercessors in virtue of their calling. The ground of this was twofold. The prophet was an acceptable person; but, further, he had the Spirit (*e.g.* Ezk 2^{2}), and the possession of it enabled him not only to interpret the mind of God to man, but also the mind of man to God (cf. Ro 8^{26}). The prophet thus knew what the needs of the nation were, much better than the nation itself. Intercession in the OT is not generally the duty of the priest. For an exception see Jl 2^{17}, Mal 1^{9}; and in Apocr. 1 Mac 7$^{36-38}$, when, of course, prophets had ceased to exist. Beyond this general intercessory function we may trace three special aspects of prayer in the prophetical writings, which may be illustrated almost exclusively from Jeremiah. (*a*) *Personal prayer.* In Jeremiah intermixed with and in reference to the difficulties and trials of his own mission (*e.g.* Jer 20). (*b*) *Seeking to know.* It is by prayer (in part, at least) that the prophet obtains the Divine revelations, Jer 33^{3} 42^{4} (where ten days pass before the answer is reported). (*c*) *Interceding to avert* present or predicted evil. See Am 7 and Jer 14. 15. The latter passage is an important example. In ch. 14 we have—(1) intercession, vv.$^{2-9}$; (2) answer forbidding intercession, $^{10-12}$; (3) renewed pleading in spite of prohibition; (4) renewed Divine threatenings, $^{14-16}$; (5) a wail from the prophet ending in fresh intercession, $^{17-22}$. To this again comes an answer (15$^{1-9}$) of final condemnation; but even this does not close the dialogue of prayer, which continues to 15^{21}. This record of intercession throws a light upon the inner life of the prophets, and their intimate relations with God, which we hardly find elsewhere in OT. The limits here set to intercession are an anticipation of 1 Jn 5^{16}. And the persistence of the prophet, although rejected, is nevertheless an inspired persistence.

vii. *Psalms, Proverbs, Job.* — Although the prayers in the Psalter exceed in amount and variety all other prayers in OT, yet they do not contribute to our study of the subject so much as they would do if the circumstances and persons from which they proceeded were known to us. Although the title 'Prayers of David' is implied in the subscription closing the second book (Ps 72^{20}), yet only one psalm in these two books (Ps 17) is entitled 'a prayer.' And in the whole Psalter only five (including Ps 17) are so described. *Tehillim* (praises), not *tephilloth* (prayers), is the recognized name of the book; but the latter would be almost as accurate a title as the former. Prayer in the Psalms will be considered under six heads. (1) Prayer is regarded in the Psalms as the *pouring out of the heart*, 42^4 62^8 102 (title) 142^2. Outside the Psalter, see 1 S 1^{15} and 7^6 compared with La 2^{19}. That which is poured out may be either the heart or its musing (שִׂיחַ, AV 'complaint'). In prayer the psalmist does not so much go before God with fixed orderly petition, as simply to pour out his feelings and desires, whatever they are, sweet or bitter, troubled or peaceful. (2) As a consequence of this aspect, *various moods are blended* in prayer. It passes from praise and commemoration to complaint, supplication, confession, despondency. Few psalms are entirely prayers in a strict sense. There is, however, another reason for the rapid transitions which occur. In some cases the moment of a felt answer to prayer is marked in the Psalm itself by transition to praise. Here we have an approach to the colloquy in prayer noticed in the cases of Abraham, Moses, and Jeremiah. In 143^7 an answer is distinctly expected; again in 6^{8-10} it is received, as also in 31^{22-24}. For strongly marked transitions see 57^{6-11} 69^{30-36}. There is a sense that God has heard, and that is equivalent to His granting the petition, cf. 1 Jn 5^{15}. Yet this answer sometimes fails, and psalms from which it is absent strike us as abnormal, *e.g.* Ps 88. Here we come near what is frequent in Job, prayer struggling in the darkness, without a reply. It is that 'shutting out' of prayer which is described in La 3^8. (3) *National* and *personal* prayer, how far can they be distinguished? Some prayers in the Psalter are evidently national, *e.g.* 60. 79. 80. But while 44 is no less evidently national, 'I' and 'me' occur in vv.^{6} and ^{15}. Hence it is evident that the 1st pers. sing. is no proof that a psalm, *e.g.* 102, is personal. It may well be an expression of the complaint and needs of the nation. It may almost be said that the psalmist never felt himself alone, but always connected his personal joys or griefs with those of the nation. Cheyne (*OP* 276) quotes a Rabbinic saying, 'In prayer a man should always unite himself with the community.' The question then will generally be which of the two elements predominates, not which is exclusively present. (4) *Material and external blessings are the principal subjects of prayer in the Psalms.* Account must be taken, in considering this matter, of changes which have taken place in the meaning of words by the legitimate spiritualizing effect of Christian use. 'Say unto my soul, I am thy salvation' (35^3) is a good instance of how a prayer for temporal deliverance has come to acquire the appearance of being a prayer for spiritual blessing. But although the Psalms are far more largely occupied with temporal and material than with spiritual needs, yet there are distinctly spiritual topics of prayer which fill a considerable place in them. These are: (*a*) Communion with God, prayer for the intercourse of prayer, as in 63. (*b*) Forgiveness of sins, besought with the greatest earnestness in 51 for its own sake, but more frequently taking the form of prayer for that deliverance from suffering and chastisement which was held to mark the forgiveness of sin (see art. SIN IN OT). (*c*) Ps 119 stands on a different footing. It contains much prayer for a knowledge of God's will. The prayer for quickening ('quicken' occurs 11 times) seems distinctly to have a spiritual sense. The 'He' division, with its initial verbs in Hiphil, is almost entirely prayer. The development of prayer in a spiritual direction has been carried some way in the Psalms, and prayer for external blessings has been cast in a form which will lend itself afterwards to spiritual interpretation. We must not, however, suppose that prayer of this kind differentiates the Psalms from the prayers of all other religions. Prayer for spiritual and moral gifts is found elsewhere (Tylor, *Prim. Culture*, vol. ii. pp. 373, 374). (5) *Urgency of Prayer.* There is a feeling that God must be induced to hear. This comes out in the anthropomorphic phrases which speak to Him as though He needed to be awakened, urged, or persuaded. We can scarcely suppose that this is, all of it, no more than a sacred irony. While NT put aside the thought of awakening Him, it retained that of pleading. On this subject see Ps 28^1 44^{23}, and in correction of these Ps 121 throughout. (6) *Prayer of imprecation*, for vengeance. This is both frequent and urgent. It occurs in the highest strains of devotion, *e.g.* Ps 69^{22-28}, as well as in psalms of a lower level, *e.g.* 59. It reaches its extreme point in 109. In this Psalm attempts have been made to explain it away, but here no separate dealing is possible with a conception which enters into the tissue of so many psalms. It is certainly remarkable that the phrase which above any expresses the absorption of the psalmist in prayer ('I am prayer,' 109^4) should occur where it does. Various considerations may help us to bear with this feature, but one is sufficient here. The devout Israelite of that day believed deeply in God, was perhaps more closely conscious of Him than we are, and yet looked out on a world of treachery, cruelty, and lust. The vision which we have before us of a future retribution in another life was entirely shut out from him. If his sense of justice was not dead, how could he help crying out for some manifestation of Divine righteousness by way of retribution, even apart from human instinct for revenge? An inspiration which ran counter to such desires would have disturbed the very foundations of his faith. See, further, art. PSALMS, p. 160.

Proverbs.—Only two points need be noticed: (1) Three passages in which the character of the person praying determines the acceptance of the prayer, $15^{8.\,29}$ 28^9. This feeling, legitimate as it is, and admitted in the formularies of to-day, would tend to grow into that mistaken view of the matter which is corrected in the parable of the Pharisee and the Publican. (2) The prayer of Agur (30^{7-9}), with its modest request for the middle state on account of the effect of riches and poverty on his relation with God. Cf. the prayer of Socrates (Plato, *Phædrus*, *sub fin.*, and also Thom. Aquinas, *Summa*, ii. 2, lxxxiii. 5).

Job.—The earlier part of the book is in the form of a dialogue between Job and his friends; but in fact, when his friends pause, it is often the case that Job, instead of answering them, turns away to God, and lets his address to God stand as an answer to them. Thus, much of the book is prayer. See chs. 6. 7. 9. 10. 13. 14. The boldest of these is 10. Though full of doubt, rebelliousness, and half-way to renouncing God, it is nevertheless prayer. These chapters are, in fact, prayer for what at times is the most urgent of all needs, some explanation of pain and suffering. It is prayer for wisdom. So, long afterwards, St. James, writing to those who have fallen into manifold trials, bids them ask wisdom from God, that they may understand the purpose of His discipline (Ja 1^{2-5}).

To sum up, the axioms stated at the outset have been abundantly justified. It has plainly appeared that God hears and is moved by prayer, especially by persistent pleading prayer. This was the conviction not only of the mass of the nation, but also of a large number of highly gifted persons. Their experience of prayer, as attested by their writings, must always constitute an important element in that portion of the evidences for the being of God which is drawn from human consciousness. In the spiritual sphere it corresponds to the testimony which St. John gives to God manifest in the flesh, 1 Jn 1^{1-4}.

II. IN THE APOCRYPHA.—The Apocr. as a whole confirms strongly what has been said as to the increased prominence of prayer after the Exile. The Apocr. books incorporate, or even consist of prayers. The Additions to Esther are mainly two long prayers of Esther and Mordecai. See also Bar 1^{15}–3^{8}; the Prayer of Azarias (Abednego) prefixed to the Song of the Three Children; and the Prayer of Manasses: the two narratives Tobit and Judith both attest the power of prayer. In Tobit the miraculous interpositions and the happy issue of the story are entirely the result of the simultaneous prayers of Tobit and Sarah recorded in To 3, see esp. 3^{16}. And the place given to prayer in an ideal Jewish family is shown by the paternal injunctions of To 4^{19}. The Book of Tobit, although a fiction, engages respect and interest by its high moral tone; but the same cannot be said of the Book of Judith, in which the prayer of the heroine is tainted with the treachery which is glorified throughout the book. Her prayer in Jth 9^{10} is prayer for the success of deceit, and it would be hard to find anything baser in conception than her pretended scheme of inquiring by prayer as to the sins of her countrymen, that she may tell Holofernes when to attack them, Jth $11^{17.18}$. The necessity of washing, before prayer, for those living among the heathen appears in Jth $12^{7.8}$. In 1 Mac we pass from fiction to history. As Ezr-Neh showed prayer in men of action, so also 1 Mac, *e.g.* 4^{30-33} 5^{33} and 11^{71-72}, prayer was the secret of the Maccabæan victories. That it was so, is nowhere better expressed than in 2 Mac 15^{27}, 'contending with their hands and praying unto God with their hearts.' The notice of Mizpeh in 1 Mac 3^{46} as an ancient place of prayer, links the prayer and victory of Judas with those of Samuel in former time, and is proof of the surviving holiness of the ancient sanctuaries. 2 Mac does but renew in legendary guise the evidence of 1 Mac as to the frequency of prayer in the great patriotic struggle. But it contains two passages which favoured, if they did not suggest, later developments in Christian times. With 2 Mac 12^{40-45} before them as canonical Scripture, it is no wonder that men thought they had ample justification for offering sacrifice (in the Mass) on behalf of the dead. And the vision of Onias and Jeremiah (2 Mac 15^{12-14}) was a clear testimony to the intercession of saints on behalf of the living. Cf. also Bar 3^{4} if the text be correct.

The sapiential books of the Apocr. should next be considered. The Book of Wisdom from 9^{1} onward is a continuous address to God, and may be regarded as a prayer, though the character of supplication is not clearly discernible beyond the end of ch. 9. But $16^{27.28}$ contains a beautiful illustration with regard to prayer. As manna had to be gathered at daybreak, lest it should melt in the heat of the sun, so we must rise at daybreak to gather spiritual food by prayer.

If the Book of Wisdom contributes little, Sirach compensates, as might be expected from the respective origin of the two books. It contains prayers, *e.g.* 22^{27}–23^{6} (personal); 36^{1-17} (national); 50^{22-24} partly thanksgiving, the source of Rinkart's famous hymn, 'Nun danket alle Gott.' Sir $7^{10.14}$ 28^{2-4} prepare the way for our Lord's teaching on prayer, and may have been present to His mind: 38^{9-14} was certainly in St. James' mind when he wrote Ja 5^{14-16}. Sir 38^{34} may perhaps be the source of the proverb, 'Laborare est orare.' Taking the book generally, it is remarkable that the principal subject of prayer in Sirach is the forgiveness of sins, thus advancing the movement begun in OT to spiritualize the aims of prayer.

One more book of Apocr. requires notice, an apocalypse, the so-called 2 Esdras. Though chs. 3–14 inclusive are certainly post-Christian, and therefore do not, like the books hitherto considered, illustrate inter-Testamental Jewish thought, there is much that is of great interest in them, and not least in regard to prayer. The question is raised in $7^{102-112}$ (RV text) whether the intercession of prophets and leaders which had played so great a part in the history of Israel will not also be availing in the day of judgment, and the answer is a twice-repeated negative.

III. IN THE NEW TESTAMENT.—It will be convenient to state at once the main points in which the doctrine of prayer makes advance in NT. (1) Further development of prayer for spiritual blessings. It is the light here thrown on the possibilities of a higher life by the example and teaching of Christ which enlarges and raises the scope of prayer. (2) Extension of the guidance of the Holy Spirit to all believers, enables them for prayer. Power in prayer was a characteristic of the prophets in the OT, because they had the Spirit. Now all can pray, because all have the Spirit. (3) Prayer in the name of Jesus. This is absolutely new (Jn 16^{24}). The verse just cited gives the turning-point in the history of prayer. It does not divert prayer from the Father to the Son, but gives new access to the Father. Thus the normal idea of prayer is to pray in the Spirit, through the Son, to the Father.

NT words for 'prayer' must be briefly noticed. 1. Prayer to God with implication of worship is *προσεύχεσθαι*. 2. *εὔχεσθαι* barely exceeds an earnest wish, and needs *πρὸς τὸν θεόν* to give it the sense of prayer as in 2 Co 13^{7}. Its subst. *εὐχή* means a vow except in Ja 5^{15}. 3. *δέομαι, δέησις*, though used of supplication to God even by our Lord Himself (Lk 22^{32}), may also be used of prayer to man (*e.g.* Lk 9^{40}), which is not the case with *προσεύχεσθαι*. 4. *αἰτεῖν*, a simple word belonging to our childlike relation (Lk 11^{11}), contains no thought of worship; in RV always 'ask,' but disguised in AV by five different renderings, namely 'ask,' 'desire,' 'beg,' 'crave,' 'require.' The mid. voice (*αἰτεῖσθαι*) gives intensity to the request (see Mayor on Ja 4^{3}). 5. *ἐρωτάω*, usually explained as involving a certain freedom in the manner and form of request. 6. *ἐντυγχάνειν, ὑπερεντυγχάνειν*, tr. 'intercede,' though the sense is primarily to draw near the person addressed, and only secondarily on behalf of another. See below under 'Epistles.'

i. *Gospels.*—The example and teaching of our Lord: (1) His personal example. His prayer was real prayer, not merely offered by way of example to disciples, but as real and intense as any ever uttered. Nothing brings out His true humanity more than His dependence on the Father in prayer. His prayers may be considered under three heads: (*a*) *At or before the great events of His life on earth:* at Baptism (Lk 3^{21}); before choice of apostles (Lk $6^{12.\,13}$); before transfiguration, which is almost represented as the effect of prayer (Lk 9^{29}); before Gethsemane (Jn 17, the earlier verses of which refer to the consummation of His own work); during the agony (Lk 22^{39-46}, He 5^{7}). It is to be observed that, for these notices, we are mainly indebted to St. Luke, and his special interest in our Lord's teaching as to prayer will appear under other heads also. (*β*) *Prayer before performance of miracles:* implied in the case of Lazarus, Jn $11^{41.\,42}$; probably implied Mk 7^{34}. Cf. Mt 17^{21} (TR); but much more frequent in miracles wrought by disciples. (*γ*) *Intercessory prayer:* for disciples and future believers, Jn 17^{6-26}, and continued after ascension, Ro 8^{34}, He 7^{25} (this continued intercession is not denied by Jn 16^{26}, which merely guards against the thought that our prayer is of itself unacceptable; His heavenly intercession is but another aspect of our asking in Jesus' name); prayer for individuals: St. Peter, Lk 22^{32}; soldiers at the cross, Lk 23^{34}. See Monrad, *World of Prayer*, p. 72, Eng. tr.

(2) The Lord's direct teaching in various ways. This may be considered under the following heads: (*a*) the Lord's Prayer; (*β*) parables; (*γ*) incidental sayings; (*δ*) last discourses.

(*a*) **The Lord's Prayer.** — There are grounds which appear to the present writer to be sufficient, but which cannot be stated here, for believing that the prayer was given on two occasions, and in two distinct forms. The latter circumstance would seem to show that stress was not laid on the repetition of the exact words, but on the teaching which the prayer conveyed as to the topics, proportion, and order of all prayer. There is but one clause in the Lord's Prayer relating to temporal wants, and even that not merely to the wants of the individual ('give *us*'). Moreover, it is capable of including spiritual needs, and is constantly so interpreted. On the other hand, it does legitimate prayer for temporal wants. In this connexion notice the direction given Mt 24^{20}. This tendency of the Lord's Prayer to fix desires on spiritual things is summed up in one of the *agrapha* quoted by Origen, *Sel. in* Ps 4^{4} LXX (Lomm. xi. 432) and elsewhere, and probably authentic, 'Ask the great things, and the little things shall be added to you; ask the heavenly things, and the earthly things shall be added to you' (Resch, *Agrapha*, Logion 41). Another characteristic of the Lord's Prayer is its *catholicity*. There is nothing of particularism in it. It is already conscious of its world-wide destiny. A merely Jewish prayer of this date would certainly have been addressed to the Lord God of Israel (of our fathers), and would have contained a petition for the nation. See Latham, *Pastor Pastorum*, p. 416. See, further, art. LORD'S PRAYER.

(*β*) *Parables.*—(1) Two parables on importunity in prayer. This characteristic of prayer has already been taught by OT, and is here approved by our Lord. The 'Friend at Midnight' (Lk 11^{5-8}) follows immediately the delivery of the Lord's Prayer. While it should be interpreted in the broadest way of all prayer, it may have special application to teachers, as being a prayer for bread for others. The second parable, the Importunate Widow (Lk 18^{1-8}), has throughout a special reference to the prayer of suffering believers in expectation of the Second Advent. The need of importunity in prayer expressed in both parables should be interpreted with Trench's words before us, 'We must not conceive of prayer as an overcoming of God's reluctance, but as a laying hold of His highest willingness' (*Parables*, xviii., the substance of which comes from the passage of Dante which he quotes, *Parad.* xx. 94–99). (2) A parable on right disposition in prayer follows immediately in Lk 18^{9-14}. Compare above on Dt 26^{13-15} under OT. In this parable we see a great step in advance. Under the new covenant a profession of ritual righteousness has no longer any place in prayer. On the contrary, we have Lk 17^{10}, which may, like the precept of forgiveness which it follows, have been spoken with reference to prayer and its conditions. It should be observed that these parables are preserved by St. Luke alone, and to them may be added the prayer of the prodigal son, 'Father, I have sinned,' etc. (Lk $15^{18.\,19}$).

(*γ*) *Incidental sayings.*—(1) As to conditions of prayer. One of these is *humility*, as in the parable referred to above, Lk 18^{14}. Another is *forgiveness* of our brother men. This condition of prayer had already been strikingly stated in Sir 28^{2-4}. Mt $6^{14.\,15}$ and Mk $11^{24.\,25}$ do but repeat it, and the parable of the Unmerciful Servant grows out of the same root. A third condition of prayer is *to avoid outward show and to avoid repetition.* Our Lord's practice throws light on both these requirements. We read of His retirement to the mountain for prayer. Privacy in a house is difficult to obtain in the East. The other direction does not forbid all repetition. Words may be repeated to express urgent entreaty, as in Mt 26^{44}. A fourth condition is more important and more difficult of explanation—that of *faith.* It is obvious that faith must be a condition; a prayer which is, so to speak, an experiment, will not be answered. But Mk 11^{24} 'All things whatsoever ye pray and ask for, believe that ye have received them and ye shall have them,' seems to represent faith not merely as 'sine qua non,' but as 'cum qua semper.' Literally interpreted, the words would assign to every believer a kind of vicarious omnipotence. In interpreting any saying of our Lord, it must be remembered that the words as spoken by Him were not isolated, and were addressed to those who had heard other words which limited and explained them. It is reasonable to receive this saying with the explanation which St. John puts upon it, 1 Jn $5^{14.\,15}$ ('if we ask anything according to his will, he heareth us'). The illustrations used to emphasize the power of prayer in faith, viz. the uprooting of mountains and trees, are taken from the language of the Jewish schools; and the same source supplies a parallel expression, 'If a person applies his whole attention during prayer, he may be sure that his prayer has been granted' (R. Samuel in *Berakhoth*, tr. p. 111). It is probable that our Lord, foreseeing that the power of prayer would be undervalued, preferred to state its force in this almost paradoxical way. It will follow that assurance of receiving the *precise* thing asked for is not what is required. There is a great instance in Ac 12 which may be taken here by anticipation. The Church is gathered together praying continuously and earnestly for the release of St. Peter. But when he is released and sent back to them, they keep him outside the gate because they cannot believe that their prayer has been granted. Yet who will say that that prayer was not a prayer of faith? The last condition of prayer to be mentioned is not a universal one, but carries special promise, namely, the condition of *union* in prayer, Mt $18^{19.\,20}$. It does not necessarily imply public prayer, for two persons are enough. The effect of this saying appears in the frequent mention of united prayer in Acts.

(*δ*) *Last discourses.*—As in all other respects these discourses give new and distinctive teaching, so in respect of prayer. It is henceforth to be *in Jesus' name.* 'Thus is given not a mere devotional form, but a new ground on which the worshipper stands, a new plea for the success of his petitions; and, in fact, a wholly new character to prayer, since it must be brought into unison with the mind of Him in whose name it is presented' (T. D. Bernard, *Central Teaching of Jesus Christ*, p. 156; and see preceding page). As this teaching was not possible in the early days when the Lord's Prayer was given, 'in Jesus' name' was not added to it. But that prayer being His, and in accordance with His will, is a prayer in His name, without the addition of 'through Jesus Christ,' which the Church has never presumed to make. This instance shows that the direction is not to be taken in a narrow, verbal way.

(3) Finally, the Gospels afford us teaching on prayer given in an entirely different way. Under (1) the Lord's example was considered on its human side, teaching about prayer by His own prayer. But even during His ministry the Divine nature, though in a certain sense hidden, began to show itself, and He is the recipient of prayer from those who need His help. Their requests are not described by the highest term προσεύχομαι, but by δέομαι, δέησις. But since these requests were made to the Son of God, His way of dealing with them instructs all who pray. (*a*) Requests are granted where there is faith. 'Believe ye that I am able to do this?' (*b*) Granting requests is delayed to produce importunity and test character (Mk 7^{27}). A saying of Seneca's well illustrates the difference between what the Stoic thought of the attitude of importunate prayer and the way in which Christianity regards it: 'Nihil carius emitur quam quæ precibus emta est.' Christianity would substitute 'nihil dulcius.' (*c*) Man's ignorance in prayer is insisted on in the case of the sons of Zebedee, Mt 20^{22}; and it is shown by experience in the case of St. Peter, whose request is granted that he may learn that it was presumptuous, Mt 14$^{28-31}$, cf. Ro 8^{26}. Here it may be added that the disciples who had asked Jesus daily and hourly for help and guidance while He was with them in the flesh, evidently continued to do so after God had 'exalted him to be a Prince and a Saviour.' St. Stephen says, 'Lord Jesus, receive my spirit'; and Christians are described by St. Paul as those who 'call upon (or invoke in prayer) the name of our Lord Jesus Christ,' 1 Co 1^{2}, cf. Ac 9^{14} 22^{16}. It is therefore going too far to say with Origen (*de Orat.* 15) that all prayer must be offered to the Father. Yet it is the case that Jesus teaches His disciples to pray, not to Himself, but to the Father in His name. Liddon (*Bampton Lectures*, note F) appears to press his argument further than a consideration of the whole evidence will justify.

ii. *Acts.*—The teaching and guidance given by our Lord manifests its results in the Acts and Epistles. Acts will show its external results in the Church as a whole, not, however, without some evidence of private practice. The Epp. will give its inward effect on the devotional life of individuals, especially of St. Paul, but here also something may be gathered as to external and corporate usages.

(1) Acts supplies notices of *times and places of prayer.* St. Peter observes the sixth hour (Ac 10^{9}), and he and St. John go up to the temple at the ninth hour, which is described as the hour of prayer (Ac 3^{1}). It is probable that the gathering described in Ac 2^{1} was for worship, and this is fixed by 2^{15} as having taken place at the third hour, so we have recognition of all the three Jewish hours of prayer.

In the matter of prayer, as in most other external matters, the Christian body remained at first within the pale of Judaism. To ordinary observers they were only a new sect (αἵρεσις) of Judaism. They had their private worship (Ac 2^{42}), but they did not on that account forsake the temple; and it is possible that they still attended the synagogues, though there is no evidence on this point beyond the practice of St. Paul on his missionary journeys (in which case he had a special object in view), and Ja 2^{2} (where 'synagogue' may mean a distinctively Christian assembly, cf. He 10^{25}). But with regard to the private worship of Christians, there is ample evidence in Acts, *e.g.* 4$^{23-30}$ where the actual prayer used is recorded, and 12^{12} the assembly for prayer in the house of Mary the mother of Mark. Two farewell prayers from St. Paul's life may be added—the one at Miletus with tears and embraces (Ac 20^{36}), the other on the beach at Tyre (Ac 21^{5}). In both these cases they *knelt* in prayer. Kneeling is also the attitude of St. Stephen (Ac 7^{60}), St. Peter (Ac 9^{40}), and St. Paul (Eph 3^{14}). On the other hand, our Lord's words had authorized *standing* to pray (Mk 11^{25}).

(2) *Fulfilment of prayer.*—Acts is remarkably strong in its testimony on this point. There are: the release of St. Peter (Ac 12), the sending of St. Peter to Cornelius (10^{4}), the preservation of the crew and passengers who sailed with St. Paul (27^{24}). And there are the cases in which prayer is recorded as the means of working miracles (9^{40} 28^{8}). Passing to the Epp. we may take here the great instance of non-fulfilment of believing prayer, the thrice-repeated prayer of St. Paul to be delivered from the thorn in the flesh (2 Co 12$^{8.9}$). Yet the prayer was not frustrate; what was granted was the power to rejoice in the infirmity.

(3) *Prayer in connexion with laying on of hands.*—In Acts there are mentioned three more or less distinct uses of the laying on of hands: (α) in healing as by Ananias (9^{17}), St. Paul (28^{8}); (β) as a complement to baptism by St. Peter and St. John at Samaria (8^{17}) and St. Paul at Ephesus (19^{6}); (γ) on appointment to ministries (6^{6} 13^{3}). Now in each of these three classes of instances, though not in every instance, there is a distinct mention of prayer, as though to show that those who use the form are not in possession of the gift so as to transfer it at their will, but rather have authority to ask for it to be given. See, further, art. LAYING ON OF HANDS.

(4) The passages in which prayer accompanies *the appointment to ministries* naturally raise another question. In Ac 13^{3} 14^{23} *fasting* accompanies prayer, cf. Lk 2^{37}. The connexion between fasting and prayer has already been observed in OT, but was it continued in the Apostolic Church? These two passages go in that direction, and it would be natural that the Christians should not abandon a practice in which as Jews they had been trained, and which appeared to have a possible sanction from Mt 9^{15}. But, in considering fasting as subsidiary to prayer, it should be observed that in four passages where it appears in that light in AV, viz. Mt 17^{21}, Mk 9^{29}, Ac 10^{30}, 1 Co 7^{5}, RV, following textual evidence, omits all mention of the subject. See, further, art. FASTING.

(5) One other point of interest from Acts is that prayer here bears out what was said under OT of prayer as *colloquy with God.* Such is the prayer in the visions of Ananias (Ac 9$^{13-16}$) and St. Paul (Ac 22$^{17-21}$).

iii. *The Epistles and Apocalypse.*—(1) *St. James.*—This Ep. takes up and applies to daily life the teaching of the gospel, and is especially related to Mt. Hence there is much as to prayer. The need of faith in prayer, and the fatal effect of doubting (Ja 1$^{6-8}$, observe same word [διακρίνομαι] for 'doubt' as in Mt 21^{21}); the neglect of prayer, and character of wrong prayer (Ja 4$^{2.3}$), are put in a practical way.

But the most important passage is Ja 5^{13-18}. There in an emphatic position almost at the close of the Epistle we have the recommendation of a particular act of prayer on the part of the elders of the congregation, accompanied with the use of oil (in accordance with the early apostolic practice described Mk 6^{13}). This prayer is not only to effect bodily but also spiritual healing. The sufferer's sins will be forgiven. And then the power of prayer is still further urged, and the example of Elijah given. Intercession for one another is to be the rule of the Church (cf. 1 Jn 5^{16}).

(2) *Epp. of St. Paul.*—Only a few points can be noticed. (α) The *co-operation of the Holy Spirit* in prayer comes out clearly. In Ro 8^{15} the Spirit enables us to cry 'Abba, Father,' and in v.^{26} intercedes for us (ὑπερεντυγχάνει) along with our defective prayers. There is a special fitness in the use of ἐντυγχάνω (and its compound) with regard to the Spirit (as here) and the Son (v.^{34} and He 7^{25}), as it signifies close approach. For the help of the Spirit in prayer see also Eph 6^{18} and Jude ^{20}. Further, the gift of tongues was used in prayer as well as in praise (1 Co $14^{14.15}$). The distinction which St. Paul here draws between the office of his (own) spirit and his mind in prayer is well illustrated by Thom. Aquin. ii. 2. lxxxiii., who says that prayer is 'rationis actus.' There must be some arrangement of petitions (*ordinatio*), and for this the mind must take part. (β) The *reciprocal prayer of St. Paul and his converts.* He constantly prays for them, he tells them so, and they pray for him. His prayer for them is sometimes in anxiety and sometimes with joy (Ph 1^4). It included mention of persons by name, *e.g.* Timothy and Philemon, and no doubt countless others. He looks on this reciprocal prayer as a bond. He begins and often closes his Epp. with mention of it. He regards the circumstances of his own life and his movements as in part determined by the prayers of the saints (2 Co 1^{11}, Philem ^{22}). (γ) Prayer is *striving*, an ἀγών (like Jacob's wrestling), see Ro 15^{30}, Col 2^1 and 4^{12}. (δ) Some light is given as to the prayers of *the congregation.* There is the injunction in 1 Ti 2^1, where we find the rudiments of a fixed order of prayer. Clem. Rom. 61 shows how this command was obeyed. The chapter above quoted, 1 Ti 2, gives negatively in v.^{8} the same conditions of acceptable prayer 'without wrath and doubting' as are given positively in Mk 11^{25}, where forgiveness and faith are required for prayer. 'Wrath' here means refusal to forgive; such a condition condemns a literal use of the Imprecatory Psalms. (ε) In the Pastoral Epp. prayer has already become the *special duty of a certain class* (1 Ti 5^5).

(3) *Ep. to Hebrews.*—The great lesson here is *freedom of access to God in prayer.* This Christ has obtained for us (He 4^{16} 10^{22}). The latter verse reminds us that the baptized no longer need the ritual washing of their bodies before prayer (see above on prayer in Apocrypha).

(4) *Epp. of St. John.*—Here again is the same thought as in He 4^{16}, expressed by the same word (παῤῥησία). But in 1 Jn there is no question of entrance and approach (εἴσοδος, προσέρχεσθαι); we are already near. Thus παῤῥησία has more distinctly its primary sense of 'freedom of utterance' in prayer. See 1 Jn $3^{21.22}$, where the promises of the certain fulfilment of prayer given in Jn $14^{13.14}$ $15^{7.16}$ $16^{23.24}$ are concentrated and dwelt upon. The still stronger repetition of this assurance in 1 Jn $5^{14.15}$ explains any difficulty that might attach to it, by substituting 'according to His will' for 'in His name.' These two conditions are really equivalent. We cannot truly associate ourselves with Christ in prayer (in His name) without His spirit of entire submission to the Father's will.

(5) *The Apocalypse.*—Here the prayer for vengeance (Rev 6^{10}) is an echo of Lk 18^{1-8}, but it is the prayer of the dead (cf. Bar 3^4). In Rev 5^8 and 8^3 the prayers of the saints are offered to God, but this is the prayer of the living which ascends from the earth. This prayer is mediated, being offered in one case by the elders, and in the other having incense added to it by angels. For this idea (common among the Jews) cf. To $12^{12.15}$. The passages in Revelation are clearly symbolical, and do not warrant man in addressing angels for such a purpose. The mistranslation of Vulg. (Job 5^1) probably encouraged the error. For the connexion of prayers and incense see above, p. 39^b. Lastly, the Apocalypse ends with a prayer from the highest level of Christian faith and hope befitting the place assigned to it at the end of the Canon. It is a threefold prayer. It is the prayer of the Spirit, which animates all faithful prayer under the NT (22^{17}). It is the prayer of the Bride, *i.e.* the Church (*ib.*). It is also the prayer of the individual, the writer of the book (22^{20}). All other prayer resolves itself at last into prayer for the coming of the Lord Jesus, which will accomplish all desires.

LITERATURE.—Jerus. Talmud, *Berakhoth*, tr. Schwab; Origen, *de Oratione Libellus*; the artt. in Herzog on 'Gebet,' 'Gebet bei den Hebräern'; Bp. Monrad, *World of Prayer*, tr. Banks. The standard works on Biblical Theology, *e.g.* Oehler, Schultz, Beyschlag, have very scanty references to Prayer. Modern works on the efficacy of Prayer are not mentioned, being outside the scope of the present article. E. R. BERNARD.

PRAYER OF MANASSES. — See MANASSES (PRAYER OF).

PREACHER.—See ECCLESIASTES.

PREACHING (Heb. קְרִיאָה, Jon 3^2, from קָרָא 'cry out,' 'proclaim'; Gr. κήρυγμα, 'the message proclaimed,' from κηρύσσω, 'declare as a herald,' 'preach'; in NT used in marked distinction from διδαχή, 'teaching,' and διδάσκω, 'teach,' and always preserving in some degree the idea of the root-word κήρυξ, 'herald'). — Strictly speaking, Christian preaching is the proclamation of the gospel, which is to be followed by the more elaborate but less startling process of teaching. This limitation is observable in the NT accounts of our Lord's ministry where He first appears *preaching*, *i.e.* proclaiming the advent of the kingdom of God (*e.g.* Mt 4^{17}), following on the preaching of John the Baptist (*e.g.* Mt $3^{1.2}$), and then proceeds to *teach* the nature and laws of the kingdom (*e.g.* Mt 5^3). The word εὐαγγελίζω is frequently used for Christian preaching, as the declaration of glad tidings (*e.g.* Lk 3^{18}). But although the NT words rendered 'preaching' have this limitation of meaning, it would be undesirable to confine the consideration of the subject of preaching to the cases in which they are strictly applicable, that subject, as we now understand it, including all instruction in religion which takes the form of popular discourse, and especially that which is associated with public worship.

i. JEWISH PREACHING.—Of the two streams of religious life and practice that are seen in the history of Israel—the priestly and the prophetic—preaching attaches itself to the latter. The sumptuous pageantry of the sacrifices spoke to the eye and taught by dramatic representation. The prophet was emphatically the preacher. In the earlier periods, indeed, his teaching is usually by means of the brief oracle. But the great 8th cent. prophets composed and delivered elaborate discourses. They were preachers before they were writers, falling back on the pen only when the living voice was silenced: in the case of Jeremiah, for the preservation of the warnings which his contemporaries refused to hear (Jer 30^{2}); in the case of Ezekiel, because the circumstances of the Exile compelled the prophet to resort to literary channels for making his message known. Still even Ezekiel's prophecies may have been originally spoken (see Smend, *Der Prophet Ezechiel*, xxii.). On the other hand, Ewald held that Ezekiel wrote his oracles instead of speaking them because he felt a decay of the prophetic spirit (*Prophets of the OT*, iv. 2, 9). For the most part, at all events, the prophecies contained in OT are written discourses which had been preached or which were intended for preaching. Still there are two important differences between this preaching of the prophets and what we understand by the term to-day. (1) The preaching of the prophets was not a normal function of public worship taking its place in the ritual of the sanctuary. It was an utterance demanded by special crises, or prompted by a special revelation, and spoken in the court or the market-place, wherever the prophet could find the audience he was urged to address. (2) For the most part it dealt with public questions, national sins, judgments, and deliverances, rather than with individual conduct and need (see W. R. Smith, *Prophets of Israel*, Lect. II.). In Ezekiel, on the other hand, more personal preaching appears (see Cornill, *Der Prophet Ezechiel*, pp. 51, 52).

For a closer approach to what is commonly understood as preaching, we must come to the period of the return from the Captivity. The law is now the centre of the religion of Israel, and the law is now popularized in public teaching. The very meaning of the word rendered law (תּוֹרָה *instruction*) points in this direction. Accordingly, the Divine instruction given through priests or prophets at an earlier period is called by the same name (Hos 4^{6}, Am 2^{4} [see Driver's note]). With the rise of the synagogue, preaching becomes a recognized function of public worship. The need of translating the Heb. text into the vernacular introduced the interpreter, who followed the reader sentence by sentence in the case of the law, but with a division into longer passages with the prophets (Schürer, *HJP* II. ii. 81; *Megilla*, iv. 4, 6, 10). The Targum thus originated prepared for the more lengthy exposition. While the Halacha is didactic and suited to the schools, the Haggada contains the legends and allegories which would be more acceptable to the popular audience in the synagogue service. In the time of Philo the popular discourse was the chief part of the service (see Schürer, II. ii. 76). There was no one appointed preacher. According to Philo, 'some (τις) priest who is present (ὁ παρών), or some one of the elders, reads the sacred laws to them, and expounds (ἐξηγεῖται) each of them separately till eventide' (Fragm. in Euseb. *Præp. Evang.* viii. 7). Indeed we learn from the same authority that any competent person (ἀναστὰς τις τῶν ἐμπειροτάτων) could take this part of the service (*de Septentario*, c. 6, Mang. ii. 282). From the latter passage it would seem that the preacher stood up to speak, the word ἀναστάς being used. But possibly Philo is thinking only of his act of rising to present himself before the people and offer his discourse. In delivering his sermon the preacher was seated in an elevated place (Lk 4^{20}; Zunz, *Die gottesdienstlichen Vorträge*, p. 337; Delitzsch, *Ein Tag in Capernaum*, p. 127 f.).

ii. CHRISTIAN PREACHING.—John the Baptist was acknowledged as a prophet, and he revived the prophet's mission of preaching to the people apart from the normal religious services. His work consisted chiefly in preaching and baptizing, though with the necessary addition of private conversation with inquirers (Lk $3^{10\text{-}14}$). The burden of his message was the call to repentance, and the announcement of the approach of the kingdom of God, with a promise of the forgiveness of sins (Mt 3^{1}, Mk 1^{4}). This was the burden of the earlier preaching of Jesus (Mk $1^{14.\ 15}$). This earlier preaching of our Lord was carried on in the synagogues of Galilee (Mk 1^{39}). The incident in the Nazareth synagogue of which we have a full account, indicates that our Lord's method was to found His discourse on the portion of Scripture He had previously read (Lk $4^{16\text{f.}}$). This would be in accordance with the custom at the Sabbath meeting. When He preached in the open air it was under freer circumstances. Then, though He would frequently appeal to the OT in confirmation of His words, and especially in arguing with the scribes in the form of an *argumentum ad homines*, He did not adopt the method of the exposition of Scripture; He would start immediately from His great topic 'the kingdom of God,' and expound that. The evangelists are careful to point out the transition from this public teaching to the private training of the inner circle of disciples. His method was not the same in the two cases. It cannot be said that He had any esoteric doctrine which He deliberately withheld from the uninitiated, although His language on one occasion seemed to indicate this (Mk $4^{11.\ 12}$), because He always invited all capable hearers (*e.g.* Mk $4^{9.\ 22.\ 23}$). The public discourse more often took the form of parable; the private instruction was more direct and conversational. But even when delivering a public discourse Jesus was always liable to interruption, and this would frequently develop into discussion. Moreover, the reports of our Lord's discourses preserved in the Gospels appear to be abbreviated in some cases, or perhaps we have salient points, memorable epigrams, etc., selected from His discourses rather than full reports of them. Sometimes, as in the case of the Sermon on the Mount, it may be that we have a number of the sayings of Jesus uttered on various occasions collected and strung together by the reporter (perhaps Matthew in his *Logia*; see MATTHEW). In Lk we more often meet with utterances springing out of incidents, the event and the saying being both given by the third evangelist. For these reasons we cannot look to the Gospel accounts of the teachings of Jesus to furnish us with typical sermons. Still those accounts not only contain the teachings themselves, they illustrate our Lord's method of preaching—(1) His freshness and originality (διδαχὴ καινή, Mk 1^{27}); (2) His tone of authority (ὡς ἐξουσίαν ἔχων, Mk 1^{22}); (3) His winning grace—a point characteristically noted by the third evangelist (ἐθαύμαζον ἐπὶ τοῖς λόγοις τῆς χάριτος, Lk 4^{22}); (4) His graphic picturesqueness in illustration (Mk 4^{33}).

The Book of Acts supplies several specimens of apostolic preaching. In the earliest instances the text and starting-point are found in some event, *e.g.* the 'tongues' at Pentecost (Ac $2^{14\text{f.}}$), the healing of the lame man at the gate of the temple (Ac $3^{12\text{f.}}$). The OT is appealed to for the confirmation of what is said (*e.g.* Ac $2^{14.\ 25.\ 34}$ 7^{42} 8^{32}). With his marvellous versatility St. Paul employed the same method when speaking to pagans at Athens, illustrating his words by a citation from classic literature (Ac 17^{28}), though personally he attached unique importance to the inspiration of the OT, and cited this to Jews in the manner of the other apostles (*e.g.* Ac $13^{40.\ 47}$ 15^{15}). In substance the preaching of the apostles to Jews was a declaration of the Messiahship of Jesus with the confirmation of two arguments—(1) The resurrection; (2) the OT predictions. On this followed promises of the forgiveness of sins (*e.g.* Ac 2^{38} 3^{19}), and salvation through Christ (*e.g.* 4^{12}). The essential genuineness of the early speeches in Acts is proved by the fact that they do not contain the Pauline doctrine of the Atonement, which was not developed at the time in which they are dated (Lechler, *Apost. and post-Apost. Times*, i. 266 f.). They refer to the death of Christ, charging the Jews with the crime, pointing out that it was predicted by the prophets, and therefore was foreknown by God and in His counsels, and showing that in spite of it the resurrection proved Jesus to be Christ. The apostolic preaching to the heathen, represented especially by St. Paul, exposes the absurdity of anthropomorphic polytheism (*e.g.* Ac 14^{15}), idolatry (17^{29}), and sorcery (19^{19}); declares the spirituality and fatherhood of God ($17^{24f.}$); denounces sin, and warns of judgment to come through one whom God has appointed (17^{31}); offers deliverance through faith in Jesus Christ (16^{31}). The allusions to the definite preaching of Jesus Christ are very brief. But it is evident that there must have been some account of His life, death, and resurrection in St. Paul's preaching. Gal 3^{1} plainly points to this. Similarly, if the second Gospel is St. Mark's record of 'the preaching of Peter,' it is plain that that apostle preached the facts of the life of Jesus.

In the churches of NT times great freedom of utterance was allowed. The right to preach depended on gifts, not on offices. At Corinth, in particular, the gift of prophecy, to which St. Paul assigns the first place (1 Co 14^{1}), was found among the private members, and was freely exercised in the assembly (v.^{31}). Nevertheless, the duty of admonishing the assembly rests especially with the leading authorities (*e.g.* 1 Th 5^{12}). The chief functions of the elders or bishops was, not preaching, but the administration of practical affairs. But ability to teach is recognized, at all events, by the time of the Pastoral Epistles as the one necessary qualification of a bishop (1 Ti 3^{2}) which is not also shared by the deacon. In course of time it was considered improper for a presbyter to preach in the presence of the bishop, universally so in the West (Possid. *Vit. S. Aug.* v.; *Conc. Hisp.* ii. (A.D. 619) can. 7), but not universally in the East, only *in quibusdam ecclesiis* (Jerome, *ad Nepot.* Epist. 2).

- v. The Bible Doctrine of Predestination.
- Literature.

i. THE TERMS.—The words 'predestine,' 'predestinate,' 'predestination' seem not to have been domiciled in English literary use until the later period of Middle English (they are all three found in Chaucer: *Troylus and Cryseyde*, 966; *Orisoune to the Holy Virgin*, 69; tr. of *Boëthius*, b. 1, pr. 6, l. 3844; the Old English equivalent seems to have been 'forestihtian,' as in Ælfric's *Homilies*, ii. 364, 366, in renderings of Ro 1^{4} 8^{30}). 'Predestine,' 'predestination' were doubtless taken over from the French, while 'predestinate' probably owes its form directly to the Latin original of them all. The noun has never had a place in the English Bible, but the verb in the form 'predestinate' occurs in every one of its issues from Tindale to AV. Its history in the English versions is a somewhat curious one. It goes back, of course, ultimately to the Latin '*prædestino*' (a good classical but not pre-Augustan word; while the noun '*prædestinatio*' seems to be of Patristic origin), which was adopted by the Vulgate as its regular rendering of the Gr. προορίζω, and occurs, with the sole exception of Ac 4^{28} (Vulg. *deeerno*), wherever the Latin translators found that verb in their text (Ro 1^{4} $8^{29.\,30}$, 1 Co 2^{7}, Eph $1^{5.\,11}$). But the Wyclifite versions did not carry 'predestinate' over into English in a single instance, but rendered in every case by 'before ordain' (Ac 4^{28} 'deemed'). It was thus left to Tindale to give the word a place in the English Bible. This he did, however, in only one passage, Eph 1^{11}, doubtless under the influence of the Vulgate. His ordinary rendering of προορίζω is 'ordain before' (Ro 8^{29}, Eph 1^{5}; cf. 1 Co 2^{7}, where the 'before' is omitted apparently only on account of the succeeding preposition into which it may be thought, therefore, to coalesce), varied in Ro 8^{30} to 'appoint before'; while, reverting to the Greek, he has 'determined beforc' at Ac 4^{28} and, following the better reading, has 'declared' at Ro 1^{4}. The succeeding Eng. versions follow Tindale very closely, though the Genevan omits 'before' in Ac 4^{28} and, doubtless in order to assimilate it to the neighbouring Eph 1^{11}, reads 'did predestinate' in Eph 1^{5}. The larger use of the word was due to the Rhemish version, which naturally reverts to the Vulg. and reproduces its *prædestino* regularly in 'predestinate' (Ro 1^{4} $8^{29.\,30}$, 1 Co 2^{7}, Eph $1^{5.\,11}$; but Ac 4^{28} 'decreed'). Under this influence the AV adopted 'predestinate' as its ordinary rendering of προορίζω (Ro $8^{29.\,30}$, Eph $1^{5.\,11}$), while continuing to follow Tindale at Ac 4^{28} 'determined before,' 1 Co 2^{7} 'ordained,' as well as at Ro 1^{4} 'declared,' m. 'Gr. determined.' Thus the word, tentatively introduced into a single passage by Tindale, seemed to have intrenched itself as the stated English representative of an important Greek term. The RV has, however, dismissed it altogether from the English Bible and adopted in its stead the hybrid compound 'foreordained' (cf. art. FOREKNOW, FOREORDAIN) as its invariable representative of προορίζω (Ac 4^{28}, Ro $8^{29.\,30}$, 1 Co 2^{7}, Eph $1^{5.\,11}$),—in this recurring substantially to the language of Wyclif and the preferred rendering of Tindale. None other than a literary interest, however, can attach to the change thus introduced: 'foreordain' and 'predestinate' are exact synonyms, the choice between which can be determined only by taste. The somewhat widespread notion that the 17th cent. theology distinguished between them, rests on a misapprehension of the evidently carefully-adjusted usage of them in the *Westminster Confession*, iii. 3 ff. This is not, however, the result of the attribution to the one word of a 'stronger' or to the other of a 'harsher' sense than that borne by its fellow, but a simple sequence of a current employment of 'predestination' as the precise synonym of 'election,' and a resultant hesitation to apply a term of such precious associations to the foreordination to death. Since then the tables have been quite turned, and it is questionable whether in popular speech the word 'predestinate' does not now bear an unpleasant suggestion.

That neither word occurs in the English OT is due to the genius of the Hebrew language, which does not admit of such compound terms. Their place is taken in the OT, therefore, by simple words expressive of purposing, determining, ordaining, with more or less contextual indication of previousness of action. These represent a variety of Hebrew words, the most explicit of which is perhaps יָצַר (Ps 139^{16}, Is 22^{11} 37^{26} 46^{11}), by the side of which must be placed, however, יָעַץ (Is $14^{24.\,26.\,27}$ 19^{12} 19^{17} 23^{9}, Jer 49^{20} 50^{45}), whose substantival derivative עֵצָה (Job 38^{2} 42^{3}, Jer 23^{19}, Pr 19^{21}, Ps 33^{11} 107^{11}, Is $14^{25.\,26}$ $46^{10.\,11}$, Ps 106^{13}, Is 5^{19} 19^{17}, Jer 49^{20} 50^{45}, Mic 4^{12}) is doubtless the most precise Heb. term for the Divine plan or purpose, although there occurs along with it in much the same sense the term מַחֲשָׁבָה (Is 18^{11} 29^{11} 49^{50} 50^{45} 65^{8}, Jer 51^{29}, Mic 4^{12}, Ps 9^{26}), a derivative of חָשַׁב (Gn 50^{20}, Mic 2^{3}, Jer 18^{11} 26^{3} 29^{11} 36^{3} 49^{50} 50^{45}, La 2^{8}). In the Aramaic portion of Daniel ($4^{17. 24}$) the common later Hebrew designation of the Divine decree (used especially in an evil sense) גְּזֵרָה occurs: and חֹק is occasionally used with much the same meaning (Ps 2^{7}, Zeph 2^{2}, Ps 105^{10}=1 Ch 16^{17}, Job 23^{14}). Other words of similar import are זָמַם (Jer 4^{28} 51^{12}, La 7^{19}, Zec 1^{6} $8^{14. 15}$) with its substantive מְזִמָּה (Job 42^{2}, Jer 23^{20} 30^{24} 51^{11}); חָפֵץ (Ps 115^{3} 135^{6}, Pr 21^{1}, Is 55^{11}, Jon 1^{14}, Jg 13^{23}, La 2^{25}, Is 53^{16}) with its substantive חֵפֶץ (Is 46^{10} 44^{28} 48^{14} 53^{10}); חָרַץ (Job 14^{5}, Is $10^{22. 23}$ 28^{22}, Dn $9^{26. 27}$ 11^{36}); חָתַךְ (Dn 9^{24}); הוֹאִיל (1 S 12^{22}, 1 Ch 17^{27}, 2 S 7^{29}). To express that special act of predestination which we know as 'election,' the Hebrews commonly utilized the word בָּחַר (of Israel, Dt 4^{57} $7^{6. 7}$ 10^{15} 14^{2}, Is $41^{8. 9}$ $43^{10. 20}$ $44^{1. 2}$ 45^{4}, Jer 33^{24}; and of the future, Is 14^{1} $65^{7. 15. 22}$; of Jehovah's servant, 42^{1} 49^{7}; of Jerusalem, Dt $12^{14. 18. 26}$ 14^{25} 15^{20} $16^{7. 15. 16}$ $17^{8. 10}$ 18^{6} 31^{11}, Jos 9^{27}, 1 K $8^{14. 48}$ $11^{13. 32. 66}$ 14^{21}, 2 K 21^{7} 25^{27}) with its substantive בָּחִיר (exclusively used of Jehovah's 'elect,' 2 S 21^{6}, 1 Ch 16^{13}, Ps 89^{4} $105^{6. 43}$ $106^{5. 23}$, Is 42^{1} 43^{20} 45^{4} $65^{9. 15. 22}$), and occasionally the word יָדַע in a pregnant sense (Gn 18^{19}, Am 3^{2}, Hos 13^{5}, cf. Ps 1^{6} 31^{7} 37^{18}, Is 58^{3}, Neh 1^{7}); while it is rather the execution of this previous choice in an act of separation that is expressed by הִבְדִּיל (Lv 20^{24} 20^{26}, 1 K 8^{53}).

In the Greek of the NT the precise term *προορίζω* (Ac 4^{28}, 1 Co 2^{7}, Ro $8^{29. 30}$, Eph $1^{5. 11}$) is supplemented by a number of similar compounds, such as *προτάσσω* (Ac 17^{26}); *προτίθημι* (Eph 1^{9}) with its more frequently occurring substantive, *πρόθεσις* (Ro 8^{28} 9^{11}, Eph 1^{11} 3^{11}, 2 Ti 1^{9}); *προετοιμάζω* (Ro 9^{23}, Eph 2^{10}) and perhaps *προβλέπω* in a similar sense of providential pre-arrangement (He 11^{40}), with which may be compared also *προεῖδον* (Ac 2^{31}, Gal 3^{8}); *προγιγνώσκω* (Ro 8^{29} 11^{2}, 1 P 1^{20}) and its substantive *πρόγνωσις* (1 P 1^{2}, Ac 2^{23}); *προχειρίζω* (Ac 22^{14} 3^{28}) and *προχειροτονέω* (Ac 4^{41}). Something of the same idea is, moreover, also occasionally expressed by the simple *ὁρίζω* (Lk 22^{22}, Ac $17^{26. 31}$ 2^{23}, He 4^{7}, Ac 10^{42}), or through the medium of terms designating the will, wish, or good-pleasure of God, such as *βουλή* (Lk 7^{30}, Ac 2^{23} 4^{28} 13^{36} 20^{27}, Eph 1^{11}, He 6^{17}, cf. *βούλημα* Ro 9^{19} and *βούλομαι* He 6^{17}, Ja 1^{18}, 2 P 3^{9}), *θέλημα* (*e.g.* Eph $1^{5. 9. 11}$, He 10^{7}, cf. *θέλησις* He 2^{4}, *θέλω*, *e.g.* Ro $9^{18. 22}$), *εὐδοκία* (Lk 2^{14}, Eph $1^{5. 9}$, Ph 2^{13}, cf. *εὐδοκέω* Lk 12^{32}, Col 1^{19}, Gal 1^{15}, 1 Co 1^{21}). The standing terms in the NT for God's sovereign choice of His people are *ἐκλέγεσθαι*, in which both the compos. and voice are significant (Eph 1^{4}, Mk 13^{20}, Jn $15^{16. 16. 19}$, 1 Co $1^{27. 27}$, Ja 2^{5}; of Israel, Ac 13^{17}; of Christ, Lk 9^{35}; of the disciples, Lk 6^{13}, Jn 6^{70} 13^{18}, Ac 1^{2}; of others, Ac 1^{24} 15^{7}), *ἐκλεκτός* (Mt [20^{16}] 22^{14} $26^{22. 24. 31}$, Mk $13^{20. 22. 27}$, Lk 18^{7}, Ro 8^{33}, Col 3^{12}, 2 Ti 2^{10}, Tit 1^{1}, 1 P 1^{1} [2^{9}], Rev 17^{14}; of individuals, Ro 16^{13}, 2 Jn $^{1. 13}$; of Christ, Lk 23^{35}, Jn 13^{18}; of angels, 1 Ti 5^{21}), *ἐκλογή* (Ac 9^{15}, Ro 9^{11} $11^{5. 7. 28}$, 1 Th 1^{4}, 2 P 1^{10}),—words which had been prepared for this NT use by their employment in the LXX—the two former to translate בָּחַר and בָּחִיר. In 2 Th 2^{13} *αἱρέομαι* is used similarly.

ii. PREDESTINATION IN OT.—No survey of the terms used to express it, however, can convey an adequate sense of the place occupied by the idea of predestination in the religious system of the Bible. It is not too much to say that it is fundamental to the whole religious consciousness of the Biblical writers, and is so involved in all their religious conceptions that to eradicate it would transform the entire scriptural representation. This is as true of the OT as of the NT, as will become sufficiently manifest by attending briefly to the nature and implications of such formative elements in the OT system as its doctrines of God, Providence, Faith, and the Kingdom of God.

1. *Fundamental OT ideas implying Predestination.*—Whencesoever Israel obtained it, it is quite certain that Israel entered upon its national existence with the most vivid consciousness of an almighty personal Creator and Governor of heaven and earth. Israel's own account of the clearness and the firmness of its apprehension of this mighty Author and Ruler of all that is, refers it to His own initiative: God chose to make Himself known to the fathers. At all events, throughout the whole of OT literature, and for every period of history recorded in it, the fundamental conception of God remains the same, and the two most persistently emphasized elements in it are just those of might and personality: before everything else, the God of Israel is the Omnipotent Person. Possibly the keen sense of the exaltation and illimitable power of God which forms the very core of the OT idea of God belongs rather to the general Semitic than to the specifically Israelitish element in its religion; certainly it was already prominent in the patriarchal God-consciousness, as is sufficiently evinced by the names of God current from the beginning of the OT revelation,—*El*, *Eloah*, *Elohim*, *El Shaddai*,—and as is illustrated endlessly in the Biblical narrative. But it is equally clear that God was never conceived by the OT saints as abstract power, but was ever thought of concretely as the all-powerful Person, and that, moreover, as clothed with all the attributes of moral personality,—pre-eminently with holiness, as the very summit of His exaltation, but along with holiness, also with all the characteristics that belong to spiritual personality as it exhibits itself familiarly in man. In a word, God is pictured in the OT, and that from the beginning, purely after the pattern of human personality,—as an intelligent, feeling, willing Being, like the man who is created in His image in all in which the life of a free spirit consists. The anthropomorphisms to which this mode of conceiving God led were sometimes startling enough, and might have become grossly misleading had not the corrective lain ever at hand in the accompanying sense of the immeasurable exaltation of God, by which He was removed above all the weaknesses of humanity. The result accordingly was nothing other than a peculiarly pure form of Theism. The grosser anthropomorphisms were fully understood to be figurative, and the residuary conception was that of an infinite Spirit, not indeed expressed in abstract terms nor from the first fully brought out in all its implications, but certainly in all ages of the OT development grasped in all its essential elements. (Cf. the art. GOD).

Such a God could not be thought of otherwise than as the free determiner of all that comes to pass in the world which is the product of His creative act; and the doctrine of Providence (פְּקֻדָּה) which is spread over the pages of the OT fully bears out this expectation. The almighty Maker of all that is is represented equally as the irresistible Ruler of all that He has made: Jehovah sits as King for ever (Ps 29^{10}). Even the common language of life was affected by this pervasive point of view, so that, for example, it is rare to meet with such a phrase as 'it rains' (Am 4^{7}), and men by preference spoke of God sending rain (Ps $65^{9f.}$, Job 36^{27} 38^{26}). The vivid sense of dependence on God thus witnessed extended throughout every relation of life. Accident or chance was excluded. If we read here and there of a מִקְרֶה it is not thought of as happening apart from God's direction (Ru 2^{3}, 1 S 6^{9} 20^{26}, Ec 2^{14}, cf. 1 K 22^{34}, 2 Ch 18^{33}), and accordingly the lot was an accepted means of obtaining the decision of God (Jos 7^{16} 14^{2} 18^{6}, 1 S 10^{19}, Jon 1^{7}), and is didactically recognized as under His control (Pr 16^{33}). All things without exception, indeed, are disposed by Him, and His will is the ultimate account of all that occurs. Heaven and earth and all that is in them are the instruments through which He works His ends. Nature, nations, and the fortunes of the individual alike present in all their changes the transcript of His purpose. The winds are His messengers, the flaming fire His servant: every natural occurrence is His act: prosperity is His gift, and if calamity falls upon man it is the Lord that has done it (Am $3^{5.\,6}$, La $3^{33\text{-}38}$, Is 47^{7}, Ec 7^{14}, Is 54^{16}). It is He that leads the feet of men, wit they whither or not; He that raises up and casts down; opens and hardens the heart; and creates the very thoughts and intents of the soul. So poignant is the sense of His activity in all that occurs, that an appearance is sometimes created as if everything that comes to pass were so ascribed to His immediate production as to exclude the real activity of second causes. It is a grave mistake, nevertheless, to suppose that He is conceived as an unseen power, throwing up, in a quasi-Pantheistic sense, all changes on the face of the world and history. The virile sense of the free personality of God which dominates all the thought of the OT would alone have precluded such a conception. Nor is there really any lack of recognition of 'second causes,' as we call them. They are certainly not conceived as independent of God: they are rather the mere expression of His stated will. But they are from the beginning fully recognized, both in nature—with respect to which Jehovah has made covenant (Gn $8^{21.\,22}$, Jer $31^{35.\,36}$ $33^{20.\,25}$, Ps 148^{6}, cf. Jg 5^{22}, Ps 104^{9}, Job $38^{10.\,33}$ 14^{5}), establishing its laws (חֻקּוֹת Job $28^{25.\,28}$, Is 40^{12}, Job $38^{8\text{-}11}$, Pr 8^{29}, Jer 5^{22}, Ps 104^{9} 33^{7}, Jer 40^{26})—and equally in the higher sphere of free spirits, who are ever conceived as the true authors of all their acts (hence God's proving of man, Gn 22^{1}, Ex 16^{4} 20^{20}, Dt $8^{2.\,16}$ 13^{3}, Jg $3^{1.\,4}$, 2 Ch 32^{31}). There is no question here of the substitution of Jehovah's operation for that of the proximate causes of events. There is only the liveliest perception of the governing hand of God behind the proximate causes, acting through them for the working out of His will in every detail. Such a conception obviously looks upon the universe teleologically: an almighty moral Person cannot be supposed to govern His universe, thus in every detail, either unconsciously or capriciously. In His government there is necessarily implied a plan; in the all-pervasiveness and perfection of His government is inevitably implied an all-inclusive and perfect plan: and this conception is not seldom explicitly developed (cf. art. PROVIDENCE).

It is abundantly clear on the face of it, of course, that this whole mode of thought is the natural expression of the deep religious consciousness of the OT writers, though surely it is not therefore to be set aside as 'merely' the religious view of things, or as having no other rooting save in the imagination of religiously-minded men. In any event, however, it is altogether natural that in the more distinctive sphere of the religious life its informing principle of absolute dependence on God should be found to repeat itself. This appears particularly in the OT doctrine of faith, in which there sounds the keynote of OT piety,—for the religion of the OT, so far from being, as Hegel, for example, would affirm, the religion of fear, is rather by way of eminence the religion of trust. Standing over against God, not merely as creatures, but as sinners, the OT saints found no ground of hope save in the free initiative of the Divine love. At no period of the development of OT religion was it permitted to be imagined that blessings might be wrung from the hands of an unwilling God, or gained in the strength of man's own arm. Rather it was ever inculcated that in this sphere, too, it is God alone that lifts up and makes rich, He alone that keeps the feet of His holy ones; while by strength, it is affirmed, no man shall prevail (1 S 2^{9}). 'I am not worthy of the least of all thy mercies' is the constant refrain of the OT saints (Gn 32^{10}); and from the very beginning, in narrative, precept and prophetic declaration alike, it is in trust in the unmerited love of Jehovah alone that the hearts of men are represented as finding peace. Self-sufficiency is the characteristic mark of the wicked, whose doom treads on his heels; while the mark of the righteous is that he lives by his faith (Hab 2^{4}). In the entire self-commitment to God, humble dependence on Him for all blessings, which is the very core of OT religion, no element is more central than the profound conviction embodied in it of the free sovereignty of God, the God of the spirits of all flesh, in the distribution of His mercies. The whole training of Israel was directed to impressing upon it the great lesson enunciated to Zerubbabel, 'Not by might, nor by power, but by my Spirit, saith the Lord of hosts' (Zec 4^{6})—that all that comes to man in the spiritual sphere, too, is the free gift of Jehovah (cf. art. FAITH).

Nowhere is this lesson more persistently emphasized than in the history of the establishment and development of the kingdom of God, which may well be called the cardinal theme of the OT. For the kingdom of God is consistently represented, not as the product of man's efforts in seeking after God, but as the gracious creation of God Himself. Its inception and development are the crowning manifestation of the free grace of the Living God working in history in pursuance of His loving purpose to recover fallen man to Himself. To this end He preserves the race in existence after its sin, saves a seed from the destruction of the Flood, separates to Himself a family in Abraham, sifts it in Isaac and Jacob, nurses and trains it through the weakness of its infancy, and gradually moulds it to be the vehicle of His revelation of redemption, and the channel of Messianic blessings to the world. At every step it is God, and God alone, to whom is ascribed the initiative; and the most extreme care is taken to preserve the recipients of the blessings consequent on His choice from fancying that these blessings come as their due, or as reward for aught done by themselves, or to be found in themselves. They were rather in every respect emphatically not a people of their own making, but a people that God had formed that they might set forth His praise (Is 43^{23}). The strongest language, the most astonishing figures, were employed to emphasize the pure sovereignty of the Divine action at every stage. It was not because Israel was numerous, or strong, or righteous, that He chose it, but only because it pleased Him to make of it a people for Himself. He was as the potter, it as the clay which the potter moulds as he will; it was but as the helpless babe in its blood cast out to die, abhorred of man, which Jehovah strangely gathers to His bosom in unmerited love (Gn $12^{1.\,3}$, Dt $7^{6\text{-}8}$ $9^{4\text{-}6}$ $10^{15.\,16}$, 1 S 12^{22}, Is $41^{8.\,9}$ 43^{20} $48^{9\text{-}11}$, Jer $18^{1\text{f.}}$ 31^{3}, Hos 2^{20}, Mal $1^{2.\,3}$). There was no element in the religious consciousness of Israel more poignantly realized, as there was no element in the instruction they had received more insisted on, than that they owed their separation from the peoples of the earth to be the Lord's inheritance, and all the blessings they had as such received from Jehovah, not to any claim upon Him which they could urge, but to His own gracious love faithfully persisted in in spite of every conceivable obstacle (cf. art. KINGDOM OF GOD).

In one word, the sovereignty of the Divine will as the principle of all that comes to pass, is a primary postulate of the whole religious life, as well as of the entire world-view of the OT. It is implicated in its very idea of God, its whole conception of the relation of God to the world and to the changes which take place, whether in nature or history, among the nations or in the life-fortunes of the individual; and also in its entire scheme of religion, whether national or personal. It lies at the basis of all the religious emotions, and lays the foundation of the specific type of religious character built up in Israel.

2. *Cosmical Predestination in OT.*—The specific teaching of OT as to predestination naturally revolves around the two foci of that idea which may be designated general and special, or, more properly, cosmical and soteriological predestination; or, in other words, around the doctrines of the Divine Decree and the Divine Election. The former, as was to be expected, is comparatively seldom adverted to—for the OT is fundamentally a soteriological book, a revelation of the grace of God to sinners; and it is only at a somewhat late period that it is made the subject of speculative discussion. But as it is implied in the primordial idea of God as an Almighty Person, it is postulated from the beginning and continually finds more or less clear expression. Throughout the OT, behind the processes of nature, the march of history and the fortunes of each individual life alike, there is steadily kept in view the governing hand of God working out His preconceived plan—a plan broad enough to embrace the whole universe of things, minute enough to concern itself with the smallest details, and actualizing itself with inevitable certainty in every event that comes to pass.

Naturally, there is in the narrative portions but little formal enunciation of this pervasive and all-controlling Divine teleology. But despite occasional anthropomorphisms of rather startling character (as, *e.g.*, that which ascribes 'repentance' to God, Gn 6^{6}, Jl 2^{13}, Jon 4^{2}, Jer 18$^{8.\,10}$ 26$^{3.\,13}$), or rather, let us say, just because of the strictly anthropomorphic mould in which the OT conception of God is run, according to which He is ever thought of as a personal spirit, acting with purpose like other personal spirits, but with a wisdom and in a sovereignty unlike that of others because infinitely perfect, these narrative portions of the OT also bear continual witness to the universal OT teleology. There is no explicit statement in the narrative of the creation, for example, that the mighty Maker of the world was in this process operating on a preconceived plan; but the teleology of creation lies latent in the orderly sequence of its parts, culminating in man for whose advent all that precedes is obviously a preparation, and is all but expressed in the Divine satisfaction at each of its stages, as a manifestation of His perfections (cf. Ps 104^{31}). Similarly, the whole narrative of the Bk. of Genesis is so ordered—in the succession of creation, fall, promise, and the several steps in the inauguration of the kingdom of God—as to throw into a very clear light the teleology of the whole world-history, here written from the Divine standpoint and made to centre around the developing Kingdom. In the detailed accounts of the lives of the patriarchs, in like manner, behind the external occurrences recorded there always lies a Divine ordering which provides the real plot of the story in its advance to the predetermined issue. It was not accident, for example, that brought Rebecca to the well to welcome Abraham's servant (Gn 24), or that sent Joseph into Egypt (Gn 45^{8} 50^{20}; 'God meant [חָשַׁב] it for good'), or guided Pharaoh's daughter to the ark among the flags (Ex 2), or that, later, directed the millstone that crushed Abimelech's head (Jg 9^{53}), or winged the arrow shot at a venture to smite the king in the joints of the harness (1 K 22^{34}). Every historical event is rather treated as an item in the orderly carrying out of an underlying Divine purpose; and the historian is continually aware of the presence in history of Him who gives even to the lightning a charge to strike the mark (Job 36^{32}).

In the Psalmists and Prophets there emerges into view a more abstract statement of the government of all things according to the good pleasure of God (Ps 33^{11}, Jer 10^{12} 51^{15}). All that He wills He does (Ps 115^{3} 135^{6}), and all that comes to pass has pre-existed in His purpose from the indefinite past of eternity ('long ago' Is 22^{11}, 'of ancient times' Is 37^{26}=1 K 19^{25}), and it is only because it so pre-existed in purpose that it now comes to pass (Is 14$^{24.\,27}$ 46^{11}, Zec 1^{6}, Job 42^{2}, Jer 23^{20}, Jon 1^{14}, Is 40^{10}). Every day has its ordained events (Job 14^{5}, Ps 139^{16}). The plan of God is universal in its reach, and orders all that takes place in the interests of Israel—the OT counterpart to the NT declaration that all things work together for good to those that love God. Nor is it merely for the national good of Israel that God's plan has made provision; He exercises a special care over every one of His people (Job 5$^{15f.}$, Ps 91. 121. 65^{3} 37. 27$^{10.\,11}$ 139^{16}, Jon 3^{5}, Is 4^{3}, Dn 12^{1}). Isaiah especially is never weary of emphasizing the universal teleology of the Divine operations and the surety of the realization of His eternal purpose, despite the opposition of every foe (14$^{24\text{-}27}$ 31^{2} 40^{13} 58$^{8\text{-}11}$)—whence he has justly earned the name of the prophet of the Divine sovereignty, and has been spoken of as the Paul, the Augustine, the Calvin of the OT.

It is, however, especially in connexion with the OT doctrine of the Wisdom (חָכְמָה) of God, the chief depository of which is the so-called *Ḥokhmah* literature, that the idea of the all-inclusive Divine purpose (עֵצָה and מַחֲשָׁבוֹת) in which lies predetermined the whole course of events—including every particular in the life of the world (Am 3^{7}) and in the life of every individual as well (Ps 139$^{14\text{-}16}$, Jg 1^{5})—is speculatively wrought out. According to this developed conception, God, acting under the guidance of all His ethical perfections, has, by virtue of His eternal wisdom, which He 'possessed in the beginning of his way' (Pr 8^{22}), framed 'from everlasting, from the beginning,' an all-inclusive plan embracing all that is to come to pass; in accordance with which plan He now governs His universe, down to the least particular, so as to subserve His perfect and unchanging purpose. Everything that God has brought into being, therefore, He has made for its specific end (Pr 16^{4}, cf. 3$^{19.\,20}$, Job 28^{23} 38. 41, Is 40$^{12f.}$, Jer 10$^{12.\,13}$); and He so governs it that it shall attain its end,—no chance can escape (Pr 16^{33}), no might or subtlety defeat His direction (Pr 21$^{30.\,31}$ 19^{21} 16^{9}, cf. Is 14$^{24.\,27}$, Jer 10^{23}), which leads straight to the goal appointed by God from the beginning and kept steadily in view by Him, but often hidden from the actors themselves (Pr 20^{24}, cf. 3^{6} 16$^{1\text{-}9}$ 19^{21}, Job 38^{2} 42^{3}, Jer 10^{23}), who naturally in their weakness cannot comprehend the sweep of the Divine plan or understand the place within it of the details brought to their observation—a fact in which the OT sages constantly find their theodicy. No different doctrine is enunciated here from that which meets us in the Prophets and Psalmists,—only it is approached from a philosophical-religious rather than from a national-religious view-point. To prophet and sage alike the entire world—inanimate, animate, moral—is embraced in a unitary teleological world-order (Ps 19^{33} 33^{6} 104^{24} 148^{8}, Job 9^{4} 12^{13} 37); and to both alike the central place in this comprehensive world-order is taken by God's redemptive purpose, of which Israel is at once the object and the instrument, while the savour of its saltness is the piety of the individual saint. The classical term for this all-inclusive Divine purpose (עֵצָה) is accordingly found in the usage alike of prophet, psalmist, and sage,—now used absolutely of the universal plan on which the whole world is ordered (Job 38^{2} 42^{3}, cf. Delitzsch and Budde, *in loc.*), now, with the addition of 'of Jehovah,' of the all-comprehending purpose, embracing all human actions (Pr 19^{21} and parallels; cf. Toy, *in loc.*), now with explicit mention of Israel as the centre around which its provisions revolve (Ps 33^{11} 107^{11}, cf. Delitzsch, *in loc.*; Is 14^{26} 25^{1} 46$^{10.\,11}$), and anon with more immediate concern with some of the details (Ps 106^{13}, Is 5^{19} 19^{17}, Jer 49^{20} 50^{45}, Mic 4^{12}).

There seems no reason why a Platonizing colouring should be given to this simple attributing to the eternal God of an eternal plan in which is predetermined every event that comes to pass. This used to be done, *e.g.*, by Delitzsch (see, *e.g.*, on Job 28$^{25\text{-}28}$, Is 22^{11}; *Biblical Psychology*, I. ii.), who was wont to attribute to the Biblical writers, especially of the *Ḥokhmah* and the latter portion of Isaiah, a doctrine of the pre-existence of all things in an ideal world, conceived as standing eternally before God at least as a pattern if not even as a quasi-objective mould imposing their forms on all His creatures, which smacked more of the Greek Academics than of the Hebrew sages. As a matter of course, the Divine mind was conceived by the Hebrew sages as eternally contemplating all possibilities, and we should not do them injustice in supposing them to think of its 'ideas' as the *causa exemplaris* of all that occurs, and of the Divine intellect as the *principium dirigens* of every Divine operation. But it is more to the point to note that the conceptions of the OT writers in regard to the Divine decree run rather into the moulds of 'purpose' than of 'ideas,' and that the roots of their teaching are planted not in an abstract idea of the Godhead, but in the purity of their concrete theism. It is because they think of God as a person, like other persons purposeful in His acts, but unlike other persons all-wise in His planning and all-powerful in His performing, that they think of Him as predetermining all that shall come to pass in the universe, which is in all its elements the product of His free activity, and which must in its form and all its history, down to the least detail, correspond with His purpose in making it. It is easy, on the other hand, to attribute too little 'philosophy' to the Biblical writers. The conception of God in His relation to the world which they develop is beyond question anthropomorphic; but it is no unreflecting anthropomorphism that they give us. Apart from all question of revelation, they were not children prattling on subjects on which they had expended no thought; and the world-view they commend to us certainly does not lack in profundity. The subtleties of language of a developed scholasticism were foreign to their purposes and modes of composition, but they tell us as clearly as, say, Spanheim himself (*Decad. Theol.* vi. § 5), that they are dealing with a purposing mind exalted so far above ours that we can follow its movements only with halting steps, —whose thoughts are not as our thoughts, and whose ways are not as our ways (Is 55^8; cf. $40^{13.\,28}$ 28^{29}, Job $11^{7\text{f.}}$, Ps 92^5 $139^{14\text{f.}}$ 147^5, Ec 3^{11}). Least of all in such a theme as this were they liable to forget that infinite exaltation of God which constituted the basis on which their whole conception of God rested.

Nor may they be thought to have been indifferent to the relations of the high doctrine of the Divine purpose they were teaching. There is no scholastic determination here either; but certainly they write without embarrassment as men who have attained a firm grasp upon their fundamental thought and have pursued it with clearness of thinking, no less in its relations than in itself; nor need we go astray in apprehending the outlines of their construction. It is quite plain, for example, that they felt no confusion with respect to the relation of the Divine purpose to the Divine foreknowledge. The notion that the almighty and all-wise God, by whom all things were created, and through whose irresistible control all that occurs fulfils the appointment of His primal plan, could govern Himself according to a foreknowledge of things which—perhaps apart from His original purpose or present guidance—*might haply* come to pass, would have been quite contradictory to their most fundamental conception of God as the almighty and all-sovereign Ruler of the universe, and, indeed, also of the whole OT idea of the Divine foreknowledge itself, which is ever thought of in its due relation of dependence on the Divine purpose. According to the OT conception, God foreknows only because He has predetermined, and it is therefore also that He brings it to pass; His foreknowledge, in other words, is at bottom a knowledge of His own will, and His works of providence are merely the execution of His all-embracing plan. This is the truth that underlies the somewhat incongruous form of statement of late becoming rather frequent, to the effect that God's foreknowledge is conceived in the OT as 'productive.' Dillmann, for example, says (*AT Theologie*, p. 251): 'His foreknowledge of the future is a productive one; of an otiose foreknowledge or of a *præscientia media* . . . there is no suggestion.' In the thought of the OT writers, however, it is not God's foreknowledge that produces the events of the future; it is His irresistible providential government of the world He has created for Himself: and His foreknowledge of what is yet to be rests on His prearranged plan of government. His 'productive foreknowledge' is but a transcript of His will, which has already determined not only the general plan of the world, but every particular that enters into the whole course of its development (Am 3^7, Job $28^{26.\,27}$), and every detail in the life of every individual that comes into being (Jer 1^5, Ps $139^{14\text{-}16}$, Job $23^{13.\,14}$).

That the acts of free agents are included in this 'productive foreknowledge,' or rather in this all-inclusive plan of the life of the universe, created for the OT writers apparently not the least embarrassment. This is not because they did not believe man to be free,—throughout the whole OT there is never the least doubt expressed of the freedom or moral responsibility of man,—but because they did believe God to be free, whether in His works of creation or of providence, and could not believe He was hampered or limited in the attainment of His ends by the creatures of His own hands. How God governs the acts of free agents in the pursuance of His plan there is little in the OT to inform us; but that He governs them in even their most intimate thoughts and feelings and impulses is its unvarying assumption: He is not only the creator of the hearts of men in the first instance, and knows them altogether, but He fashions the hearts of all in all the changing circumstances of life (Ps 33^{15}); forms the spirit of man within him in all its motions (Zec 12^1); keeps the hearts of men in His hands, turning them whithersoever He will (Pr 21^1); so that it is even said that man knows what is in his own mind only as the Lord reveals it to him (Am 4^{13}). The discussion of any antinomy that may be thought to arise from such a joint assertion of the absolute rule of God in the sphere of the spirit and the freedom of the creaturely will, falls obviously under the topic of Providential Government rather than under that of the Decree (see PROVIDENCE): it requires to be adverted to here only that we may clearly note the fact that the OT teachers, as they did not hesitate to affirm the absolute sway of God over the thoughts and intents of the human heart, could feel no embarrassment in the inclusion of the acts of free agents within the all-embracing plan of God, the outworking of which His providential government supplies.

Nor does the moral quality of these acts present any apparent difficulty to the OT construction. We are never permitted to imagine, to be sure, that God is the author of sin, either in the world at large or in any individual soul—that He is in any way implicated in the sinfulness of the acts performed by the perverse misuse of creaturely freedom. In all God's working He shows Himself pre-eminently the Holy One, and prosecutes His holy will, His righteous way, His all-wise plan: the blame for all sinful deeds rests exclusively on the creaturely actors (Ex 9^{27} 10^{16}), who recognize their own guilt (2 S $24^{10.\,17}$) and receive its punishment (Ec 11^9 compared with 11^5). But neither is God's relation to the sinful acts of His creatures ever represented as purely passive: the details of the doctrine of *concursus* were left, no doubt, to later ages speculatively to work out, but its assumption underlies the entire OT representation of the Divine modes of working. That anything—good or evil—occurs in God's universe finds its account, according to the OT conception, in His positive ordering and active concurrence; while the moral quality of the deed, considered in itself, is rooted in the moral character of the subordinate agent, acting in the circumstances and under the motives operative in each instance. It is certainly going beyond the OT warrant to speak of the 'all-productivity of God,' as if He were the only efficient cause in nature and the sphere of the free spirit alike; it is the very delirium of misconception to say that in the OT God and Satan are insufficiently discriminated, and deeds appropriate to the latter are assigned to the former. Nevertheless, it remains true that even the evil acts of the creature are so far carried back to God that they too are affirmed to be included in His all-embracing decree, and to be brought about, bounded and utilized in His providential government. It is He that hardens the heart of the sinner that persists in his sin (Ex 4^{21} 7^3 $10^{1.\,27}$ 14^4 14^8, Dt 2^{30}, Jos 11^{20}, Is $6^{9\,10}$ 63^{17}); it is from Him that the evil spirits proceed that trouble sinners (1 S 16^{14}, Jg 9^{23}, 1 K 22, Job 1); it is of Him that the evil impulses that rise in sinners' hearts take this or that specific form (2 S 16^9 24^1, 1 K 12^{15}). The philosophy that lies behind such representations, however, is not the pantheism which looks upon God as the immediate cause of all that comes to pass; much less the pandaimonism which admits no distinction between good and evil; there is not even involved a conception of God entangled in an undeveloped ethical discrimination. It is the philosophy that is expressed in Is 47^5 'I am the LORD, and there is none else; beside me there is no God. . . . I am the LORD, and there is none else. I form the light and create darkness; I make peace and create evil; I am the LORD that doeth all these things'; it is the philosophy that is expressed in Pr 16^4 'The LORD hath made everything for its own end, yea, even the wicked for the day of evil.' Because, over against all dualistic conceptions, there is but one God, and He is indeed GOD; and because, over against all cosmotheistic conceptions, this God is a PERSON who acts purposefully; there is nothing that is, and nothing that comes to pass, that He has not first decreed and then brought to pass by His creation or providence. Thus all things find their unity in His eternal plan; and not their unity merely, but their justification as well; even the evil, though retaining its quality as evil and hateful to the holy God, and certain to be dealt with as hateful, yet does not occur apart from His provision or against His will, but appears in the world which He has made only as the instrument by means of which He works the higher good.

This sublime philosophy of the decree is immanent in every page of the OT. Its metaphysics never come to explicit discussion, to be sure; but its elements are in a practical way postulated consistently throughout. The ultimate end in view in the Divine plan is ever represented as found in God alone: all that He has made He has made for Himself, to set forth His praise; the heavens themselves with all their splendid furniture exist but to illustrate His glory; the earth and all that is in it, and all that happens in it, to declare His majesty; the whole course of history is but the theatre of His self-manifestation, and the events of every individual life indicate His nature and perfections. Men may be unable to understand the place which the incidents, as they unroll themselves before their eyes, take in the developing plot of the great drama: they may, nay, must, therefore stand astonished and confounded before this or that which befalls them or befalls the world. Hence arise to them problems—the problem of the petty, the problem of the inexplicable, the problem of suffering, the problem of sin (*e.g.* Ec 11^5). But, in the infinite wisdom of the Lord of all the earth, each event falls with exact precision into its proper place in the unfolding of His eternal plan; nothing, however small, however strange, occurs without His ordering, or without its peculiar fitness for its place in the working out of His purpose; and the end of all shall be the manifestation of His glory, and the accumulation of His praise. This is the OT philosophy of the universe—a world-view which attains concrete unity in an absolute Divine teleology, in the compactness of an eternal decree, or purpose, or plan, of which all that comes to pass is the development in time.

3. *Soteriological Predestination in OT.*—Special or Soteriological Predestination finds a natural place in the OT system as but a particular instance of the more general fact, and may be looked upon as only the general OT doctrine of predestination applied to the specific case of the salvation of sinners. But as the OT is a distinctively religious book, or, more precisely, a distinctively soteriological book, that is to say, a record of the gracious dealings and purposes of God with sinners, soteriological predestination naturally takes a more prominent place in it than the general doctrine itself, of which it is a particular application. Indeed, God's saving work is thrown out into such prominence, the OT is so specially a record of the establishment of the kingdom of God in the world, that we easily get

the impression in reading it that the core of God's general decree is His decree of salvation, and that His whole plan for the government of the universe is subordinated to His purpose to recover sinful man to Himself. Of course there is some slight illusion of perspective here, the materials for correcting which the OT itself provides, not only in more or less specific declarations of the relative unimportance of what befalls man, whether the individual, or Israel, or the race at large, in comparison with the attainment of the Divine end; and of the wonder of the Divine grace concerning itself with the fortunes of man at all (Job $22^{3f.}$ $35^{6f.}$ 38, Ps 8^{4}): but also in the general disposition of the entire record, which places the complete history of sinful man, including alike his fall into sin and all the provisions for his recovery, within the larger history of the creative work of God, as but one incident in the greater whole, governed, of course, like all its other parts, by its general teleology. Relatively to the OT record, nevertheless, as indeed to the Biblical record as a whole, which is concerned directly only with God's dealings with humanity, and that, especially, a sinful humanity (Gn 3^{9} 6^{5} 8^{21}, Lv 18^{24}, Dt 9^{4}, 1 K 8^{46}, Ps 14^{1} 51^{5} 130^{3} 143^{2}, Pr 20^{9}, Ec 7^{20}, Is 1^{4}, Hos 4^{1}, Job 15^{14} 25^{4} 14^{4}), soteriological predestination is the prime matter of importance; and the doctrine of election is accordingly thrown into relief, and the general doctrine of the decree more incidentally adverted to. It would be impossible, however, that the doctrine of election taught in the OT should follow other lines than those laid down in the general doctrine of the decree,—or, in other words, that God should be conceived as working in the sphere of grace in a manner that would be out of accord with the fundamental conception entertained by these writers of the nature of God and His relations to the universe.

Accordingly, there is nothing concerning the Divine election more sharply or more steadily emphasized than its graciousness, in the highest sense of that word, or, in other terms, its absolute sovereignty. This is plainly enough exhibited even in the course of the patriarchal history, and that from the beginning. In the very hour of man's first sin, God intervenes *sua sponte* with a gratuitous promise of deliverance; and at every stage afterwards the sovereign initiation of the grace of God—the Lord of the whole earth (Ex 19^{5})—is strongly marked, as God's universal counsel of salvation is more and more unfolded through the separation and training of a people for Himself, in whom the whole world should be blessed (Gn 12^{3} 18^{13} 22^{18} 26^{4} 28^{14}): for from the beginning it is plainly indicated that the whole history of the world is ordered with reference to the establishment of the kingdom of God (Dt 32^{8}, where the reference seems to be to Gn 11). Already in the opposing lines of Seth and Cain (Gn $4^{25.26}$) a discrimination is made; Noah is selected as the head of a new race, and among his sons the preference is given to Shem (Gn 9^{25}), from whose line Abraham is taken. Every fancy that Abraham owed his calling to his own desert is carefully excluded,—he was 'known' of God only that in him God might establish His kingdom (Gn 18^{19}); and the very acme of sovereignty is exhibited (as St. Paul points out) in the subsequent choice of Isaac and Jacob, and exclusion of Ishmael and Esau; while the whole Divine dealing with the patriarchs—their separation from their kindred, removal into a strange land, and the like—is evidently understood as intended to cast them back on the grace of God alone. Similarly, the covenant made with Israel (Ex 19–24) is constantly assigned to the sole initiative of Divine grace, and the fact of election is therefore appropriately set at the head of the Decalogue (Ex 20^{2}; cf. $34^{6.7}$); and Israel is repeatedly warned that there was nothing in it which moved or could move God to favour it (*e.g.* Dt 4^{37} 7^{7} 8^{17} 9^{4} 10^{11}, Ezk 16^{1}, Am 9^{7}). It has already been pointed out by what energetic figures this fundamental lesson was impressed on the Israelitish consciousness, and it is only true to say that no means are left unused to drive home the fact that God's gracious election of Israel is an absolutely sovereign one, founded solely in His unmerited love, and looking to nothing ultimately but the gratification of His own holy and loving impulses, and the manifestation of His grace through the formation of a heritage for Himself out of the mass of sinful men, by means of whom His saving mercy should advance to the whole world (Ps 8^{7}, Is 40. 42. 60, Mic 4^{1}, Am 4^{13} 5^{8}, Jer 31^{37}, Ezk 17^{22} 36^{21}, Jl 2^{28}). The simple terms that are employed to express this Divine selection —'know' (יָדַע), 'choose' (בָּחַר)—are either used in a pregnant sense, or acquire a pregnant sense by their use in this connexion. The deeper meaning of the former term is apparently not specifically Hebrew, but more widely Semitic (it occurs also in Assyrian; see the *Dictionaries* of Delitzsch and Muss-Arnolt *sub voc.*, and especially Haupt in *Beiträge zur Assyriologie*, i. 14, 15), and it can create no surprise, therefore, when it meets us in such passages as Gn 18^{19} (cf. Ps 37^{18} and also 1^{6} 31^{8}; cf. Baethgen and Delitzsch *in loc.*), Hos 13^{5} (cf. Wünsche *in loc.*) in something of the sense expressed by the scholastic phrase, *nosse cum affectu et effectu*; while in the great declaration of Am 3^{2} (cf. Baur and Gunning *in loc.*), 'You only have I known away from all the peoples of the earth,' what is thrown prominently forward is clearly the elective love which has singled Israel out for special care. More commonly, however, it is בחר that is employed to express God's sovereign election of Israel: the classical passage is, of course, Dt $7^{6.7}$ (see Driver *in loc.*, as also, of the love underlying the 'choice,' at 4^{37} 7^{8}), where it is carefully explained that it is in contrast with the treatment accorded to all the other peoples of the earth that Israel has been honoured with the Divine choice, and that the choice rests solely on the unmerited love of God, and finds no foundation in Israel itself. These declarations are elsewhere constantly enforced (*e.g.* 4^{37} 10^{15} 14^{2}), with the effect of throwing the strongest possible emphasis on the complete sovereignty of God's choice of His people, who owe their 'separation' unto Jehovah (Lv $20^{24.26}$, 1 K 8^{33}) wholly to the wonderful love of God, in which He has from the beginning taken knowledge of and chosen them.

It is useless to seek to escape the profound meaning of this fundamental OT teaching by recalling the undeveloped state of the doctrine of a future life in Israel, and the national scope of its election,—as if the sovereign choice which is so insisted on could thus be confined to the choice of a people as a whole to certain purely earthly blessings, without any reference whatever to the eternal destiny of the individuals concerned. We are here treading very close to the abyss of confusing progress in the delivery of doctrine with the reality of God's saving activities. The cardinal question, after all, does not concern the extent of the knowledge possessed by the OT saints of the nature of the blessedness that belongs to the people of God; nor yet the relation borne by the election within the election, by the real Israel forming the heart of the Israel after the flesh, to the external Israel: it concerns the existence of a real kingdom of God in the OT dispensation, and the methods by which God introduced man into it. It is true enough that the theocracy was an earthly kingdom, and that a prominent place was given to the promises of the life that now is in the blessings assured to Israel; and it is in this engrossment with earthly happiness and the close connexion of the friendship of God with the enjoyment of worldly goods that the undeveloped state of the OT doctrine of salvation is especially apparent. But it should not be forgotten that the promise of earthly gain to the people of God is not entirely alien to the NT idea of salvation (Mt 6^{37}, 1 Ti 4^{8}), and that it is in no sense true that in the OT teaching, in any of its stages, the blessings of the kingdom were summed up in worldly happiness. The covenant blessing is rather declared to be *life*, inclusive of all that that comprehensive word is fitted to convey (Dt 30^{15}; cf. 4^{1} 8^{1}, Pr 12^{28} 8^{35}); and it found its best expression in the high conception of 'the favour of God' (Lv 26^{11}, Ps 4^{8} $16^{2.5}$ 63^{4}); while it concerned itself with earthly prosperity only as and so far as that is a pledge of the Divine favour. It is no false testimony to the OT saints when they are described as looking for the city that has the foundations and as enduring as seeing the Invisible One: if their hearts were not absorbed in the contemplation of the eternal future, they were absorbed in the contemplation of the Eternal Lord, which certainly is something even better; and the representation that they found their supreme blessedness in outward things runs so grossly athwart their own testimony that it fairly deserves Calvin's terrible invective, that thus the Israelitish people are thought of not otherwise than as a 'sort of herd of swine which (so, forsooth, it is pretended) the Lord was fattening in the pen of this world' (*Inst.* II. x. 1). And, on the other hand, though Israel as a nation constituted the chosen people of God (1 Ch 16^{13}, Ps 89^{4} $105^{6.13}$ 106^{5}), yet we must not lose from sight the fact that the nation as such was rather the symbolical than the real people of God, and was His people at all, indeed, only so far as it was, ideally or actually, identified with the inner body of the really 'chosen'—that people whom Jehovah formed for Himself that they might set forth His praise (Is 43^{20} $65^{9.15.22}$), and who constituted the real people of His choice, the 'remnant of Jacob' (Is 6^{13}, Am 9^{8-10}, Mal 3^{10}; cf. 1 K 19^{18}, Is $8^{16.18}$). Nor are we left in doubt as to how this inner core of actual people of God was constituted; we see the process in the call of Abraham, and the discrimination between Isaac and Ishmael, between Jacob and Esau, and it is no false testimony that it was ever a 'remnant according to the election of grace' that God preserved to Himself as the salt of His people Israel. In every aspect of it alike, it is the sovereignty of the Divine choice that is emphasized,—whether the reference be to the segregation of Israel as a nation to enjoy the earthly favour of God as a symbol of the true entrance into rest, or the choice of a remnant out of Israel to enter into that real communion with Him which was the joy of His saints,—of Enoch who walked with God (Gn 5^{22}), of Abraham who found in Him his exceeding great reward (Gn 15^{1}), or of David who saw no good beyond Him, and sought in Him alone his inheritance and his cup. Later times may have enjoyed fuller knowledge of what the grace of God had in store for His saints—whether in this world or that which is to come; later times may have possessed a clearer apprehension of the distinction between the children of the flesh and the children of the promise: but no later teaching has a stronger emphasis for the central fact that it is of the free grace of God alone that any enter in any degree into the participation of His favour. The kingdom of God, according to the OT, in every circle of its meaning, is above and before all else a stone cut out of the mountain 'without hands' (Dn $2^{34.44.45}$).

iii. PREDESTINATION AMONG THE JEWS.—The profound religious conception of the relation of God to the works of His hands that pervades the whole OT was too deeply engraved on the Jewish consciousness to be easily erased, even after growing legalism had measurably corroded the religion of the people. As, however, the idea of law more and more absorbed the whole sphere of religious thought, and piety came to be conceived more and more as right conduct before God instead of living communion with God, men grew naturally to think of God more and more as abstract unapproachableness, and to think of themselves more and more as their own saviours. The post-canonical Jewish writings, while retaining fervent expressions of dependence on God as the Lord of all, by whose wise counsel all things exist and work out their ends, and over against whom the whole world, with every creature in it, is but the instrument of His will of good to Israel, nevertheless threw an entirely new emphasis on the autocracy of the human will. This emphasis increases until in the later Judaism the extremity of heathen self-sufficiency is reproduced, and the whole sphere of the moral life is expressly reserved from Divine determination. Meanwhile also heathen terminology was intruding into Jewish speech. The Platonic πρόνοια, προνοεῖν, for example, coming in doubtless through the medium of the Stoa, is found not only in Philo (περὶ προνοίας), but also in the Apocryphal books (Wis 6^{7} 14^{3} 17^{2}, 3 Mac 4^{21} 5^{30}, 4 Mac 9^{24} 13^{18} 17^{22}; cf. also Dn $6^{18.19}$ LXX); the perhaps even more precise as well as earlier ἐφορᾶν occurs in Josephus (*BJ* II. viii. 14), and indeed also in the LXX, though here doubtless in a weakened sense (2 Mac 12^{22} 15^{2}, cf. 3 Mac 2^{21}, as also Job 34^{24} 28^{24} 22^{12}, cf. 21^{16}; also Zec 9^{1}); while even the fatalistic term εἱμαρμένη is employed by Josephus (*BJ* II. viii. 14; *Ant.* XIII. v. 9, XVIII. i. 3) to describe Jewish views of predestination. With the terms there came in, doubtless, more or less of the conceptions connoted by them.

Whatever may have been the influences under which it was wrought, however, the tendency of post-canonical Judaism was towards setting aside the Biblical doctrine of predestination to a greater or less extent, or in a larger or smaller sphere, in order to make room for the autocracy of the human will, the רשׁות, as it was significantly called by the Rabbis (*Bereshith Rabba*, c. 22). This disintegrating process is little apparent perhaps in the Book of Wisdom, in which the sense of the almightiness of God comes to very strong expression (11^{22} 12^{8-12}). Or even in Philo, whose predestinarianism (*de Legg. Allegor.* i. 15, iii. 24, 27, 28) closely follows, while his assertion of human freedom (*Quod Deus sit immut.* 10) does not pass beyond that of the Bible: man is separated from the animals and assimilated to God by the gift of 'the power of voluntary motion' and suitable emancipation from necessity, and is accordingly properly praised or blamed for his intentional acts; but it is of the grace of God only that anything exists, and the creature is not giver but receiver in all things; especially does it belong to God alone to plant and build up virtues, and it is impious for the mind, therefore, to say 'I plant'; the call of Abraham, Isaac, Jacob was of pure grace without any merit, and God exercises the right to 'dispose excellently,' prior to all actual deeds. But the process is already apparent in so early a book as Sirach. The book at large is indeed distinctly predestinarian, and such passages as 16^{26-30} 23^{20} 33^{11-13} $39^{20.21}$ echo the teachings of the canonical books on this subject. But, while this is its general character, another element is also present: an assertion of human autocracy, for example, which is without parallel in the canonical books, is introduced at 15^{11-20}, which culminates in the precise declaration that 'man has been committed to the hand of his own counsel' to choose for himself life or death. The same phenomena meet us in the Pharisaic Psalms of Solomon (B.C. 70–40). Here there is a general recognition of God as the great and mighty King ($2^{34.36}$) who has appointed the course of nature (18^{20}) and directs the development of history (2^{34} 9^{4} 17^{4}), ruling over the whole and determining the lot of each ($5^{6.18}$), on whom alone, therefore, can the hope of Israel be stayed (7^{3} 17^{3}), and to whom alone can the individual look for good. But, alongside of this expression of general dependence on God, there occurs the strongest assertion of the moral autocracy of the human will: 'O God, our works are in our own souls' election and control, to do righteousness or iniquity in the works of our hand' (9^{7}).

It is quite credible, therefore, when Josephus tells us that the Jewish parties of his day were divided, as on other matters, so on the question of the Divine predestination—the Essenes affirming that fate (εἱμαρμένη, Josephus' affected Græcizing expression for predestination) is the mistress of all, and nothing occurs to men which is not in accordance with its destination; the Sadducees taking away 'fate' altogether, and considering that there is no such thing, and that human affairs are not directed according to it, but all actions are in our own power, so that we are ourselves the causes of what is good, and receive what is evil from our own folly; while the Pharisees, seeking a middle ground, said that some actions, but not all, are the work of 'fate,' and some are in our own power as to whether they are done or not (*Ant.* XIII. v. 9). The distribution of the several views among the parties follows the general lines of what might have been anticipated—the Essenic system being pre-eminently supranaturalistic, and the Sadducean rationalistic, while there was retained among the Pharisees a deep leaven of religious earnestness tempered, but not altogether destroyed (except in the extremest circles), by their ingrained legalism. The middle ground, moreover, which Josephus ascribes to the Pharisees in their attempt to distribute the control of human action between 'fate' and 'free will,' reflects not badly the state of opinion presupposed in the documents we have already quoted. In his remarks elsewhere (*BJ* II. viii. 14; *Ant.* XVIII. i. 3) he appears to ascribe to the Pharisees some kind of a doctrine of *concursus* also—a κρᾶσις between 'fate' and the human will by which both co-operate in the effect; but his language is obscure, and is coloured doubtless by reminiscences of Stoic teaching, with which philosophical sect he compares the Pharisees as he compares the Essenes with the Epicureans.

But whatever may have been the traditional belief of the Pharisees, in proportion as the legalistic spirit which constituted the nerve of the movement became prominent, the sense of dependence on God, which is the vital breath of the doctrine of predestination, gave way. The Jews possessed the OT Scriptures in which the Divine lordship is a cardinal doctrine, and the trials of persecution cast them continually back upon God; they could not, therefore, wholly forget the Biblical doctrine of the Divine decree, and throughout their whole history we meet with its echoes on their lips. The laws of nature, the course of history, the varying fortunes of individuals, are ever attributed to the Divine predestination. Nevertheless, it was ever more and more sharply disallowed that man's moral actions fell under the same predetermination. Sometimes it was said that while the decrees of God were sure, they applied only so long as man remained in the condition in which he was contemplated when they were formed; he could escape all predetermined evil by a change in his moral character. Hence such sayings as, 'The righteous destroy what God decrees' (*Tanchuma* on רברים); 'Repentance, prayer, and charity ward off every evil decree' (*Rosh-hashana*). In any event, the entire domain of the moral life was more and more withdrawn from the intrusion of the decree; and Cicero's famous declaration, which Harnack says might be inscribed as a motto over Pelagianism, might with equal right be accepted as the working hypothesis of the later Judaism: 'For gold, land, and all the blessings of life we have to return thanks to God; but no one ever returned thanks to God for virtue' (*de Nat. Deorum*, iii. 36). We read that the Holy One determines prior to birth all that every one is to be—whether male or female, weak or strong, poor or rich, wise or silly; but one thing He does not determine—whether he is to be righteous or unrighteous; according to Dt 30^{15} this is committed to one's own hands. Accordingly, it is said that 'neither evil nor good comes from God; both are the results of our deeds' (*Midrash rab.* on ראה, and *Jalkut* there); and again, 'All is in the hands of God except the fear of God' (*Megilla* 25*a*); so that it is even somewhat cynically said, 'Man is led in the way in which he wishes to go' (*Maccoth* 10); 'If you teach him right, his God will make him know' (Is 28^{26}; Jerus. *Challah* i. 1). Thus the deep sense of dependence on God for all goods, and especially the goods of the soul, which forms the very core of the religious consciousness of the writers of the Old Testament, gradually vanished from the later Judaism, and was superseded by a self-assertiveness which hung all good on the self-determination of the human spirit, on which the purposes of God waited, or to which they were subservient.

iv. PREDESTINATION IN NT.—The NT teaching starts from the plane of the OT revelation, and in its doctrines of God, Providence, Faith, and the Kingdom of God repeats or develops in a right line the fundamental deliverances of the OT, while in its doctrines of the Decree and of Election only such advance in statement is made as the progressive execution of the plan of salvation required.

1. *The Teaching of Jesus.*—In the teaching of our Lord, as recorded in the Synoptic Gospels, for example, though there is certainly a new emphasis thrown on the Fatherhood of God, this is by no means at the expense of His infinite majesty and might, but provides only a more profound revelation of the character of 'the great King' (Mt 5^{35}), the 'Lord of heaven and earth' (Mt 11^{25}, Lk 10^{21}), according to whose good pleasure all that is comes to pass. He is spoken of, therefore, specifically as the 'heavenly Father' (Mt 5^{48} $6^{14.\,26.\,32}$ 15^{13} 18^{35} 23^{9}, cf. $5^{16.\,45}$ $6^{1.\,9}$ $7^{11.\,21}$ $10^{32.\,33}$ 12^{50} 16^{17} $18^{14.\,19}$, Mk $11^{25.\,26}$, Lk 11^{13}) whose throne is in the heavens (Mt 5^{34} 23^{22}), while the earth is but the footstool under His feet. There is no limitation admitted to the reach of His power, whether on the score of difficulty in the task, or insignificance in the object: the category of the impossible has no existence to Him 'with whom all things are possible' (Mt 9^{26}, Mk 10^{27}, Lk 18^{27}, Mt 22^{29}, Mk 12^{24} 14^{36}), and the minutest occurrences are as directly controlled by Him as the greatest (Mt $10^{29.\,30}$, Lk 12^{7}). It is from Him that the sunshine and rain come (Mt 5^{45}); it is He that clothes with beauty the flowers of the field (Mt 6^{28}), and who feeds the birds of the air (Mt 6^{26}); not a sparrow falls to the ground without Him, and the very hairs of our heads are numbered, and not one of them is forgotten by God (Mt 10^{29}, Lk 12^{2}). There is, of course, no denial, nor neglect, of the mechanism of nature implied here; there is only clear perception of the providence of God guiding nature in all its operations, and not nature only, but the life of the free spirit as well (Mt 6^{6} 8^{13} 24^{22} 7^{7}, Mk 11^{23}). Much less, however, is the care of God thought of as mechanical and purposeless. It was not simply of sparrows that our Lord was thinking when He adverted to the care of the heavenly Father for them, as it was not simply for oxen that God was caring when He forbade them to be muzzled as they trod out the corn (1 Co 9^{9}); it was that they who are of more value than sparrows might learn with what confidence they might depend on the Father's hand. Thus a hierarchy of providence is uncovered for us, circle rising above circle,—first the wide order of nature, next the moral order of the world, lastly the order of salvation or of the kingdom of God,—a preformation of the dogmatic *schema* of *providentia generalis*, *specialis*, and *specialissima*. All these work together for the one end of advancing the whole world-fabric to its goal; for the care of the heavenly Father over the works of His hand is not merely to prevent the world that He has made from falling into pieces, and not merely to preserve His servants from oppression by the evil of this world, but to lead the whole world and all that is in it onwards to the end which He has appointed for it,—to that παλιγγενεσία of heaven and earth to which, under His guiding hand, the whole creation tends (Mt 19^{28}, Lk 20^{34}).

In this divinely-led movement of 'this world' towards 'the world that is to come,' in which every element of the world's life has part, the central place is naturally taken by the spiritual preparation, or, in other words, by the development of the Kingdom of God which reaches its consummation in the 'regeneration.' This Kingdom, our Lord explains, is the heritage of those blessed ones for whom it has been prepared from the foundations of the world (Mt 25^{34}, cf. 20^{23}). It is built up on earth through a 'call' (Mt 9^{13}, Mk 2^{17}, Lk 5^{32}), which, however, as mere invitation is inoperative (Mt 22^{2-14}, Lk 14^{16-23}), and is made effective only by the exertion of a certain 'constraint' on God's part (Lk 14^{23}),—so that a distinction emerges between the merely 'called' and the really 'chosen' (Mt 22^{14}). The author of this 'choice' is God (Mk 13^{20}), who has chosen His elect (Lk 18^{7}, Mt $24^{22. 24. 31}$, Mk 13^{20-22}) before the world, in accordance with His own pleasure, distributing as He will of what is His own (Mt $10^{14. 15}$); so that the effect of the call is already predetermined (Mt 13), all providence is ordered for the benefit of the elect (Mt 24^{22}), and they are guarded from falling away (Mt 24^{24}), and, at the last day, are separated to their inheritance prepared for them from all eternity (Mt 25^{34}). That, in all this process, the initiative is at every point taken by God, and no question can be entertained of precedent merit on the part of the recipients of the blessings, results not less from the whole underlying conception of God in His relation to the course of providence than from the details of the teaching itself. Every means is utilized, however, to enhance the sense of the free sovereignty of God in the bestowment of His Kingdom; it is 'the lost' whom Jesus comes to seek (Lk 19^{10}), and 'sinners' whom He came to call (Mk 2^{17}); His truth is revealed only to 'babes' (Mt 11^{25}, Lk 10^{21}), and He gives His teaching a special form just that it may be veiled from them to whom it is not directed (Mk 4^{11}), distributing His benefits, independently of merit (Mt 20^{1-16}), to those who had been chosen by God therefor (Mk 13^{20}).

In the discourses recorded by St. John the same essential spirit rules. Although, in accordance with the deeper theological apprehension of their reporter, the more metaphysical elements of Jesus' doctrine of God come here to fuller expression, it is nevertheless fundamentally the same doctrine of God that is displayed. Despite the even stronger emphasis thrown here on His Fatherhood, there is not the slightest obscuration of His infinite exaltation: Jesus lifts His eyes up when He would seek Him (11^{41} 17^{1}); it is in heaven that His house is to be found (14^{2}); and thence proceeds all that comes from Him (1^{52} 3^{13} $6^{31. 32. 33. 38. 41. 49. 50}$ 6^{58}); so that God and heaven come to be almost equivalent terms. Nor is there any obscuration of His ceaseless activity in governing the world (5^{17}), although the stress is naturally thrown, in accordance with the whole character of this Gospel, on the moral and spiritual side of this government. But the very essence of the message of the Johannine Jesus is that the will (*θέλημα*) of the Father (4^{34} 5^{30} $6^{38. 39. 40}$ 7^{17} 9^{31}, cf. 3^{8} 5^{21} 17^{24} $21^{22. 23}$) is the principle of all things; and more especially, of course, of the introduction of eternal life into this world of darkness and death. The conception of the world as lying in the evil one and therefore judged already (3^{18}), so that upon those who are not removed from the evil of the world the wrath of God is not so much to be poured out as simply abides (3^{36}, cf. 1 Jn 3^{14}), is fundamental to this whole presentation. It is therefore, on the one hand, that Jesus represents Himself as having come not to condemn the world, but to save the world (3^{17} 8^{12} 9^{5} 12^{47}, cf. 4^{42}), and all that He does as having for its end the introduction of life into the world ($6^{33. 51}$); the already condemned world needed no further condemnation, it needed saving. And it is for the same reason, on the other hand, that He represents the wicked world as incapable of coming to Him that it might have life ($8^{43. 21}$ 14^{17} 10^{33}), and as requiring first of all a 'drawing' from the Father to enable it to come ($6^{44. 65}$); so that only those hear or believe on Him who are 'of God' (8^{47}, cf. 15^{19} 17^{14}), who are 'of his sheep' (16^{26}).

There is undoubtedly a strong emphasis thrown on the universality of Christ's mission of salvation; He has been sent into the world not merely to save some out of the world, but to save the world itself (3^{16} 6^{51} 12^{47} 17^{21}, cf. 1^{29}, 1 Jn 4^{14} 2^{2}). But this universality of destination and effect by which it is 'the world' that is saved, does not imply the salvation of each and every individual in the world, even in the earlier stages of the developing salvation. On the contrary, the saving work is a process (17^{20}); and, meanwhile, the coming of the Son into the world introduces a crisis, a sifting by which those who, because they are 'of God,' 'of his sheep,' are in the world, but not of it (15^{19} 17^{14}), are separated from those who are of the world, that is, of their father the devil (8^{44}), who is the Prince of this world (12^{31} 14^{30} 16^{11}). Obviously, the difference between men that is thus manifested is not thought of as inhering, after a dualistic or semi-Gnostic fashion, in their very natures as such, or as instituted by their own self-framed or accidentally received dispositions, much less by their own conduct in the world, which is rather the result of it,—but, as already pointed out, as the effect of an act of God. All goes back to the will of God, to accomplish which, the Son, as the Sent One, has come; and therefore also to the consentient will of the Son, who gives life, accordingly, to whom He will (5^{21}). As no one can come to Him out of the evil world, except it be given him of the Father (6^{65}, cf. 6^{44}), so all that the Father gives Him ($6^{37. 39}$) and only such (6^{65}), come to Him, being drawn thereunto by the Father (6^{44}). Thus the Son has 'his own in the world' (13^{1}), His 'chosen ones' (13^{18} $15^{16. 19}$), whom by His choice He has taken out of the world (15^{19} $17^{6. 14. 16}$); and for these only is His high-priestly intercession offered (17^{9}), as to them only is eternal life communicated (10^{21} 17^{2}, also $3^{15. 36}$ 5^{24} $6^{40. 54}$ 8^{12}). Thus, what the dogmatists call *gratia præveniens* is very strikingly taught; and especial point is given to this teaching in the great declarations as to the new birth recorded in Jn 3, from which we learn that the recreating Spirit comes, like the wind, without observation, and as He lists (3^{8}), the mode of action by which the Father 'draws' men being thus uncovered for us. Of course this drawing is not to be thought of as proceeding in a manner out of accord with man's nature as a psychic being; it naturally comes to its manifestation in an act of voluntary choice on man's own part, and in this sense it is 'psychological' and not 'physical'; accordingly, though it be God that 'draws,' it is man that 'comes' (3^{21} $6^{35. 41}$ 14^{6}). There is no occasion for stumbling therefore in the ascription of 'will' and 'responsibility' to man, or for puzzling over the designation of 'faith,' in which the 'coming' takes effect, as a 'work' of man's (6^{29}). Man is, of course, conceived as acting humanly, after the fashion of an intelligent and voluntary agent; but behind all his action there is ever postulated the all-determining hand of God, to whose sovereign operation even the blindness of the unbelieving is attributed by the evangelist ($12^{39f.}$), while the receptivity to the light of those who believe is repeatedly in the most emphatic way ascribed by Jesus Himself to God alone. Although with little use of the terminology in which we have been accustomed to expect to see the doctrines of the decree and of election expressed, the substance of these doctrines is here set out in the most impressive way.

From the two sets of data provided by the Synoptists and St. John, it is possible to attain quite a clear insight into the conception of predestination as it lay in our Lord's teaching. It is quite certain, for example, that there is no place in this teaching for a 'predestination' that is carefully adjusted to the foreseen performances of the creature; and as little for a 'decree' which may be frustrated by creaturely action, or an 'election' which is given effect only by the creaturely choice: to our Lord the Father is the omnipotent Lord of heaven and earth, according to whose pleasure all things are ordered, and who gives the Kingdom to whom He will (Lk 12^{32}, Mk 11^{26}, Lk 10^{21}). Certainly it is the very heart of our Lord's teaching that the Father's good pleasure is a *good* pleasure, ethically right, and the issue of infinite love; the very name of Father as the name of God by preference on His lips is full of this conception; but the very nerve of this teaching is, that the Father's will is all-embracing and omnipotent. It is only therefore that His children need be careful for nothing, that the little flock need not fear, that His elect may be assured that none of them shall be lost, but all that the Father has given Him shall be raised up at the last day. And if thus the elective purpose of the Father cannot fail of its end, neither is it possible to find this end in anything less than 'salvation' in the highest sense, than entrance into that eternal life to communicate which to dying men our Lord came into the world. There are elections to other ends, to be sure, spoken of: notably there is the election of the apostles to their office (Lk 6^{13}, Jn 6^{70}); and Christ Himself is conceived as especially God's elect one, because no one has the service to render which He has (Lk 9^{35} 23^{35}). But the elect, by way of eminence; 'the elect whom God elected,' for whose sake He governs all history (Mk 13^{20}); the elect of whom it was the will of Him who sent the Son, that of all that He gave Him He should lose nothing, but should raise it up at the last day (Jn 6^{39}); the elect whom the Son of Man shall at the last day gather from the four winds, from the uttermost parts of the earth to the uttermost part of heaven (Mk 13^{27}): it would be inadequate to suppose that these are elected merely to opportunities or the means of grace, on their free cultivation of which shall depend their undecided destiny; or merely to the service of their fellow-men, as agents in God's beneficent plan for the salvation of the race. Of course this election is to privileges and means of grace; and without these the great end of the election would not be attained: for the 'election' is given effect only by the 'call,' and manifests itself only in faith and the holy life. Equally of course the elect are 'the salt of the earth' and 'the light of the world,' the few through whom the many are blessed; the eternal life to which they are elected does not consist in or with the silence and coldness of death, but only in and with the intensest activities of the conquering people of God. But the prime end of their election does not lie in these things, and to place exclusive stress upon them is certainly to gather in the mint and anise and cummin of the doctrine. That to which God's elect are elected is, according to the teaching of Jesus, all that is included in the idea of the Kingdom of God, in the idea of eternal life, in the idea of fellowship with Christ, in the idea of participation in the glory which the Father has given His Son. Their choice, and the whole development of their history, according to our Lord's teaching, is the loving work of the Father: and in His keeping also is the consummation of their bliss. Their segregation, of course, leaves others not elected, to whom none of their privileges are granted; from whom none of their services are expected; with whom their glorious destiny is not shared. This, too, is of God. But this side of the matter, in accordance with Jesus' mission in the world as Saviour rather than as Judge, is less dwelt upon. In the case of neither class, that of the elect as little as that of those that are without, are the purposes of God wrought out without the co-operation of the activities of the subjects; but in neither case is the decisive factor supplied by these, but is discoverable solely in the will of God and the consonant will of the Son. The 'even so, Father; for so it seemed good in thy sight' (Mt 11^{26}, Lk 10^{21}), is to our Lord, at least, an all-sufficient theodicy in the face of all God's diverse dealings with men.

2. *The Teaching of the Disciples.*—The disciples of Jesus continue His teaching in all its elements. We are conscious, for example, of entering no new atmosphere when we pass to the *Epistle of James.* St. James, too, finds his starting-point in a profound apprehension of the exaltation and perfection of God,—defining God's nature, indeed, with a phrase that merely repeats in other words the penetrating declaration that 'God is light' (1 Jn 1^{5}), which, reflecting our Lord's teaching, sounds the keynote of the beloved disciple's thought of God (Ja 1^{17}),—and particularly in a keen sense of dependence on God (4^{15} 5^{7}), to which it was an axiom that every good thing is a gift from Him (1^{17}). Accordingly, salvation, the pre-eminent good, comes purely as His gift, and can be ascribed only to His will (1^{18}); and its exclusively Divine origin is indicated by the choice that is made of those who receive it—not the rich and prosperous, who have somewhat perhaps which might command consideration, but the poor and miserable (2^{5}). So little does this Divine choice rest on even faith, that it is rather in order to faith (2^{5}), and introduces its recipients into the Kingdom as firstfruits of a great harvest to be reaped by God in the world (1^{18}).

Similarly, in the *Book of Acts,* the whole stress in the matter of salvation is laid on the grace of God (11^{23} 13^{43} $14^{3.26}$ 15^{40} 18^{27}); and to it, in the most pointed way, the inception of faith itself is assigned (18^{27}). It is only slightly varied language when the increase in the Church is ascribed to the hand of the Lord (11^{21}), or the direct act of God (14^{27} 18^{10}). The explicit declaration of 2^{47} presents, therefore, nothing peculiar, and we are fully prepared for the philosophy of the redemptive history expressed in 13^{48}, that only those 'ordained to eternal life' believed—the believing that comes by the grace of God (18^{27}), to whom it belongs to open the heart to give heed to the gospel (16^{14}), being thus referred to the counsel of eternity, of which the events of time are only the outworking.

The general philosophy of history thus suggested is implicit in the very idea of a promissory system, and in the recognition of a predictive element in prophecy, and is written large on the pages of the *historical books* of the NT. It is given expression in every declaration that this or that event came to pass 'that it might be fulfilled which was spoken by the prophets,'—a form of statement in which our Lord had Himself betrayed His teleological view of history, not only as respects details (Jn 15^{25} 17^{12}), but with the widest reference (Lk 21^{22}), and which was taken up cordially by His followers, particularly by Matthew (1^{22} $2^{15.23}$ 4^{14} 8^{17} 12^{17} 13^{35} 21^{4} 26^{56}, Jn 12^{38} 18^{9} $19^{24.28.36}$). Alongside of this phrase occurs the equally significant 'δεῖ of the Divine decree,' as it has been appropriately called, by which is suggested the necessity which rules over historical sequences. It is used with a view now to Jesus' own plan of redemption (by Jesus Himself, Mt 8^{51}, Lk 2^{49} 4^{43} 9^{22} 13^{33} 17^{25} 24^{7}, Jn 3^{14} 10^{16} 12^{34}; by the evangelist, Mt 16^{21}), now to the underlying plan of God (by Jesus, Mt 24^{6}, Mk $13^{7.10}$, Lk 21^{9}; by the writer, Mt 17^{10}, Mk 9^{11}, Ac 3^{21} 9^{16}), anon to the prophetic declaration as an indication of the underlying plan (by Jesus, Mt 26^{58}, Lk 22^{37} $24^{26.44}$; by the writer, Jn 20^{9}, Ac 1^{16} 17^{3}). This appeal, in either form, served an important apologetic purpose in the first proclamation of the gospel; but its fundamental significance is rooted, of course, in the conception of a Divine ordering of the whole course of history to the veriest detail.

Such a teleological conception of the history of the Kingdom is manifested strikingly in the speech of St. Stephen (Ac 7), in which the developing plan of God is rapidly sketched. But it is in such declarations as those of St. Peter recorded in Ac 2^{23} 4^{28} that the wider philosophy of history comes to its clearest expression. In them everything that had befallen Jesus is represented as merely the emerging into fact of what had stood beforehand prepared for in 'the determinate counsel and foreknowledge of God,' so that nothing had been accomplished, by whatever agents, except what 'his hand and his counsel had foreordained to come to pass.' It would not be easy to frame language which should more explicitly proclaim the conception of an all-determining decree of God governing the entire sequence of events in time. Elsewhere in *the Petrine discourses* of Acts the speech is coloured by the same ideas: we note in the immediate context of these culminating passages the high terms in which the exaltation of God is expressed ($4^{24f.}$), the sharpness with which His sovereignty in the 'call' (προσκαλέομαι) is declared (2^{39}), and elsewhere the repeated emergence of the idea of the necessary correspondence of the events of time with the predictions of Scripture (1^{16} 2^{24} 3^{21}). The same doctrine of predestination meets us in the pages of *St. Peter's Epistles.* He does, indeed, speak of the members of the Christian community as God's elect (I 1^{1} 2^{9} 5^{13}, II 1^{10}), in accordance with the apostolic habit of assuming the reality implied in the manifestation; but this is so far from importing that election hangs on the act of man that St. Peter refers it directly to the elective foreknowledge of God (I 1^{2}), and seeks its confirmation in sanctification (II 1^{10}), —even as the stumbling of the disobedient, on the other hand, is presented as a confirmation of their appointment to disbelief (I 2^{8}). The pregnant use of the terms 'foreknow' (*προγινώσκω*) and 'foreknowledge' (*πρόγνωσις*) by St. Peter brought to our attention in these passages (Ac 2^{23}, 1 P $1^{2.20}$), where they certainly convey the sense of a loving, distinguishing regard which assimilates them to the idea of election, is worthy of note as another of the traits common to him and St. Paul (Ro 8^{29} 11^{2}, only in NT). The usage might be explained, indeed, as the development of a purely Greek sense of the words, but it is much more probably rooted in a Semitic usage, which, as we have seen, is not without example in OT. A simple comparison of the passages will exhibit the impossibility of reading the terms of mere prevision (cf. Cremer *sub voc.*, and especially the full discussion in K. Müller's *Die Göttliche Zuvorersehung und Erwählung*, etc. pp. 38 f., 81 f.; also Gennrich, *SK*, 1898, 382–395; Pfleiderer, *Urchristenthum*, 289, *Paulinismus*, 268; and Lorenz, *Lehrsystem*, etc. 94).

The *teaching of St. John* in Gospel and Epistle is not distinguishable from that which he reports from his Master's lips, and need not here be reverted to afresh. The same fundamental view-points meet us also in the Apocalypse. The emphasis there placed on the omnipotence of God rises indeed to a climax. There only in NT (except 2 Co 6^{18}), for example, is the epithet *παντοκράτωρ* ascribed to Him (1^{8} 4^{8} 11^{17} 15^{3} $16^{7.14}$ $19^{6.15}$ 21^{22}, cf. 15^{3} 6^{10}); and the whole purport of the book is the portrayal of the Divine guidance of history, and the very essence of its message that, despite all surface appearances, it is the hand of God that really directs all occurrences, and all things are hastening to the end of His determining. Salvation is ascribed unvaryingly to the grace of God, and declared to be His work (12^{10} 19^{1}). The elect people of God are His by the Divine choice alone: their names are from the foundation of the world written in the Lamb's Book of Life (13^{8} 17^{8} 20^{12-15} 21^{22}), which is certainly a symbol of Divine appointment to eternal life revealed in and realized through Christ; nor shall they ever be blotted out of it (3^{5}). It is difficult to doubt that the destination here asserted is to a complete salvation (19^{9}), that it is individual, and that it is but a single instance of the completeness of the Divine government to which the world is subject by the Lord of lords and King of kings, the Ruler of the earth and King of the nations, whose control of all the occurrences of time in accordance with His holy purposes it is the supreme object of this book to portray.

Perhaps less is directly said about the purpose of God in the *Epistle to the Hebrews* than in any other portion of NT of equal length. The technical phraseology of the subject is conspicuously absent. Nevertheless, the conception of the Divine counsel and will underlying all that comes to pass (2^{10}), and especially the entire course of the purchase (6^{17}, cf. 10^{5-10} 2^{9}) and application ($11^{39.31}$ 9^{15}) of salvation, is fundamental to the whole thought of the Epistle; and echoes of the modes in which this conception is elsewhere expressed meet us on every hand. Thus we read of God's eternal counsel (*βουλή*, 6^{17}) and of His precedent will (*θέλημα*, 10^{10}) as underlying His redemptive acts; of the enrolment of the names of His children in heaven (12^{23}); of the origin in the energy of God of all that is good in us (13^{21}); and, above all, of a 'heavenly call' as the source of the whole renewed life of the Christian (3^{1}, cf. 9^{15}).

When our Lord spoke of 'calling' (*καλέω*, Mt 9^{13}, Mk 2^{17}, Lk 5^{32}, and, parabolically, Mt $22^{2.4.5.9}$, Lk $14^{8.9.10.12.13.16.17.24}$; *κλητός*, Mt 22^{14} [20^{16}]) the term was used in the ordinary sense of 'invitation,' and refers therefore to a much broader circle than the 'elect' (Mt 22^{14}); and this fundamental sense of 'bidding' may continue to cling to the term in the hands of the evangelists (Mt 4^{21}, Mk 1^{20}, cf. Lk 14^{7}, Jn 2^{2}), while the depth of meaning which might be attached to it, even in such a connotation, may be revealed by such a passage as Rev 19^{9} 'Blessed are they which are bidden to the marriage supper of the Lamb.' On the lips of the apostolic writers, however, the term in its application to the call of God to salvation took on deeper meanings, doubtless out of consideration of the author of the call, who has but to speak and it is done (cf. Ro 4^{17}). It occurs in these writers, when it occurs at all, as the synonym no longer of 'invitation,' but rather of 'election' itself; or, more precisely, as expressive of the temporal act of the Divine efficiency by which effect is given to the electing decree. In this profounder sense it is practically confined to the writings of St. Paul and St. Peter and the Epistle to the Hebrews, occurring elsewhere only in Jude ^{1}, Rev 17^{14}, where the children of God are designated the 'called,' just as they are (in various collocations of the term with the idea of election) in Ro $1^{6.7}$, 1 Co 1^{2}, Ro 8^{28}, 1 Co 1^{24} (cf. Ro 1^{1}, 1 Co 1^{1}). *Κλητός*, as used in these passages, does not occur in the Epistle to the Hebrews, but in 3^{1} *κλῆσις* occurs in a sense indistinguishable from that which it bears in St. Paul (Ro 11^{29}, 1 Co 1^{26}, Eph 1^{18} $4^{1.4}$, Ph 3^{14}, 2 Th 1^{11}, 2 Ti 1^{9}) and St. Peter (2 P 1^{10}); and in 9^{15} (cf. special applications of the same general idea, 5^{4} 11^{8}), *καλέω* bears the same deep sense expressed by it in St. Paul (Ro $8^{30.30}$ 9^{11-24}, 1 Co 1^{9} $7^{15.17.18.18.20.21.22.22.24}$, Gal $1^{6.15}$ $5^{8.13}$, Eph $4^{1.4}$, Col 3^{15}, 1 Th 2^{12} 4^{7} 5^{24}, 2 Th 2^{14}, 2 Ti 1^{9}) and in St. Peter (I 1^{15} $2^{9.21}$ 3^{9} 5^{10}, II 1^{3}, cf. *προσκαλέω*, Ac 2^{39}, and in the language of St. Luke, Ac 13^{2} 16^{10}). The contrast into which the 'called' (3^{1}) are brought in this Epistle with the 'evangelized' ($4^{2.6}$), repeating in other terms the contrast which our Saviour institutes between the 'elect' and 'called' (Mt 22^{14}), exhibits the height of the meaning to which the idea of the 'call' has climbed. It no longer denotes the mere invitation,—that notion is now given in 'evangelize,'—but the actual ushering into salvation of the heirs of the promise, who are made partakers of the heavenly calling, and are called to the everlasting inheritance just because they have been destined thereunto by God (1^{14}), and are enrolled in heaven as the children given to the Son of God (2^{13}).

3. *The Teaching of St. Paul.*—It was reserved, however, to the Apostle Paul to give to the fact of predestination its fullest NT presentation. This was not because St. Paul exceeded his fellows in the strength or clearness of his convictions, but because, in the prosecution of the special task which was committed to him in the general work of establishing Christianity in the world, the complete expression of the common doctrine of predestination fell in his way, and became a necessity of his argument. With him, too, the roots of his doctrine of predestination were set in his general doctrine of God, and it was fundamentally because St. Paul was a theist of a clear and consistent type, living and thinking under the influence of the profound consciousness of a personal God who is the author of all that is and, as well, the upholder and powerful governor of all that He has made, according to whose will, therefore, all that comes to pass must be ordered, that he was a predestinarian; and more particularly he too was a predestinarian because of his general doctrine of salvation, in every step of which the initiative must be taken by God's unmerited grace, just because man is a sinner, and, as a sinner, rests under the Divine condemnation, with no right of so much as access to God, and without means to seek, much less to secure, His favour. But although possessing no other sense of the infinite majesty of the almighty Person in whose hands all things lie, or of the issue of all saving acts from His free grace, than his companion apostles, the course of the special work in which St. Paul was engaged, and the exigencies of the special controversies in which he was involved, forced him

to a fuller expression of all that is implied in these convictions. As he cleared the whole field of Christian faith from the presence of any remaining confidence in human works; as he laid beneath the hope of Christians a righteousness not self-wrought but provided by God alone; as he consistently offered this God-provided righteousness to sinners of all classes without regard to anything in them by which they might fancy God could be moved to accept their persons,—he was inevitably driven to an especially pervasive reference of salvation in each of its elements to the free grace of God, and to an especially full exposition on the one hand of the course of Divine grace in the several acts which enter into the saving work, and on the other to the firm rooting of the whole process in the pure will of the God of grace. From the beginning to the end of his ministry, accordingly, St. Paul conceived himself, above everything else, as the bearer of a message of undeserved grace to lost sinners, not even directing his own footsteps to carry the glad tidings to whom he would (Ro 1^{10}, 1 Co 4^{19}, 2 Co 2^{12}), but rather led by God in triumphal procession through the world, that through him might be made manifest the savour of the knowledge of Christ in every place—a savour from life unto life in them that are saved, and from death unto death in them that are lost (2 Co $2^{15.\ 16}$). By the 'word of the cross' proclaimed by him the essential character of his hearers was thus brought into manifestation,—to the lost it was foolishness, to the saved the power of God (1 Co 1^{18}): not as if this essential character belonged to them by nature or was the product of their own activities, least of all of their choice at the moment of the proclamation, by which rather it was only revealed; but as finding an explanation only in an act of God, in accordance with the working of Him to whom all differences among men are to be ascribed (1 Co 4^{7})—for God alone is the Lord of the harvest, and all the increase, however diligently man may plant and water, is to be accredited to Him alone (1 Co $3^{5\text{f.}}$).

It is naturally the soteriological interest that determines in the main St. Paul's allusions to the all-determining hand of God,—the letters that we have from him come from Paul the evangelist,—but it is not merely a soteriological conception that he is expressing in them, but the most fundamental postulate of his religious consciousness; and he is accordingly constantly correlating his doctrine of election with his general doctrine of the decree or counsel of God. No man ever had an intenser or more vital sense of God,—the eternal (Ro 16^{26}) and incorruptible (1^{23}) One, the only wise One (16^{27}), who does all things according to His good-pleasure (1 Co 15^{38} 12^{18}, Col $1^{19.\ 15}$), and whose ways are past tracing out (Ro 11^{33}); before whom men should therefore bow in the humility of absolute dependence, recognizing in Him the one moulding power as well in history as in the life of the individual (Ro 9). Of Him and through Him and unto Him, he fervently exclaims, are all things (Ro 11^{36}, cf. 1 Co 8^{6}); He is over all and through all and in all (Eph 4^{6}, cf. Col 1^{16}); He worketh all things according to the counsel of His will (Eph 1^{11}): all that is, in a word, owes its existence and persistence and its action and issue to Him. The whole course of history is, therefore, of His ordering (Ac 14^{16} 17^{26}, Ro $1^{18\text{f.}}$ 3^{25} 9–11, Gal 3. 4), and every event that befalls is under His control, and must be estimated from the view-point of His purposes of good to His people (Ro 8^{28}, 1 Th $5^{17.\ 18}$), for whose benefit the whole world is governed (Eph 1^{22}, 1 Co 2^{7}, Col 1^{18}). The figure that is employed in Ro 9^{22} with a somewhat narrower reference, would fairly express St. Paul's world-view in its relation to the Divine activity: God is the potter, and the whole world with all its contents but as the plastic clay which He moulds to His own ends; so that whatsoever comes into being, and whatsoever uses are served by the things that exist, are all alike of Him. In accordance with this world-view St. Paul's doctrine of salvation must necessarily be interpreted; and, in very fact, he gives it its accordant expression in every instance in which he speaks of it.

There are especially *three chief passages* in which the apostle so fully expounds his fundamental teaching as to the relation of salvation to the purpose of God, that they may fairly claim our primary attention.

(*a*) The first of these—Ro $8^{29.\ 30}$—emerges as part of the encouragement which the apostle offers to his readers in the sad state in which they find themselves in this world, afflicted with fears within and fightings without. He reminds them that they are not left to their weakness, but the Spirit comes to their aid: 'and we know,' adds the apostle,—it is no matter of conjecture, but of assured knowledge,—'that with them that love God, God co-operates with respect to all things for good, since they are indeed the called according to [His] purpose.' The appeal is obviously primarily to the universal government of God: nothing takes place save by His direction, and even what seems to be grievous comes from the Father's hand. Secondarily, the appeal is to the assured position of his readers within the fatherly care of God: they have not come into this blessed relation with God accidentally or by the force of their own choice; they have been 'called' into it by Himself, and that by no thoughtless, inadvertent, meaningless, or changeable call; it was a call 'according to purpose,'—where the anarthrousness of the noun throws stress on the purposiveness of the call. What has been denominated 'the golden chain of salvation' that is attached to this declaration by the particle 'because' can therefore have no other end than more fully to develop and more firmly to ground the assurance thus quickened in the hearts of the readers: it accordingly enumerates the steps of the saving process in the purpose of God, and carries it thus successively through the stages of appropriating foreknowledge,—for 'foreknow' is undoubtedly used here in that pregnant sense we have already seen it to bear in similar connexions in NT,—predestination to conformity with the image of God's Son, calling, justifying, glorifying; all of which are cast in the past tense of a purpose in principle executed when formed, and are bound together as mutually implicative, so that, where one is present, all are in principle present with it. It accordingly follows that, in St. Paul's conception, glorification rests on justification, which in turn rests on vocation, while vocation comes only to those who had previously been predestinated to conformity with God's Son, and this predestination to character and destiny only to those afore chosen by God's loving regard. It is obviously a strict doctrine of predestination that is taught. This conclusion can be avoided only by assigning a sense to the 'foreknowing' that lies at the root of the whole process, which is certainly out of accord not merely with its ordinary import in similar connexions in the NT, nor merely with the context, but with the very purpose for which the declaration is made, namely, to enhearten the struggling saint by assuring him that he is not committed to his own power, or rather weakness, but is in the sure hands of the Almighty Father. It would seem little short of absurd to hang on the merely contemplative foresight of God a declaration adduced to support the assertion that the lovers of God are something deeper and finer than even lovers of God, namely, 'the called according to *purpose*,' and itself educing the joyful cry, 'If God is for us, who is against us?' and grounding a confident claim upon the gift of all things from His hands.

(*b*) The even more famous section, **Ro 9. 10. 11**, following closely upon this strong affirmation of the suspension of the whole saving process on the predetermination of God, offers, on the face of it, a yet sharper assertion of predestination, raising it, moreover, out of the circle of the merely individual salvation into the broader region of the historical development of the kingdom of God. The problem which St. Paul here faces grew so directly out of his fundamental doctrine of justification by faith alone, with complete disregard of all question of merit or vested privilege, that it must have often forced itself upon his attention, — himself a Jew with a high estimate of a Jew's privileges and a passionate love for his people. He could not but have pondered it frequently and deeply, and least of all could he have failed to give it treatment in an Epistle like this, which undertakes to provide a somewhat formal exposition of his whole doctrine of justification. Having shown the necessity of such a method of salvation as he proclaimed, if sinful men were to be saved at all (1^{18}–3^{20}), and then expounded its nature and evidence (3^{21}–5^{21}), and afterwards discussed its intensive effects (6^{1}–8^{39}), he could not fail further to explain its extensive effects— especially when they appeared to be of so portentous a character as to imply a reversal of what was widely believed to have been God's mode of working heretofore, the rejection of His people whom He foreknew, and the substitution of the alien in their place. St. Paul's solution of the problem is, briefly, that the situation has been gravely misconceived by those who so represent it; that nothing of the sort thus described has happened or will happen; that what has happened is merely that in the constitution of that people whom He has chosen to Himself and is fashioning to His will, God has again exercised that sovereignty which He had previously often exercised, and which He had always expressly reserved to Himself and frequently proclaimed as the principle of His dealings with the people emphatically of His choice. In his exposition of this solution St. Paul first defends the propriety of God's action ($9^{6\text{-}29}$), then turns to stop the mouth of the objecting Jew by exposing the manifested unfitness of the Jewish people for the kingdom (9^{30}–10^{21}), and finally expounds with great richness the ameliorating circumstances in the whole transaction ($11^{1\text{-}36}$). In the course of his defence of God's rejection of the mass of contemporary Israel, he sets forth the sovereignty of God in the whole matter of salvation—'that the purpose of God according to election might stand, not of works, but of Him that calleth'—with a sharpness of assertion and a clearness of illustration which leave nothing to be added in order to throw it out in the full strength of its conception. We are pointed illustratively to the sovereign acceptance of Isaac and rejection of Ishmael, and to the choice of Jacob and not of Esau before their birth and therefore before either had done good or bad; we are explicitly told that in the matter of salvation it is not of him that wills, or of him that runs, but of God that shows mercy, and that has mercy on whom He wills, and whom He wills He hardens; we are pointedly directed to behold in God the potter who makes the vessels which proceed from His hand each for an end of His appointment, that He may work out His will upon them. It is safe to say that language cannot be chosen better adapted to teach predestination at its height.

We are exhorted, indeed, not to read this language in isolation, but to remember that the ninth chapter must be interpreted in the light of the eleventh. Not to dwell on the equally important consideration that the eleventh chapter must likewise be interpreted only in the light of the ninth, there seems here to exhibit itself some forgetfulness of the inherent continuity of St. Paul's thought, and, indeed, some misconception of the progress of the argument through the section, which is a compact whole and must express a much pondered line of thought, constantly present to the apostle's mind. We must not permit to fall out of sight the fact that the whole extremity of assertion of the ninth chapter is repeated in the eleventh ($11^{4\text{-}10}$); so that there is no change of conception or lapse of consecution observable as the argument develops, and we do not escape from the doctrine of predestination of the ninth chapter in fleeing to the eleventh. This is true even if we go at once to the great closing declaration of 11^{32}, to which we are often directed as to the key of the whole section—which, indeed, it very much is: 'For God hath shut up all unto disobedience, that he might have mercy upon all.' On the face of it there could not readily be framed a more explicit assertion of the Divine control and the Divine initiative than this; it is only another declaration that He has mercy on whom He will have mercy, and after the manner and in the order that He will. And it certainly is not possible to read it as a declaration of universal salvation, and thus reduce the whole preceding exposition to a mere tracing of the varying pathways along which the common Father leads each individual of the race severally to the common goal. Needless to point out that thus the whole argument would be stultified, and the apostle convicted of gross exaggeration in tone and language where otherwise we find only impressive solemnity, rising at times into natural anguish. It is enough to observe that the verse cannot bear this sense in its context. Nothing is clearer than that its purpose is not to minimise but to magnify the sense of absolute dependence on the Divine mercy, and to quicken apprehension of the mystery of God's righteously loving ways; and nothing is clearer than that the reference of the double 'all' is exhausted by the two classes discussed in the immediate context,—so that they are not to be taken individualistically but, so to speak, racially. The intrusion of the individualistic-universalistic sentiment, so dominant in the modern consciousness, into the interpretation of this section, indeed, is to throw the whole into inextricable confusion. Nothing could be further from the nationalistic-universalistic point of view from which it was written, and from which alone St. Paul can be understood when he represents that in rejecting the mass of contemporary Jews God has not cast off His people, but, acting only as He had frequently done in former ages, is fulfilling His promise to the kernel while shelling off the husk. Throughout the whole process of pruning and ingrafting which he traces in the dealings of God with the olive-tree which He has once for all planted, St. Paul sees God, in accordance with His promise, saving His people. The continuity of its stream of life he perceives preserved throughout all its present experience of rejection ($11^{1\text{-}10}$); the gracious purpose of the present confinement of its channel, he traces with eager hand ($11^{11\text{-}15}$); he predicts with confidence the attainment in the end of the full breadth of the promise ($11^{15\text{-}32}$),—all to the praise of the glory of God's grace ($11^{33\text{-}36}$). There is undoubtedly a universalism of salvation proclaimed here; but it is an eschatological, not an individualistic universalism. The day is certainly to come when the whole world—inclusive of all the Jews and Gentiles alike, then dwelling on the globe—shall know and serve the Lord; and God in all His strange work of distributing salvation is leading the course of events to that great goal; but meanwhile the principle of His action is free, sovereign grace, to which alone it is to be attributed that any who are saved in the meantime enter into their inheritance, and through which alone shall the final goal of the race itself be attained. The central thought of the whole discussion, in a word, is that Israel does not owe the promise to the fact that it is Israel, but conversely owes the fact that it is Israel to the promise,—that 'it is not the children of the flesh that are the children of God, but the children of the promise that are reckoned for a seed' (9^{8}). In these words we hold the real key to the whole section; and if we approach it with this key in hand we shall have little difficulty in apprehending that, from its beginning to its end, St. Paul has no higher object than to make clear that the inclusion of any individual within the kingdom of God finds its sole cause in the sovereign grace of the choosing God, and cannot in any way or degree depend upon his own merit, privilege, or act.

Neither, with this key in our hand, will it be possible to raise a question whether the election here expounded is to eternal life or not rather merely to prior privilege or higher service. These too, no doubt, are included. But by what right is this long section intruded here as a substantive part of this Epistle, busied as a whole with the exposition of 'the power of God unto salvation to every one that believeth, to the Jew first and also to the Greek,' if it has no direct concern with this salvation? By what chance has it attached itself to that noble grounding of a Christian's hope and assurance with which the eighth chapter closes? By what course of thought does it reach its own culmination in that burst of praise to God, on whom all things depend, with which it concludes? By what accident is it itself filled with the most unequivocal references to the saving grace of God 'which hath been poured out on the vessels of his mercy which he afore prepared for glory, even on us whom he also called, not from the Jews only, but also from the Gentiles'? If such language has no reference to salvation, there is no language in the NT that need be interpreted of final destiny. Beyond question this section does explain to us some of the grounds of the mode of God's action in gathering a people to Himself out of the world; and in doing this, it does reveal to us some of the ways in which the distribution of His electing grace serves the purposes of His kingdom on earth; reading it, we certainly do learn that God has many ends to serve in His gracious dealings with the children of men, and that we, in our ignorance of His multifarious purposes, are not fitted to be His counsellors. But by all this, the fact is in no wise obscured that it is primarily to salvation that He calls His elect, and that whatever other ends their election may subserve, this fundamental end will never fail; that in this, too, the gifts and calling of God are not repented of, and will surely lead on to their goal. The difficulty which is felt by some in following the apostle's argument here, we may suspect, has its roots in part in a shrinking from what appears to them an arbitrary assignment of men to diverse destinies without consideration of their desert. Certainly St. Paul as explicitly affirms the sovereignty of reprobation as of election,—if these twin ideas are, indeed, separable even in thought: if he represents God as sovereignly loving Jacob, he represents Him equally as sovereignly hating Esau; if he declares that He has mercy on whom He will, he equally declares that He hardens whom He will. Doubtless the difficulty often felt here is, in part, an outgrowth of an insufficient realization of St. Paul's basal conception of the state of men at large as condemned sinners before an angry God. It is with a world of lost sinners that he is representing God as dealing; and out of that world building up a Kingdom of Grace. Were not all men sinners, there might still be an election, as sovereign as now; and there being an election, there would still be as sovereign a rejection: but the rejection would not be a rejection to punishment, to destruction, to eternal death, but to some other destiny consonant to the state in which those passed by should be left. It is not indeed, then, because men are sinners that men are left unelected; election is free, and its obverse of rejection must be equally free: but it is solely because men are sinners that what they are left to is destruction. And it is in this universalism of ruin rather than in a universalism of salvation that St. Paul really roots his theodicy. When all deserve death it is a marvel of pure grace that any receive life; and who shall gainsay the right of Him who shows this miraculous mercy, to have mercy on whom He will, and whom He will to harden? (See Reprobate).

(*c*) In Eph 1^{1-12} there is, if possible, an even higher note struck. Here, too, St. Paul is dealing primarily with the blessings bestowed on his readers, in Christ, all of which he ascribes to the free grace of God; but he so speaks of these blessings as to correlate the gracious purpose of God in salvation, not merely with the plan of operation which He prosecutes in establishing and perfecting His kingdom on earth, but also with the all-embracing decree that underlies His total cosmical activity. In opening this circular letter, addressed to no particular community whose special circumstances might suggest the theme of the thanksgiving with which he customarily begins his letters, St. Paul is thrown back on what is common to Christians; and it is probably to this circumstance that we owe the magnificent description of the salvation in Christ with which the Epistle opens, and in which this salvation is traced consecutively in its preparation (vv.$^{4.5}$), its execution ($^{6.7}$), its publication ($^{8-10}$), and its application ($^{11-14}$), both to Jews ($^{11.12}$) and to Gentiles ($^{13.14}$). Thus, at all events, we have brought before us the whole ideal history of salvation in Christ from eternity to eternity—from the eternal purpose as it lay in the loving heart of the Father, to the eternal consummation, when all things in heaven and earth shall be summed up in Christ. Even the incredible profusion of the blessings which we receive in Christ, described with an accumulation of phrases that almost defies exposition, is less noticeable here than the emphasis and reiteration with which the apostle carries back their bestowment on us to that primal purpose of God in which all things are afore prepared ere they are set in the way of accomplishment. All this accumulation of blessings, he tells his readers, has come to them and him only in fulfilment of an eternal purpose—only because they had been chosen by God out of the mass of sinful men, in Christ, before the foundation of the world, to be holy and blameless before Him, and had been lovingly predestinated unto adoption through Jesus Christ to Him, in accordance with the good-pleasure of His will, to the praise of the glory of His grace. It is therefore, he further explains, that to them in the abundance of God's grace there has been brought the knowledge of the salvation in Christ, described here as the knowledge of the mystery of the Divine will, according to His good-pleasure, which He purposed in Himself with reference to the dispensation of the fulness of the times, to sum up all things in the universe in Christ,—by which phrases the plan of salvation is clearly exhibited as but one element in the cosmical purpose of God. And thus it is, the apostle proceeds to explain, only in pursuance of this all-embracing cosmical purpose that Christians, whether Jews or Gentiles, have been called into participation of these blessings, to the praise of the glory of God's grace,—and of the former class, he pauses to assert anew that their call rests on a predestination according to the purpose of Him that works all things according to the counsel of His will. Throughout this elevated passage, the resources of language are strained to the utmost to give utterance to the depth and fervour of St. Paul's conviction of the absoluteness of the dominion which the God, whom he describes as Him that works all things according to the counsel of His will, exercises over the entire universe, and of his sense of the all-inclusive perfection of the plan on which He is exercising His world-wide government—into which world-wide government His administration of His grace, in the salvation of Christ, works as one element. Thus there is kept steadily before our eyes the wheel within wheel of the all-comprehending decree of God: first of all, the inclusive cosmical purpose in accordance with which the universe is governed as it is led to its destined end; within this, the purpose relative to the kingdom of God, a substantive part, and, in some sort, the hinge of the world-purpose itself; and still within this, the purpose of grace relative to the individual, by virtue of which he is called into the Kingdom and made sharer in its blessings: the common element with them all being that they are and come to pass only in accordance with the good-pleasure of His will, according to His purposed good-pleasure, according to the purpose of Him who works all things in accordance with the counsel of His will; and therefore all alike redound solely to His praise.

In these outstanding passages, however, there are only expounded, though with special richness, ideas which govern the Pauline literature, and which come now and again to clear expression in each group of St. Paul's letters. The whole doctrine of election, for instance, lies as truly in the declaration of 2 Th 2^{13} or that of 2 Ti 1^{9} (cf. 2 Ti 2^{19}, Tit 3^{5}) as in the passages we have considered from Romans (cf. 1 Co 1^{26-31}) and Ephesians (cf. Eph 2^{10}, Col 1^{27} $3^{12.15}$, Ph 4^{3}). It may be possible to trace minor distinctions through the several groups of letters in forms of statement or modes of relating the doctrine to other conceptions; but from the beginning to the end of St. Paul's activity as a Christian teacher his fundamental teaching as to the Christian calling and life is fairly summed up in the declaration that those that are saved are God's 'workmanship created in Christ Jesus unto good works, which God afore prepared that they should walk in them' (Eph 2^{10}).

The most striking impression made upon us by a survey of the whole material is probably the intensity of St. Paul's practical interest in the doctrine—a matter fairly illustrated by the passage just quoted (Eph 2^{10}). Nothing is more noticeable than his zeal in enforcing its two chief practical contents—the assurance it should bring to believers of their eternal safety in the faithful hands of God, and the ethical energy it should arouse within them to live worthily of their vocation. It is one of St. Paul's most persistent exhortations, that believers should remember that their salvation is not committed to their own weak hands, but rests securely on the faithfulness of the God who has called them according to His purpose (*e.g.* 1 Th 5^{24}, 1 Co $1^{8f.}$ 10^{13}, Ph 1^{6}). Though the appropriation of their salvation begins in an act of faith on their own part, which is consequent on the hearing of the gospel, their appointment to salvation itself does not depend on this act of faith, nor on any fitness discoverable in them on the foresight of which God's choice of them might be supposed to be based, but (as 1 Th 2^{13} already indicates) both the preaching of the gospel and the exercise of faith consistently appear as steps in the carrying out of an election not conditioned on their occurrence, but embracing them as means to the end set by the free purpose of God. The case is precisely the same with all subsequent acts of the Christian life. So far is St. Paul from supposing that election to life should operate to enervate moral endeavour, that it is precisely from the fact that the willing and doing of man rest on an energizing willing and doing of God, which in turn rest on His eternal purpose, that the apostle derives his most powerful and most frequently urged motive for ethical action. That tremendous 'therefore,' with which at the opening of the twelfth chapter of Romans he passes from the doctrinal to the ethical part of the Epistle,—from a doctrinal exposition the very heart of which is salvation by pure grace apart from all works, and which had just closed with the fullest discussion of the effects of election to be found in all his writings, to the rich exhortations to high moral effort with which the closing chapters of this Epistle are filled,—may justly be taken as the normal illation of his whole ethical teaching. His Epistles, in fact, are sown (as indeed is the whole NT) with particular instances of the same appeal (*e.g.* 1 Th 2^{12}, 2 Th $2^{13\text{-}15}$, Ro 6, 2 Co 5^{14}, Col 1^{10}, Ph 1^{21} $2^{12.13}$, 2 Ti 2^{19}). In Ph $2^{12.13}$ it attains, perhaps, its sharpest expression: here the saint is exhorted to work out his own salvation with fear and trembling, just because it is God who is working in him both the willing and the doing because of His 'good-pleasure'—obviously but another way of saying, 'If God is for us, who can be against us?'

There is certainly presented in this a problem for those who wish to operate in this matter with an irreconcilable 'either, or,' and who can conceive of no freedom of man which is under the control of God. St. Paul's theism was, however, of too pure a quality to tolerate in the realm of creation any force beyond the sway of Him who, as he says, is over all, and through all, and in all (Eph 4^{6}), working all things according to the counsel of His will (Eph 1^{11}). And it must be confessed that it is more facile than satisfactory to set his theistic world-view summarily aside as a 'merely religious view,' which stands in conflict with a truly ethical conception of the world—perhaps even with a repetition of Fritzsche's jibe that St. Paul would have reasoned better on the high themes of 'fate, free-will, and providence' had he sat at the feet of Aristotle rather than at those of Gamaliel. Antiquity produced, however, no ethical genius equal to St, Paul, and even as a teacher of the foundations of ethics Aristotle himself might well be content to sit rather at his feet; and it does not at once appear why a so-called 'religious' conception may not have as valid a ground in human nature, and as valid a right to determine human conviction, as a so-called 'ethical' one. It can serve no good purpose even to proclaim an insoluble antinomy here: such an antinomy St. Paul assuredly did not feel, as he urged the predestination of God not more as a ground of assurance of salvation than as the highest motive of moral effort; and it does not seem impossible for even us weaker thinkers to follow him some little way at least in looking upon those twin bases of religion and morality—the ineradicable feelings of dependence and responsibility—not as antagonistic sentiments of a hopelessly divided heart, but as fundamentally the same profound conviction operating in a double sphere. At all events, St. Paul's pure theistic view-point, which conceived God as in His providential *concursus* working all things according to the counsel of His will (Eph 1^{11}) in entire consistency with the action of second causes, necessary and free, the proximate producers of events, supplied him with a very real point of departure for his conception of the same God, in the operations of His grace, working the willing and the doing of Christian men, without the least infringement of the integrity of the free determination by which each grace is proximately attained. It does not belong to our present task to expound the nature of that Divine act by which St. Paul represents God as 'calling' sinners 'into communion with his Son,' itself the first step in the realization in their lives of that conformity to His image to which they are predestinated in the counsels of eternity, and of which the first manifestation is that faith in the Redeemer of God's elect out of which the whole Christian life unfolds. Let it only be observed in passing that he obviously conceives it as an act of God's almighty power, removing old inabilities and creating new abilities of living, loving action. It is enough for our present purpose to perceive that even in this act St. Paul did not conceive God as dehumanizing man, but rather as energizing man in a new direction of his powers; while in all his subsequent activities the analogy of the *concursus* of Providence is express. In his own view, his strenuous assertion of the predetermination in God's purpose of all the acts of saint and sinner alike in the matter of salvation, by which the discrimination of men into saved and lost is carried back to the free counsel of God's will, as little involves violence to the ethical spontaneity of their activities on the one side, as on the other it involves unrighteousness in God's dealings with His creatures. He does not speculatively discuss the methods of the Divine providence; but the fact of its universality—over all beings and actions alike—forms one of his most primary presuppositions; and naturally he finds no difficulty in postulating the inclusion in the prior intention of God of what is subsequently evolved in the course of His providential government.

v. The Bible Doctrine of Predestination.—A survey of the whole material thus cursorily brought before us exhibits the existence of a consistent Bible doctrine of predestination, which, because rooted in, and indeed only a logical outcome of, the fundamental Biblical theism, is taught in all its essential elements from the beginning of the Biblical revelation, and is only more fully unfolded in detail as the more developed religious consciousness and the course of the history of redemption required.

The *subject* of the Decree is uniformly conceived as God in the fulness of His moral personality. It is not to chance, nor to necessity, nor yet to an abstract or arbitrary will,—to God acting inadvertently, inconsiderately, or by any necessity of nature,—but specifically to the almighty, all-wise, all-holy, all-righteous, faithful, loving God, to the Father of our Lord and Saviour Jesus Christ, that is ascribed the predetermination of the course of events. Naturally, the contemplation of the plan in accordance with which all events come to pass calls out primarily a sense of the unsearchable wisdom of Him who framed it, and of the illimitable power of Him who executes it; and these attributes are accordingly much dwelt upon when the Divine predestination is adverted to. But the moral attributes are no less emphasized, and the Biblical writers find their comfort continually in the assurance that it is the righteous, holy, faithful, loving God in whose hands rests the determination of the sequence of events and all their issues. Just because it is the determination of God, and represents Him in all His fulness, the decree is ever set forth further as in its *nature* eternal, absolute, and immutable. And it is only an explication of these qualities when it is further insisted upon, as it is throughout the Bible, that it is essentially one single composite purpose, into which are worked all the details included in it, each in its appropriate place; that it is the pure determination of the Divine will—that is, not to be confounded on the one hand with an act of the Divine intellect on which it rests, nor on the other with its execution by His power in the works of creation and providence; that it is free and unconditional—that is, not the product of compulsion from without nor of necessity of nature from within, nor based or conditioned on any occurrence outside itself, foreseen or unforeseen; and that it is certainly efficacious, or rather constitutes the unchanging norm according to which He who is the King over all administers His government over the universe. Nor is it to pass beyond the necessary implications of the fundamental idea when it is further taught, as it is always taught throughout the Scriptures, that the *object* of the decree is the whole universe of things and all their activities, so that nothing comes to pass, whether in the sphere of necessary or free causation, whether good or bad, save in accordance with the provisions of the primal plan, or more precisely save as the outworking in fact of what had lain in the Divine mind as purpose from all eternity, and is now only unfolded into actuality as the fulfilment of His all-determining will. Finally, it is equally unvaryingly represented that the *end* which the decreeing God had in view in framing His purpose is to be sought not without but within Himself, and may be shortly declared as His own praise, or, as we now commonly say, the glory of God. Since it antedates the existence of all things outside of God and provides for their coming into being, they all without exception must be ranked as means to its end, which can be discovered only in the glory of the Divine purposer Himself. The whole Bible doctrine of the decree revolves, in a word, around the simple idea of purpose. Since God is a Person, the very mark of His being is purpose. Since He is an infinite Person, His purpose is eternal and independent, all-inclusive and effective. Since He is a moral Person, His purpose is the perfect exposition of all His infinite moral perfections. Since He is the personal creator of all that exists, His purpose can find its final cause only in Himself.

Against this general doctrine of the decree, the Bible doctrine of ELECTION is thrown out into special prominence, being, as it is, only a particular application of the general doctrine of the decree to the matter of the dealings of God with a sinful race. In its fundamental characteristics it therefore partakes of all the elements of the general doctrine of the decree. It, too, is necessarily an act of God in His completeness as an infinite moral Person, and is therefore eternal, absolute, immutable—the independent, free, unconditional, effective determination by the Divine will of the objects of His saving operations. In the development of the idea, however, there are certain elements which receive a special stress. There is nothing that is more constantly emphasized than the absolute *sovereignty* of the elective choice. The very essence of the doctrine is made, indeed, to consist in the fact that, in the whole administration of His grace, God is moved by no consideration derived from the special recipients of His saving mercy, but the entire account of its distribution is to be found hidden in the free counsels of His own will. That it is not of him that runs, nor of him that wills, but of God that shows mercy, that the sinner obtains salvation, is the steadfast witness of the whole body of Scripture, urged with such reiteration and in such varied connexions as to exclude the possibility that there may lurk behind the act of election considerations of foreseen characters or acts or circumstances—all of which appear rather as results of election as wrought out in fact by the *providentia specialissima* of the electing God. It is with no less constancy of emphasis that the roots of the Divine election are planted in His unsearchable love, by which it appears as *the supreme act of grace*. Contemplation of the general plan of God, including in its provisions every event which comes to pass in the whole universe of being during all the ages, must redound in the first instance to the praise of the infinite wisdom which has devised it all; or as our appreciation of its provisions is deepened, of the glorious righteousness by which it is informed. Contemplation of the particular element in His purpose which provides for the rescue of lost sinners from the destruction due to their guilt, and their restoration to right and to God, on the other hand draws our thoughts at once to His inconceivable love, and must redound, as the Scriptures delight to phrase it, to the praise of His glorious grace. It is ever, therefore, specifically to the love of God that the Scriptures ascribe His elective decree, and they are never weary of raising our eyes from the act itself to its source in the Divine compassion. A similar emphasis is also everywhere cast on the *particularity* of the Divine election. So little is it the designation of a mere class to be filled up by undetermined individuals in the exercise of their own determination; or of mere conditions, or characters, or qualities, to be fulfilled or attained by the undetermined activities of individuals, foreseen or unforeseen; that the Biblical writers take special pains to carry home to the heart of each individual believer the assurance that he himself has been from all eternity the particular object of the Divine choice, and that he owes it to this Divine choice alone that he is a member of the class of the chosen ones, that he is able to fulfil the conditions of salvation, that he can hope to attain the character on which alone God can look with complacency, that he can look forward to an eternity of bliss as his own possession. It is the very nerve of the Biblical doctrine that each individual of that enormous multitude that constitutes the great host of the people of God, and that is illustrating the character of Christ in the new life now lived in the strength of the Son of God, has from all eternity been the particular object of the Divine regard, and is only now fulfilling the high destiny designed for him from the foundation of the world.

The Biblical writers are as far as possible from obscuring the doctrine of election because of any seemingly unpleasant corollaries that flow from it. On the contrary, they expressly draw the corollaries which have often been so designated, and make them a part of their explicit teaching. Their doctrine of election, they are free to tell us, for example, does certainly involve a corresponding *doctrine of preterition*. The very term adopted in NT to express it—*ἐκλέγομαι*, which, as Meyer justly says (Eph 1^4), '*always* has, and must *of logical necessity* have, a reference to *others* to whom the chosen would, without the *ἐκλογή*, still belong'—embodies a declaration of the fact that in their election others are passed by and left without the gift of salvation; the whole presentation of the doctrine is such as either to imply or openly to assert, on its every emergence, the removal of the elect by the pure grace of God, not merely from a state of condemnation, but out of the company of the condemned—a company on whom the grace of God has no saving effect, and who are therefore left without hope in their sins; and the positive just reprobation of the impenitent for their sins is repeatedly explicitly taught in sharp contrast with the gratuitous salvation of the elect despite their sins. But, on the other hand, it is ever taught that, as the body out of which believers are chosen by God's unsearchable grace is the mass of justly condemned sinners, so the destruction to which those that are passed by are left is the righteous recompense of their guilt. Thus the discrimination between men in the matter of eternal destiny is distinctly set forth as taking place in the interests of mercy and for the sake of salvation: from the fate which justly hangs over all, God is represented as in His infinite compassion rescuing those chosen to this end in His inscrutable counsels of mercy to the praise of the glory of His grace; while those that are left in their sins perish most deservedly, as the justice of God demands. And as the broader lines of God's gracious dealings with the world lying in its iniquity are more and more fully drawn for us, we are enabled ultimately to perceive that the Father of spirits has not distributed His elective grace with niggard hand, but from the beginning has had in view the restoration to Himself of the whole world; and through whatever slow approaches (as men count slowness) He has made thereto—first in the segregation of the Jews for the keeping of the service of God alive in the midst of an evil world, and then in their rejection in order that the fulness of the Gentiles might be gathered in, and finally through them Israel in turn may all be saved—has ever been conducting the world in His loving wisdom and His wise love to its destined goal of salvation,—now and again, indeed, shutting up this or that element of it unto disobedience, but never merely in order that it might fall, but that in the end He might have mercy upon all. Thus the Biblical writers bid us raise our eyes, not only from the justly condemned lost, that we may with deeper feeling contemplate the marvels of the Divine love in the saving of sinners no better than they and with no greater claims on the Divine mercy; but from the relatively insignificant body of the lost, as but the prunings gathered beneath the branches of the olive-tree planted by the Lord's own hand, to fix them on the thrifty stock itself and the crown of luxuriant leafage and ever more richly ripening fruit, as under the loving pruning and grafting of the great Husbandman it grows and flourishes and puts forth its boughs until it shall shade the whole earth. This, according to the Biblical writers, is the end of election; and this is nothing other than the salvation of the world. Though in the process of the ages the goal is not attained without prunings and fires of burning,—though all the wild-olive twigs are not throughout the centuries grafted in, —yet the goal of a saved world shall at the end be gloriously realized. Meanwhile, the hope of the world, the hope of the Church, and the hope of the individual alike, is cast solely on the mercy of a freely electing God, in whose hands are all things, and not least the care of the advance of His saving grace in the world. And it is undeniable that whenever, as the years have passed by, the currents of religious feeling have run deep, and the higher ascents of religious thinking have been scaled, it has ever been on the free might of Divine grace that Christians have been found to cast their hopes for the salvation alike of the world, the Church, and the individual; and whenever they have thus turned in trust to the pure grace of God, they have spontaneously given expression to their faith in terms of the Divine election.

See also ELECTION, REPROBATE, WILL.

LITERATURE.—The Biblical material can best be surveyed with the help of the Lexicons on the terms employed (esp. Cremer), the commentaries on the passages, and the sections in the several treatises on Biblical Theology dealing with this and cognate themes; among these last, the works of Dillmann on the OT, and Holtzmann on the NT, may be especially profitably consulted. The Pauline doctrine has, in particular, been made the subject of almost endless discussion, chiefly, it must be confessed, with the object of softening its outlines or of explaining it more or less away. Perhaps the following are the more important recent treatises:—Poelman, *de Jesu Apostolorumque, Pauli præsertim, doctrina de prædestinatione divina et morali hominis libertate*, Gron. 1851; Weiss, 'Predestinationslehre des Ap. Paul,' in *Jahrbb. f. D. Theol.* 1857, p. 54 f.; Lamping, *Pauli de prædestinatione decretorum enarratio*, Leov. 1858; Goens, *Le rôle de la liberté humaine dans la prédestination Paulinienne*, Lausanne, 1884; Ménégoz, *La prédestination dans la théologie Paulinienne*, Paris, 1885; Dalmer, 'Zur Paulinischen Erwählungslehre,' in *Greifswälder Studien*, Gütersloh, 1895. The publication of Karl Müller's valuable treatise on *Die Göttliche Zuvorersehung und Erwählung*, etc. (Halle, 1892), has called out a new literature on the section Ro 9-11, the most important items in which are probably the reprint of Beyschlag's *Die Paulinische Theodicee* (1896, first published in 1868), and Dalmer, *Die Erwählung Israels nach der Heilsverkündigung des Ap. Paul.* (Gütersloh, 1894), and Kuhl, 'Zur Paulinischen Theodicee,' in the *Theologische Studien*, presented to B. Weiss (Göttingen, 1897). But of these only Goens recognizes the double predestination; even Müller, whose treatise is otherwise of the first value, argues against it, and so does Dalmer in his very interesting discussions; the others are still less in accordance with their text (cf. the valuable critical note on the recent literature in Holtzmann's *NT Theologie*, ii. 171-174).

Discussions of the doctrine of post-Canonical Judaism may be found in Hamburger, *Real-Encyc.* ii. 102 f., art. 'Bestimmung'; Weber, *Jüd. Theol.* 148 ff., 205 ff.; Schürer, *HJP* II. ii. 14 f. (cf. p. 2 f., where the passages from Josephus are collected); Edersheim, *Life and Times of Jesus*, i. 316 ff., art. 'Philo' in Smith and Wace, 383^{a}, and *Speak. Com.* on Ecclesiasticus, pp. 14, 16; Ryle and James, *Psalms of Solomon* on 9^{7} and Introd.; Montet, *Origines des partis saducéen et pharisien*, 258 f.; Holtzmann, *NT Theologie*, i. 32, 55; P. J. Muller, *De Godsleer der middeleeuwische Joden*, Groningen, 1898; further literature is given in Schürer.—For post-Canonical Christian discussion, see the literature at the end of art. PREDICTION.—See PROPHECY, p. 120 f.

PRE-EXISTENCE OF SOULS.—The only hint in NT of a belief in the existence of human souls prior to birth is in Jn 9^{2}, where the disciples of Jesus put the question, 'Rabbi, who did sin, *this man*, or his parents, that he should be *born* blind?' The *primâ facie* interpretation of this passage certainly is that the disciples believed it possible that the soul of this man had sinned before the man was born. Many commentators, as, *e.g.*, Dr. David Brown, hold this to be untenable, because 'the Jews did not believe in the pre-existence of souls.' If by this is meant that this belief did not form part of the older Jewish religion, that would be correct, for the tenor of OT teaching is distinctly traducian. In Gn 2^{7} we are taught that the soul of the first man was due to the Divine in-breathing; and Gn 5^{3} tells that 'Adam begat a son, after his image.' But to affirm that Jews in Christ's time did not believe in pre-existence, is simply inaccurate. The disciples of Jesus had at all events *some* points of affinity with the Essenes; and Josephus expressly states that the Essenes believe that the souls of men are immortal, and dwell in the subtlest ether, but, being drawn down by physical passion, they are united with bodies, as it were in prisons (*BJ* II. viii. 11). In Wis 8^{11} the doctrine is clearly taught: 'A good soul fell to my lot: nay rather, being good I came into a body that was undefiled.' Philo also believed in a realm of incorporeal souls, which may be arranged in two ranks: some have descended into mortal bodies and been released after a time; others have maintained their purity, and kept aloft close to the ether itself (Drummond, *Philo Judæus*, i. 336). In the Talmud and Midrash, pre-existence is constantly taught. The abode of souls is called *Guph*, or the Treasury (אוֹצָר), where they have dwelt since they were created in the beginning. The angel Lilith receives instruction from God as to which soul shall inhabit each body. The soul is taken to heaven and then to hell, and afterwards enters the womb and vivifies the fœtus. (Weber, *Lehren des Talmud*, 204, 217 ff. [*Jüd. Theologie auf Grund des Talmud*^{2}, etc. 212, 225 ff.]).

Whence did Judaism derive a creed so much at variance with its earlier faith? Most probably from Plato. There are some scholars, however, who find support for the doctrine even in the OT: *e.g.* Job 1^{21} 'Naked came I from my mother's womb, and naked shall I return thither.' To find pre-existence here, one must suppose the mother's womb to be the abode of souls, and 'I' to be the naked soul. Sir 40^{1} seems to be explaining the word 'thither' in Job 1^{21}, when it says, 'Great travail is created for every man, from the day they go forth from their mother's womb to the day of their return to the *mother of all living*.' Again, in Ps 139$^{13-15}$ some scholars find an account of the origin, first, of the body, then of the soul: 'Thou hast woven me in the womb of my *mother*. My substance was not hid from thee, when I was formed in the secret place, when I was wrought in the deeps of the *earth*.' Since the doctrine of pre-existence is not in the line of Revelation, most divines are reluctant to admit that it is taught in these passages. Dr. Davidson on Job 1^{21} says, 'The words "my mother's womb" must be taken literally; and "return thither" somewhat inexactly, to describe a condition similar to that which preceded entrance upon life and light.' And as for Ps 139^{15}, Oehler, Dillmann, and Schultz prefer to interpret it of the formation of the *body* in a place as dark and mysterious as the depths of the earth. The passage in Jn 9^{2} simply represents the earlier creed of the disciples. There is no evidence that it formed part of their mature Christian faith.

J. T. MARSHALL.

PREPARATION DAY (*ἡ παρασκευή*).—In the Gospels the day on which Christ died is called 'the

Preparation' (Mt 27^{62}, Mk 15^{42}, Jn 19^{31}), 'the day of (the) Preparation' (Lk 23^{54}), 'the Jews' Preparation (day)' (Jn 19^{42}), 'the Preparation of the passover' (Jn 19^{14}). In Mk and Lk it is further defined by the clauses, 'that is, the day before the Sabbath' (*προσάββατον*), and 'the Sabbath drew on.' 'The Preparation' therefore appears to have been the regular name for the sixth day of the week as 'Sabbath' was for the seventh. This is confirmed by Jos. (*Ant.* XVI. vi. 2), where it is said that Augustus relieved the Jews from certain legal duties on the Sabbath and on 'the Preparation which preceded it from the ninth hour.' In Jth 8^{6} mention is made of *προσάββατα* as well as *σάββατα*, and also of *προνουμηνίαι* (day preceding the festival of new moon); cf. also the LXX in Ps 92 (93) title: *εἰς τὴν ἡμέραν τοῦ προσαββάτου.* In the Talm. also the sixth day is called עֲרוּבְתָּא (evening), and the same word is used in the Syriac Gospels (*'ărûbhtâ*); while, in ecclesiastical writers beginning with the *Teaching of the Apostles* (viii.), *παρασκευή* is the regular name for Friday, as it still is in modern Greek. The title naturally arose from the need of preparing food, etc., for the Sabbath (see SABBATH). It was apparently applied first to the afternoon of the sixth day and afterwards to the whole day.

The phraseology in Jn 19^{14} ('it was the Preparation *of* the Passover') is, however, held by many expositors to indicate that by this term St. John meant the preparation *for* the paschal feast, *i.e.* Nisan 14. Some conclude that he used the term differently from the Synoptists, and as equivalent to the rabbinic עֶרֶב הַפֶּסַח (passover-eve); this being part of the alleged difference between him and them as to the date of Christ's death. Westcott (*Introd. to Gosp.* 1875, p. 339), on the other hand, argues that the Synoptists also meant 'preparation *for* the passover.' But the latter view forces their language, and St. John's phrase may properly mean 'the Preparation (day) of the paschal feast,' *i.e.* the Friday of passover-week. This is made the more probable by the Synoptists' use of it, and by its appearance, as the name for Friday, in so early a work as *The Teaching of the Apostles.* Its use in Jn $19^{31, 42}$ also best accords with this interpretation.

G. T. PURVES.

PRESBYTER.—See BISHOP, CHURCH GOVERNMENT, and following article.

PRESBYTERY (*πρεσβυτέριον*).—The Gr. word is used in NT for the Jewish Sanhedrin (Lk 22^{66}, Ac 22^{5}). See SANHEDRIN. It also occurs once where the connexion shows that it refers to the body of elders in a church, Timothy receiving a spiritual gift through the imposition of the hands of the presbytery (1 Ti 4^{14}). This implies a certain corporate unity in the collective action of the elders. Wherever the eldership appears in NT there is a plurality of elders. We have no means of discovering how many there were in each presbytery. The only numerical reference to the subject in NT is descriptive of the heavenly presbytery (Rev 4^{4} etc.), where the number 'twenty-four' is evidently mystical, referring perhaps to the double of the 'twelve,' which is drawn from the twelve tribes of Israel, or the twelve patriarchs together with the twelve apostles, or to the twenty-four courses of the priests (Simcox, *Rev.* p. 31). Probably the number would vary according to the size of the church, as the number of elders in a synagogue varied according to the population of Jews in its locality.

We have no evidence that in the earliest times there was a presbytery in every church. The references to discipline in Romans, Galatians, and esp. in 1 and 2 Corinthians, show that if presbyteries existed in the churches addressed they were not very prominent or powerful. The silence of St. Paul on the subject suggests the inference that at Corinth, at all events, and possibly also elsewhere, no presbytery had yet been formed. On the South-Galatian theory, however, Ac 14^{23} would indicate that there must have been elders in the churches to which the Ep. to Gal. was sent. At first the presbytery was almost, if not entirely, confined to Jewish churches (Hatch in *Dict. Chr. Ant.* art. 'Priest,' p. 1699 f.). Still the title *πρεσβύτερος* and the organization of local government in Gr. cities, still more the use of this title in religious guilds, must have prepared for the acceptance of a presbytery in Gentile circles of Christians (Löning, *Die Gemeindeverfassung*, p. 9). Even among the Jews, however, it does not appear that there were elders in connexion with every synagogue (Schürer, *HJP* II. ii. 27). It is reasonable, therefore, to conclude that at first the organization of a presbytery proceeded more rapidly in some churches than in others.

In teaching, of course, the presbyters would have acted separately according to their individual gifts and opportunities. It would be in government and discipline that the corporate presbytery discharged its principal functions. These appear to have been the chief functions of the presbyters, as they are the most frequently referred to. It was not every elder who undertook the work of teaching (1 Ti 5^{17}); but there is no indication that any of the elders were excepted from the duty of ruling. The function of exercising a general oversight of their church is implied in the use of the words *ἐπισκοπεῖν* (1 P $5^{1\text{ff.}}$) and *ἐπισκοπή* (Clem. Rom. 1st Ep. xliv. 1) for the duties of elders. At Jerusalem the presbytery served as a board of church finance, the contributions for the poor being delivered into the hands 'of the elders' (Ac 11^{30}). These elders acted jointly at the 'Jerusalem council,' where they appear associated with the apostles—'the apostles *and* the elders, *with* the whole church' (Ac 15^{22}). The reference to the ordination of Timothy shows that in performing that function the elders acted in concert (1 Ti 4^{14}). The analogy of the synagogue would suggest that in the discharge of their administrative and judicial functions the presbyters were united into a council, corresponding to the local Jewish *συνέδριον*. We have no account of the way in which they came to a decision. The precedent of the Sanhedrin would suggest that they would discuss questions and decide by vote. There is no indication that there was ever a serious discord in a presbytery during NT times. The question of the presidentship in the primitive presbytery is most obscure. St. James is president of the church at Jerusalem; but his case is altogether exceptional. As the brother of Jesus, he seems to have had a personal pre-eminence given to him. It does not appear that he was a presbyter. No similar pre-eminence is seen in any other church. The apostles, when they visit a church, naturally take the lead. But that is only temporary. The emergence of one elder over the head of his brethren with the exclusive use of the name 'bishop,' which was previously given to a plurality, if not to the whole, of the elders, is not found in NT, nor does it appear before the 2nd cent. In the NT the presbytery seems to consist of a body of elders of equal rank. See BISHOP, CHURCH, CHURCH GOVERNMENT, ELDER.

W. F. ADENEY.

PRESENT.—See GIFT.

PRESENTLY in AV always means 'at once' instead of, as now, 'soon, but *not* at once.' It occurs in 1 S 2^{16} (כַּיּוֹם, AVm 'as on the day,' RVm 'first'); Pr 12^{16} (בַּיּוֹם, AVm 'in that day,' RVm 'openly'); Sir 9^{13} (no Greek, RV omits); Mt 21^{19}

(παραχρῆμα, RV 'immediately'); 26^{53} (παραστήσει μοι, AV 'will presently give me,' RV 'will even now send me'); Ph 2^{23} (ἐξαυτῆς, RV 'forthwith'). In the same sense it is used also in the Preface to AV, as 'Neither were we barred or hindered from going over it again, having once done it, like Saint Hierome, if that be true which himself reporteth, that he could no sooner write anything, but presently it was caught from him and published, and he could not have leave to mend it.' Cf. Fuller, *Holy Warre*, 178, 'The Dominicanes and Franciscanes . . . were no sooner hatched in the world, but presently chirped in the pulpits'; and *Holy State*, 14, 'Base is their nature who . . . will let go none of their goods, as if it presaged their speedy death; whereas it doth not follow that he that puts off his cloke must presently go to bed.'

J. HASTINGS.

PRESIDENT occurs in EV only in Dn 6$^{2.\ 3.\ 4.\ 6.\ 7}$, as tr^{n} of סרך (only in plur. סָרְכִין, emphat. סָרְכַיָּא), which is probably a loanword from some Persian derivative of *sar* 'head,' and thus='chief' (Prince, *Dan.* p. 234). Daniel is said to have been one of the three 'presidents' who were set by Darius over the 120 satraps of his empire. Theod. renders in the above passage by τακτικοί except in v.^{7}, where he has στρατηγοί; LXX by ἡγούμενοι in v.^{2}, where alone the term is directly translated.

PRESS (ὄχλος) is used for a crowd in Mk 2^{4} 5$^{27.\ 30}$, Lk 8^{19} 19^{3}; RV always 'crowd.' Cf. Jn 5^{13}, Tind., 'Iesus had gotten him selfe awaye, because that ther was preace of people in the place'; Elyot, *Governour*, ii. 292, 'Such noble courage was in great kynge Alexander, that in hys warres agayne Darius, he was sene of all hys people fightynge in the prease of his enemyes bare heded'; and Spenser, *FQ* I. iii. 3—

> 'Yet she most faithfull ladie all this while
> Forsaken, wofull, solitarie mayd,
> Far from all peoples preace, as in exile,
> In wildernesse and wastfull deserts strayd,
> To seeke her knight.'

The verb to press is used in the same sense: Gn 19^{9} 'They pressed sore upon the man, even Lot, and came near to break the door' (וַיִּפְצְרוּ בָאִישׁ; but in v.^{3} AV 'press upon,' RV 'urge,' and in 33^{11} AV and RV 'urge,' the same word is used figuratively); 2 Mac 14^{9} 'Be careful for . . . our nation which is pressed on every side' (τοῦ περιϊσταμένου γένους ἡμῶν, RV 'our race, which is surrounded by foes,' RVm 'is hardly bestead'); Mk 3^{10} 'Insomuch that they pressed upon him for to touch him' (ὥστε ἐπιπίπτειν αὐτῷ, AVm 'rushed upon him,' RVm 'fell upon him'); Lk 5^{1} 'As the people pressed upon him to hear the word of God' (ἐν τῷ τὸν ὄχλον ἐπικεῖσθαι αὐτῷ); 8^{45} 'The multitude throng thee and press thee' (οἱ ὄχλοι συνέχουσί σε καὶ ἀποθλίβουσι, RV 'the multitudes press thee and crush thee'). From this it is easy to pass to the sense of urgent endeavour, as Lk 16^{16} 'Since that time the kingdom of God is preached, and every man presseth into it' (πᾶς εἰς αὐτὴν βιάζεται, RV 'every man entereth violently into it'); and Ph 3^{14} 'I press toward the mark' (κατὰ σκοπὸν διώκω, RV 'I press on toward the goal'). In Ac 18^{5} we have an application of the same meaning, but more figurative: 'Paul was pressed in the spirit and testified' (συνείχετο τῷ πνεύματι, edd. τῷ λόγῳ, RV 'was constrained by the word'). Cf. Lv 21^{17} Tind. 'No man of thi seed in their generacions that hath any deformyte apon him, shall prese for to offer the bred of his God'; Lk 14^{7} Tind. 'He put forthe a similitude to the gestes, when he marked how they preased to the hyest roumes'; Holland, *Marcellinus*, p. 70 (ed. 1609), 'Whiles the barbarous enemies preassed on all in plumpes and heapes.'

J. HASTINGS.

PRESS, PRESSFAT.—See FAT and WINE.

PREVENT.—This word is more frequently used in AV than in any previous version. It does not occur in Wyclif, and in Tindale but rarely. The AV was translated at the time of its greatest popularity. Its meaning is, after the Lat. *prævenire* and the Fr. *prévenir*, 'to be before,' 'to anticipate.' Very often the word has practically the opposite of its modern meaning. In a note to Jn 3^{18} the Rhemish translators say, 'The obstinate Heretike is condemned by his owne judgement, preventing in him self, of his owne free wil, the sentence both of Christ and of the Church.' The Heb. verb so translated in AV is always [קדם], chiefly in the Piel, twice (Job 41^{11}, Am 9^{10}) in the Hiphil. The Greek verbs are φθάνω (Wis 4^{7} 6^{13} 16^{28}, 1 Th 4^{15}), or προφθάνω (1 Mac 10^{23}, Mt 17^{25}), and once προκαταλαμβάνω (1 Mac 6^{27}).

1. *To be before, anticipate:* Ps 88^{13} 'In the morning shall my prayer prevent thee' (LXX προφθάσει σε, Vulg. *præveniet te*, Cov. 'cometh my prayer before thee,' Perowne 'cometh to meet thee,' RV as Cov. 'shall come before thee'); 119$^{147.\ 148}$ 'I prevented the dawning of the morning and cried' . . . 'mine eyes prevent the night watches' (LXX προέφθασάν με . . . προέφθασαν οἱ ὀφθαλμοί μου, Vulg. *præveni in maturitate . . . prævenerunt oculi mei*, Purvey 'I befor cam in ripenesse . . . myn eyen befor camen to thee ful eerli,' Cov. 'Early in the mornynge do I crie unto the . . . myne eyes prevente the night watches,' Cheyne 'I forestalled the daylight and cried for help . . . mine eyes outgo the night watches,' de Witt 'I am up before dawn . . . mine eyes forestall every watch in the night'); Wis 4^{7} 'Though the righteous be prevented with death, yet shall he be in rest' (ἐὰν φθάσῃ τελευτῆσαι, Vulg. *si morte præoccupatus fuerit*, Cov. 'be overtaken with death,' Gen. 'be prevented with death,' RV 'though he die before his time'); 6^{13} 'She [Wisdom] preventeth them that desire her, in making herself first known unto them' (φθάνει τοὺς ἐπιθυμοῦντας προγνωσθῆναι, Vulg. *Præoccupat qui se concupiscunt, ut illis se prior ostendat*, Cov. 'She preventeth them that desyre her,' RV 'She forestalleth them that desire to know her'); 16^{28} 'We must prevent the sun to give thee thanks' (δεῖ φθάνειν τὸν ἥλιον, Vulg. *oportet prævenire solem*, Gen. 'We oght to prevente the sunne rising to give thankes unto thee,' RV 'We must rise before the sun to give thee thanks'); Mt 17^{25} 'When he was come into the house, Jesus prevented him, saying, What thinkest thou, Simon?' (προέφθασεν αὐτὸν ὁ Ἰησοῦς, Vulg. *prævenit cum Iesus*, Wyc. 'Jhesus came bifore hym,' Tind. 'Iesus spake fyrst to him,' Cov. 'Iesus prevented him,' RV as Tind. 'Jesus spake first to him'); 1 Th 4^{15} 'We which are alive and remain unto the coming of the Lord shall not prevent them which are asleep' (ὅτι . . . οὐ μὴ φθάσωμεν τοὺς κοιμηθέντας, Vulg. *non præveniemus eos qui dormierunt*, Wyc. 'schulen not come bifore hem that slepten,' Tind. 'shall not come yerre they which slepe,' Gen. 'shal not prevent them which slepe'; RV 'shall in no wise precede them that are fallen asleep').

The following quotations illustrate this first meaning:—

Udall, *Erasmus' Paraphrase*, fol. vii., 'the Gentyles that wer far of do prevente the Jewes which wer thought to be next unto God'; Hall, *Contemplations*, ii. 122, 'When he was upon the sea of Tiberius . . . they followed him so fast on foot that they prevented his landing'; North's *Plutarch*, 879, 'The conspirators, having prevented this danger, saved themselves'; Mk 14^{8} Rhem. 'She hath prevented to anoint my body to the burial'; Milton, *Hymn on the Nativity*—

> 'See how from far upon the eastern rode
> The star-led Wizards haste with Odours sweet;
> O run, prevent them with thy humble ode,
> And lay it lowly at his blessed feet;
> Have thou the honour first thy Lord to greet.'

2. *To anticipate for one's good:* Job 41^{11} 'Who hath prevented me that I should repay him?' (מִי הִקְדִּימַנִי וַאֲשַׁלֵּם,* Vulg. *Quis ante dedit mihi ut reddam ei?*, Cov. 'Who hath geven me eny thynge afore hande, that I am bounde to rewarde him agayne?' RV 'Who hath first given unto me, that I should repay him?'); Ps 21^{3} 'Thou preventest him with the blessings of goodness' (LXX *προέφθασας αὐτὸν ἐν εὐλογίαις χρηστότητος*, Vulg. *prævenisti eum in benedictionibus dulcedinis*; Wyc. 'thou wentist beforn him in blessingus of sweetnesse,' Cov. 'thou hast prevented him with liberall blessinges'); 59^{10} 'The God of my mercy shall prevent me' (LXX *ὁ θεός μου, τὸ ἔλεος αὐτοῦ προφθάσει με*, Vulg. *Deus meus, misericordia ejus præveniet me*, Gen. 'My merciful God will prevent me'; Perowne, 'My God with his loving kindness shall come to meet me'); 79^{8} 'Let thy tender mercies speedily prevent us' (LXX *ταχὺ προκαταλαβέτωσαν ἡμᾶς οἱ οἰκτειρμοί σου*, Vulg. *cito anticipient nos misericordiæ suæ*, Gen. 'Make haste and let thy tender mercies prevent us,' de Witt 'Let thy mercies with speed come to meet us'); Is 21^{14} 'They prevented with their bread him that fled' (LXX *ἄρτοις συναντᾶτε τοῖς φεύγουσιν*, Vulg. *cum panibus occurrite fugienti*, Wyc. 'With loeves agencometh to the fleende,' Purvey 'Renne ye with looves to hym that fleeth'; Cov. 'Meet those with bread that are fled,' Gen. 'Prevent him that fleeth with his bread,' Cheyne 'With his bread meet the fugitive,' Skinner 'Meet the fugitive with bread [suitable] for him'; RV 'The inhabitants of Tema did meet the fugitives with their bread' [so Dt 23^{4} AV itself for same Heb.]).

Illustrations of this meaning are:

Pr. Bk. (1549) *End of Communion*, 'Prevent us, O Lord, in all our doings with thy most gracious favour'; *Art. X.* 'We have no power to do good workes pleasaunt and acceptable to God, without the grace of God by Christe preventyng us'; Archbishop Hamilton's *Catechism*, fol. xvii, 'We prevenit nocht God with our lufe, luffand him first, bot he prevenit us first with his lufe'; Udall, *Erasmus' Paraphrase*, fol. xcvii, 'Whereas the gospell of my death shall bee preached throughout all the worlde, this woman also shall be mencioned, whiche, with a godly and an holy duety hath prevented my sepulture and buriall'; Hall, *Works*, 466, 'He whose goodnesse is wont to prevent our desires will not give denialls to our importunities'; Ro 12^{10} Rhem. 'With honour preventing one another.'

3. *To get before or forestall so as to hinder:* 2 S 22^{6} ‖ Ps 18^{5} 'The snares of death prevented me' (LXX *προέφθασάν με σκληρότητες* [Ps 18^{5} *παγίδες*] *θανάτου*, Vulg. *prævenerunt* [Ps 18^{5} *præoccupaverunt*] *me laquei mortis*, Wyc. 'There wenten before me the gnaris of deth,' Dou. 'The snares of death have prevented me,' RV 'The snares of death came upon me'); 22^{19} ‖ Ps 18^{18} 'They prevented me in the day of my calamity' (LXX *προέφθασάν με ἡμέραι θλίψεώς μου* [Ps 18^{18} *ἐν ἡμέρᾳ κακώσεώς μου*], Vulg. *Prævenit* [Ps 18^{18} *prævenerunt*] *me in die afflictionis meæ*, Cov. in Ps 18^{18} 'They prevented me in the tyme of my trouble,' Cheyne ['Parchment' ed.] 'They surprised me in the day of my calamity,' RV 'They came upon me in the day of my calamity'); Job 3^{12} 'Why did the knees prevent me?' (LXX *ἵνα τί δὲ συνήντησάν μοι τὰ γόνατα*; Vulg. *Quare exceptus genibus?* Gen. 'Why did the knees prevent me?' RV 'Why did the knees receive me?'); 30^{27} 'The days of affliction prevented me' (LXX *προέφθασάν με ἡμέραι πτωχίας*, Vulg. *prævenerunt me dies afflictionis*, Cov. 'The dayes of my trouble are come upon me,' Dou. 'The dayes of affliction have preveuted me,' RV 'Days of affliction are come upon me'); Am 9^{10} 'The evil shall not overtake nor prevent us' (LXX *οὐ μὴ ἐγγίσῃ οὐδὲ μὴ γένηται ἐφ' ἡμᾶς τὰ κακά*, Vulg. *non veniet super nos malum*, Driver 'come in front about us'); 1 Mac 6^{27} 'If thou dost not prevent them quickly, they will do greater things than these' (*ἐὰν μὴ προκαταλάβῃ αὐτούς*, Vulg. *Nisi præveneris eos*, Cov. 'If thou dost not prevent them,' RV 'If ye are not beforehand with them'); 10^{23} 'What have we done that Alexander hath prevented us in making amity with the Jews to strengthen himself?' (*προέφθακεν ἡμᾶς*, Vulg. *præoccupavit nos*, Cov. 'hath prevented us,' RV 'hath been beforehand with us'); 2 Mac 14^{31} 'Knowing that he was notably prevented by Judas' policy' (*ὅτι γενναίως ὑπὸ τοῦ ἀνδρὸς ἐστρατήγηται*, Vulg. *fortiter se a viro præventum*, Cov. 'When he knewe that Machabeus had manfully prevented him,' RV 'When he became aware that he had been bravely defeated by the stratagem of Judas').

Take the following as illustrations:

Fuller, *Holy Warre*, 214, 'Was he old? let him make the more speed, lest envious death should prevent him of this occasion of honour'; *Holy State*, 154, 'Expect not, but prevent their craving of thee'; Adams, *Exposition upon 2nd Peter*, 55, 'Satan's employment is prevented, when he finds thee well employed before he comes'; Knox, *Works*, iii. 319, 'Peter was synckinge downe, and loked for no other thyng but present death, and yet the hande of Christe prevented hym'; Milton, *Sonnets*—

> 'Doth God exact day-labour, light denied?
> I fondly ask. But Patience, to prevent
> That murmur, soon replies, God doth not need
> Either man's work or his own gifts.'

J. HASTINGS.

PREY.—Prey, from Lat. *præda*, booty (perhaps from *præ-hendo*, to seize beforehand), through Old Fr. *praie*, *preie*, is now narrower in meaning than formerly. In AV it includes *booty* or *spoil*. Heb. words properly denoting a wild beast's prey are (1) טֶרֶף *ṭereph*, from טָרַף to tear, to rend (the verb itself is tr. 'prey' in Ps 17^{12} 'Like as a lion that is greedy of his prey,' יִכְסוֹף לִטְרֹף, AVm 'that desireth to ravin,' Cheyne 'longing to tear in pieces'). *Tereph* is tr. 'prey' in Gn 49^{9}, Nu 23^{24}, Job 4^{11} 24^{5} (RV 'meat'), Ps 76^{4} 104^{21} 124^{6}, Is 5^{29} 31^{4}, Ezk 19$^{3.6}$ 22$^{25-27}$, Am 3^{4}, Nah 2$^{12.13}$ 3^{1}. This is also the proper meaning of (2) חֶתֶף *ḥetheph* (from [חָתַף] to seize), and it is so tr. in its only occurrence, Pr 23^{28} 'She also lieth in wait as for a prey,' AVm 'as a robber,' which is the RV text, RVm 'as for a prey.' Also (3) עַד *'ad* (from עָדָה to attack?), means 'prey,' and is so tr. in Gn 49^{27}, Is 33^{23}, Zeph 3^{8}, its only occurrences (against the view of Hitzig and others that it is עַד in this sense that appears in אֲבִי־עַד of Is 9$^{5\,(6)}$, see Dillmann, *ad loc.*). And (4) אֹכֶל *'ōkhel*, which means 'food,' is legitimately tr. 'prey' in Job 9^{26} 39^{29}. But all the remaining words mean *booty* or *spoil* taken in war or snatched as one's share. The chief word is בַּז *baz* (from בָּזַז to plunder, take as spoil; the verb itself is rendered 'take for a prey' in Dt 2^{35} 3^{7}, Jos 8$^{2.27}$ 11^{14}, Est 3^{13} 8^{11}; 'make a prey' in Ezk 26^{12}; and 'prey upon' in Jer 30^{16}). A late form of *baz*, בִּזָּה, is tr. 'prey' in Neh 4^{4} ('give them for a prey,' RV 'give them up to spoiling,' Amer. RV 'for a spoil'), Est 9$^{15.16}$ (RV 'spoil'), Dn 11^{24} (so RV). The common word שָׁלָל *shālāl* (from שָׁלַל to plunder, the Hithpolel is tr^{d} 'make oneself a prey' in Is 59^{15}), which over sixty times is rendered 'spoil,' is tr^{d} 'prey' in Jg 5$^{30\,ter}$ 8$^{24.25}$ (RV 'spoil'), Is 10^{2} (RV 'spoil'), Jer 21^{9} 38^{2} 39^{18} 45^{5} (so RV). The only remaining word is מַלְקוֹחַ *malḳôaḥ*, which simply means something captured (from לָקַח to take), which is given as 'prey' in AV and RV in Nu 31$^{11.12.26.27}$, Is 49$^{24.25}$: in Nu 31^{32} AV gives 'booty,' RV 'prey.'

For prey meaning booty cf. Merlin (in Early Eng. Text. Soc.), ii. 152, 'So thei entred in to the londe, and toke many prayes, and brent townes and vilages, and distroyed all the contrees'; Chapman, *Iliads*, ii. 205—

> 'Come, fly
> Home with our ships; leave this man here to perish
> with his preys';

---

* The LXX is different, *τίς ἀντιστήσεταί μοι καὶ ὑπομενεῖ*; St. Paul therefore is nearer to the Heb. than to the LXX in Ro 11^{35} *τίς προέδωκεν αὐτῷ, καὶ ἀνταποδοθήσεται αὐτῷ*;

and Shaks. *II Henry VI.* IV. iv. 51—

> 'The rascal people, thirsting after prey,
> Join with the traitor, and they jointly swear
> To spoil the city and your royal court.'

J. HASTINGS.

PRICE (from Lat. *pretium*, worth, value, through Old Fr. *pris*, *preis*) means in AV the worth of a person or thing in the widest sense, and not in money only. See especially Mt 13^{46} 'When he had found one pearl of great price' (*ἕνα πολύτιμον μαργαρίτην*), and 1 P 3^{4} 'the ornament of a meek and quiet spirit, which is in the sight of God of great price' (πολυτελές). Cf. Chaucer, *Sir Thopas*, 185, 'Men speke of romances of prys'; He 13^{4} Tind. 'Let wedlocke be had in pryce in all poyntes.'

The verb to price (spelt 'prise') occurs in Zec 11^{13} 'A goodly price that I was prised at of them.' Cf. Mt 27^{9} Rhem. 'They tooke the thirtie pieces of silver, the price of the priced, whom they did price of the children of Israel.' J. HASTINGS.

PRICK.—See GOAD in vol. ii. 194^{b}.

PRIESTS AND LEVITES.—

1. The names *kōhēn* and *lēwî*.
2. The priesthood in the earliest times.
3. The priesthood from David to Josiah.
4. The priesthood according to Deuteronomy.
5. The priesthood from Josiah's reform to the Exile.
6. The priesthood in Ezekiel's State of the future.
7. The priesthood from Ezekiel to Ezra.
8. The priesthood according to the law contained in the 'Priestly Writing.'
    - a. The priests in the Law of Holiness and in particular *tôrôth*.
    - b. The Aaronite priests.
    - c. The high priest.
    - d. The Levites.
    - e. The serving women.
    - f. The revenues of the priests and Levites.
    - g. The date of the priestly system in the 'Priestly Writing.'
9. The priesthood from Ezra to the Chronicler.
10. The priesthood after OT times.
    - a. Priests and Levites.
    - b. The revenues of the priests and Levites.
    - c. The duties and offices of the priests.

Literature.

[Throughout this article the abbreviation *Gesch.*, when not preceded by an author's name, stands for Baudissin's *Geschichte des alttest. Priesterthums*, Leipzig, 1889. Whenever a citation consists simply of an author's name and the number of a page, the reference is to that work of his whose title will be found in the Literature at the end of the article.]

1. THE NAMES *KŌHĒN* AND *LĒWÎ*.—The name for 'priest' in the OT is *kōhēn* (כֹּהֵן). The same word (כהן) is met with in Phœnician inscriptions as the official name of the priest, as well as the feminine form כהנה. The corresponding word in Arabic, *kâhin*, is employed to designate the soothsayer. It is *per se* quite conceivable that the priests of the Hebrews were originally soothsayers (Stade, *GVI*, Bd. i., Berlin, 1887, p. 471; cf. Kuenen, *De Godsdienst van Israël*, Bd. i., Haarlem, 1869, p. 101). There are, certainly, no traces in the OT of ecstatic conditions on the part of the priests, but one of their most important functions in the earlier history of Israel was the giving of oracles by means of the lot. A reference to this is to be discovered in the Urim and Thummim which are described as still present in the dress of the high priest. But the Arabic usage is not decisive for the original meaning of the word *kōhēn*; the sense borne by *kâhin* may be secondary, for the Arabs borrowed largely, in matters connected with the cultus, from the Israelites (so also Van Hoonacker, *Sacerdoce*, etc. p. 235 f.). The ecstatic form of prophecy appears in the OT coupled with priestly functions only in the story of the youth of Samuel, to whom God speaks in a revelation, while he is officiating as priest at the sanctuary (1 S $3^{4ff.}$). This unusual coupling of the priestly and the prophetic office may be due in this instance to the combination of two conceptions of the person of Samuel: one of which thought of him, as is the case for the most part in the story of his youth, as priest; whereas the other, which alone has survived in the narratives relating to his later activity, thought of him as prophet.

The root meaning of the word *kōhēn* does not appear to speak in favour of its being a designation of the 'seer.' Derived from a verb *kāhan*, probably equivalent in meaning to *kûn* 'stand,' *kōhēn* will be explained most simply as 'he that stands.' In other instances, too, the expression 'stand (עמד) before Jahweh' is used of the priestly office, especially of the service at the altar which the priest performs standing. This last, then, is perhaps what is referred to also in the name *kōhēn*, which will then designate the priest as offerer, or, since 'stand before one' is said of service in general, as servant of the deity. This general conception deserves the preference, because in ancient times it is not the offering of sacrifice but other functions that appear as the special duty of the priests. The sense of 'servant' is obtained for *kōhēn* also by Hitzig (on Is 61^{10}), who connects the word with the Pi'el *kihēn* (Is 61^{10} = הֵכִין 'make ready'; elsewhere, indeed, *kihēn* is a derivative from *kōhēn* [see Ewald, *Heb. Sprache*, § 120*e*]), to which he assigns the sense '*parare*, *aptare*, and then *ministrare*.'

The word *kĕmārîm* (כְּמָרִים) is used in the OT only of heathen priests. It answers to the word כמר found in Aramaic inscriptions, Syr. *kûmrâ* 'priest,' and hence in the OT is manifestly a word borrowed along with their idolatry from the Aramæans.

In Deuteronomy the priests are called 'Levite priests' (הַכֹּהֲנִים הַלְוִיִּם), and already in a very ancient narrative in the Bk. of Judges (chs. 17 f.) we find a 'Levite' (לֵוִי) regarded as having a special call to priestly functions. In like manner the Jehovistic book of the Pentateuch (JE) contains a tradition, according to which Moses assigned priestly rights to the 'sons of Levi' (Ex $32^{26ff.}$ [whether $32^{25ff.}$ belonged to the original Jehovistic book has, indeed, been doubted by Kuenen, *De boeken des ouden verbonds*², Leiden, 1887 ff., § 13, note 21]; cf. Jos $13^{14.\ 33}$ 18^{7}, see *Gesch.* p. 100 f.). In the prophetical writings the name 'Levites' occurs for the first time in the Bk. of Jeremiah ($33^{17ff.}$ 'Levite priests' הַכֹּהֲנִים הַלְוִיִּם), in a section which is wanting in the LXX, and is pretty certainly not the work of Jeremiah, but, judging from v.^{24}, was probably composed by an exile in Babylon. During the Exile the term 'Levites' is witnessed to by Ezekiel. But, in view of Jg 17 f., there can be no doubt of the higher antiquity of the term, even apart from the passages cited above, regarding which doubts have been expressed whether they belong to the pre-Deuteronomic elements of the Jehovistic book. The Bk. of Dt presupposes the name as generally current, and Dt 33, in which (vv.$^{8-11}$) Levi is represented as holder of the priesthood, dates to all appearance from a period prior to the Fall of Samaria.

The view of the author of the Deuteronomic law (18^{1}), as well as that expressed in the Blessing of Moses (Dt 33^{8-11}), and in the tradition embodied in the 'Priestly Writing' of the Pentateuch (also in Jos $13^{14.\ 33}$ [JE ?]), is that the term 'Levites' indicates that the priests belong to a tribe of Levi. The origin of this priestly designation and this tribal name is obscure. The Blessing of Jacob, which as a whole is not earlier than the monarchical period, presupposes a tribe of Levi without any allusion to its call to priestly functions (Gn 49^{5-7}). On the other hand, the OT contains certain indications which appear to presuppose that the word *lēwî* was once regarded as the official name of the priest. In the Jehovistic book Aaron as distinguished from Moses is called 'the Levite' (Ex 4^{14}), although the two are conceived of as brothers. In this passage there is certainly no reason to pronounce (with Nowack, p. 99) the designation an interpolation introduced under the influence of the Priests' Code, for such an influence would have led to Aaron's being called, not 'the Levite,' but 'the priest.' The Levite who figures in Jg 17 f. is of the tribe of Judah, and hence, apparently, does not belong to a special tribe of Levi, unless perhaps he belonged to Judah merely as a settler, as appears to be the interpretation adopted in what should probably be pronounced a gloss, namely, 17^7 (cf., however, *Gesch.* p. 184 f.). In any case, it is conceivable that the word *lēwî* was originally an official name, and only came afterwards to be treated as the patronymic for the particular family or guild which was considered to have been called to priestly service. At all events the coincidence of a tribal name with the priestly designation cannot be accidental, and accordingly one may not assume on the ground of Gn $49^{5ff.}$ that there was a tribe of Levi which afterwards disappeared, and that the Levitical priests have no connexion with it.

If the word *lēwî* was once an official name, then it might be possible that a reminiscence of this original sense has survived in an explanation of the word found in the Priests' Code (Nu $18^{2.\ 4}$), although in itself this explanation is nothing more than a word-play. According to this passage, those who belong to the tribe of Levi are to attach themselves (*yillāwû*, *nilwû*) to Aaron, for the service of the tabernacle. The word *lēwî* is, as a matter of fact, probably to be derived from *lāwāh*, 'to twine, to attach oneself,' and might perhaps be used to designate an escort 'attaching itself,' such as the troop that escorted the wandering sanctuary of the nomad period of Israel's history (so *Gesch.* p. 73 f., following others, especially de Lagarde). The word would thus be not strictly a designation of the priest, but of a body from which by preference the priests were chosen. Since a special body with a genealogical connexion had presumably to be conceived of as set apart for the above-named duty of escorting the ark, it might happen in the end that *lēwî* was taken as the tribal name of this body.

This explanation of the word *lēwî* as an official name, finds, however, no certain support in the history that has come down to us, and it must always remain a difficulty to conceive of an alleged tribal name having originated from an official name, especially as in Gn 49 we have a view of the tribe of Levi presented in which there is no allusion to its being a priestly tribe. For this reason also it is not likely that *lēwî* is the name for foreigners, say Egyptians, who had 'attached' themselves to the Hebrews (so, following others, Renan, *Hist. du peuple d'Israël*, vol. i., Paris, 1887, p. 149 f., who makes Levi = *inquilinus*; see, further, on this point, *Gesch.* p. 70 f.). Besides, the view that the Levites were originally non-Israelites is extremely improbable, for the reason that Moses, the deliverer of Israel, who is reckoned to the tribe of Levi, was certainly a Hebrew. Moreover, Levi, the father of the tribe, is represented as son of one of those two wives of Jacob whose birth was equal to his own, and who were his relations. Levi's descent then was regarded as a pure Hebrew one. Hence, taking everything into account, the more probable conclusion is that *lēwî* was at first actually a tribal name, and only afterwards in a secondary way came to be treated as the official name of the priests because these were chosen from this tribe. It is not impossible that the tribal name *Levi* is connected with the name *Leah* (לאה) which is given as that of the mother of Levi (Wellhausen, *Geschichte Israels* [*Prolegomena* [1]], 1878, p. 149; Stade, *ZATW*, 1881, p. 115 f.), in which case it may remain an open question whether in *Leah* we are to find, with Stade (*l.c.*, following Wetzstein), an animal name, 'wild cow.' The difficulty involved in the circumstance that Gn $49^{5ff.}$ is acquainted with a tribe of Levi but does not represent it as a priestly one, is not to be obviated by the assumption that this passage relates to pre-Mosaic conditions (so Van Hoonacker, *Sacerdoce*, etc. pp. 309, 311); for all the other sayings in the so-called Blessing of Jacob have to do with the time when Israel was settled in Canaan, and even the scattering of Levi among Israel, spoken of in Gn 49^7, presupposes the settlement. There remains hardly any resource but to suppose that to the author of Gn $49^{5ff.}$ the want of a Levitical tribal territory presented itself so strongly as a punishment occasioned by the conduct of the father of the tribe, that he did not look beyond this penal condition of things to the honourable priestly vocation of the members of this tribe. What the conduct of the tribe had really been which occasioned the unfavourable judgment passed upon it, is a question we cannot answer. It is held by H. Guthe (*Geschichte des Volkes Israel*, Freiburg i. B., 1899, p. 169 f.) that certain descendants of a non-priestly dowerless tribe of Levi had procured maintenance for themselves by undertaking priestly functions, and that in this way *Levi* became a priestly appellation. But this view, which might otherwise be a possible one, can hardly be regarded with favour, because such a condition of things would not account for the relatively ancient tradition as to the relations of the tribe of Levi to the person of Moses (see below, § 2).

The above is the result of a consideration of the OT data. But if it should be established that in the Minæan inscriptions the word *lawi'u* is a term for 'priest,' and that this is connected with the OT *lēwî* (Fr. Hommel, *AHT*, London, 1897, p. 278 f.), it will be necessary after all to think of the latter as an official name, and that an ancient Semitic one (otherwise Van Hoonacker, *Sacerdoce*, etc. p. 312 ff.).

On *bĕnê ha-lēwî* and *bĕnê ha-lĕwiyyîm* (rare and late for the usual *bĕnê lēwî*), forms in which *lēwî* is treated as a gentilic name, see Ed. König, 'Syntaktische Excurse zum AT,' in *SK*, 1898, p. 537 ff.

2. THE PRIESTHOOD IN THE EARLIEST TIMES.—As everywhere in the history of religion, there may be recognized also in the beginning of Hebrew history a period when no special priestly class existed. Of course it is upon an artificially constructed basis that the view presented in the 'Priestly Writing' (P) of the Pentateuch rests, according to which neither sanctuary nor sacrificial acts nor a priestly class had any existence before the Divine revelation given through Moses. Even in the narratives of the Jehovistic book, relating to the pre-Mosaic period, there are scarcely to be discovered any reminiscences of the then condition of the cultus; but these narratives will hardly be wrong in representing relations which still persisted at a later period, as the only ones present in the patriarchal period, as when they describe the head of the family in the patriarchal house as exercising the priestly function of offering sacrifice. Besides this, we have in the Jehovistic book a single mention, during the patriarchal period, of inquiring at an oracle (Gn 25^{22}), and also one reference to the giving of tithes (Gn 28^{22}). Both these allusions imply the existence of a sanctuary with a priest in charge of it. Here the narrators

have momentarily forgotten the ancient situation which is assumed elsewhere, yet without expressly naming the priest on either occasion. The author of the prologue of the Bk. of Job, again, introduces his hero, whom he conceives of as a shepherd-prince living in remote antiquity in the land of Uz, as offering sacrifices for his family (Job 1^{5}; cf. $42^{8f.}$, and contrast 12^{19} *kōhănîm*). The story of Gn 14^{18-20}, where Abraham is represented as giving tithes to Melchizedek the priest-king of Salem, is, in its present form, a glorification of the later priesthood of Salem, *i.e.* Jerusalem.

According to a narrative contained in the Jehovistic book, Moses instituted a special priestly body when he set apart the 'sons of Levi' for this purpose (Ex $32^{26ff.}$). In the first instance, Moses himself, according to this book, performs the sacrificial act (Ex 24^{6}). In that descriptive narrative, which makes him receive the Divine revelations in the holy tent outside the camp to which the people went 'to seek Jahweh' (Ex $33^{7ff.}$), the function of communicating oracles appears as a distinction conferred only upon Moses personally. But in this way he is clearly thought of as the presiding authority over the holy tent—in other words, as a priest. The Priestly Writing, on the other hand, makes Moses officiate as priest only upon the occasion of the instalment of the priests in their office (Ex 29); and from this point onwards, according to this source, priestly functions are discharged only by Aaron and his sons, who are selected from the body of the tribe of Levi for this purpose. According to a prophetical discourse interpolated into the older text of the history of the youth of Samuel (1 S $2^{27f.}$), God, during the bondage in Egypt, revealed Himself to the fathers' house of Eli, the priest of Shiloh, and chose this house out of all the tribes of Israel, to be priests. Here too, then, without any mention indeed of Aaron or Levi, appears the conception of an institution of the priesthood in the time of Moses. This conception, in the form in which it here makes its appearance, cannot be of quite recent origin, since in opposition to the later claims of the Zadokite priesthood, which existed from the time of Solomon, it represents the Elidæ, who were different from these, as the original legitimate priests. It is in itself quite credible that Moses, in his arrangements for the Israelitish nation and its cultus, made provision for the performance of religious service by a special body, and it is a very plausible supposition that he who is represented as belonging like Aaron to the tribe of Levi, selected his own family for this office. Among the ancient Arabs as well, the priesthood was largely in possession of special families, which did not belong to the tribe amongst whom they exercised their office (Wellhausen, *Reste*^{2}, p. 130 f.). Guthe (*Geschichte*, p. 21 f.) opposes the view that Moses belonged to the tribe of Levi, and holds that the priestly tribe first originated in Canaan. This later origin, however, is difficult to prove, and along with it the objections fall, which are brought against a genealogical connexion between Moses and the priestly tribe.

If *lēwî* actually stood originally for the retinue of the sacred ark, only individuals from this body would have been priests proper. Apart from this, it is in any case not incredible that Moses should have destined his own family in the narrower sense to be priests, but that he should have chosen precisely the family of his brother Aaron is less likely. Aaron, it is true, is not only represented in P as the father of the priests, but even in JE as 'the Levite' *κατ' ἐξοχήν* (Ex 4^{14}). Yet he does not appear to be known to all the strata of this last book; and in all the passages where mention is made of him he is a less individualized figure, to which features from the later history are transferred in a prefigurative way (*Gesch.* p. 199). It is not impossible that in his case we have to do with a personification, although no satisfactory explanation of his name *'Ahărōn* has yet been discovered. With *'ărôn* the designation of the sacred ark (a combination proposed, following the lead of others, by Renan, *l.c.* p. 179), this name can hardly, in view of the different way in which it is written, have anything to do.

In an ancient gloss to the narrative in the Bk. of Judges about the Levite who first on Mt. Ephraim and afterwards at Dan officiated as priest, this Levite, to whom the priesthood at Dan traced its descent down to 'the carrying captive of the land' (*i.e.* down to the overthrow of Ephraim in the Assyrian period), is described as a 'son of Gershom the son of Moses' (in Jg 18^{30} *Mĕnashsheh* is an alteration of the original *Mōsheh*). Here, then, Moses himself may be viewed as father of the priests in general. But all the same it is difficult to understand the person of Aaron as a purely fictitious one, because there is no apparent reason why the priesthood should have exchanged the more glorious descent from the lawgiver for descent from a brother of his. Moses has been supposed to be referred to in Dt 33^{8} as the representative, and then, presumably, as the father, of the priesthood; but the context of this passage favours rather a reference to Aaron in this capacity (*Gesch.* p. 76), in harmony with which is the circumstance that Dt 33 probably had its origin in Ephraim, and we find traces that it was in Ephraim that Aaron first came to be looked upon as father of the priests (see below, § 3, on the bull-worship of Aaron).

If really from the time of Moses one special body was regarded as called to the priesthood, yet it is by no means the case that from that time it alone exercised priestly functions. Long after Moses, it is not contested that men of non-Levitical descent discharged the priest's office occasionally or even permanently. In the latter case they probably passed as adopted into the tribe of Levi, which accordingly we are not to think of as having originated in a purely genealogical way. Only, one can hardly, with Wellhausen, appeal in favour of this to what is said in Dt 33^{9} about Levi's having renounced his kinship. Seeing that in this passage the denying of his sons is also spoken of, the reference must be understood not of the loosening of connexion with a family, but of impartial official action, without regard to family interests, in allusion to the narrative of Ex $32^{27.29}$ (*Gesch.* p. 77; Sellin, p. 110 ff.; Van Hoonacker, *Sacerdoce*, etc. p. 133). As in Dt 33 the whole tribe of Levi appears as in possession of the priesthood, so elsewhere down to a late period no trace is to be found of a distinction between Levites and priests proper.

No special weight is to be laid on the circumstance that, according to the statement of one source of the Jehovistic book, Moses employed 'young men of the children of Israel' to offer sacrifice (Ex 24^{5}; it is impossible that either here or in 1 S $2^{13.15}$ *na'ar*, in its sense of 'servant,' can be a designation of the priest as the servant ['*ministre*'], namely, of the cultus or of the people 'in the celebration of Divine worship' [so Van Hoonacker, *Sacerdoce*, etc. p. 140 f.]), for this happened prior to the appointment (recorded, indeed, as it seems, by a different narrator) of the Levites to the priestly service (Ex $32^{26ff.}$). As early as the arrival at Sinai we read in Ex $19^{22.24}$ (a narrative in any case from another hand than $32^{26ff.}$) of priests (*Gesch.* p. 58 ff.) without being told whether these are to be thought of as Levites or not. It is mentioned in the Jehovistic book, as an arrangement in force all through the lifetime of Moses, that his attendant, Joshua, who is represented as of non-Levitical descent (Nu 13^{8}, P), did not depart out of the holy tent (Ex 33^{11}). The Ephraimite Micah, in the period of the Judges, appoints as priest in his private sanctuary, first of all one of his sons (Jg 17^{5}). Gideon, of the tribe of Manasseh (Jg 6$^{26f.}$), and Manoah of the tribe of Dan (13^{19}), offer sacrifice with their own hands. Under Saul the Israelites pour out the blood of the captured animals at the altar stone without any priestly interposition (1 S 14^{34}). At a still later period the non-priestly prophet Elijah sacrifices with his own hand (1 K 18$^{30ff.}$). While the sacred ark, in the course of its wanderings, tarried in the house of Abinadab, who was plainly no priest, it was served by his sons (1 S 7^{1}, 2 S 6$^{3f.}$; the emendation of Van Hoonacker, *Sacerdoce*, etc. p. 171, is unwarranted). Of the ancient priestly prerogative of the father of the house, a relic was preserved down to the latest times of the Jewish cultus, in the slaughtering of the Paschal lamb by the father of the house without any priest taking part in the ceremony (Ex 12$^{6ff.}$ [P] vv.$^{21ff.}$ [JE]), although it is true, at the same time, that the sacrificial character of the Paschal lamb had been obliterated.

Sacrificing was, then, manifestly, in early times not the exclusive function of a priestly class. The latter was certainly in existence. Yet even for admittance to this no special descent was requisite. Samuel, by birth an Ephraimite, yet, according to the representation contained in the history of his childhood, becomes, in fulfilment of a vow of his mother, a servant of Jahweh, clothed with the priestly ephod, at the sanctuary at Shiloh (1 S 1$^{1ff.}$ 2$^{11.18}$). The fact that Samuel becomes a priest in consequence of a vow, shows that he was not one by descent; and the representation of the Chronicler (1 Ch 6$^{13.18}$), according to which he is a Levite, is not, with Van Hoonacker (*Sacerdoce*, etc. p. 265 f.) and Girdlestone ('To what tribe did Samuel belong?' in *Expositor*, Nov. 1899, pp. 385–388), to be justified, as if Samuel were a Levite from Ephraim. In the descriptions of Samuel's later life he appears not as a priest, but as one who, in the extraordinary capacity of *shōphēṭ* and *nābî'*, presents the offerings of the people (1 S 7$^{9f.}$ 16$^{2ff.}$). A priestly class is presupposed by the oldest collection of laws, the so-called Book of the Covenant (Ex 22^{8}), and yet, in an enactment later prefixed to this, the general right to sacrifice is assumed in the demand made of the Israelites as a whole: 'An altar of earth thou shalt make unto me, and shalt sacrifice thereon thy burnt-offerings and thy *shĕlāmîm*-offerings' (Ex 20^{24}). When, on the other hand, in the Jehovistic book the people of Israel is called 'a kingdom of priests' (Ex 19^{6}), this is certainly to be understood not of the actual exercise of priestly rights, but in a transferred sense as meaning that the whole of Israel stands in a priestly relation to God.

Where a professional priest was not available, young men appear to have, by preference, replaced the father of the house in the exercise of his priestly function, or even to have acted as priests for a larger body. Of Moses we found it recorded that he appointed young men to offer sacrifice. The Ephraimite Micah installs one of his sons as priest. Certain traces appear to point to a preference at one time for making firstborn sons priests, or even to indicate that in earlier times the whole of the firstborn sons were regarded as destined for holy service—an idea which certainly can hardly at any time have been strictly carried out in practice. The circumstance that Samuel, according to the story of his childhood, was a firstborn son, is of no importance, because it was not as such that he was set apart for priestly functions, but in consequence of a vow of his mother. But in the ancient code, the Book of the Covenant (Ex 22^{28} [Eng. ^{29}]), the demand is made that the firstborn son be given to Jahweh. The spirit of this book, whether it belongs to the time of the Judges or to the earlier monarchical period, appears to exclude the interpretation that the firstborn is to be offered in sacrifice to the deity; and then there remains scarcely any other possibility except to understand the 'giving' to mean consecration to holy service (*Gesch.* p. 55 ff.; Smend, *Alttest. Religionsgeschichte*^{2}, Freiburg i. B., 1899, p. 282 f., note 3; cf. Kamphausen, *Das Verhältnis des Menschenopfers zur israel. Religion*, Bonn, 1896, p. 66). In the Priestly Writing it is said of the Levites that they are 'given' to Jahweh (Nu 8^{16}), and even the consecration of Samuel is described by the term 'given' (1 S 1^{11}).

In spite of this freedom in the matter of sacrificial arrangements, from early times it was considered an advantage in the regular and constant service of a sanctuary to have a 'Levite' for priest. When one of these happens to pass the sanctuary of Micah the Ephraimite, the latter gives the preference to him as priest over his own son (Jg 17$^{7ff.}$); and the Danites who wish to establish for themselves a new sanctuary in their new home, do not let the opportunity slip to obtain by force the services of this same Levite (18$^{15ff.}$). Even if in the time of Moses a single family amongst the Levites had possession of the priesthood proper, in subsequent times, at all events, this was viewed not as their exclusive privilege, but as that of the Levites in general. Nevertheless, the term 'Levite' nowhere occurs as the exact equivalent of 'priest,' a circumstance which is not without importance in its bearing upon the origin of the term. The above-named Micah the Ephraimite is represented as saying, 'The Levite has become my priest' (Jg 17^{13}).

As to the instalment in the priestly office, even that ancient narrative in the Bk. of Judges mentions certain formalities which in a modified form are retained in the later ceremonial law of the Pentateuch. Micah **'fills the hand'** of one of his sons, so that he becomes his priest (Jg 17^{5}). He does precisely the same thing afterwards to the Levite (v.^{12}). Wherein this 'filling of the hand' consisted is not clear. It has been suggested that it means the handing over of the earnest money (Vatke, Wellhausen), which appears to be favoured by the fact that the Levite who renders priestly services to Micah certainly speaks of himself as 'hired' by the latter (Jg 18^{4}). This hiring, however, need not refer to a sum of money paid down, but may consist in the arrangement about an annual salary, clothing, and maintenance (17^{10}). It is not at all likely that Micah hired his own son with a piece of earnest money, and in any case the narrator in the Jehovistic book (Ex 32^{29}) was not thinking of earnest money when he makes Moses say to the sons of Levi themselves: 'Fill your hands to-day for Jahweh.' Still less likely is it that the expression 'fill the hand' refers to the handing over of the arrows which are alleged to have been used in giving the priestly oracle (Sellin, p. 118 f.). This interpretation is based upon Ex 32^{29}, where, however, *lĕ-Jahweh* standing alone cannot mean 'on behalf of Jahweh' (*sc.* take hold of the arrows), but shows that 'fill your hand' refers in some way to a consecration to Jahweh, an instalment into service related to Him (still another interpretation of the 'filling the hand' in Ex 32^{29} is adopted by Van Hoonacker, *Sacerdoce*, etc. p. 135). In the Priestly Writing the expression 'fill the hand' is retained in speaking of instalment into the priestly office (Ex 28^{41} *al.*), and the term 'fill-offering' (*millû'îm*, Ex 29^{22} *al.*)

is used of the offering which was presented at the consecration of Aaron and his sons to the priestly office. This offering has the characteristic rite that Moses places certain portions of the sacrificial animal upon the hands of Aaron and his sons—in other words, fills the hands of those about to be consecrated with these portions of the sacrifice. What are specified are the parts of the animal which in sacrifice were burned upon the altar or which fell to the priests. The consecration ceremony was meant thus to express that the priest is empowered to lay these pieces upon the altar, or, as the case may be, to take them for himself. Accordingly, it is, to say the least, not improbable that the expression 'fill the hand,' used of installation in the priestly office, had in view from the first such a handing over of sacrificial portions as pointed to the priestly functions (*Gesch.* p. 183 f.; so also Weinel, art. 'משה und seine Derivate,' in *ZATW* xviii. [1898] p. 61). Such a solemn introduction to office might well be employed even by the layman Micah in the case of the Levite, as of one who was not installed by him as a priest in general but as his own priest (otherwise Nowack, p. 121).

But it may be, further, that the expression 'fill the hand' had not originally a special reference to introduction to the priestly office, for in Assyrian the corresponding *kâtû mullû* has the general sense of 'give, appoint, enfeoff, present' (Nowack, p. 120 f., following Halévy; cf. on the Assyrian expression, Frd. Delitzsch, *Assyr. Handwörterb. s.v.* מלא, p. 409). Even if the above was the original sense of the Hebrew expression, it was no longer understood in Ex 32^{29}.

In early times the priest, even when he was a young man, was called by the title of honour, 'father' (Jg 17^{10} 18^{19}). The priests who served at any of the sanctuaries of ancient Israel were marked outwardly by the linen ephod they wore (1 S 2^{18}). They lived, as we learn in the case of Eli and Samuel, in the sanctuary (1 S $3^{2ff.}$). There they offered the sacrifices on the altar, a work in which at the more frequented places of worship they were assisted by servants (1 S $2^{13.\ 15}$). Portions of the offerings presented were assigned them for their maintenance (1 S $2^{13ff.}$); whether these were definitely fixed (*Gesch.* p. 208, and against this Nowack, p. 125), or were left to the pleasure of the offerer, can scarcely be determined.* At the private sanctuaries, as we are told of Micah the Ephraimite, the owner of the sanctuary paid his priest a salary and supplied his clothing and his food (Jg 17^{10}). While the offering of sacrifice was in early times open to others as well as to the priests, it is only of professional priests that it is recorded that they gave oracles. Micah's Levite consults God at the request of others (Jg 18^{5}; on the giving of oracles by the priests among the ancient Arabs, see Wellhausen, *Reste*², p. 131 ff.).

As would appear from what we hear of Ahijah (Ahimelech) the descendant of Eli (1 S 14^{3}), and his son Ebiathar (ABIATHAR) the priest of Nob (1 S 23^{6}), it was only the chief priest of a considerable sanctuary who had another ephod different from the linen one, by means of which he gave oracles (1 S $14^{18f.}$, where for *'ărôn* read *'ēphôd*). In this must have been kept the oracle-lots, the prototype of the Urim (cf. 1 S 28^{6}) and Thummim of the later high priest. In the Blessing of Moses (Dt 33^{8}), Thummim and Urim are thought of as the special dower of Levi, and probably more specifically as that of Aaron. The name *thummim*, 'right,' points to the fact that the giving of priestly oracles originally served mainly the interests of the administration of justice, which was in the last resort the task of the priests. In order to decide a difficult lawsuit the parties are required by the Book of the Covenant to appear 'before God' (Ex 22^{8}), *i.e.* to appeal to a decision by the priestly lot. The same place which bears the name *Ḳādēsh*, 'sanctuary,' is called also *'Ên-mishpāṭ*, 'well of decision' (Gn 14^{7}).

In the administration of justice, but no doubt also in the indication of what was ritually proper, and in general of what was well-pleasing to the deity, will thus have consisted the *tôrāh*, 'instruction' or 'direction' (see LAW IN OT, vol. iii. p. 64^{b}), which from ancient times appears as the duty of the priests (Dt 33^{10}). It has been suggested that the root-word (*hôrāh*) in this notion of 'instructing' should be traced back to the casting of the sacred lots. But this is scarcely probable in view of the use of *tôrāh* also for the teaching of the prophets, which has nothing to do with oracles obtained by lot. Rather had *hôrāh*, which is used of shooting arrows (1 S 20^{36} *al.*), the meaning of 'aim at something,' and then 'lead to a goal,' 'point out something' (Gn 46^{28}), 'instruct' (*Gesch.* p. 207, note 1).

When they settled in Canaan, the Israelites had taken over the sacred places of the Canaanites and set up the worship of Jahweh at them. These sanctuaries did not all enjoy the services of a Levitical priest, as we see from the fact that a son of Micah the Ephraimite acted as priest. The numbers of the Levites were probably insufficient to meet the needs of such service. They will have settled only at the more important sanctuaries. A reminiscence of this is preserved in the Priestly Writing of the Hexateuch, which conceives of specially appointed Levitical or priestly cities. Some of the names of cities specified in this connexion clearly point to ancient places of worship (cf. below, § 8, f *end*, and g).

The most important sanctuary in the time of the Judges was the temple at Shiloh, whose annual festivals were resorted to by a wide circle of worshippers. There officiated Eli and his house, which traced back its priestly rights to the time of the Exodus from Egypt (1 S $2^{27f.}$), and thus at all events belonged to the category of the Levites. It may be that the house of Eli also laid claim to descent from the priestly brother of Moses, namely Aaron; so at least the matter was viewed by those in later times who traced the descent of the Elidæ to Ithamar a son of Aaron (1 Ch 24^{3}). But it may be also, as we have seen, that originally the priest of the Exodus, and even the ancestor of the house of Eli was held to be Moses himself, for whom his brother might come to be substituted only in after-times (Wellhausen, *Prolegomena*¹, p. 146 f.). In the history of the childhood of Samuel, Eli is introduced abruptly (1 S 1^{9}); a passage paving the way for the mention of him must have been lost, and in this his genealogy was probably given. Eli, as no doubt was the case equally with the head of the family elsewhere, held the position of chief priest in the temple, as may be gathered from the relation to him of Samuel and of his own sons. Eli's sons perished in the wars with the Philistines, and with them probably also the sanctuary of Shiloh, which is never afterwards mentioned as existing (1 S $4^{11ff.}$). The house of Eli was not, however, completely extinguished; a great-grandson of his, Ahijah the son of Ahitub, the son of Phinehas, the son of Eli, bore the ephod in the time of Saul (1 S 14^{3}). He is evidently identical with the son of Ahitub whom another source calls Ahimelech. This Ahimelech, apparently as chief priest, had his residence, along with his fathers' house, at Nob (1 S $21^{2ff.}$ $22^{9ff.}$), the 'city of the priests' (22^{19}). Here then it would appear that the ancient priestly family of the Exodus gathered itself together after the downfall of Shiloh. Renan (*Histoire*, i. 420, note 1) finds difficulty in the identification of Ahijah with Ahimelech, because the priests of Nob can, he thinks, hardly have belonged to the family of the priests of Shiloh. But why not, and why should it be necessary to impute an error to 1 K 2^{27}, where Ebiathar (Ahimelech's son) is reckoned to the house of Eli? There was similarly at Dan a Levitical priesthood which traced its descent to the before-mentioned Levite of Micah the Ephraimite, and consequently to Moses (Jg 18^{30}).

---

* We find traces that among the Phœnicians and the Babylonians, as was doubtless the case with all highly developed cults, the priests had their allowance from the offerings (see F. C. Movers, *Das Opferwesen der Karthager, Commentar zur Opfertafel von Marseille*, Phönizische Texte, Theil ii., Breslau, 1847, pp. 118, 126 ff.).

3. THE PRIESTHOOD FROM DAVID TO JOSIAH.—When David had acquired for his capital the Jebusite citadel, he conferred upon it the distinction of transferring the sacred ark to the summit of its hill, the threshing-floor of Araunah the Jebusite. By this act he established a royal sanctuary of which the king was the proprietor, in the same sense in which the private person Micah was the owner of the sanctuary set up by him. David and, subsequently to the building of the temple by Solomon on Mt. Zion, his successors assumed a kind of chief priestly position at the sanctuary of Jerusalem.* David presented offerings, manifestly discharging priestly functions in person, for it is said that he 'made an end of offering' (2 S $6^{17f.}$); he pronounced the liturgical blessing (v.^{18}), and danced in the priestly garb, the linen ephod, before the ark of the covenant (v.^{14}). Of Solomon, too, it is recorded that, at the dedication of the temple, he offered sacrifice (1 K $8^{5.\ 62ff.}$), and that three times in the year he offered burnt-offerings, and peace-offerings and 'sweet smoke' (1 K 9^{25}). There is no mention of priests on this occasion; their presence may, however, be taken for granted as self-evident, for, of course, Solomon could not, without help of some kind, have overtaken all the dedicatory offerings. From the above statements, then, it is not clear to what extent Solomon in his offering discharged priestly functions in person. But it is difficult to suppose him to have acted in this matter differently from David. In any case the blessing which, standing by the altar, he pronounced upon the people (1 K 8^{55}) is a priestly act. Of the first king of the Northern kingdom, Jeroboam, we are expressly told that he ascended the altar of Bethel and made the offering (1 K 12^{33}), although he too had priests at his command (v.^{31}). The position of the kings of the Northern kingdom in relation to its chief sanctuary at Bethel will have been practically the same as that of the kings of Judah to the temple at Jerusalem. Under Jeroboam II. Amaziah the priest at Bethel speaks of the sanctuary there as a royal one (Am 7^{13}); Amaziah, that is to say, officiated under the king's commission. Of one of the later kings of Judah, Ahaz, it is expressly recorded that he ascended the temple altar, kindled the offering, poured out the drink-offering, and sprinkled the altar with the sacrificial blood (2 K $16^{12f.}$). Consequently it is at least not an incorrect condition of things that is presupposed in Chronicles when we are told how Uzziah, the second predecessor of Ahaz, offered incense upon the altar of incense (2 Ch $26^{16ff.}$). All that belongs to the later standpoint of the Chronicler is the notion that this offering by the king in person was an illegitimate encroachment upon the priestly privileges, and that Uzziah was on that account punished with leprosy; perhaps also the assumption of a special altar for incense bespeaks a later viewpoint.

At least the earliest kings looked upon the Jerusalemite priests as subordinate officials whom they could appoint and depose. From the massacre which Saul perpetrated amongst the priests at Nob who held with David (1 S $22^{16ff.}$), none escaped of the family of Eli but Ebiathar, who fled for refuge to David, carrying with him the oracle-ephod (1 S 22^{20} 23^{6}). He was installed by David as priest in attendance on the sacred ark on Mt. Zion. Along with him Zadok is named as David's priest (2 S 8^{17}, where read 'Ebiathar son of Ahimelech'). Both have their sons at their side as priests (2 S $15^{27.\ 36}$). Ebiathar must have held the higher rank of the two, for we are told in 1 K 2^{35} that Solomon, after deposing Ebiathar, gave his post to Zadok. Ebiathar, with his son Jonathan, had taken the side of Adonijah when the latter conspired against his father David (1 K $1^{25.\ 42ff.}$). By command of David, Zadok anointed Solomon king (1 K $1^{32ff.}$), and Ebiathar was banished. He retired to his landed property at Anathoth (1 K $2^{26f.}$), where in the time of Jeremiah we still find a priestly family settled, to which Jeremiah himself belonged (Jer 1^{1} $32^{6ff.}$). Accordingly Jeremiah was probably a descendant of Ebiathar, and thus of the ancient priestly family which dated its possession of the dignity from the time of the Exodus (see above, § 2).

The house of Zadok continued in possession of the Jerusalemite priesthood. This we know from the exilian prophet Ezekiel, who constantly speaks of the Jerusalemite priests as 'the sons of Zadok.' What was Zadok's descent is not clearly to be seen. This much only is plain, that he did not belong, like Ebiathar, to the old-privileged priestly family, for a prophecy, put into the mouth of an unnamed man of God in the time of Eli, announces that God, after He had chosen in Egypt the fathers' house of Eli for the priesthood, had now rejected this house, and would appoint for Himself a trustworthy priest who should walk after Jahweh's heart and mind, for whom Jahweh would build an enduring house, and who should walk before Jahweh's anointed for ever (1 S $2^{27ff.}$). This prophecy is in 1 K 2^{27} understood of the installation of Zadok in the Jerusalemite priesthood, and was certainly so intended from the first, for—the only other conceivable supposition—to refer it to the priestly Samuel will not answer, seeing that Samuel is never represented as a king's priest. Thus, then, Zadok did not belong to the family or the fathers' house of Eli, and consequently not to the ancient priesthood. Zadok cannot, therefore, as Poels supposes, have really belonged, although, to be sure, later generations represented him as belonging, to an ancient Aaronite family, namely that of the Eleazarites. This family, according to Poels, had discharged the priestly duties at Nob, and when the national sanctuary was transferred to Jerusalem, Zadok came from Nob to the capital (so, already, essentially, Movers, *Kritische Untersuchungen über die biblische Chronik*, Bonn, 1834, p. 294 f., according to whom Zadok was at first chief priest in the Mosaic tabernacle at Gibeon [which Poels identifies with the sanctuary of Nob]). It is maintained by Van Hoonacker (*Sacerdoce*, etc. p. 168 ff.) that according to 1 S 2^{27} the house of Eli was chosen 'non pas isolément,' but, together with others, as one particular family of the priesthood which included a plurality of families; but this notion is read into the text. Zadok is called the son of Ahitub (2 S 8^{17}). In the state of the case just described, we are not to think of this Ahitub as the same as the grandson of Eli (1 S 14^{3}). The above-cited oracle of the man of God gives undoubtedly the correct account of Zadok, for in later times, when the sons of Zadok had exclusive possession of the priesthood, men would not have attributed to them a prestige as priests less lofty in its origin than that of the Elidæ who had now fallen into the background. Under these circumstances it may be doubted whether Zadok was a Levite at all. No certain decision can be pronounced, because we do not know how much is included in the expression 'fathers' house' of Eli in the above oracle. If it means the same thing as 'sons of Levi,' then Zadok was no Levite; but it may be intended in a narrower sense, perhaps, to mean the house of Aaron. Since even prior to the time of David, as we saw from the story of the Levite of Micah the Ephraimite, it was considered desirable to have a Levite for priest, David is unlikely to have overlooked this advantage in the selection of Zadok, who primarily was his priest. Subsequent generations naturally did full honour to the genealogy of Zadok, whose descent was traced back to a son of Aaron, nay, to his eldest son Eleazar (1 Ch 24^{3}). In the circumstance that the later writers made the Elidæ to be descended from another son of Aaron, namely Ithamar (1 Ch, *l.c.*), there is preserved a reminiscence of the difference in the descent of the two priestly families.

---

* Among the Assyrians as well the king was at the same time the chief priest (see Alf. Jeremias, *Die bab.-assyr. Vorstellungen vom Leben nach dem Tode*, Leipzig, 1887, p. 97, note 1).

The descendants of Ebiathar, when expelled from the priesthood at Jerusalem, are hardly likely to have all remained settled at Anathoth. Probably a portion of them found employment at the sanctuaries of the Northern kingdom, where they took part in the official worship of Jahweh under the figure of a bull. In this way we may explain the narrative in the Jehovistic book, which attributes to Aaron a part in bull-worship, Ex $32^{1ff.}$ (*Gesch.* p. 199; so previously Th. Nöldeke, *Untersuchungen zur Kritik des AT*, Kiel, 1869, p. 55, note). At all events the Northern kingdom too had an organized priestly body, as may be gathered from the story that, after the downfall of Samaria, a priest from amongst the exiles was sent back to Ephraim, to instruct the inhabitants of the land in the worship of the god of the land, *i.e.* Jahweh (2 K $17^{27f.}$).

Besides Ebiathar and Zadok and the son of Ebiathar and the son of Zadok, there is mention of another otherwise unknown 'Ira as priest under David (2 S 20^{26}). According to the traditional text he was a *Jairite*, *i.e.* belonged to a Gileadite family, and was consequently no Levite; but perhaps the statement should be emended to the effect that he was a *Jattirite*, *i.e.* belonged to the priestly city Jattir in Judah (so [following Thenius, *ad loc.*] *Gesch.* p. 192, and Löhr, *ad loc.*), in which case the possibility is not excluded that he was a Levite. In addition to him, David's own sons are called in 2 S 8^{18} *kōhănîm*. In itself there is nothing impossible in the view that David appointed members of his own non-Levitical family to be actual priests, for we see from the picture of Samuel as a priest that at that time and probably for long afterwards the priestly status was not at all bound up with a special descent. But, on the other hand, against understanding *kōhănîm* in the literal sense, when applied to David's sons (as is done by Löhr and H. P. Smith, *ad loc.*), is the circumstance that just immediately before (v.^{17}) the priests of David, namely Zadok and Ebiathar, have been already enumerated amongst the other court officials. Hence it is perhaps probable rather that the sons of David only bore the title of *kōhănîm* in the same way as, in the time of Solomon, we find Zabud, a son of Nathan (probably the son of David), called '*kōhēn*, friend of the king' (1 K 4^{5} [Van Hoonacker, *Sacerdoce*, etc. p. 280 f., and Benzinger, *ad loc.*, following B and Luc. of the LXX, strike out the כהן; but Kittel, *ad loc.*, defends its genuineness]), where in any case 'friend' is a title. But *kōhēn* can scarcely be the title of a court official in the sense of 'representative,' *scilicet*, of the king (so Klostermann, *ad loc.*, who reads 2 S 8^{18} *kōhănê ha-melekh*). As little justification is there for giving up the statement in Samuel in favour of the different expression of the Chronicler (1 Ch 18^{17}), as is done by Van Hoonacker, *Sacerdoce*, etc. p. 275 f. Hitzig's emendation of *kōhănîm* to *ṣōkhĕnîm*, 'administrators' (Is 22^{15}), which is adopted afresh by Cheyne, rests upon the correct impression that from the context it must be a court office that is in view, and the emendation is not demonstrably wrong. Yet it would be surprising if in two passages copyists erroneously introduced the word *kōhēn* in a context where this word must have struck them as strange. Perhaps, then, *kōhēn* is in both instances the original reading after all. Such a title as *kōhēn* may be an imitation of the Phœnicians, amongst whom members of the royal house were often invested with priestly offices (so Movers, and similarly Ewald; see *Gesch.* p. 191 f., and cf., further, Driver on 2 S 8^{18}, who is not quite decided as to the sense of *kōhănîm* in this passage, although he believes that it means *priests* of some kind).

Although the Judæan kings always reserved for themselves a kind of chief priestly position, yet in view of the importance of the temple at Jerusalem as the central sanctuary, and the considerable number of priests which such a sanctuary presupposes, it is hardly possible to avoid supposing that amongst the Jerusalemite priests there was one who claimed the first place, as had already been done at Shiloh by the head of the priestly family. The priest who evidently claimed this first place is in the Books of Kings called for the most part simply 'the *kōhēn*'; so Jehoiada (2 K $11^{9f.}$ *al.*), Urijah ($16^{10f. 15f.}$), and Hilkiah (22^{10} *al.*). The same title is given in Is 8^{2} to Uriah, and in Jer 29^{26} to Jehoiada.* Along with this we have once in Kings (2 K 25^{18}=Jer 52^{24}) the term 'head-priest' (*kōhēn hā-rō'sh*) applied to Seraiah. This title in this instance (differently in 2 S 15^{27} where we should read *ha-kōhēn hā-rō'sh*) is certainly not due to later insertion (Nowack, p. 107, note 1), for in that case the designation 'high priest,' sanctioned by the Priests' Code of the Pentateuch, would have been employed. The title 'head-priest,' found nowhere else except in Ezr 7^{5} and in Chronicles, where it occurs along with 'high priest,' is certainly, for the very reason that it is not found in the Priests' Code, derived from earlier antiquity. On the other hand, it is possible that the title by which the later high priest is distinguished, namely *ha-kōhēn ha-gādôl*, which is once applied to Jehoiada (2 K 12^{11}) and thrice to Hilkiah ($22^{4.8}$ 23^{4}), is due to antedating of this title on the part of the redactor of Kings who wrote during the Exile, or it may even be a later insertion. The Deuteronomic law uses the simple title 'the *kōhēn*' to designate the chief priest.

The dignity and influence of the chief priest of Jerusalem must even in early times have been great. This comes out especially in the commanding rôle which, about the middle of the 9th cent. B.C., was played by the chief priest Jehoiada in connexion with the overthrow of queen Athaliah and the proclamation of her grandson Joash as king, in whose name Jehoiada at first directed the government (2 K $11^{4ff.}$ 12^{3}).† The authority of the chief priest, however, scarcely extended, as a rule, beyond the sphere of the temple at Jerusalem, besides which there continued to exist even in Judah other places of worship with their own priests, down to the time of Josiah's reformation. Yet the prediction above referred to regarding the downfall of Eli's house represents the survivors of this house as begging of the royal priest to put them into one of the priests' offices that they might obtain a morsel of bread (1 S 2^{36}). This may indicate that the chief priest of Jerusalem, so long as the existence of the smaller sanctuaries of Judah was not opposed in the interest of the temple at Jerusalem, exercised a certain supremacy over these, and made appointments to their staff of priests. It can scarcely be that we are to think of reception of the Elidæ into priestly offices at Jerusalem, where the Zadokites would be very slow to suffer the intrusion of strangers.

---

* It may, indeed, be doubted whether in Jeremiah the reference is to the same Jehoiada, who was chief priest under Joash. Renan (*Hist.* ii. [1889] 323, note) and Van Hoonacker (*Sacerdoce*, etc. p. 158 f.) contest it; but see Hitzig and Graf on Jer 29^{26}.

† Tradition furnishes no warrant for reconstructing the history with Renan (*Hist.* ii. 323, 409, note 1), who introduces, alongside of Jehoiada the priest, in 2 K 11^{4}, an officer of the guard of the same name. No priest, it is true, had the right to summon the army, but the priest Jehoiada could act in accord with the chiefs of the army. That the latter allowed themselves to be led by him is an indication of the respect paid to his position.

Alongside of the head-priest Seraiah there is mention in 2 K 25^{18} (Jer 52^{24}) of Zephaniah as *kōhēn mishneh* (*kōhēn ha-mishneh*), lit. 'priest of the repetition,' *i.e.* probably representative of the head-priest. The same title occurs in 2 K 23^{4}, where, instead of the plural *kōhănê ha-mishneh*, the singular is to be read with the Targum, since a plurality of 'priests of the second rank,' beside the high priest, who is here named, and the keepers of the threshold, would come in strangely when there has been no mention of priests of the first rank (it is therefore not permissible, with Van Hoonacker, *Sacerdoce*, etc. p. 162, to find in the *kōhănê ha-mishneh* the Levites of the Priestly Writing). The Zephaniah in question appears in Jer $29^{25\text{f.}}$ as principal overseer of the police arrangements in the temple. The **keepers of the threshold** (*shōmrê ha-ṣaph*) are also named in 2 K 25^{18} (Jer 52^{24}) along with the head-priest and the 'second' priest; according to this passage the keepers of the threshold were three in number. Plainly we must think here of a fairly exalted priestly office, different from the humbler station of the post-exilian doorkeepers (*shō'ărîm*), of whom there were a great many (2 Ch 34^{9} confuses these with the keepers of the threshold who are reckoned among the Levites). The keepers of the threshold already appear in the time of Joash (2 K 12^{10}) as having to guard the entrance to the inner fore-court with the altar of burnt-offering. According to this same passage as well as 2 K 22^{4}, one of the duties of the keepers of the threshold was to collect the people's contributions to the temple. We must suppose that other priests or temple attendants were at their command in the discharge of their duties, which could scarcely have been overtaken by only three persons. Beyond all doubt we have in the keepers of the threshold to do with an actual pre-exilian priestly office, for it is an office which is unknown in later times.

According to 2 K 19^{2} (Is 37^{2}), the priestly body was arranged in groups as early as the time of Hezekiah, for here we read of 'elders of the priests,' who can be nothing else than chiefs of groups.

In only a few passages, apart from Chronicles, where post-exilian relations are everywhere transferred to earlier times, are Levites named during the monarchical period. In 1 S 6^{15} and 2 S 15^{24} they appear as bearers of the ark of Jahweh, just as in the Priestly Writing and in Deuteronomy. The first of these passages, where the Levites make their appearance quite abruptly, is manifestly interpolated. On the other hand, in the second passage the Levites, who are found here in the retinue of the priest Zadok, are not out of place; but it must be confessed that the text of the whole passage is corrupt, and on this account doubt is here again cast upon the presence of the Levites. In Kings there is only a single mention of Levites, namely in 1 K $8^{3\text{f.}}$. Here they are clearly thrust into the text by means of a later interpolation (the close of v.^{4} is found in the LXX only in A), for it is said first of all that priests took up the ark, the tent of meeting and its vessels, and only afterwards is the supplementary remark made that priests *and Levites* did this. All the same, however, the term 'sons of Levi' for those who were entitled to exercise the priestly office was known to the author of Kings, who blames Jeroboam for making priests 'from among all the people, which were not of the sons of Levi' (1 K 12^{31}).

The existence of a class of sanctuary attendants, different from the priests or subordinate to them, and who were called 'Levites,' cannot be proved for the monarchical period. But there are clear enough allusions, during this period, to temple attendants or slaves. According to Jos 9^{23}, the **Gibeonites**, on account of the fraud they perpetrated upon the Israelites, were pronounced by Joshua accursed and degraded to be serfs, namely hewers of wood and drawers of water for the house of his God. This passage, from the mention of 'the house of God' (not 'tabernacle,' as in the Priestly Writing), is seen to be from the Jehovistic book (differently P in v.^{21}, cf. v.^{27} [JE and P, with a Deuteronomic addition]). In this account of the institution of temple-slaves the writer of the Jehovistic book is thinking unquestionably of those that belonged to the Jerusalem temple as κατ' ἐξοχήν the house of God, and thus anticipates the temple and its set of attendants. Saul had not quite succeeded in exterminating the Gibeonites (2 S $21^{1\text{ff.}}$); what survived of them belonged no doubt to the remnants of the Canaanites in the midst of Israel, of whom it is related that Solomon put them to forced service (1 K $9^{20\text{f.}}$). Even in the post-exilic period there were still '**servants of Solomon**,' along with other temple-slaves, the **Nethinim**, *i.e.* 'those given' (Ezr $2^{54\text{ff.}}$ *al.*). After the Exile we hear also of Nethinim, who are said to have been given by David and the princes 'for the service of the Levites,' *i.e.* for the temple (Ezr 8^{20}).

Even the pre-exilic period would appear to have been acquainted with other grades, in addition to this lowest grade, of sanctuary attendants, who were also distinct from the priests proper. In the time of Nehemiah there was in the new community a large body of **temple-singers** and **doorkeepers**, who were then, or at a later period, considered to have returned from the Exile with Zerubbabel (Neh $7^{44\text{f.}}$ = Ezr $2^{41\text{f.}}$). It is difficult to suppose that these groups of sanctuary servants took their rise in the cultus-lacking period of the Exile, and equally so to believe that they were a new creation during the miserable beginnings of the restored religious service in the period between the First Return and the advent of Nehemiah. The post-exilic temple-singers and doorkeepers are therefore, in all probability, descendants of those who had discharged the same offices in the pre-exilic temple (so also A. Kuenen, *Hist.-krit. onderzoek naar het ontstaan en de verzameling van de boeken des Ouden Verbonds*, vol. iii. Leiden, 1865, p. 288 f.; and especially Köberle, whose assumptions, however, regarding the pre-exilic period go much farther).

4. THE PRIESTHOOD ACCORDING TO DEUTERONOMY.—The relations of the cultus *personnel* at the close of the monarchical period are unquestionably portrayed in the Deuteronomic law, not but that the attempt is made by the legislator to modify these relations upon the ground of the centralization of the cultus for which he contends. The Deuteronomic law in its primitive form, which

has to be recovered from the present Bk. of Dt, is that book of the law which was found in the temple in the reign of Josiah, and which was the occasion of his reform of the cultus. The law-book proper is in any case contained in chs. 12–26. As a whole it cannot be much older than the date of its discovery, since its standpoint and its language both point to the time of Jeremiah. A ritual code proper it is not, rather are regulations about the cultus treated of only in so far as they touch the one demand of the legislator directly affecting the cultus, namely that for a single sanctuary, or have a bearing upon the social relations about which he is concerned. Even the demand for a single place of worship is not really made in the interest of the cultus, but rather in that of the form of the belief in God. In the course of his legislation, which is not directed specially from the point of view of the Divine service, the author of the Deuteronomic law is far from giving a complete picture of the existing priestly relations, or of those to be established. In what he says about them there are gaps which must be filled up from what we know from other sources. This cannot be done with complete certainty on all points.

The priests are constantly referred to in Dt as 'the Levite priests' (*ha-kōhănîm ha-lĕwiyyîm*, $17^{9.18}$ 18^{1} *al.*). The legislator evidently has in view, in this expression, a special descent, for in 21^{5}, in an older enactment, as it seems, borrowed by the author, there occurs the other expression, 'the priests, the sons of Levi' (so also 31^{9}). The same inference follows from 18^{1} 'the Levite priests, the whole tribe of Levi,' where the second designation is probably in apposition with the first, in which case the author of the Deuteronomic law would not distinguish between 'Levite priests' and 'Levites.' Since he recognizes only the one place chosen by Jahweh, namely Jerusalem, as a place of worship, it is only there that in his estimation real priests are to be found. But he knows of Levites who live scattered up and down in the land, and appears to be willing to concede to the whole of these, if they come to reside at Jerusalem, the same rights at its temple as the Levite priests who are settled there. Such at least is the simplest way of understanding Dt $18^{6ff.}$: 'And if a Levite come from any of thy gates out of all Israel, where he sojourneth, and come with all the desire of his soul unto the place which Jahweh shall choose, to minister there in the name of Jahweh his God like all his brethren, the Levites, who stand there before Jahweh, he shall eat the same portion [as they].' This last expression appears to refer to the priest's right to the sacrificial portions mentioned in v.$^{3f.}$ and to the *rē'shîth*. Every Levite thus appears to acquire priestly rights as soon as he takes up his abode at Jerusalem. It is true that 18^{7} does not say that [the Levite] serves there 'like all his brethren the Levite priests,' but 'like all his brethren the Levites.' Hence the interpretation is not absolutely excluded that the passage means to say that every member of the tribe of Levi who comes to Jerusalem may discharge functions there, according to his special station, whether as priestly or as serving Levite, and that he is entitled to the payment corresponding to the particular service rendered (so Van Hoonacker, *Sacerdoce*, etc. p. 174). This explanation, however, is not a probable one, because even in this passage there is not the slightest hint of any distinction amongst the Levites; and the expression here used of the Levites at Jerusalem, 'stand before Jahweh,' appears also outside Dt as the designation of the specifically priestly service (Ezk 44^{15}).

In Dt 21^{5} it is prescribed that the 'priests, the sons of Levi,' are to assist in the atoning ceremony for a murder that has been committed in the neighbourhood of a city of Israel; those meant then are apparently priests from this particular city. In like manner in 24^{8}, where the treatment of leprosy is entrusted in quite general terms to the Levite priests, the existence of priests outside Jerusalem appears to be presupposed, for the Jerusalem priests could hardly have exercised the supervision in question for the whole country. Both these passages, which appear to be out of harmony with the Deuteronomic conception that there are priests only at Jerusalem, are probably borrowed from older laws which recognized a priesthood scattered up and down throughout the land.

A distinction between priests and Levites is equally unknown to the expansions of the Deuteronomic law. The parenetic introduction to Dt assumes that the tribe of Levi, after the destruction of the golden calf (10^{1}, cf. $9^{16ff.}$), was chosen by Jahweh to bear the ark of the covenant, to stand before Jahweh to serve Him, and to bless in His name (10^{8}). This serving (*shārēth*) and blessing are specially priestly functions. The meaning of this passage might, indeed, be that these functions and the bearing of the ark (which, according to another conception, that of the Priests' Codex [see below, § 8 d], is not a specially priestly office) were divided amongst different branches of the tribe of Levi. But in the passage belonging to some redactor of the Deuteronomic law, 31^{9}, the ark is borne by 'the priests, the sons of Levi,' while in v.^{25} its bearers are the Levites. The preservation of the law is, according to $31^{25f.}$, the business of the Levites; according to v.^{9} (and 17^{18}), it is the business of the priests, the sons of Levi (the Levite priests). Everywhere here there appears to be no difference recognized between Levites and priests. In ch. 27, which is also a section belonging to a redactor of the Deuteronomic law, the same persons who in v.^{9} are called Levite priests, appear to be called in v.^{14} Levites (but cf., on this passage, Kautzsch, p. 288). Taking everything into account, neither in the Deuteronomic law nor in the additions to it is 'Levite' employed as the special designation for a class of temple-servants subordinate to the priests. The supposition is, indeed, not absolutely excluded that priests and temple-servants are both included in the name 'Levites,' but even this is not likely. Rather would it appear that all through the Bk. of Deuteronomy we are to understand by Levites those only who are called to the priesthood proper. There can, indeed, be no doubt, after what we know from the Jehovistic account in the Bk. of Joshua (see above, § 3) about temple-slaves, that the author of the Deuteronomic law and those who expounded his law were acquainted with lower grades of temple-servants, but to all appearance they did not reckon these among the Levites.

In the words of Dt 26^{3} 'the priest who shall be in those days,' there appears to be an allusion to one special priest, a chief priest. In 17^{12}, on the other hand, 'the priest' may be taken rather as a typical designation for any priest (although it is against this interpretation that in v.^{9} we have the sing. 'the judge' side by side with 'the Levite priests' in the plural). Certainly in the redactory addition to the narrative introduction to Deuteronomy, namely 10^{6}, a chief priest is taken for granted: 'Aaron died, and his son Eleazar became priest in his stead,' *i.e.* Eleazar then became *chief* priest, he was *a* priest already (*Gesch.* p. 88 f.).

If no undoubted mention of a chief priest can be found in the Deuteronomic law proper, still less does it speak of the other priestly dignities which, according to the Books of Kings (see above, § 3), already existed in the pre-exilic period. This shows the incompleteness of the Deuteronomic data regarding priestly relations.

Deuteronomy shows a distinct advance upon the older relations witnessed to in the Jehovistic book, in this, that no longer do we hear of lay priests. It is plainly assumed in Dt that only Levite priests are entitled to offer sacrifice. The whole duty of the priests is summed up in the expression 'serve Jahweh' (*shārēth Jahweh*, 17^{12} 21^{5}, also *shārēth* absolutely, 18$^{5.\,7}$), or in the equivalent expression, 'stand before Jahweh' (18$^{5.\,7}$). To this service belongs the pronouncing of the blessing upon the people (21^{5} 10^{8}). Besides their special functions in connexion with the cultus, the priests are entrusted with the supervision of leprosy (24^{8}). Further, the priest has to give a hortatory address to the host of Israel before it moves out to battle (20$^{2\mathrm{ff.}}$). The ancient priestly task of giving judicial decisions still persists in Deuteronomy. To deal with difficult lawsuits, a superior court is established at Jerusalem (17$^{8\mathrm{ff.}}$), in which Levite priests have a seat along with a lay judge (*shōphēṭ*). By the body of judges mentioned in 19^{17} as consisting of priests and a plurality of *shōphĕṭîm*, we should probably understand the local court. According to the decision of 'the priests, the sons of Levi,' shall every controversy and every offence be judged, hence the priests have to take part in the atoning ceremony performed when a man has been murdered by an unknown hand (21^{5}). Moreover, according to a passage, whose place as a constituent of the primitive Deuteronomy is not uncontested, 'the priests, the sons of Levi,' have to see to the preservation of the book of the law (17^{18}; cf. 31^{9} and also v.^{26}).

The tribe of Levi has, according to Dt, no inheritance in the land; Jahweh is their inheritance, *i.e.* the Levite priests are to live by their holy service (18$^{1\mathrm{f.}}$ *al.*, also in the introduction 10^{9}). Personal ownership of land on the part of a Levite is not thereby excluded (18^{8}). As he discharges his holy office, certain specified portions of the sacrifices and the dedicated gifts fall to the officiating priest. He receives the shoulder, the cheek, and the maw of all offerings in cattle and sheep (18^{3}). The priest is to have the *rē'shîth*, the best, of corn, must, oil, and (cf. 15^{19}) wool of sheep (18^{4}). According to 26$^{10\mathrm{f.}}$, however, the whole of the *rē'shîth* did not fall to the priest, at least not that of the fruit of trees (vv.$^{2.\,4}$); on the contrary, a feast is to be made of this, which does not, however, exclude the supposition that a portion of this meal had to be given to the priest. In what relation this *rē'shîth* stands to the tenth, and whether the regulations about the *rē'shîth* belong to the original elements of the Deuteronomic law, is not quite clear (Nowack, p. 126); there is no mention of the officiating priest having a share of the meals held with the tithes.

Quite peculiar weight is laid by the author of the Deuteronomic law on injunctions of kindness to the Levites. These manifestly cannot have in view the Levites who exercise priestly functions at Jerusalem, for they had their fixed perquisites from the offerings, and did not require kindness. Rather has the lawgiver in his mind the Levites of the country who did not discharge holy services, and he refers to them clearly in the expression, 'the Levite that is within thy gates' (12$^{12.\,18}$ *al.*). It is expressly enjoined that the Levites, along with other needy persons, are to be invited to the meals held with the tithes (14$^{27.\,29}$), to the sacrificial meals (12$^{12.\,18\mathrm{f.}}$ 26^{11}), especially to the joyous celebration of the festivals (16$^{11.\,14}$), and that the third year's tithe is to be given to them and to other needy ones (26^{12}). One is not, as it is expressed in these enactments, to 'forsake' the Levite (12^{19} 14^{27}), who is thus in need of religious charity. It is not clear at the outset what kind of Levites outside Jerusalem the author of the Deuteronomic law has in view in the above injunctions. It is generally supposed that he refers to the country Levites in general, in so far as these, owing to the centralization of the cultus demanded by the Deuteronomic law, would be deprived of their former income derived from the numerous places of worship in the country, the *bāmôth*. But it is not at all likely that the author of the Deuteronomic law should confess to so special an interest in the priests of the *bāmôth* service which he prohibits, and which was largely mingled with idolatry. Moreover, he evidently conceives of the Levites, who are commended to charitable support, as already in destitution; it is not as of the future but as of something present that he speaks, when he refers to the Levite 'who is within thy gates.' Probably he is thinking of those Levites who had not taken part in the service on the high places, and yet, as not belonging to the Jerusalem priesthood, were excluded from officiating in the cultus of the temple. He may also have had this class specially in view in speaking of the Levites to whom he desires to open the entrance to the cultus at Jerusalem whenever they take up their abode there. That there were such Levites in the time of Josiah is not to be doubted. The priestly family to which Jeremiah belonged lived at Anathoth, probably traced its origin to the Elidæ (see above, § 3), and can hardly be supposed to have been admitted by the Zadokite priests at Jerusalem to a share in the temple service. On the other hand, it is not conceivable, at least in the case of Jeremiah himself, that he took part in the *bāmôth* service, and thus his priestly descent brought him no income. Other Levites, too, may have found themselves in the same situation.

The attitude of the author of the Deuteronomic law to the non-Jerusalemite Levites is of great importance for the forming of a judgment on his legislation and its origin. It is accordingly, in the opinion of the present writer, improbable that the author of the Deuteronomic law belonged, as is mostly held at present, to the Jerusalemite priesthood, and it is further extremely probable that although, like the prophets long before him, he stands up for Jerusalem as the legitimate place of worship, the cultus forms he describes are not specifically Jerusalemite. To this may be ascribed many of the differences between the Deuteronomic prescriptions and those of other codes in the Pentateuch. In any case the author of the Deuteronomic law, in view of the many points of contact between Jeremiah and the laws in Dt, must have stood near to the circle in which Jeremiah moved, that is to say, at once the prophetical and the non-Jerusalemite Levitical circle. The circumstance that it was Hilkiah, the chief priest under Josiah, who caused the 'book of the law' (*i.e.* Deuteronomy), which he found in the temple during the execution of some repairs, to be submitted to the king (2 K 22$^{8\mathrm{ff.}}$), is no evidence that this book was the genuine expression of the then aims of the Jerusalemite priesthood. We have no reason to doubt that Hilkiah *bonâ fide* regarded the book which he had found, and whose origin he need not have known, as the ancient book of the law, and gave weight to it as such, without regard to the convenience or inconvenience of its contents. Besides, we may suppose that the requirement of the centralization of the cultus, which underlies the whole of Dt, was so extremely welcome to the Jerusalemite chief priest that it would go less against the grain for him to take into the bargain other requirements which did not exactly serve the special interests of the Jerusalemite priesthood. Further, we have no reason to think of Hilkiah as prejudiced in favour of this special interest.

5. The Priesthood from Josiah's Reform to the Exile.—The requirements of Dt on behalf of the Levites were not carried out to their full extent in Josiah's reform. Even from this circumstance it may be inferred that Hilkiah, under whose guidance probably the reform was conducted, is not to be credited with the formulating of the Deuteronomic legislation. A consistent carrying out of the letter of the Deuteronomic prescriptions would have required that, after the abolition by Josiah of all places of worship except the temple at Jerusalem, all non-Jerusalemite Levites who desired it should be equally admitted to the cultus at Jerusalem; for Dt sets up no distinction amongst the Levites outside Jerusalem, between those who are entitled to this and those who are not. Notwithstanding, in so far as the narrative in Kings is correct, and in this instance its correctness hardly admits of doubt, nothing like a general admission of Levites took place. Hilkiah, if he was the moving agent in formulating Dt, must thus either have failed to carry out thoroughly his own aims, or he did not in the Deuteronomic programme give correct expression to these aims. Little probability attaches to either of these suppositions.

According to the narrative of Kings (2 K 23), Josiah, in his purification of the cultus by the suppression of the *bāmôth* worship, appears to have distinguished between three categories of priests outside Jerusalem. The kĕmārîm he deposed (v.^{5}). By these are meant, in accordance with the uniform OT use of this word (see above, § 1), and in view of the way in which the *kĕmārîm* are introduced in connexion with the suppression of the Baal worship which found expression in the adoration of sun, moon, and stars—idolatrous priests. The *kōhănîm* from the cities of Judah were assembled by the king (v.^{8}), but he did not permit the priests of the high places to ascend the altar of Jahweh at Jerusalem, but allowed them to 'eat *mazzôth* in the midst of their brethren' (v.^{9}). By this is perhaps meant that they had to remain in their respective places and there find their bread. In this sense the expression would certainly be somewhat strange, and there would be no indication then that these *bāmôth* priests were treated with any less severity than the *kĕmārîm*, although it must be assumed that they were. We must therefore suppose that the expression 'eating of *mazzôth*' has reference to some favour shown them in the matter of maintenance (*Gesch.* p. 225 f.). Of a third class of non-Jerusalemite priests there is not express mention; but since it is said that the *kōhănîm* (in a body) were assembled at Jerusalem, and then the special treatment of the *kōhănîm* of the high places is indicated, the assembling can hardly have had any object except to separate these *bāmôth* priests from other non-Jerusalemite priests who had not been priests of the high places. Kuenen (*ThT*, xxiv. [1890] p. 27) objects, indeed, to this explanation, with apparent right, when he says that then the order of words in 2 K 23^{9} would require to be *'akh kōhănê ha-bāmôth lō' ya'ălû*. But the contrast is between 'he *brought* to Jerusalem' (v.^{8}) and 'the priests of the high places *went not up*,' so that the order of words (*'akh lō' ya'ălû*) can be justified also on our view. Those non-Jerusalemite priests who had not been priests of the high places were then probably admitted by Josiah, in accordance with the directions of Dt regarding the Levites, to a share in the cultus at Jerusalem. If this was done, the requirements of Dt were satisfied in the spirit, although certainly not to the extent of what, taken in the letter, they might express. On the other hand, if by the priests of the high places (v.^{9}) who were excluded by Josiah from the service of the altar, we are to understand all non-Jerusalemite Levites, it must be held that the Deuteronomic demands in favour of the admission of the non-Jerusalemite Levites had no regard paid to them at all. Considering the impression which the law made upon Josiah, this is not exactly probable, for Dt demands in no ambiguous terms that the non-Jerusalemite Levites should be admitted to some share in the holy service. It is possible, no doubt, that in the narrative of Kings the admission of non-Jerusalemite Levites to the cultus is passed over in silence, not without intention, because it might appear objectionable to the author. In the cities of the old kingdom of Samaria, which were likewise purified of the *bāmôth*, Josiah, according to the narrative of Kings, offered all the *bāmôth* priests upon the altars (v.^{20}). Whether this bloody measure was literally carried out may indeed be doubted. On other points the story of the reform of the cultus makes the impression of being based upon good authority. For instance, in the mention of the eating of *mazzôth* (or whatever may have been the original expression in what is perhaps now a corrupt text) by the former priests of the high places in the midst of their brethren, the author must have had in view a special arrangement no longer clearly intelligible to us, which cannot have been invented by him after the analogy of certain relations in which the priests found themselves at a later period, or which were known from other sources.

The Bk. of Jeremiah calls the prophet's relatives at Anathoth *kōhănîm* (1^{1}); they would have been called in Dt *Levites*. Besides this, in a passage which it is difficult to assign to Jeremiah himself, the Deuteronomic expression 'Levite priests' is employed (33^{18}), and in the same place there is mention of 'the Levites, the priests, my (*sc.* Jahweh's) ministers' (v.^{21}), or, more briefly, 'the Levites that minister to me' (v.^{22}). The Bk. of Jeremiah bears no witness to the existence of a class of Levites distinct from the priests. But it certainly witnesses to an organization of the priestly body. There is mention of elders of the priests (19^{1}), the office of chief superintendent in the temple (20^{1} 29$^{25f.}$), as well as that of keeper of the threshold (35^{4}). The priests, even the higher grades of them, appear to be still regarded as court officials; at least the chief superintendent Zephaniah (29$^{25f.\ 29}$) makes his appearance as a messenger of king Zedekiah (21^{1} 37^{3}).

6. The Priesthood in Ezekiel's State of the Future.—During the Exile, the prophet Ezekiel, the son of Buzi, of priestly descent (Ezk 1^{3}), drew up a set of statutes for the future theocracy. These statutes are thoroughly imbued with a priestly spirit, and in view of the commanding position which is assigned in them to the sons of Zadok, the Jerusalemite priestly family, there can be no doubt that Ezekiel himself belonged to this family.

In the State of the future, in what shall then be the sole existing temple, that at Jerusalem, he permits (44$^{15f.}$) none but the Levite priests (cf. 43^{19}), the sons of Zadok, to enjoy priestly rights, to offer to Jahweh fat and blood, to enter His sanctuary and to approach His table; this prerogative is to belong to them because they kept the charge of the sanctuary of Jahweh when the children of Israel went astray. The prophet's meaning clearly is, that the Zadokites kept the service of Jahweh pure when the people deviated into idolatry—a statement which, of course, has only a measure of truth, for the intrusion of idolatry into the temple at Jerusalem in the reign of Manasseh cannot have taken place without some complicity on the part of the Jerusalemite priests. The Zadokites are contrasted by Ezekiel with the Levites who went astray from Jahweh when Israel apostatized, who left the service of Jahweh for that of idols. They are to bear their iniquity, they shall not approach Jahweh to exercise the office of priest to Him, nor approach His holy things; on the contrary, they are to take the place of the foreigners who have hitherto been allowed to enter the sanctuary as keepers of it, and in their room they are to keep watch at the doors of the temple, to be ministers of the house, to slay the burnt-offering and the sacrifice of the people, and to stand before them (the Israelites) to minister to them ($44^{6ff.}$). Besides slaughtering the victims, the 'ministers of the house,' *i.e.* the non-Zadokite Levites, have, further, to cook the sacrifices of the people (46^{24}).

It is plain that by the non-Zadokite Levites, Ezekiel means the former priests of the high places, who had abetted the people's practice of idolatry on the high places. For this they are to be deprived of their former priestly rank and degraded to the position of temple-servants. From this it may be seen that Josiah's reform had not been able to destroy the former *bāmôth* priests' claim to priestly rights. They could, in face of that reform, appeal to the enactment of Dt, whereby an equal share in the priestly service at Jerusalem was open to all Levites who might come to attach themselves to the cultus there.

The explanation of Ezekiel's 'Levites' as the former priests of the high places has been rightly maintained, especially by Graf, Kuenen, and Wellhausen. On the other hand, one cannot infer, as has been done by the writers just named, from Ezekiel's presentation of the case, that up till then there were in the temple at Jerusalem no other servants of the priests or of the temple beyond the foreigners spoken of. Ezekiel demands merely that the foreigners who had previously given service in the sanctuary, and who are known from the Jehovistic passages in the Bk. of Joshua (see above, § 3) as temple-slaves, should have their place taken in future by the former priests of the high places. But besides such servants, there may, even prior to the time of Ezekiel, have been Israelites, possibly even Levites in particular, who held in the temple a position subordinate to the priests and intermediate between them and the laity. Ezekiel speaks of a degradation not of the Levites as a body, but only of those of them who had been priests of the idol-worship. Only in a later passage (48^{11}) does he say of the 'Levites' generally, in distinction from the sons of Zadok, that they 'went astray,' but, after the previous description of the manner of this going astray, it may be so put for the sake of shortness. That besides those who went astray and the Zadokites there is yet another group of Levites recognized by Ezekiel, namely those who had even at an earlier period occupied the position now assigned to the former *bāmôth* priests, of this there is certainly nowhere a clear expression. One might think to deduce it from $40^{45f.}$, where—before the degrading of the idolatrous Levites is spoken of—a distinction is made between 'the priests, the keepers of the charge of the house,' and 'the priests, the keepers of the charge of the altar, which are the sons of Zadok, who from among the sons of Levi draw near to Jahweh to minister to him' (*Gesch.* p. 106). Smend (*ad loc.*) and Kuenen (*ThT*, 1890, p. 23) would refer the words 'these are the sons of Zadok' to both the preceding definitions of the *kōhănîm*, so that by 'keepers of the charge of the house' we should not have to understand Levites as distinguished from Zadokites. This does not appear to the present writer to be permissible, seeing that in 44^{11} it is expressly said of the Levites that they are to be 'ministers of the house,' and in 44^{14} that it is they that are to be 'keepers of the charge of the house' (cf. 46^{24}), whereas 44^{16} says of the sons of Zadok that they are to draw near to the table of Jahweh, which corresponds to the definition 'to keep the charge of the altar.' Kuenen appears to be decidedly wrong when, in answer to the present writer's distinguishing of two classes of priests in $40^{45f.}$, he objects that the south hall and the north hall in $40^{45f.}$, of which the first is for the keepers of the charge of the house, and the second for the keepers of the charge of the altar, are, according to 42^{13}, both intended for the priests proper, 'who draw near to Jahweh,' *i.e.* the Zadokites. The south hall and the north hall of $40^{45f.}$ are quite different from the north halls and south halls of 42^{13} (observe hall*s* to the north and hall*s* to the south,' both times in the plural). The two single halls of $40^{45f.}$ lie outside the inner gate, *i.e.* the south gate and the north gate leading to the inner fore-court, by the side of the gate (v.^{44}). The north halls and south halls of 42^{13} are situated opposite the inner fore-court, *i.e.* outside the latter, on its north and south sides (see Smend, *ad loc.*). From 42^{13} it cannot then be inferred that the *kōhănîm* mentioned in $40^{45f.}$ are all to be regarded as Zadokites. But even if in this passage a distinction is already made between priests of first and second rank, it is possible that there is in this a proleptic reference to the later statements about the degrading of the priests of the high places. If so, it is certainly surprising that only in 40^{45} are even the lower class spoken of as *kōhănîm.* The two classes are elsewhere distinguished by Ezekiel in the same fashion, but the designation *kōhănîm* for the lower class occurs no more after the rule has been laid down in ch. 44 that the Levites who went astray are no longer to discharge priestly services. On the contrary, $45^{4f.}$ speaks of 'the priests, the ministers of the sanctuary, who draw near to minister to Jahweh,' and, along with these, of 'the Levites, the ministers of the house.' Therefore it seems to follow from the peculiar form of designation, *kōhănîm*, applied only in $40^{45f.}$ to the lower class, that the distinction of *kōhănîm* of two grades was familiar to Ezekiel from already existing relations (so Van Hoonacker, *Sacerdoce*, etc. p. 195), but that in his later utterances he purposely avoided giving to the lower class the name of 'priests,' after he had denied the priestly character to the apostate Levites who were assigned to this class. That there should have been a second class of priests even prior to the Exile is not astonishing in view of the various priestly dignities recognized in the Bks. of Kings (see above, § 3). If this were really the case, the priests of secondary rank will, of course, have been different from the foreigners, the temple-slaves. The latter are required by Ezekiel to be in future wholly discarded. His Levites, *i.e.* the former priests of the high places, are, on this presupposition, to discharge in the future cultus the duties which hitherto have been discharged by the priests of the second rank and the foreigners.

A chief priest is not known to the future theocracy of Ezekiel any more than a king, but only a 'prince' (*nāsî*), to whom certain priestly prerogatives belong, as they had done to the pre-exilic king. The prince may upon certain occasions enter the east gate of the inner fore-court, but not this court itself; he is to defray the cost of the daily offering and the material for the offerings at the great festivals, and for the people (*Gesch.* p. 129 f.). 'The priest' who officiates at the atonement for the sanctuary on the first day of the first and seventh months ($45^{19f.}$) can hardly be the chief priest (Smend, *ad loc.*), but may rather be regarded as the particular Zadokite who happens to officiate. It has frequently been assumed that these ordinances of Ezekiel imply the non-existence of a '**high priest**' up to his time. It may be, indeed, that prior to Ezekiel no priest bore the exact title 'high priest'; but there can be no doubt, from the account of things in the Bks. of Kings, that prior even to the Exile there was a *chief* priest at Jerusalem. In Ezekiel's theocracy Jahweh is directly present, hence it has no room for a human king, and is just as little in want of a single priestly mediator (this also against Van Hoonacker, *Sacerdoce*, etc. p. 368, who holds that Ezekiel intends, by the emphasis he lays on Zadok as the father of the Jerusalemite priesthood, to recognize in his State of the future a 'high priest' such as Zadok was). Ezekiel's temple has no sacred ark, to which such a priest had to draw near, but God Himself dwells in the temple. It may be that in the words, 'Away with the tiara (*miẓnepheth*, elsewhere only as the designation of the high priest's turban in the Priests' Code, cf. *ẓānîph* in Zec 3^{5}), hence with the crown' (Ezk 21^{31} [Eng.^{26}]), there is a distinct rejection both of the kingship and of the high priesthood expressed (*Gesch.* p. 118 f.). At all events, in view of the dropping of the title of 'king' in Ezekiel's theocracy, it would not be surprising if he meant a hitherto existing high priesthood to be also discarded.

Ezekiel gives special injunctions to the priests. They are to perform the holy service, clothed in linen, not in wool, in order to avoid sweat ($44^{17f.}$). This official dress they are to put off when they go out to the outer court, that they may not sanctify the people with their holy garments (v.^{19}). In like manner, in order to avoid sanctifying the people, it is enacted that the priests are to boil the guilt-offering and the sin-offering and to bake the *minḥāh* in chambers of the inner court, but not to bring them into the outer court ($46^{19f.}$). Their hair they are neither to let grow long nor to shave off, but to cut; when they go into the inner court they may not drink wine ($44^{20f.}$). They may not marry a divorced woman, but only a virgin of the house of Israel or the widow of a priest (v.^{22}). They are not to defile themselves with dead bodies except in the case of the nearest relations; in the event of such defilement the priest is not to be allowed to enter the inner court and present his sin-offering till the seventh day after his purification (v.$^{26f.}$). An injunction, which was indeed of general application (cf. Ex 22^{30}), is addressed with special emphasis to the priests, namely that they are not to eat of animals that have died of themselves or been torn (v.^{31}). Amongst the functions assigned to the priests, besides the offering of sacrifice, there is the instruction of the people in the difference between holy and profane, clean and unclean, as well as the giving of judicial decisions (v.$^{23f.}$).

The principle already laid down in Dt, and repeated by Ezekiel, that the priests are to have no inheritance in the land of Israel, that Jahweh is their inheritance (44^{28}), is not carried through consistently by Ezekiel. He assigns to the priests the land immediately surrounding the temple, as a holy *tĕrûmāh* or 'portion' to dwell on ($45^{1ff.}$ $48^{10ff.}$); the Levites receive the district touching on the priests' land (45^{5} 48^{13}). The land of the priests and Levites is an inalienable possession (48^{14}). Besides this the priests have, as in Dt, but after a different arrangement, definite portions assigned them of the sacrifices and sacred gifts. The *minḥāh*, the sin-offering and the guilt-offering they have to consume in the chambers of the temple (42^{13} 44^{29}). Every 'devoted thing' in Israel falls to them (44^{29}), and, in the case of the consecrated gifts, the best (the *rē'shîth*) of all the first-fruits of everything, and of every heave-offering (*tĕrûmāh*), of everything of all heave-offerings, along with which special mention is made, further, of the best (the *rē'shîth*) of the dough (44^{30}). By the heave-offering appears to be meant vegetable products of the land, along with the first-fruits already mentioned. Of the heave-offering also only the *rē'shîth* is assigned to the priest. What is to be done with the rest is not indicated, perhaps it goes to the State (*Gesch.* p. 126 f.).

7. THE PRIESTHOOD FROM EZEKIEL TO EZRA. —Ezekiel's ordinances were of an ideal character, calculated upon a hoped-for restoration of the theocracy. During the Exile, when there was no holy service performed, we learn nothing about the condition of the priestly arrangements. Only Deutero-Isaiah speaks of 'holy princes' (43^{28}), by which probably priest-princes are meant, and in that case a priesthood organized in different grades is presupposed, such as we make acquaintance with in Kings. A prophet writing in the period after the Return, who appears to have belonged to the school of Deutero-Isaiah, but can scarcely have been identical with him, rises to the broad-minded expectation that Jahweh in the future will take to Himself even Gentiles 'for priests, for Levites' (Is 66^{21}, where read לַכֹּהֲנִים לַלְוִיִּם; see *Gesch.* p. 249 f.). Whether the prophet understands the terms 'priests' and 'Levites' to be identical in meaning, or distinguishes between them (so, recently, again, Van Hoonacker, *Sacerdoce*, etc. p. 206 ff.), is not perfectly clear; but the probability is that the two terms are regarded as equivalent, as otherwise there would be an anti-climax in the order 'priests, Levites.' The statement assumes the simplest character if one emends (with Kuenen, Duhm [*ad loc.*], Kittel [*ad loc.*], and Cheyne [*Introd. to the Book of Isaiah*, London, 1895, p. 377]) לַכֹּהֲנִים הַלְוִיִּם 'for Levite priests.'

From the post-exilic community we have authentic information about the condition of the priesthood, first of all from Haggai and Zechariah in the second year of king Darius (Hystaspis), B.C. 520. Both these prophets speak of Joshua, the head of the priestly body, as '**high priest**' (*ha-kōhēn ha-gādôl*, Hag $1^{1.\ 12.\ 14}$, Zec $3^{1.\ 8}$ *al.*), a designation of which we have found hitherto only isolated occurrences in Kings, without having any guarantee from these that we are entitled to look upon it as a pre-exilic title. When, in the vision of Zechariah, the Satan accuses the high priest, his complaint is repelled by the angel of Jahweh, in the name of Jahweh 'who has chosen Jerusalem' (Zec 3^{2}). The high priest then is clearly viewed as the representative of Jerusalem, and thus, in all probability, of the whole community. Without the high priest, Zechariah cannot portray the consummation of all things under the *Ẓemaḥ*, *i.e.* the Messiah. He thinks of a priest as standing on the right (LXX) of the future king (6^{13}). In another passage in this same prophet, the Messiah himself appears to be represented as in possession of priestly prerogatives, when it is said of Joshua and his companions, *i.e.* the rest of the priests, that they are 'men of the sign,' in allusion to the coming of the *Ẓemaḥ*, under whom the sin of the land is to be taken away in one day ($3^{8f.}$). To Joshua the promise is made that, if he will walk in Jahweh's ways and keep His charge, he shall judge Jahweh's house (*i.e.* Israel; *tādîn* would scarcely be used of the management of the temple [Wellhausen, Nowack], although the temple appears to suit better the mention of 'courts' in the same context), keep His courts, and have a place to walk among those who stand before God (3^{7}). Joshua is thus thought of as the culminating head of the people, the director of the cultus, the mediator between the community and God. The high priest is manifestly conceived of by Zechariah as anointed (as in the Priests' Code), for the 'two sons of oil' of Zec 4[14] can hardly stand for anything else than the Davidically descended Zerubbabel and the high priest Joshua.

All this marks a view of the dignity of the chief priest which is diametrically opposed to the programme of Ezekiel, and which cannot be understood as a direct expansion of what we have learned from Dt or the prophets or the historical books to have been the development of things hitherto. Of course, through the restoration of Israel, after the Exile, the dignity of the chief priest acquired extra elevation, because he was now head of the community with no longer a king by his side. But in spite of all this it appears to the present writer inconceivable, that in the course of the 52 years which had elapsed since Ezekiel in the five and twentieth year of his captivity (B.C. 572) had his vision of the new Jerusalem with its new ordinances (40[1]), the high priestly dignity should have made its appearance as a wholly new creation. If Ezekiel is silent about a chief priest, this is—as the statements in the Bks. of Kings show — plainly not because there had been no chief priest at Jerusalem up till then, but is due to an intentional reaction against a then actually existing office. But even if this be so, the rank of the chief priest must, in the interval between Dt and Zechariah, or even between Ezekiel and Zechariah, have been raised in a way of which there is no evidence in the sources as yet adduced, and which is not intelligible on the ground simply of the changed circumstances. We shall have to return later on to inquire to what influence this alteration is to be ascribed (see below, § 8 g).

In Haggai the priests are asked for *tôrāh*, *i.e.* oral direction, and this with reference to the distinction of clean and unclean (2[11ff.]). From the fact that the reply is given by word of mouth, it does not follow that there was as yet no written *tôrāh* at all on this subject; even where such exists, oral direction as to its application in any particular case is still requisite. By Zechariah, too, it is regarded as the business of the priests—as well as the prophets—to give information about a question affecting religious observances (7[3]).

Neither Haggai nor Zechariah make any mention of Levites alongside of priests. Our first authentic witness to Levites is in the time of Ezra. According to the account given in Ezra's own Memoirs (indicated hereafter by M, which stands also for the Memoirs of Nehemiah), Ezra was accompanied to Palestine by two priestly houses, that of Gershom of the sons of Phinehas, and that of Daniel of the sons of Ithamar (Ezr 8[2] M). No Levites came forward at first to join him (v.[15] M). It was only at Ezra's special request that 38 Levites were at length prepared to go with him (v.[18f.] M). Of the Nethinim, 'whom David and the princes had given for the service of the Levites,' there went with Ezra 220 men (v.[20] M). The fact that so few Levites, and these only after much pressing, consented to follow Ezra, must have been due to special circumstances. The Levites, who in Ezr and Neh are everywhere sharply distinguished from the priests, must be understood to be those whom Ezekiel had called Levites in the narrower sense, *i.e.* the descendants of the non-Jerusalemite priests of the high places. The station which Ezekiel had assigned to them in the State of the future must have presented few attractions. Still the distinction between priests and Levites among those who returned with Ezra can scarcely be based merely upon the ordinance proposed by Ezekiel, but, like the appearance of the high priest in Zechariah, is probably to be attributed to the influence of another classification which had meanwhile come into force (cf. below, § 8 g). But even apart from such, and even if there was no thought of introducing the ideal constitution of Ezekiel, the situation was not a favourable one for these 'Levites.' As Ezra himself, according to what is quite a credible account of his descent (Ezr 7[1f.]), was a Zadokite, the descendants of the former priests of Jerusalem would, as a matter of course, take the lead amongst the returned exiles, so that other 'Levites,' who were not in a position to claim that they belonged to the priestly aristocracy, must give way to them.

The Memoirs of both Ezra and Nehemiah make a distinction, which the Bks. of Ezr and Neh do not make everywhere throughout, between the Levites and the singers and doorkeepers of the temple (*e.g.* Ezr 10[23f.] M; see *Gesch.* p. 142, and cf. below, § 9). These are classes which meet us for the first time in the post-exilic period (the 'singers' of Ezk 40[44] are based upon a textual error, see Smend, *ad loc.*; otherwise Köberle, p. 17 ff.). But it is not likely that these classes constitute a really new phenomenon, which first took its rise in the Exile, for, during a period when there was neither temple nor cultus, professional classes like these can scarcely have been formed. And as little—even if the representation given in Neh 7 (? M) = Ezr 2, that already amongst those who returned with Zerubbabel there were singers and doorkeepers, should be incorrect—can these classes have come into being for the first time under the wretched conditions that marked the beginnings of the cultus in post-exilic Jerusalem. Rather, it may be inferred, in the post-exilic singers and doorkeepers we have to do with the descendants of doorkeepers and singers of the pre-exilic temple, just as in the Nethinim with descendants of pre-exilic temple-slaves. The post-exilic singers, doorkeepers, and Nethinim are consequently an argument in favour of the existence of a numerous non-priestly *personnel* of servants in the pre-exilic temple.

In a statistical account of the Astarte temple, inscribed on stone, found on the site of the ancient Kition, and belonging perhaps to the 4th cent. B.C. (*CIS*, I. 86A and B), there is mention of a whole series of different servants of the temple, who correspond in part to the Jerusalem temple-servants: those who had charge of the curtains, gatekeepers, those who had to attend to the slaying of the sacrificial victims, female singers or dancers (עלמת). A *personnel* of a similar kind was, in fact, required by every considerable temple.

The post-exilic Levites in the narrower sense, on the other hand, cannot be identified with any office in the pre-exilic temple. Although the class known in post-exilic times as 'Levites' owed its origin, to all appearance, to the programme of Ezekiel, yet the presence of special doorkeepers, alongside the Levites, in the post-exilic temple, shows that the Levites had not become precisely what he intended, for he had assigned to them the charge of the temple doors (see above, § 6). From the same circumstance it may be inferred with probability that the class of doorkeepers existed prior to Ezekiel, and that he intended to amalgamate his Levites with these. If the list contained in Neh 7 is what in the present text it gives itself out to be, namely a catalogue of those who at the first returned from the Exile with Zerubbabel (Neh 7[7]), the first *gôlāh* that returned already included all the above classes of sanctuary servants. Along with 4289 priests the list mentions 74 Levites, 148 (128) singers, 138 (139) doorkeepers, 392 Nethinim and sons of

Solomon's servants (Neh $7^{39\text{ff.}}$, cf. Ezr $2^{36\text{ff.}}$). But perhaps the probability is greater that we have to do here with a list of the population of Judah at the time of Nehemiah. The very small number of Levites will have to be explained in this passage in the same way as in the notice regarding those that returned with Ezra (see above). Another list (Neh 11^{10-19}), which likewise has reference perhaps to the time of Nehemiah (the Chronicler, at all events, understands it so), gives, amongst the numbers of those dwelling in Jerusalem, for the priests 1192; for the Levites, to whom the singers are here reckoned, 284; for the doorkeepers 172. This list, however, as it does not distinguish between Levites and singers, may not have been drawn up till after the time of Nehemiah. Ezra himself says nothing of singers and doorkeepers having returned with him; it is only in the later narrative, Ezr 7^7, that they are mentioned, but without any statement of their numbers, amongst the different classes of those who accompanied Ezra. It may be that they had already returned in such numbers, that, when Ezra set out, there were either no more singers and doorkeepers in Babylon at all (Vogelstein, p. 38 f.), or none that were prepared to go with him. On the other hand, 220 Nethinim returned with Ezra (Ezr 8^{20} M).

The same list in Neh 7, whose date is uncertain, lays great stress on the priests being able to prove their priestly genealogy; the families that could not do this were excluded from the priesthood (v.$^{63\text{ff.}}$). What was demanded in the matter of this genealogy is not evident from the expressions used, whether perchance descent from Zadok had to be proved, in accordance with the ordinance of Ezekiel, or from Aaron, as is required by the Priests' Code.

The above were the constituent elements of the service of the temple, when, according to the usually accepted date, in B.C. 445 or 444, during the governorship of Nehemiah, Ezra caused the Law to be read aloud in solemn assembly (Neh 8 ff.). This law—probably the whole Pentateuch, otherwise only the so-called Priests' Code, *i.e.* the ceremonial law contained in the middle books of the Pentateuch—contained also regulations regarding the priesthood which up till then had not possessed normative force, at whatever time they may have originated. In the position, however, answering to that in the Priests' Code, which was assumed by the high priest in the new Jewish community, even before the arrival of Ezra (see above), we shall have to recognize an influence exerted, prior to its public promulgation, by the legislation of the Priests' Code which was gradually arranged or collected, if not composed, by the scribes in Babylon. In this Code, as is well known, the high priest has a unique position given to him. The influence of the same legislation is probably to be traced likewise in the explicit distinction between priests and Levites amongst those who returned with Ezra, and still more clearly in the circumstance that some priests who returned with Ezra traced their descent to Aaron (Ithamar), but not to Zadok (Phinehas). This influence of the Priests' Code upon the relations of the new community prior to Ezra's appearance in Palestine, is enough to exclude the view, which is sometimes put forward, that Ezra composed the Priests' Code after his arrival, *i.e.*, according to the usual chronology, between the years B.C. 458 and 445 or 444. At least the rudimentary stage of the Priests' Code must be placed, in view of the position of the high priest in the time of the prophet Zechariah, not less than about a century before the time of Ezra.

In all probability the publication of the Law was preceded by the appearance of the short prophetical writing which has come down to us under the name *Malachi*, which is derived from one of its catch-words, or may even be a title of honour given to its author. It was probably written after the arrival of Ezra, as it occupies itself with the question of the mixed marriages, which, so far as we know, was first agitated by him. The covenant with the priests is called in Malachi the covenant with Levi or with the Levites ($2^{4.8}$), which does not agree with the terminology of the Priests' Codex, and hence appears to point to a date prior to its publication. It cannot, surely, be supposed that, with reference to an oppression of the serving Levites by the priests, the latter are reminded by Malachi that Jahweh has entered into covenant with the whole tribe of Levi (Vogelstein, p. 24 f.), for what Malachi complains of is not ill-treatment of the Levites by the priests, but that the priests handle the *tôrāh* wrongly and with respect of persons ($2^{8\text{f.}}$), *i.e.* of course in their dealings with the community. Malachi calls those who present the offerings 'sons of Levi' (3^3), and betrays no acquaintance with the term 'Levites' in the special sense of the Priests' Code, namely as the appellation of a class of inferior ministers of the sanctuary. The terminology of the Priests' Codex had thus, at all events, not become current in the time of Malachi. It is true that in Malachi the paying of the tithes is demanded, not for the holding of feasts, as in Dt, but for the store-house of the temple, as 'food,' *i.e.* for those who live by their temple service ($3^{8.10}$). This agrees with the requirement of the Priests' Code published by Ezra, but this particular ordinance may have come into force even prior to the publication of the Code.

8. THE PRIESTHOOD ACCORDING TO THE LAW CONTAINED IN THE 'PRIESTLY WRITING.'—We do not know what was the compass of the law-book which obtained recognition under Ezra. Probably we should understand by it the whole Pentateuch. The narrative of the reading of the law and the binding of the people to obey it is scarcely, it is true, taken directly from the Memoirs of Ezra, but certain traces indicate that it goes back to these. The indications which the narrative of the reading of the law gives as to its contents point in part (the prohibition of marriage with the Canaanites, Neh 10^{31}) to Deuteronomy, or even to the still older legislation contained in the Jehovistic book, but in great measure to enactments which are to be found only in the code contained in that source of the Pentateuch which it has become customary to call as a whole the 'Priestly Writing' (Neh $8^{15.18}$ $10^{34.36\text{ff.}}$). This portion of the law of Ezra is a new factor which, at whatever time it may have originated, had not hitherto obtained public recognition or been generally known. It is true that in certain new ordinances regarding the situation of the priests, introduced in the period between the First Return and the arrival of Ezra (see above, § 7), influences are to be traced which proceeded from this code, whether already in existence or in process of coming into being.

The Priestly Writing occupies itself more than any of the collections of laws that had hitherto obtained validity, with the relations of the priesthood, and, on this account and because of its having undeniably originated in the circle of the priests, may be called after them. Its legislation, which deals mainly with ritual, is not, indeed, specially designed for the priests. It is not meant to be a manual of rules for the discharge of the priestly service. These, indeed, are not fully given on many points; rather are the readers or hearers it has in view, primarily the members of the congregation. The latter, however, are instructed mainly about the organization of the holy service and of those who perform it, about the rights and duties appertaining to the priests. Nevertheless, for the sake of brevity, the law contained in the 'Priestly Writing' may be called, after the example of others, the Priests' Code.

a. *The priests in the Law of Holiness and in particular 'tôrôth.'*—It is owing only to redaction by a single hand that the Priests' Code has reached a harmonious character; this redaction has clearly welded it together from a variety of components. Even the views it gives of the priestly relations have not been all cast in one mould. In those components of the Priests' Code which manifestly are to be recognized as the oldest, the so-called 'Law of Holiness,' *i.e.* the main stock of Lv 17–26, as well as particular *tôrôth* akin to this, which were perhaps originally combined with it or may have had currency by themselves (Lv 6 f., 11 [12–15. 27], Nu $5^{11ff.}$ 6^{1-21} 15^{37-41}), we hear only of 'the priests' or 'the priest,' namely the one officiating; but the priests are not more clearly defined as to their descent, and there is no mention of Levites or other sanctuary servants along with them. It is a later process of redaction that has introduced into these passages the designation of the priests with reference to Aaron and his sons. In Lv 6^7 (Eng.^{14}) 'sons of Aaron' appears to stand in the place of an original 'the priest,' for this subject is followed in v.$^{8\,(15)}$ by the singular of the verb. The quite isolated mention of the Levites in these portions (Lv 25^{32-34}) is certainly an interpolation. On the other hand, even the original Law of Holiness probably contained very minute prescriptions as to purity on the part of the priests (Lv $21^{1ff.}$). This law appears, further, to have been acquainted with a chief priest, for the connexion of the section which lays down special rules for his purity (Lv $21^{10ff.}$) with the Law of Holiness scarcely admits of a doubt (it is doubted, indeed, by H. Weinel, 'משח und seine Derivate,' in *ZATW*, 1898, p. 28 ff.). In favour of this connexion is the expression, not used elsewhere in the Priests' Code, 'the priest who is greater than his brethren' (v.^{10}). To the older elements probably belongs also the prescription that this first priest is not to leave the sanctuary in the event of a bereavement (Lv 21^{12}), which presupposes that he lives in the sanctuary (as Eli did), a view which is taken nowhere else in the Priests' Code.

To what date these oldest components of the Priests' Code should be attributed it is hard to decide. At present they are usually assigned to the Exile, near the time of Ezekiel. So much is unquestionably right, that the Law of Holiness still existed as a collection by itself during the Exile, and that it received then its conclusion which fits only that period (Lv $26^{3ff.}$) But, beyond this, it does not follow necessarily from the special points of contact between Ezekiel and this law, that both belong to nearly the same period. These points of contact may be due to the fact that Ezekiel made quite a special use of the Law of Holiness, and specially attached himself to it. The demand which stands at the head of this law (Lv $17^{1ff.}$), that all slaying of animals must take place before the sanctuary (which was afterwards brought by a redactor into relation to the tent of meeting, which was not originally mentioned), could be obeyed only at a time when there were more sanctuaries than one (so, following Dillmann, *Gesch.* p. 47). This would lead us to think of the pre-Deuteronomic period. That the author of the Deuteronomic law was acquainted with the *tôrāh* about leprosy which has come down to us in Lv 13 f., outside the specially so-called 'Law of Holiness,' but belonging to those special *tôrôth* akin to this law (see above), is not improbable, seeing that, at all events, some leprosy-*tôrāh* entrusted to the priests is known to him (Dt 24^8).

If the Law of Holiness originally presupposed the existence of a plurality of sanctuaries, it remains doubtful whether it thinks of a single chief priest for all the sanctuaries, or assumes that there will be a number of chief priests taking charge of the different sanctuaries.

b. *The Aaronite priests.*—The other components of the Priests' Code exhibit a harmonious system of organization of the priesthood; although even here, in matters of detail, differences of various strata and innovations are not to be overlooked. A priesthood, according to the Priestly Writing, first came into being in Israel in the time of Moses, when the one legitimate place of sacrifice, the tent of meeting, was by Divine direction established. Previously, according to this writing, the fathers of Israel had offered no sacrifices, and consequently required no priests. Moses installed as priests his brother Aaron and the latter's sons. Only to the descendants of these do the priestly rights pass on. The terms 'sons of Aaron' and 'priests' are thus synonymous (Ex 28^{41} 29^{44} $40^{12ff.}$ etc.). Only two of Aaron's sons, Eleazar and Ithamar, perpetuate the family. A preference, however, is given to the sons of Eleazar above those of Ithamar, when, on the occasion of a propitiatory action on the part of Phinchas, the son of Eleazar, the covenant of an everlasting priesthood is entered into only with him and his seed (Nu $25^{12f.}$).

For the exercise of the holy office the sons of Aaron are provided with a special *priestly attire*, Ex $28^{40ff.}$—linen breeches and a long coat (*kĕthōneth*), besides a girdle and a turban. The upper garments are, according to Ex 39^{28}, to be all of *shēsh*, *i.e.*, borrowing an Egyptian term, *byssus*, therefore white, till we come to the girdle, which, according to Ex 39^{29} (if here it is the girdle of the priests in general and not that of the high priest that is spoken of), is composed of the four colours of the sanctuary, namely white, crimson, blue-purple, and red-purple. At all events, according to Josephus (*Ant.* III. vii. 2), the white ground of the priest's girdle had flowers of the four colours wrought into it. Shoes, which are nowhere mentioned, are apparently not to be worn by the priests while performing the sacred office; they probably go barefooted (Ex 3^5 [JE]), just as the Phœnician priests wore not shoes but linen socks (Pietschmann, *Gesch. der Phönizier*, Berlin, 1889, p. 223). The white garments of *shēsh* correspond to the linen robe, the *'ēphōd bad*, which in olden times was worn by the Hebrew priests (1 S 2^{18}). Linen was the material of the priest's dress also among the Babylonians (Gunkel, *Archiv f. Religionswissenschaft*, i. [1898] p. 297) and the Egyptians (Ancessi, p. 102 ff.; Renan, *Hist. du peuple d'Israël*, i. 149; *Gesch.* p. 70 f.). The employment of *shēsh* instead of the more common linen is to be set down as a later refinement.

The *ritual functions* of the priests, specified in the Priests' Code, are of a manifold character. The priests have to sprinkle the blood of the victim in the sanctuary (Lv $1^{5.\,11.\,15}$ etc.), to offer the sacrifices (*i.e.* lay them upon the altar and cause them to go up in the sacred fire (Lv $1^{7-9.\,12f.\,15-17}$ etc.); they alone may accomplish the *kappārāh* ('covering') effected by the presentation of the offerings (Lv $4^{26.\,35}$ etc.). On the other hand, the killing, flaying, and cutting up of the victim is, according to the Priests' Code (differing in this from Ezekiel), the business of the person making the offering, even should he be a layman (Lv $1^{5f.}$ *al.*; see *Gesch.* p. 114 f.). The priests have, further, to pour out the drink-offering (Nu 6^{17}), they have to perform the whole service connected with the altar of burnt-offering (Ex 30^{20}) and (spoken with special reference to Aaron) the altar of incense (Ex $30^{7f.}$). Only an Aaronite, and 'no stranger' may offer incense at all (Nu 17^{5} [Eng. 16^{40}]). The Aaronites alone have charge of the table of shewbread (Lv 24^{8}, spoken specially of Aaron) and the candlestick (Ex 27^{21}). From Ex $30^{7f.}$, Lv 24^{3}, Nu $8^{2f.}$ it does not result that, according to another older enactment, only the high priest had charge of the candlestick (Vogelstein, p. 63). When 'Aaron' alone is spoken of here, it is as the representative of the priesthood in general. As such he performs in the Priests' Code the whole of the priestly service, and in other passages as well he is named alone as standing for the priests in general. Ex 27^{21} 'Aaron and his sons' will not be incorrect, then, as the explanation of the other passages which speak of Aaron alone. Only the priests may go within the sanctuary (Ex 30^{20}). A 'stranger,' *i.e.* a non-Aaronite, who approaches the altar or the space inside the curtain shall die (Nu 18^{7}). Amongst the holiest articles which may be approached only by holy persons, *i.e.* only by the priests, is reckoned even the laver in the fore-court (Ex $30^{28f.}$).

Even *outside the sanctuary* there are special duties assigned to the priests. They have to remove the ashes from the altar to a clean place without the camp (Lv 6^{4} [Eng. ^{11}]); they have (specially Eleazar, but this while Aaron was yet alive) charge of the holy anointing oil (Nu 4^{16}, which is perhaps to be assigned to a redactor, see Dillm. *Numeri*, etc., 1886, p. 14 f.). They alone may pronounce the blessing upon the people (Nu $6^{22ff.}$), and in war or at the festivals are to blow with the sacred trumpets (Nu $10^{8ff.}$ 31^{6}). They have to watch over the distinction between holy and profane, unclean and clean, and to instruct the children of Israel in all statutes which Jahweh has spoken to them through Moses (Lv $10^{10f.}$), whereby probably those statutes are specially intended which have regard to holy and profane, clean and unclean.

The priests have, further, to pronounce the curse on the woman who is accused of adultery, and to give her the water of bitterness to drink (Nu $5^{15ff.}$); they have to reconsecrate the head of the Nazirite who has been defiled (Nu 6^{11}), to determine the presence of leprosy in human beings, in houses, and in clothes, as well as to pronounce the declaration of cleanness from leprosy, and, in the latter case, to carry out the sprinkling of the man to be cleansed with the sacrificial blood, as well as the sprinkling and pouring out of oil (Lv 13 f.). At the slaying and burning of the red heifer, from whose ashes the water of purification for those who have been defiled by touching a dead body is to be prepared, the priest (Eleazar in the lifetime of Aaron) is to be present; he has to sprinkle the blood, and to throw various ingredients into the burning (Nu $19^{3ff.}$). The priests have, further, to determine the valuation of persons that have been vowed (Lv 27^{8}), of vowed unclean beasts (v.$^{11f.}$), of the consecrated house (v.^{14}) or field (v.$^{16ff.}$).

Aaron and his sons are *installed in office* by a solemn consecration, with 'filling of the hand,' *i.e.* by the presenting of a dedicatory offering placed in their hand, the 'fill-offering' (Ex 29, Lv 8 *al.*; cf. on the filling of the hand, above, § 2). That this act of consecration is to be repeated in the case of every priest afterwards is not said, and how far this was actually done is questionable (Schürer, p. 231 f., note 25). In other passages an anointing of the priests is spoken of (Ex 28^{41} 30^{30} *al.*). But at the same time the title 'the anointed' as an expression of honour is used only of the high priest (Lv $4^{3.5.16}$ *al.*). At the ceremony of consecrating the priests there is mention only of the anointing of Aaron (Ex 29^{7}), and the anointing is viewed as the sign of the high-priestly succession (v.^{29}).

Clearly we have to do here (as Wellhausen was the first to see) with two strata of the Priests' Code; one of which assumes the anointing of all priests, the other only that of the high priest. Through combining the two views, the description has originated which makes it appear as if originally all priests were anointed, while in future the high priest alone is to be anointed (*Gesch.* pp. 25, 48 f.). Nowhere in the OT outside the Priests' Code is the anointing of ordinary priests assumed, but that of the high priest is assumed in several passages (Weinel in *ZATW*, 1898, p. 28).

Full priestly rights belong to such Aaronites as are *free from bodily defects*. No one who suffers from any such blemish is to go within the sanctuary or approach the altar. On the other hand, even such persons are entitled, like the other Aaronites, to eat of the holy and the most holy offerings (Lv $21^{16ff.}$). On pain of being cut off, the priests have to refrain from sacrificing and from eating of the sacrificial flesh as long as they are tainted with any *Levitical uncleanness* (Lv $22^{2ff.}$). The prohibition which applied to all Israelites (Lv $17^{15f.}$) against eating the flesh of an animal that had died of itself or been torn, is addressed with special emphasis to the priests (Lv 22^{8}). Before performing the sacred office they have to wash their hands and feet in the brazen laver (Ex $30^{19ff.}$ $40^{31f.}$), and may not, before going into the sanctuary to perform their duties, drink wine or strong drink (Lv $10^{8f.}$). They are forbidden to marry a harlot, a polluted, or a divorced woman (Lv 21^{7}). A priest's daughter who by harlotry has profaned the office of her father is to be burned with fire (v.^{9}). The priests are forbidden to defile themselves through the dead, with the exception of defilement by the corpse of the nearest blood relations (Lv $21^{1ff.}$). In all cases of bereavement they are forbidden to exhibit signs of mourning by making a baldness upon their heads, cutting their beards at the corners, or making cuttings in their flesh (v.^{5}).—These prescriptions for the maintaining of purity on the part of the priests are found to a large extent in the Law of Holiness, and may already have belonged to its main stock, and thus have been merely adopted by the Priests' Code.

c. *The high priest.*—At the head of the priestly body stands, in the time of Moses, his brother Aaron, and in later times always one of the descendants of the latter (Ex $29^{29f.}$ etc.). After the death of Aaron the functions of chief priest are undertaken by his eldest son Eleazar, who in turn is succeeded by his son Phinehas (Nu $25^{11ff.}$); which seems to assume an arrangement for the succession of the firstborn. Aaron, like the other priests, usually bears the simple title *ha-kōhēn* (Ex 29^{30} 31^{10} etc.). There are few passages in which the chief priest receives the name of honour 'the anointed priest' (*ha-kōhēn ha-māshîaḥ*, Lv $4^{3.5.16}$ 6^{15}; cf. *Gesch.* p. 26; these passages, and, in general, the majority of those in P in which an anointing is mentioned, are considered by Weinel [*ZATW*, 1898, p. 30 ff.] to be additions). Equally seldom, three times only, does the chief priest bear the title 'high priest' (*ha-kōhēn ha-gādôl*, Lv 21^{10}, Nu $35^{25.28}$). The high-priestly dignity is clearly thought of as conferred for life (Nu $35^{25.28}$). With solemnities lasting for seven days each new high priest is to be installed in office, with putting on of the holy attire, anointing, and filling the hand (Ex $29^{29f.}$); he has on this occasion, like Aaron on the day of his anointing, to offer a *minḥāh* (Lv $6^{13ff.}$; so at least according to the present text, see Dillm. *ad loc.*).

The chief priest is distinguished by two minutely described *official costumes*. One of these is wholly of linen. He wears this only when he goes into the Holy of Holies on the Day of Atonement (Lv $16^{4.\ 23.\ 32}$). In discharging the rest of his functions, he has to wear above the white *kĕthōneth* of *shēsh* worn by all the priests, a variegated dress of the four colours of the sanctuary, blue-purple, red-purple, crimson, and white, interwoven with gold (Ex $28^{6ff.}$, Lv $8^{7ff.}$ *al.*). The different parts of this dress are described in detail, yet their exact structure is not quite clearly recognizable. Above his under-garment the high priest wears his distinguishing ephod, kept together at the shoulders by a couple of clasps formed of *shōham* stone, upon each of which are engraved six names of the tribes of Israel (cf. art. EPHOD). Upon his breast, above the ephod, the high priest wears the four-cornered *ḥōshen* suspended by little chains. Set in this externally are twelve precious stones in four rows, having engraved upon them the names of the twelve tribes. The *ḥōshen* must be conceived of as a species of pocket (cf. art. BREASTPLATE OF THE HIGH PRIEST), for in it are deposited the Urim and Thummim, which evidently are to be thought of as tangible objects (cf. art. URIM AND THUMMIM). Upon the hem of the upper-garment (*mĕ'îl*) which was attached to the ephod, there hang alternately pomegranates and little bells. In the front of his turban (*miẓnepheth*) the high priest wears upon his forehead a golden diadem inscribed 'Holy to Jahweh.' The high priest alone is entitled to carry the Urim and Thummim (Ex 28^{30}, Lv 8^{8}), and to pronounce the 'judgment of the Urim' before Jahweh; and by this decision, as that of a Divine oracle, Israel has to abide (Nu 27^{26}).

None but the high priest may go into the Holy of Holies on the yearly Day of Atonement, to make propitiation for the priests and the congregation, and carry through the ceremony with the two goats, in which he has to make atonement also for the sanctuary (Lv $16^{6ff.}$, cf. Ex 30^{10}). Above all, it rests with him alone to make atonement for his own guilt and that of his house (Lv $4^{3ff.}$, cf. $9^{8ff.}$), as well as for the community as a whole (Lv $4^{16ff.}$, cf. $9^{15ff.}$; differently, as it would appear, Nu 15^{25}, see *Gesch.* p. 27, note). He has to offer a daily *minḥāh* (Lv 6^{12-16}, where 'on the day of his anointing' [v.^{13}] is probably a later addition, by which the daily offering is transformed into one offered once for all at the time of his installation in the priestly office). Moreover, he has to take his share in the service rendered by the other priests (Ex 27^{21}). The rôle of *mediator*, apart from the above-mentioned atoning transactions, he assumes by bearing upon his breastplate the names of the children of Israel, when he goes into the sanctuary (Ex 28^{29}).

The high priest Eleazar is named in the first rank, along with Joshua, the prince of the tribes (Nu $34^{17ff.}$, cf. Jos 14^{1}). At his word, spoken by means of the Urim, the whole congregation is to go out and come in (Nu $27^{20ff.}$). After the death of the high priest the manslayer is safe to leave the city of refuge (Nu $35^{25.\ 28}$). The duration of the high priest's office is treated in this enactment as an epoch at whose close certain questions that have remained open are to be regarded as now settled (the interpretation proposed in *Gesch.* p. 28, and approved by Van Hoonacker, *Sacerdoce*, etc. p. 340, finds no justification either in the Priests' Code or in the OT generally). The high priest holds no other position of secular authority. When Moses and Aaron together number the people (Nu $1^{3.\ 17}$), Aaron acts in this matter simply as the brother of Israel's leader.

Special *injunctions regarding purity* are laid upon the high priest, which are stricter than those for the rest of the priests. Like the latter, they are found in the Law of Holiness. According to them, 'the priest who is greater than his brethren' may marry only a virgin of his people, and not, as is permitted to the other priests, a widow (Lv $21^{13ff.}$). He is not to defile himself through any dead body, even that of a father or mother (v.^{11}). He is forbidden, as a sign of mourning, to let his hair grow long or to rend his clothes (v.^{10}).

If the high priest have brought guilt upon the people through any sin of his, he has to present a sin-offering, with ceremonies specially prescribed for this particular case (Lv $4^{3ff.}$), because a sin on the part of the spiritual head of the people is looked on as bringing special trouble upon the whole community. Sins affecting the priesthood, *i.e.* violations of the laws given to the priests, have to be expiated by Aaron and his sons (Nu 18^{1}; not by the high priest alone [Benzinger, p. 422], but by him and the rest of the priests).

d. *The Levites.*—The Aaronite priests are, in the Priests' Code, a special family of the tribe of Levi. The designation 'Levites' is only in isolated instances used of all that belong to this tribe, including the Aaronites (Ex 6^{25}, Lv $25^{32f.}$, Nu $35^{1ff.}$); it is usually applied to the non-Aaronite Levites alone. The whole tribe is, like the other tribes, divided into 'fathers' houses' with their heads or princes (Ex 6^{25}, Nu $3^{14ff.}$). The tribe as a whole is considered as consecrated to God, this by way of compensation for the firstborn of man in Israel who all rightfully belonged to the Deity (Nu $3^{12f.}$ *al.*). The Levites in the narrower sense are not, like the Aaronites, servants of Jahweh, but are given to the priests or to Jahweh for the service of the tabernacle, as is emphatically expressed in the designation of the Levites as *nĕthûnîm*, 'given' (Nu 3^{9} 8^{19} 18^{6}), which clearly stands in some relation to the name applied to the foreign temple-slaves in the Bks. of Ezr and Neh, namely, *Nethinim*. In other passages, without the term *nĕthûnîm* being employed, it is said of the Levites that they serve the dwelling-place of Jahweh, or that they serve Aaron, or the congregation. Here, as in the case of the priestly service, the verb *shārēth* is used, but not, as in that case, absolutely, but with the object of service: the 'dwelling-place,' *i.e.* the tent of meeting, 'Aaron,' or 'the congregation' (Nu 1^{50} 3^{6} 16^{9} 18^{2}). The Levites minister to the priests 'before' the tent of meeting. The Levites are forbidden to approach, like the priests, the vessels in the inner sanctuary or the altar; by doing so they would bring death upon themselves and upon the priests (Nu $18^{2f.}$). The technical term for the service of the Levites is *shāmar*, 'guard,' which suits the Levites of the Priests' Code in so far as they, in the arrangement of the camp, have to encamp with the priests immediately around the tabernacle, so that in point of fact they do guard the latter (Nu $1^{50.\ 53}$ *al.*). A 'stranger,' *i.e.* one who is neither priest nor Levite, who intrudes into this circle round the holy dwelling-place, shall die (Nu 3^{38}). The standing employment of the verb *shāmar* for the service of the Levites indicates clearly that the prescription for the (purely ideal) arrangement of the camp corresponds to some actual duties performed by those whom the Priests' Code calls Levites. Surely the *shāmar* of the Levites has some connexion with the work of the doorkeepers of the temple in the Bk. of Ezra. The Levites are called in the Priests' Code directly *shomrê mishméreth*, 'guardians' of the sanctuary or 'the dwelling-place' of Jahweh (Nu $3^{28.\ 32}$ $31^{30.\ 47}$). In Nu 3^{38} the term is extended even to the priests, with reference to the arrangement of the camp. Besides, the same verb *shāmar* is employed in an untechnical sense, in a few isolated instances in the Priests' Code (Nu 3^{10} 18^{7}), of the priestly service in general (so also in the post-exilic Zechariah), and then, further (so *shāmar* is used in the Priests' Code), of the service of God in general, *i.e.* of one's attitude towards His commandments (Gn 26^{5}). All this shows that we have here to do with a very ancient terminology, which probably reaches back far beyond the time when there was a special class of doorkeepers of the temple. Perhaps it preserves a trace that the Levites were originally the 'guarding' escort of the sacred ark, which would be quite conceivable, even if the name *lēwî* has nothing to do with this duty (see above, § 1). In any case, it may be gathered from the above use of *shāmar* that the guarding of a sanctuary in some form was at one time the essential task of the Levites. It has been suggested that it was the guarding of a divine image, as was the main duty of the priest among the ancient Arabs (Wellhausen, *Reste*^{2}, p. 130). But there appears to be a special reference to the escorting of the sacred ark, which accompanied Israel in their journeyings and campaigns, in the remarkable term, likewise used very occasionally of the Levites' service, *ẓābā'*, 'to render military service' (Nu 4^{23} *al.*).

When the host of Israel is upon the march, the Levitical family of the Kohathites has charge of carrying the tabernacle and its vessels, after these have been covered by the priests from the view of the Levites, who may not look upon them (Nu $4^{5\text{ff.}}$). None but Levites may attend to the carrying and the setting-up of the tabernacle; any non-Levite doing so must be put to death (Nu 1^{51} $18^{4.\,22}$). Hence the service of the Levites is spoken of as a 'covering' for the children of Israel, that no plague come upon them when they come nigh to the sanctuary (Nu 8^{19}). Then it is the Levites who, according to Ex 38^{21}, under the direction of the Aaronite Ithamar, take charge of the 'numbering of the dwelling of the testimony,' *i.e.* the keeping account of the gifts offered for its construction. There is no indication of any other duties performed by the Levites than those of carrying the tabernacle, encamping around the sanctuary, and keeping the account just mentioned. Wherein, apart from encamping round the sanctuary, consisted the charge assigned to the Levites over the dwelling of the testimony and all its vessels and everything belonging to it (Nu 1^{50}), or 'the keeping of the charge' of the dwelling of the testimony and its vessels (Nu 1^{53} 3^{8} *al.*), or the 'work' of the Levites 'about the tabernacle' (Nu 4^{3}), or their 'service' about the dwelling or the tabernacle (Nu $3^{7\text{f.}}$ 4^{23} *al.*)—is not indicated. Thus we do not learn what the Levites have to do when the sanctuary is set up and the service is being conducted in it, and thus have, further, no indication of what is to be the work of the Levites once Israel has reached the goal of its wanderings and attained to a settled mode of life. It may only be supposed from the designation of the Levites' work as 'service of the congregation,' that the intention of the law was to assign to the Levites some kind of intermediate function between the congregation and the priests. The lower services at the sanctuary, once it was set up, appear also to be pointed to in Nu 1^{50}, where the service of the tabernacle is presented as a duty distinct from that of carrying it.

The data regarding *the period of service of the Levites* are not harmonious. In Nu $4^{3\text{ff.}}$ it is given as from the thirtieth to the fiftieth year; Nu $8^{23\text{-}26}$, on the other hand, enacts that the Levites have to serve from their twenty-fifth year, and it is added that from their fiftieth year onwards they are no longer to serve, but to assist their brethren (the serving Levites). This enactment is clearly a later addition (*Gesch.* p. 34).

In Nu $8^{5\text{ff.}}$ a ceremony for *the installation of the Levites* is described: the children of Israel (no doubt the elders) lay their hands upon them as upon an offering, and the Levites are waved before Jahweh as a gift of the Israelites—a representation which manifestly results from the conception of the Levites as a substitute for the offering of the firstborn of man. They are to be treated in this ceremony—which cannot be thought of as literally performed, but simply gives expression to a theory—like those sacrificial portions which fall to the priests, because the Levites also are given to the latter to be their own (so rightly A. Van Hoonacker, *Le vœu de Jephthé*, Louvain, 1893, p. 40 ff.).

The 'tribe of Levi,' *i.e.* probably the Levites and also the Aaronites, is exempted from being numbered amongst the children of Israel (Nu 1^{49} 2^{33}), *i.e.* from military service.

Sins affecting the sanctuary, *i.e.* any defilement of it, have to be expiated by the Aaronites and Aaron's father's house, the Kohathites, that branch of the Levites who have to carry the holiest vessels (Nu 18^{1}). The Levites, without distinction, have to expiate the sins of their service (Nu 18^{23}).

The *distinction between priests and Levites* is not represented as having gained validity without opposition. The narrative of the rebellion of the Levite Korah against Aaron and Moses (Nu 16) serves to exhibit this distinction as one divinely determined: the prerogatives of Aaron are established in opposition to Korah. In this account, however, a still older narrative, belonging to another stratum of the Priests' Code, may be disentangled, in which Korah stands up, not for the prerogatives of the Levites as against the Aaronites, but for those of the whole congregation as against the Levites. To this older stratum attaches itself the narrative of Nu $17^{6\text{ff.}}$, in which the budding of Aaron's rod confirms the unique position, not of the Aaronites, but of the whole tribe of Levi (*Gesch.* p. 34 ff.; cf. art. KORAH, DATHAN, ABIRAM).

e. *The serving women.*—Only in a single passage in the Priests' Code is there mention of serving women (Ex 38^{8}). They minister at the door of the tabernacle; and this service, like that of the Levites, is described by the term *ẓābā'*; but wherein it consisted we have not a word of information. We learn merely that these women were provided with mirrors of brass. The only other reference in the whole of the OT to such women as serving at the sanctuary is in 1 S $2^{22\text{b}}$ (wanting in LXX except in A and Luc.), where they are introduced as if they had been in existence in the time of Eli at Shiloh; but as in this passage the 'tent of meeting' is spoken of, as in the Priests' Code, whereas, in other passages, at Shiloh a built temple is presupposed, we have to do, no doubt, with an interpolation based upon the Priests' Code.

f. *The revenues of the priests and Levites.*—The priests, like the Levites, have a fixed revenue assigned them in return for their services. It is presupposed in this that they are without possessions, *i.e.* they have not, like the other tribes, a tribal territory (Nu $18^{20.\,23\text{f.}}$ 26^{62}).

The priests' dues from the offerings, the *tĕrûmôth*, 'heave-offerings' (Nu $18^{8.\,19}$), are calculated on a more liberal scale than in Dt and even than in Ezk, or at all events they are specified more exactly than in the latter book, which does not name the tithe and the firstlings. The skin of the burnt-offering falls to the officiating priest (Lv 7^{8}); from the *shĕlāmîm*-offerings he is entitled to a cake (v.^{14}), as well as to the wave-breast and the heave-thigh (Ex $29^{27\text{f.}}$ *al.*); in the case of the *shĕlāmîm*-offering of the Nazirite he receives not only the wave-breast and heave-thigh, but also the shoulder of the ram and two cakes as a wave-offering (Nu $6^{19f.}$). Of the 'holy,' *i.e.* not 'most holy,' offerings the male and female members of the house of Aaron are to eat in a clean place the wave-breast and the heave-thigh, and in general the *tĕrûmôth* that fell due of these offerings (Lv $10^{14f.}$, Nu 18^{19}); the priest who presents the offering may thus bring these portions into his house and there distribute them. The members of the priest's house who are entitled to participate in these meals are exactly specified; any one who by mistake and without warrant eats of the holy thing is to restore to the priest what he has taken, with a fifth part added to it (Lv $22^{10ff.}$). Every *tĕrûmāh* belongs to the particular priest to whom on any occasion one hands it over, and not to the whole of the priests (Nu $5^{9f.}$). Of the 'most holy' offerings—the *minḥāh*, the guilt-offering, and the sin-offering—nothing may be taken into the priests' houses; whatever portion of these does not find its way to the altar, or is not in certain specified instances burned (Lv 6^{23}), is to be eaten only by Levitically clean male Aaronites in the holy place, according to the different regulations for the respective offerings, it may be by the priest who presents the offering, it may be by all male Aaronites (Lv 2^{3} 5^{13} 6^{19} etc.). The shewbread also, as most holy, is to be eaten by male Aaronites in the holy place (Lv 24^{9}).

Besides the above, the priests have firstling-dues. To them belong the firstborn of clean beasts; those of unclean beasts and of man are to be redeemed (Nu $18^{15ff.}$). The redemption price, for arriving at which a mode of reckoning is given, probably falls, as a logical consequence, to the priests, although this is not expressly stated (*Gesch.* p. 41). In later times, at all events, it was so arranged (Schürer, p. 254). In the case of the firstborn of clean beasts, the flesh, in so far as this is not the portion of the altar, falls to the priest, and may be eaten by him and the male and female members of his household (Nu $18^{17f.}$). The *rē'shîth* that has to be offered of oil, must, and corn, as well as the first-fruits (*bikkûrîm*) of everything, belong to the priests; all clean persons in the priest's house, male and female, may eat of them (Nu $18^{11ff.}$). The question whether *rē'shîth* and *bikkûrîm* have both to be paid from the same products of the ground may remain open (*Gesch.* p. 124 ff.; Schürer, p. 245). The two leavened firstling-loaves of the Feast of Pentecost, along with the two lambs to be added as a *shĕlāmîm*-offering, are assigned to the priest (Lv 23^{20}). Further, of the devoted things that which is called *ḥērem* belongs to the priests (Nu 18^{14}); likewise in the year of jubilee there falls to them the field regarded as *ḥērem*, which has been dedicated, not redeemed, and yet sold (Lv 27^{21}). The *rē'shîth* of dough, which, according to Nu 15^{17-21}, is to be paid to Jahweh, is probably to be understood as falling to the priests, although this is not expressly said. In the case of a withholding of the proper dues, restitution has to be made to the priest, with the addition of a fifth part (Lv 5^{16}). If any one has unwittingly taken from his neighbour anything belonging to him, and if restitution to the injured party is not possible, the articles which require to be restored belong to the priest who offers the guilt-offering for the offender (Nu 5^{8}).

Of sacred dues the tenth belongs to the Levites, who in turn have to pay a tenth of this to the priests (Nu $18^{21.\,24ff.}$). Originally, according to Nu 18^{30}, all that was in view here was the tenth of field and vineyard produce. It appears to be a later expansion when Lv $27^{32f.}$ demands, in addition to this, the tenth of cattle and sheep. Priests and Levites receive a fixed percentage of the spoil taken in war (Nu $31^{28ff.}$).

The Priests' Code enjoins, further, in what is perhaps an addition subsequent to the time of Nehemiah, a *tax for the sanctuary* (Ex $30^{11ff.}$; see *Gesch.* p. 219 f.); this does not fall to the priests, but is spent on the 'service of the tent of meeting,' *i.e.* for the expense of the regular cultus.

The idea that the tribe of Levi has no inheritance finds strange expression in the purely theoretical and evidently late added (*Gesch.* p. 42 f.) statement (Nu $3^{41.\,45}$) that Jahweh has taken to Himself the cattle of the Levites in place of the firstborn of the cattle of the children of Israel. The matter is meant thus to be viewed as if the Levites had not an absolute property in their cattle, but only the usufruct of them. In speaking of the possession of cattle the Priests' Code is thinking of the injunction (which is not quite in harmony with the absence of possessions on the part of the tribe of Levi) that 48 cities in the Promised Land should be set apart for the tribe of Levi to dwell in, along with the surrounding pasture lands to feed their cattle (Nu $35^{1ff.}$). These cities, with their houses and pasture lands, are an inalienable possession; whatever may have been sold of them is redeemable at any time, and, if it is not redeemed, it returns to the Levites in the year of jubilee (Lv $25^{32ff.}$). The carrying out of this enactment about Levitical cities is recorded in a narrative in the Bk. of Joshua (ch. 21), belonging to the Priestly Writing; and here a distinction, not found in the earlier directions, is made between Levitical and priestly cities; the sons of Aaron receive 13 of the 48 cities.

g. *The date of the priestly system in the 'Priestly Writing.'*—Even apart from the older elements (P^1, see above, § 8 a) which detach themselves from the main body of the Priests' Code, the date of the priestly system exhibited by this Code is not a single one. In general the consistent character of the system (P^2) is not to be denied, but certain smaller constituents detach themselves as clearly new to it (P^3). But, even after the removal of these elements, everything (in P^2) is not of one cast; in the view taken of the Levites, for instance, apart from an innovation (Nu 8^{5-22} [see, further, below] and vv.$^{23-26}$ [see above, § 8 d]), there is no mistaking the presence of two different strata (in Nu 16, cf. ch. 17; see, further, below).

At present it is commonly held that the whole of the priestly system of the Priests' Code, and in general this whole Code itself, belongs to the post-exilic period, and that Ezekiel's enactments regarding the priests, especially his distinction between Levites and priests, paves the way for the Priests' Code (so the adherents of the Graf hypothesis). On one point there can be no doubt, namely this, that the affinity between the law of Ezekiel and the Priests' Code is so great that it can be explained only by the dependence of one of these upon the other. For the priority of Ezekiel it is quoted as decisive that in his State of the future he knows no high priest such as stands at the head of the priestly body in the Priests' Code. Ezekiel, it is argued, does not mention the one unique function assigned to the high priest in the Priests' Code, namely the propitiatory transactions on the Day of Atonement, and it is hard to suppose him to have been acquainted with them. But the law concerning the Day of Atonement in Lv 16 bears quite a peculiar character which, *e.g.* in the conception of AZAZEL (which see), distinguishes it from the rest of the Priests' Code. This law has its place immediately before the Law of Holiness (Lv 17–26), which, as it appears to the present writer necessary to assume, was incorporated in the system of the Priests' Code, not by the real author of P^{2} but by a later redactor; probably the section contained in Lv 16 was also a later addition (*Gesch.* p. 128 f.), and so were also, in that case, as a matter of course, the merely brief allusions to the Day of Atonement which are found elsewhere in the Priests' Code. Ezekiel has no Day of Atonement, but merely certain propitiatory transactions on two days every year, which look like a first step towards the Day of Atonement. There is no period at which the law of the Day of Atonement, of which there is not a trace in the pre-exilic history, can be more readily conceived to have originated than during the great chastening of the Exile, or even it may be shortly thereafter. Zec 3^{9} appears to contain the earliest allusion to the Day of Atonement. If the function assigned by the Priests' Code to the high priest on the Day of Atonement is a later insertion, the original high priest of this Code has no station left to him but that of *primus inter pares.* Even the distinctive dress he wears appears to mean nothing more (see below). A chief priest, however, was, beyond all doubt, found at Jerusalem prior to Ezekiel (see above, § 3). As to the further argument in favour of the priority of Ezekiel's system to that of the Priests' Code, namely that Ezekiel was the first to introduce the distinction between priests and Levites, this rests upon an interpretation, which *per se* is a possible one, but which is not to be deduced unconditionally from the language of Ezekiel. It is true that Ezekiel gave a new arrangement to the station of those Levites who had formerly been priests at the high places, but his language by no means excludes or even renders improbable the supposition that in the pre-exilic temple there were other Levites besides these, or that there were, besides the foreign temple-slaves, other temple-servants not called Levites, or priests of the second rank side by side with the priests proper, *i.e.* the Zadokites (see above, § 6). We will seek to show further, below, that Ezekiel's designating of the priests as 'Zadokites,' in contrast to their being called in the Priests' Code 'Aaronites,' is by no means an evidence of Ezekiel's priority.

On two points, it is true, the Priests' Code contains regulations affecting the priests which cannot be separated from its system (P^{2}), and which yet undoubtedly go beyond what is found in Ezekiel. In the Priests' Code the tenth falls to the Levites and the tenth of the tenth to the priests, to whom belong also the firstborn of clean beasts. Ezekiel says nothing about either of these things. But in the Deuteronomic regulations it is clear that neither the tenth nor the firstborn are considered as belonging to the Levites or priests (cf., further, below).

Other differences between the law of Ezekiel and that of the Priests' Code appear to the present writer to speak necessarily in favour of the priority of the Priests' Code, or at least of the system represented by it. In this Code the killing, flaying, and cutting up of the sacrificial animal has to be done by the layman presenting the offering (Lv 1$^{5f.\ 11f.}$ etc.; see *Gesch.* p. 114); in Ezekiel the Levites have to perform the killing. There can be no doubt that in this instance the Priests' Code represents the earlier custom, which was based upon the view that by slaying his sacrifice the offerer himself presents his gift to the deity, and thereby expresses the fact that it is meant for him. In Ezekiel, on the other hand, this action is undertaken by the Levites as a class intermediate between laity and priests, in order to remove the layman a stage further from sacred functions. Vogelstein (p. 67), indeed, reverses the chronological order, and holds that the flow of an anti-Levite current has withdrawn from the Levites the slaying of the sacrificial victims; but surely the slaughter by the hand of the sacrificing layman is a relic of primitive times when every Israelite was entitled to offer sacrifice. Besides, by setting down the killing of the animal by the lay offerer as a later custom, a very improbable course would be given to the development of the practice in this matter (as it cannot be imagined that the regulations of the Priests' Code we are considering are due to a later alteration of the text); that is to say, the Chronicler, who makes the Levites take part in the slaying of the victims (see below, § 9), would, on this view, have taken a step backwards from the Priests' Code in the direction of Ezekiel. The practice of later times in regard to the temple service appears, indeed, to have excluded both laymen and Levites from the slaying of the sacrificial animals, and to have reserved this for the priests alone (Büchler, *Priester*, 136 ff.); it is probably a matter of pure theory when the Talmud, in agreement with the Priests' Code (Vogelstein, p. 68, note 1), represents laymen as performing the act of slaughter. Amongst the ordinances of Ezekiel which go beyond the Priests' Code in the sense of keeping the laity at a distance, besides the one we have considered, there are the enactments that the priests are not to come out amongst the people with their holy garments or with the sacrificial portions, lest the people be hallowed thereby—regulations which are wanting in the Priests' Code. We find expressed here a materialistic conception of holiness as if it were something that could be transferred by external contact. The same conception shows itself in the Priests' Code only, on what is not an impossible explanation, in the case of the sin-offering (whoever touches the flesh of this offering 'becomes holy' [?], Lv 6^{20} [Eng.^{27}]), and the 'most holy' offerings in general (Lv 6^{11} [Eng.^{18}]; cf. Ex 29^{37} 30^{29}). But in these passages the thought of 'becoming holy' (*Heiligwerden*) by touching can hardly be really present, rather would it appear that it is 'being holy' (*Heiligsein*), *i.e.* 'being a priest,' that is specified as the condition of touching (see Baudissin, *Studien zur semit. Religionsgeschichte*, ii., Leipzig, 1878, p. 54 f. note). The post-exilic Haggai (2$^{11ff.}$) denies that contact with the skirt of a garment in which one carries holy flesh makes holy; but he does not deny that direct contact with sacrificial flesh has this effect. In this way he does not, as Kuenen (*ThT*, 1890, p. 17) supposes, contradict Ezekiel; and, therefore, we may not infer from Haggai's language that Ezekiel's view was an older one, which was abandoned in the post-exilic period (and so also in the Priests' Code, on the assumption of its post-exilic composition).

It is alleged that Ezekiel was not acquainted with Lv 21$^{1ff.}$, where, perhaps, the priest is forbidden (although this is extremely questionable) to defile himself for a dead wife. But this does not follow (Nowack, p. 115, note 1) from the fact that in Ezk 24$^{15ff.}$ mourning on the part of the priest for his wife is assumed as a matter of course, for it is not mourning in general that is forbidden in Lv 21$^{1ff.}$, but only certain specified mourning customs, besides the defilement by the corpse (v.^{5}; cf. Ezk 44^{20}; cf. Joh. Frey, *Tod, Seelenglaube und Seelenkult im alten Israel*, Leipzig, 1898, p. 74 f.).

Ezekiel's arrangements about the Levitical and priestly land are much more practical than in the Priests' Code. In Ezekiel's State of the future, priests and Levites live in the immediate neighbourhood of the temple where they have to serve; according to the Priests' Code they are distributed among different cities throughout the land, where they have nothing to do. It is hardly conceivable that the author of the Priests' Code should have so changed for the worse the arrangements of Ezekiel, if these were the earlier. Rather does the Priests'

Code in this instance still adhere more than Ezekiel to the conditions which really existed in the pre-exilic period. Amongst the priestly cities named in Jos 21 (P), is Anathoth, which we know from Jeremiah as a city where priests lived. Among the Levitical cities are, further, included the six Cities of Refuge. The latter were old sanctuaries to whose altar the manslayer fled. Besides, in the case of four of these Cities of Refuge which are named in Jos $21^{13ff.}$, it may be shown either from history or from the names themselves that they were places of worship (Hebron, Shechem, Kadesh, Ramoth [probably identical with Mizpah of Hos 5^1]).

If the system represented by the Priests' Code is prior to Ezekiel, then the silence of the latter about the tenth and the firstborn as priestly dues, can be explained only by assuming that these particular ordinances had not obtained practical recognition before Ezekiel's time, and that he purposely passes them over, presumably because he had doubts as to the possibility of carrying them out. He is silent also as to the tithe-meals of Dt, and the sacrificial meals which, according to Dt, are to be held with the firstborn of cattle and sheep. He must have been acquainted with both these regulations, and has thus not sought to interfere with the treatment of the tenth and the firstborn. The old view, as represented in the Jehovistic book (Gn 28^{22}), is that the tenth is to be given to the Deity. The same demand is expressly made by the Book of the Covenant (Ex 22^{29}) in the case of the firstborn of cattle and sheep. The arrangement in the Priests' Code, in so far as it assigns tithes and firstborn to the servants of the Deity, comes nearer to this view than the common meals of Dt (see Dillmann on Lv 27^{33}). The term 'tenth' can originally have been applied only to an impost, and not to the material for a sacrificial meal (so also Van Hoonacker, *Sacerdoce*, etc. p. 393). Only in this particular is something secondary to be recognized in the Priests' Code, namely that it assigns the tenth—differently with the firstborn—not, or at least only indirectly, to the proper servants of the Deity, namely the priests, but in the first instance to the servants of the sanctuary, the Levites.

That the priestly legislation of the Priests' Code (P^2) is to be placed prior to Ezekiel, appears to the present writer to result also from the circumstance that it shows no regard to the special conditions of the *personnel* of the sanctuary at the Return from the Exile. In the early days of the Jewish colony, at all events at the time of Ezra, if not earlier, we find, alongside of the priests, these classes—Levites, singers, and doorkeepers (both these originally distinct from the Levites), and Nethinim; the Priests' Code, on the other hand, knows only the two classes—priests and Levites. The Levites, called in the Priests' Code *nĕthûnîm*, are evidently intended to replace the foreign Nethinim who are no less disapproved of in the Priests' Code indirectly than they are in the direct polemic of Ezekiel. It may be seen from the narrative portions of the Bk. of Joshua which belong to the Priestly Writing, that the latter does not, indeed, mean to set aside the Nethinim entirely; for in Jos 9^{21}, which evidently belongs to this source, it is said that the inhabitants of Gibeon and the neighbouring cities were set aside by the princes of Israel to be hewers of wood and drawers of water 'for the congregation.' These serfs are thus looked upon here, not as servants of the temple or the priests, but as servants of the congregation, *i.e.* the laity. As far as the temple service is concerned, their place is to be taken by the Levites. But the latter have in this matter, as it would appear, to discharge the functions, not so much of the Nethinim as of the post-exilic doorkeepers, for they are called 'keepers.'—It is difficult to suppose that a legislator, who was face to face with the complicated relations of the temple *personnel* in post-exilic times, should have imagined that he could come to an adjustment with them by simply throwing all non-priestly temple-servants, without any further argument or justification, into a single class.

In particular, upon any theory which makes the Priests' Code exilic or post-exilic, we miss in it that regard we should expect to the former priests of the high places, who, since the centralization of the cultus under Josiah, gave rise to difficulties. Josiah sought to exclude them from the Jerusalem cultus, but evidently was unable to set aside their pretensions to a share in the priestly service in the temple; for Ezekiel considered it necessary to announce to them in unambiguous terms that it was God's decree that they should be removed from the priesthood. In Ezra's time only a few of the descendants of the old priests of the high places, those who, in Ezekiel's terminology, are called 'Levites,' had accommodated themselves to the position assigned to them. It is true that the Priests' Code contains a clear trace of a conflict between the Levites and the priests, in the narrative of the rebellion of the Levite Korah against Moses and Aaron. But that the conflict here spoken of has regard to the claims of the deposed priests of the high places is not to be gathered. On the contrary, Korah cannot be the representative of these whilom *bāmôth* priests, for in the post-exilic period the Korahites belong to the singers or to the doorkeepers (1 Ch 6^{22} 9^{19} *al.*), and hence not to the Levites in the sense of that term as used by Ezekiel, and in the Memoirs of Ezra and Nehemiah, whose use of the term is fashioned upon Ezekiel's model. Instead of a conflict between former priests of the high places and the old Jerusalem priests, one might see in the narrative about Korah the description of a conflict in the time after Ezra, when the singers were reckoned to the Levites. This is the view of Vogelstein (p. 45 ff.), who, upon the ground of very precarious combinations, places an attempt of these later Levites to seize the right of offering incense, in the time of the high priest Johanan I. (the son of Joiada) and the Persian satrap Bagoses, who probably belong to the reign of Artaxerxes II. (B.C. 404–359). But the narrative of Korah's rebellion, *i.e.* the later account of the Priests' Code about this rebellion (see above, § 8 **d** *end*, and cf., further, below), can scarcely be separated from the Priests' Code of Ezra (P^2) and assigned to a later innovation (P^3); for then the law of Ezra would merely have contained a narrative giving expression to the priestly prerogatives of the whole tribe of Levi as against the rest of the congregation. But this is not to be supposed, seeing that the Priests' Code (P^2) everywhere insists most distinctly on the priestly rights of the Aaronites alone. This it does, in the opinion of the present writer, not in opposition to claims of non-Jerusalemite priests, which do not come into view with P^2 at all, but rather—and so also in the story of Korah—in opposition to pretensions put forward by the *personnel* at the Jerusalem temple who were not counted as belonging to the (Zadokite) priestly family.

The duties of the Levites of the Priests' Code and their relations to priests and people are so vaguely defined as to give rise to the impression that these 'Levites,' as servants of the priests, are simply an innovation of the legislator, not corresponding at all to the actually existing relations. In other words, the legislator appears to have written at a time when, in addition to a special priestly family, namely the Aaronites of the

Priests' Code, there was not a class, who from their descent might be called Levites, serving as lower officials at the sanctuary; and the employment of Levites for this office appears to be a matter of pure theory on the part of the legislator, whose system elsewhere also is based in large measure upon ideal construction. He appears to substitute the name 'Levites' for the lower grade of sanctuary servants, singers, and doorkeepers. In the priestly system of the Priests' Code, so far as this has a real basis, the only parties in view would, in this way, be the *personnel* of the old Jerusalem temple — a circumstance most easily capable of explanation if this system took its rise at a time when one had no motive for taking into consideration the non-Jerusalemite priests or their descendants.

The Priests' Code is acquainted, on the other hand, with a class amongst the *personnel* of the sanctuary with which we meet nowhere in the post-exilic period, namely the **serving women** (see above, § 8 e). These may be connected with the consecrated women, the *ḳĕdēshôth* of the ancient Canaanite sanctuaries, who in certain pre-exilic periods were found even in the Jerusalem temple (*Gesch.* pp. 36 f., 179 f.; cf. Ismar J. Peritz, 'Woman in the ancient Hebrew Cult,' in *JBL*, 1898, pt. ii. p. 145 ff.), although a legislator of the Jahweh religion could not think of women at the sanctuary serving the purpose of the Canaanite *hierodouloi*, but only as employed in cleaning and such like. A later age did away with these serving women entirely, as tending to recall the *hierodouloi*, and as furnishing occasion for moral abuses.

The designation chosen for priests in the Priests' Code, namely 'Aaronites,' appears to the present writer to point to the time before Josiah's reform, or at least before Ezekiel. Its result was that a priestly family returned with Ezra, which traced its descent, not, like the Zadokites, to the family of Phinehas or Eleazar, but to that of Ithamar (Ezr 8^2 M), and thus did not belong to the old Jerusalem priesthood. The real existence of such non-Zadokite 'Aaronites' is also probable from other indications. As we found occasion to conclude (see above, § 3, cf. § 2) from the history of Eli's descendant Ebiathar, who was banished to Anathoth, and of the priests at Anathoth in Jeremiah's time, who probably traced back their descent to Ebiathar, the priesthood of Anathoth, in distinction from the house of Zadok, held itself to be derived from the ancient priestly family at the time of the Exodus, and perhaps from Aaron. Consequently, the enactment of the Priests' Code, that the sons of Aaron are all entitled to exercise the priestly office, was not, when the new community was set up, fitted to serve the special interest of the Zadokites, for it required these to treat even those priests who did not belong to their family as equally entitled to sacred functions with themselves. Now there can be no doubt that the author of the priestly legislation of the Priests' Code (P^2) belonged to the priesthood of Jerusalem, for otherwise he could not be so familiar as he is with the ritual of the one legal place of worship, the tabernacle, *i.e.* the antedated single temple. But it is extremely improbable that a Zadokite of the period after Ezekiel should, in divergence from this prophet, have conceded to non-Zadokite priests equal rights with the Zadokites. The substitution of the ancient Aaron for the relatively modern Zadok cannot be a mere play with names on the part of an exilic or post-exilic legislator, for, as Ezr 8^2 shows, there were actually non-Zadokite 'Aaronites.' While the adherents of the Graf hypothesis had hitherto for the most part seen in the term 'Aaronites' simply an archaism for 'Zadokites,' Kuenen (*ThT*, 1890, p. 28 ff.), latterly agreeing with Oort, the present writer, and Vogelstein, came to the conclusion we have reached. The connotation of the term 'Aaronites' is—and this not merely in theory, but as applied in practice—even in the post-exilic period wider than that of 'Zadokites.' Kuenen, accordingly, following Oort and Vogelstein, held that a compromise took place between the Zadokites after Ezekiel's time and non-Zadokite priestly families, and that to this compromise the enactments of the Priests' Code owed their origin (so also Schürer, p. 239, note 49; cf., for the same explanation, as the first after Oort [1884], Stade, *GVI* ii., Berlin, 1888, p. 104). But it is not at all likely that on the one hand Ezekiel's distinction between non-Zadokite Levites and Zadokites should have gained acceptance, as it undoubtedly did, to such an extent that a new class, 'the Levites,' was formed out of the former priests of the high places; but that, on the other hand, this same distinction found so little acceptance that, in direct opposition to it, new regulations were introduced, by which non-Zadokites had to be admitted into the number of the priests. About the year 572 Ezekiel had made the first attempt to have all non-Zadokite Levites declared to be sanctuary servants. A movement of non-Zadokite priestly families must, as Oort and his followers think, have formed itself in opposition to this ordinance, and must have been not without effect, so that, when Ezra returned in the year 458, Ezekiel's limitation of the priesthood was already forgotten so far that a non-Zadokite family of priests joined Ezra, and no opposition was offered to the recognition of their priestly rights. Of a decisive contest of the non-Zadokite priestly families with the Zadokites in this matter, tradition shows no trace, and the development subsequently to Ezekiel's time is much more easily explained if the rule entitling all Aaronites to the priesthood was an older one, with which an adjustment had to be made. With what right the house of Ithamar, which does not appear in the history prior to Ezr 8^2 (M), was traced back to Aaron, as is done in the Priests' Code, it is impossible to say (cf. Nowack, p. 105, note 2). But it is not likely that the connexion of Ithamar with Aaron was first put forward after the Ithamarites under Ezra had gained entrance to the priesthood, for in that case it would not be intelligible by what other title this entrance could have been gained by the Ithamarites in opposition to the Zadokites and to the statutes of Ezekiel. Seeing that the family of Eli in any case was, even in pre-exilic times (in view of 1 S 2^{36}, and probably also 1 K 2^{27}, the oracle of 1 S $2^{27\text{ff.}}$ cannot be exilic or post-exilic), traced back (1 S $2^{27\text{f.}}$) to the priest of the Exodus (who is not, indeed, named), the assumption is, to say the least, not improbable that even in pre-exilic times there were non-Zadokite priests who traced their descent to Aaron as the priest of the Exodus. The very same conclusion results from the account in the Jehovistic book of Aaron's part in the worship of the golden calf, for he is thus presented as the type, nay probably also as the ancestor, of the priests of the Northern kingdom. If from pre-exilic times there were 'Aaronites' who did not belong to the house of Zadok, the fact that the name 'Aaron' or 'sons of Aaron' is employed by a legislator belonging to the priesthood of the only legitimate sanctuary, the temple of Jerusalem, for this very priesthood, appears to the present writer to be intelligible only at a time when the participation of non-Jerusalemite 'Aaronites' in the temple cultus did not form the subject of question, because at that time they did not desire such participation, *i.e.* at a time when, besides the temple at Jerusalem, there were other sanctuaries at which they could discharge priestly service—in other words, before Josiah's reform.

The Priests' Code appears to the present writer to betray quite clearly the circumstance that, at the time when it was written, all Aaronites did not *de facto* enjoy priestly rights, but only that branch to which (so Ezr $7^{1ff.}$) the Zadokites were reckoned, namely the branch of Phinehas (cf. Ezr 8^2 M). In Nu $25^{12f.}$ it is only to Phinehas, of all the Aaronites, that an everlasting priesthood is promised. And yet Ezra had to admit priests who were not reckoned to the house of Phinehas. This appears to us to be explicable only on the supposition that that saying about the everlasting priesthood of Phinehas alone belongs to a different age from that of Ezra. This cannot be the age after Ezra, for the non-Zadokite Ithamarites who under him were admitted to the priesthood at Jerusalem were not afterwards removed from this office (*Gesch.* p. 139). No doubt the Zadokites, as is shown by the term *Sadducees* derived from their family name, formed still later a special priestly aristocracy; but this does not authorize our taking, with Kuenen (*ThT*, 1890, p. 37), the promise of an everlasting priesthood to Phinehas alone, as a later interpolation, for the everlasting priesthood was from the time of Ezra not an exclusive characteristic of Phinehas, *i.e.* of the Zadokites.

In the narrative of the Priests' Code regarding the destruction of two of Aaron's sons, Nadab and Abihu, without issue (Lv 10^{1-7}, Nu 3^4 26^{61}, cf. Lv 16^1), we should apparently find either a reminiscence of priestly families that actually died out (so, fancifully, Ad. Moses, *Nadab und Abihu oder der Untergang der Sauliden und des grössten Theils des Stammes Benjamin*, Berlin, 1890: Nadab=Abinadab, 1 S 7^1; Abihu=Abiel, 1 S 9^1), or even a polemic against the claim of certain families to belong to 'Aaron.' If the latter is the case, the genuineness of the genealogy of these families, which went back to Nadab and Abihu, would be denied, since these sons of Aaron perished without leaving any issue behind them. It is impossible to find in the narrative of their fate any indication of conditions pointing to a particular period of time, unless we are to hold, with Oort (p. 331), that the 'strange fire' which Nadab and Abihu brought 'before Jahweh' has reference to their participation in *bāmôth* worship. The effect of this would be that in this narrative the Aaronite families Nadab and Abihu would stand for the non-Jerusalemite priests (as 'Aaron' stands elsewhere for the priests of the bull-worship) who were displaced by Aaron's son Eleazar, whom the Zadokites regarded as their ancestor. Such an interpretation, however, is not very probable, for the 'strange fire' is at least offered to Jahweh, which appears to presuppose that it is offered at the legal sanctuary and not in the high places (see, further, art. NADAB).

The designation of the priests as 'Aaronites' does not belong to the oldest strata of the Priests' Code, even apart from the Law of Holiness and the *tôrôth* akin to it. In a version of the story of Korah which has been worked over, and which does not belong to the Jehovistic book but to the Priests' Code, Korah is regarded as the champion of the congregation against Moses and Aaron (Nu 16^3), *i.e.* the Levites. Here the Levites as a body are thought of as priests, just as in the narrative of the rod that blossomed (Nu $17^{16ff.}$) Aaron is the representative of the tribe of Levi, which in its totality is thought of as invested with priestly prerogatives. In opposition to this older conception of the Levites as priests, the main body (P^2) of the Priests' Code seeks to establish the exclusive right of the Aaronites, *i.e.*, in the view of the legislator, the Jerusalem priesthood.

A different procedure, again, is followed by a recent addition to the legislation, which seeks to present the Levites as more like the priests. We refer to what evidently was never carried into actual practice, the consecration of the Levites (Nu $8^{5ff.}$), which is intended to be an analogue to the consecration of the priests. This representation, which shows a higher estimate of the Levites, will belong to the exilic or post-exilic period (P^3), when by 'Levites' were understood the families of the former priests of the high places, and it was desired to give to these a priest-like rank corresponding to their pretensions.

Among the later elements of the Priests' Code would have to be reckoned also the description of the vestments of the high priest, if we are to see in the latter an investiture with the insignia of royalty, of which, of course, there could be no word before the post-monarchical period, when the high priest was the only visible head of Israel. But the purple in the high priest's robe can hardly be the symbol of royalty; the principal colour of the high priest's garments is not *red-* but *blue-*purple. The diadem, to be sure, is a sign of princely rank, but 'holy princes' (*sārîm*) appear already in the exilic 'Isaiah' (43^{28}), surely not as a new creation of the Exile. The chief priest of royal Tyre assumed a very high dignity as 'next after the king' (Movers, *Die Phönizier*, II. i. 1849, p. 542 ff.). The circumstance that the high priest of the Priests' Code bears, as the most important item in his attire, the Urim and Thummim, is not favourable to an exilic or post-exilic date for the composition of the passage embodying this view, for the post-exilic period had no Urim and Thummim (Neh 7^{65}). The priests in old Israel were in possession of them prior to the overthrow of the Northern kingdom (Dt 33^8). Perhaps these insignia, and probably also the sacred ark, were lost when the temple was destroyed by Nebuchadrezzar. That the author of the Priests' Code had before his mind's eye the post-exilic high priest as also the secular head of the community, does not follow from Nu 27^{21} (Benzinger, p. 423), where it is said that Joshua and all the children of Israel and the whole congregation are 'to go out and come in at the word of Eleazar.' Eleazar gives this direction on the ground of the Urim and Thummim, that is, God issues His commands through him. No other means of ascertaining the will of God was open to the congregation after the death of Moses; there is no thought here of a ruling position occupied by the high priest himself, least of all of the position of the post-exilic high priest who had not the Urim and Thummim at all. The circumstance that in Nu 34^{17} and Jos 14^1 the priest Eleazar is mentioned first, before Joshua, among the heads of the people, is due to the fact that Eleazar, as Aaron's son, stands in a closer relation to Moses, the former leader of the people, than does Moses' servant Joshua or any of the other then princes of the people (on the relation between the high priest in P and in the post-exilic period, cf. Van Hoonacker, *Sacerdoce*, etc. p. 324 ff.).

It is scarcely possible to arrive at a definite date for the various strata of the priestly system in the Priests' Code, and thus for the Priests' Code as a whole. The probable conclusion from the preceding considerations, if these are justified,—differing from what is reached on the view of the case adopted by the majority of modern critics,—would be that the main stock of the Priests' Code (P^2) is prior to Ezekiel, and, in that case, belongs probably even to the period preceding Josiah's reform of the cultus. The programme of Ezekiel, which in one way or other is of decisive importance for the dating of the Priests' Code, appears to the present writer to be intelligible, if the prophet considers an older cultus-legislation to have been abolished with the overthrow of the ancient temple, and if he substitutes a new system for use in his new temple. But it appears difficult to comprehend how a legislator posterior to Ezekiel should have displaced the law of the prophet written down for the new Israel by a legislative scheme of his own. On the other hand, again, it is readily intelligible that through the impulse of the law of Ezekiel, and owing to the new conditions and the new conceptions that grew up during the Exile, expansions and modifications should have been made by exilic priests upon an ancient law, in order to fit it for application to the new community. The form of the Bk. of Ezekiel, apparently intermediate between Deuteronomy and the Priests' Code, is more simply explained if Ezekiel is dependent, not only, as he clearly is, upon Deuteronomy and Jeremiah, but also upon an older code emanating from the Jerusalem priesthood, than if he makes an original start in dealing with the cultus. The same remark applies to his language, which on the one hand recalls Deuteronomy and Jeremiah, and on the other hand the Priests' Code.

The different views held as to the date of the system of the Priests' Code do not affect essentially the actual history of the priesthood itself except on a few points, as, for instance, in the view which is to be taken of the position of the chief priest prior to the time of Ezekiel, if the Code is to be placed thus early. This is owing to the fact that the organization of the priesthood in the Priests' Code is of a theoretical character, for as a whole it does not fit the real conditions of any period whatever. Of much more importance is the question of the date of the Priests' Code for the history of sacrifice.

But, whatever date may be fixed for the redaction of the system of this legislation, it will not be possible to avoid the conclusion that the whole body of ritual set up in it could not have taken its rise in its special form—*i.e.* in its deviation from Dt and Ezk—during the relatively short period between Ezekiel (B.C. 572) and Ezra (B.C. 458), namely some 110 years, but that it represents a long development of cultus-practice as well as cultus-language. The beginnings of this development go back in any case to the pre-exilic period, and are not unintelligible there, when we consider, what to the mind of the present writer is clear, that the Deuteronomic law did not emanate from the priesthood at Jerusalem, in which case no specimen of the cultus-language and cultus-practice of this priesthood prior to Ezekiel has been preserved outside the Priests' Code, and when we note, further, that Jeremiah (8^{8}) is acquainted with a literary activity exercised in the way of giving form to the *tôrāh*, an activity of which he disapproves, and which therefore cannot be taken to refer to the codifying of the Deuteronomic law, with which the prophet undeniably sympathized. What incurs his disapproval can scarcely be anything else than the resolving of God's will, which he interprets ethically ($7^{22f.}$), into ritual demands. Here, then, in Jeremiah we find pretty clear traces of a priestly literary activity answering to the rise of the Priests' Code. These literary productions, however, as may be gathered from the same reference in Jeremiah, have not yet gained the position of a generally accepted ceremonial law. Even the Deuteronomic law betrays no acquaintance with this last, but knows only of some particular *tôrāh* for the priests (Dt 24^{8}), which may afterwards have been taken over by the Priests' Code (see above, § 8 a). On the other hand, a point which cannot be more fully discussed here, the redaction of the Deuteronomic law and the position it assigns to this as a farewell address of Moses, presupposes an acquaintance with the Priests' Code, and an acceptance of it as the law proper, of which Dt is meant to appear as a recapitulation. The redaction of Dt is, in view of its relations to the Deuteronomic law, not to be placed at a very great distance from the latter; it cannot belong to so late a period as the rise of the new post-exilic community.

If the system of the Priestly Writing is earlier than the Exile, and thus probably prior to Josiah's reform, it can have originated at such a time purely as an ideal picture sketched by a Jerusalem priest, and not, or at least only very partially, as a description of the actually existing state of things. At whatever time the Priests' Code was written, the first unmistakable trace which at the same time is capable of being dated with certainty, of the influence of the system embodied in it, is to be found in the place given to the high priest in Zechariah, and the first evidence of its close is found in the reading aloud of the law in the time of Ezra.

9. THE PRIESTHOOD FROM EZRA TO THE CHRONICLER.—After the Pentateuch had, under Ezra, obtained recognition as the lawbook, we find, as could not but have been expected, that the relations of the sanctuary servants were moulded according to the finished system set forth in the Priests' Code. The Deuteronomic views of these relations, not being rounded off into one well-compacted whole, must give place to this system.

Thus, with the author of the chronicle written between B.C. 300 and 200, *i.e.* in the Books of Chronicles and in the redaction by his hand of the Books of Ezra and Nehemiah, we find the relations of the *personnel* of the sanctuary, as these had existed in the time of Ezra and Nehemiah, modified in various points, in order to bring them more into harmony with the requirements of the Priests' Code. The Chronicler transfers the relations existing in his own time without distinction to earlier times, as if everything had been in force in the same way from the time of David downwards. It is possible, indeed, that his descriptions do not in every single point correspond to the actual conditions of his own day. It cannot, however, be inferred from this, with Van Hoonacker, that the Chronicler portrays the pre-exilic conditions as these really existed, for this conclusion is opposed by all that we know from earlier writings. The Chronicler may be assumed to have used for the pre-exilic history, at least indirectly if not directly, ancient sources that have not come down to us, but for his account of the condition of the priesthood prior to the Exile he certainly had no such sources at his disposal. Wherever this account exhibits a deviation from the conditions after the Exile, the Chronicler evidently puts forward, as a rule, not something corresponding to any actual state of things, but only what appeared to him desirable. His descriptions tend to glorify the Levites, to whom he everywhere shows regard even more than to the priests. Probably he was himself a Levite, and, in view of his special interest in the temple singers, he may have belonged to this group of the Levites.

The Chronicler is acquainted with 24 divisions or families of priests, which, after his manner, he carries back to the time of David (1 Ch $24^{7ff.}$). Since in the list of these divisions, as it lies before us, the first place is occupied by the family of Joiarib, from which the Hasmonæans sprang, it may perhaps be inferred that this list was first drawn up in the Hasmonæan period (Schürer, p. 237, note 44). These 24 priestly families are referred to, in some instances clearly, in others at least to all appearance, by the terms *maḥlĕḳôth*, 'divisions' (1 Ch 24^{1} $28^{13. 21}$, 2 Ch 8^{14} [23^{3}?] $31^{2. 15f.}$); *bêth 'ābôth*, 'fathers' houses' (1 Ch $24^{4. 6}$ *al.*); and *mishmārôth*, 'watches' (2 Ch 31^{16}), this last occurring already in Nehemiah (13^{30} M). According to the Rabbinic tradition, the 24 classes, with which Josephus (*Ant.* VII. xiv. 7; *Vita*, 1) is acquainted as still existing in his time, are held to have been in existence from the time of the Exile (Schürer, p. 232 f.). This cannot be quite correct. The list in Neh $7^{39ff.}$ names only four priestly families (cf. Ezr 10^{18-22}), and two returned with Ezra (Ezr 8^{2} M). But Neh 12^{1-7} mentions, for the time of Zerubbabel and Joshua, 22 divisions of priests, and the same, with one omission, are given in Neh 12^{12-21} for the time of Joiakim the son of Joshua. Neh 10^{3-9}, on the other hand, names 21 divisions, in which, indeed, the names show changes (cf. Ed. Meyer, p. 168 ff.). Those four families in Neh 7 should therefore probably be thought of as falling into subdivisions. The two groups that returned with Ezra do not necessarily represent other two families besides those four; they are representatives of the two great branches into which, according to the Priests' Code, the whole body of priests falls, namely Phinehas (or Eleazar) and Ithamar, *i.e.* Zadokites and non-Zadokites. The heads of the 21 to 24 divisions are spoken of as *rā'shîm* of fathers' houses (Neh 12^{12}, 1 Ch $24^{4. 6}$), with whom we should probably identify the priest-princes (*sārîm*) of Ezr $8^{24. 29}$ M, 10^{5}, 2 Ch 36^{14}.

The Chronicler divides the singers likewise into 24 classes (1 Ch 25), and appears to have designed to give in like manner, for the Levites in general, a list of 24 classes, which has certainly not reached us in a correct form in the present text of 1 Ch 23^{6-24}. Since the division of the Levites into 24 classes is witnessed to in the period posterior to the OT (Jos. *Ant.* VII. xiv. 7; cf. Schürer, p. 242, and, on the other side, Van Hoonacker, *Sacerdoce*, etc. p. 41 ff.), these statements of the Chronicler are probably due to the circumstance that with him the classes of singers and Levites are practically identical (see below, § 10). Divisions of the Levites, without specification of the number of these, are presupposed by the Chronicler in various ways (*maḥlĕḳôth*, 1 Ch $28^{13. 21}$ *al.*; *mishmārôth* of the Levites [singers] and *maḥlĕḳôth* of the doorkeepers, 2 Ch 8^{14}; [*bêth*] *'ābôth* of the Levites, 1 Ch 9^{34} *al.*), and even Nehemiah (13^{30} M) speaks of *mishmārôth* of the Levites. The heads of the divisions of the Levites, like those of the priests, are called by the Chronicler *sārîm* (Ezr 10^{5}, 1 Ch $15^{4ff.}$ *al.*) or *rā'shîm* (Neh $12^{22f.}$, 1 Ch $9^{33f.}$ [of the singers and doorkeepers, vv. $^{14-32}$] *al.*). In the Priests' Code *nāsî'* is the designation of the heads of the Levitical fathers' houses (Nu $3^{23ff.}$), along with which we find *rā'shîm* used of the heads of the whole tribe of Levi (Ex 6^{25}).

In the position of the high priest no essential change can be traced since the time of Ezra. The very first of the post-exilic high priests assumed the place claimed for him in the Priests' Code. Nehemiah ($3^{1. 20}$ M, 13^{28} M) and the Chronicler give to the high priest the title of *ha-kōhēn ha-gādôl* (2 Ch 34^{9}), the Chronicler has also the older title [*ha-*] *kōhēn ha-rō'sh* (Ezr 7^{5}, 2 Ch 19^{11} *al.*). In addition, the Chronicler employs the designation, not found in the Pentateuch, 'prince (*nāgîd*) of the house of God' (1 Ch 9^{11} *al.*; cf. 'prince of Aaron,' 1 Ch $27^{16f.}$), which marks the later time when the high priest was at the same time the head of the political community. Usually, however, the Chronicler (1 Ch 16^{39}), as well as Nehemiah (Neh 13^{4} M), calls the high priest simply 'the priest,' as is likewise done frequently in the Priests' Code.

By the Chronicler, as in the Priests' Code, the priests recognized are the Aaronites, including both the Eleazarites and the Ithamarites (1 Ch $24^{3ff.}$ *al.*). The equalizing of the latter with the Zadokites (*i.e.* Eleazarites), which as a necessary concession to the system of the Priests' Code appears to have been first recognized under Ezra (Ezr 8^{2} M), has thus become permanent.

A difference, as compared with the conditions in the time of Ezra, reveals itself with the Chronicler only in regard to the inferior *personnel* of the temple, and in some points concerning the relation of this to the priests. A distinction between Levites on the one hand and singers and doorkeepers on the other, such as we noted (see above, § 7) in the time of Ezra, is no longer made. The written source in which the Chronicler would appear to have found at the same time the Memoirs of Ezra and those of Nehemiah, appears to have still made this distinction, seeing that even outside the Memoir passages in the Bks. of Ezr and Neh the singers are only very occasionally, and the doorkeepers not at all, reckoned to one comprehensive class, the Levites (*Gesch.* p. 143 f.). On the other hand, for the Chronicler singers and doorkeepers are subdivisions of the one class, the Levites (1 Ch $6^{16ff.}$ [note v. ^{32}] 9^{26} *al.*, see *Gesch.* p. 151 ff.). C. C. Torrey (*The Composition and Historical Value of Ezra-Nehemiah*, Giessen, 1896, p. 22 f.) is decidedly wrong when he denies the existence of a difference in this respect between the Chronicler and the older portions of the Bks. of Ezra and Nehemiah (see above, § 7). Still less, in view of the material evidence that exists, can it be held, with Köberle and Van Hoonacker (*Sacerdoce*, etc. p. 49, cf. 70), that the reckoning of the singers and doorkeepers to the Levites, as we find done by the Chronicler in the Bks. of Chronicles themselves and in his working over of the sources of Ezr and Neh, is presupposed by Ezra and Nehemiah as existing, and rests even upon a pre-exilic application of the name 'Levites' to those classes of sanctuary servants. On the contrary, the application of the name 'Levite' even to the singers and doorkeepers is plainly introduced through the influence of the Priests' Code, which knows of only the one class besides the priests, namely the Levites. The Nethinim, who under Ezra were received into the community (Neh 10^{29}), appear to have disappeared at the time of the Chronicler, who mentions them only once, namely at the time of the founding of the first post-exilic community (1 Ch 9^{2}). Whether they were removed from the service of the sanctuary or by a genealogical device were absorbed among the Levites can scarcely be determined, but even here the influence of the Priests' Code is unmistakable.

For the priests the Chronicler sometimes uses the expression, which is somewhat strange for him, *ha-kōhănîm ha-lĕwiyyîm*. It is not, indeed, quite certain that he actually uses it, for the copulative *waw* may easily have dropped out between the two appellations just quoted, and the readings of the MSS vacillate (*Gesch.* p. 154 ff.). But there is an *a priori* probability in favour of the reading without *waw*, for this form of expression is just what does not correspond with the ordinary usage of later times, and in any case in 2 Ch 30^{27}, where it is said of the 'Levite priests' that they blessed the people, this reading is undoubtedly correct, since blessing is the function of the priests exclusively. In this instance, by way of exception, the terminology of Dt has again forced itself to the front, as in like manner the designation 'Levites' is also occasionally still used by the Chronicler in a wider sense so as to include the priests (*Gesch.* p. 136). In the employment of the title 'Levite priests' we may find an approximation of the position of the Levites to that of the priests, which would have to be viewed as a concession to the pretensions of those whom Ezekiel and Ezra called Levites, namely the descendants of the deposed priests of the high places.

Such a raising of the dignity of the Levites would not be without analogies in Chronicles. In point of fact they have in these books a more priest-like standing. This is shown, in particular, by the services they have to render at the offering of the burnt-offering on the Sabbaths, and at the new moons and great festivals (1 Ch 23[31]), and by their (in an exceptional way) helping the priests to flay the victims on the occasion of extraordinary offerings for the whole people (2 Ch 29[34]). From the latter passage it may be inferred that the service of the Levites at the offering of the burnt-offering also on holy days consisted in the flaying, and, it may be, in accordance with Ezekiel's enactment, the slaying of the victims. At all events, in Chronicles it is the Levites who undertake the killing and flaying of the Paschal lambs, hand to the priests the blood for sprinkling (2 Ch 30[16ff.] 35[6. 10f.]), and attend to the roasting of the Paschal offering (2 Ch 35[13f.]); whereas in the Priests' Code it is the head of the house who kills and roasts the Paschal lamb (Ex 12[6ff.]; *Gesch.* p. 163). On the other hand, in 2 Ch 29[22. 24] it is the priests who slay the sacrifices, probably because we have here to do with extraordinary sacrifices for the whole people. By the 'Kohathite Levites' who prepare the shewbread (1 Ch 9[32]), the Chronicler appears to mean not the Aaronites (who, to be sure, belonged to the Kohathites), to whom alone that duty falls in the Priests' Code (but cf. *Gesch.* p. 161 f.). While, further, in the Priests' Code the duty of teaching belongs only to the priests, this duty, particularly that of instructing in the *tôrāh*, is assigned in Neh 8[7-9] (cf. v.[11]), 2 Ch 17[8f.] 35[3] also to the Levites (*Gesch.* p. 163 f.). The more priest-like position of the Levites finds quite peculiar expression in the fact that in Chronicles not only the priests, as in the Priests' Code, but also the Levites are called holy (2 Ch 23[6] 35[3]; cf., further, Ezr 8[28] M, where already the Levites seem to be included [with the priests] in the 'Ye are holy to Jahweh').

Regarding the service of the *doorkeepers* in particular, we learn that they had daily to set in all 24 watches, under four chiefs belonging to the doorkeepers, at the four quarters of the temple (1 Ch 26[12-18])—an arrangement which, although given as existing in the time of David, will really have reference to the temple of Zerubbabel. As concerns the *singers*, Büchler (*ZATW*, 1899, p. 97 ff.) seeks to prove that the data regarding temple music and temple singing were not found in the authority used by the Chronicler, and are thus added by himself. This is not impossible; but so sharp a distinction between the Chronicler and his authority (the lost Midrash on Kings), with which we are wholly unacquainted, appears to the present writer incapable of being carried out.

There is, moreover, an 'external activity,' *i.e.* one outside the sanctuary, assigned to the Levites in Chronicles (1 Ch 26[29]). They are employed as overseers and, like the priests, as judges (1 Ch 23[4] 26[29] *al.*). In particular, their charge of measures is referred to in 1 Ch 23[29] (*Gesch.* p. 162). While the Priests' Code fixes the commencement of the Levites' service at their thirtieth, or, according to an innovation, their twenty-fifth year, they have, according to 1 Ch 23[24ff.] and other passages, to serve from their twentieth year onwards—an arrangement which the Chronicler is aware is a deviation from the legal statute, and which he seeks to justify as a change made by David.

In the matter of the *revenues* falling to the priests and Levites, from the time of Ezra an attempt was made to carry out the prescriptions of the Priests' Code. But the setting-up of **Levitical cities** was as little carried into practice after Ezra as it had been up till then. When the Chronicler represents these cities as having existed in the time of David (1 Ch 13[2]) and later, this is simply due to his theory, which he forgets in 2 Ch 23[2], where the Levites, at the accession of Joash, are assembled out of all the cities of Judah. Nor is the meaning of the *migrāsh* of the Levitical cities quite clear to the Chronicler (2 Ch 31[19]). According to Neh 7[73] = Ezr 2[70], and other passages, in the post-exilic period priests, Levites, singers, doorkeepers, and Nethinim dwelt dispersed in various localities, which did not, however, bear the character of the Levitical cities of the Priests' Code. So also in the period subsequent to the OT, the priests did not all live at Jerusalem: the Maccabees came from Modein (1 Mac 2[1]), to which, indeed, they had retired from Jerusalem only in consequence of the troubles under Antiochus Epiphanes; and the priest Zacharias (Lk 1[39f.]) had his home in the hill-country of Judah (cf. Büchler, *Priester*, pp. 159–205: 'Die Priester ausserhalb Jerusalem's'). The doorkeepers, according to 1 Ch 9[25], betook themselves every seven days, according to their divisions, from their villages to Jerusalem to perform their service. The Levites and singers (and so, no doubt, the priests also) in Nehemiah's time possessed at their places of residence fields, from whose produce they supported themselves when their dues were not paid (Neh 13[10] M), and probably in general when they were not on duty, for the tenth in the time of Nehemiah was paid at the temple (Neh 13[5. 12f.] M), and thus will hardly have extended to the Levites and priests outside Jerusalem. The Nethinim lived in Nehemiah's time on the OPHEL (which see) at Jerusalem (Neh 3[26. 31] M); the (officiating) priests had houses in Jerusalem, situated apparently on the temple area (Neh 3[28] M).

On the subject of the dues falling to the temple *personnel*, we have a certain amount of information for the time of Nehemiah. The latter tells us in his Memoirs (Neh 13[5]) that before his departure from Jerusalem the tenth of corn, must, and oil was paid and deposited in the storehouses as the portion of the Levites, temple-singers, and doorkeepers, which three classes received the tenth, and the priest the *tĕrûmāh*. The *tĕrûmāh* here might possibly mean the tenth of the tenth, but linguistic usage favours rather our referring it to the handing over of the first-fruits. In that case the paying of the tenth of the tenth to the priests is not witnessed to for the time of Nehemiah. The tenth of the tenth in Neh 10[38-40] owes its presence apparently to a later hand (*Gesch.* p. 171 f.), to which is due also the additional enactment, which perhaps suits even the time of Nehemiah, but in any case is characteristic of the later development, that an Aaronite priest is to superintend the operations of the Levites, as they receive the tithes (v.[39]). After a while remissness in paying the tithes set in, so that Nehemiah at his second visit had to adopt drastic measures in order to bring the payment of them into force again (Neh 13[10ff.] M). There is no mention in Nehemiah of the tenth of cattle. The demand for this made by the Priests' Code is probably an innovation, the result of purely theoretical construction, and is perhaps not earlier than the period subsequent to Nehemiah. The Chronicler, on the other hand, is acquainted with the requirement of the tenth of cattle (2 Ch 31[6]). Priests and Levites were appointed by Nehemiah to take charge of the wood that had to be delivered at fixed times, and of the *bikkûrîm* (Neh 13[30f.] M). According to Neh 10[35] those contributions of wood for the requirements of the altar of burnt-offering were imposed upon the priests, the Levites, and the people—a prescription which is not contained in the Pentateuch, although this passage in Nehemiah appeals to the Torah (but cf. Lv $6^{5f.}$).

The Chronicler or his predecessor in the redaction of the Memoirs of Nehemiah had no longer a clear understanding of the whole of the regulations respecting dues. It is impossible to gain a distinct view from the confused picture he draws (*Gesch.* p. 169 ff.). Only in Chronicles is there any allusion to a tenth of honey (2 Ch 31^{5}); the tenth of dedicated gifts which is likewise mentioned (v.^{6}), rests upon a confusion of the tenth with the *tĕrûmāh.* The various kinds of dues are most concisely enumerated in Neh 12^{44}, a passage regarding which it is doubtful whether it belongs to the Memoirs of Nehemiah. Three species are named in it: *tĕrûmôth*, *rē'shîth*, and tenth. On this is based the Talmudic distinction of three kinds of dues, which finds no direct support in the Torah.

10. The Priesthood after OT Times.—Several further developments in the relations of the *personnel* of the sanctuary still show themselves in the period subsequent to the OT.

a. *Priests and Levites.*—The consequence of the inclusion of the singers and doorkeepers among the Levites was that these two classes, which at the time of Ezra and Nehemiah were much more numerous than the Levites so-called in the narrower sense, dispossessed these of their unique character. At least the tendency to this result is already discoverable in the OT in Chronicles, where singers and doorkeepers play a more important part than the Levites so-called in the narrower sense, so that one might be tempted to suggest that the latter had even for the Chronicler merely a theoretical existence (Vogelstein, pp. 30, 102 ff.). It is doubtful whether in 1 Ch 9^{14-34} other 'Levites' (vv.$^{14.\ 33f.}$) besides the doorkeepers (vv.$^{17.\ 22.\ 26}$) and the singers (v.^{33}) are assumed to exist (*Gesch.* p. 157 f.). The Talmud at all events knows only two kinds of Levitical service, that of song and that of watching in the temple (cf. Maimonides, *ap.* Vogelstein, p. 85; and, further, Büchler, *Priester*, p. 118 ff., esp. 136 ff.). This is a result that is not surprising in view of the origin of the Levites in the narrower sense. The ancient, *i.e.*, as would appear, pre-exilic (see above, § 3 *end*), classes of sanctuary servants included, besides the priests, only the singers and doorkeepers. The class known to Ezekiel and in the time of Ezra as 'Levites' was an artificial creation, which served only the purpose of disposing of the old non-Jerusalemite priests. In so far as these were not, like the Ithamarites, admitted to the post-exilic priesthood, they received as 'Levites' an intermediate place, which is hard to define, between the priests on the one hand and the singers and doorkeepers on the other. Thus it came about that at last the Levites κατ' ἐξοχήν were absorbed in the singers and doorkeepers, who constituted the only two surviving professional classes of Levites. In this way the arrangement gained ground, which the author of the Priests' Code, if we judged rightly, had in view. He thought of his Levites as singers (for he reckons to them the singer-family of the Korahites) and doorkeepers (for he employs to describe their service the technical term 'keep'). Of any other kind of Levites he for his part seems to know nothing, and the close of the history of the Israelitish cultus *personnel* knows as little.

In fixing the position of the cultus *personnel*, a later age accepted on other points as well the simpler and more natural arrangement, and disregarded ordinances which had for some time enjoyed validity, thanks to an artificial theory or to historical confusion. The *tenth* as a sacred due is readily intelligible if it is either devoted to a sacrificial meal (as proposed in Dt), or even given to the priests, as representatives of the deity, but not when it falls to subordinate servants of the sanctuary. The Priests' Code, which assigns it to the Levites, shows by this very circumstance that the name 'Levites' was originally a designation of the priests (*Gesch.* p. 52 f.). After the tithe regulation of the Priests' Code had been actually put in force under Nehemiah in later times, according to the testimony of Josephus (*Ant.* XX. viii. 8, ix. 2; *Vita*, 12, 15) and the Talmud (see the references in Graetz, *Monatsschrift*, 1886, p. 97 ff.), the tithes were withdrawn from the Levites and assigned exclusively to the priests (cf. Van Hoonacker, *Sacerdoce*, etc. p. 40). The Mishna (*Maaser sheni*, v. 6) appears, indeed, to assume as the correct practice that some receive the first tenth and others the *tĕrûmāh* of the tenth. The first class could be only the Levites (Schürer, p. 258, note 44); but then this description, as it seems, would not correspond with the actually existing relations of later times. It is possible that, as Vogelstein (p. 72 ff.) holds, the tradition handed down in the Mishna, to the effect that the high priest Johanan abolished 'the prayer of thanksgiving and confession at the tithe,' refers to the abolition of the paying of the tithe to the Levites, and that by this Johanan is to be understood the contemporary of the Persian satrap Bagoses (cf. above, § 8 g; so also Van Hoonacker, *Sacerdoce*, etc. p. 401, who, according to his chronological scheme [p. 60 f.], regards this Johanan as a contemporary of Ezra; on the other hand, Biberfeld, p. 18, holds that the Johanan who abolished the tithe prayer was John Hyrcanus). Our earliest evidence that the priests received the tenth comes from a much later time. Josephus (*l.c.*) assumes it as a matter of right that the priests receive the tenth, and complains only that some priests take it by force. He is speaking of the time of Agrippa II. Since Josephus describes the priests as taking the tithe at the hands of the laity, he cannot have in view the tenth that had to be paid by the Levites to the priests. He appears thus to be quite unacquainted with the paying of the tenth to the Levites as a usual thing. From the fact that the Talmud looks upon it as a punishment that the tithe was withdrawn from the Levites and paid to the priests instead, which was the custom after the destruction of the temple (Graetz, *Monatsschrift*, 1886, p. 107 f.), it has been inferred by Graetz (*l.c.* p. 98 ff.) that the offence in view as punished may be the presumption of the Levites, who—but only the temple singers—in the time of Agrippa II. succeeded in obtaining the right to wear the linen garment of the priests (see below). The historical motive for deviating from the law cannot be determined, but it is readily conceivable that any opportunity would be seized for altering the awkwardly complicated tithe law of the Priests' Code.

Not only the tithe but other previous rights were withdrawn from the Levites. They were no longer trusted with the whole of the *watch service* of the temple, but had, according to the Mishna, to keep watch only on the outside at 21 points, whereas the three stations in the inner court were occupied by priests. The guard supplied by the Levites was under the control of a captain of the temple, *i.e.* a priest (*Middoth* i. 1, 2).

Seeing that the Nethinim, who apparently were no longer even in the time of the Chronicler employed as a special class for the service of the temple, although still mentioned at a later period, are not mentioned in connexion with the temple service, the *lower services* must have been discharged by others. Philo assigns not only the watch service but also the cleaning of the temple to the νεωκόροι, *i.e.* the Levites; for other duties, growing boys of the priests were employed (Schürer, p. 279). In addition, we hear (*Sukka* iv. 4; *Tamid* v. 3) of 'attendants' (חַזָּנִים), without its being clear whether they were Levites (so Büchler, *Priester*, p. 149 ff.) or non-Levites that were thus employed. In any case the only class of Levites that could enter into consideration would be the doorkeepers, for the singers were doubtless regarded as holding too dignified a position to have such a name applied to them.

Shortly before the destruction of the temple, the *singers* succeeded in obtaining from Agrippa II. and the Sanhedrin permission to wear the 'linen' garment of the priests (Jos. *Ant.* XX. ix. 6). The desire to do this was not new; according to 1 Ch 15^{27}, 2 Ch 5^{12}, in the time of David and Solomon not only the singers but the Levites in general wore the priestly *byssus* robe—a statement which shows merely that at the time of the Chronicler this practice was an object of desire. Agrippa II. not only granted the desire of the singers, but allowed a portion of the Levites, by whom only *doorkeepers* can be meant, to learn the singing of hymns (Jos. *l.c.*), *i.e.* to hold an equal place with the division of singers.

It is to the Levites apparently that we should refer the designation οἱ γραμματεῖς τοῦ ἱεροῦ, 'the teachers of the law of the temple,' which occurs in the letter of Antiochus the Great, *ap.* Jos. *Ant.* XII. iii. 3. As these γραμματεῖς are named between the ἱερεῖς and the ἱεροψάλται, they can hardly be other than Levites (Sam. Krauss, p. 675). The mention of them tallies with what we learn from Neh 8^{7-9} about the instruction in the Torah which was given by the Levites.

b. *The revenues of the priests and Levites.*—The dues demanded for the priests by the Priests' Code were augmented by that imposed by Deuteronomy upon sheep's wool (*Chullin* xi. 1, 2). By combining the requirements of Dt with those of the Priests' Code, the income of the priests was further augmented, inasmuch as those portions of the sacrificial victims which, according to Dt, fell to the priests, had at a later period to be paid to them from all animals that might legitimately be offered in sacrifice, even when these were slaughtered for a common use, namely the foreleg, the cheek, and the maw of cattle, sheep, and goats (*Chullin* x. 1; cf. Schürer, p. 255). The *bikkûrîm* were more specifically defined as having to be paid from seven sources, adopted from Dt 8^8, namely wheat, barley, grapes, figs, pomegranates, olives, and honey. According as the parties concerned resided near to or far from Jerusalem the *bikkûrîm* were to be handed over fresh or dried, and were to be brought in general processions to Jerusalem (Schürer, p. 249). A distinction, based on Neh 12^{44}, was made between the *bikkûrîm* and the *tĕrûmāh* in the narrower sense, *i.e.* the due levied on the best not only of the above seven kinds but on all fruits of field and tree. There was no fixed measure prescribed for these dues, but on an average they were to amount to $\frac{1}{50}$th of one's income. This *tĕrûmāh* was to be eaten, according to Nu 18^{12}, by priests alone (Schürer, p. 249 f.). The due to be presented of dough was also more specifically defined, as well as the products of the ground which had to be regarded as tithable (Schürer, p. 250 ff.).

According to the Mishna (*Menaḥoth* x. 4), a portion of the firstling sheaf that was waved by the priest before Jahweh (Lv $23^{10f.}$) falls to the priest—an arrangement of which there is no indication in the OT. According to Josephus (*Ant.* IV. iv. 4), the redemption price for the vow of one's own person is considered to belong to the priests, whereas in the Priests' Code (Lv 27) this is not expressly said, as it is in the case of the *ḥêrem*. Perhaps the statement of Josephus is inexact; as a rule, at least the things vowed appear to have been used for general cultus purposes (Schürer, 256 f.).

In one point the practice of later times took a turn less favourable to the temple-servants than the Priests' Code had intended. Not only the so-called second tenth, *i.e.* the one which, upon the ground of the tithe regulations in Dt was levied besides the tithe of the Levites, but also the tithe of cattle, are required by the Rabbinical rules to be devoted to sacrificial meals at Jerusalem. The latter thus did not fall, as is unquestionably the intention of the Priests' Code, to the Levites and priests (Schürer, p. 251 f., note 22).

Those dues of the priests which did not consist of portions of the offerings, and which were not therefore necessarily brought to Jerusalem, were paid 'everywhere where there was a priest,' *i.e.* on the spot to any priest who happened to be present, and this was enjoined to be continued even after the destruction of the temple (Schürer, p. 257).

c. *The duties and offices of the priests.*—The enactments concerning the priests were in later times simply made more precise, upon the basis of the Priests' Code; for instance, the *laws about their marriage* (Schürer, p. 227 f.), and *the requirements of freedom from bodily blemish* (*ib.* p. 230 f.). It would appear that in later times it was, not indeed a law but a custom that the principal priests married only the daughters of priests (Büchler, *Priester*, p. 88 ff.). A particular *age for admittance* to the priestly service was no more fixed in the period following the OT than is done by the Priests' Code in the case of the Aaronites; but, as a matter of practice, those admitted required apparently to have passed their twentieth year (Schürer, p. 231).

Among the priestly duties, *the blowing of trumpets* takes a wider scope than in the Priests' Code or the statements of the Chronicler, according to which this ceremony was practised only in war and at the regular festivals and on special festive occasions. In later times it took place also in connexion with the sabbatical and daily offerings (Jos. *Ant.* III. xii. 6), and to announce the beginning of the Sabbath from the battlements of the temple (*BJ* IV. ix. 12; cf. Schürer, p. 278 f.). In addition to the *washing*, required in the Priests' Code, of hands and feet in the brazen laver before performing the sacred office (on the mode of performing this washing see Büchler, *Priester*, p. 74, note 1), the priests had in later times to take a plunge-bath every morning before commencing the work of the day (Schürer, p. 283). In the last days of the temple it would appear that the higher ranks of priests took no part in the work of sacrifice, with the exception of the offerings presented by the high priest on the feast days, as this non-participation in sacrificial work is to all appearance to be assumed in the case of the priest Flavius Josephus (Büchler, *Priester*, p. 70 ff.).

The 24 *divisions of priests*, of which we know as early as Chronicles, served for the performance of the cultus to which they attended in turn. The 24 divisions are distinguished, in the literature posterior to the OT, as the *mishmārôth*, from the subdivisions not mentioned in the OT, the *bāttê 'ābôth*. Each principal division included, according to tradition, from five to nine subdivisions (Schürer, p. 235 f.). A principal division is called in Greek πατριά (Jos. *Ant.* VII. xiv. 7), or ἐφημερία (Lk $1^{5.8}$), or ἐφημερίς (Jos. *Vita*, 1); a subdivision, φυλή (Jos. *Vita*, 1). Each of the 24 divisions went on duty for a week, the exchange with the next division taking place on the Sabbath. At the three great annual festivals all the 24 divisions officiated simultaneously (Schürer, p. 279 f.)

The position of the *high priest* underwent a change towards the close of the Jewish hierarchy through respect being no longer paid to the office as one that was to be held for life and to be hereditary. The elevation of the Hasmonæans to the high-priestly dignity had already marked a breaking with the past, for thereby the hereditary succession of high priests was interrupted. The Hasmonæans sprang from the priestly class of Joiarib (1 Mac 2^{1} 14^{29}). Whether the latter was reckoned to the Zadokites or not, cannot be determined. In the lists contained in the Book of Nehemiah ($12^{1-7.\ 12-21}$) it holds a subordinate position; a list, perhaps not earlier than the time of the Hasmonæans (cf. above, § 9), found in 1 Ch $24^{7\text{ff.}}$, assigns to it the first place. In one of the recently discovered fragments of the Hebrew original text of Jesus Sirach, namely $51^{12c(9)}$, the house of Zadok is highly exalted: 'O give thanks unto Him that chose the sons of Zadok to be priests' (S. Schechter and C. Taylor, *The Wisdom of Ben Sira, Portions of the Book Ecclesiasticus*, Cambridge, 1899). The whole hymn to which this passage belongs, namely vv.$^{12c(1)-12c(15)}$, is omitted in the Greek translation of the grandson of Jesus Ben Sira, perhaps as Schechter (p. 35 f.) suggests (cf. Th. Nöldeke, *ZATW*, 1900, p. 92), because in the interval between the composition of the original text and that of the translation (*i.e.* between *c.* 200 and 130 B.C.) the family of the previous Zadokite high priests had been superseded by the Hasmonæans. But after this latter event the high priesthood again became hereditary in the Hasmonæan line. At a later period Herod and the Romans set up and deposed high priests at their pleasure. From these non-acting high priests arose the group known as ἀρχιερεῖς. But the custom was always rigidly adhered to of selecting the high priests only from certain special priestly families (Schürer, p. 215 ff.). The anointing of the high priest, which is ordained in the Priests' Code, was not in later times carried out in the case of all high priests, perhaps it was in general omitted; the Mishna knows of high priests who were installed in office simply by clothing them with the official robes (*Horajoth*, iii. 4; cf. *Gesch.* p. 140; Schürer, p. 232, note 26; Weinel, *ZATW*, 1898, p. 66 f.; Van Hoonacker, *Sacerdoce*, etc. p. 351 f.). The high priest, who, during the period of Jewish independence, was the head also of the State, was at least in later times president of the Sanhedrin, and in so far also the representative of the people in political matters in dealing with the Romans. As regards his participation in the performance of the cultus, it was a later custom for him to offer the daily offering during the week preceding the Day of Atonement; any other share he might take in the work of sacrifice was simply according to his pleasure (*Joma* i. 2). Josephus states that the high priest offered as a rule on the Sabbath, at the new moon, and at the yearly festivals (*BJ* V. v. 7; Büchler, *Priester*, p. 68 ff., doubts whether in later times the high priest offered except at the yearly festivals). The daily *minḥāh*, which according to the original intention of Lv $6^{12\text{ff.}}$ he had to offer (see above, § 8 c), was not always offered by the high priest in person, but he defrayed the cost of it (Jos. *Ant.* III. x. 7, where ἱερεύς can be none but the high priest), a duty which Ezekiel imposed upon the 'prince.' In the Roman period a conflict arose on the question of the keeping of the high priest's robes (Jos. *Ant.* XV. xi. 4, XVIII. iv. 3, XX. i. 1, 2); when Jerusalem was taken, his robe of state fell into the hands of the Romans (*BJ* VI. viii. 3).

Besides the high-priestly office, we hear in the Rabbinical literature of an exalted priestly office, that of the *ṣĕgan* (סָגָן), of which there is no mention in the OT. The *ṣĕgan* has usually been viewed as the high priest's substitute, who had to take his place if he was prevented by Levitical uncleanness from discharging the duties of his office. But the existence of a standing *vicarius* for the high priest is rendered improbable by the statement of the Mishna (*Joma* i. 1) that seven days before the Day of Atonement 'another priest' was to be set apart to act for the high priest in the event of his being prevented from officiating. It is not at all likely that this statement in the Mishna relates to an earlier practice, and that afterwards (subsequent to the year A.D. 63) the *ṣĕgan* was appointed as substitute for the high priest (Büchler, *Priester*, p. 113), for there is nothing known of such a change. Since the LXX usually reproduces the word *ṣĕgānîm*, which is used in the OT for non-priestly officials, by στρατηγοί, Schürer (p. 264 f.) is probably right in seeing in the *ṣĕgan* the captain of the temple (στρατηγὸς τοῦ ἱεροῦ), who is repeatedly mentioned in the NT and by Josephus, and in attributing to him the principal oversight of the external order of the temple. Yet *Joma* 39^{a} (Büchler, *Priester*, p. 105) looks upon the *ṣĕgan* as in some measure the representative of the high priest. The *ṣĕgānîm* in the plural (*Bikkurim* iii. 3) are doubtless, like the στρατηγοί (Lk $22^{4.\ 52}$), heads of the temple police subordinate to the *ṣĕgan*. In the Mishna (*Bikkurim* iii. 3) there are mentioned as going to meet the festive procession which accompanied the *bikkûrîm*—the *paḥôth* (פחות), the *ṣĕgānîm*, and the *gizbārîm*. It may be inferred that by the first of these designations, as by the two following, priests are intended, although *paḥôth* is used also for secular governors. But a special priestly office can hardly be connoted by the word, which apparently corresponds to the NT ἀρχιερεῖς (Schürer, p. 266). The *gizbārîm* (גִּזְבָּרִים, *Peah* i. 6 *end*) or γαζοφύλακες (Jos. *Ant.* XV. xi. 4, XVIII. iv. 3) had charge of the rich temple treasures. From the description of the Chronicler, it appears necessary to hold that in his time the administration of the temple revenue and capital was in the hands of the Levites. At a later period the higher posts as treasurers appear to have been held by priests, for the *gizbārîm* appear as high temple officials alongside of the *ṣĕgānîm* (*Bikkurim* iii. 3), and Josephus (*Ant.* XX. viii. 11) names the γαζοφύλαξ, *i.e.* probably the head of the treasurers, immediately after the high priest. It is possible that the Chronicler, in his account of the management of the temple treasury, has, in his preference for the Levites, arbitrarily put these in the foreground (but cf. Ex 38^{21}). But, seeing that in the matter of other duties and rights the Levites were in point of fact displaced in later times by the priests, the same may have happened with the holding of treasury offices. Under Nehemiah (Neh 13^{13} M) a priest was at the head of the treasurers (*i.e.* those who were set over the *'ôẓārôth*, 'storehouses'), among whom only one is stated to have been a Levite. Sam. Krauss (p. 673 f.) doubts, however, whether the *gizbārîm* were priests, they being, as far as is known to the present writer, nowhere directly called such. To the treasury officials probably belonged also the *'ămarkĕlîn* (אמרכלין), who, without a more particular definition of the term, are mentioned in the Mishna only once, along with the *gizbārîm* (*Sheḳalim* v. 2), and are named also in later literature, as a rule, together with the *gizbārîm* (Schürer, p. 270 f.). Sam. Krauss (p. 673) holds the *'ămarkĕlîn* also to have been laymen, drawing this inference from the Midrash *Wajikra Rabba* (Par. v. ch. v. 3; in A. Wünsche's *Bibliotheca Rabbinica*, Liefer. 26, 1884, p. 36), according to which the *'ămarkōl* had a right to partake of the holy things, but not, like the high priest, of the offerings. But Schürer (p. 270) is probably right in referring to *Tosefta Horajoth*, *end* (*Tosefta*, ed. by M. S. Zuckermandel, 1880, p. 476, *bottom*), where in a graduated list the *'ămarkōl* and the *gizbār* are above the ordinary priest, the latter is above the Levite, and this last again above the Israelite, *i.e.* the layman (cf. also Graetz, *Monatsschrift*, 1885, p. 194). It is correct, however, that the official name *'ămarkōl* is used to designate the office not only of priest, but of administrator in general (Büchler, *Priester*, p. 100 ff.; Schürer, p. 270). According to Büchler (p. 90 ff.), there were, in addition to the regular priestly *gizbārîm* and *'ămarkĕlîn*, others who were selected from the successive divisions of officiating priests; but no express testimony is known of the use of these two names for heads of these divisions.—Only in the Jerusalem Talmud is the office of the *ḳatoliḳin* (קתוליקין, καθολικοί) named (Schürer, p. 271).

The cultus was, according to the Law, to be performed by all priests; but in course of time the different functions became so complicated and in part difficult, that, according to the Mishna, they were apportioned among different priestly officials, and certain duties, such as that of preparing the shewbread and the incense, became hereditary in particular families (Schürer, p. 275 ff.).

In addition to their service in the temple, the priests are known to Josephus as administrators of the most important concerns of the community, under the presidency of the high priest (*c. Apion.* ii. 21). He has in view primarily Jerusalem. But in all cities there were, according to him (*Ant.* IV. viii. 14), as Moses had enjoined, men of the tribe of Levi appointed, two for each court of seven, to assist the members as ὑπηρέται. Such an enactment is not found in the Pentateuch; Josephus must then have in view arrangements existing in his own time in Judæa under the Romans (differently Van Hoonacker, *Sacerdoce*, etc. p. 45 f.). From the designation ὑπηρέται it is more likely that these two assessors were Levites (Schürer, p. 178) than that priests are meant (Büchler, *Priester*, p. 180). According to the Mishna (*Sanhedrin* i. 3), priests are in certain instances to be called in as judges (cf. Jos. *c. Apion.* ii. 21). This judicial activity of the priests, perhaps also of the Levites, is a continuation of the corresponding duties assigned to the priests in Deuteronomy and Ezekiel, and to the priests and Levites in Chronicles. In the last resort this species of activity on the part of the *personnel* of the sanctuary goes back to the practice, with which we make acquaintance in the Book of the Covenant, of having certain lawsuits decided at the sanctuary, by means of the oracle of the Deity communicated by the priests.

LITERATURE.—Jn. Lightfoot, *Ministerium Templi quale erat tempore nostri Salvatoris descriptum ex scriptura et antiquissimis Judæorum monumentis* (Opera, Roterodami, 1686, vol. i. pp. 671-758); Joh. WOLF BAUDISSIN.

PRIEST IN NT.—1. The word 'priest' (ἱερεύς) is used in the NT of the sacrificing ministers of any religion. The priest of Zeus is mentioned in Ac 14^{13}, the priest of the true God in Mt 8^{4}. References, indeed, are numerous in the NT, especially in the Gospels, to the priests of the OT. In Lk $1^{5.8}$ allusion is made to the twenty-four ἐφημερίαι into which they were divided, and to the assignment of certain of their duties by lot. The NT throws little light, however, on the standing of the priests generally, or on the service they rendered to the nation. The Gospels speak almost exclusively of those whom they call the ἀρχιερεῖς, or chief priests. The high priest was chosen, as a rule, from one of a small number of priestly families, and, when the office ceased to be held for life, there might be a number of persons entitled by courtesy to the name. An ex-high priest, if a man of unusual force of character, might actually exercise a greater influence in the direction of ecclesiastical or political affairs than the proper holder of the office, and either overshadow the latter in the common mind, or practically share his distinction. It is thus we must explain such expressions as Lk 3^{2} ἐπὶ ἀρχιερέως Ἄννα καὶ Καϊάφα = ‘in the high priesthood of Annas and Caiaphas,’ and the part taken by Annas (while Caiaphas was titular high priest) in the trial of Jesus (Jn 18^{13}). So also in Ac 4^{6} the dignity of the high priesthood is reflected on if not extended to all the members of the γένος ἀρχιερατικόν; there was a kind of aristocracy among the priests, and it was from it that the high priest proper was chosen. Though the ἀρχιερεῖς made common cause with the Pharisees in their hostility to Christianity, they were themselves on the Sadducæan side (Ac 5^{17}), and the most determined opposition to the preaching of the resurrection came from them. Probably the inferior members of the priestly order, who had but a nominal share in its prerogatives, were more free from its prejudices; it would be among them that the great multitude of priests was found which ‘became obedient to the faith’ (Ac 6^{7}). On the whole subject of the Jewish priests in NT times, see Schürer, *GJV*³ ii. 214–305 [*HJP* II. i. 195–305], and the preceding article, esp. § 10c.

2. A more important subject is that which is suggested by the use of the word ‘priest’ in the interpretation of the *Christian* religion. In the NT it is only in the Epistle to the Hebrews that Jesus is spoken of as ἱερεύς, μέγας ἱερεύς, and ἀρχιερεύς—terms which are not to be distinguished from each other, the last two only signifying Christ’s eminence in the priestly character. In the highest sense of the term, so to speak, He is a priest. But what is a priest? In the Ep. to the Hebrews, it may be said, the priest is the person through whom and through whose ministry people draw near to God, through whom they are ‘sanctified’; that is, made a people of God, and enabled to worship. The writer does not think of such a thing as a religion without a priest. Men are sinful men, and without mediation of some kind they cannot draw near to God at all. The people of God had mediators under the OT, and they have a mediator under the NT. It is on the character of the mediator that the character of the religion depends. If he is imperfect the religion will be imperfect; there will be no real or permanent access to God, no real liberation of the conscience. But if he is what he should be, then the perfect, and therefore the final, religion has come. The conscience will be effectually purged, sin as a barrier between God and man will be effectually removed, the way into the holiest of all will be opened, and the covenant realized in the abiding fellowship of God and His people. It is from this point of view that the writer works out the contrast between the OT and the NT. The Jewish religion was a true one, for God had given it; but it was not *the* true and therefore not the final one, for its priesthood was imperfect. Everything about it was imperfect. The priests themselves were imperfect. They were mortal men, and could not continue because of death. They were sinful men, too, and had to offer for their own sins before they could offer for those of the people. The sanctuary was imperfect, a ἅγιον κοσμικόν, not the real dwelling-place of God. The sacrifices were imperfect; the blood of bulls and goats and other animals, whatever its virtue, could not make the worshippers perfect touching the conscience; that is, could not bring them to the desired goal of a fearless peace toward God. The very repetition of the sacrifices showed that the work of removing sin had not really and once for all been achieved. And, finally, the access to God was imperfect. The priests had no access at all into the Holiest Place, and when the high priest did enter on one day in the year it was no abiding entrance; the communion of the people with God, which his presence there symbolized, was lost, it might be said, as soon as won; he came out from the shrine and the veil closed behind him, ‘the Holy Ghost this signifying, that the way into the holiest of all had not yet been made manifest.’ Everything in the old religion had imperfection written upon it—the imperfection involved in the nature of its priests (οὐδὲν γὰρ ἐτελείωσεν ὁ νόμος, He 7^{19}).

It is in contrast with this that Christ’s priesthood is set forth. Christianity is the perfect and final religion, because Christ is the perfect priest. An OT foundation for this doctrine is found in Ps 110^{4}, where the Messiah is addressed by God as ‘a priest for ever, after the order of Melchizedek.’ Perhaps one should call it rather a point of attachment than a foundation, for though it probably served the writer’s purpose in arresting the attention of his readers, the ideas which he connects with the priesthood of Christ are not, strictly speaking, derived from it. The order of Melchizedek is contrasted with that of Aaron: the two orders exclude each other. Christ is not a priest after the order of Aaron upon earth, and afterwards, in heaven, a priest after the order of Melchizedek: being what He is, the Son of God, in the sense understood in this Epistle, His priesthood can be of the Melchizedek order alone. In Him and through His ministry a fellowship with God has been realized on the behalf of men which is perfect and which abides. The word which is used to express this in the Epistle is αἰώνιος. Inasmuch as He is the true priest, Christ’s blood is the blood of an *eternal* covenant, He offered Himself through *eternal* spirit, He has become the author of *eternal* salvation, has obtained *eternal* redemption, and enables men to get hold of the *eternal* inheritance (5^{9} $9^{12.14.15}$ 13^{20}). All these are ways of indicating the perfection and finality of His priesthood, *i.e.* of His function to mediate between the holy God and sinful men, and to realize in Himself, and enable sinful men to realize, a complete and abiding fellowship with God.

Among the aspects or constituents of Christ’s priesthood on which the writer lays emphasis are these. (1) His *commission*, He 5^{4}. God must appoint the priest, for he is to be the minister of His grace. No man can take this honour to himself. The writer seems to find the Divine commission in the psalms quoted in He $5^{5f.}$ (Ps 2^{7} 110^{4}), but he connects these immediately in v.$^{7f.}$ with what seems to be a reference to the agony in Gethsemane, as though it were there, historically, that Jesus received this high and hard calling. (2) His *preparation*. This is a point on which great stress is put. To be a merciful and trustworthy high priest (2^{17}), it is necessary that he should be to the utmost possible extent one with those whom he represents before God. Hence he becomes like them a partaker of flesh and blood (2^{14}), is tempted in all points like us (4^{15}), learns obedience by the things which he suffers (5^{8}), knows what it is to worship with others and to wait upon God ($2^{12f.}$), and at last to taste death. Sin apart (4^{15}), nothing human is alien to him; in virtue of his nature and his experience he can sympathize with us; through suffering, especially, he has been made 'perfect,' *i.e.* been made all that he ought to be as a 'captain of salvation,' or a priest to stand before God for sinful men, able truly to enter into their case. On the word 'perfect' (*τελειῶσαι*) see Davidson, *Hebrews*, p. 207 f. (3) His *offering*. Every priest is appointed to offer gifts and sacrifices (8^{3}) for sins (5^{1}), and this one also must have something to offer. What is it? In a word, it is himself. This is more easily said than interpreted. There is a passage in the Epistle (10^{4-9}) in which, following Ps 40^{7-9}, what Christ did is contrasted with 'sacrifices and offerings and whole burnt-offerings and sin-offerings,' as 'doing the will of God'; and it is said that Scripture puts away the first to establish the second. From this it is often inferred that Christ's work was not sacrificial, and especially that His death is not to be conceived as an offering for sin; sacrifice, it is said, is abolished to make room for obedience. But this is certainly not the contrast in the writer's mind. The conception of offering or sacrifice is essential to him, and to Christ as priest. This priest, like every other, *must* have somewhat to offer. Indeed, immediately after the remark that He puts away the first (the OT sacrifices) to establish the second (the doing of God's will), he adds, 'in which will we have been sanctified *through the offering of the body of Jesus Christ once for all.*' What He opposes is not sacrifice and obedience *simpliciter*, but the OT sacrifices, in which the victims were involuntary, and the offering therefore morally imperfect, not to say meaningless, and Christ's willing sacrifice of Himself, which was an act of obedience to the Father. As a voluntary act of obedience this sacrifice had a significance and a moral worth which no animal sacrifice could have. But the obedience involved in it was not simply the obedience required of man as such; it was the obedience required of the Son whom the Father had commissioned to be the mediator of a new covenant, the restorer of fellowship between Himself and sinful men; in other words, it was *the obedience of a priest*, who had '*to annul sin by the sacrifice of himself*' (9^{27}), to be '*offered once for all to bear the sins of many*' (9^{28}), to enter into the sanctuary '*through his own blood*' (9^{12}), '*by one offering* to perfect for ever them that are being sanctified' (10^{14}). In short, it is not sacrifice and obedience that are blankly contrasted here, but unintelligent will-less animal sacrifice, and the sacrificial obedience of the Priest who willingly dies to make purgation of sins (1^{3}). As the perfect priest Christ made once for all the perfect sacrifice for sin; that is why the Levitical sacrifices have passed away. (4) The *scene of His ministry*, or the *sanctuary*. The true offering is made in the true sanctuary, *i.e.* heaven. It is there that Christ appears in the presence of God for us. It is there, in His person, that there is realized the abiding fellowship of God and man into which the gospel calls us. But this does not mean that what has been spoken of under the head of His offering, namely His death, is not included in His priestly work. To break the work of the perfect priest into pieces in this way is foreign to the writer's mode of thought. The priest's work, his offering, is not consummated till he enters with it (and by means of it) into God's presence; it is then that he is in the full sense a priest. Hence Christ is conceived as exercising His priestly function in the sanctuary above; but He could not be priest there except in virtue of the commission, the preparation, and the offering, which have just been described. All these therefore *belong* to the conception of the priesthood as much as what is done in the heavenly sanctuary itself. (5) His *intercession*. He is able to save to the uttermost those who draw near to God through Him, seeing He ever liveth to make intercession for them. In what the intercession consists is nowhere explained. The writer to the Hebrews does not define it as the perpetuating, or making prevalent for all time, of an atoning work achieved on earth; he does not conceive of the atoning work as achieved at all except through the entrance of the priest into the presence of God *διὰ τοῦ ἰδίου αἵματος*. On the other hand, it seems to be less than what he means, if we say that His mere appearing in God's presence, even with the virtue of His sin-annulling work in Him, is itself the intercession—a continuous and prevailing plea with God to receive even those who have sinned into fellowship with Himself, and not to let sin annul His covenant. It is a fair inference from 4^{16} (that we may find grace *for timely succour*), taken in connexion with what precedes, that the intercession of the great High Priest is not a continuous unvarying representation of man before God, but relates itself sympathetically to the variously emergent necessities and crises of individual life. (6) The *result* of Christ's priesthood. The result is, in a word, the establishment of the new covenant between God and man. In Christ, and on the basis of His work, God is our God again, and we are His people. Because Christ is all that a priest should be, the new relation of God and man realized in Him is all that such a relation should be; Christianity is a new, but also the final, because the perfect religion. There are various ways in which this is expressed in detail. Those who have the perfect priest are freed from the fear of death (2^{15}); can come with boldness to God's throne and find it a throne of grace (4^{16}); have a hope of immortality that nothing can shake, knowing as they do that Jesus has entered within the veil as their forerunner (6^{20}); have an assurance, in the indissoluble life of Christ (7^{16}), in the priesthood which as founded on it never passes to another or can never be trenched upon by another (7^{24}), and in the intercession of their deathless representative, that complete salvation awaits them; in their worship are made perfect as touching the conscience, *i.e.* completely delivered from sin as that which hinders access to God (9^{9-14}). And as the blessings of the covenant are infinite, so the deliberate and wilful rejection of them, and the relapse from the fellowship with God assured in Christ to any inferior religious standpoint ($6^{4ff.}$ $10^{26ff.}$), is the unpardonable sin.

3. The Epistle to the Hebrews does not attribute to believers as priests any of the special functions involved in the unique priesthood of Christ. In Ex 19^{6} Israel is spoken of as מַמְלֶכֶת כֹּהֲנִים, *i.e.* God's people are His kingdom, and they are priests, with the right of access to Him. As the NT point of view is that there is only one people of God through all time, this conception is found in the NT also: see especially Rev 1^{6} 5^{10} 20^{6}, 1 P $2^{5.9}$ (*ἱεράτευμα ἅγιον, βασίλειον: βασιλείαν, ἱερεῖς τῷ θεῷ καὶ πατρὶ αὐτοῦ*). In substance, the same thing is meant when we read in Hebrews of the right to 'draw near with boldness,' or in Eph 2^{17} that through Christ all Christians alike have 'their access (*τὴν προσαγωγήν*: the characteristic privilege of the new religion, Ro 5^{2}, 1 P 3^{18}) in one spirit to the Father.' To the Father: for in experience the

sonship of believers and their priesthood are one and the same thing. Sonship and priesthood are two figures under which we can represent the characteristic relation of man to God, his characteristic standing toward God, in the new religion instituted by Christ. Formally distinguishable, they are really and experimentally the same. Christ Himself was perfect priest only because He was true Son of God; His priesthood, though it was His vocation, was grounded in His nature: it had nothing official in it, but was throughout personal and real. So it is with the priesthood of believers: it also is involved in sonship, is one element or function of sonship, and only as such has it any meaning. The writer to the Hebrews speaks of Christians as offering to God sacrifices of praise, the fruit of lips making confession to His name. He bids them remember beneficence and charity, for with such sacrifices God is well pleased. So St. Peter says Christians are a holy priesthood to offer spiritual sacrifices, acceptable to God through Jesus Christ (1 P 2^{5}); and St. Paul bids the Romans present their bodies a living sacrifice, holy, acceptable to God, which is the rational worship required of them (Ro 12^{1}). Praise, self-consecration, charity,—if we include Rev 8^{3}, we may add, after the analogy of Ps 141^{2}, prayer,—these are the only sacrifices which the priestly people of God may offer now. There is no such thing in the NT as a sacrifice for sin except the sacrifice which Christ offered once for all.

4. The NT does not apply the word *ἱερεύς* to any Christian minister, nor indeed to any Christian at all, except so far as the people of God are spoken of as a 'royal priesthood.' It is easy to see why. Christianity is what it is—a perfect and abiding fellowship with God—because it is realized in the Eternal Son of God. It cannot be realized or guaranteed in any other. He is the Mediator of it, to whom it owes its character. To introduce into it, no matter how we define their relation to Him, *official* mediators, is to relapse from the Melchizedek priesthood to the Aaronic; it is in principle to apostatize from Christianity. The pictorial use of language borrowed from the old religion is, of course, intelligible enough. St. Paul, *e.g.*, can speak of himself as *ἱερουργῶν τὸ εὐαγγέλιον τοῦ θεοῦ*, discharging a sacred function toward the gospel, and presenting the Gentiles as an offering to God (Ro 15^{16}; cf. Ph 2^{17}). But there is not, as in the nature of the case there could not be, any trace in the NT of a Christian priest making sacrifice for sin, and mediating again (in the Aaronic, official, mortal, never perfect, and never to be perfected fashion) between God and man.

LITERATURE.—Schürer, as above; the books on NT theology, Weiss, Pfleiderer, Beyschlag, Holtzmann; the commentaries on Hebrews, esp. the extended notes in Davidson; Bruce, *Ep. to the Hebrews*, and art. HEBREWS in this Dictionary; Milligan, *Ascension and Heavenly Priesthood*; Westcott, *Hebrews*; also *Priesthood and Sacrifice* (Report of Conference at Oxford), edited by W. Sanday, 1900. J. DENNEY.

PRINCE is the AV tr. of no fewer than 16 Hebrew or Hebraized terms in OT and 3 Greek ones in NT.

1. נָשִׂיא, lit. 'exalted one' from נָשָׂא 'lift up.' This word is practically confined (the only exceptions are Ex $22^{27\,(28)}$ [J or E], 1 K 8^{1} 11^{34} [both R^{P}], and Pr 25^{15}) to the writings of P, the Chronicler, and Ezekiel. It is used in Gn 17^{20} (LXX *ἔθνη* 'nations') 25^{16} (*ἄρχοντες*) of the twelve 'princes' descended from Ishmael; in 23^{6} it is put by P in the mouth of the 'children of Heth' as a designation of Abraham (LXX *βασιλεύς*); in 34^{2} it is applied to Shechem the son of Hamor (*ἄρχων*; so, or *ἄρχοντες*, in the LXX of all the following passages, unless otherwise noted); in Nu 25^{18} of a prince of Midian; in Jos 13^{21} of the princes of Sihon. It is especially frequent for the heads of the Isr. tribes: Ex 16^{22} 34^{31}, Lv 4^{22} (AV and RV in these three passages 'rulers'), Nu 2^{3} $7^{2\text{ff.}}$ 31^{13} etc., Jos $9^{15.\,18.\,19.\,21}$ 17^{4} $22^{14.\,30.\,32}$, so also 1 Ch 2^{10} 4^{38} 5^{6} 7^{40} etc., cf. Ex 22^{27} $^{(28)}$ ('Thou shalt not revile God nor curse a ruler of thy people'), and 1 K 8^{1} (A *ἐπησμένοι*, prob. error for *ἐπηρμένος*, Aq.'s tr. of נָשִׂיא in Ex 22^{28}; B om.) = 2 Ch 5^{2} (*ἄρχοντες*), where the princes of the fathers' houses of the children of Israel were assembled by Solomon. In 1 K 11^{34} the term *nāsî'* is used of Solomon himself ('I will make him prince,' נָשִׂיא אֲשִׁיתֶנּוּ, LXX *ἀντιτασσόμενος ἀντιτάξομαι*), and in Ezr 1^{8} the Chronicler applies it to Sheshbazzar. In Ezk not only is it used of the king of Judah ($12^{10.\,12}$ 21^{30} $^{[\text{Eng. }25]}$ [*ἀφηγούμενος*]), and of Isr. and foreign princes (7^{27} 21^{17} $^{[\text{Eng. }12]}$ [*ἀφηγούμενοι*] 26^{16} 30^{13} 32^{29} etc.), but *han-nāsî'* is the special designation of the head of the future ideal State (34^{24} 37^{25} [both *ὁ ἄρχων*] 44^{3} [*ὁ ἡγούμενος*] $45^{7.\,16.\,17.\,22}$ $46^{2.\,4.\,8.\,10.\,12.\,16.\,17.\,18}$ $48^{21.\,22}$ [all *ὁ ἀφηγούμενος*]). For the later Talmudic use of *nāsî'* as the technical title for the president of the Sanhedrin see art. SANHEDRIN; Kuenen, *Gesamm. Abhandl.* [Budde's tr.] p. 58 f.; Schürer, *HJP* II. i. 180 ff.; Weber, *Jüd. Theologie*, p. 140. The title *nāsî'* was also assumed by Simeon bar-Cochba (the leader of the Jewish revolt A.D. 132), whose coins are stamped 'Simeon *nāsî'* of Israel' (see art. MONEY in vol. iii. p. 430^{b}, and Schürer, *HJP* I. ii. 299).

2. שַׂר occurs with extreme frequency. The verbal form שׂרר is found 4 times in Qal (Jg 9^{22}, Is 32^{1}, Pr 8^{16}, Est 1^{22}), twice in Hithp. (Nu $16^{13\ \textit{bis}}$), and once in Hiph. (Hos 8^{4}). In Jg 9^{22} and Hos 8^{4} it is pointed in MT as if from שׂוּר, but see König, i. 328, 352. It is uncertain whether this is the primitive root = 'have power,' 'exercise rule,' or whether it is a denominative from שַׂר. Amongst other applications, שַׂר [in the following passages reproduced in LXX, unless otherwise noted, by *ἄρχων*] is used of officers or rulers whether military Ex 18^{21} (AV and RV 'rulers'), Nu 21^{18}, Is 21^{5}, 2 Ch 32^{21} ‖ נָגִיד (AV and RV 'captains'), or civil 1 Ch 27^{31} (*προστάται*, AV and RV 'rulers'), cf. 29^{6} etc., particularly of royal officials Gn 12^{15}, 2 K 24^{12}, Hos 3^{4}, Ezr 8^{25}; of the chiefs of foreign nations Jg 7^{25} 8^{3} (Midian), 1 S 18^{30} (Philistines); of leaders in war 1 S 22^{2} (*ἡγούμενοι*, AV and RV 'captains'), cf. 2 S 24^{4} and Neh 2^{9} (*ἀρχηγοί*); of the 'ruler of the city' Jg 9^{30}, cf. 1 K 22^{26} (*βασιλεύς*, AV and RV 'governor'), Neh 7^{2}; of the chief of the eunuchs Dn $1^{7\text{f.}\,9\text{ff.}}$ (*ἀρχιευνοῦχος*); the chief of the butlers or bakers Gn $40^{2.\,20}$ (*ἀρχιοινοχόος, ἀρχισιτοποιός*), etc.; the head of the priestly or Levitical classes Ezr 8^{29} 10^{5}, 1 Ch $15^{16.\,22}$ etc.; the directors of the post-exilic community Neh 4^{10}, cf. Ezr 9^{1} 10^{14}, Neh 11^{1}. With the sense of 'prince' proper, שַׂר is mainly post-exilic, Est 1^{14}, Job 29^{9} (*ἁδροί*) ‖ נְגִידִים, Ps $119^{23.\,161}$; of the Messiah, 'the prince of peace' Is 9^{6} (A *ἄρχων εἰρήνης*, B follows a different text); of the guardian angels of the nations Dn $10^{13.\,20.\,21}$ 12^{1} (Theod. in all *ἄρχων*, LXX in first three *στρατηγός*, in last *ἄγγελος*); of God Dn 8^{11} ('prince of the host,' *ἀρχιστράτηγος*) ^{25} ('prince of princes,' LXX follows a different text).

The noun '**princess**' in EV always represents שָׂרָה (cf. the proper name SARAH). Its only two occurrences in AV are 1 K 11^{3} (of the seven hundred wives of Solomon; LXX *ἄρχουσαι*), La 1^{1} (of Jerusalem 'princess among the provinces'; LXX *ἄρχουσα*). To these RV adds Est 1^{18} (AV 'ladies,' LXX *τυραννίδες*). There are only two other occurrences of שׂרה in the Hebrew Bible. The one is Jg 5^{29} חַכְמוֹת שָׂרוֹתֶיהָ (AV and RV 'her wise ladies,' Moore [cf. his note on the text], 'the sagest of her princesses'; LXX *ἄρχουσαι*); the other is Is 49^{23} (AV and RV 'queens,' AVm 'princesses'; LXX *ἄρχουσαι*).

3. נָגִיד. The root meaning is probably 'one *in front*,' 'a leader.' This word is used in general of rulers or princes in Job 29^{10} (AV and RV 'nobles,' LXX wants this verse) 31^{37} (LXX follows

a different text), Ps $76^{12\,(13)}$ (ἄρχων), Pr 28^{16} (βασιλεύς). More particularly it is the designation of (*a*) *the king of Israel:* Saul 1 S 9^{16} 10^{1} [the use of נָגִיד is peculiar to the earlier of the two narratives of Saul's election, מֶלֶךְ 'king' being used in the other; the same distinction is observed in the LXX ἄρχων and βασιλεύς]; David 13^{14} (ἄρχων; in the following passages ἡγούμενος unless otherwise noted) 25^{30}, 2 S 5^{2} (εἰσηγούμενος) 6^{21} 7^{8}, 1 Ch 11^{2} 17^{7}, 2 Ch 6^{5} [in all these passages relating to Saul and David, RV has 'prince,' AV has 'captain' in all except 1 S 25^{30}, 2 S 6^{21} 7^{8}, 1 Ch 11^{2} 17^{7}, 2 Ch 6^{5}, where it has 'ruler'], Is 55^{4} (AV and RV 'leader,' RVm 'prince,' LXX ἄρχων); Solomon 1 K 1^{35} (AV 'ruler'), 1 Ch 29^{22} (AV 'chief governor,' LXX βασιλεύς); Jeroboam 1 K 14^{7}; Baasha 16^{2}; Hezekiah 2 K 20^{5} (AV 'captain'); Abijah 2 Ch 11^{23} (AV 'ruler'); cf. the choice of Judah 1 Ch 28^{4} (AV 'ruler,' LXX ἐν Ἰούδᾳ ᾑρέτικεν τὸ βασίλειον).—(*b*) *A foreign ruler or prince:* the prince of Tyre Ezk 28^{2} (ἄρχων); perhaps also 'the prince that shall come' Dn 9^{26} (? Antiochus Epiphanes, see below; Theod. ὁ ἡγούμενος ὁ ἐρχόμενος, LXX βασιλεία ἐθνῶν).—(*c*) *A high temple official:* Pashhur Jer 20^{1} (AV 'chief governor,' RV 'chief officer'); cf. 1 Ch 9^{11}, 2 Ch 31^{13} 35^{8} (AV and RV 'ruler(s'), LXX in last ἄρχοντες), Neh 11^{11} (AV and RV 'ruler,' LXX ἀπέναντι οἰκοῦ τοῦ θεοῦ); the high priest Dn 11^{22} ('the prince of the covenant'), and perhaps $9^{25.\,26}$ (AV in v.^{25} 'the Messiah the prince,' RV 'the anointed one, the prince'; Theod. χριστὸς ἡγούμενος). The prince in v.^{25} is frequently understood of Cyrus, and in v.^{26} of Epiphanes, but Bevan argues in favour of understanding the reference in both instances to be to the high priest, the first being to Joshua the son of Jozadak (Ezr 3^{2}, Hag 1^{1}, Zec 3^{1}), and the second [reading יִשָּׁחֵת עִם 'shall be destroyed with,' for עַם יַשְׁחִית 'the people shall destroy'] to Jason, the brother and successor of Onias III.—(*d*) *A ruler in other capacities.* This use of the word is late: the 'ruler' of each tribe 1 Ch 27^{16}, 2 Ch 19^{11}; the 'ruler' of the Korahites 1 Ch 9^{20}; the 'leader' of the Aaronite warriors 1 Ch 12^{27}; the 'leader' of an army division 1 Ch 13^{1} 27^{4} (AV and RV 'ruler,' LXX ἄρχων), 2 Ch 11^{11} ('captain' of a fortress) 32^{21} (in the Assyrian army; AV and RV 'leaders,' LXX ἄρχοντες); the 'ruler' over the temple treasuries 1 Ch 26^{24} (ὁ ἐπὶ τῶν θησαυρῶν), cf. 2 Ch 31^{12} (ἐπιστάτης). In 2 Ch 28^{7} the 'house' (הַבַּיִת) of which Azrikam was ruler (AV 'governor'), is probably the palace; cf. the familiar אֲשֶׁר עַל־הַבַּיִת Is 22^{15} 36^{3}, 1 K 4^{6}, 2 K 15^{5} etc.

4. נָדִיב, lit. 'willing,' *e.g.* נְדִיב לֵב 'willing of heart' Ex $35^{5.\,22}$, 2 Ch 29^{31}; רוּחַ נְדִיבָה 'a willing (AV and RV 'free') spirit' Ps $51^{14\,(12)}$; cf. the use of the verb נָדַב 'to volunteer' Jg $5^{2.\,9}$, 2 Ch 17^{16}, Neh 11^{2}, and the noun נְדָבָה 'freewill offering' Ex 35^{29} 36^{3}, Ezr 1^{6} *et al.* Hence נָדִיב may mean *generous* or *noble* in disposition: Pr 17^{26} (AV 'princes,' RV 'the noble,' ‖ צַדִּיק), v.^{7} (LXX δίκαιος; AV and RV 'a prince' is quite misleading, see Toy, *ad loc.*), Is $32^{5.\,8}$ (AV and RV 'the liberal'; opposed here, as in Pr 17^{7}, to נָבָל). The word is used of noble or princely rank in Nu 21^{18} (the Song of the Well; AV and RV 'the nobles,' LXX βασιλεῖς, ‖ שָׂרִים 'princes,' ἄρχοντες. In the following passages, unless otherwise noted, ἄρχων is used by LXX to tr. נָדִיב), 1 S 2^{8} ('to make them sit with princes, μετὰ δυναστῶν λαῶν), Job 12^{21}=Ps 107^{40} ('He poureth contempt upon princes') 21^{28} ('Where is the house of the prince?' B οἶκος ἄρχοντος, but A οἶκος ἀρχαῖος) 34^{18}, Ps $47^{10\,(9)}$ $83^{12\,(11)}$ (AV and RV 'nobles') $113^{8\,bis}$ 118^{9} 146^{3}, Pr 8^{16} (‖ שָׂרִים, LXX μεγιστᾶνες and τύραννοι respectively) 19^{6} (AV and RVm 'prince' seems preferable to RV 'liberal man'; LXX βασιλεῖς) 25^{7} (δυνάστης), Ca 7^{1} ('O prince's daughter,' B θύγατερ Ναδάβ, A θυγ. Ἀμιναδάβ).

5. נָסִיךְ (Assyr. *nasîku*), from root נסך 'install' (cf. Ps 2^{6} נָסַכְתִּי מַלְכִּי עַל־צִיּוֹן 'I have installed my king upon Zion'), occurs 4 times in OT: Jos 13^{21} 'the princes (AV 'dukes,' LXX ἄρχοντες [but the Gr. text is confused]) of Sihon'; Ezk 32^{30} 'the princes (ἄρχοντες) of the north'; Mic $5^{4\,(5)}$ 'eight principal men' (נְסִיכֵי אָדָם, RVm 'princes among men,' LXX δήγματα ἀνθρώπων); Ps $83^{12\,(11)}$ 'make their princes (‖ נְדִיבִים, see above; LXX ἄρχοντες) like Zebah and Zalmunna.' In Dn 11^{8} נְסִיכֵיהֶם, which is rendered in AV and RVm 'their princes,' is much more likely from another נָסִיךְ, a by-form of נֶסֶךְ, and means 'their molten images' (so RV, *Oxf. Heb. Lex.* etc.; cf. LXX and Theod. τὰ χωνευτά). We reach the same result by simply changing the Massoretic reading to נִסְכֵּיהֶם. See, further, Bevan, *ad loc.*

6. אֲחַשְׁדַּרְפְּנִים (Ezr 8^{36}, Est 3^{12} 8^{9} 9^{3}) or אֲחַשְׁדַּרְפְּנַיָּא (Dn $3^{2.\,3.\,27}$ $6^{2.\,4.\,5.\,7.\,8}$) is uniformly rendered by RV satraps, while AV gives 'lieutenants' in the passages in Ezra and Esther, 'princes' in those in Daniel. See art. LIEUTENANT.

7. חַשְׁמַנִּים in Ps $68^{31\,(32)}$ is rendered by both AV and RV 'princes.' The LXX has πρέσβεις 'ambassadors,' Vulg. *legati*; but all these renderings are purely conjectural, founded upon the context. Probably we ought, with Nestle (*JBL*, 1891, p. 152), to emend to בַּשְּׁמָנִים 'they shall come with oils *or* ointments' (so Duhm, *et al.*).

8. כֹּהֲנִים is rendered 'princes' in AV of Job 12^{19}, but there is no reason for departing from the usual meaning 'priests' (so RV, LXX ἱερεῖς).

9. סְגָנִים Is 41^{25} 'he (Cyrus) shall come upon princes (RV 'rulers,' RVm 'deputies') as upon mortar.' The LXX has ἄρχοντες. *Ṣĕgānîm* (found only in the plural) is a loan-word from the Assyrian, where it appears as *šaknu* 'prefect' of a conquered city or province. For the other OT uses and the later meaning of *ṣĕgānîm* see art. PRIESTS AND LEVITES, p. 96^{b}.

10. פַּרְתְּמִים, a Persian loan-word, probably=*fratama*, 'first,' occurs 3 times: Dn 1^{3} 'certain of the children of Israel, even of the seed royal and of the nobles' (AV 'princes'; LXX ἐκ τῶν ἐπιλέκτων, Theod. B ἀπὸ τῶν φορθομμείν, A . . . πορθομμειν, Symm. and Pesh. tr. 'Parthians'); Est 1^{3} (AV and RV 'nobles,' ‖ שָׂרִים; LXX ἔνδοξοι); 6^{9} 'one of the king's most noble princes' (אִישׁ מִשָּׂרֵי הַמֶּלֶךְ הַפַּרְתְּמִים, LXX ἑνὶ τῶν φίλων τοῦ βασίλεως τῶν ἐνδόξων).

11. קָצִין (=Arab. *ḳāḍī*, from *ḳaḍā* 'to decide,' 'to pronounce a sentence') is a term used of both military and civil leaders: Jos 10^{24} ('the chiefs of the men of war'), Jg $11^{6.\,11}$ (of Jephthah), Pr 6^{7} (in a saying about the ant, joined with שֹׁטֵר and מֹשֵׁל), Is 1^{10} $3^{6.\,7}$ 22^{3}. The OT passages where it is tr. 'prince' in AV are: Pr 25^{15} 'By long forbearing is a prince (RV 'ruler,' RVm 'judge') persuaded' (LXX ἐν μακροθυμίᾳ εὐοδία βασιλεῦσιν; there appears to be no sufficient reason for Toy's and Frankenberg's emendation of the last two words of the MT יְפֻתֶּה קָצִין to יִשְׁקֹט קֶצֶף or יֻשַּׁ' קֹצֵף 'is anger [*or* an angry man] pacified'); Mic $3^{1.\,9}$ 'ye princes (RV 'rulers') of the house of Israel' (LXX οἱ κατάλοιποι; in both verses ‖ רָאשִׁים 'heads'); Dn 11^{18} 'a prince (RVm 'captain') shall cause the reproach offered by him to cease.' The reference is to the Roman general Lucius Scipio who defeated Antiochus the Great at Magnesia, B.C. 190 (see Bevan, *ad loc.*). There is nothing in Theod. or the LXX text here corresponding to the word קָצִין.

12. 13. רַב, which is especially familiar as the first part of official titles like RAB-MAG, RAB-SARIS, RAB-SHAKEH (see the artt. on these names), is twice tr. 'prince' in AV: Jer 39^{13} 41^{1} of the princes (RV 'chief officers') of the king of Babylon; LXX in the first passage [46^{3}] ἡγεμόνες, in the second the term is dropped. In Dn $4^{33\,(36)}$ $5^{1.\,2.\,3.\,9.\,10.\,23}$ $6^{18\,(17)}$ the form רַבְרְבָן occurs. Both AV and RV render uniformly by 'lords' except in $5^{2.\,3}$ where AV has 'princes'; Theod. has μεγι-

στᾶνες in every instance, so LXX in 5^{23} and $6^{18\,(17)}$, om. in the other passages.

14. 15. רָזוֹן (cf. the proper name REZON, 1 K 11^{23}) only Pr 14^{28} 'in the want of people is the destruction of the prince' (LXX *δυνάστης*); elsewhere רֹזֵן, namely Jg 5^{3} 'Give ear, O ye princes' (B *σατράπαι*, A adds *δυνατοί*), Ps 2^{2} (*ἄρχοντες*, AV and RV 'rulers'), Pr 8^{15} (*δυνάσται*) 31^{4}, Hab 1^{10} (*τύραννοι*), Is 40^{23} (*ἄρχοντες*). In all these passages רָזוֹן or רֹזֵן is ∥ מֶלֶךְ 'king,' except in the last, where רֹזְנִים is ∥ שֹׁפְטֵי אֶרֶץ 'judges of the earth.' Cf. Arab. *razīn*, 'grave,' 'steady,' from *razuna*, 'to be heavy.'

16. שָׁלִישׁ is once (Ezk 23^{15}) tr. 'prince.' A better rendering would be 'officer' or 'captain.' The word, which means literally 'third' (cf. the LXX, but not in above passage, *τριστάτης*), is usually explained to have denoted originally the man who, in addition to the driver, stood beside the king on his war-chariot, holding his shield or the like. But the adequacy of this as an explanation of the general usage of the term is questioned by Dillmann (on Ex 14^{7}), Kraetzschmar ('Ezechiel' in Nowack's *Hdkomm.*), and others. Kraetzschmar prefers to make the meaning simply *third in military rank* (comparing the obsolete titles 'first lieutenant,' 'second lieutenant'), or to regard *shālîsh* as a loan-word. The term occurs frequently elsewhere in OT in the same sense (*e.g.* Ex 14^{7} 15^{4}, 2 K 9^{25} 10^{25} 15^{25}, AV and RV always 'captain').

In the **NT** the terms rendered in AV 'prince' are **1.** *ἀρχηγός*:—Ac 3^{15} 'ye killed the Prince (AVm and RVm 'Author') of life.' 'Author' appears to be the better rendering here (cf. He 2^{10} 'the author [AVm and RVm 'captain'] of their salvation'). The only other instance where *ἀρχηγός* is tr. 'prince' (AV and RV) is Ac 5^{31} 'Him did God exalt with his right hand to be a Prince and a Saviour.' The Gr. term occurs once more in NT, namely in He 12^{2} 'Jesus the author (AVm 'beginner,' RVm 'captain') and finisher (RV 'perfecter') of our faith,' where the meaning is probably 'leader' or '*antesignanus*.' **2.** *ἄρχων*: Mt 9^{34} 12^{24}, Mk 3^{22} of (Beelzebub) 'the prince of the demons'; Mt 20^{25} 'the princes of the Gentiles,' cf. 1 Co $2^{6.\,8}$ 'the princes of this world' (*οἱ ἄρχοντες τοῦ αἰῶνος τούτου*); Jn 12^{31} 14^{30} 16^{11} 'the prince of this world' (*ὁ ἄρχων τοῦ κόσμου τούτου*); Eph 2^{2} 'the prince of the power of the air' (*ὁ ἄρχων τῆς ἐξουσίας τοῦ ἀέρος*; on this expression see art. SATAN); Rev 1^{5} 'the Prince of the kings of the earth' (*ὁ ἄρχων τῶν βασιλέων τῆς γῆς*, probably a reminiscence of Ps 89(88)^{27}). **3.** *ἡγεμών* is tr. 'prince' only in Mt 2^{6} 'thou art not the least among the princes of Judah.' On the surprising variations between St. Matthew's quotation and the original passage Mic 5^{1}, and the possible explanation of these, see art. QUOTATIONS, i. D.

J. A. SELBIE.

PRINCESS.—See PRINCE, No. **2**, *ad fin.*

PRINCIPALITY.—In Jer 13^{18} מַרְאֲשׁוֹת (from רֹאשׁ the head) is tr. 'principalities,' apparently in the sense of privilege, pre-eminence, as in Jer. Taylor, *Worthy Communicant*, i. 83, 'If any mystery, rite, or sacrament be effective of any spiritual blessings, then this is much more, as having the prerogative and illustrious principality above everything else.' This is better than the tr. 'from your head' or 'from your heads' of the previous versions (Vulg. *de capite vestro*, LXX *ἀπὸ κεφαλῆς ὑμῶν*); but the meaning is evidently, as in AVm and RV, 'head-tires.'

In 2 Mac 4^{27} 5^{7} the high priesthood is called the 'principality,' *i.e.* principal office or supreme power (*ἀρχή*). Cf. Milton, *Reform*, ii. 'The Bishops of Rome and Alexandria, who beyond their Priestly bounds now long agoe had stept into principality.'

For the 'principalities' (*ἀρχαί*) of Ro 8^{38}, Eph 1^{21} (*ἀρχή*, RV 'rule') 3^{10} 6^{12}, Col $2^{10.\,15}$, Tit 3^{1} (RV 'rulers'), see DOMINION in vol. i. p. 616^{b}.

J. HASTINGS.

PRINCIPLE.—See ELEMENT in vol. i. p. 682^{a}.

PRISCA or **PRISCILLA** (*Πρίσκα*, *Πρίσκιλλα*).—The wife of AQUILA. The name is Latin, Priscilla being the diminutive form. In the three places in Acts where the word is used ($18^{2.\,18.\,26}$), the form is always Priscilla; in the three places in St. Paul's Epistles (Ro 16^{3}, 1 Co 16^{19}, 2 Ti 4^{19}) it is in the best MSS always Prisca. In Ac $18^{18.\,26}$, Ro 16^{3}, 2 Ti 4^{19} the wife's name appears first, in the other two places the husband's.

There is some variation in the MSS and VSS. In Ac 18^{26} ℵABE vulg. boh. read *Πρίσκιλλα καὶ Ἀκύλας*; DHLP, etc., gig, syrr, sah. read *Ἀκ. καὶ Πρ.* In Ro 16^{3} and 2 Ti 4^{19} the evidence for *Πρίσκα* is preponderating; in 1 Co 16^{19} *Πρίσκα* is read by ℵBMP vulg. codd., boh. arm.; *Πρίσκιλλα* by ACDEFGKL and most later MSS, vulg. codd., syrr, Chrys., Thdrt., Dam. and TR; the former reading is undoubtedly right. In 2 Ti 4^{19} there is a curious addition after *Ἀκύλαν* in 46, 109, and 109 lat. *Λεκτραν* (sic) *τὴν γυναῖκα αὐτοῦ καὶ Σιμαιαν* (sic) *καὶ Ζηνῶνα τοὺς υἱοὺς αὐτοῦ.*

The variations in the text of Ac 18^{1-27} have been examined very carefully by Harnack, who shows that the longer text (usually called the Western, or by Blass *β*) is clearly formed out of the shorter, and suggests that it has been modified by an interpolator who objected to the too great prominence given to a woman, and has made the position of Priscilla less prominent. With his conclusion we may compare the remarks of Ramsay (*Church in the Roman Empire*, p. 101) on the omission of Damaris in the Western text, Ac 17^{34}.

Prisca is always mentioned with her husband. He is described as a Jew of Pontus, and a tentmaker. St. Paul is associated with them first at Corinth, whither they had retired after the decree expelling the Jews from Rome. After remaining there about eighteen months, they went with St. Paul to Ephesus, and remained there while he went on to Jerusalem. At Ephesus they were concerned in the instruction of Apollos, and seem to have remained throughout St. Paul's residence, their house being used for Christian meetings. Later, probably in consequence of the uproar in the theatre, when there seem to have been considerable riots, they returned to Rome, where again their house was used for Christian worship; and ultimately we again find them at Ephesus. These numerous changes between Rome, Ephesus, and Corinth have caused difficulty to critics, who have for this and other causes suggested that Ro 16 was really addressed to Ephesus. A sufficient explanation is, however, afforded by the nomadic character of the Jewish world in general, of Aquila and Priscilla in particular, and by their occupation as Christian missionaries interested in the spread and support of the Christian Churches. They were evidently persons of prominence in the early Christian community. St. Paul speaks of them with affection, and says that they had endangered their lives for his sake (Ro 16^{4}).

The above is all that we learn from the New Testament, but the traditions of the Roman Church, where the name Prisca was of considerable importance, suggest the possibility of some interesting discoveries being made. The name occurs in two connexions.

(1) There is a church on the Aventine bearing the name of St. Prisca which gives a title to one of the Roman cardinals. This church bore the name of the *Titulus St. Priscae* from the 4th to the 8th cent. (*Liber Pontificalis*, ed. Duchesne, i. 501, 517^{45}); later, under Leo III. (795–816), it is called the *Titulus Aquilae et Priscae* (*ib.* ii. 20). There are legendary *Acts of St. Prisca*, dating from the 10th cent., in which it is stated that the body of St. Prisca was translated from the place on the Ostian Way where she had been buried and transferred to the Church of St. Aquila and Prisca on

the Aventine (*Acta Sanctorum*, Jan. ii. p. 187). An inscription of the 10th cent. (*C. Ins. Christ.* ii. p. 443) also calls it *domus Aquilae seu Priscae.*

(2) In the legendary account of Pudens, Pudenziana, and Praxedis, Priscilla is stated to have been the mother of Pudens (*Acta Sanct.* May, iv. 295).

(3) One of the oldest of the catacombs of Rome is the *Cœmeterium Priscillae*, outside the *Porta Salaria*, and there seems to be some evidence to connect the name Prisca with the Acilian gens, members of which were buried there.

Now it has been noticed that the name Prisca in four out of six places is mentioned before that of her husband. Hort, following out this point, suggests that she was a member of a distinguished Roman family who had married a Jew. This would account both for the prominence given to her, and the connexion of the name with one of the oldest cemeteries. A more plausible suggestion is that both Prisca and Aquila were freedmen of the Acilian or some other gens; that through them Christianity had reached a distinguished Roman family, whose name they had taken, and that this accounted for the prominence of the name Prisca in the early Church. More discovery and investigation are needed, but the point of interest is that the name Prisca in some way or other occupied a prominent position in the Rom. Church.

An interesting suggestion, which has the merit of novelty, has been made by Professor Harnack, that in Priscilla and Aquila we have the authors of the Epistle to the Hebrews. Prisca and Aquila were, we know, teachers of prominence who had turned Apollos to Christianity; they belonged to the intimate circle of St. Paul's friends; they were close friends of Timothy, and personally received St. Paul. They had for some time been connected with a small Christian community in Rome, and the Epistle to the Hebrews was clearly, he argues, written to Rome, and not to the Church as a whole, but to a small circle within the Church. They were with Italian connections, but living outside Italy. In the Epistle there is a curious interchange of 'We' and 'I.' Lastly, the authorship of Priscilla will explain why the writing is now anonymous. The Church of the 2nd cent. objected very strongly to the prominent position of women in the Apostolic age. This had caused the gradual modification of various passages in the Acts, and the desire to separate this work from the name of Priscilla. The whole argument is as ingenious as Professor Harnack always is, but it does not succeed in being quite convincing.

No. 6 (1888–89), p. 129; Duchesne, *Liber Pontificalis*; Hort, *Rom. and Eph.* pp. 12–14; Plumptre, *Biblical Studies*, p. 417; Sanday-Headlam, *Romans*, pp. xxvii, 418 ff.; Ramsay, *St. Paul the Traveller*, 268 f.; Harnack, *Sitzungsberichte der K. Preussichen Akademie der Wissenschaften*, 1900, i., and *Zeitschrift für die neutestamentliche Wissenschaft und die Kunde des Urchristentums*, 1900, p. 10.

A. C. HEADLAM.

PRISON.—Joseph was imprisoned in an Egyptian prison (בֵּית הַסֹּהַר, perhaps 'house of enclosure,' *i.e.* walled, or 'fortress,' cf. cognate Syriac סהרתא 'palace,' and Targumic סחר 'to go round,' 'surround'; ὀχύρωμα, δεσμωτήριον; *carcer, custodia*, Gn 39^{20-23} $40^{3.5}$ [JE]; also בּוֹר 'pit,' EV 'dungeon'; λάκκος, ὀχύρωμα; *lacus, carcer*, Gn 40^{15} 41^{14} [JE]; in 40^{3}, בֵּית שַׂר הַטַּבָּחִים 'house of the captain of the executioners,' *i.e.* the guard). 'Fortress' suggests the use, always common, of fortresses as prisons; 'house of the captain of the guard' suggests that the care of prisoners was one of the duties of that official. Ebers, *Ægypten*, p. 317 ff., identifies this 'fortress' with that at Memphis, mentioned in inscriptions as the 'White Wall'; see, further, art. JOSEPH in vol. ii. p. 768^{a}, note ‖. In Egypt, in addition to the royal prisons, the great temples had prisons of their own (Erman, *Life, etc.* p. 304). Imprisonment is mentioned as a penalty; and the great gold and other mines of Ethiopia and Sinai, which were worked by convicts and captives under conditions of barbarous cruelty, were really vast prisons (Maspero, *Dawn, etc.* 337). Joseph's brethren are said (Gn $42^{17.19}$) to have been kept in custody, מִשְׁמָר, φυλακή.

Samson was imprisoned by the Philistines in a בֵּית הָאֲסוּרִים (Kt. אֲסִירִים) 'house of those who are bound,' οἶκος τοῦ δεσμωτηρίου, *carcer*, Jg $16^{21.25}$. The terms כֶּלֶא (בֵּית), בּ׳ כְּלִיא, בּ׳ כְּלוּא 'house of confinement,' φυλακή, are used of the places of imprisonment of Micaiah, 1 K 22^{27}; Hoshea (in Assyria), 2 K 17^{4}; Jehoiachin (in Babylon), 2 K 25^{27}; and Jeremiah, Jer $37^{4.18}$ etc.; also in Is $42^{7.22}$. Jeremiah's place of confinement is also called מַטָּרָה 'place of guard,' φυλακή, *carcer*; and בֵּית אֵסוּר, 37^{15}=בֵּית הָאֲסוּרִים (see above, Samson). In 2 Ch 16^{10}, Jer 29^{26}, מַהְפֶּכֶת (AV 'prison,' φυλακή), etc., should be 'stocks.' Zedekiah was imprisoned at Babylon in a בֵּית פְּקֻדָּה 'house of inspection,' οἰκία μύλωνος, *domo carceris*, Jer 52^{11}. Other terms used are מַסְגֵּר 'enclosure,' ὀχύρωμα, φυλακή, etc. *carcer*, Ps 142^{7}, Is 24^{22} 42^{7}; עֹצֶר, rather 'oppression,' Is 53^{8}; מִשְׁמָר='ward, custody,' Gn 42^{19}. 'Prison' is supplied in Is 61^{1}. The case of Samson suggests buildings like the Roman *ergastulum*, in which malefactors and slaves were confined and kept at work. Jeremiah's prison was at one time part of the palace, 32^{2}, cf. 37^{21}, 1 K 22^{27}, Neh 3^{25}, 2 K 25^{27}; at another a private house, Jer 37^{15}. As מַטָּרָה in Jer 32^{2}='guardhouse,' it seems that the care of prisoners was one of the duties of the body-guard, and that the prisoners were confined in rooms attached to their quarters. The 'pit' (בּוֹר, Jer 38^{6-11}, cf. Gn 37^{24}) may have been an empty cistern, or possibly an *oubliette.*

Our available evidence points to places of confinement being parts of palaces, temples, fortresses, etc., rather than special buildings set apart for the purpose. For the crimes punished by confinement, and the conditions and treatment of prisoners, see CRIMES AND PUNISHMENTS in vol. i. p. 525, *s.* 'Imprisonment.'

In NT, John the Baptist (Mt 14^{3} etc.), Peter (Ac 5^{19} etc.), Paul and Silas (16^{23} etc.), and others were confined in a φυλακή 'prison, place of guarding'; John (Mt 11^{2}), Paul, etc. (Ac 16^{26}) in a δεσμωτήριον 'prison,' 'place of bonds.' The apostles (Ac 5^{21-23}) were confined in the δεσμωτήριον, also τήρησις (5^{18}) 'place of keeping.' In Ac 12^{7} οἴκημα 'house,' is tr^{d} 'prison.' According to Jos. (*Ant.* XVIII. v. 2), John was imprisoned at the royal fortress of Machærus. The prison at Jerusalem mentioned in Ac 5 was under the control of the priests, and probably attached to the temple or the high priest's palace. Paul was imprisoned in the fort Antonia (Ac 23^{10}) at Jerusalem, in the Prætorium (or Palace) of Herod at Cæsarea (Ac 23^{35}). At Rome he was allowed to live in his 'own hired house' (Ac 28^{30}), doubtless in charge of a soldier. Before his trial, however, he may have been transferred to prison, perhaps the *carcer* specially so called (named in mediæval times *Mamertinus*), and consisting of a larger oblong upper storey and a smaller circular underground dungeon—the *Tullianum.* This *carcer* may have been Paul's place of confinement in his second imprisonment. Cf. 'Carcer' in Smith's *Dict. of Class. Antiquities.*

On 'the spirits in prison' of 1 P 3^{19} see vol. i. p. 754^{a} and vol. iii. p. 795. W. H. BENNETT.

PRIVY, PRIVILY.—These words, which came into the Eng. language through the Old Fr. *prive*, have now been displaced (except in some compounds) by 'private,' 'privately,' which were taken direct from the Lat. *privatus*, and which are also found in AV. Cf. Mk 4^{22} Tind. 'There is nothinge so prevy that shall not be opened' (AV 'nothing hid which shall not be manifested'); Jn 7^{10} Tind. 'Then went he also up unto the feast; not openly, but as it were prevely' (AV 'in secret'); Erasmus, *Exposition of the Crede*, 'By the spirite he doth understand and meane privye or secrete grace of faythe'; More, *Utopia*, 43, 'Howe should a man, that in no parte of his apparell is like other men, flye prevelie and unknowen?'

To be privy to a thing (1 K 2^{44}, Ac 5^{2}) is simply to have a knowledge of it. Cf. Calderwood, *History of the Church of Scotland*, 140, 'Argile came to St. Andrews the day following, privie, as appeared, to the purpose'; *Bishops' Bible*, Ps 19^{11} 'Who can knowe his owne errours? Oh clense thou me from those that I am not privie of'; Spenser, *Shep. Cal.* viii. 153—

> 'Ye carelesse byrds are privie to my cries.'

J. HASTINGS.

PROCHORUS (Πρόχορος).—One of the 'seven' appointed, Ac 6^{5}. Later tradition made him bishop of Nicomedia, and a martyr at Antioch. He was commemorated by the Latins on April 9, by the Greeks on July 28. See Baronius, i. *ad ann.* 44; *Acta Sanctorum*, Ap., i. 818. There is published in *Magna Bibliotheca Patrum*, Colon. Agr. 1618, i. 49–69, a spurious *Historia Prochori, Christi Discipuli, de vita B. Ioannis Apostoli.*

A. C. HEADLAM.

PROCONSUL (Lat. *proconsul*; Gr. ἀνθύπατος).—The technical term for the governor of a senatorial province, used Ac $13^{7.8.12}$ of Sergius Paulus in Cyprus; 18^{12} of Gallio at Corinth; 19^{38} of the governors of Asia. Some little difficulty has been felt by the use of the plural in the last case, but it quite normally expresses what is habitual: 'If any man has a definite charge, there are law courts and judges,' as we should say. The proconsuls were of two classes—those who were ex-consuls, viz. the rulers of Asia and Africa, who were therefore correctly (according to republican usage) proconsuls, and those who were only ex-prætors. For fuller details see under PROVINCE.

A. C. HEADLAM.

PROCURATOR.—The technical term to describe the office held by Pontius Pilate and the other governors of Judæa. The word means originally a bailiff or steward; under the empire it was used for the imperial officials, sometimes of equestrian rank, sometimes only freedmen, who were appointed in the provinces to collect the imperial revenue or *fiscus*. In imperial provinces they managed the whole of the revenue; in senatorial provinces, where there were quæstors, only that part which belonged to the emperor. Even in senatorial provinces their authority had a tendency gradually to increase, and they obtained judicial powers in revenue cases; but in addition to that there were certain provinces which were governed directly by a procurator, who possessed all the powers of an ordinary governor. The provinces so governed were usually those in a transitional state—provinces which had not been thoroughly romanized, and were passing from the rule of one of the *reges socii* to the conditions of a province. The following provinces were governed in this way (at any rate at certain periods):—Mauritania, Rhætia, Noricum, Thrace, Cappadocia, the Maritime Alps, the Alps of Savoy, and Judæa. These provinces, governed by procurators, were in some sense subordinate to the governor of the neighbouring province: for instance, Cappadocia was subordinate to Galatia, and Judæa to Syria. With this limitation, the procurator had the full power of the governor. He commanded such troops as were within his province, he held the power of life and death, and full judicial, administrative, and financial authority.

The technical term in connexion with Judæa is given in Tacitus, *Annal.* xv. 44: *Christus Tiberio imperitante per procuratorem Pontium Pilatum supplicio adfectus est.* The proper Greek translation would be ἐπίτροπος, but in the NT we find the vaguer term ἡγεμών, which might include rulers of other categories (Mt $27^{2.11.14.15.21.27}$ 28^{14}, Lk 3^{1} 20^{20}, Ac $23^{24.26.33}$ $24^{1.10}$ 26^{30}). In Josephus we find both ἐπίτροπος and ἡγεμών.

A. C. HEADLAM.

PROFANE.—The Eng. word comes from Lat. *profanus* (through Fr. *profane*), which is taken to be *pro* 'before' and *fanum* 'the temple,' hence outside the temple limits,* outside the limits of that which is holy, unholy, secular.†

The incorrect spelling *prophane* became common in the 16th cent., and is the spelling in the 1611 ed. of AV everywhere except Ezk $23^{38.39}$, 1 Mac 3^{51}, 2 Mac 6^{5}, Ac 24^{6}.

The Heb. word so tr^{d} in AV is חִלֵּל to pollute, with its derivatives חֹל pollution, and חָלָל (adj.) polluted. Once also (Jer 23^{11}) the verb [חָנֵף], and once (Jer 23^{15}) its deriv. חֲנֻפָּה are tr^{d} '[is] profane' and 'profaneness.' AVm gives 'hypocrisy' in the second passage, Amer. RV prefers 'ungodliness.' In Greek, the verb is βεβηλόω and the adj. βέβηλος. The subst. βεβήλωσις is thrice (Jth $4^{3.12}$, 1 Mac 1^{46}) tr^{d} 'profanation.' The ptcp. ἀποδιεσταλμένος is also tr^{d} 'profane' in 2 Mac 6^{5} (RV 'abominable'). In 2 Mac 4^{13} the subst. tr^{d} 'profaneness' is ἀναγνεία. Finally in 2 Es we find the vb. *profanare* tr^{d} 'to profane' (10^{22}), and the adv. *irreligiose* tr^{d} 'profanely' (15^{8}). See UNCLEAN, UNCLEANNESS.

J. HASTINGS.

PROFESS, PROFESSION.—The verb to 'profess' and the subst. 'profession' have acquired a narrow 'professional' meaning; in AV they still have the sense of 'speak out,' 'declare openly' (from *profiteri*, ptcp. *professus*). Thus Dt 26^{3} 'I profess this day unto the Lord thy God, that I am come unto the country which the Lord sware unto our fathers for to give us' (הִגַּדְתִּי); Mt 7^{23} 'And then will I profess unto them, I never knew you' (ὁμολογήσω αὐτοῖς); 1 Ti 6^{12} 'Thou hast professed a good profession before many witnesses' (ὡμολόγησας τὴν καλὴν ὁμολογίαν, RV 'didst confess the good confession'); He 3^{1} 'Consider the Apostle and High Priest of our profession' (τῆς ὁμολογίας ἡμῶν, RV 'of our confession,' that is, says Rendall, 'whom our Christian confession of faith acknowledges in this character').

J. HASTINGS.

PROGNOSTICATOR.—In Is 47^{13} the 'monthly prognosticators' (מוֹדִיעִים לֶחֳדָשִׁים, AVm 'that give knowledge concerning the months') are mentioned along with the 'astrologers' and the 'star-gazers' as unable to help Babylon in her hour of need. The meaning of לֶחֳדָשִׁים is probably 'at (the) new moons,' the reference being to the forecasts which it was usual to make at that season of what was likely to happen during the coming month. The lucky and unlucky days of each month were duly noted in the Assyrian and Babylonian calendars, and reports were given in monthly by the official astronomers and astrologers (cf. Sayce in *TSBA* iii. p. 229, and see also art. ASTROLOGY in vol. i. p. 194^{a}). The LXX has nothing answering to '*monthly* prognosticators,' the text reading in such a way that the 'astrologers' are called on to stand forth and save their votaries, and the 'star-gazers' are challenged to make known (ἀναγγειλάτωσαν, representing somehow מוֹדִיעִים) what is going to happen.

J. A. SELBIE.

PROLOGUE.—The Book of Sirach opens with a preface by the author's grandson, which bears in BA the title πρόλογος (C πρ. Σιράχ, ℵ om.). For its contents see art. SIRACH. The opening verses of the Fourth Gospel are also frequently called the Prologue to that Gospel. See JOHN (GOSPEL OF).

PROMISE.—The word 'promise' is used in Scripture with the same latitude as in language generally, but the present art. takes account only of the technical or semi-technical sense of it which comes into view when we read of 'the promise' without any qualification. God is the author of the promise, and it is spontaneously put forth on His part; this is what is signified by ἐπαγγέλλεσθαι as opposed to ὑπισχνεῖσθαι, the latter signifying *to come under an obligation, as part of a contract.* The promise was originally given to Abraham; and though, in its largest scope, it covers the whole future guaranteed to him by God, it is defined at different times in different ways. Sometimes the thing promised is the possession of a country—Canaan is 'the land of the promise' (He 11^{9}); sometimes it is the birth of a son or of a numerous posterity, a seed like the stars of heaven or the dust of the earth (Gn 13^{16} 15^{5})—Isaac is the first of 'the children of the promise' (Ro 9^{8}); more generally it is a divinely-secured greatness and felicity so conspicuous that all nations will make it a standard of congratulation (Gn 12$^{2f.}$). The OT, though the promises of God may be said to be the contents of His covenant (so that St. Paul speaks of 'the covenants of the promise,' Eph 2^{12}), does not make much use of this category to interpret the experience of Israel. The future of the nation does depend on God, but it is seldom related to His 'promise' in the technical sense with which we are here concerned. There is an approach to the general idea in Jer 29^{11} 'I know the thoughts that I think toward you, saith the Lord, thoughts of peace and not of evil, *to give you a future and a hope.*' This conception of some good unrealized, but to be realized through faith in the sure word of God, is what is meant by the promise. But there is a nearer approach still to the technical sense in Ps 105^{42} 'He remembered *his holy word, and Abraham his servant.*' The whole future of Israel, all the deliverances wrought for it, are here conceived as bound up in something which God said to Abraham; the history of the nation is the revelation of what was involved in the primitive promise, and not only its revelation but its fulfilment. It is a witness to God's faithfulness to His word.

---

* Cf. Ezk 42^{20} 'to make a separation between the sanctuary and the profane place.'

† Cf. Tymme's tr. of Calvin's *Genesis*, on 477 'When Jacob is saide to blesse the king, Moses thereby meaneth not a common and prophane salutation, but a godlie and holie prayer of the servant of God.'

It is at this point that the NT takes up the idea. We see in the *Magnificat* and in the *Benedictus* how pious souls in Israel were preoccupied with it: 'He hath holpen Israel his servant *that he might remember mercy* (*as he spake unto our fathers*) *toward Abraham and his seed for ever*' (Lk 1$^{54f.}$, cf. v.^{73} '*the oath which he sware unto Abraham our father*,' etc.). In NT times, however, the significance of the promise was determined *ex eventu*; it had been at last fulfilled in Christ, and it was by looking at Christ that men discovered what it meant. 'For how many soever are the promises of God [the separate blessings into which the one all-embracing ἐπαγγελία can be resolved] in him is the Yea,' that is, the Divine confirmation and fulfilment of them all (2 Co 1^{20}). The substance of NT teaching on this subject can be arranged under these heads: (1) the contents of the promise; (2) the heirs of it; (3) the conditions of its fulfilment.

(1) The *contents* of the promise are always related to Christ, but they are defined in various ways under the influence of various OT ideas. Sometimes the original idea of a 'country of our own' reappears, a land in which we shall not be strangers and pilgrims as on earth, 'a city with foundations,' rather 'the city with the foundations,' a rest like the Sabbath rest of God, into which we may enter after we have traversed the wilderness, an eternal inheritance. This may be said to be the aspect of the promise which pervades the Epistle to the Hebrews. See He 11$^{9-16}$ 4^{1} 9^{15}. In the preaching of St. Peter, as we find it in the early chapters of Acts, it is the Risen Jesus, made by God 'both Lord and Christ,' in whom the promise has been fulfilled, and its contents may be said to be mainly the two divinely-bestowed possessions of the Christian Church—the forgiveness of sins and the gift of the Holy Ghost. The latter is specially spoken of as 'the promise of the Father' (Lk 24^{49}, Ac 1^{4}); Jesus has received from the Father 'the promise of the Spirit' (Ac 2^{33}), and it is with this in view that St. Peter says, 'the promise is unto you and your children' (2^{39}). There is no doubt here a reference to the fact that Jesus had promised to send the Spirit to His disciples; but the last passage quoted shows how this special promise of Jesus coalesced in the apostle's mind with the great Messianic promises in which the future of Israel was assured.—When we pass to St. Paul we find at first a general conception of the same character. The promise made to the fathers God has fulfilled in all its import (ἐκπεπλήρωκεν, Ac 13^{33}) by raising up Jesus—the raising up having reference either to the bringing of Jesus on to the stage of history, or to the Resurrection; in either case it is 'according to promise' that God has 'brought to Israel the Saviour Jesus' (Ac 13^{23}). At a much later date, as he stands before Agrippa, St. Paul can represent himself as involved in such troubles 'for the hope of the promise made by God to our fathers' (Ac 26^{6}, cf. 28^{20} 'for the hope of Israel I am bound with this chain'). The hope of Israel, all that God has promised to do for it, is in these passages regarded as bound up in the Risen and Exalted Jesus. What the content of that hope is, it would require an exposition of all the apostle's theology to show; for Christ and the promise are practically synonymous terms. All that is in Christ is meant by the promise; all the promises of God are summed up in Christ. Special aspects of this are set in relief by St. Paul as by other NT writers. Thus he speaks of Christians as sealed with the Holy Spirit of the promise (Eph 1^{13}), and as receiving the promise of the Spirit through faith (Gal 3^{14}). The gift of the Spirit has something of promise in it; it is the earnest of a heavenly inheritance, an inheritance with the saints in the light (Eph 1^{14}, Col 1^{12}); as the spirit of sonship it is the assurance that we are joint heirs with Christ, and shall yet be conformed to the image of God's exalted Son (Ro 8$^{15-17}$), and have an entrance into that kingdom of God which for St. Paul is always a transcendent and glorious mode of being. In Gal 3 'the promise of the Spirit,' or the Spirit as the essential blessing of the promise, has its peculiar value in this, that it is the principle of a new life and righteousness to which sinful men could never attain on any other terms.—Other references to the promise in the NT are more dubious, though Tit 1^{2} Ja 1^{12} 2^{5} (the crown of life, the kingdom which God hath promised to them that love Him) are in the line of that conception of the promise which was common to St. Paul with all primitive Christians. On the other hand, a distinctively Johannine thought has availed itself of this mode of expression in 1 Jn 2^{25}.

(2) The second question concerns the *heirs* of the promise: to whom is it given? It was given at first to Abraham, or to Abraham and his seed. Isaac and Jacob were 'heirs with him of the same promise' (He 11^{9}). It might seem as if 'the seed of Abraham' were an expression not capable of two interpretations, and yet the proper interpretation of it was the great subject of controversy in the primitive Church. Even when the promise was seen to be fulfilled in Jesus, it seemed obvious to say that it was fulfilled to Israel—that Israel alone had a part in it. Even St. Paul can say that Jesus Christ was a minister of the circumcision, on behalf of the truth of God, to confirm the promises of the fathers, *i.e.* belonging to the fathers, because made to them (Ro 15^{8}). In enumer-

ating the prerogatives of Israel, he says frankly, 'to whom belong the promises' (Ro 9^4). In describing the pre-Christian condition of a Gentile Church he says its members had been 'strangers to the covenants of the promise,' and therefore without hope. No pagan people had that kind of assurance as to its own future which pious Israelites derived from the word of God, and hence the pessimism with which paganism generally contemplated the issues of human existence. It was the work of St. Paul to show that the promise was not subject to physical or historical limitations, and that no physical or historical accident, such as Jewish birth or upbringing, could give one a claim as of right against God for its fulfilment. The chief passages in which he deals with the problem are Gal 3 and Ro 9–11. In the former he discusses rather the conditions on which the promise is inherited, to which we shall refer below, and comes to the conclusion that all who are Christ's by faith are Abraham's seed, the Israel of God, and heirs according to promise. In the latter he is confronted with the fact that the promise—to judge by the results of his own preaching—is not being fulfilled to those to whom it belongs, and is being fulfilled (according to him) to those to whom it does not belong. What strikes one most in this extraordinary passage is the extent to which St. Paul's heart is on the side of those against whom he argues. Thus, after proving in ch. 9 that no man can claim unconditionally that God shall fulfil the promise to him, and in ch. 10 that the Jews, by persistent disobedience, have forfeited all title to be counted God's people and the heirs of His promise, he falls back in ch. 11 on the abstract theological principle that the gifts and calling of God are without repentance. It is as if he said—After all, there is no denying that Israel is God's people. God has given them the promise, and He cannot deny Himself. In spite of all their unbelief they are beloved for the fathers' sakes; God will remember His oath to Abraham, and 'so all Israel shall be saved.' Such faith may well seem bewildering to Gentiles who calmly assume that the promise is their own *ab initio*, and ignore even the historic prerogative of the Jew. But to the last the Jew was to St. Paul the root, the first-fruits; and the Gentiles were only *συμμέτοχα τῆς ἐπαγγελίας* (Eph 3^6), not its original and proper heirs.—In later NT writings the echoes of this conflict die away, and the scope of the promise is universalized as instinctively as Christ is felt to be Lord of all. 'The promise,' in short, is a historically conditioned way of conceiving the grace of God, and once the critical stage had been passed—as it was in St. Paul's lifetime—the discussions as to its range lost interest. Men could question who were the true heirs of the promise, but not under the same forms who were the objects of the redeeming love of God in Christ.

(3) The *conditions* on which the promise are fulfilled are discussed in various connexions. As already remarked, the very idea of *ἐπαγγελία* is spontaneity on the part of the promiser. The promise is of grace. In Ro 4 and Gal 3 St. Paul labours to show that it is subject to no control on the part of law, or of works of law. In Galatians he gives a historical proof of this. The promise was given to Abraham, and to his faith, 430 years before the law was heard of; and this late intrusion of law, whatever it may mean, cannot mean that we must *earn* the fulfilment of the promise; if this were the case it would be an *ἐπαγγελία*—a free spontaneous motion on the part of God—no more. In Ro 4 the proof is rather speculative or experimental than historical. Certain ideas and experiences hang together, and certain others do not. Promise, grace, and faith are parts of one whole; wages, debt, and works are parts of another whole; but these two wholes, and the parts of them, exclude each other. Hence the promise, in all the fulness of its content, explained above, is fulfilled, not to works of law, not to merit, but to faith in Jesus Christ. All that God holds out to us becomes ours as in faith we attach ourselves to Him. Where the blessings of salvation are presented as 'promise,' there is always, of course, the suggestion that they are not yet realized, and hence faith (when this conception is prominent, as in the Epistle to the Hebrews) assumes some of the characteristics of hope and of patience. We read of those who 'through faith and patience' inherit the promises; we have 'need of patience' that after 'having done the will of God' we may receive the promise (He 6^{13} 10^{36}). It is part of the heroism of faith that having God's promise to go upon it can maintain a strong conviction as to the things it hopes for, and give reality to things unseen (He 11^1). It is the mark of an evil time that scoffers ask, in regard to the one great promise of the NT, *ποῦ ἐστιν ἡ ἐπαγγελία τῆς παρουσίας αὐτοῦ*, 2 P 3^4.

J. DENNEY.

PROPER.—Like the Lat. *proprium*, from which it is derived through the Fr. *propre*, 'proper' means *one's own*. Thus Udall, *Erasmus' Paraphrase*, i. 77, 'Onely God chaungeth the myndes and heartes of riche men, that they will cherefully eyther cast awaie that which they doe possesse, or els possesse them as common and not proper'; Tindale, *Expositions*, 124, 'Forsooth I have no goods, nor anything proper, or that is mine own; it is the convent's'; Rhem. NT, note on Mt 9^5 'The faithlesse Jewes thought (as Heretikes now a daies) that to forgeve sinnes was so proper to God, that it could not be communicated unto man'; and especially Adams, *Works*, i. 69, 'Salvation is common, as St Jude speaketh, ver. 3, "When I gave all diligence to write unto you of the common salvation"; but few make it proper to themselves: that God is *my* salvation and *thy* salvation, this is the comfort.' This meaning occurs in AV five times. For 1 Ch 29^3 see PECULIAR. The other instances are Wis 18^{21} 19^6, Ac 1^{19}, 1 Co 7^7. The Gr. is always ἴδιος. RV adds Wis 2^{23} and Jude ^{6} where the Gr. is also ἴδιος.*

Another meaning, a derivative of the above, is 'of good appearance,' 'handsome,' as in Fuller's *Holy War*, ii., 'What a pitie is it to see a proper Gentleman to have such a crick in his neck that he cannot look backward'; and in *Holy State*, 319, of the 'Embassadour,' he says 'He is of a proper, at least passable person.' This is the sense of 'proper' in He 11^{23} 'By faith Moses, when he was born, was hid three months of his parents, because they saw he was a proper child' (*ἀστεῖον τὸ παιδίον*; RV 'goodly'—see FAIR).

J. HASTINGS.

PROPHECY AND PROPHETS.—Under this heading four subjects fall to be treated: the history of prophecy; the psychology of prophecy; the prophetic teaching; and the verification in history of the prophetic ideas of the future.

A. *THE HISTORY OF PROPHECY.*
  - i. THE ORIGIN OF PROPHECY.
  - ii. THE NAME PROPHET.
  - iii. HISTORICAL STEPS.
    1. The Age of Samuel.
    2. The Early Monarchy.
    3. The Age of the Literary Prophets.
    4. The Decline and Expiry of Prophecy.

B. *THE PROPHETIC MIND.*
  - i. THE IDEA OF THE PROPHET.
  - ii. INSPIRATION.
  - iii. THE FALSE PROPHETS.

---

* See Deissmann on ἴδιος in *Bibelstudien*, p. 120 f. (Eng. tr. p. 123 f.).

C. *THE TEACHING OF THE PROPHETS.*
  i. GENERAL TEACHING.
  ii. PREDICTIVE PROPHECY.
    1. Prediction in General.
    2. Messianic Prophecy.
D. *INTERPRETATION AND FULFILMENT OF PROPHECY.*
  i. PROPHECY POETICAL AND IDEAL.
  ii. PROPHECY MORAL AND CONTINGENT.
  iii. PROPHECY NATIONAL AND RELATIVE LIKE OT RELIGION.

A. *THE HISTORY OF PROPHECY.*—Hebrew prophecy, though the deepest movement of the human spirit and in many ways the most mysterious, has, like other movements of the spirit, a history. There is the period of its obscure beginnings; the period of its highest purity and loftiest achievements; and the period of its decline and expiry, when its work being accomplished other agencies in the education of mankind took its place. Its expiry can be spoken of only in the sense that it ceased to be a creative power; its results remain an imperishable heritage of the race, and the agencies in Israel that succeeded it, such as scribes and proverbialists or wise men, were only the conduits and channels that distributed the waters of its great stream over the individuals of the nation.

i. ORIGIN OF PROPHECY.—Something to which the general name of prophecy might be given seems to have existed among all peoples. It originated from beliefs or feelings common to men everywhere, such as (1) that there was a supernatural, a God or gods, on whose will and power the wellbeing and the destiny of men depended; (2) that these supernatural powers had communion with men and gave them intimations of their will and their purposes; and (3) that these intimations were not given to men indiscriminately, but to certain favoured men, who communicated them to others. Having these beliefs, ordinary men or States desirous of living or acting in accordance with the mind of the deity, and particularly when in perplexity in regard to what lay in the future, had recourse to those through whom the deity spoke, and consulted them.

The supernatural powers, it was supposed, gave intimation of their will and disposition towards men in two ways: (1) in an external way, by objective signs or *omens* in the region of nature, as by the flight or cry of birds. These creatures coming from heaven were the bearers of a message from heaven. Other creatures also were the means of significant indications from the deity, for example, in the way they met a man, or the side, the right or the left, from which they crossed before him.* In all countries the sacrificial victim offered to the gods was held to exhibit signs from them, particularly in the convulsive movements of the liver and entrails of the freshly slain creature (Ezk 21). Less commonly omens were observed outside the animal world, *e.g.* in the rustling of the leaves of trees (Dodona; cf. Gn 12^{6}, Jg 9^{37}, 2 S 5^{24}). In the East the movements and conjunctions of the stars were regarded as prophetic, though in this case the influence on man's destiny may have been supposed to be exerted by the stars themselves, which, however, were often identified with deities. (2) Besides this external or objective revelation, there was an inward revelation given in the mind of man. In this case the deity possessed the man, inspired him, and spoke through him. It is possible, indeed, that the animal omens may have sometimes been regarded as forms assumed by the deity or as possessed by him. And from the curious feelings of antiquity regarding the *rapport* existing between animals and men, the animals may sometimes have been supposed to come to men not as messengers of the deity, but on their own impulse, knowing themselves what they told to men (W. R. Smith, *RS*^{2} 443). But this, if true, belongs to a different circle of ideas. Examples of this second kind of revelation are common in the heathen world, as the Pythia in Greece, the *kâhin* in Arabia, the sibyl, and the like. Even in Greece this inward inspiration was considered something higher than divination by omens, and in ancient times, at least, the Oracle subserved high ethical and national ends. The divine omens were not intelligible to ordinary men, hence they required persons either of special endowment, or of skill acquired from tradition or by practice, to interpret them. Such persons, augurs, soothsayers, diviners, or prognosticators (Is 47), might be called prophets of the deity to men. The Pythia, being wholly overpowered by the deity, uttered her oracles with no consciousness of their meaning. The oracles were often enigmatic, requiring an interpreter. The interpreter was called *prophet* (*προφήτης*, in which the *pro* is not temporal).

The methods of divination practised in Israel will have more affinity with those usual among the Shemitic peoples than with those of the general heathen world.* The feelings prevalent in the East appear from the fact that a message from the deity might be brought to one by a person of another nation (Jg 3^{20}, 2 K $3^{12\text{ff.}}$); from the frequent mention of diviners, as among the Philistines (1 S 6^{2}, Is 2^{6}), and of localities to which they had given names (Jg 7^{1} 9^{37}); from the weight laid on omens (Jg 6^{37} 7^{5}, 2 S 5^{24}), and particularly on dreams (Jg $7^{11\text{ff.}}$, 1 S 28^{6}); and from the use of the oracle by the sacred lot (Jg 8^{27} 17^{5} 18^{5}, Ezk 21^{21}). An exhaustive list of the practices appears to be given in Dt $18^{10.\,11}$. The passage states that the practices were in use among the aboriginal tribes which Israel dispossessed; but as these tribes had been absorbed into Israel and formed one people with it, the practices no doubt continued to maintain themselves in Israel. The difference might be that they were now performed in the name of J″, and not in that of the native deities. The terms describing the practices are used by Heb. writers rather indiscriminately, but perhaps three distinct forms can be discovered: (1) the oracle gained by certain methods from a god or idol (קסם), (2) interpretation of omens (נחש), and (3) utterances of one possessed or inspired by the deity. (1) The oracle was common, perhaps, to most of the Shemitic peoples; at least it appears in Arabia and Babylon, as well as in Israel. Mesha of Moab, too, states that Chemosh gave him commandments, but the method of receiving them is not indicated (cf. Ezk 21^{29}). Lots (which were usually headless arrows or rods) were shaken and drawn in the presence of the idol, *e.g.* Hobal at Mecca, and the teraphim (one image) by Nebuchadnezzar (Ezk 21^{21}). The question put by the inquirer usually took the form of an alternative, 'yes' or 'no,' 'this' or 'that,' though several possibilities might be proposed. In the story of Nebuchadnezzar the alternative was 'Rabbath-ammon' or 'Jerusalem,' and the decision came out 'Jerusalem.' In method the sacred lot in Israel, Urim and Tummim, did not differ. This also gave a reply to an alternative proposed. It is possible that LXX of 1 S $14^{41.\,42}$ suggests the original reading: 'And Saul said, If the guilt be in me or in Jonathan my son, give Urim, O Lord God of Israel; but if thou say it is in my people Israel, give Tummim.' The first time Saul and Jonathan were taken and Israel left; the second time Jonathan was taken and Saul left. The form of the sacred lot is unknown, and in later times its real nature seems to have been forgotten. Nebuchadnezzar drew the lots before the teraphim, certainly an image. In Israel the ephod was used, and hence the ephod is supposed by many to have been an image of J″. Ephod and teraphim are named together (Jg 17^{5}, Hos 3^{4}), but it remains uncertain whether they were things different though used together, or things of the same class, the two names being cumulative, or the one used as interpretative of the other. In the time of Saul and David the ephod was in common use; later it fell into desuetude. Hosea, however, mentions it as one of the appliances of religion in his day, and certainly not with approbation (3^{4}). If the root *ḳaṣam* originally referred to this particular kind of divination, its use ceased to be exact. Saul uses the word of divination by the *'ôb* (1 S 28^{8}), and the canonical prophets call the false prophets *ḳôsĕmîm*, diviners, and their oracles *ḳeṣem*, divination (pl. *ḳĕṣāmîm*), even when these prophets spoke (as they thought) by inspiration of J″ or by dreams. (2) The root *naḥash* (used in Piel נִחֵשׁ) appears to be used properly of divination from omens. Joseph divined with a cup, the significant indications being afforded by the play of light in the fluid, or by the bells and movements of the fluid itself, or, as some think, by the behaviour of oil poured into the cup of water (Gn $44^{5.\,15}$). The word as well as its noun is used of divination by omens, but the different kinds of omen are not discriminated (Lv 19^{26}, Nu 23^{23} 24^{1}); in an enfeebled sense the word meant to infer from signs or indications generally (Gn 30^{27}, 1 K 20^{33}). (3) Oracles by inspiration or possession by deity were common to the heathen and to Israel. And here manticism and prophecy come in contact. The two agree in form, and have to be distinguished by other tokens, *e.g.* by the god in whose name the oracle was given, and perhaps by the fact that in the mantic ecstasy the consciousness was overpowered and lost, while in prophecy there was only exaltation of mind and loss of the consciousness of external things.

---

* Ahlwardt, *Chalef el Aḥmar*, p. 45 ff.

* An excellent account of general heathen manticism is given in K. Köbler, *Der Prophetismus der Hebräer, u. die Mantik der Griechen*, 1860. The work of P. Scbolz, *Götzendienst u. Zauberwesen bei den alten Hebräern u. den benachbarten Völkern*, 1877, is less critical.

The other things mentioned in Dt $18^{10ff.}$ are of the nature of magic or sorcery, and were always proscribed in the religion of J″ (Ex 22^{18}, 1 S $28^{3.9}$), though they continued in Israel till very late times. Saul names as legitimate sources of knowledge of the will of the deity, dreams, Urim, and prophets (1 S 28^{6}). Unlike divination, which seeks to ascertain the mind of the deity, magic was a means of binding superhuman powers (chiefly demonic or chthonian), either to restrain them from injuring oneself, or to constrain them to injure others, and put them under a spell, or to reveal what to mortal man was unknown. The magical means might be—(1) protective, such as amulets (Gn 35^{4}, Is $3^{3.19}$); or (2) both protective and constraining, such as formulas of incantation (Ps $58^{4f.}$, Dt 18^{11}, Is $47^{9.12}$); and (3) necromancy. The last had several forms: (*a*) consulting the *'ôb*, (*b*) consulting the *yid'ōni*, and (*c*) consulting the dead. The forms (*a*) and (*b*) are embraced in (*c*), though whether they exhaust (*c*) is somewhat uncertain (Is 8^{19} 29^{4}, Lv 20^{27}). Cf. W. R. Smith, *Jour. of Philology*, vol. xiii. 273 ff., xiv. 113 ff.; and Driver on Dt $18^{10ff.}$.

ii. The Name Prophet.—In 1 S 9^{9} it is said, 'He that is now called "the prophet" (נביא *nābî'*) was beforetime called "the seer" (ראה *rô'eh*).' The passage is an annotation, much later in date than the context, and cannot have been written before the name 'prophet' had been long current and attached to a succession of men. The radical meaning of the word *nābî'* is uncertain. Two terms are used for 'seer,' *rô'eh* and *ḥôzeh* (חוה), though without difference of sense. The annotator's remark might be supposed an inference from the fact that in the ancient record before him Samuel is called 'the seer.' Still that fact is of importance; and the possibility that there was a time when the word 'seer' was in common use may seem supported by the other fact that the word 'vision' (חזון, חזיון, etc.) connected with 'seer' is used all down the literature for 'prophecy,' the term 'prophecy' (*nĕbû'ah*) connected with 'prophet' being a late word (Neh 6^{12}, 2 Ch 9^{29} 15^{8}). Much weight may not be due to this consideration, and on the other side may be urged the extraordinary rarity of the word 'seer,' though this again may be explained by supposing that all references to early times in which 'seer' might have been expected to occur belong to writings which are posterior to the time when the word 'prophet' had become the usage.* The author of the annotation 1 S 9^{9} is familiar with 'prophets' who were great isolated personages, like Elijah and probably the canonical prophets; and he considers the 'seer' Samuel to have been quite like one of these. This is certainly true of Samuel, though how far true of other seers of his day, if such existed, may be doubtful. The seer was an isolated personage like the great prophets. But, further, the characteristic of the true 'prophet' was that he pursued national religious ends. Samuel did this with more splendid initiative than the greatest of his successors. He created the nation by giving it a king; they only sought to preserve it. But the seers of his day, if there was such a class, may have ministered rather to personal and private interests, as Samuel himself seems to have done on some occasions (1 S 9). In 1 S 3^{1} it is said that 'vision' when Samuel was young 'was not widely diffused'; but 'vision' is here used of true prophecy such as the author was familiar with in his own time. History leaves us in complete ignorance in regard to the seers. In fact, the only 'seer' we know of is Samuel, and his history is told us in a very fragmentary way. The historian gives a beautiful picture of his birth and childhood, narrating how he was dedicated by his mother to the Lord, and how J″ spoke to him in Shiloh as He did to the canonical prophets afterwards (1 S 1–3); but the narrative is suddenly broken off, and when we hear of Samuel again he is already an old man, dwelling in Ramah, and known as 'the seer.' We learn from Jer 7^{12} that the house at Shiloh was at some time completely overthrown—no doubt at the hands of the Philistines; and Samuel driven from there took up his abode at Ramah. Though called a priest, the rôle of prophet was that accepted by him, as it is that usually assigned to him (1 S 9^{15}, Jer 15^{1}, Ps 99^{6}, Ac 3^{24}); and it was in the exercise of his rôle as prophet—statesman in the kingdom of God—that he interfered in so decisive a manner in the national politics. It is true that the religion of J″ did not as a rule create new agencies, but served itself of those already existing, into which it infused its own spirit, which gradually threw off all heathen elements originally belonging to them. There may have been a class of 'seers' in the time of the Judges whose methods may not have been greatly unlike those in use among other Shemitic peoples. But we know nothing of them. Samuel is the only 'seer' known to history.

The meaning of the root and the form נביא is uncertain. (1) The form is not likely a *pass.* ptcp., but more probably, like קציר *harvester* and many words of similar form, has active sense. The word itself *nabî'* occurs in Arab., but may be a loan-word from Heb., as it is in other dialects (Nöldeke, *Gesch. d. Korans*, p. 1). (2) The sense of the word is obscure. The root has probably no connexion with נבע *to bubble up*, as if *nābî'* were one who bubbles up under inspiration (Ges., Kuenen, *Prophets*, 42, cf. Ps 45^{1}). The root *naba'a* in Arab. means to *come forward* or into prominence, and causative (conj. ii) to *bring forward*, specially to do so by speech, *to announce*; and in Eth. *nababa* means *to speak* (Dillm. *AT Theol.* p. 475). The word *nābî'* therefore would mean *he who announces*, or brings a message. The term, however, has not in usage the general sense of announcer or speaker, but always means one who speaks from God, *i.e. a prophet*, and the Hithp. frequently means to speak in an excited manner, to rave (*μαίνομαι*). This connotation might suggest the question whether the root *nābā'* did not originally express some mental emotion, the reflexive forms (Niph. Hithp.) meaning to exhibit or display this emotion, as is the case with so many reflexives, *e.g.* נאנח *to groan*, התאבל *to exhibit grief*, התאנף *to show anger*. It is usually supposed, however, that the verbal forms are denominatives from *nābî'*. In this case the original verbal root would not be found in Heb., and the word *nābî'* would either be an old noun surviving after the verbal root was lost, or else a new word learned from the Canaanites. The word *nābî'* is said (1 S 9^{9}) to have become a substitute for *rô'eh* 'seer,' and unfortunately the literature is all later than the time when *nābî'* with its derivatives had become the usage. The 70 elders of Nu 11 (according to Wellhausen, *Comp.*² 102 f., J working on older materials) 'prophesy' quite after the manner of the 'prophets' of the days of Samuel (1 S 10) or of Ahab (1 K 22), *i.e.* their 'prophesying' is a joint exercise. It is possible that 'prophets' of this kind may have appeared in the earliest times, though we do not hear of them. Others (*e.g.* Kuenen, *Proph.* ch. 15) are inclined to think that the name *nābî'* is Canaanite, and borrowed by the Hebrews, who applied it to the bands of enthusiasts of Samuel's day because they seemed to resemble the Canaanite 'prophets.' But the existence of Canaanite 'prophets,' *i.e.* bands of Dervish-like enthusiasts, is purely conjectural. We do not hear of such 'prophets' till 200 years later, and these are not Canaanite, but the priest-prophets of the Tyrian Baal maintained at the cost of Jezebel (1 K 18^{19}). Wellhausen (*Hist.* p. 449) remarks: 'Among the Canaanites such Nebiim—for so they are styled—had long been familiar.' It would not be easy to furnish the evidence. Again, the prophetic movement in the days of Samuel was a religious national one, and it is not just probable that the Hebrews would borrow terms from the Canaanites to describe it, particularly as the Canaanites were more than probably in league with the Philistines (1 S 31^{10}). The Can. and Heb. languages must have been virtually identical; at the same time the root-word appears to exist in Assyr., *e.g.* in Nebo the interpreter of the gods, and *nabu* to announce (Delitzsch, *Assyr. HWB*), and the term may have entered Canaan from Babylon. The date when the change from 'seer' to 'prophet' took place cannot be ascertained, and the change itself is difficult to explain. Possibly as persons of individuality and power arose among the 'prophets' they took a more independent position like that of 'seer,' though the name 'prophet' continued attached to them. Some personages like Gad bore both names (2 S 24^{11}).

The term *rô'eh* is used chiefly of Samuel, 7 times out of 9 (twice of Hanani, 2 Ch $16^{7.10}$). The word *ḥôzeh* is more common, 2 S 24^{11}, 2 K 17^{13}, Am 7^{12}, and often in the Chronicler, who affects archaic phraseology, *e.g.* 1 Ch 21^{9} (Gad), 2 Ch 9^{29} 12^{15} (Iddo), 2 Ch 19^{2} (Jehu), 2 Ch 29^{30} (Asaph), 1 Ch 25^{5} (Heman), 2 Ch 35^{15} (Jeduthun). In the plur. both *rô'îm* and *ḥôzîm* are used as parallel to 'prophets,' Is 29^{10} (a gloss), 30^{10}, Mic 3^{7}

---

* For example Gn 20^{7} (Abraham), Ex 15^{20} (Miriam), Nu $11^{26ff.}$ (Eldad and Medad), Dt 18^{15}, Jg 4^{4} 6^{8}, 1 S 3^{20}, cf. 2^{27}.

2 Ch $33^{18.\,19}$. The seers were so named from having visions, and possibly the priest Amaziah applied the name *ḥôzeh* to Amos (7^{12}) on account of the visions which he narrated ($7^{1\text{ff.}}$). On *ḥôzeh* (Arab. *ḥâzî*) cf. Hoffmann, *ZAW*, 1883, pp. 90–96; and on *kâhin* (=*ḥâzî*) Wellhausen, *Reste*^{2}, p. 130 ff.

iii. HISTORICAL STEPS.—1. *Time of Samuel.*—In the Book of Judges, beyond the reference to Deborah (Jg 4), and a 'prophet' in the days of Midianite oppression (6^7, cf. 1 S 2^{27}), nothing is said about prophets. Deborah was a 'prophetess,' and 'judged,' that is, ruled or governed, Israel. Both terms, 'prophetess' and 'judge,' imply that Deborah played a political rôle. She was a mother in Israel, and took the leadership in a national crisis. In the times of Samuel men called 'prophets' appear to have existed in great numbers.

(*a*) Those called 'prophets' in this age formed communities; they were cenobites, though not celibates (2 K 4^1). They are first mentioned in connexion with Saul at Gibeah of God, Saul's home (1 S 10^5). When dismissing him Samuel predicted that he would meet a band of prophets coming down from the high place with music, and engaged in 'prophesying' (1 S $10^{5.\,10}$). Another company had its home at Ramah, where Samuel himself dwelt (1 S 19^{18}). It has usually been supposed that the term *naioth* means 'dwellings,' and describes such a prophetic settlement (2 K 6^{1-7}, see NAIOTH). In the times of Elijah and Elisha other localities are mentioned as residences, *e.g.* Bethel (2 K 2^3), Jericho (2 K 2^5), and Gilgal (2 K 4^{38}, cf. 2 K 6^1). The residenters are called 'prophets' and 'sons of the prophets,' *i.e.* members of the prophetic societies (a single member is *ben-nâbî'*, Am 7^{14}). Between Samuel and Elijah (1 K 20^{35}) no mention is made of the 'sons of the prophets,' though it is probable that the succession was still maintained. Amos, a hundred years after Elijah, appears to be acquainted with prophetic societies (7^{14}), and at all times prophets continued to be numerous (1 K 22^6 18^4). As at the places named as residences there was a 'high place' or sanctuary, it was probably around these sanctuaries where J″ was worshipped that the prophets settled. In early times the distinction between priest and prophet does not seem to have been sharp. The Arab. *kâhin* was both seer and priest. Samuel was both priest and prophet. Jeremiah and Ezekiel both came out of priestly families. The connexion, indeed, of priests and prophets was always close (Is 8^2). Those prophets whom Jer. denounces as false act in concert with the temple priesthood. Pashhur, who put Jer. in the stocks, was prophet as well as priest (Jer 20^{1-6}); and it was the 'priests and prophets' who arraigned Jer. before the princes for blasphemy against the temple (Jer 26).

(*b*) The multiplication of 'prophets' at this epoch indicates a rising spirit of devotion to J″, and fervour in His service. Some have supposed that this new fervour and religious elevation were due to the influence of Samuel, and that the origin of the prophetic societies must be traced to him. But all that we have history for is that Samuel was in close relation with the prophetic communities. We see him on some occasions at their head (1 S 19^{20}); but that he did not usually reside among the 'prophets' appears from the statement that when David fled to him at Ramah the two together then went and dwelt at Naioth (19^{18}). It is evident that the prophets looked up to him and learned from him; but it is also evident that he felt that the impulses which moved them were common also to himself, and he was not ashamed to direct them, and share in their prophesyings (cf. Elisha, 2 K 4^{38}). It is probable, therefore, that the rise of the 'prophets' was due to something which swept both Samuel and the people into the same stream of national-religious enthusiasm.

(*c*) This can hardly have been anything else than the crisis that had arisen in the nation's fortunes. The people had been subdued by the Philistines, and were threatened with national extinction. And in Israel of this age national and religious were virtually the same thing. The idea of later prophets, that national autonomy might be lost, while the religion of J″ remained, had not yet been reached. It was J″ that created Israel, and made it a nation; faith in Him was the bond of its national existence, and the hour of the nation's peril awoke a new religious-national fervour. The nation's fortunes and history was from the beginning the great lesson-book in which men read the nature of J″ their God, and His disposition towards them (2 S $21^{1\text{ff.}}$ $24^{1\text{ff.}}$). The national disasters were evidence of J″'s anger, and they awoke the national conscience. The 'prophets' were not individual enthusiasts; they were inspired by common sentiments, and animated each other, and, as a society, reacted on the surrounding population. Their 'prophesying' was a kind of public worship at the high place or sanctuary, to which they went up with pipe and song, as continued to be done in after-days (Is 30^{29}). And the songs were not songs without words. They had religious contents, as much as those of the singers who afterwards 'prophesied with harps' in the temple (1 Ch $25^{2.\,3}$, cf. 2 S 23^1). However rude, they would be celebrations of 'the righteous acts of J″, the righteous acts of his rule in Israel' (Jg 5^{11}). They would be such songs as were afterwards collected in 'the Book of the Wars of J″' and in 'the Book of the Upright' (Bk. of Jashar). Some of the poetical fragments still to be found in the historical books may well belong to this age. Whether writing was practised by the 'prophets' may be uncertain (though cf. 1 Ch 29^{29}); but if they did not write, they prepared by their 'prophesying' a language for the literary prophets who came after them. In Amos, the oldest literary prophet, we find a religious nomenclature already complete; we find also in him, almost more than in his successors, the prophetic mannerism and *technique*, such as the phrases 'oracle of J″' (נאם י'), 'thus saith J″,' and much else. It is not too much to suppose that it was in these 'schools of the prophets' all down the history that this nomenclature and technique were formed.

(*d*) The new prophetism was a national-religious movement, though the emphasis lay on the religious aspect of it. Like their great successors, the prophets hoped that the national restitution would be the shape in which the religious regeneration would verify itself. Nevertheless, the national claimed expression. The monarchy was the creation of prophecy, not merely in the sense that the prophet Samuel, by inspiration of J″, gave the people a king. The national direction of prophecy embodied itself in the kingship. The first king of Israel was a prophet as well as the second. When Saul turned to go from Samuel, God gave him another heart, and when he met the prophets the spirit of God came on him and he prophesied. His excitation was not mere contagious sympathy. There was mind under it; it was the thought awakened by Samuel of his high destiny and of the task before him taking fire from contact with the national-religious enthusiasm of the prophets. The exclamation of the populace, Is Saul also among the prophets? has been taken as an expression of wonder that a solid yeoman like Saul should join himself to a company of ranting enthusiasts. This view is wholly improbable. It was not in this way that religious exaltation was looked on in the East. It was just the visible excitation that suggested to the onlooker that the enthusiast was possessed by the deity. Even the insane, just because he had no mastery over his mind, which seemed moved by another, was held inspired. A multitude of passages show the popular reverence for the prophets, *e.g.* 2 K $4^{1ff.\ 8ff.}$ (cf. 6^1 9^1), particularly 2 K $4^{42ff.}$ which describes how a person 'brought the man of God bread of the first fruits,' as people did to the sanctuary of J″ (cf. 1 K $12^{21ff.}$). Neither can Amos' disclaimer of being a prophet or one of the sons of the prophets mean that 'he felt it an insult to be treated as one of them.'[*] Amos (7^{14}) merely states a historical fact, viz. that he had not been an isolated prophet such as Elijah and others were, nor a member of one of the 'prophetic schools,' but had been suddenly called from behind the flock to 'prophesy' to God's people Israel. The respect with which he mentions prophets elsewhere as God's greatest gift to the people (2^{11} 3^7), is sufficient evidence of his feeling.[†]

2. *Early Monarchy.* — During the time of the Judges and the early monarchy the means of ascertaining the will of J″ was chiefly the sacred lot and ephod. This was employed by Gideon (Jg 8^{27}) and Micah (Jg 17. 18), by Saul, and by David and his priests in the early period of his history (1 S $23^{6.\ 9}$). At a later time it is little referred to, the king's advisers being the prophets. Side by side with this there existed seers through whom J″ spake. The Arab. *kâhin* or seer was also supposed to be possessed by a spirit, which spake through him (Wellhausen, *Reste*^{2}, 134). The seer was absorbed into the class of 'prophets,' and the name 'prophet' remained common to the isolated individual and the member of the community. And from this time forward the will of J″ was chiefly asked at the mouth of the prophet (1 K $14^{1ff.}$). The early waters of prophetism may have been somewhat turbid, but they gradually ran clear, and became that stream of ethical prophecy to which there is nothing like in the religious history of mankind. J″ spake in the mind of man and to his mind; the prophet stood in the council of God. The two ways of ascertaining the will of J″ in the age of Samuel are reflected in the two narratives of the election of Saul. Both narratives ascribe the institution of the monarchy to the will of J″, but in the one (1 S 9^1–10^{16} 11) his will is declared through prophetic inspiration, in the other (1 S 8. $10^{17ff.}$ 12) through the oracle of the lot. The latter tradition, though further removed from the actual events, is at least true to the historical conditions of the period.

The true causes of the rupture between Samuel and Saul can scarcely be ascertained. The prophetic spirit in Saul never obtained the mastery within him, it was always in conflict with contrary currents in his nature. Latterly the spirit became troubled and obscured, and its place was taken by an evil spirit from God (cf. 1 K $22^{21ff.}$). David was a man according to God's heart, that is, in all things subject to the will of J″ (cf. 1 S 15^{22}), and the prophets are found supporting his throne. Special designations are given to some of them suggestive of the offices they performed, *e.g.* mention is made of 'the prophet Gad, David's seer' (2 S 24^{11}, 1 Ch 21^9, 2 Ch 29^{25}). These prophets indirectly influenced the government and acted on the affairs of the kingdom as a whole, although through the king (2 S 24^{11} $7^{1ff.}$ $12^{1ff.}$, 1 K $1^{22ff.}$). So long as the prophets and kings were in accord this may have continued, but when kings arose who were mere national rulers and unprogressive or retrograde in religion,—of course no king of that age was irreligious in the sense of neglecting the traditional religion,—naturally the prophets, at least those among them who were ethically progressive, took another side. It might have been well for the peaceable development of the kingdom of J″ if the prophets and rulers had always been in harmony, and it might seem a calamity when a dissidence arose between them; but undoubtedly, though the disagreement was often fruitful of trouble and revolution, it contributed to the independence of the prophetic order. Prophecy resumed the 'national' element in it, which it had divested itself of and delegated to the monarchy, and stood forth against all classes and functions as the immediately inspired guardian of the kingdom of J″ in all its interests. Moses was the type of the true prophet (Hos 12^{13}, Dt 18^{15}).

3. *The Canonical Prophets.* — Prophets like Nathan, Elijah, and Elisha, following the example of Samuel, directly interfered in the government of the State. Nathan determined the succession to the throne (1 K $1^{22ff.}$); Elijah denounced the dynasty of Omri, and Elisha set in motion the revolution that overthrew it (2 K 9). The latter prophet was the very embodiment of the national spirit in the Syrian wars, and took the field in the campaign against Moab (2 K $3^{11ff.}$). Elijah and he were the national bulwark—'the chariots of Israel and the horsemen thereof' (2 K 2^{12}). But after Elisha the prophets withdraw from external national, and party, conflicts. They no more head revolutions. Nevertheless, they remain statesmen as much as their great predecessors. They could not cease to be politicians as long as the kingdom of J″ had the form of a State. They oppose, warn, and counsel kings and State parties according to the exigencies of the time. Hosea, indeed, thinks the monarchy impotent for good, if it has not been from the beginning the source of all evil ($13^{10ff.}$). But Isaiah, so long as the State was independent, warned Ahaz against involving his kingdom in the struggles of the nations, in the collision of which his country would be crushed (Is 7); and when the dream of independence had passed away he resisted with equal strenuousness the meditated revolt of Hezekiah and the Egyptian party against the Assyrian power (Is $30^{1ff.}$ $31^{1ff.}$). The same principles guided Jer. and Ezk. in the Chaldæan age (Jer 21^9 38^2, Ezk 17). But the only weapon which the prophets now use is the word of God which is in their mouth. Jer., though set over the nations to pluck up and break down, wields only the word of J″, which is like a hammer breaking the rocks in pieces (Jer $1^{9.\ 10}$ 23^{29}), and which has a self-fulfilling energy (Is $55^{10ff.}$). J″ hews the people by the prophets, and slays them with the words of His mouth (Hos 6^5). But in this age new thoughts, difficult to account for, filled the minds of the prophets. Formerly, J″, as God and ruler of His people, rejected dynasties, and by the prophets overthrew them (Hos 13^{11}); now, it is the conviction of all the prophets, both of the north and south, that J″ has rejected the nation, that Israel as an independent State is doomed to perish. Side by side with this thought, or as a consequence of it, another thought appears. The complex notion 'national-religious' seems reflected on and analyzed, and the 'religious' assumes such preponderating weight that the 'national' appears of little value. The ideal kingdom of J″ is a religious community faithful to the Lord. Another thing, closely connected with the two just mentioned, is the lofty spiritual and ethical conception of J″ God of Israel reached by the prophets of this age, and, what is but the obverse side of it, their severe judgment on the moral condition of the people. This lofty con-

---

[*] Wellhausen, *Hist.* 293. Wellhausen's remark that 'the point of the story narrated of Saul (1 S $19^{22ff.}$) can be nothing but Samuel's and David's enjoyment of the disgrace of the naked king' (p. 268), is merely the cynical sally of a modern humourist.

[†] This view of Am 7^{14} is rightly taken by J. C. Matthes, art. 'The False Prophets,' *Mod. Rev.*, July 1884. See also J. Robertson, *Early Relig. of Israel*, p. 90.

ception of J″ and this pure ideal of what His people must be, cannot be an unmediated and inexplicable leap upward of human religious genius, neither can it be a sudden divine creation. It did not, like Jonah's gourd, grow up in a night. History, unhappily, does not enable us to follow its growth. But it is the perfect efflorescence of a tree whose roots stood in the soil of Israel from the beginning, whose vital energies had always been moving towards flower, and which burst forth at last in the gorgeous blaze of colour which we see. The wealth of ethical and religious teaching found in the prophets of this age has led to a reaction against the former idea that prophecy was specifically prediction, and the view has become prevalent that the true function of the prophet was to be a teacher of ethical and religious truths. This view is also one-sided. The prophets never cease to be 'seers'; their face is always turned to the future. They stand in the council of J″ (Am 3^{7}, Jer 23^{22}), and it is what He is about to do that they declare to men. Their moral and religious teaching is, so to speak, secondary, and due to the occasion. Their conviction is that the destruction of the nation is inevitable, and they dwell on the nature of J″ and on the moral declension of the people to impress their conviction on the nation—'prepare to meet thy God, O Israel' (Am 4^{12}). Or, as their conviction of the inevitableness of the nation's doom does not seem absolute, but is crossed, at least at times, by the possibility or even the hope that it might be averted (Am 5$^{14.15}$, Is 1^{18}, Jer 36$^{1-3}$), they impress on the people the mind and life which is acceptable to J″—that which is good, and what the Lord requires of them (Mic 6^{8})—that they may repent, and that His judgments may be arrested. Or, when the foreboding of near destruction again oppresses them, they look beyond the dark and tempestuous night that is gathering to the day that will dawn behind it (Is 8$^{16ff.}$),—for though J″ will destroy the sinful kingdom He will not destroy the house of Jacob (Am 9^{8}),—and they dilate on the righteousness and the peace and the joy of that new age (Is 9$^{1-6}$, Hos 2$^{18ff.}$). The prophets now employ writing, and the short, drastic oracles of former times (1 S 15^{22}, 1 K 11^{31} 21^{19}) give place to discourses of considerable length. By writing they could influence many whom their voice could not reach, and the written word became a permanent possession of the godly kernel of the people, upholding them in the midst of the darkness when God's face was hidden, and being when the calamities were overpast a witness that God had still been with them (Is 8$^{16ff.}$, Ezk 2^{5}). The instances of Deuteronomy and the roll of Jeremiah show that a writing produced a far more powerful impression than the spoken word of the prophet.

A strange and interesting phenomenon in the history of prophecy is what is called **'False' Prophecy.** The true prophets, whose word history and God's providence verified, and to which the religious mind of mankind has set its seal, laid emphasis on the 'religious' element in the complex 'national-religious' idea. The unity J″ and the nation had to their minds become disrupted, and J″ now stood opposed to the nation. The 'false' prophets continued to lay the chief emphasis on the 'national' side; hence they might be called nationalistic prophets rather than false, though, of course, their anticipations were often disproved by events. The question whether these prophets were retrograde or only unprogressive, will be answered differently according to the view taken of the development of religion in Israel. There is no reason to suppose that they had personally sunk below the level of their own time. They stand on the same level with the body of the people. The charge of the canonical prophets is that the nation as a whole had declined from the purer moral and religious ideal of early times (Hos 2^{7}, Is 1^{21}). And this charge is certainly true. For, admitting that the people by entrance upon the Canaanite civilization had attained to a broader and fuller human life, and admitting even that the conception of J″, by taking up into it some of the thoughts connected with the native gods, became enlarged and enriched, mixture with the Canaanites produced a deterioration both in the life and religion of Israel. It is this deterioration that seems to the true prophets so fateful in regard to the destinies of the nation. And it is on this question of the national future that conflicts arise between the true prophets and the false. It is in this region, too, that another new phenomenon in the history of prophecy appears in this age—the persecution of the prophets. Former prophets, like Samuel, Elijah, and Elisha, were embodiments of the 'national-religious' spirit, and carried the people with them. The new outlook of the prophets regarding the national destinies enraged the populace. The prophets seemed to them madmen; their predictions that J″ would destroy His people were incredible; they were traitors, and sought not the welfare of the people, but their hurt (Jer 38^{4}). The prophets probably might have preached as they liked about the nature of J″ and the kind of service pleasing to Him, if they had not gone further and drawn inferences as to the destinies of the nation. Jehoiakim showed his indifference to Jeremiah's preaching, or his contempt for it, by throwing his book piecemeal into the fire; it was only when at the end of the roll he found the assertion that Nebuch. would come and destroy the land (Jer 36^{29} 25$^{9.10}$), that he ordered the prophet's arrest. On another occasion Jer. was seized and beaten on the suspicion that he was falling away to the Chaldæans, and flung into a dungeon because his gloomy anticipations disheartened the men of war in the city (38^{4}). And it was because of his prophecy of national disaster (1 K 22) that Ahab ordered Micaiah to be confined on bread and water till he came back (he did not come back!). It was not their religious opinions but their political threats that drew persecution on the prophets (Am 7$^{10ff.}$). The persecution was the convulsive effort of the 'national-religious' spirit to maintain itself. No doubt many of the people were impatient of the prophets' general teaching, or contemptuous of it: they burlesqued their manner (Is 28$^{9.10}$), and ironically invited the interposition of the Lord with which the prophets threatened them (Is 5$^{18.19}$); they imposed silence on them (Am 2^{12}, Mic 2^{6}), and told them to have done with the Lord of hosts in their hearing (Is 30$^{9-11}$); but it was mostly when the prophets entered the political region, or when to the general mind they seemed guilty of sacrilege (Am 7$^{12.13}$, Jer 7^{14} 26$^{7.8}$), that harsher measures were adopted. No doubt the persecution of the prophets by Ahab at the instigation of Jezebel was on account of their opposition to the introduction of the Baal worship. But even this persecution seems to have been transient, for shortly before his death we observe Ahab on the best of terms with the prophets (1 K 22). If the 400 mentioned here are 'false,' or merely nationalistic, prophets, probably many of them had opposed the Baal cultus if for no higher reason than that J″ was the national God. The persecution by Manasseh, of whom we know so little, would be for similar reasons, because the prophets opposed the Assyrian cults which the king so ardently patronized.

4. *The Expiry of Prophecy.*—Many things contributed to the decline and final failure of prophecy.

(*a*) The prophets bore some resemblance to a progressive political party in a State. So long as abuses exist, and privilege leads to injustice and oppression of the weaker classes, such a party is strong. Its power lies in attack. But when abuses have been removed, and the reforms demanded have been conceded and placed upon the statute book, the function of the party of progress has ceased. Now, the evils against which the prophets contended had, externally at least, been removed by the reform of Josiah. Deuteronomy received the sanction of the king and government, and became the law of the State. This was a triumph of prophetic teaching on morals and religion; but if it was thus a witness to the power of prophecy in the past, it was virtually a death-blow to it for the future. For by embodying the practical issues of the prophetic principles in law, having State authority, it superseded the living prophetic word. No doubt even after Deut. became State law Jer. continued to be a prophet. He perceived that the reform was merely external, and he continued to demand something more inward—not reform but regeneration.

(*b*) Again, the great prophets from Amos to Jeremiah had traversed the whole region of theology and morals. Little could be added to what they had taught concerning J″ and His purposes, concerning man and his destiny. Those who came after them could do little more than combine their principles into new applications and uses. And in point of fact such prophets as Ezekiel and Deutero-Isaiah are almost more theologians than prophets.*

(*c*) Another thing which contributed to the expiry of prophecy was the fall of the State. With the destruction of Jerusalem, the nation, the subject of prophecy, ceased to exist. Its destruction was the seal set to the truth of prophecy, to its teaching on God and the people, and its task was done. If in a sense prophecy had destroyed the nation it had saved religion. For by teaching that it was J″ who brought ruin on the State it showed that the downfall of the nation was not the defeat but the triumph of J″. The gods of the nations, Chemosh, Asshur, and Merodach, perished with the nations of whose spirit they were the embodiments, but Jehovah rose the higher over the ruins of Jerusalem. He was seen to be the God of Righteousness, the moral Ruler of the world—

Jehovah of Hosts was exalted in judgment,
And the Holy God sanctified in righteousness
(Is 5^{16}).

When Israel perished as a nation, and was scattered over every land, the *idea* of Israel just by being detached from the nation became clearer; the conception of Israel, of its place in the moral history of mankind, took the place of Israel, and the second Isaiah, operating with this conception, —the servant of the Lord,—is still a prophet. No doubt with all his brilliancy much of his book is theological deduction from his lofty conception of J″, but in one respect he is what all the great prophets were, an 'interpreter' of history, and by far the profoundest. He stands at the end of Israel's history, and looking back he reads its meaning, which is that its sufferings as servant of the Lord have atoned for its sins as a mere part of mankind.

(*d*) Although at the Restoration the gorgeous anticipations of the second Isaiah had been disappointed, the idea of what Israel was, its consciousness of itself and its meaning in the religious life of mankind still maintained themselves. The eschatological hope remained indestructible. This hope had sometimes a national element in it, the idea of a political supremacy of Israel over the other nations, but it was mainly the hope of religious supremacy as the people of God (Is 61^{6}). Israel had become a purely religious idea, its mission was to be the light of the nations—salvation was of the Jews. And this great eminence and triumph God would confer upon it by a sudden interposition, when He would plead its cause and 'justify' it by showing it to be in the right in its time-long plea against the nations—a plea which in other words was the religious history of mankind (Is $50^{4ff.}$). And what remained for Israel was to prepare for God's interposition, and be worthy of it by doing His will. Thus, when Israel was merely a religious community with no national life, prophecy became altogether detached from history and took the form of reflective and theological combinations of former prophecies. Its theme was the eschatological hope, and it occupied itself with searching what, and what manner of time this hope would be realized (Dn 9^{2}, 1 P 1^{11}). Prophecy becomes Apocalyptic. Apocalyptic continues to share all the great ideas of prophecy: it regards history as the expression of God's moral rule of the world; it regards God as purposing and foreseeing all its great movements; and it supposes Him to reveal His purposes to His servants from the beginning. Hence, instead of looking back over history, Apocalyptic plants itself in front of history, turning history into prophecy, and locating all its great movements in the mind of some ancient seer, Enoch, Moses, Baruch, Daniel, or Ezra. Apocalyptic is thus always pseudepigraphic; but the date of an Apocalypse can generally be guessed from the fact that up to his own time the author is pretty accurate, having history to rely on, while from his own time on to the end he can only forecast or calculate.

In the times when prophecy had virtually ceased there are occasional references to it. The references are of two kinds. Generally they are expressions of sorrow that the people has no more the guidance of the prophet in its perplexities and darkness, and of the hope that a prophet will again arise; but once at least prophecy is spoken of with dislike. In the one case the true prophet is thought of, in the other the misleading false prophecy. See on the one hand Ps 74^{9}, 1 Mac 4^{46} 9^{27} 14^{41}; cf. La 2^{9}, Pr 29^{18}: on the other hand Zec 13^{1-6}; cf. La 2^{14} 4^{13}.

The prophets of the OT may be grouped thus—

i. PROPHETS OF THE ASSYRIAN AGE.
  Jonah (referred to 2 K 14^{25}).
  Amos, *c.* 760–750.
  Hosea, *c.* 750–737.
  Isaiah, 740–700.
  Micah, *c.* 724 and later.
  Zephaniah, *c.* 627.
  Nahum, *c.* 610–608.

ii. PROPHETS OF THE CHALDÆAN PERIOD.
  Jeremiah, *c.* 626–586.
  Habakkuk, *c.* 605–600.
  Ezekiel, *c.* 593–573.

iii. PROPHETS OF THE PERSIAN PERIOD.
  Is 13–14 21^{1-10} 34–35?.
  Deutero-Isaiah, *c.* 540.
  Haggai and Zechariah, 1–8, *c.* 520.
  Malachi, *c.* 460–450.

Probably later, at all events after the Restoration, Joel, Jonah, Obadiah (in present form), Is 24–27, Zec 9–14.

B. *THE PROPHETIC MIND.*—Many questions arise regarding the mind of the prophet which can hardly be answered, but allusion may be made to some of them.

i. THE IDEA OF THE PROPHET.—A number of things are said of the prophet which might serve as partial definitions. Such definitions are different at different times, the prophet being regarded from various sides. In inquiring into the prophetic mind, it is the prophet's own idea of himself that is of interest; but his idea of himself did not differ from the people's idea of him, though in his own case the idea was based on his consciousness, in the case of the people on their observation. Both believed that the prophet was one who spoke the word of J″. When threatened with death Jer. said to the people, 'For of a truth J″ has sent me unto you to speak all these words in your ears' (Jer 26^{15}); and the people's idea of their prophets, if not of Jer., was the same: 'the word shall not perish from the prophet' (Jer 18^{18}).

---

* Wellhausen remarks (*Reste* ^{2}, 137) that with the revelation of the Koran the function of the *kâhin* or seer came to an end, and he disappears.

Certain names applied to the prophet are suggestive of ideas entertained of him. (1) One of the oldest and most common of these designations was **man of God.** The name is used of Samuel (1 S 9^{6}), of Elijah and Elisha, and of others (1 K 12^{22} 13, Jer 35^{4}), and often of Moses. The name implies close relation to God; the prophet is near to God (Am 3^{7}, Jer $23^{22.28}$). The Shunammite made a little chamber for Elisha, because he was 'a holy man of God' (2 K 4). Holiness is nearness to God; whether in this age it already connoted moral purity (Is 6^{5}) may be uncertain; the 'man of God' at any rate suggested this, for the widow of Sarepta said to Elijah, 'What have I to do with thee, thou man of God? art thou come to call my sin to remembrance?' (1 K 17^{18}). The name 'man of God' suggests both the ethical basis of prophecy and the religiousness of the prophet. All the prophets pass moral judgments on their contemporaries, *e.g.* Nathan on David (2 S 12) and Elijah on Ahab, and the pages of the literary prophets contain little else than such judgments. And Jeremiah at last goes so far as to say that the mark of a true prophet is just that he passes such a moral condemnation on his time; this of itself authenticates him (Jer $28^{8.9}$). How deeply the moral entered into the prophet's own idea of prophecy is seen in Is $6^{5\text{ff.}}$, cf. Mic 3^{8}. But the notion of religiousness or godliness suggested by the name 'man of God' is even more important. The prophet's 'call' was less appointment to an office as we call it, than to a religious life-task. His prophesying was lifted up into his own personal religious life. The fountain of prophecy was communion with God. This is seen in Jer., in whom prophecy and piety melt into one another. (2) Another common designation of the prophet is **servant of God** or **of J″**. The name is given to prophets in general (2 K 9^{7}), to Elijah (1 K 18^{36}), Isaiah (20^{3}), and others (1 K 14^{18}, 2 K 14^{25}), particularly to Moses. The service is usually public, in the interests of God's kingdom. The name 'servant of J″' is given also to Israel. Israel is the great servant of J″—his ministry is to mankind, that of the individual prophets is to the narrower world of Israel itself. And in like manner both Israel and the prophet are called *messenger of J″*—the one to the nations (Is $42^{18.19}$), and the other to Israel (44^{26}). The term 'messenger' is used mostly in late writings (Hag 1^{13}, Mal 3^{1}), but the consciousness of being 'sent' is common to all the prophets—'Go and tell this people' (Is 6^{9}, Jer 26^{15}). The prophet feels he has a commission to the people as much as Moses felt he had a commission to Pharaoh. (3) Another name given to the prophet is **interpreter.** The name, though rare (Is 43^{27}), is descriptive of the position of the prophet in regard to history and God's providence. God speaks in events, and the prophet interprets Him to men. Prophecy arises out of history, keeps pace with it, and interprets it. God is the author of Israel's history, and His meaning in it, His disposition towards the people as expressed in it, reflects itself in the prophet's mind. And as it reflects itself it awakens in him the sense of the people's evil; and being one with them he becomes the conscience, particularly the evil conscience, of the people. Events are never mere occurrences; God animates them; each great event of history is a theophany, a manifestation of God in His moral operation. The eyes of ordinary men do not perceive this meaning, and when suddenly confronted with some unexpected issue they exclaim, 'Verily thou art a God that hidest thyself, God of Israel, the Saviour' (Is 45^{15}). Further, no event is isolated; each has resulted from something preceding it, and will issue in consequences following it. History is a moral current, and at whatever point in it the prophet stands he feels whence it has come and whither it is flowing. Of course, the prophet is not a mere interpreter of history or institutions.* To suppose so would be to give him the second instead of the first place; the mind of man is greater than institutions or history, and it is in it above all that God will reveal Himself. And even the institutions and history are not mere miraculous Divine creations; men concurred in founding the institutions, and they have their part in making the history. Events furnish the occasion of the prophet's intuitions, but they do not set bounds to them. Indeed we often see the prophet's mind outrunning history, filling the events around him with a profounder meaning than they actually contain. His own mind is full of great issues, great ideals of the future; and eager to see their realization he animates the events occurring in his day with a larger significance than they have, thinking they will issue in the final perfection for which he yearns. If he proves at fault in regard to the *time*, he rightly divines the moral connexion of the events of his day with the perfection of the end. Other names, such as 'seer,' 'watchman' (Jer 6^{27}, Ezk 3^{17}), need not be dwelt upon.

There are several passages, belonging to different dates, which might be taken as definitions of 'prophet.' In Am $3^{7.8}$ it is said, 'The Lord God doeth nothing without revealing his counsel to his servants the prophets.' Jer. (23^{22}) varies this by saying that the prophet stands 'in the council' of J″, and knows His purpose (Job 15^{8}). The passage states two things, viz. that J″ reveals His mind and purpose to the prophets, and that He does so particularly in reference to the future. When great events are about to happen, involving the destinies of the people, the sensibility of the prophet is quickened and feels their approach, and he stands forth to announce them. Thus Amos and Hosea appear as heralds of the downfall of the kingdom of the North; Micah and Isaiah, when the storm-cloud of Assyrian invasion was rising on the northern horizon, and Jeremiah when the empire of the East was passing to the Chaldæans, and the downfall of Judah was nigh at hand. Among other passages referring to prophecy on its predictive side, Is $41^{4.21\text{ff.}}$ (cf. $45^{18.19}$) deserves mention. Here predictive prophecy is claimed for J″ and Israel and denied to the idols and their peoples, and the power to predict as well as the fact of having truly predicted is proof that J″ is God. J″ is the first and the last; He initiates the movements of history, and He brings them to an end. From the beginning He foresees the end. But it is His relation to Israel that causes Him to announce it beforehand. For Israel is His servant, and His purpose can be fulfilled only through the co-operation of men, to whom it must be revealed. The conception of a living God in moral fellowship with men involves in it prophecy having reference to the future. Here again prophecy is lifted up into the sphere of personal religious life.

The passage Dt 18^{9-22}, though not excluding prediction, places prophecy on a broader basis. Prophecy is due to two things: (1) to that yearning of the human spirit to know the will of

---

* This seems the idea of v. Hofmann, *Weissagung u. Erfüllung.*

the deity, and to have communion with him, common to men everywhere. This yearning created many kinds of diviners, who by external means inferred what was the mind of deity. But it is not in this way, but in one higher and worthier, that the true God satisfies the yearning of His people's heart (Nu 23^{23}). However profusely signs of Him and of His mind be scattered over nature, there is a more immediate intercourse between Him and men. He speaks to the mind of man directly; there is a communion of spirit with spirit. J″ puts His words in the prophet's mouth, who speaks them in His name (Dt $18^{18.19}$). (2) And the reason for employing a prophet as mediator between J″ and the people is that the people shrank from hearing the voice of J″ speaking to them directly. He spoke the ten words in the people's ears at Horeb, but Israel said, 'Let me not hear again the voice of the Lord my God, that I die not' (18^{16}). An extraordinarily lofty place is assigned here to the prophet: his words are as much the words of J″ as if J″ spoke them immediately with His own voice (cf. Nu 12^2). But these words of Moses, 'A prophet shall the Lord your God raise up unto you like unto me,' contain other points illustrating the idea of 'prophet.' The term 'raise up' (cf. Am 2^{11}) is used of the judges, and in many ways the prophets were the successors of the judges. The prophet is immediately raised up. The Divine act is reflected in his own consciousness in the crisis named his 'call.' His position is a personal one. He is not a member of a caste inheriting an office. He may be taken from any class: from the priesthood, like Samuel, Jer., and Ezek., and probably others; from the aristocracy of the capital, like Isaiah from the population of the country townships, like Micah and Urijah of Kiriath-jearim (Jer 26); or from those that followed after the flock, like Amos. Women, too, might be prophetesses, as Miriam, Deborah, and Huldah (2 K 22). The singular 'a prophet' may be used collectively of a line of prophets (Hos 12^{13}), or more probably as there was usually only one great prophet at one time the reference may be to the individual prophet in each age. In the words 'like unto me' the prophet is put on the same plane with Moses; and so far as the scope of his functions extended this is the best definition. It may be said that we really do not know what Moses was like; and to say that the prophet was 'like Moses,' is to explain the unknown by the more unknown. We know at least what Moses was thought to be like in the age of the Deuteronomist and earlier—he was one faithful *in all God's house* (Nu 12^7); and the prophet's oversight was equally broad. Prophecy was not an institution among other institutions, like priesthood and monarchy; it founded the monarchy, and it claimed in the name of J″ to correct and instruct priests as well as kings. Tholuck * has defined the prophet as 'the bearer of the idea of the theocracy.' The definition is true in the sense that the prophets do not claim to be originators, they have inherited the principles which they teach; but it touches the prophet only on his intellectual side. The prophet was more than a teacher, and the theocracy was life as well as truth. The prophet was not only the bearer, he was the embodiment of the idea of the theocracy. This idea, which is that of the communion of the living God with mankind, was realized in him and through him in Israel. Though he could be distinguished from Israel he was, in truth, Israel at its highest. The prophets were not persons who stood as mere objective Divine instruments to the people whom they addressed; they were of the people; the life of the people flowing through the general mass only reached its flood-tide in them. Every feeling of the people, every movement of life in it, sent its impulse up to them; every hope and fear was reflected in their hearts. And it was with hearts so filled and minds so quickened and broad that they entered into the communion of God.

One other passage may be referred to which expresses very clearly the main element in the idea of prophet. In Ex 7^1 J″ speaks to Moses, 'See, I have made thee God to Pharaoh, and Aaron thy brother shall be thy prophet' (P). In Ex 4^{16} (J) a similar statement occurs, 'He (Aaron) shall be thy spokesman to the people; he shall be to thee for a mouth, and thou shalt be to him God.' Moses 'inspired' Aaron, and Aaron spoke his words to Pharaoh and the people. So all the prophets, *e.g.* Is 30^2 31^1, regard themselves as the 'mouth' of J″.

ii. INSPIRATION.—When Samuel dismissed Saul he said to him, 'Thou shalt meet a band of prophets; and the spirit of the Lord will come mightily upon thee, and thou shalt prophesy with them, and shalt be turned into another man' (1 S $10^{5.6}$). The term 'prophesy' describes the excited demeanour and utterance of the prophets, and the 'spirit' is regarded as the cause of this. Of course, the prophets did not utter mere sounds, but words with meaning; but it is the personal exaltation of the prophet himself, who has become another man, and not specially the contents of his utterance, that is ascribed to the 'spirit.' The man on whom the spirit comes, oftener performs deeds than speaks words. The 'spirit of the Lord' came on Samson, and he rent the lion as he would have rent a kid (Jg 14^6); it came on Saul, and he slew his oxen and sent the fragments throughout Israel, calling to war with Ammon (1 S 11^6); similarly it came on Gideon (Jg 6^{34}), Jephthah (11^{29}), and others, and they went out to war and judged Israel. The spirit of the Lord suddenly carries Elijah away, one knows not whither (1 K 18^{12}), and men fear that it may cast him upon some mountain or into some valley (2 K 2^{16}); and with 'the hand of the Lord' upon him he kept pace with Ahab's chariots (1 K 18^{46}). Probably the conception of God and that of the spirit of God always corresponded to one another. In early times God was conceived more as a natural than a spiritual force; His operation, even when He might operate on the ethical side of man's nature, was physical. Hence 'spirit' connotes suddenness and violence in the Divine operation. When one is seen performing what is beyond man to do, or what is beyond himself in his natural condition, both to himself and to the onlooker he appears not himself, he is another man; he is seized and borne onward by a power external to him—the spirit of the Lord is upon him. One under the spirit is always carried away by an impulse, sudden, and often uncontrollable. Hence the terms descriptive of the spirit's operation suggest suddenness and violence; it 'comes upon' (היה על 1 S $19^{20.23}$), 'comes mightily upon' (צלח 1 S $10^{6.10}$), 'falls upon' (Ezk 11^5), 'descends and rests on' (נוח Nu $11^{25.26}$), 'puts on' a man as a garment (לבשׁ Jg 6^{34}, 2 Ch 24^{20}), 'fills' him (Mic 3^8), and the like. Similarly it is said that the 'hand of the Lord' comes upon him (Ezk 1^3, 2 K 3^{15}), and overpowers him (Is 8^{11}). All these expressions describe the phenomena visible to the onlooker, or experienced by the prophet. But it is the complex manifestation that they describe; they do not analyze it, nor answer the question, Where amidst these phenomena is the point at which the spirit operates?

It is remarkable that in the literary prophets little reference is made to the spirit, and the references made are rather allusive than formal and direct. Hosea (9^{7}) calls the prophet 'the man of the spirit'; Isaiah ($30^{1.2}$, cf. Job 26^{4}) uses 'spirit of J″' as parallel to 'mouth of J″'; and Micah (3^{8}) declares himself full of power 'by the spirit of J″' to declare unto Jacob his transgression.* But other prophets, including Amos and Jer., do not express the idea. The explanation of this fact is probably this: in this age the violent excitation usual in early prophecy had almost disappeared; it was the violent impulse to speak or act that 'spirit' particularly connoted, and hence references to spirit are rare. Isaiah on one occasion (8^{11}) speaks of the 'hand' of J″ being upon him, which may refer to some unusual elevation (though cf. Jer 15^{17}), but the 'power' which Micah was conscious of was probably moral, though whether intermittent or not may be uncertain. Some have supposed that in this age the spirit was regarded as a permanent possession of the prophet, and for that reason not specially alluded to.† In Nu 11^{25} the spirit that was upon Moses is spoken of, part of which rested on the elders, and they prophesied. Their prophesying was momentary and under great excitation; but whether the 'spirit' was considered a permanent possession of Moses or not is not clear (cf. v.^{25} with v.^{29}). And the same uncertainty remains with regard to the 'spirit' that was on Elijah (2 K $2^{9ff.}$). In Is $11^{2ff.}$ the spirit of J″ is said to descend and rest upon the Messiah, giving him discernment, counsel, and might in rule, as well as the fear of the Lord; and this spirit would seem a permanent possession, though revealing itself as occasions required. But the failure of the canonical prophets to refer to the spirit is scarcely due to their thinking of it as a permanent power indwelling in them; it is rather due to their not thinking of the spirit specially at all. The cessation of the ecstasy left the prophet his proper self; he was conscious of being an independent individual person, and as such he entered into fellowship with God. He was no more driven or overpowered by an impulse from without, which superseded his proper self; his communion with God was a communion of two moral persons. God, it is true, did not speak to him face to face and externally as He did to Moses, but He spoke no less really to his mind. The nature of the communion is clear from the dialogues in Is 6 and Jer 1. In its full perfection it is seen in Jeremiah, who should be taken as the true type of the prophet.

---

* *Die Propheten u. ihre Weissagungen*, p. 12.

At a later time references to the spirit again recur, particularly in Ezekiel. How far the trances of Ezekiel were real, being partly due to a natural constitutional temperament, and how far they are mere literary embodiment of an idea, may be disputed. In the latter case the idea they express would be the one running through all his prophecies, the transcendent majesty and power of God, and the nothingness of the 'child of man,' who is a mere instrument in the hand of God. In this late age various ideas of the spirit prevail. A prophet like Joel goes back to the early forms of prophecy, and reproduces the ancient idea of the spirit ($2^{28ff.}$ [Heb. $3^{1ff.}$]). In other passages the spirit appears a permanent possession, being like the gift bestowed on one when consecrated to an office (Is 61^{1}); while in others still the spirit seems generalized into the Divine enlightenment and guidance given to Israel through its leaders and prophets all down its history (Is 59^{21} 63^{10}, Hag 2^{5}). But amidst some variety of conception certain ideas of the spirit always remain: the spirit is something external to man, something Divine, something bestowed by God on man.

Taking into account what has been said above of the 'spirit,' it appears that what has been called the *prophetic state* varied at different times. Two periods can be distinguished, though not separated from one another by any sharp line of demarcation: the early prophetic period, and the period of the literary prophets. (1) In the early period mental excitation was common, though the excitation might be of various degrees; self-consciousness was not lost, and memory of what was experienced remained; the NT rule that 'the spirits of the prophets are subject to the prophets' was in most cases verified. The revelation in this period often took the form of dream and vision. The OT couples these two together (Nu 12^{6}, Jl 2^{28} [Heb. 3^{1}]). Dream and vision are not identical, but they differ chiefly in degree—the degree to which the senses are dormant, and the consciousness of what is external is lost, and reflective control over the operations of the mind is suspended. The prophets regard their dreams and visions as something objective in the sense that they are caused by God (Am $7^{1ff.}$). But in attempting to analyze the prophetic mind we must remember that dreaming and seeing a vision are forms of *thinking*; the contents of the dream and vision are not objective, as things seen with the bodily eye are objective, they are creations of the mind itself. Perhaps the best idea of the prophetic mind in this period or in this condition might be got by reflecting on the phenomena of the dream. Now, it is in this period that the phraseology current all down the prophetic age originated, and it is the phenomena of this period that it describes—such phraseology as 'see,' 'vision,' 'hear,' 'the word of the Lord,' and such like. In this early time prophets did 'see' and had 'visions'; they did 'hear' the 'word of the Lord,' just as one sees persons and things, and hears words audibly in a dream. The terms truly describe the mental experiences of the prophet, and are not mere figures of speech. But in the time of the canonical prophets visions and dreams virtually ceased, though the prophetic language still remained in use. It is quite possible that in some cases the literary prophets still had visions and 'heard' words, but certainly they use the ancient phraseology in a multitude of instances when they had no such experience. Jer. alludes with aversion to the 'dreams' of the false prophets. It is possible that these dreams were in some cases real, being due to the agitations produced by the political crises of the time. If so, it is another evidence that these prophets still occupied a position which the true prophecy had long abandoned. (2) Perhaps the best idea of the mental state of the prophet in the purest stage of prophecy would be got by considering the condition of the religious mind in earnest devotion or rapt spiritual communion with God. Even the earliest prophets intercede with God (Am 7, cf. Ex 32^{11}); and Oehler has drawn attention to the fact that the communication of a revelation to them is often called 'answering' them—the same expression as is used in regard to prayer (Mic 3^{7}, Hab $2^{1ff.}$, Jer 23^{35}). The prophets asseverate very strongly that it is the word of God which they speak. But it is doubtful if any psychological conclusions can be drawn from their language. For it is to the *contents* of their prophecies that they refer; and though it might seem strange that they do not allude to any mental operations of their own, the analogy of the devout worshipper suggests an explanation. A person in earnest prayer to God and communion with Him, though his mind will certainly be profoundly exercised, when light dawns on him, or certitude is reached, or conduct becomes plain, will also feel and say with certainty that it was God who gave him the result he reached. It might be rash to say that the experience of such a devout mind is perfectly analogous to that of the prophetic mind, but the analogy is probably the nearest that can be found.

---

* Some scholars regard the phrase *by the spirit of J″* as an explanatory gloss (Well., Nowack, etc.). The sense of את is uncertain; it may mean *with, by the aid of*, Gn 4^{1}, Job 26^{4}, or it may be accus. sign: 'full of power, even the spirit of J″,' RVm.

† Giesebrecht, *Die Berufsbegabung der alttest. Proph.*

It may be said, therefore: (1) that the prophet's mind in revelation was not passive, but in a state of activity. Even the 'call' to prophesy was not addressed to a mind empty or unoccupied with the interests of the nation. The 'call' came to the three great prophets through a vision (Is 6, Jer 1, Ezk 1), but it is recognized that the 'vision' contains strictly nothing new; it is a combination of ideas and thought-images already lying in the mind. Isaiah, for example, had often thought of the Holy One of Israel, the King, previous to his vision; he had often considered the sinfulness of the people, which he himself shared; and no doubt he had forecast the inevitable fate of the people when J″ arose to shake terribly the earth. These thoughts probably occupied his mind at the moment of his call, for it came to him as he worshipped J″ in the temple, and beheld His glory (cf. also Jer 1[4-10]). Neither can the *compulsion* of which the prophets speak be regarded as anything physical. Even when Amos says, 'The Lord God speaks, who can but prophesy?' the constraint is only moral. And similarly when Jer. says, 'Thou didst induce (or entice) me, and I was induced' (20[7]), he refers to the conflict in his own mind described in 1[4-10]; and even when he speaks of the word of J″ being as a fire in his bones, compelling him to speak, when, to avoid persecution, he had resolved to be silent, there is nothing more than such moral constraint as was felt by the apostles in the early days of the Church, or by one now with earnest convictions. Again, the allegation, often made, that the prophets did not understand their own oracles, can hardly be substantiated. The passage 1 P 1[10ff.] says that the prophets 'searched what time or what manner of time the spirit of Christ which was in them did point unto'; but first, it speaks of the prophets as a body, and of the spirit common to them all. It does not say that any prophet searched his own prophecies. The apostle probably generalizes the instance referred to in Dn 9[2], where Daniel searches the prophecies of Jeremiah. Further, the point to which the search was directed was the *time* or *manner of time*, nothing else. And this point, if indicated at all, was indicated so obscurely that it had to be inferred from the other contents of the prophecy (cf. Mt 24[36]). (2) The kind of operation of the prophetic mind when reaching or perceiving truth was intuition. In the early times of prophecy the excitation or comparative ecstasy was common. This elevated condition of the intuitive mind was natural to an Oriental people, and in an early age. It was a thing particularly natural when truth was new; when convictions regarding God, and man's duty in moments of great personal responsibility or national trial, were for the first time breaking on the human mind. But, on the other hand, it is equally natural that as prophecy became more regular and acquired the character of a stable institution, such accompaniments of revelation in the mind would gradually disappear. And the same effect would follow from the gradual accumulation of religious truths. These were no longer altogether new. As fundamental verities they had entered into the consciousness of the nation. What was new was only the application of them to the particular crisis in the individual's life or the nation's history, or that further expansion of them needful in order to make them applicable. But this was always new. No truth uttered by a prophet has attained the rank of a maxim of reflection or a deduction from prior truths. The prophet never comes before men inferring. His mind operates in another way. The truth reached is always a novelty to him, so that he feels it to be an immediate communication from God. But it is vain to speculate how the Divine mind coalesces with the human, or to ask at what point the Divine begins to operate. Some have argued that the operation was dynamical, that is, an intensification of the faculties of the mind, enabling it thus to reach higher truth. Others regard the Divine operation as of the nature of suggestion of truth to the mind. What is to be held, at all events, is that revelation was not the communication of abstract or general religious ideas to the intellect of the prophet. His whole religious mind was engaged. He entered into the fellowship of God, his mind occupied with all his own religious interests and all those of the people of God; and his mind thus operating, he reached the practical truth relevant to the occasion.

iii. THE FALSE PROPHETS. — Reference has already been made in the historical sketch to the so-called false prophets, but the phenomenon of false prophecy has points of connexion also with the prophetic mind. A hard-and-fast line of demarcation between true and false prophecy can hardly be drawn. The fact that prophecy was the embodiment of a religious-national spirit accounts for what is called false prophecy. When the spirit that animated the prophet pursued predominantly national ends, he was a false prophet; when the ends pursued were religious and ethical the prophet was true, because in the religion of J″ the national was transient, and the ethical abiding.

In early times men everywhere felt the nearness of the supernatural; the Divine, with its manifestations, was all about them. Those who seemed or who professed themselves to be inspired were accepted as being so (cf. the reception given to Ehud by the king of Moab, Jg 3[20f.]). The spirit of the time was not critical; it was reverent, or, as we might now say, credulous. In the first conflict which we read of between true and false prophecy (1 K 22) the 400 prophets of Ahab were false and Micaiah true, but Micaiah did not consider the pretensions to inspiration of his opponent Zedekiah to be false. He was inspired, but it was by a lying spirit from the Lord (1 K 22[22. 23]). This lying spirit was put by J″ in the mouth of the prophets of Ahab that they might entice him to his destruction. The explanation given by Ezekiel (Ezk 13. 14) is similar: J″ deceives the prophet that He may destroy him and his dupes alike (14[9]). But J″'s deception of the prophets in order to destroy them and those who consult them is in punishment of previous evil (1 K 22[8], Ezk 14[1-11], 2 S 24[1]). A profounder conception of the ethical nature of J″, and a dislike to regard Him as the author of evil (cf. 2 S 24[1] with 1 Ch 21[1]), combined perhaps with a more critical judgment of their contemporaries, led others to a different explanation. To Jeremiah the false prophet is not inspired by a lying spirit from J″, he is not inspired at all. He speaks out of his own heart, and has not been sent (Jer 23[16. 21. 25. 26]). Micah goes further and analyzes the prophet's motives: he speaks what men wish to hear (2[11], cf. Is 30[10ff.]), and for interested ends—'When they have something to chew with their teeth they cry, Peace; but whoso putteth not into their mouth, they preach war against him' (3[5]). And the priest Amaziah (Am 7[12]) seems to have formed his idea of the prophets as a whole from this class.

There are several kinds of false prophecy of little interest except as casting light on the religious condition of the people, *e.g.* prophecy by other gods than J″, a thing perhaps not very prevalent in the prophetic age; and prophecy as a professional means of gaining a living. There were persons who assumed the hairy mantle and affected prophetic phraseology, *neʼûm J″*, 'saith J″' (cf. Jer 23^{31} *yinʼămû neʼûm*, Ezk 13$^{6.7}$), apparently for the sake of bread (Mic 3^{5}). It was customary to bring presents to the seers and prophets in ancient times when people consulted them (1 S 9^{8}, 1 K 14^{3}, 2 K 8$^{8f.}$; cf. Nu 22^{7}), and the practice not unnaturally led to deterioration in the prophetic class. But in relation to the question of the 'prophetic mind,' the only 'false' prophecy of interest is that which we see among prophets all professedly and alike prophets of J″. Men who alike regarded prophetic truth as something revealed by J″ in the heart, are found not infrequently to give forth as the word of J″ conflicting judgments. They advised contrary steps in a political emergency, or they predicted diverse issues in regard to some enterprise on which they were consulted. Ahab's 400 said, 'Go up to Ramoth-gilead, for J″ shall deliver it into the hand of the king'; but Micaiah said, 'I saw all Israel scattered upon the mountains' (1 K 22$^{12.17}$). Jer. predicted that the Chaldæan supremacy would last 70 years, while Hananiah prophesied that in two years' time the exiles would return, with Jehoiachin at their head (Jer 28). To us now, with our ideas of the prophet, and looking back to him as a great isolated and almost miraculous personage, divinely accredited, two things seem surprising, *first*, that any one should suppose himself a true prophet of J″ who was not; and, *second*, that the people failed to discriminate between the true and the false. As to the first point, it is very difficult to discover on what plane of religious attainment those called false prophets stood, and what kind of consciousness they had. Evidently, they had lofty conceptions of J″ in some of His attributes. These were perhaps more His natural attributes, such as His power, than those of His moral being. It is here perhaps that the point of difference lies—J″ was not to them absolutely or greatly a moral being, He was a natural force, and His operation in a way magical: they thought His mere presence in the temple guaranteed its inviolability. They were Jehovists, but J″ was to them greatly a symbol of nationality, and they were fervid nationalists. Such feelings coloured their outlook into the future, making them the optimists that they were, always crying, Peace and Safety! Further, in whatever way the true prophet was assured that he spoke the word of J″, the evidence was internal. He had the witness in himself. It was a consciousness, something positive, but not negative. The person who wanted it had no consciousness of the want. The case is similar to, if not identical with, what is still familiar in religious experience.

As to the second point, the people's failure to discriminate between the true and false prophets, it is evident that they had no criterion by which to decide. There was usually nothing in the mere prophecy or prediction on one side or the other to carry conviction. They had to bring the criterion with them in their own minds, *i.e.* to go back to the principles on which the prophecy was based—He that is of the truth heareth my words. The condition of the people's mind can be observed in Jer 18^{18}. Here we see that the people believed in prophecy as the word of J″, and in their prophets; but Jeremiah, who contradicted these prophets, they considered a deceiver and no lover of his country. Their state of mind appears even more clearly from Jer 28. Hananiah predicted that the Exile would be over in two years, while Jeremiah said it would last two generations. Naturally, the people gave their voice for Hananiah, and for the moment Jeremiah was put to silence. There were several things which it has been supposed might have served as external criteria of true prophecy: (1) the prophetic ecstasy; (2) miracle; and (3) fulfilment of the prediction. But all these things when used as tests to discriminate between one prophet and another were liable to fail.

(1) The ecstasy in greater or less degree was a thing natural to an Oriental people; in the early prophetic period it was common; it was, however, no essential element in prophecy. It was no evidence that a prophet was true, neither was it any evidence that he was false, though if evidence at all it was rather evidence that he was false, at least in later times, for in the ethical prophecy of the 8th century it rarely appears. Ewald, indeed, has observed that the ecstasy was liable to be a source of false prophecy, for one subject to such a condition might think himself inspired by J″ when he was not.

(2) Miracle might certainly be an evidence and test of true prophecy, *e.g.* in the conditions proposed by Elijah at Carmel; but such conditions were rarely possible. In the OT miracle means wonder; it is something extraordinary, nothing more. The force of a miracle to us, arising from our notion of Law, would not be felt by a Hebrew, because he had no notion of natural law. Further, the ancient mind was reverent, or superstitious, and felt itself surrounded by superhuman powers. It was not J″ alone or His servants that could work wonders; the magicians in Egypt also did so (Ex 7$^{11.22}$ 8^{7}). Again, even when J″ empowered one to give a sign or wonder, the meaning of the wonder might be ambiguous. In Dt 13$^{1ff.}$ a prophet is supposed permitted to work a miracle at the same time that he advocates worship of other gods than J″; but the miracle so far from authenticating him as true has quite another purpose: it is to prove the people whether they love J″ with all their heart. To one who knows and loves J″ no miracle will authenticate another god. And to all this has to be added the fact that from Amos downwards miracle plays hardly any part in the history of prophecy (though cf. Is 7^{11} 38$^{7ff.}$), while it was just in the last days of the kingdom of Judah that false prophecy was most prevalent.

(3) The test of fulfilment of the prophetic word is proposed in Dt 18^{21}. But this criterion was one which was serviceable less to individuals than to the people, whose life was continuous and extended. As a guide to the conduct of individuals at the moment when the prediction was uttered it could be of little service. Occasionally predictions were made which had reference to the near future, as when Micaiah predicted Ahab's defeat at Ramoth-gilead, or when Jeremiah foretold the death of Hananiah within the year. But usually the prophecies bore upon the destinies of the State, and had reference to a somewhat indefinite future. This peculiarity perplexed men's minds, and led to the despair or the disparagement of prophecy. They said, 'The days are prolonged, and every vision faileth'; or if they did not go so far they said of the prophet, 'The vision that he seeth is for many days to come, and he prophesieth of the times that are far off' (Ezk 12$^{22-28}$). While, therefore, in the prolonged life of the people the event might ultimately be seen to justify the prophet (Ezk 2^{5}), some more immediate test was necessary for the guidance of the individual. Such a test is proposed by Jeremiah. The test lies in the relation of the prophecy to the moral condition of the people. The prophet who predicts disaster and judgment needs no further authentication: the nature of his prophecy proves him true; the prophet who prophesies Peace, let the event justify him! (Jer 28$^{8.9}$). The interesting

thing in all this is that so far as religious certitude was concerned the people of Israel were exactly in the same position as ourselves. Neither the supernatural nor anything else will produce conviction apart from moral conditions of the mind. This is perhaps a truism because the conviction required was not mere intellectual belief, but religious faith in a person and in His word.

False prophets are defined to be those by whom J″ did not speak, and true prophets those by whom He spoke. The definition is true on both its sides, and there are instances when nothing more can be said. But usually it is possible to go a step further back. The opposite way of stating the point has also a truth in it: J″ did not speak by certain prophets because they were false. His speaking or not speaking was not a mere occurrence, isolated and in no connexion with the previous mind of the prophets and their religious principles. It is extremely difficult to realize the condition of people's minds at any time in Israel. There were many planes of religious attainment. There were worshippers of other gods than J″; and there were those who combined J″ and other gods in their worship (Zeph 1). There were worshippers of J″ to whom J″ was little more than a symbol of their nationality. There were worshippers of J″ who, in addition to regarding Him as the impersonation of their nationality, ascribed to Him lofty natural attributes, such as power, but who reflected little if at all on the moral aspects of His being. And there were those to whom the moral overshadowed all else, and who regarded J″ as the very impersonation of the moral idea. Scholars will dispute how far moral conceptions of J″ prevailed among the people from the first, and also how much moral teaching was set before them at the beginning. But the great lesson-book in which thoughtful men read was the national history and fortunes. This was written by the finger of God. In the prosperous days after David little advance might be made; men settled on their lees. But by and by God sent unto them 'them that pour off' (Jer 48^{12}). The disasters suffered in the obstinate Syrian wars from Omri onwards awoke the conscience of men, revealing the nature of J″, and directing the eye to the national sores; for at all times national disaster and internal miseries were felt to be due to the displeasure of God (2 S $21^{1ff.}$ 24^{18}, 1 K 17^{1}). Thus, though history casts little light on its growth, there arose a society educated in the things of God, and it was out of this society that the true prophets were called; for the idea that the breadth and wealth of religious and moral conceptions in a prophet like Amos were all supplied to him by revelation after his call, will hardly be maintained. Those who stood on a lower plane were not suited for the purposes of J″, and He did not speak by them. They came forward in His name, but it was mainly national impulses that inspired them.

There are three lines on which Jeremiah opposes the other prophets: the political, the moral, and the personal. (1) The false or national prophets desired that Israel should take its place among the nations as one of them; be a warlike State, ride on horses, build fenced cities, and when in danger seek alliances abroad. Jeremiah and the true prophets instead of all these things recommend quiet confidence and trust in J″ (Is 7^{9} 17^{7}). (2) The national prophets had not a stringent morality. Jeremiah charges some of them with being immoral (Jer 23^{14}). But what characterized them all was a superficial judgment of the moral condition of the nation, which was but the counterpart of their inadequate conception of the moral being of J″. The condition of society did not strike them as at all desperate. Hence they preached Peace, and healed the hurt of the people slightly. On the other hand, the words of Micah, 'I am full of power to declare to Jacob his transgressions' (3^{8}), might be taken as the motto of every true prophet. It is possible, even true, that the demands of the true prophets were ideal, that they could not be realized in an earthly community, that it was the spirit of the future yet to be that was reflecting itself in their hearts—a future that even to us is still to be; and it is not impossible that the people felt this and passed by their words as impossible of realization (Jer 2^{25})—a very lovely song of one that hath a pleasant voice (Ezk 33^{32}). (3) With his tendency to introspection Jeremiah analyzes his own mind; and that naïve feeling of former prophets, that they spoke the word of J″, is to him a distinct element of consciousness. He knows that he stands in the council of J″, and he is certain that the false prophets have not his experience ($23^{28.\ 29}$). He does not hesitate to go further and assert that those prophets whom he opposes are conscious that they have no true fountain of inspiration within them. Their prophetic manner, 'saith J″,' is affectation (23^{31}), and there is nothing personal in the contents of their oracles, which they steal every one from his neighbour (23^{30}). The prophets of this time speak of their 'dreams,' and it is possible that the crisis in the nation's history agitated them and produced mental excitation; but it is evident that they represented a phase of prophecy which had long been overcome. It is strange that, from the days of Micaiah ben Imlah under Ahab down to the fall of the Judæan State, no change seems to have taken place in the position and principles either of the true prophets or of the false.

C. *THE TEACHING OF THE PROPHETS.*—The idea of the 'prophet,' one who speaks from God (B. i.), leaves a very extended sphere of action to the prophet. The prophet is always a man of his own time, and it is always to the people of his own time that he speaks, not to a generation long after, nor to us. And the things of which he speaks will always be things of importance to the people of his own day, whether they be things belonging to their internal life and conduct, or things affecting their external fortunes as a people among other peoples. And as he speaks to the mind and consciousness of the people before him, he speaks always with a view to influence it. On many, perhaps on all occasions, the most powerful means of exerting an influence on the mind of his time may be what he is able to reveal to it of the future, whether the future be full of mercy or of judgment; but whether he speaks of the present or the future the direct and conscious object of the prophet is to influence the people of his own generation. For this purpose the prophet reviews, not only the forces and tendencies operating in his own nation, but all the forces, moral and national, operating in the great world outside (Jer 1^{10}).

Influenced partly by the great apologetic use made of the prophecies in the NT, interpreters were for long accustomed to lay almost exclusive stress upon the predictive element in prophecy, so that prophecy and prediction were considered things identical. The function of the prophet was supposed to be to predict the Messiah and the things of His kingdom; and the use of the prophecies was to prove that Jesus was the Messiah, or more generally to show the supernaturalness of revelation. However legitimate such a use of the prophecies may be, modern interpreters have rightly felt that it failed to take into account a very large part of their contents. The religious and moral teaching of the prophets was overlooked. Hence in modern times a different view has arisen, to the effect that the function of the prophet was to teach moral and religious truth. But this view is equally one-sided with the other. To us now to whom the apologetic use of prophecy has become less necessary, the moral teaching of the prophets may seem the most important thing in their prophecies. But if any prophetic book be examined, such as Amos or Hos 4–14, or any of the complete prophetic discourses contained in a prophet's book, such as Is 1. 5. 6. 2–4, it will appear that the ethical and religious teaching is always secondary, and that the essential thing in the book or discourse is the prophet's outlook into the future. The burden of the teaching of all the great canonical prophets is: (1) that the downfall of the State is imminent; (2) that it is J″ who is destroying it; and (3) that the nation which shall overthrow it, be it Assyria or Babylon, is the instrument of J″, the rod of His anger, raised up by Him to execute His purpose. And the prophet's religious teaching regarding the nature of J″, and the duty and sin of the people, is subordinate, and meant to sustain his outlook into the future and awaken the mind of the people to the truth of it (cf. above A. iii. 3). This may be said also of such a NT prophet as John the Baptist, and in a sense even of our Lord. The Baptist's theme was, The kingdom of heaven is at hand; and his ethical teaching, Repent! Bring forth fruits meet for repentance! was designed to prepare men for entering into the kingdom. And our Lord's theme was the same, the coming of the kingdom of God; and His moral teaching, such as the Sermon on the Mount, was intended to show the nature of the kingdom and the condition of mind necessary to inherit it. Of course, the outlook of the prophets was not bounded by the downfall of the State. Their outlook embraces also that which lies beyond, for the great events transacting around them, being all moral interpositions of J″, seem to them always to issue in the coming in of the perfect kingdom of God; and this final condition of the people is virtually their chief theme.

i. GENERAL TEACHING.—In general, the prophets may be characterized as religious idealists, who appealed directly to the spirit in man; who set the truth before men and exhorted them to follow it, not out of constraint, but in freedom of spirit, because it was good, and the will of their God. They never dreamed of legislative compulsion. The law recognized by Amos is the law of righteousness and humanity written on all men's hearts, whether Jew or heathen; the law of Hosea is the law of love to Him who had loved the people and called His son out of Egypt. The prophets really occupied the Christian position; they demanded with St. Paul that men's conduct and life should be the free expression of the spirit within them, a spirit to be formed and guided by the fellowship of God and the thankful remembrance of His redemption wrought for them. Later prophets perceive that man's spirit must be determined by an operation of God, who will write His law on it (Jer 31^{33}), or who will put His own spirit within him as the impulsive principle of his life (Is 32^{15}, Ezk $36^{26\mathrm{ff.}}$). Hence ritual has no place in the prophetic teaching, that which is moral alone has any meaning. No doubt the prophets assail abuses in ritual worship as well as in social life, and men more practical than they embody their principles in legislative form, for the prophets, instead of being mere expounders of the Law, are indirectly the authors of the Law; but when this legislation, even though an embodiment of prophetic teaching, is elevated by authority into State or ecclesiastical law, however necessary the step might be, it is a descent from the NT position occupied by the prophets.

The special teaching of the individual prophets is treated under their respective names. Here only two or three general points can be alluded to.

(1) The prophets all teach that J″ alone is God of Israel, and that He is a moral Being, whose acceptable service is a religious and righteous life (Mic 6^8), and not mere ritual (Hos 6^6, Is $1^{10\mathrm{ff.}}$, Jer $7^{21\mathrm{ff.}}$, 1 S 15^{22}). Questions have been raised whether in these points the prophets follow a law, such as the Decalogue, or whether the moral Decalogue be not, in fact, a concentration of their teaching. All classes of the people agreed with the prophets that J″ was the particular God of Israel, but a theoretical monotheistic faith cannot have prevailed among the mass of the people. Such a faith, though only informally and indirectly enunciated by them, evidently prevailed among the prophets from Elijah downwards; but how much older the belief may be and how widely it was entertained among the people, the very scanty history scarcely enables us to determine. Perhaps too much stress may be laid on the value, particularly in early times of simple thought, of an abstract monotheism. What was important was the nature of J″, the closeness of relation to Him which conditioned human life, and the worshipper's feeling that He was *his* God; whether other beings to be called gods existed, and were served by the nations, was practically of little moment. Even the polytheism of the heathen sometimes came practically near to monotheism. Worshippers usually devoted themselves to one out of the many gods known in their country; they usually, therefore, thought of him as god alone, and gradually assigned all the distinctive attributes of other deities, *i.e.* virtually of deity, to him. And one can conceive how particularism or monolatry, the idea that J″ was the particular God of Israel and of Israelites, may have had in a rude age an educative and religious influence which an abstract monotheism might not have exerted. To it may be greatly due that extraordinary sense of the presence of J″ in the people's history and the individual's life, that personal intimacy with God, characteristic of OT religion.

So far as the *worship* of J″ is concerned, it is remarkable that Elijah, though contending against Baal worship, is not said to have assailed the calves. The history of Elijah is a fragment, and it may be precarious to draw conclusions from the historian's silence. Even Amos does not refer formally to the calves; he condemns the ritual worship as a whole, and threatens with destruction the seats of calf-worship; and his condemnation of the whole probably applies to the details; at least it is wholly inept to infer that he saw no evil in the calves. Hosea is the first to condemn them expressly, and in Judah Isaiah in like manner often assails images (Is 2^8 17^8). When the early prophets assail the worship at the *high places*, it is the nature of the worship that they attack, not the multiplicity of altars. But Jer. and Ezek., along with Deut., go further, and condemn the high places themselves; they are Canaanite and heathen (Dt 12^2, Jer 2^7, Ezk $20^{27\mathrm{ff.}}$).* The prophets' attacks on sacrifice are in opposition to the exaggerated worth assigned to ritual by the people. Their position is not, as is often said, that sacrifice without a righteous life is an abomination to J″, but rather this: that sacrifice as a *substitute* for a righteous life is an abomination. It is a question of service of J″: and J″ desires a righteous life so much more than sacrifice, that He may be said not to desire sacrifice at all (Hos 6^6).

(2) Though the prophets use the word 'covenant' little down to the time of Deut. and Jer., the idea they express of the relation of J″ and Israel is the same. J″ says in Am 3^2 'You only have I known of all the

---

* In Mic 1^5 LXX reads 'sin of Judah' for 'high places of Judah.'

families of the earth.' J″'s choice of Israel was a conscious, historical act. With this all the prophets agree. No motive is assigned for the choice, and no purpose to be served by Israel thus chosen is referred to. In Amos for all that appears, the choice of Israel is virtually an act of what is called sovereignty. In Hosea the act is regarded as due to J″'s love (11^{1}). This makes the act moral, and explains it, though the love itself is necessarily inexplicable. In Deut. the love is denied to be due to anything in Israel, and seems just explained by itself (Dt 7^{8}). In Isaiah the idea of a purpose had in view in the choice begins to appear. J″ is the universal sovereign, and His making of Israel His people was in order that He might be recognized as God and alone exalted (2^{11}). In Isaiah sin is insensibility to J″ the King, levity and self-exaltation; and religion is recognition of J″ and His benefits, a constant consciousness of Him and trust in Him. While Jer. shares Isaiah's idea of what true religion is (9^{24}), he speaks of Israel being chosen 'that they might be unto me for a people, and for a name, and for a glory.' In other words, Israel was chosen that by its character it might reflect moral fame upon its God, that is, make known J″ to the world of men, if not by active operations, by showing in its own character the nature of its God. The prophet of Is 40 ff. often expresses the same idea (43^{21} 44^{23}), but he adds to it the conception of an active operation of Israel in making J″ known to the nations (Is 42$^{1-4}$ 49$^{1-6}$ 60$^{1\text{ff.}}$). This is the highest generalization regarding Israel's place in the religious history of mankind, and the purpose of J″ in its election.

(3) The prophets address themselves to the nation; but in appealing to the whole they appeal to each individual, though no doubt specially to those whose conduct is influential in shaping the destiny of the whole. J″ chose a nation because His idea of mankind, of which He will be God, is that of a social organism. It is this organism of which He is God. But though the relation might seem to be with the ideal unity, it operated in disposing all the parts making up the unity rightly to one another. And in this way each individual felt J″ to be his God. It is absurd to argue that the nationalism of OT religion excluded individual religion. But the later prophets feel that a true social organism can be created only out of true individual members, and they begin to construct a whole out of single persons. Many things united to work in this direction. The nation no longer existed, but the individuals remained, and J″ and religion remained. Moreover, personal piety, such as was seen most conspicuously in Jer., but was not confined to him, was a great creative force; the sense of relation to God made powerful men, and the sense of the relation in common united them. Reflexion also did something. Ezekiel saw the practical need of reconstructing a people, and recognized this to be his task. He felt himself in a certain way a Pastor with a care of individual souls. And he saw the need of creating independent individual personalities by disentangling them from the national whole and its doom—'All souls are mine, saith J″; as the soul of the father so also the soul of the son.' But, however individualistic the operations of the prophets of this age were, they never abandon the idea of founding a new social organism. Individualism is but the necessary stage towards this. J″ is God of mankind, not of an inorganic mass of individual men.

ii. PREDICTIVE PROPHECY.—As the prophets are absorbed in the destinies of the kingdom of God, it will be chiefly *momenta* in its history and development and its final condition that will form the subject of their predictions. They will have little occasion to refer to the future of individuals, or to predict events in their history. There are instances: *e.g.* Samuel predicted some things that would happen to Saul, which the history declares did happen (1 S 9. 10). Jer. predicted the death of Hananiah within the year, which took place (Jer 28). But most of the predictions relate to the history of the State and its destinies. Micaiah predicted the defeat and death of Ahab at Ramoth-gilead (1 K 22). Isaiah predicted the failure of the Northern coalition to subdue Jerusalem (Is 7); he also predicted the overthrow in two or three years of Damascus and Northern Israel before the Assyrians (Is 8. 17). In like manner he predicted the failure of Sennacherib to capture Jerusalem; while, on the other hand, Jer. predicted the failure of the Egyptians to relieve Jerusalem when besieged by Nebuchadnezzar. And in general, apart from details, the main predictions of the prophets regarding Israel and the nations were verified in history (*e.g.* Am 1. 2). The chief predictions of the prophets relate (1) to the imminent downfall of the kingdoms of Israel and Judah; (2) to what lies beyond this, viz. the restoration of the kingdom of God; and (3) to the state of the people in their condition of final felicity. To the last belong the Messianic predictions. It is Israel, the kingdom and people of God, that is properly the subject of prophecy, but other nations are involved in its history; *e.g.* Assyria is the instrument in the hand of J″ in humiliating Israel, and Babylon is the obstacle which has to be removed before its Restoration, and thus these kingdoms and others become also the subject of prophecy.

1. *Prediction in general.*—There are two questions in connexion with prophetic prediction which have given rise to discussion: first, how are the prophetic anticipations as to the future to be explained? and second, what is the explanation of the prophet's feeling that the events which he predicts, *e.g.* the downfall of the State, the coming of the day of the Lord, and the inbringing of the perfect kingdom of God, are imminent? As to the first point, it must be obvious that the prophetic anticipations or certainties cannot be explained as the conclusions of a shrewd political insight into the condition of the people or the nations at the time. Neither can the anticipations of the nation's dissolution be the mere pessimistic forebodings of a declining and exhausted age, for the material and political condition of the North in the time of Amos, and of the South in the early days of Isaiah, was not such as to suggest such gloomy outlook. And least of all can it be pretended that the predictions are only apparent, being, in fact, written *post eventum.* It has been suggested that the human mind, or at any rate some rarely endowed minds, possess a faculty of presentiment or divination, and that it is to this faculty that the prophet's anticipations or certainties in regard to the occurrence of future events are due. Certainly, belief in the possession of such a faculty by peculiarly gifted persons has been prevalent in different ages and among different peoples, but anything like scientific proof of the existence of the faculty has probably never been offered. It would be remarkable if such a large number of persons as the prophets of Israel should all be endowed with this extraordinary faculty. And it would be even more strange if a faculty of this kind, the operation of which appears to be blind and unrational, should be found to manifest itself so generally just in the purest period of prophecy, at the time when prophecy had thrown off all naturalistic and physical characteristics and become purely ethical. Probably, if any one of the data of this supposed faculty of presentiment were analyzed, it would be found to be the result of a

complex process. There would be, first, a peculiar temperament, suggesting events sad or joyous; then certain facts presented to the mind, and then the unconscious operation of the mind on these facts, the whole resulting in the presentiment or vaticination. There may be obscure capacities in the mind not yet explored; and there may be sympathetic *rapports* of human nature with the greater nature around, and of man's mind with the moral mind of the universe, which give results by unconscious processes; and if there be such faculties and relations, then we may assume that they would also enter into prophecy, for there is nothing common or unclean in the nature of man. In point of fact such presentiments as we can observe to be authentic are chiefly products of the conscience or moral reason; and Jer., as has been said, insists that true prophecy in general is based on moral grounds and consists of moral judgments. And certainly all the prophets, in analyzing their intuitions of the future and laying them before the people, usually present them in the form of a moral syllogism. Thus Mic $3^{9ff.}$, after enumerating the misdeeds and oppressions of the heads of the house of Israel says, 'Therefore on your account shall Zion be plowed like a field.' And Is $5^{11ff.}$, having described the luxuriousness and ungodly levity of his day, says, 'Therefore hath hell enlarged her maw.' Everywhere the menacing future is connected with the evil past by *therefore*.* Cf. Am 1. 2.

The other question, How is it that the prophets bring in the consummation and final perfection of the kingdom of God immediately on the back of the great events in the history of the people and the nations taking place in their own day? may not be susceptible of a single answer. (1) An explanation has been sought in what is called the *perspective* of prophecy. Just as one looking on a mountainous region sees a hill which appears to rise up close behind another, but when he approaches nearer he finds the second to have receded a great way from it; so the prophet sees great events close behind one another, though in history and time they are far apart. This is an illustration, but no explanation. The explanation is usually found in the theory of prophetic vision. But in the literary prophets, vision in any strict sense has little place. The prophetic perception, however, was of the nature of intuition, and something of the peculiarity referred to may be due to this. (2) In the period of the canonical prophets it is less events that suggest religious ideas and hopes than ideas already won that explain events. The prophets are not now learning principles, but applying them. Their minds are full of religious beliefs and certainties, such as the certainty of a reign of righteousness upon the earth; and Riehm has suggested that it is their eager expectations and earnest longings that make them feel the consummation to be at hand. (3) Another point may be suggested. It is only in general amidst convulsions that rend society that the prophets come forward. These convulsions and revolutions were the operation of J″, and His operations had all one end in view, the bringing in of His kingdom, and thus to the prophets these great movements seemed the heralds of the full manifestation of J″. For the movements had all moral significance: they were a judgment on His people, which would so change them as to lead into the final salvation (Is $29^{9ff.\ 17ff.}$ $30^{19ff.}$ $31^{5ff.}$), or they were the judgment of the world, removing the obstacle to the coming of His kingdom (Is 40 ff.); and thus the present and the final were organically connected, the chain was formed of moral links. Further, the prophets appear to entertain and operate with general conceptions. Israel is not merely a people, it is the people of God. Babylon is not only a hostile nation, it is the idolatrous world. The conflict between them in the age of Cyrus is a conflict of principles, of Jehovism and idolatry, of truth and falsehood, of good and evil. It is not a conflict having great moral significance, it has absolute significance, and is final: 'Ashamed, confounded, are all of them that are makers of graven images; Israel is saved with an everlasting salvation' (Is 45^{16}).

2. **Messianic Prophecy.**—The term Messianic is used in a wider and a narrower sense. In the wider sense the term is virtually equivalent to Eschatological, and comprehends all that relates to the consummation and perfection of the kingdom and people of God. In the narrower sense it refers to a personage, the Messiah, who is, not always, but often, a commanding figure in this perfect condition of the kingdom. The conception of a final condition of mankind could hardly have arisen before a general idea of the nature of the human economy had been reached. Insight into the meaning of human history, however, was not attained in Israel by reflection on the life of mankind, but by revelation of the nature of God. God was the real maker of human history. Hence, when so broad a view as that of human life or history as a whole is taken, it is, so to speak, secondary: it is a reflection of the view taken of God, of His Being, and therefore of what the issue will be when He realizes Himself in the history and life of mankind. So soon as the conception of the perfect ethical Being of J″ was reached, there could not but immediately follow the idea also that human history, which was not so much under His providence as His direct operation, would eventuate in a kingdom of righteousness which would embrace all mankind. The way, no doubt, in which this is conceived is that this kingdom of righteousness is first realized in Israel, and that through Israel it extends to all mankind —for the nations come to Israel's light (Is 60). But it is the unity of God that suggests to men's minds the unity of mankind; and the moral being of God that suggests the moral perfection of mankind. And such ideas hardly prevailed before the prophetic age.

The Messianic in the narrower sense is part of the general doctrine of the Eschatology of the kingdom (see ESCHATOLOGY). The 'Messianic' in this sense is hardly a distinct thing or hope. The Messiah is not an independent figure, unlike all other figures or personages, and higher than they; on the contrary, He is always some actual historical figure idealized. The term means 'anointed,' and only two personages received anointing—the king, and possibly the priest; though no doubt the term 'anointed' was used more generally in later times (Ps 105^{15}). The OT is occupied with two subjects—Jehovah and the people, and the relation between them. The Eschatological perfection is the issue of a redemptive movement. Now, the only redeemer of His people is J″—salvation belongeth unto the Lord. The Eschatological perfection is always due to His operation—the perfection consists in His perfect presence among His people, for the idea of salvation is the fellowship of God and men. But, on the other hand, the people are not passive. The goal is set before them, and they strive towards it. J″ awakens ideals in their mind, and aspirations after them; and in contrast to such ideals the imperfections of the present are felt, and an effort made to overcome them. But it is characteristic of the redemptive operations of J″ that He influences the people and leads them forward, through great personages whom He raises up among them. Such persons are different in different ages—judges, prophets, kings, and the like. These He enlightens so that they give the people knowledge, or He endows them by His spirit with kingly attributes, so that they govern the people aright (Is $11^{1\text{ff.}}$ 28^{6} $32^{1\text{ff.}}$), and lead them on to the final perfection. But J″ always remains the Saviour; and if there be any mediatorial personage it is J″ in him, the *Divine* in him, that saves. Naturally, the most exalted and influential personage is the king: he has the people wholly in his hand; the ideal is that he reigns in righteousness and secures peace (Is $32^{1\text{ff.}}$). The Messiah is mainly the ideal King. Thus the Eschatological perfection may be supposed reached in two ways: *first*, J″ the only Saviour may come in person to abide among His people for ever. In the earlier prophets His coming is called the day of the Lord—a day of judgment, and eternal salvation behind the judgment. What precise conception the prophets formed of the coming of J″ may not be easy to determine. But it was not merely a coming in wonderful works, or in the word of His prophets, or in a spiritual influence upon the people's minds, it was something objective and personal. In later prophets, such as Ezek. and the post-exile prophets, it was a coming to His temple; and when He comes Jerusalem is called *Jehovah Shammah*, 'the Lord is there' (Ezk 48^{35}, Hag $2^{7\text{ff.}}$, Mal 3^{1}). Examples of such representations are Is $40^{1\text{-}11}$ 'The Lord cometh with might, his arm ruling for him; the glory of the Lord shall be revealed, and all flesh shall see it together,' and Ps $102^{15.\,16.\,22}$. But, *secondly*, sometimes the manifestation of J″ is not considered immediate and in person: He is manifested in the Davidic king. The Davidic king may then be called *Immanuel*, 'God with us,' and *El Gibbor*, 'God mighty' (Is 7. 9. 11). In NT both these classes of passages are interpreted in a Messianic sense. To NT writers Christ had approved Himself as God manifest in the flesh, and even such passages as were spoken by the OT writer of J″ are regarded as fulfilled in Him and spoken of Him, for no distinction was drawn between these two things (*e.g.* Is $40^{1\text{-}11}$ in Mk 1^{2}, Ps 102 in He $1^{10\text{ff.}}$).

---

* The arguments by which Giesebrecht, *Berufsbegabung*, 13 ff., supports the theory of a 'faculty of presentiment' have little cogency. This faculty is supposed to reveal itself particularly on the approach of death (Gn 27. 49). The contemporaries of most great religious personages have attributed to them a prophetic gift. The answer of John Knox to those who credited him with such a gift is worth reading: 'My assurances are not marvels of Merlin, nor yet the dark sentences of profane prophecy. But, *first*, the plain truth of God's word, *second*, the invincible justice of the everlasting God, and *third*, the ordinary course of His punishments and plagues from the beginning, are my assurances and grounds.' *History*, p. 277 (Guthrie's ed.).

(*a*) *The Monarchy.*—J″ is represented at all times as Saviour; and this idea is of special importance, because it lays the foundation for both the work and person of the Messiah, as the word is ordinarily used. During the monarchy the prominent figure in the salvation of the people or in ruling it when saved by J″ is the Davidic king. The true king of Israel is J″: Israel is the kingdom of God; and this is a general eschatological idea, suggesting what the kingdom will be when it is fully realized and J″ truly reigns (Ps 96–99). But it is the Davidic monarchy that is Messianic in the narrower sense. This unites two lines—the Divine and the human. The Davidic king is the representative of J″; truly to represent Him, J″ Himself, the true king, must be in him and manifest Himself through him (Is $9^{1\text{-}6}$ $11^{1\text{ff.}}$). But, on the other hand, both David and his rule were suggestive. (1) He was himself a devout worshipper of J″, endowed with the spirit of the knowledge and the fear of the Lord (Is 11^{2}). (2) He subdued the peoples and extended the limits of his kingdom till for that age it might be called an empire, suggesting the universality of the kingdom of God (Ps 2^{8} $72^{8\text{ff.}}$, Zec 9^{10}). (3) His rule was just and the end of his reign peaceful, suggesting the idea of a ruler perfectly righteous, and a reign of peace (2 S $23^{3\text{ff.}}$, Is $9^{5\text{-}7}$ 2^{4}, Mic 5^{5}, Ps $72^{3.\,7}$, Zec 9^{10}). (4) Finally, he founded a dynasty, which suggested the idea of the perpetuity of the rule of his house over the kingdom of J″ (Is 9^{7}, Ps 72^{5}). Such points may not have struck men's minds in David's own age, but in later and less happy times, when his reign was idealized, they were noticed, and entered into the conception of the future king and kingdom of J″. The promise given by Nathan to David takes up the first and fourth of these points —the close relation between J″ and those of David's house who shall sit upon the throne, and the perpetuity of the rule of his family (2 S $7^{11\text{ff.}}$). This promise is the basis of all subsequent prophecy regarding the Davidic king. Such passages as Ps 2 take up the promise, 'I will be to him a father, and he shall be to me a son,' while the prophecies Is 7–11 are founded on the promise, 'Thy throne shall be established for ever.' It was during the Syro-Ephraimitic war (B.C. 735 f.) that the idea of a special future king of David's house was expressed by Isaiah. The Northern coalition meditated the deposition of the Davidic dynasty, but the prophet's faith in the promises given to David enabled him to foresee that though his house should share the humiliations of the people and be cut down to the ground, yet out of the root of Jesse a new shoot would arise on whom the spirit of the Lord would rest (Is 11). From this time forward there is a special Messianic hope, that is, the hope of an extraordinary king out of the house of David. This hope, though in some periods not referred to, continues to prevail to the end of the people's history. Subsequent prophets repeat, but add little to, Isaiah's ideas, *e.g.* Mic 4. 5 (though the age of the passages is disputed), Jer $23^{5.\,6}$ 30^{9}, Ezk $17^{22\text{-}24}$ $34^{23\text{ff.}}$ $37^{22\text{-}28}$. Prophets prior to Isaiah, as Am 9^{11}, Hos 3^{5}, do not seem yet to have reached the idea of a special king of David's house; and other prophets before the Exile, Nahum, Zephaniah, and Habakkuk, though some of them refer to the final condition of the people and the world, do not allude to an expected future king.*

(*b*) *The Exile.*—After the destruction of the monarchy and the abasement of the Davidic house the hope of a great ruler out of that house for a time disappears (*e.g.* in Is 40 ff.). The general eschatological hope of the perfection and felicity of the people is even more brilliant than before, but no great personage is referred to as ruler of the saved people. J″ Himself is the Saviour and the everlasting King, who feeds His flock like a shepherd (Is 40^{11}). And the sure mercies of David—the privileges and the mission of the Davidic house—are now transferred to the people (Is $55^{3\text{f.}}$). Circumstances turned the thoughts of the prophets in other directions. God's providential treatment of Israel suggested to them new conceptions. They reflected on the meaning of the history of Israel and its sufferings, and on its place in the moral history of mankind. And there arose the great conception of '**the Servant of the Lord.**' The phrase expresses the highest generalization on the meaning of Israel in the religious life of mankind—Israel is the Servant of J″ to the nations, to bring to them the knowledge of God. Scholars do not universally accept this interpretation, but they agree that the ideas expressed by the prophet in regard to the Servant have been more than verified in Christ. Of these ideas the two chief are: *first*, that the Servant is the missionary of J″ to the nations—he bringeth forth right to the nations, that the salvation of J″ may be to the ends of the earth (Is $42^{1\text{-}4}$ $49^{1\text{-}6}$ etc.);

---

* The Targum interprets Hos 3^{5} of the Messiah.

and *second*, by his sufferings he atones for the sins of the members of the people (Is 53, cf. 40^{2}). The Servant is the 'word' and spirit of J″ incarnated in the seed of Abraham. This incarnated word will yet redeem all Israel and be the light of the nations. Here again it is the *Divine* that saves; the word of J″, the true knowledge of the true God, implanted once for all in the heart of mankind in Israel, which will accomplish that whereto it is sent (Is 55^{10}). As Delitzsch remarks, the Servant of the Lord, though strictly not a Messianic figure at all in the narrower sense, contributes more elements, and those of the profoundest kind, to the Christological conception realized in our Lord than all other figures together. The ideal of the Davidic king is that of a ruler just and compassionate, whose rule secures righteousness and peace and the wellbeing of the poor and meek (Is 11^{1-9}): whether in Is 9^{1-7} he be the saviour or only ruler of a people saved by J″ may be disputed. But in connexion with the Servant of the Lord deeper conceptions appear, such as that of atonement for sin through the suffering of the guiltless, and the idea that the highest glory is the reward of him who loses his life for others (Is 53^{12}). In former prophets, who foresee both the rejection and the restoration of the people, the restoration is unmediated by any atonement beyond the people's repentance: God forgives their sins of His mercy and restores them. In Deutero-Isaiah the Servant atones for the sins of the people, and their restoration follows. Former prophets, owing to the people's misconceptions of the meaning of ritual, assail the sacrifices; Deut.-Is. combines the sacrificial idea with the sufferings of the Servant, lifting the idea out of the region of animal life into that of human life. These two figures, the Davidic king and the suffering Servant, supply the chief contents of the idea of the Christian Messiah. It is strange how little impression the conceptions of the prophet of the Exile seem to have made upon those who followed him. While his universalism—the idea that Israel is the missionary of J″ to mankind that His salvation may be to the end of the earth—entered into the thought of the people and profoundly influenced it, his conception of atonement through the innocent bearing the sins of the guilty hardly if at all reappears. There may be a far-off echo of it perhaps in the Rabbinic idea that the merit of great saints may avail for others. In the OT period the suffering Servant was never identified with the Davidic king. The idea that the royal Messiah suffers *for* the sins of his people does not appear. No doubt Immanuel, who appears amidst the Assyrian desolations, shares the hardships of his generation, living on thick milk and honey like all those left in the land (Is 7); and in Zec 9^{9} Zion's king shares the character of the saved people, being meek and lowly and a prince of peace, but nothing is said of suffering in behalf of others.

(*c*) *Post-exile Period.*—At the Restoration the general eschatological hope, as it appears in Haggai and Zechariah, was that so soon as the temple was finished J″ would return to it in glory; at His manifestation He would shake all nations, who would turn to Him, and His universal kingdom would come (Hag 2^{6}, Zec $1^{16\text{ff.}}$ $2^{10\text{ff.}}$). Side by side with this hope, however, the more special Messianic hope of a ruler from David's house also appears (cf. Ezk $34^{11.\,23}$). This ruler appears to be Zerubbabel (Hag $2^{22\text{f.}}$). But with the Restoration the priest becomes more prominent. The calamitous history of the nation sank deep into the popular mind, and seemed to be the seal set to the prophetic teaching regarding the people's sin. And from henceforth the sense of sin in the people's mind was deeper; and that view of sacrifice according to which it was a propitiation for sin assumed a larger prominence, and the other idea of it as a gift for God's acceptance sank proportionally. It was really the nation's history that impressed men with the sense of their sinfulness rather than the ceremonial enactments of the ritual law. The developed ritual expressed the new conscience of sin, it did not create it. The royal and the priestly now appear united in the final ruler. In Ps 110 he is a crowned priest. In the passage Zec 6^{9-13} it is uncertain whether the Branch (the Davidic ruler) is to be 'a priest upon his throne' or to have a priest associated with him (RVm). But the Davidic king continues to be the Messianic figure of the post-exile period, *e.g.* in Ps 2. 72—both late passages—Zec 9, and particularly in the *Psalms of Solomon* (Ps 17. 18, *c.* 100–50 B.C.). A great part of the Psalter is eschatological in the general sense. The Psalmists' minds are filled with the eschatological ideas of the prophets, now become the faith of the people—the idea of the manifestation of J″, the judgment of the world, the redemption of the people of J″ and their eternal blessedness, with the participation of the nations in their salvation; but it is only in a few psalms that the personal Messiah is referred to, *e.g.* Ps 2. 72. 110; cf. 89. 132. It is uncertain when the title **Messiah** began to be given to the expected future king. The term can scarcely have been a proper name or special title for the future king in the time of the Exile, for Deutero-Is. uses it of the Persian king, 'Thus saith the Lord to his anointed (מְשִׁיחוֹ messiah), to Cyrus' (Is 45^{1}). But the name was used quite currently of the expected king or saviour in the age of Christ, for even the woman of Samaria employs it, 'I know that Messiah cometh' (Jn 4^{25}). The title has been supposed by some to be given to the expected king in Dn 9^{25}, but more probably it is applied there to some high priest. It was perhaps Ps 2 that suggested the special application of the title to the expected king, 'The kings of the earth set themselves against the Lord and his Messiah.' The title 'Son of God' seems taken from the same psalm, both being employed in St. Peter's confession, 'Thou art the Messiah, the Son of the living God.' The psalm is based on Nathan's prophecy, and appears to be a directly Messianic passage, and probably belongs to a late date. The only creative book in post-exile times is Daniel. Chap. 2 is eschatological in the general sense, the stone cut out from the mountains that brake in pieces the image being a symbol of the kingdom of God which shall destroy the world-kingdom in its successive historical forms. It is less certain whether this general point of view be maintained in ch. 7, or whether the personal Messiah be referred to in the phrase 'a son of man.' The former interpretation is the more probable, the expression 'a son (or, child) of man,' *i.e.* a man, being used as a symbol of 'the people of the saints of the Most High' to whom the kingdom is given. The spirit of man shall animate this kingdom, whereas the kingdoms of the world are animated by the spirit of the wild beast. Very soon, however, the phrase 'son of man' was interpreted to mean the Messiah, as appears from the Bk. of Enoch.*

The Messianic is usually held to circle round the three great figures—the prophet, priest, and king. But the basis is broader than this: the Messianic age being the time of the perfection of the people of God, any factor that enters into the life of men as an essential element of it may be idealized and made prominent. The prophet or prophecy is typical of the general eschatological state of the people of God, for then J″ will pour out His spirit on all flesh (Jl 2^{28}, Jer 31^{34}, Is 54^{13}), and the prayer of Moses, 'Would that all the Lord's people were prophets!' shall be answered. But otherwise the prophet is not directly a Messianic figure (on Dt 18^{14} see above in B. i.); he is the herald of the advent of J″ to Zion (Is 40^{3}) or to His temple (Mal 3^{1}). The Servant of the Lord is in a lofty sense a prophetic figure; but he is not a prophet like other prophets with a message for any particular time or circumstances, nor does he give particular teaching or predict particular events. He is the bearer of the whole revelation of the true God, the 'word' of God incarnate (Is $49^{1\text{ff.}}$), and therefore prophet of J″ to the world.* The priest or priesthood is also predictive of the general eschatological condition of the people, for 'they shall be a kingdom of priests and an holy nation' (Ex 19^{6}), the two ideas suggested by priesthood being holiness and privilege to draw near to God (Nu 16^{5}). But even in Zec $3^{8.9}$ the atoning function of the priest appears still only typical of J″'s own act of forgiveness, who will remove the iniquity of the people in one day. The Servant of the Lord makes himself an offering for sin (Is 53^{10}), but he does not appear to be regarded as a priest. Besides these three great figures, however, there is another who contributes to the perfect ideal realized in Christ, viz. the saint or holy one, that is, the individual righteous man. It is particularly the personal character and experience of this figure, his faith in God, his struggles with adversity and death, his hopes of immortality, that come prominently to the light. It is he who says in Ps 16, 'I have set the Lord ever before me: because he is at my right hand, I shall not be moved. For thou wilt not give over my soul to Sheol; nor suffer thine Holy One to see the pit.' It is he also who speaks in Ps 40, 'Sacrifice and offering thou wouldst not. Then said I, Lo, I am come to do thy will, O my God; yea, thy law is within my heart. I have preached righteousness in the great congregation.' In Ps 22^{22} a speaker says, 'I will declare thy name unto my brethren: in the midst of the congregation will I praise thee. For he hath not despised nor abhorred the affliction of the afflicted, nor hid his face from him.' The ideas in this passage differ from those in Is 53. The afflictions of the sufferer are not borne for others. But he suffers innocently and wrongly; and the interposition of J″ to deliver him is so signal, and gives such a revelation of what J″ is, that they that behold it turn unto Him—all the ends of the earth shall remember, and turn unto the Lord (v.^{27}). Such lofty expectations were scarcely likely to be connected with any individual personage, however outstanding; more probably the sufferer in the psalm is the true people of J″ personified, as in Deutero-Isaiah.

---

* There has been considerable controversy lately over the meaning of the phrase 'the son of man' in the Gospels; cf. Wellhausen, *Skizzen*, vi. 188; Schmiedel in *Protest. Monatshefte*, 1898; Lietzmann, *Menschensohn*, 1896; Dalman, *Worte Jesu*, p. 191. See L. A. Muirhead in *Expos. Times*, Nov., Dec. 1899; and art. SON OF MAN.

In a sense, great part of the OT is Messianic. For it is just the peculiarity of OT that it struck out lofty moral and redemptive ideals, on occasions the most diverse, and in connexion with personages and in circumstances very various. These ideals were ultimately combined together to express the being of Him who was the ideal on all sides. But this Messianic of OT was, so to speak, unconscious. The writers had not the future king in their mind. They were speaking of other persons, or they were uttering presentiments, or what seemed to them religious necessities, or projecting forward brilliant spiritual hopes and anticipations. There was a spirit in them broader than the hope of a future person—a spirit as broad as the kingdom of God in all its needs, in all its endowments, and in all the possible height of its attainment. The history of the people's mind from the Restoration onward is mainly the history of a reflection on these ideals. They tried these ideals by the conditions of the present, and found that they and the present world were incompatible, and they projected them into the future, and thus the ideals became prophetic. Further, they had received the hope of a great deliverer, and he became a centre around whom the ideals, whether of glory or holiness or even of suffering, could be gathered, and they attached them to him. The woman of Samaria, for example, regards the Messiah as one that 'will declare unto us all things.'

Kinds of Messianic Passages.—The question put in regard to any passage by historical exegesis is, What did the Heb. writer mean? What personage had he in his mind in the passage? There may thus be several classes of Messianic prophecies. (1) Directly Messianic prophecies. In these the prophet or writer had the expected future Messiah actually present to his own mind. Examples are Is 7. 9. 11, Mic 4. 5, Jer $23^{5.6}$ 30^{9}, Ezk $17^{22\text{-}24}$ $34^{23\text{ff.}}$ $37^{22\text{-}28}$, Zec 3^{8} 6^{12} $9^{9\text{ff.}}$, Ps 2. 72. 110, and other passages. Is 7 is denied by many to be Messianic (see IMMANUEL), while Is 9. 11, though generally admitted to be Messianic, are held by some to be later than Isaiah (see ISAIAH). In Is 9. 11 it is not taught that the Messiah is God, but that J″ is fully present in him. The general eschatological idea was that the presence of J″ in person among men would be their salvation; the prophet gives a particular turn to this general idea, representing that J″ shall be present in the Davidic king. The two are not identified, but J″ is fully manifested in the Messiah. The passage goes very far; and though the Christian doctrine of incarnation contains a positive conception in it which OT saints did not reach, theology is obliged to limit that positive by negations which seem rather to neutralize it; and though the phrase 'became' man is used, it is affirmed at the same time that the two natures remained distinct, and that the Divine suffered no change and no confusion or composition with the human. (2) Indirectly Messianic passages. These are passages in which the writer had some OT officer or personage in his mind, but spoke of him according to the idea of his office or function or character; and this ideal is transferred to Christ in the NT, as being actually realized only in Him, or at least in Him first. Examples are what is said of 'man' in Ps 8, of Israel as Servant of the Lord in Is 40 ff., Ps 22, of the 'prophet' in Dt 18, of the saint or holy one in Ps 16. 40, and much else. Such passages are sometimes called typically Messianic, the idea being that OT personages, such as king, prophet, and the like, were types, that is, designed prophetic suggestions, of the Messiah in some of his essential redemptive functions or experiences. The exegesis of Calvin gave vogue to this method of interpretation, and applied it to passages to which it is scarcely applicable, *e.g.* Ps 2. 72. According to this interpretation Ps 2 is supposed spoken of some actual king of Israel; but as its language transcends what was verified in any ordinary king, it had a more proper fulfilment in Christ. Ps 2, however, could hardly have been spoken of an actual king; the universalism of its ideas, *e.g.* 'the kings of the earth' who oppose J″ and His Anointed, the extent of the King's inheritance as the Son of J″, viz. 'the nations' and 'the ends of the earth,' and the final kindling of J″'s anger, all mark it out as an eschatological and directly Messianic passage. The same is true of Ps 72. Very confused language is used by interpreters in regard to these so-called typical prophecies (see *Expositor*, Nov. 1878). NT does not recognize any class of *indirect* Messianic prophecies, for God being the speaker in the OT the person in whom the language was fulfilled must be the person of whom it was spoken. So far as the Heb. writer is concerned, he had in his mind *either* the expected future Messiah, *or* he had some OT person. In the latter case, if his language transcends what could be realized in the OT personage, he spoke ideally, that is, according to the religious idea of the personage or his function or his experience.

D. *INTERPRETATION AND FULFILMENT.*—There are certain peculiarities in the language and thought of the prophets which have to be taken into account in interpreting their writings, and in considering how their predictions or constructions of the future have been or will be fulfilled. These peculiarities so struck early writers on prophecy that they devoted great attention to them, fancying that the prophetic writings were constructed on a particular plan, which had special purposes in view. Hence they speak greatly of what they call the 'structure' of prophecy, and lay down elaborate rules for the way in which prophecies relating to a distant future must have been expressed, in order that when fulfilled they might be recognized to have been genuine supernatural predictions.* The language also, as well as the form, was thought to differ from that of ordinary literature, symbols being greatly used instead of plain expressions. This artificial way of regarding the prophecies was greatly due to the apologetic or evidential use made of them. But there is nothing in the form of the prophecies so special that it deserves the name of 'structure'; neither is symbol to any great extent employed instead of ordinary language. The prophets were practical teachers, such as we might expect men of their nation and time to be, and their prophetic addresses are cast in the form that would be most easily understood by their hearers. They were usually men of powerful imagination, and hence their language is poetical and to some extent figurative; and they were men living under a particular kind of constitution or dispensation, and in certain conditions of the world, and their ideas naturally are clothed in the forms suggested by their OT constitution, and those conditions of the ancient world in which they lived. This OT constitution and these conditions of the ancient world have passed away, but the religious ideas and truths expressed by the prophets still remain and live. Obviously, to *interpret* the prophets we must read them literally, endeavouring to throw ourselves back into their circumstances and the conditions of the world around them, and into their mind in such conditions: if we fail to do this, and fasten our attention only on their ideas and truths as valid for other times than theirs, we do not interpret but only *apply* their prophecies. Some points bearing on fulfilment may be briefly alluded to.

---

* By the time of Deutero-Isaiah the idea of the 'word' of God had become generalized; it is the true knowledge of the true God, and this is the *torah* of the Servant to the nations.

* *e.g.* John Davison, *Discourses on Prophecy.*

i. The prophecies are poetical. They are not poetical in so strict a sense as books like Job and the Psalms are: the parallelism is not so exact, and the lines are not so uniform in length. Many parts of the early prophets are no doubt poetical even in form, and some modern commentators make great efforts to bring the present text of the prophecies into strictly poetical measure, assuming that it had this form originally; but their operations appear in many cases to be arbitrary. The approximation to poetical form appears less in later prophets, though the style still remains elevated. Though poetical the prophecies are not allegorical. When Is 2, for example, says that the day of the Lord shall be on all lofty mountains, and on all cedars of Lebanon and oaks of Bashan, these things are to be understood literally, and not allegorized into things human, such as great States, the higher ranks of society, or persons of eminence. Neither are the prophecies written in symbolical language. It has been said, for example, that 'mountain' in prophecy is a symbol for kingdom, and the like.* There is no evidence for this. 'Mountain' is a figure for any great obstacle in the way (Is 40^4 41^{15}, Zec 4^7) of whatever sort it be, but is no stereotyped symbol for kingdom. A beginning of fixed symbolism is made in Daniel, where 'horn' is a symbol for king or kingdom, and the usage is continued in the Apocalypse; but in Zec 1^{18} 'horn' is still merely a figure for any instrument of pushing and overthrow. The prophecies are poetical in the sense that they are imaginative and often ideal. Thus, in predicting the destruction of some great city at present full of life, the prophet will draw a picture of desolation with all its mournful characteristics—'their houses shall be full of doleful creatures; wolves shall cry in their castles, and jackals in the pleasant palaces' (Is 13^{21}); 'the pelican and the porcupine shall lodge in the chapiters thereof' (Zeph 2^{14}, Is $34^{13\text{ff.}}$). Such passages merely express the idea of complete desolation; the details are not predictions, but part of the expression of the idea. Similarly, in predicting the capture of Babylon by the Medes the prophet gives an ideal picture of the sack of a city—'their infants shall be dashed in pieces, and their wives ravished' (Is 13^{16}). We know that these things did not actually happen, for Cyrus entered Babylon 'in peace.' In some cases it may be difficult to say whether a passage be of this ideal kind, or be merely of the nature of a threat, *e.g.* Am 7^{17} spoken of Jeroboam, and Jer $22^{18\text{f.}}$ of Jehoiakim. A margin of uncertainty will remain in connexion with these ideal prophecies. The details given in the prophecy form a true and natural picture of such a thing as that predicted, and some of them may be realized, and the question may be put, Are these details thus realized to be regarded as a fulfilment of the prediction, or are they merely due to the nature of the case? Under the belief that in such prophecies the details are merely an expression of the idea, and that the idea exhausts the prediction, Dr. Arnold propounded a theory of fulfilment *ex abundanti*. For example, the prophecy Zec 9^9—'Behold, thy King cometh unto thee; lowly, and riding upon an ass,' merely by its details expresses the idea that the Messiah will not be a man of war, but humble and a prince of peace, and would have been fulfilled in Christ's mind and bearing, though none of the external details had been verified; the fact that Christ entered Jerusalem riding on an ass was a fulfilment *ex abundanti*, and due to a special providence of God.* Of course, the special fulfilment in this case may have been intentional on the part of Christ. In that case we must suppose that Christ's consciousness of being the Messiah spoken of was so powerful that it prompted Him to act in the character described. His action was merely His consciousness expressing itself by an irresistible impulse; it was not a matter of calculation intended to impress the multitude.

ii. Another thing which might modify fulfilment was this: the prophecies were designed to influence the conduct of the people; they were moral teaching, of the nature of threats or promises, which might be revoked or fulfilled according to the demeanour of those to whom they were addressed. Thus Jer 26^{12} says, 'The Lord sent me to prophesy against this city all the words which ye have heard. Now therefore amend your ways, and obey the voice of the Lord your God; and the Lord will repent him of the evil which he hath pronounced against you.' Prophecy was to such an extent moral, and meant to influence men's conduct, that threatenings of evil were rarely absolute. Jonah predicted in what seemed an absolute manner the destruction of Nineveh in forty days; but on the repentance of the people the threatened evil was averted. Jer 18 expressly formulates the moral and contingent character of prophecy, saying, in the words of J″, 'At what time I shall speak concerning a nation, to pluck up and destroy it; if that nation, against whom I have pronounced, turn from their evil, I will repent of the evil which I sought to do unto them. And at what instant I speak concerning a nation to build and plant it; if it do evil in my sight, I will repent of the good wherewith I said I would benefit them. Now therefore go, speak to the men of Judah, Behold, I frame evil against you: return ye now every one from his evil way.' This moral character of prophecy was well understood in Israel, as appears from the intervention of the elders in behalf of Jeremiah: 'Then rose up certain of the elders, and said, Micah the Morashtite prophesied in the days of Hezekiah, saying, Zion shall be plowed like a field! Did Hezekiah and all Judah put him to death? Did they not fear the Lord, and entreat his favour, and the Lord repented him of the evil which he had pronounced against them?' (Jer 26[17]). The principle was also well understood in the early Church, for Jerome remarks that many of the prophecies were given, 'not that they should, but that they should not, be fulfilled.' They were threatenings of evil designed to influence conduct and avert the very evils threatened. There were, no doubt, prophecies which were absolute. The promises of God were so; those that contained statements of His grace, as that the house of David should for ever bear rule in His kingdom, and many others which depended on His will alone. Even some of these contained an element of contingency in them, to this extent, that the conduct of men might retard although not invalidate their fulfilment; while on the other hand threatenings, though long delayed, might eventually be fulfilled because men persevered in their evil ways or returned to them.

* Fairbairn, *On Prophecy*, p. 496.

* 'Two Sermons on the Interpretation of Prophecy' in *Sermons*, vol. i. p. 373, London, 1845.

Moreover, another thing is evident: moral threats or promises could be made only to a subject also considered moral. The predictions of the prophets against foreign nations, though often having the form of threats against their capital city or their land, are really not directed against these material things, but against what might be called the national personality, the moral subject which the nation was, with its spirit and influence in the world of the prophet's day. The prophets deal only with moral forces; to them there are no other forces. The world is a moral constitution, and States are moral personalities. Ezekiel conceives them as existing after their disappearance from the world, just as individual persons do after death. It is this national personality that prophecy threatens with destruction; and when Babylon, for example, came under the power of the Persians, the prophecies against it were fulfilled, although not a brick was thrown down from its walls nor a bar broken in one of its brazen gates. These material things, no doubt, embodied and expressed the spirit of Babylon; but they were nothing in themselves, and might equally embody and express the wholly different moral personality of the Persians.* In point of fact, the material details of the prophecies against the nations were in many instances not verified. Is 17[1] says, 'Behold, Damascus is taken away from being a city, and it shall be a ruinous heap'; but Damascus has probably never ceased to be a city. Here again, no doubt, interesting questions have been raised. Micah's prophecy about Jerusalem was eventually fulfilled; Babylon is at this day a desolation. And Bacon suggested the idea of what he called a 'germinant' fulfilment, *i.e.* one going on through time. At any rate, in the first place the prophetic threat must be held to have been directed against the national personality, and to have been fulfilled in the main in its destruction; and secondly, in endeavouring to reach a conclusion in regard to the material details, the instances in which they have not been verified must be considered, as well as those in which they seem to have received verification. Apart from the uncertainty incident to such historical investigations, it is to misapprehend the nature of prophecy to treat these material details as having great evidential value. Prophecy concerns itself with the world as moral. The evidence of prophecy rather lies in the broad general movement of religious thought which it presents, showing that a divine power had laid hold of the whole mind of man, creating in it lofty religious ideals, quickening its aspirations, giving it an onward and forward look towards a religious perfection, stirring up the heart of the creature to cry after Him who created it, and long for His perfect revelation upon the earth (Jn 14[8ff.]).

iii. The above remarks refer mainly to prophecies that have already been fulfilled; but the same principles apply to prophecies still awaiting fulfilment, *i.e.* prophecies regarding the final condition of the people of God. The moral and religious element was the essential part of the prophecy, the form in which the principle was to verify itself was secondary. The form was of the nature of an embodiment, a projection or construction, and the materials of which the fabric is reared are those lying to the hand of the prophet in each successive age. The imagination of the prophet operates largely in these constructions. Still it is chiefly the moral imagination. When, for example, all the evils existing in the prophet's day are banished and every desirable good introduced (Am 9[13], Jl 3[18], Ps 72[16]), this is not due to the desire for sensuous pleasures, it is rather the expression of the writer's general view of the universe. The world was to his view a moral constitution, the physical being nothing but a mode of expressing or a medium for transmitting the moral and spiritual; the miseries of men and all the outward evils of life were the result of moral disorder; and simultaneously with the disappearance of moral evil physical evil would also cease; and with the perfection of the people of God the external world would be transfigured, and be the perfect minister to the needs of mankind. Thus, while the moral and the spiritual in the prophetic constructions of the future are absolute and permanent, the constructions which embody them are perishable and change. Just as some temple of God embodies and expresses spiritual conceptions, but is constructed out of materials at the architect's disposal in his own day, which materials decay, and in a later age have to be replaced by materials of that age, leaving, however, the spiritual ideas still visibly embodied; so the projections of one prophet, constructed out of the state of the world, and of the nations in his day, decay with the changes of the world, and have to be replaced by a later prophet with materials from the world of his day. In Is 7 ff. the prince of peace is born and grows up amidst the desolations of the Assyrian invasion, and sitting on the throne of David establishes a reign of righteousness and peace without end (Is 9[7]); while in Is 40 ff. the everlasting kingdom of God is introduced by the destruction of Babylon, the idolatrous world, and the restoration of Israel, the Servant of the Lord, who shall be the light of the nations (Is 60). The construction of the former is that of a moral politician; the construction of the latter, that of a religious thinker, almost a theologian. Thus prophecy, while maintaining its spiritual principles unchanged from age to age, by substituting one embodiment of these principles for another age after age, seems itself to instruct us how to regard these embodiments or constructions. They are provisional and transient. They sustain the faith and satisfy the religious outlook of their day, but they have no finality. Even the prophets of the NT are probably no more final in their constructions than those of the OT, *e.g.* in the Apocalypse and Ro 11. They rear their fabrics out of the materials of their own day, as the OT prophets did (cf. vol. i. p. 737).

Thus we have to distinguish between Prophecy and Fulfilment. Prophecy is what the prophet in his age and circumstances and dispensation meant; fulfilment is the form in which his great religious conceptions will gain validity in other ages, in different circumstances, and under another dispensation. Certain elements, therefore, of the relative, the circumstantial, and the dispensational must be stripped away, and not expected to go into fulfilment. Every prophet speaks of the perfection of the kingdom of God, looks for it, and constructs an ideal of it. We are still looking for it. The fundamental conceptions in these constructions are always the same,—the presence of God with men, righteousness, peace, and the like, —but the fabrics reared by different prophets differ. They differ because each prophet, seeing the perfect future issue out of the movements and conditions of his own time, constructs his ideal of the new world out of the materials lying around him: the state of his people; the conditions of the heathen world in his day (Mic $5^{4.5}$, Is $60^{6ff.}$); such facts as that Israel was the people of God, that the kingdom of God had the form of a State, and that the seat of Jehovah's rule was Zion. These relative elements are not to be called figurative, they are essential parts of the prophet's conceptions, and are all to be understood literally. Israel was not a symbol to him meaning the people of God or Church, neither was it to him a type of this. Israel *was* the people of God. Neither were Moab, Edom, Babylon, or Egypt symbols of the foe of the people of God nor types of the hostile world. Each of them to the prophet *was* such a foe. But in all cases the names are used literally, though along with their religious connotation. And what the prophet was able to say of the partial and relative of his day may, of course, be applied to the universal and absolute now—to the Church of God on the one hand, and the hostile world on the other. With the coming of Christ the national, relative and imperfect stage of religion, as it was in OT, passed away; religion became universal, absolute, and perfect. The Apostolic principles of interpretation seem something like these: (1) They assume that in Christ and Christianity religion has become final and perfect; the development has reached the end in view. And their arguments from OT are very much the analysis of this general assumption. (2) God is the author of Scripture; the OT is the word of God. (3) The Divine consciousness is one, embracing the end and the beginning alike: in speaking any word God had always the Christian consummation in view. Truth is also one; when a truth is seen in any aspect it is that truth that is seen. (4) Scripture being the word of God, its whole meaning is religious and spiritual. The circumstances amidst which it was spoken, and the person of whom or to whom, are of no importance. It is the spiritual meaning alone of the words that is the word of God. Historical exegesis accepts these principles, and merely adds another. It assumes that the OT writer had in every passage which he wrote a meaning in his own mind, and that he desired to convey this meaning to his contemporaries; and it asks, what did the Hebrew writer mean? What would the people of his day understand from his words?

A. B. DAVIDSON.

PROPHETESS (נְבִיאָה, προφῆτις).—The conditions that were necessary to qualify for the prophetic office in the OT sense were not such as to exclude women from the latter (see the preceding article, p. 114^a, and cf. Ac 2^{17}). The following prophetesses are mentioned in Scripture: Miriam, Ex 15^{20}, cf. Nu 12^2 (both JE); Deborah, Jg 4^4; Huldah, 2 K 22^{14} (=2 Ch 34^{22}); Noadiah, Neh 6^{14} (but cf. LXX, which has the masc. τῷ Νοαδίᾳ τῷ προφήτῃ); Anna, Lk 2^{36}. 'The prophetess' of Is 8^3 is probably simply 'the prophet's wife.' Prophecy in the NT sense was, of course, also a gift exercised by women (cf. Ac 21^9, 1 Co 11^5). 'The woman Jezebel which calleth herself a prophetess' (Rev 2^{20}; see vol. ii. p. 656^b) may have claimed the gift of prophecy in either the OT or the NT sense. See also art. WOMAN.

J. A. SELBIE.

PROPHET IN NT (*προφήτης, -εύειν, -εία*: never *μάντις* or cognate words except Ac 16^{16} *μαντευομένη* of the possessed girl at Philippi).—The *προφήτης* in classical Greek is one who speaks for another—the interpreter either of the ecstatic *μάντις* or of the god himself, so that he is near akin to the *ἐξηγητής*, though with more definite reference to a person than to things. Of *loci classici* may be mentioned Æsch. *Eum.* 19: Διὸς προφήτης ἐστὶ Λοξίας πατρός (so Plato, *Rep.* 427 C: πάτριος πρ.), and Plato, *Tim.* 71 E f., where he contrasts the *προφήτης* with the *μάντις*. The same sense of 'interpreter' is found in Philo (*e.g. Quis rer. div.* 52, *De spec. legibus*, 8), though he ascribes to him the ecstasy assigned by Plato to the *μάντις*. This blending of the two, which practically merges the *προφήτης* in the *μάντις*, was a current belief even among Christians (Justin, Athenagoras) in spite of 1 Co 14, esp. v.^{32}, till it was partly discredited by Montanist fanaticism; and in our own time it may be traced in every theory of inspiration which fails to realize the full co-operation of the prophet's understanding.

In NT, too, the word *προφήτης* keeps its general sense of an interpreter of God's message. But the prediction which most impressed the vulgar (so roundly even Clem. Alex. *Strom.* vi. 12: ἡ προφητεία πρόγνωσίς ἐστιν—in truth it is nearer ἐπίγνωσις) was a very small part of the message. Agabus predicted the famine and St. Paul's imprisonment (Ac 11^{28} 21^{10}), the Apoc. is called a *προφητεία*, and the OT prophets are naturally cited more or less from the side of prediction. But the prophet's proper work is rather (1 Co $4^{3.24.25}$) edification and consolation, revealing the secrets of the inner life and incidentally converting unbelievers, though, strictly speaking, prophecy is the sign (1 Co 14^{22}) for believers. And because the prophet edifies the Church, not only himself, prophecy is a better gift (1 Co $14^{5.39}$) than that of tongues, and more earnestly to be coveted, though still but a transitory gift (1 Co 13^8), not abiding like faith, hope, and love. On the *method* (scarcely the only method) of edification we get a hint in Ac 13^2, where prophets are ministering (λειτουργοῦντες τῷ K.—compare Timothy's appointment, 1 Ti 1^{18} 4^{14}) when they receive the command to separate Barnabas and Saul. This seems to imply some such position as we find in the *Didaché* (10), where the prophet (if there be one) is the proper person to conduct the public worship, and the only person free to give thanks in what words he thinks fit.

The prophets ranked next to the apostles (1 Co 12^{28}, Eph 4^{11}), and are even coupled with them (Eph 2^{00} 3^{5} *ἀπ. κ. προφ.* in this order will be NT prophets) as receivers of revelation and layers of foundations. Prophecy was not an office, but a special gift, coming not from men, but straight from Christ (*καὶ αὐτὸς ἔδωκεν*, Eph 4^{11}), and it might come to women too (Ac 21^{9}, 1 Co 11^{5}). The prophet spoke *ἐν πνεύματι* (Eph 3^{5}, Apoc. *e.g.* 1^{10}: contrast *ἐν ἐκστάσει* of the trances, Ac 10^{10} 22^{17}), because the divine Spirit worked in him, 1 P 1^{11}, 1 Co 12^{11}; and he was also *πνευματικός* (1 Co 14^{37}, where *πνευματικός* at least includes *προφήτης*), because his human spirit was in full activity, and so steadily (*ὑποτάσσεται*, 1 Co 14^{32}) controlled the gifts of the Spirit that he was quite able to speak (Ro 12^{6}) only in proportion to the faith that was in him.

Neglect of this self-restraint is visible at Corinth (1 Co 14$^{29-31}$, prophets *need* not all speak together), and may help to account for the early warning in 1 Th 5^{20}. Later on 1 Jn 4^{1} speaks of *ψευδοπροφῆται*, and the woman Jezebel (Rev 2^{20}) implies false prophets in Asia. So also the *Didaché* (11) is very stringent in its cautions about prophets.

Of prophets expressly so called in NT, there are Agabus, the groups at Antioch, Judas and Silas, and the four daughters of Philip. We need not go further; but the last prophets we read of (Anon. *ap.* Eus. *HE* v. 17) are Quadratus and Ammia in Philadelphia, perhaps in Hadrian's time. See, further, Selwyn, *The Christian Prophets*, 1900.

H. M. GWATKIN.

PROPITIATION.—This word occurs in AV only three times: Ro 3^{25} as the tr. of *ἱλαστήριον* (*ὃν προέθετο ὁ θεὸς ἱλαστήριον*,—most probably [see Sanday-Headlam] an adj. masc., 'whom God set forth to be propitiatory' [RVm]), and 1 Jn 2^{2} 4^{10} as the tr. of *ἱλασμός* (*αὐτὸς ἱλασμός ἐστι περὶ τῶν ἁμαρτιῶν ἡμῶν*; *ἀπέστειλε τὸν υἱὸν αὐτοῦ ἱλασμὸν περὶ τῶν ἁμαρτιῶν ἡμῶν*); to which RV adds a fourth, He 2^{17} (a merciful and faithful high priest . . . *εἰς τὸ ἱλάσκεσθαι τὰς ἁμαρτίας τοῦ λαοῦ*, 'to make propitiation [AV 'reconciliation'] for the sins of the people'). It will be the object of the present article, firstly, to explain the meaning of the Greek words used, in the light of their usage in the LXX; and, secondly, to examine the ideas associated with the Heb. words which they represent commonly in the LXX.

1. *Ἱλαστήριον* is in OT the regular rendering of כַּפֹּרֶת (in EV 'mercy-seat'), Ex 25$^{16\ (17)}$ (here *ἱλαστήριον ἐπίθεμα*), vv.$^{17-21\ (18-22)}$ 31^{7} etc.: *ἱλασμός* stands for (*a*) כִּפֻּרִים (EV 'atonement'), Lv 25^{9} *ἡ ἡμέρα τοῦ ἱ.* (*τοῦ ἐξιλ.* Lv 23$^{27.\ 28}$), Nu 5^{8} *ὁ κριὸς τοῦ ἱ.*; (*b*) חַטָּאת 'sin-offering,' Ezk 44^{27} (so 45^{19} *ἐξιλασμός*); (*c*) סְלִיחָה 'forgiveness,' Ps 130^{4}, Dn 9^{9} (Theod.); so *ἐξιλ.* Sir 5^{5} (Heb. סליחה); (*d*) אַשְׁמָה 'guilt,' Am 8^{14} (falsely): *ἱλάσκομαι* stands seven times for סָלַח 'to forgive,' as 2 K 5^{18}, Ps 25^{11} (for which *ἵλεως εἶναι* is more common), and three times for כִּפֶּר, Ps 65^{3} 78^{38} 79^{9}, which, however, is far more frequently represented by the (intensive) compound *ἐξιλάσκομαι* (variously construed: see §§ 5, 7–10; and Westcott, *Epp. of St. John*, pp. 83–85). The use of the term in He 2^{17} in connexion with the high-priest shows that *ἱλ.* must there be regarded as the equivalent of כִּפֶּר, not of סָלַח (which is never said of the high-priest, or indeed of any human subject).* *Ἱλάσκομαι* is common in classical Greek, where, however, it is construed regularly with an accus. of the deity (or person) propitiated (as *Il.* i. 100, 444, 472, *μολπῇ θεὸν ἱλάσκοντο*; Hdt. v. 47, *θυσίῃσι αὐτὸν ἱλάσκονται*, viii. 112, *Θεμιστοκλέα χρήμασι ἱλασάμενοι*): in the LXX, on the contrary, this usage is not found except Gn 32^{20}, Zec 7^{2} (*ἐξιλ. τὸ πρόσωπον*), and Pr 16^{14} (*ἐξιλ. αὐτόν*, fig. of wrath), the word (*ἐξιλ.*), when used of a human subject (§§ 10, 11), being commonly construed absolutely, with *περί* of the person on whose behalf the propitiatory act is performed. The difference marks a difference between the heathen and the Biblical point of view: though the idea of propitiating God may be indirectly involved in the phrases used in the OT, it is very much less prominent than in the heathen writers; the propitiatory sacrifice, or rite, has indeed generally for its aim the restoration of God's favour, and the 'forgiveness' of the worshipper (Lv 4^{20} etc., § 12*b*), but there is not the same thought of directly appeasing one who is angry, with a personal feeling, against the offender, which is implied when the deity is the direct object of the verb (cf. Cremer, *Wörterb.*; Westcott, p. 85; Kalisch, *Lev.* i. 316–318). In other words, the difference corresponds with the fact that the higher Biblical conception of God is more spiritual and less anthropomorphic than that of heathen writers.

2. The facts that have been quoted make it evident that the Greek terms rendered 'propitiation' correspond to the Heb. כִּפֶּר and derivatives. These words hold an important place in the theological terminology of the OT; and though they are generally rendered in EV by '(make) atonement' (or 'reconcile,' 'make reconciliation,' in Lv 6^{30} 8^{15} 16^{20}, Ezk 45$^{15.\ 17.\ 20}$ AV; Dn 9^{24} AV and RV), the idea expressed by the Heb. is certainly rather that of 'propitiation' than of 'atonement' (*i.e.* 'at-one-ment,' setting at one, reconciliation [see Shaks. *Rich. III.* I. iii. 36]); and hence they will be properly considered under the present heading.

It is much to be regretted that the link connecting OT and NT, supplied by (*ἐξ*)*ιλάσκομαι*, should have been neglected in EV; and that words which clearly correspond should have been rendered 'propitiation' in the NT, but 'atonement' in the OT. 'Atonement' is now an unsuitable rendering of *kipper*, for two reasons. (1) Since AV of 1611 was made, the word has changed its meaning; and whereas it formerly (see Murray) expressed the idea of *reconciliation*, it now suggests chiefly the idea of *making amends* or *reparation*. Hence in the one passage in AV of NT in which 'atonement' occurs (Ro 5^{11}, for *καταλλαγή*), the Revisers have done rightly in substituting for it 'reconciliation' (which, with 'reconcile,' is used elsewhere, in AV itself, for compounds of *ἀλλάσσω*, Mt 5^{24}, Ro 5$^{10.\ 10.\ 11}$ 11^{15}, 1 Co 7^{11}, 2 Co 5$^{18.\ 18.\ 19}$, Col 1$^{20.\ 21}$, Eph 2^{16}). But (2) even in its older sense of 'reconciliation,' it does not properly represent *kipper*; for *kipper* does not mean to 'reconcile,' nor is it ever represented in LXX by compounds of *ἀλλάσσω*.

3. The root-meaning of כָּפַר is probably *to cover over*; for the Arab. *kafara*, though not very common, has this meaning in various applications (Lane, *Arab. Lex.* p. 2620).

In Syr. *kephar*, and esp. the Pael *kappar*, means *to wipe* or *wipe away*, as Pr 30^{20} to *wipe* the mouth, to *wipe away* tears, the stain of sin, etc., hence fig. *to disperse, destroy* (delere), as darkness Ephr. i. 9, a race or nation, etc. (P. Smith, *Thes. Syr.* col. 1797–9); and W. R. Smith (*OTJC*^{1} 438 f., more briefly, ^{2}380, 381) adopts this as the primary meaning of the Heb. *kipper*,—explaining Gn 32^{21} (see § 5) as meaning properly to '*wipe clean* the face,' blackened by displeasure, as the Arabs say 'whiten the face.' The Heb. *kipper*, however, as a theological term, in any case implies a metaphor,—and it does not greatly signify, in explaining it, whether we start from the idea of *covering over* or from that of *wiping out*; in either case, the idea which the metaphor is intended to convey is that of *rendering null* and *inoperative*. There are analogies in the OT for each explanation; sin is spoken of, viz. as *covered* (כָּסָה,—an ordinary, untechnical word for 'cover'), Ps 32^{1} ('covered in respect of sin'), 85^{2}, Neh 3^{37} (Heb. 4^{5}) [*borrowed* from Jer 18^{23}, with *kipper* (§ 9) changed to *kiṣṣāh*]; and as *wiped* (or *blotted*) *out* (מָחָה), Is 43^{25} 44^{22}, Jer 18^{23} (= Neh 3^{37} [4^{5}]), Ps 51$^{1.\ 9b}$ 109^{14}. (It is difficult not to think that the Arab. and Syr. senses of the root spring ultimately from a common origin,—*e.g.* from the idea of *wiping over*: in both languages, it is remarkable that the word acquires the further derived idea of *disown, deny, be a disbeliever*; hence 'Kafir,' properly an *infidel*).—The Arab. ii. conj. (*kaffara*) occurs often in the Ḳoran of God's *effacing*, or forgiving, sin; and *kaffārat* (Ḳor. $5^{49. 91. 96}$) means the *expiation* of a crime, broken vow, etc. (Lane, 2620, 2622; Lagarde, *Bildung der Nom.* 231 ff.); but these words may be borrowed from Judaism (Hirschfeld, *Beiträge z. Erklär. d. Ḳor.* p. 90). The Assyr. *kuppuru*, also a ritual term ('sühnen'), seems to mean properly *to wipe off*: see Haupt, *JBL*, 1900, pp. 61, 80, and esp. Zimmern, *Beiträge zur Kenntnis der Bab. Relig.* pp. 92, 123, etc.

---

* The *construction*, however, with an acc. of the sin, is, as Ritschl rightly remarks (p. 212), not that of the legal (§ 10), but of the non-legal (§ 9; Ps 65^{3}) LXX usage.

4. The Heb. *kipper* is, however, never used in a purely literal sense (like כִּפָּה), but always * in a figurative or *moral* application, viz. with the collateral idea—which in course of time became the preponderant if not the exclusive idea—of either *conciliating* an offended person, or *screening* an offence or an offender.

Cf. Oehler, *OT Theol.* § 127: '*Kipper*, and the cognate substantives, represent the propitiation (Sühne) as a *covering*; the guilt is covered, or, as it were, withdrawn from the sight of the person propitiated, so that the guilty person can now approach him without danger.' Riehm, in his exposition of the term, uses commonly the expression 'protecting covering' (schützende Bedeckung),—an expression which no doubt reads more into the word than it actually denotes—for, as Schmoller (p. 282 f.) observes, *kipper* is *con*tegere and *ob*tegere, but not *pro*tegere, being never used, for instance, in the ordinary sense of 'protecting,'—but which is still a useful and suggestive paraphrase (cf. *ib.* 235 n., 279, where it is allowed that 'protection,' though not denoted directly by *kipper*, is nevertheless an indirect *consequence* of it). Schmoller, in his exposition, starts with the idea of *covering over* (obruere), in the sense of causing to disappear, making unobserved, inoperative, etc. These explanations, though they start with the idea of 'covering,' differ little in the end from that which would be reached by starting with the idea of 'wiping out'; but it is a question whether some modern writers do not press the idea of 'cover' unduly, and understand it in a too literal sense (cf. §§ 15, 17).

5. *Kipper* is used in *three* applications, which it is necessary to distinguish. (1*a*) A *human* subject is the agent, and the object was originally, it seems, the face of the offended person, though, in actual usage, it is mostly the offended person (or personified agency) himself; the means is a gift, an entreaty, conciliatory behaviour, etc. The most primary example of this application appears to occur in Gn $32^{20\ (21)}$ (J), where Jacob says of Esau, 'I will *cover* his face with a present,' *i.e.* *conciliate* him (𝔊 ἐξιλάσομαι), the figure being that of a person whose eyes are blinded by a gift so as not to notice something (cf. for the figure, Gn 20^{16} כְּסוּת עֵינַיִם; Ex 23^{8} כִּי הַשֹּׁחַד יְעַוֵּר פִּקְחִים; Job 9^{24} פְּנֵי שֹׁפְטֶיהָ יְכַסֶּה). Hence, 'face' being omitted, *kipper* acquires the general sense of *to conciliate, propitiate, appease*: Ex 32^{30} 'peradventure I shall *make propitiation* (אֲכַפְּרָה) for your sin' (viz. by intercession, v.$^{31f.}$; 𝔊 ἐξιλάσωμαι περί), fig. Pr 16^{14} (of a king's wrath, threatening death) 'but a wise man will *propitiate* it' (viz. by conciliatory behaviour; 𝔊 ἐξιλάσεται), Is 47^{11} (of calamity) 'thou shalt not be able to *propitiate* it' (‖ שַׁחְרָהּ 'to charm it away'; but Grätz, Buhl, Cheyne, שַׁחֲדָהּ 'to bribe it away,' cf. Pr 6^{35} Heb.), viz. either by a bribe (Is 13^{17}) or by religious ceremonies.

6. Here may be best explained the subst. *kōpher*, prop. *a covering* (viz. of an offence), hence a *propitiatory gift*, but restricted by usage to a gift offered to propitiate or satisfy the avenger-of-blood, and so the *satisfaction offered for a life, i.e.* a *ransom*,—the *wehrgeld*, 'protection-money,' rigorously prohibited by Hebrew law in the case of murder, but admitted in certain other cases, and evidently a well-known institution: Ex 21^{30} (JE); 1 S 12^{3} (a bribe to screen a murderer; so Am 5^{12}); Ex 30^{12} P (a half-shekel, to be paid by every one, at the time of a census, as the כֹּפֶר נַפְשׁוֹ, or 'ransom of his soul (life),' to avert a plague,—such as might be apprehended [cf. 2 S 24] under the circumstances: cf. § 11 *h*); Nu $35^{31. 32}$ P (not to be accepted from a murderer); Pr 6^{35} (offered in vain for the life of an adulterer; ‖ 'bribe'); 13^{8} ('the ransom of a man's soul (life) is his riches'); 21^{18} ('the wicked is a ransom for the righteous' [see 11^{8}]); Is 43^{3} (Egypt said poetically to be the 'ransom,' which J″ gives to Cyrus in lieu of Israel: ‖ 'Seba instead of thee'); Ps 49^{7} ('no man can redeem [יִפְדֶּה] a brother from death, or give God a *kōpher* for him'); fig. of the discipline of suffering (conceived as delivering from death), Job 33^{24} (‖ 'redeem him [read פְּדֵהוּ] from going down into the pit'), 36^{18} [all].

7. This use of *kōpher* illustrates 2 S 21^{3}. Here David says to the representatives of the murdered Gibeonites, 'Wherewith shall I *make propitiation* (אֲכַפֵּר; 𝔊 ἐξιλάσωμαι)?' a money *kōpher* is refused (v.^{4}), and the *kōpher*, which (though the word is not actually used) is demanded, and given to J″ (v.^{6b}; cf. v.^{1} 24^{1}), consists of the lives of Saul's seven sons: comp. also Nu 35^{33} (P), where it is said that blood unjustly shed 'profanes' and 'defiles' a land, and that a 'covering,' or propitiation, cannot then be made for the land (לָאָרֶץ לֹא יְכֻפַּר; 𝔊 οὐκ ἐξιλασθήσεται ἡ γῆ ἀπὸ τοῦ αἵματος), except by the blood of the murderer.

8. There is an analogous group of cases, (1*b*) in which the verb is in the *passive* voice, the subject being the iniquity, and the means a purifying rite, a sacrifice, or repentance, the effect of which is that the offence is conceived as hidden, cancelled, or made inoperative: Dt 21^{8b} ('and the blood shall be "covered" (*i.e. annulled*) * for them,' viz. by the symbolical execution of the murderer, vv.$^{6. 7}$; 𝔊 ἐξιλασθήσεται αὐτοῖς), 1 S 3^{14} ('the iniquity of Eli's house shall not be "covered" † (𝔊 ἐξιλασθήσεται) by sacrifice or *minḥāh* for ever'), Is 6^{7} ('thy sin shall be "covered" †,' viz. by the coal from the altar touching the prophet's lips; 𝔊 περικαθαριεῖ: ‖ 'thine iniquity shall depart'), 22^{14} ('Surely this iniquity shall not be "covered" † for you, until ye die': 𝔊 ἀφεθήσεται), 27^{9} † (through the abandonment of idolatry; 𝔊 ἀφαιρεθήσεται), Pr 16^{6} † (through amendment of life; 𝔊 ἀποκαθαίρονται: cf. 28^{13b}, Ezk $18^{21. 22}$). ‡

9. (2) In the *second* class of cases in which *kipper* is used, the subject is *God*, the object is either the offender or the offence, the question of means does not here arise, but the *motive*, in so far as it is indicated, is the free grace of God,—represented, however, sometimes as called into activity by a purifying or expiatory rite: the idea of the verb then is that God 'covers,' *i.e. treats as covered, overlooks, pardons, condones*, the offender or the offence. So (*a*) the object being the *offender*, Dt 21^{8a} (J″, after the symbolical expiatory rite, vv.$^{6. 7}$, is entreated to 'cover' [AV 'be merciful to,' RV 'forgive'; 𝔊 ἵλεως γενοῦ] the people, guilty [implicitly] of an untraced murder), 32^{43} (rather differently: 'will "cover" his land,' *i.e.* cancel or remove the stain of bloodshed attaching to it, by the slaughter of those who have shed it; 𝔊 ἐκκαθαριεῖ; AV 'be merciful unto,' RV 'make expiation for': ‖ 'avenge the blood of his servants, and requite vengeance to his adversaries'), Ezk 16^{63} ('when I "cover" thee (*i.e.* act propitiously towards thee; 𝔊 ἐν τῷ ἐξιλάσασθαί με σοι), with regard to all that thou hast done'), 2 Ch 30^{18} (EV 'pardon'; 𝔊 ἐξιλάσθω ὑπέρ); and (*b*) the object being the *offence*, Jer 18^{23} (EV 'forgive'; 𝔊 ἀθῳόω), Ps 65^{3} § (𝔊 ἱλάσῃ τὰς ἀσεβείας), 78^{38} ('annulleth iniquity and destroyeth not'; 𝔊 ἱλάσεται ταῖς ἁμ.), 79^{9} §

---

* Except indeed Is 28^{18}, where—unless, with some moderns, וְחֻפַּר or וְהֻפַּר [from פָּרַר; cf. 24^{5}] is to be read—it is used of *annulling* a treaty (𝔊 ἀφέλῃ; EV 'be disannulled')—a sense which may be derived either from the idea of *covering over, obliterating* (Ges.), or from that of *wiping* or *blotting out* (cf. Pesh. נתכפר 'be wiped out').

* EV 'forgiven,' which no doubt expresses fairly the general sense, but obliterates the distinctive character of the Heb. word used (cf. § 15, towards the end).

† EV 'purged,' substituting an idea not at all contained in the Heb. RVm 'Or, *expiated*.'

‡ Comp. for the thought Sir $3^{3. 30}$ (Heb. צדקה תכפר חטאת) 35^{3} (Swete 32 (35) ^{5}).

§ EV 'purge away': see the last note but one.

(𝔊 *ἱλάσθητι ταῖς ἁμ.*), Dn 9^{24} (RVm 'purge away'; Theod. *ἀπαλεῖψαι τὰς ἀδικίας* [= LXX] *καὶ τοῦ ἐξιλάσασθαι ἀδικίας*),—the object in all these cases being either 'iniquity' or 'transgression,' and there being no reference to any propitiatory rite. Cf. (though with a reference to sacrifice) Sir 34^{19} (Swete 31 (34) ^{23}).

10. (3) The *third* class of cases in which *kipper* is used belongs to the distinctively *legal* terminology (almost entirely Ezk and P: 𝔊 nearly always *ἐξιλάσκομαι περί*: EV mostly 'to make atonement'; see § 2). Here the subject is the *priest*,* the means usually a sacrifice, though occasionally it is (see § 11 *h–m*) some other act or offering, regarded as vindicating the holiness of the community in which Jehovah dwells, and hence as reinstating it in His favour: the object is *never the sin*, but (as commonly understood) the person (or thing) on whose behalf the propitiation is made, the verb—which is construed mostly with עַל or בְּעַד, and only rarely, in some of the cases in which the object is something material (the altar or the sanctuary), with a direct accusative (Lv 16$^{20.\,33a}$, Ezk 43$^{20.\,26}$ 45^{20} [𝔊 *ἐξιλ.* with accus.])—being interpreted as signifying properly to *cover up* (cf. כִּסָּה עַל, and סָכַךְ בְּעַד), or *screen, by a* כֹּפֶר, or *covering* (propitiatory) *gift* (so Riehm, 30–32; Dillm.; Schmoller, though undecidedly, p. 284).

Wellh. (*Compos.*^{2} 336), observing the analogy, as regards the subject and the means, with the cases grouped under (1), supposes that the object was originally 'Jehovah's face' (cf. Gn 32^{20}, cited § 5; and the phrase חִלָּה אֶת־פְּנֵי י׳, lit. 'make sweet the face of J″,' EV 'beseech,' or 'entreat the favour of,' Ex 32^{11}, 1 S 13^{12}, 1 K 13^{6} etc.), but that in process of time the object came to be omitted, and the verb was construed absolutely, *to perform a propitiatory rite* (*kippurim*): construed with an accus., it would then mean (analogously with עִפֵּר, etc., Ges.-Kautzsch, § 52*h*) *to affect with a propitiatory rite.* So far as the ideas associated with the word are concerned, it is indifferent which of these explanations of the construction is adopted.

11. We must next consider of what different sacrifices, or other rites, *kappēr*, in this third class of cases, is predicated. It is predicated, viz.,

(*a*) of the *burnt*-offering, Lv 1^{4} 14^{20} 16^{24}; cf. Ezk 45$^{15.\,17}$.

(*b*) of the *guilt*-offering (אָשָׁם), Lv 5$^{16.\,18}$ 6^{7} 7^{7} 14^{18} (see vv.$^{12.\,14}$), vv.$^{21.\,29}$ (see vv.$^{21.\,25}$) 19^{22}, Nu 5^{8}.

(*c*) of the *sin*-offering, Ex 29$^{36.\,37}$ 30^{10}, Lv 4$^{20.\,26.\,31.\,35}$ 5$^{6.\,13}$ 6^{30} 8$^{15.\,34}$ 10^{17} 14^{19} 16 (14–15 times [on v.^{10} see Kalisch, Dillm., and above, i. 199*n.*]) 23^{28}, Nu 15^{28} 28$^{22.\,30}$ 29^{5}, Ezk 43$^{20.\,26}$ 45^{20}, 2 Ch 29^{24}, Neh 10^{33}.

(*d*) of the *sin*-offering and the *burnt*-offering together, Lv 5^{10} 9^{7} 12$^{6f.\,8}$ 14^{31} 15$^{15.\,30}$, Nu 6^{11} 8^{12} (cf. v.^{21b}) 15$^{24f.}$.

(*e*) of blood in general (as containing the 'soul,' or life), Lv 17^{11} H ('I have given it to you upon the altar to *make propitiation* for your souls; for the blood, it *maketh propitiation* by means of the soul [life]'): cf. 6^{30} 8^{15} 16^{27}; also 14^{53}, where the blood of the slain bird (with other ceremonies) 'makes propitiation' for the leprous house.

(*f*) of the 'ram of installation (מִלֻּאִים),' and the bread, offered at the consecration of the high-priest, Ex 29^{33} (see vv.$^{19\text{-}25.\,32}$).

(*g*) of the *meal*- and *peace*-offering, only in Ezk 45$^{15.\,17}$ (possibly, also, though not probably, of the meal-offering in Lv 14$^{20.\,31}$: see § 13).

Kappēr is attributed, further, to

(*h*) the half-shekel, to be paid by every one at a census, as the *kappēr* of his 'soul' (life), Ex 30$^{15.\,16}$ (probably [cf. Riehm, 24 f.; Dillm.] as an acknowledgment of membership in the theocracy, upon an occasion when the sins and imperfections of individuals would come prominently under Jehovah's notice); cf. § 6.

(*i*) the appointment of the Levites as authorized representatives of the Israelites to perform menial duties about the sanctuary, Nu 8^{19} (lay Israelites, approaching the holy vessels, etc., would do so at risk of their lives [cf. 18^{22} 1$^{51.\,53}$]: the Levites, doing it on their behalf, prevent Jehovah's wrath from manifesting itself in a plague [cf. the same expression in Ex 30^{12}], and are therefore said to 'make propitiation' on their behalf).

(*j*) the incense by which Aaron appeased Jehovah's anger, and arrested the plague, Nu 16$^{46f.}$ (Heb. 17$^{11f.}$).

(*k*) the punishment of a conspicuous offender, Nu 25^{13} (the occasion on which Phinehas, interposing with the sword, 'turned away' Jehovah's 'wrath' from the Israelites, and arrested the plague: see v.^{11}).

(*l*) the offering of the spoil taken from the Midianites, Nu 31^{50} ('to make propitiation for our souls before J″'; probably, as in Ex 30$^{15.\,16}$, in view of the numbering of the men of war, v.^{49} [where the phrase is the same as in Ex 30^{12}; cf. also v.^{54b} with Ex 30^{16b}]).

(*m*) the blood of a murderer, making expiation for blood unjustly shed, Nu 35^{33}.

All these passages belong to P.

12. The following additional facts with regard to the usage of *kipper* deserve also to be noted.

(*a*) It is construed with מִן 'from' of the offence (or uncleanness),—RV 'as concerning,' 'because of,' 'for,' but more probably (so Riehm, 50 f.; Schmoller, 254 f., 284; cf. Dillm. on Lv 4^{26}) to be understood in the sense of '(clearing) from' ('shall make propitiation for him *from* his sin'), Lv 4^{26} 5$^{6.\,10}$ 14^{19} ('from his uncleanness'), 15$^{15.\,30}$ 16$^{16.\,16.\,34}$, Nu 6^{11}; and with עַל 'on account of,' Lv 4^{35} 5$^{13.\,18}$ 6^{7} 19^{22} (RV 'as touching,' 'concerning,' 'for').

(*b*) It is followed by 'and it shall be forgiven him (them),' in the case of the sin-offering, Lv 4$^{20.\,26.\,31.\,35}$ 5$^{10.\,13}$, Nu 15$^{25.\,28}$ (cf. v.^{26}); and in the case of the guilt-offering, Lv 5$^{16.\,18}$ 6^{7} 19^{22}. (These are the only passages in the Law, except Nu 30$^{5.\,8.\,12}$, in which סָלַח 'to forgive,' occurs).

(*c*) It is closely associated (but only where predicated of the *sin*-offering) with 'to be clean' (טָהֵר), or 'to cleanse' (טִהַר), Lv 12$^{7.\,8}$ 14$^{20.\,52.\,53}$ 16$^{19.\,30}$, Nu 8^{21}, Ezk 43^{26}, cf. 2 Ch 30^{18};

with 'to sanctify,' Ex 29$^{33.\,36.\,37}$, Lv 8^{15} 16^{19}, Nu 6^{11};

and with 'to free from sin' (חִטֵּא), Ex 29^{36} (EV, very inadequately, 'cleanse'), Lv 8^{15} (EV 'purified'!), 14$^{49.\,52}$ [see v.^{53}] of the leprous house (EV 'cleanse'), Nu 8^{21} (RV 'purified from sin'), Ezk 43$^{20.\,22}$ ('cleanse,'—of the altar, as Ex 29^{36}) 45^{20} (see v.^{18}),—in all the cases with חִטֵּא, of a material object, which the Hebrews regarded as capable of being infected with sin (Schmoller, 222, 261).

(*d*) Cf. *kippurim*, 'propitiation' (EV 'atonement'), used (*α*) of a sin-offering, Ex 29^{36} 30^{10}, Nu 29^{11}; (*β*) of a guilt-offering, Nu 5^{8}; (*γ*) in the expression 'day of propitiation (atonement),' Lv 23$^{27.\,28}$ 25^{9}; (*δ*) 'propitiation-money,' of the half-shekel paid at a census, Ex 30^{16}. It is probable also (whatever the ultimate origin of the term may have been) that the idea of propitiation was felt to attach to *kappōreth* (EV 'mercy-seat'); cf. what is said on this subject in *Leviticus* (in Haupt's *SBOT*), p. 80 f.

(*e*) The object of *kipper* is usually an individual or the community; but sometimes it is a *material* object,—in particular the altar of burnt-offering, (at the time of its consecration) Ex 29$^{36.\,37}$, Lv 8^{15}, Ezk 43$^{20.\,26}$, (on the annual Day of Atonement) Lv 16$^{18.\,20.\,33}$; the sanctuary (on the same occasion), Ex 30^{10b} [in v.^{10a} the prep. has probably a *local* force], Lv 16$^{16.\,20.\,33}$, Ezk 45^{20}; a house infected with leprosy, Lv 14^{53}; cf. of the goat sent to Azazel, Lv 16^{10} (see Dillm.).

---

* Or sometimes (Lv 1^{4} 17^{11}, Ex 30$^{15.\,16}$, Nu 31^{50} 35^{33}) the *offering*; but the difference is immaterial.

13. It does not fall within the scope of the present article to investigate the character or *rationale* of SACRIFICE, except in so far as this is expressed by the term *kappēr*. Confining ourselves therefore to this, we may draw from the data collected in §§ 10–12 the following conclusions with regard to the significance of this term in its legal or ceremonial applications (which are to be carefully distinguished from the *extra*-legal usages, analyzed in §§ 5, 7–9). In the legal terminology it is especially associated with the *sin*-offering, of which it designates the most distinctive and characteristic operation; it is also frequently, though not so characteristically, predicated of the *guilt*-offering (the *āshām*), that differentiated type of sin-offering prescribed for cases in which injury has been done to the rights of another person. To the *burnt*-offering, offered alone, it is attributed only in Lv 1^{4} 14^{20} 16^{24} (cf. Ezk $45^{15.\ 17}$; also Job 1^{7} 42^{8}), on the ground, it seems, that, though not a proper propitiatory sacrifice, it was a mark of the worshipper's devotion, and, being offered 'for his favour (acceptance) before J″' (Lv 1^{3} לִרְצֹנוֹ), and accepted (וְנִרְצָה לוֹ) accordingly, moved Him to regard him graciously, and to overlook his moral insufficiency; elsewhere it is not attributed to it expressly,* but only (§ 11 *d*) when it is closely associated with the sin-offering, for the purpose (as seems to be frequently the case) of enhancing the significance of the latter; and, indeed, Lv 14^{20} 16^{24} (cf. vv.$^{3.\ 5}$) might almost be regarded as falling under this category. Ezekiel ($45^{15.\ 17}$) attributes it to the *peace*- and *meal*- offering; in H, also, it is attributed to the peace- (and burnt-) offerings, in virtue of what is said about the 'blood' in Lv 17^{11} (cf. v.^{8}); in the system of P it is not attributed directly to either of these, for the meal-offering in Lv $14^{20.\ 31}$ holds such a secondary place that it cannot be treated with any confidence as participating in the *kappārā*. The *kappārā* is specially the function of the *blood* (see Lv 17^{11} [H]; and cf., in the ritual of the sin-offering, Ex 30^{10}, Lv 4. $6^{30\,(23)}$ 8^{15} $16^{15f.\ 18f.\ 27}$, Ezk 43^{20} $45^{19f.}$), on account, as is expressly said in Lv 17^{11}, of its being the seat of the 'soul' or life, the most precious, and also the purest and most immaterial gift that can be offered to God; the only exception (among sacrifices) being one that proves the rule, viz. (Lv 5^{13}) the vegetable offering allowed as a substitute for the usual sin-offering, when the latter was beyond the means of the offerer. Hence the later Rabb. *dictum* (*Yōmā 5a*) אֵין כַּפָּרָה אֶלָּא בַּדָּם 'there is no *kappārā* except with blood' (cf. He 9^{22}),—which, however, is not true universally (see the cases, § 11 *h–m*, esp. Ex $30^{15f.}$), but only in so far as sacrifice is concerned.

14. The *effect* of the *kappārā* is a purification, sometimes from sin, sometimes (Lv 12. 14. 15, Nu 6) from merely ceremonial defilement, sin being regarded as a stain, and the defilement, whether ritual or moral—for in P the two are not clearly distinguished (see LAW, vol. iii. p. 72^{a}; and cf. Schmoller, 280)—being conceived as either made invisible and inoperative, or else as actually obliterated; it is regarded as withdrawn from Jehovah's eyes (cf. Ps 51^{9a}; and contrast 90^{8}); it no longer comes between Him and man: He neither sees nor imputes it. The aim of the priestly legislation is to maintain the ideal holiness of the theocratic community (LAW, *ib.* p. 70 f.); and the *kappārā* is the primary means by which this is effected. Sometimes cleansing (moral or ceremonial) is expressly mentioned as the effect of the rite (see § 12 *e*; and note esp. Lv 16^{30} 'on this day shall propitiation be made for you *to cleanse you*; from all your sins *ye shall be clean* before J″'). As prescribed for the priests (Ex 29^{33}, Lv 9^{7}) and Levites (Nu 8^{21}), before admission to their sacred duties, it is a readily intelligible rite of preliminary lustration (Riehm, 76 f.; Schmoller, 234 f., 245). Enjoined for a *material* object, the altar or the sanctuary, its aim is to secure or maintain its holiness: the altar, prior to its consecration, is regarded as affected by the natural impurity of human workmanship, which has to be removed; the sanctuary, frequented as it was by a sinful and unclean people, is contaminated by their sins, and accordingly requires a periodical purification (Riehm, 54–57; Schmoller, 221 f., 242, 262); the leprous house (Lv 14^{53}) is conceived as tainted by sin (§ 12 *c*); the 'scape-goat,' offered by the sinful people, requires to be purified before it can discharge the solemn functions assigned to it (Riehm, 55; Dillm.; etc.). On the part of God the effect of the *kappārā* is more particularly specified,—at least in the sin- and guilt-offering,—as *forgiveness*,—conditional, as we may suppose would be understood by the more spiritual Israelites, on the penitence of the offerer, though this is not stated in the laws as distinctly and regularly as might be expected (cf. Lv 5^{5} 16^{21}, Nu 5^{7}; Schultz, *OT Theol.* ii. 99 f.): it should, however, in this connexion be remembered that *kappēr* was in general possible only for *unintentional* (or *venial*) sins* (above, vol. i. 201^{b} note; Schultz, i. 382 f., 388 f., 394 f., ii. 87–89: cf. Ezk 45^{20}, where 'erreth' = sins inadvertently). Sins committed wilfully, 'with a high hand' (Nu $15^{30f.}$), *i.e.* in a spirit of presumptuous defiance, challenging God's anger, lie outside the sphere within which the *kappārā* ordinarily operates; hence, as predicated of the *regular* Levitical sacrifices, it is never described as *appeasing* God (cf. § 2 *end*), nor is it ever implied that the offerer of such a sacrifice is outside God's dispensation of grace, or the object of His *wrath*; the cases § 11 *j k* are exceptional; at most (§ 11 *h i l*) it may be said to be a means of *averting* it (Riehm, 30, 37, 85; *AT Theol.* 132; cf. Schultz, i. 394).

15. From what has been said, it will be seen that *kipper* is a difficult word to represent satisfactorily in English. 'Cover'—or 'wipe out,' if that view of the original sense of the word be adopted—is too colourless: 'make atonement' (at-one-ment, reconciliation) may express a *consequence* of *kipper*, but it is not what the word itself denotes. It has always—or almost always—a religious, and mostly a ritual colouring: it is to *cover* (metaphorically) by a gift, offering, or rite, or (if God be the subject) to *treat as covered*: the ideas associated with the word are thus to *make* (or *treat*) *as harmless, non-existent*, or *inoperative*, to *annul* (so far as God's notice or regard is concerned), to *withdraw from God's sight*, with the attached ideas of *reinstating in His favour*, *freeing from sin*, and *restoring to holiness*,—especially (but not exclusively), when the subject is a human agent, by the species of sacrifice called the 'sin-offering.' It is a stronger, more significant synonym of חִטֵּא to 'un-sin,' and טִהַר to 'purify' or 'cleanse.' There appears to be no one English word which combines, or suggests, ideas such as these. Even to 'make propitiation' accentuates somewhat unduly a particular side, or aspect, of what is involved in *kipper* (cf. § 1 *end*); though the fact that the ideas just indicated were associated with the word *in conjunction with a rite*, would point rather naturally in the direction of such a meaning, which the nearly habitual rendering of the LXX, (ἐξ)ιλάσκομαι, shows was felt to attach to the word in the 3rd cent. B.C. Nevertheless, esp. in view of the LXX, and NT ἱλασμός, this is on the whole the best rendering of *kipper* in its ritual sense, the cases grouped under §§ 8, 9 being represented, for consistency, by *deal propitiously*

---

* The extra-legal passage, 1 S 3^{14} (§ 8), is not evidence of the ideas associated with *kipper* in the ceremonial system of P.

* See, however, Lv $6^{2\text{-}7}$ $19^{20\text{-}22}$, Nu $5^{6\text{-}8}$.

with, or *be propitious to*. Whether, in actual usage, there was any consciousness of the primary sense, to 'cover,' is extremely doubtful: in all probability, *kipper* was felt to express only the derived ideas which have been indicated (cf. Schmoller, 283 f.).

16. To return briefly, before concluding, to the use of the term in the NT. The death of Christ is represented in the NT under *three* main aspects: as a λύτρον, *ransoming* from the power of sin and spiritual death (see REDEEMER); as a καταλλαγή, setting 'at one,' or *reconciling*, God and man, and bringing to an end the alienation between them; and as a *propitiation*, breaking down the barrier which sin interposes between God and man, and enabling God to enter again into fellowship with him. 'Propitiation' is in the OT attached especially to the sin-offering, and to the sacrifice of the blood (or life); and Christ, by the giving up of His sinless life, annuls the power of sin to separate between God and the believer, by a sacrifice analogous to those offered by the Jewish priests, but infinitely more efficacious (see, further, ATONEMENT, MEDIATION, RECONCILIATION).

17. It remains only to notice briefly the different view of *kappēr* which is developed by Ritschl, *Rechtfertigung u. Versöhnung*^{2}, ii. 70–80 (on *kōpher*), 184–210. *Kappēr*, Ritschl argues (p. 198 f.), is attributed to *all* offerings, but forgiveness (implying the presence of sin) only to the sin- and guilt-offering: it is thus a false generalization to suppose that its purpose is the removal of sin; and this conclusion is confirmed by the fact that there are many cases of purely *physical* uncleanness for which, nevertheless, a sin-offering involving it is prescribed. In fact, *kappēr* has essentially (p. 203) *no relation to sin*; the 'covering' of persons, spoken of in the priestly law, does not mean the covering of their guilt, but their *protection*, in order, viz., that—in accordance with the principle that 'no man can see me and live' (Ex 33^{20}; cf. Gn 32^{30}, Ex 19^{21} 20^{19}, Dt 5^{24}, Jg $6^{22.23}$ 13^{22}, Is 6^5)—they may be able to appear before God without risk of their lives; the necessity of such 'protection' depends, however, not upon man's sinfulness, but upon his 'creatureliness'; he needs it, not as *sinful*, but only as *created*, and *finite*. Sin is not the ground of the *kappārā*, but merely (in the sin- and guilt-offering) its occasion. It follows that, upon Ritschl's view, *kipper* ought not to be translated 'make propitiation' (or 'atonement') at all: accordingly, he condemns (p. 199 f.) the rendering 'sühnen' as introducing 'only confusion,' and considers (p. 186) that the LXX, in rendering (ἐξ)ιλάσκομαι, substituted for the Heb. a Greek word which was not really its equivalent.

This theory is controverted at length by both Riehm (esp. pp. 37 f., 46–8, 51 f., 57–9, 72–81, 83–6, but also elsewhere) and Schmoller (pp. 266–9, 274–81); cf. also Schmidt, *PRE*^{2} xvi. 365 f.; and in spite of the ability with which Ritschl writes, it is impossible not to think that it is a one-sided one, depending in some parts upon a combination of elements which are not combined together in the OT, and in others emphasizing features and principles which do not really, in the legislation as a whole, possess the prominence and significance which are attached to them. The crucial question undoubtedly is, What does the *kappārā* 'cover'? Ritschl's view that, as it is predicated of the burnt- and peace-offering, in which there is no question of sin, it must cover man's creatureliness, which cannot subsist in God's presence without such 'protection,' introduces an idea which is nowhere brought into connexion with sacrifice. To approach God (with sacrifice) is by no means identical with 'seeing' Him (in the sense implied in the passages quoted), nor is it ever represented as endangering life: the principle of Ex 33^{20} etc. is never referred to in the legislation of P; and the cases in which life is represented as endangered are connected not with the omission of a sacrifice, but with some irreverence or irregularity in the discharge of sacred offices, or with some other specific act of disrespect towards God (Ex $28^{35.43}$ $30^{20.21}$, Lv 8^{35} $10^{1f.6.7.9}$ 15^{31} $16^{2.13}$ 22^9, Nu $4^{15.19.20}$ 17^{10} $18^{3.22.32}$; cf. 1^{53} 8^{19} 18^5). In preference therefore to having recourse to an explanation both artificial in itself and also with so little support in the usage of the ritual legislation, it seems better to suppose that though the burnt-, peace-, and meal-offerings were not offered *expressly*, like the sin- and guilt-offerings, for the forgiveness of sin, they nevertheless (in so far as *kipper* is predicated of them) were regarded as 'covering,' or neutralizing, the offerer's unworthiness to appear before God, and so, though in a much less degree than the sin- or the guilt-offering, as effecting *kappārā* in the sense ordinarily attached to the word, viz. 'propitiation.'* The great rarity with which *kappēr* is attributed to any but the sin- and guilt-offerings, and the fact that, where its effects are specified, they are always either the forgiveness of sin or the removal of uncleanness, are additional arguments in support of the ordinary view. It is also to be observed that Ritschl's theory implies that *kappēr* expresses the idea of 'protection' far more directly and distinctly than can be deemed probable: 'protection,' as said above (§ 4), may be a secondary and indirect consequence of *kappēr*, but it is not at all the primary and immediate sense of it (not even in Dt 32^{43}; Ritschl, p. 72 f.). The fact that *kipper* is used with reference to the removal of physical uncleanness proves, not that it stands in no relation to sin (for חִטֵּא, to 'free from sin,' is used in exactly the same connexions, § 12 *c*), but that the Hebrews understood the term 'sin' in a wider sense than we do, and included in it material, as well as moral, defilements.

LITERATURE.—The two very full discussions that have been referred to, Riehm, *Der Begriff der Sühne im AT*, 1877 (reprinted from *SK*, 1877, pp. 7–92: see also his *AT Theol.* 130–147), and Schmoller, *SK*, 1891, Heft 2, pp. 205–288; Schultz, *OT Theol.* i. 397–400, and *Amer. Journ. of Theol.* iv. (1900), 285–91, 301–4, 309–13; Dillm. on Lv 4^{20}; Wellh. *Compos.*^{2} 335 f.; Smend, *AT Rel.-gesch.* 321; Nowack, *Arch.* ii. 220; A. B. Davidson, '"Atone" in Extra-ritual Literature,' *Expos.*, Aug. 1899, p. 92 ff. Schultz's view of the ritual sense of *kipper* approximates to that of Ritschl, though he rejects the idea that an ethical motive is never involved in it: he would render the term by 'consecrate' (*weihen*); man is by nature weak, and consequently (physically and morally) unworthy to draw nigh unto God: the priest, by the 'covering' rite, draws a veil over the creaturely unworthiness of the offerer,—and also, if the case requires it, over his sin; the 'consecration' (*Weihung*), thus provided for him, is, as it were, a 'wedding-garment,' enabling him to draw near to the high and holy God without danger.

S. R. DRIVER.

PROSELYTE (προσήλυτος, from προσέρχεσθαι: lit. 'advena,' *i.e.* visitor, new comer).†

i. *The term 'proselyte.'*—προσήλυτος is the usual LXX rendering of גֵּר [see GER],‡ *i.e.*, originally, one who takes up his residence in a foreign land, and so puts himself under the protection of a foreign people, as a client; particularly a foreigner thus residing in Palestine.[*] The classical equivalent is ἔπηλυς or ἐπηλύτης (*advena*); but the technical name of such a foreign resident was μέτοικος (*incola*), to which LXX πάροικος [μέτοικος occurs Jer 20^{3} only] corresponds. In NT (Mt 23^{15}, Ac 2^{10} 6^{5} 13^{43}) προσήλυτος is commonly understood to mean a foreign convert to the Jewish religion, a *proselyte* in our sense of the word.[†] It seems to have lost all connexion with residence in Palestine, for the proselytes referred to in Ac 2^{10} 13^{43} live in foreign lands.

---

* The use of the term רֵיחַ נִיחֹחַ 'savour of tranquillizing *or* contentment,' of the burnt-, as of the meal- and peace-offerings (Lv $1^{9.17}$ $2^{3.16}$ 3^5 *al.*), also implies *something* of the nature of a propitiation (cf. Gn $8^{20f.}$).

† The etymology is suggested in such expressions as ἐὰν δέ τις προσέλθῃ πρὸς ὑμᾶς προσήλυτος Ex 12^{48} (Lv 19^{33}, Nu 9^{14}); ὁ προσελθὼν προσήλυτος ἐν ὑμῖν Ex 12^{49}; though more often in such phrases as הַגֵּר הַגָּר [אֲשֶׁר יָגוּר] בְּתוֹכְכֶם other participles are used, viz. προσκείμενος (Lv 16^{29} $17^{8.10.12.13}$, Nu $15^{15.16.26.29}$ 19^{10}, Jos 20^9), προσγενόμενος (Lv 18^{26}, cf. Nu 15^{14}), γεγενημένος (Lv 20^2), προσπορευόμενος (Lv 19^{34}); once only προσηλυτεύοντες (Ezk 14^7 [Aq. Ps 5^5 120^5]), while Ezk 47^{22} gives τοῖς προσηλύτοις τοῖς παροικοῦσιν ἐν μέσῳ ὑμῶν. This last is like the rendering of 'the *gēr* who is in thy gates' in Ex 20^{10}, Dt 5^{14} ὁ προσήλυτος ὁ παροικῶν ἐν σοί.

‡ גֵּר is eleven times translated πάροικος (Gn 15^{13} 23^4, Ex 2^{22} 18^3, Dt 14^{21} $23^{7.(8)}$, 2 K 1^{13}, 1 Ch 29^{15}, Ps 38 $(39)^{12}$, 118 $(119)^{19}$, Jer 14^8; cf. Ps 104 $(105)^{12}$ גּוּר); twice γειώρας (Ex 12^{19}, Is 14^1); once ξένος (Job 31^{32}). Job 19^{15} has γείτονες for גֵּרִים. προσήλυτος

When did the word lose the local (political) and gain this final technical (religious) sense? Its meaning in the LXX is somewhat disputed. Geiger (*Urschrift*, p. 353 ff.) maintains that it is there strictly equivalent to *gēr* in its original sense, while W. C. Allen (*Expositor*, 1894, x. 267–275) argues that the LXX uses the word consistently in the final sense of *proselyte.* This wide divergence of view is possible because the Hebrew word *gēr* itself becomes almost equivalent to proselyte in P.[‡] The ideal of Judaism is that there shall be no uncircumcised alien in the Holy Land. But it cannot be proved that προσήλυτος connects itself consistently with these OT approaches of *gēr* to its final (Mishnic) sense. It is true that πάροικος stands for *gēr* in several passages where the sense 'proselyte' would be especially inappropriate, as where Israel, or an Israelite, is called a *gēr* in a foreign land (Gn 15^{13}, Dt 23^{7}, Gn 23^{4}, Ex 2^{22} 18^{3}), or in God's land (Ps 39^{12} 119^{19}, 1 Ch 29^{15}), where God is Himself a *gēr* (Jer 14^{8}), or where the law for the *gēr* differs from that for the home-born (Dt 14^{21} *contra* Lv 17^{15}). But on the other hand no very obvious reason for the rendering exists in 2 S 1^{13}; and—what is more important—Israelites are elsewhere called προσήλυτοι in Egypt (Ex 22^{21} 23^{9}, Lv 19^{34}, Dt 10^{19}), or in God's land (Lv 25^{23}); the word is closely parallel to πάροικος (Lv $25^{23.\,35}$); circumcision is specially required of a προσήλυτος before he can eat the Passover (Ex 12^{48}); and in two passages where a proselyte proper is meant, the Aramaic word γειώρας is used (Ex 12^{19}, Is 14^{1}).[§]

It is certain that the LXX προσήλυτος, even if he is often a circumcised convert, remains always a foreign resident in Palestine. Of an application of the word to a convert to Judaism who still resides in a foreign land there is no trace.[‖] This distinguishes the LXX use from that of the NT. In an interesting mistranslation of Is 54^{15} LXX reads, 'Behold, proselytes will come to thee through me, and will sojourn with thee, and will flee to thee for refuge.'[¶] The religious sense blends with the local, but does not displace it. It is therefore impossible to make the word simply equivalent to 'convert.' The tendency of the LXX to translate *gēr* by προσήλυτος is stronger than its sense of this later technical meaning. No difference of usage appears between early and late parts of the LXX. The word occurs in the Apocryphal books only in To 1^{8} ℵ (from Dt 14^{29} 26^{12}). The absence of a common technical use of the word seems to be indicated by the fact that it is not used of unmistakable proselytes, from Ruth to Achior (Jth 14^{10}), or in the frequent expressions of hope for the conversion of the heathen.

Philo[*] understands the LXX προσήλυτος in the sense of 'convert.' Those who have changed to the better order Moses calls προσήλυτοι, because they have come to a new and God-pleasing constitution (ἀπὸ τοῦ προσεληλυθέναι καινῇ καὶ φιλοθέῳ πολιτείᾳ, *de Monarch.* i. 7). But he prefers the word ἔπηλυς (ἐπηλύτης, ἐπήλυτος), often, as in this passage, substituting it for the other in the course of his discussion (so also in *de Vict. Off.* 10, *Quæs. in* Ex 22^{20}, *de Cher.* 31. 33. 34), more often still using it throughout (*de Septenario* 14, *de Creat. Prin.* 6, *de Caritate* 12, *de Pœnit.* 2, *de Execrat.* 6). Bertholet (p. 288) is surely mistaken in saying that ἔπηλυς has a wider meaning than προσήλυτος, for the distinction in *Quæst. in* Ex 22^{20} between ἐπήλυδες *of place* (χώρας), and those *of laws and customs* (νομίμων καὶ ἐθῶν), is made solely in order to explain the two uses of the word προσήλυτος in Ex $22^{20\,(21)}$, and the argument would be wholly without force if the two words were not synonymous. Philo allows the possibility of the local meaning of προσήλυτος (ἔπηλυς) in order to explain its application, figuratively, to Israel in Egypt. The literal word in this connexion was μέτοικος or ξένος (*de Vita Mos.* i. 7, *dc Carit.* 13. 14). Compare his interpretation of Lv 25^{23} (*de Cher.* 31–34): the wise man is but an ἔπηλυς and πάροικος in the world; God is the only *citizen*, and on the contrary the foolish man is altogether a fugitive.

Philo's preference for the word ἔπηλυς prevents us from supposing that the word προσήλυτος was current in his circle, though it hardly warrants the opinion that ἔπηλυς was the current technical name of the Greek converts to Judaism of whom he speaks. It was probably simply the more natural word by which to convey the sense of the LXX to his readers. In Philo, then, the religious interprets and practically displaces the local use of the word, but a common technical use of it, such as the NT seems to presuppose, he does not reveal.

Josephus often refers to actual proselytes,[†] but without using the name; and he not infrequently alludes to OT passages in which the *gēr* is commended to charity,[‡] but cites them only as providing for the poor, or for the foreigner (ξένος, ἀλλόφυλος, ἀλλοτριόχωρος). Are we to infer that Philo knew, as Josephus did not, a class of Greek converts to Judaism to whom the humane injunctions of the law applied, who had lost their natural friends and helpers for the sake of religion, and were especially needy and deserving of friendly consideration on the part of Jews?

ii. *Words and phrases descriptive of proselytes.*—Instead of a fixed technical word for foreign converts to the Jewish religion, the Old Testament and Jewish literature give various descriptive phrases, some of which may well be gathered together here, since they contain in themselves an interpretation of Jewish proselytism. The proselyte is a *gēr* who is circumcised (Ex 12^{48}), or who joins himself to the house of Jacob (Is 14^{1}); he is one who enters into the assembly of Jahweh (Dt 23^{8} 'in the third generation,' cf. v.^{3}); he is

---

never translates any other root, but is found without Hebrew equivalent in Lv 17^{3}, Dt 10^{18a} 12^{18}; Is 54^{15} gives an interesting mistranslation. Ἐπήλυτος occurs only in Job 20^{26}.

[*] ὁ προσήλυτος is distinguished on the one side from the native Israelite (ὁ αὐτόχθων, ὁ ἐγχώριος, οἱ υἱοὶ Ἰσραήλ), and on the other from the foreigner (ὁ ἀλλότριος, ὁ ἀλλογενής). The distinction from ὁ πάροικος is less clear, and does not perfectly correspond to that between *gēr* and *tôshāb*.

[†] So Theodoret: προσηλύτους δὲ ἐκάλουν τοὺς ἐκ τῶν ἐθνῶν προσιόντας καὶ τὴν νομικὴν πολιτείαν ἀσπαζομένους; and Suidas: οἱ ἐξ ἐθνῶν προσεληλυθότες καὶ κατὰ νόμον ποθήσαντες πολιτεύεσθαι.

[‡] See, *e.g.*, Lv 17–19 (H), Nu 15 (P). The principle is, one law for home-born and *gērîm*, Ex 12^{49}, Nu 9^{14} $15^{15.\,16.\,29.\,30}$.

[§] So Schürer, *GJV*^{3} iii. 125 f.; Bertholet, *Die Stellung der Israeliten u. d. Juden zu den Fremden*, 1896, p. 259 ff. The word γειώρας is used by Justin (*Dial. c. Tryph.* c. 122 [γηόρας]) and Julius Afri. (*ad Aristidem*) of proselytes; but Philo read it in Ex 2^{22} (LXX πάροικος) of Moses in Midian (*de Confus. Ling.* 17), hence it also cannot have been a recognized technical title. Does Josephus mistake it for the name of a town? (ὁ [τοῦ] Γιώρα Σίμων, *BJ* II. xix. 2, etc.).

[‖] ἐν τῇ γῇ ὑμῶν Lv 19^{33}, Nu 9^{14} 15^{14}, ἐν ὑμῖν Ex 12^{49} etc.

[¶] ἰδοὺ προσήλυτοι προσελεύσονταί σοι, etc.

[*] See Bertholet, *l.c.* pp. 285–289.

[†] *e.g.* Helena, Izates, and Monobazus (*Ant.* xx. ii.–iv.); Fulvia (*Ant.* XVIII. iii. 5); cf. *c. Ap.* ii. 11, 29, 37, *Ant.* XIII. ix. 1, xi. 3; *BJ* II. xx. 2, VII. iii. 3, etc.

[‡] *e.g. Ant.* III. xii. 3 (Lv 25^{6}), IV. viii. 21 (Dt 24^{21}, Lv $19^{9\,10}$), viii. 22 (Dt $14^{28.\,29}$ 26^{12}), viii. 38 (Dt $24^{14.\,15}$).

a foreigner [בֶּן־הַנֵּכָר, ὁ ἀλλογενής] who has 'joined himself to J″[*] to minister to him, and to love the name of J″, to be his servant—every one who so keeps the Sabbath as not to profane it, and who lays hold on my covenant' (Is $56^{3.6}$); he is a *nokhri* (ξένος) who 'comes to take refuge under the wings of J″' (Ru $2^{11.12}$, cf. ^{10}; see also Apoc. Bar 41^{4}). Only in Est 8^{17} are converts spoken of as those who 'become Jews' [מִתְיַהֲדִים, LXX περιετέμνοντο καὶ ἰουδάϊζον]. Achior (Jth 14^{10}) believed in God, was circumcised, and added to the house of Israel (προσετέθη πρός, as Is 14^{1}). See also the forms of expression in such passages as Is 2^{2-4}, Jer 3^{17} 4^{2} 12^{16} (cf. Is 45^{23} 65^{16}),[†] Zeph 3^{9}, Is 44^{5}, 1 K 8^{41-43}, Ru 1^{16}, Zec 8^{20-23} 9^{7} 14^{16-19}, Is 19^{18-25}, To $14^{6.7}$. A convert could be described as one who turned to J″, swore by the name of J″, prayed to Him, sought and kept His law, especially the Sabbath and the prohibition of eating blood. Circumcision could not be omitted by one who would join himself to Israel. Almost without exception (but see Zeph 2^{11}, Is 19^{18-25}) the supposition is that converts will live in Israel's land.[‡] They are circumcised *gērîm*.

Philo regards proselytes as those who leave polytheism and adopt the worship of one God. He describes them as changing to the better order, as migrating to piety, journeying to a good colony, deserting to God or to the truth, wandering to truth and to the honouring of the One who is worthy of honour, as fugitives to God, and suppliants, as those who change to the constitution (πολιτεία) of the Jews. The mind of a proselyte (Ex 23^{9}) is alienation (ἀλλοτρίωσις) from polytheism and familiarity (οἰκείωσις) with the worship of the One and Father of all.[§] Having come to the worship of the true God they come to possess all virtues, wisdom, temperance, modesty, etc. (*de Pœnit.* 2), they will have a secure place in heaven, and meanwhile are to be especially cared for, since they have cut themselves off from their natural relationships, and since the God-pleasing conduct (θεοφιλὲς ἦθος) should be a greater ground of friendship than anything else (*de Carit.* 12; *de Pœnit.* 1).

Josephus describes the proselyte as one who changes his life to the customs (ἔθη) of the Jews (*Ant.* XX. ii. 1); who is carried over to their laws (νόμους), or is taught to worship God as the Jews do (τὸν θεὸν σέβειν ὡς Ἰουδαίοις πάτριον ἦν, XX. ii. 3); who has come to the Jewish laws (νομίμοις προσεληλυθὼς τοῖς Ἰουδαϊκοῖς, XVIII. iii. 5), or simply becomes a Jew (εἶναι Ἰουδαῖος, XX. ii. 4); one whom the Jews have brought over to their religious observances, and made in a sense part of themselves (*BJ* VII. iii. 3). All but a few of the women of Damascus had been brought under the Jewish religious worship (θρησκεία)—*BJ* II. xx. 2. The Idumæans and Ituræans were circumcised, and lived according to the laws of the Jews (XIII. ix. 1, xi. 2; cf. XIII. xv. 4, XV. vii. 9; *c. Ap.* ii. 11, 29). Religion is with Josephus, not indeed simply a matter of race, but essentially one of ancestral custom and fixed habit of life, and a change of religion is a change of custom.

Apoc. Bar speaks of those 'who have forsaken vanity and fled for refuge beneath thy wings,' in contrast to those who have 'withdrawn from thy covenant and cast from them the yoke of thy law' ($41^{3.4}$);[‖] and refers to them again as 'those who before knew not, but afterwards knew life and mingled with the seed of the people which had separated itself' (42^{5}).

Much uncertainty must be acknowledged regarding the use of the phrase the '*devout*' or '*God-fearers*' (יִרְאֵי י״, οἱ φοβούμενοι τὸν θεόν [κύριον], οἱ σεβόμενοι τ. θ.) as the technical name either for proselytes in general or for a certain class of proselytes. In Judaism (after Dt $6^{2.13.24}$ $10^{12.20}$, Lv $19^{14.32}$ 25^{17} etc.) it became so far a standing phrase for Israelites, or the *true* Israelites, themselves, that it would seem inappropriate as a distinctive designation of converts, or half converts, from heathenism (see Ps 15^{4} $22^{23.25}$ $25^{12.14}$ 31^{19} 60^{4} etc., Mal 3^{16} 4^{2}, Sir 2^{7-17} $6^{16.17}$ 34^{13-15} etc., Ps.-Sol 2^{37} 3^{16} 4^{26} etc.).[*] It is indeed commonly held that in Ps $115^{11.13}$ 118^{4} 135^{20} proselytes are distinguished by this title from the Israelitish laity and priesthood.[†] But this is not certain. The phrase may be a comprehensive and summary one, as it probably is in Ps 22^{23} (so in Three ^{69}, cf. $^{61-63}$, ^{10} [LXX Dn $3^{90.83-85.33}$], Rev 19^{5} (11^{18}?), where it is equivalent to 'servants of the Lord'). 2 K $17^{32.33}$ does indeed suggest that heathen might fear J″ and at the same time serve their own gods; but this is perhaps an ironical description of the Samaritan religion.

It is Acts which seems most clearly to imply a technical use of the phrase. Σεβόμενοι or φοβούμενοι, with or without τὸν θεόν, is commonly regarded as designating such non-Jews as held to the Jewish synagogue worship and observed the most elementary Jewish laws of food and purity and Sabbath observance, without entering by circumcision into the Jewish community. Such a class, distinct from Jews on the one side and from casual travellers to Jerusalem on the other, Josephus once mentions as contributing to the wealth of the temple (*Ant.* XIV. vii. 2, σεβόμενοι τὸν θεόν).[‡] Yet the references to them here and in Acts are indefinite enough, so that Bertholet (pp. 328–334) can argue that they are nothing but circumcised proselytes, while on the other hand O. Holtzmann (*NT Zeitgesch.* p. 185) declares that προσήλυτος is the technical name of (uncircumcised) φοβούμενοι. They are distinguished from Israelites (Ac 13^{16}), children of Abraham's race (13^{26}), the Jews (13^{43} 17^{17}), and these two classes together composed the synagogue audiences at Antioch of Pisidia and at Athens. The 'God-fearers' seem to be identified with proselytes in 13^{43}, for οἱ σεβόμενοι προσήλυτοι can hardly be different from οἱ φοβούμενοι τὸν θεόν of vv.$^{16.26}$. Schürer himself recognized the identification in Riehm's *Handwörterbuch* ^{2} (1894), art. 'Proselyten,' but denies it again in the 3rd ed. of his *GJV* (1898) iii. p. 124 ff., where he argues against Bertholet that proselytes proper are included in the first category, that of Jews or Israelites. This might indeed be used in common speech to include all the circumcised, whether of Jewish birth or not, but the phrase 'children of the race of Abraham' (v.^{26}) seems more explicit. But, on the contrary, 'the devout Greeks' of Thessalonica (17^{4}) were hardly a different class from the 'Greeks' whom St. Paul found in the synagogues at Iconium (14^{1}) and Corinth (18^{4}). St. Paul carries out his threat to leave the Jews and go to the Gentiles by going to the house of Titius Justus, one of the σεβόμενοι (18^{7}), who could therefore hardly have been circumcised. As to Lydia (16^{14}) and 'the devout women' of Antioch (13^{50}), we cannot determine the degree of their connexion with Judaism; but Cornelius is unmistakably an uncircumcised foreigner (ἀλλόφυλος, 10^{28}), with whom a Jew could have no free intercourse (11^{3}). Bertholet is obliged to say that the phrase *φοβούμενος τὸν θεόν* ($10^{2.22}$) is not used of him in its technical sense. It is true that its use here, in connexion with other descriptive words, and especially in v.^{35} ('he that fears him and works righteousness'), does not suggest the technical name of a definite class of men. But surely Cornelius would have been found in the synagogue on the Sabbath (see $10^{2.22}$), and he is not to be distinguished from the class of foreigners informally connected with Judaism, with whom the other passages acquaint us. Another such is the centurion who loved the Jewish nation and built them a synagogue (Lk 7^{2-9}); and another, the eunuch who came to Jerusalem to worship (Ae $8^{27ff.}$), but who could not, if he would, enter into the assembly of the Lord (Dt 23^1); others are mentioned in Jn 12^{20}.

---

[*] See Zec 2^{11}, Est 9^{27}.

[†] Cf. Dt 6^{13} 10^{20}.

[‡] Naaman is hardly an exception, since he can worship J″ in a foreign land only by taking some of J″'s land with him (2 K $5^{17.18}$).

[§] See references above.

[‖] So Philo contrasts proselytes with apostates (οἱ τῶν ἱερῶν νόμων ἀποστάντες, *de Pœnit.* 2).

[*] See references in Cremer's *Wörterbuch*, s. φοβέω.

[†] Bertholet (p. 181 f.), Baethgen (*Die Psalmen*) on Ps 115^{11}; Wellhausen (*PB*). This interpretation goes back to Theodoret, Ibn Ezra, Rashi.

[‡] These are 'the Greeks who honour our customs' (*Ant.* III. viii. 9); those who have a 'zeal for our religion' (*c. Ap.* ii. 29).

Bertholet is probably right in insisting that there was only one sort of convert, the circumcised foreigner, who undertook to fulfil the whole law (Gal 5^3). He recognizes, too (pp. 298–300, 334), the undoubted fact that Cornelius was a representative of a large class of Greeks who were attracted by certain beliefs of Judaism, and adopted certain of its customs, were recognized by Jews as religious and virtuous men, but did not cross the strict line which still separated Jew from Gentile. But it seems probable that he is mistaken in combating the common view that such Greeks were called 'God-fearers.' It is true that, in the absence of evidence of the common use of the word 'proselyte' itself, we might be tempted to find in *ὁ φοβούμενος* an earlier technical name for the proselyte proper, as Cremer seems to do[*] on the basis of 2 Ch 5^6 LXX. But for this the evidence is too slight.

The number of foreigners who had come in some measure under the Jewish religion was, according to Josephus (*Ant.* XIV. vii. 2; *c. Ap.* ii. 29) and Philo (*Vita Mos.* ii. 4), very large.[†] Schürer's careful collection and investigation of the evidence of inscriptions[‡] proves that there were Greek religious societies in the first centuries after Christ, of so-called 'worshippers of the Most High God,' who got their name and their monotheistic faith from the Jews, and yet held to many elements of Greek religion. They were a result, in Schürer's opinion, of Jewish propaganda, but remained part Jewish, part Greek, in very varying proportions. One who belonged to such a society could well have *σεβόμενος*, or *metuens*, inscribed on his tomb.[§]

The 'God-fearers,' then, are not proselytes in any proper sense, in spite of Ac 13^{43}, which, if not due to an early textual error, is an indication of a somewhat free, untechnical use of *προσήλυτοι* itself, such as the LXX would suggest. If the latter be allowed here, the question might arise whether all the 'proselytes' in 2^{10} were certainly circumcised. The question is made the harder by the uncertainty whether the phrase applies only to the Romans (Zahn) or to all those named in vv.$^{9.10}$ (Holtzmann, etc.), and whether they were then permanent residents in Jerusalem (v.^{5}), or pilgrims to the feast.

The phrase *Proselytes of the Gate* has nothing whatever to do with the *σεβόμενοι τὸν θεόν*. It is simply a late Rabbinical title (after Ex 20^{10}, Dt 5^{14} etc.) for sojourners in Israel's land (the original *gērîm*). Earlier, in the Mishna, such a person is *gēr tôshāb* (cf. Lv 25^{47b}).[||] In distinction from these, the proselyte was called by late Rabbis the '*Proselyte of Righteousness*,' while in the Mishna he is simply the '*gēr*.'[*]

Although there were among the heathen many who were attracted by the monotheism and morality of Judaism, and attended the synagogue services, yet these were not in our sense proselytes. A heathen could become a Jew only by circumcision, hence there was but one order of proselytes proper. Lardner had already made the correct observation: 'There was but one sort of proselytes among the Jews (the circumcised), and Cornelius was not a proselyte but a Gentile.'[†] But that the word *προσήλυτος* was applied exclusively to these in NT times is not certain.

iii. *The Duties and Rights of Proselytes, i.e.* of circumcised foreigners, were ideally the same as those of circumcised Jews (Ex 12^{49}). Philo gives abundant evidence that a Greek became a proselyte only by a violent and absolute break with his past life and associations.[‡] So Tacitus (*Hist.* v. 5) says that proselytes learn to despise the gods, cast off the fatherland, and hold parents, children, brothers, in contempt. The story of Izates is not in conflict with this.[§] His first Jewish adviser dissuaded him from circumcision, telling him that he could worship the deity (*τὸ θεῖον σέβειν*) without it. But this only meant that it was better for him to remain a heathen and not to become a Jew. The second adviser encouraged him to become a proselyte.

If circumcision was the decisive step in the case of all male converts, there seems no longer room for serious question that a bath of purification must have followed, even though early mention of such *proselyte baptism* is not found.[||] The law (Lv 11–15, Nu 19) prescribed such baths in all cases of impurity, and one who came with the deep impurity of a heathen life behind him could not have entered the Jewish community without such cleansing. As long as the temple stood, an offering made a third (in case of women a second) rite in connexion with the proselyte's reception.

According to Dt $23^{2\,(1)ff.}$ full entrance into the assembly of the Lord was denied entirely to eunuchs (but see Is 56^{3-5}), bastards,[¶] Ammonites, and Moabites; while admittance was granted to children of the third generation in the case of the Edomite and the Egyptian. It is not clear how far this principle may have been applied in later times, or just what restrictions it implied.[**] Certainly, the Passover could be observed after circumcision (Ex 12^{48}).

Various practical limitations of the rights of proselytes (in respect to marriage, etc.) which later Rabbis discuss, probably belong to the intensified racial feeling which followed the rise of Christianity and the fall of Jerusalem. The proselyte seems to have been feared rather than sought or welcomed by the Judaism of the Talmud.[††]

The proselyte would, of course, have needed *instruction*, both before and after his admission to the Jewish community. One might be tempted to find evidence of early catechetical instruction in such passages as Ps 15. $24^{3ff.}$ 34^{13-15},* Is 33^{14-16} etc. In Harnack's opinion we have in Διδ. 1^{1-3a} 2^{2}–5^{2} and fragments in chs. 8 and 13, a book of instruction for Jewish proselytes called 'The Two Ways.'

With the disappearance of a definite second order of 'Proselytes of the Gate,' the question of special rules for them falls away for the biblical period. The so-called 'seven commands of the children of Noah,' which the Talmud holds to be valid for the *gēr tôshāb*,† are a product of legal theorizing, and could never have been enforced by the Jewish authorities of NT times on the Greeks and Romans who lived in Palestine.

As the *σεβόμενοι τὸν θεόν* were Gentiles, the Jewish authorities would hardly attempt to give detailed rules for their life. They would rather accept whatever measure of homage Greeks paid to their religion as contributing to its glory, and would, according to their generosity of disposition, recognize and admire moral rectitude and even religious reverence among the heathen. For such recognition of ethnic religion and morality the OT prepared the way.‡

The apostolic decree of Ac $15^{28. 29}$, cf. vv.$^{19. 20}$ 21^{25}, no doubt prohibits some of the heathen practices which were most offensive to Jews,§ but cannot be identified with any known or probable Jewish rules for the *σεβόμενοι*. It was only Christians who had to face the problem of providing a *modus vivendi* between Jews and Gentiles. That Jews did not eat with even the best of the *σεβόμενοι* the story of Cornelius is striking proof. The Jewish customs which the *σεβόμενοι* seem chiefly to have observed were the Sabbath, the kindling of lights (before Sabbath, so as not to violate Ex 35^{3}), the fasts, certain food laws, contributions to the temple,‖ charity to the poor, and other moral virtues.¶

iv. *The History of Jewish Proselytism* cannot even be sketched within the limits of this article.** Although the prophets furnished the universal faith which must underlie missionary effort; and though Judaism cherished the hope that J″ would be recognized by all nations, yet it is only among the Jews of the Greek Dispersion that anything like a propaganda can be found. According to the ruling view, which Pharisaism represented, the conversion of the heathen was to be accomplished by God rather than by man. It belonged to eschatology. The Book of Jonah uncovers and rebukes the deep-seated reluctance of Judaism to go to the heathen with a message for their salvation. In the Dispersion outward and inward conditions favoured a more open and generous attitude. Jews could not but be influenced by the breadth of Greek thought, and Greeks were drawn by the mere spectacle of a people who held a monotheistic faith and led a moral life. The Hellenistic-Jewish literature was no doubt in part aimed at heathen readers, and meant to persuade them of the falsity of polytheism and idolatry, and the truth of the sacred books, the laws, and the doctrines of Judaism.†† The synagogues were open to foreigners, and were the most effective agency in the propagation of Judaism (cf. Ac 15^{21} fulfilling v.^{17}). Whether the temple at Leontopolis had a similar effect it is hard to say (cf. Is $19^{19ff.\,?}$).

It is extremely difficult to measure the results of such efforts. The number of those who were more or less influenced by Judaism was no doubt very great. The number of circumcised proselytes may have been relatively small, but, on the other hand, it may have helped to fill out the great multitude of Jews who were to be found in Egypt, Syria, Asia Minor, Greece, and Italy.

In Palestinian Judaism it is hard to find evidence in the time of Christ of that zeal of which Mt 23^{15} speaks. There is evidence of large accessions to the Jewish community during the latter part of the Persian and the beginning of the Greek periods,* a result perhaps of the impulses of which Is 40 ff., Ruth, Jonah, and such Psalms as 22. 47. 65–67. 83 are expressions, which the work of Ezra and Nehemiah only temporarily repressed. The use of Aramaic, the language of neighbouring peoples, is a fact worthy of consideration in this connexion. A reaction and a closing of doors came with the reign of Antiochus IV. and the rise of the Pharisaic party.

The Maccabæan princes revived the old method of proselytizing by force. So John Hyrcanus, having conquered Idumæa, permitted the inhabitants to remain in the land if they would be circumcised and adopt the laws and customs of the Jews.† The similar forcible conversion of the Ituræans by Aristobulus‡ is regarded by Schürer§ as referring to Galilee. At the beginning of the Maccabæan wars this had still been a heathen country, with a few scattered communities of Jews in it, who could be transferred bodily to Judæa (1 Mac 5^{9-54}). The earliest references to these Jewish converts in Galilee are found in 2 Ch $30^{10. 11}$ (cf. 13^{2}, 2 Ch 15^{9}).‖ 'It is hardly to be doubted that the proper Judaizing of Galilee is essentially the work of Aristobulus I.' (B.C. 105–104). The strong Jewish community in Rome is plausibly traced to Numenius and his embassy (1 Mac 14^{24} $15^{16ff.}$).¶

But of a proselytizing work by Pharisees their literature gives us little information. The story of Helena and Izates remains isolated. Saul may be cited as a Pharisee who was zealous for the extension of his religion, but his effort was not to make converts from heathenism, but to prevent Christians from converting Jews. St. Paul's Jewish-Christian adversaries were proselytizers (Gal 1^{6-10} 3^{1} 5^{2-12} etc.), and perhaps reveal the quality in Pharisaism which Mt 23^{15} condemns.

The Pharisaic ideal remained one of separation. Such propaganda as they attempted seems to have aimed at the realization of the hope that no uncircumcised alien should render Israel and its land and temple unclean.** It does not reflect the surprising generosity of Dt $23^{7. 8}$, Is 19^{18-25}, Zec 9^{7} toward Israel's traditional foes.†† The expectation of a future missionary era (Enoch 91^{14} ?) is rare. Proselytism was a sort of conquest or subjugation, for the benefit of the conquerors, not of the conquered,‡‡ and it is fair to say that the Jewish proselyte did not form a link between the Jews and the Gentiles, but emphasized and widened the difference. Nor did the proselyte prepare the way for Christianity. He may well have been the worst of St. Paul's enemies, while the σεβόμενος, who did not count as a Jew at all, was the first of his converts. Josephus gives an interesting illustration of the truth that it was the narrow Jews who insisted on proselytism, while his own more liberal temper was satisfied that every one should worship God according to his preference.* Only a few could recognize that the worship of one God and the practice of righteousness (Ac 10^{35}) were more important than the observance of legal rites, beginning with circumcision, which were essentially tribal in character. In the common Jewish judgment these Greeks were dogs who ate the crumbs that fell from their masters' table, and only a prophet could see in them a greater faith than Israel's. But in reality the best influence of Judaism is to be found in that large class of heathen to whom it taught the worship of one God and the pursuit of virtue, and not in the class of actual converts.

'Proselyt'). F. C. PORTER.

PROVE.—There are several Heb. and Gr. verbs translated 'prove' in AV, but they fall into two classes, according as the Eng. word means (1) to test, put to the proof; or (2) to bring forward proof, demonstrate. The first is the more primitive meaning, as well in the Lat. *probare* and the Fr. *prover* as in the Eng. 'prove.' It has now gone out of use, but in AV it is rather more frequent than the second meaning. A familiar example is Mal 3^{10} 'Prove me now herewith, saith the Lord of Hosts, if I will not open you the windows of heaven, and pour you out a blessing.' Cf. Udall, *Erasmus' Paraphrase*, i. 67, 'Jesus thought good to prove how much his scholars had profited by hearing so muche communicacion, and by seeing so many miracles . . . therefore he demandeth of them, saying, Whom doe men talke that the sone of man is?' and p. 103, 'Pilate perceyvyng that though he proved all wayes and meanes yet he prevayled nothyng . . . he assoyled Jesus before that he condemned hym.' This, as Skeat remarks, is the meaning of 'prove' in the proverb, 'The exception proves the rule'=Lat. *exceptio probat regulam*; the idea that an exception *demonstrates* a rule is, as he says, plainly absurd. See also Driver, *Parallel Psalter*, 452 f.

J. HASTINGS.

PROVERB.—i. *The connotation of the term 'Proverb.'* The proverb is a familiar phenomenon, but when the question is put, What is its place in the system of devices that enter into the employment of language, a correct reply will hardly be found in the literature dealing with the use of proverbs. An attempt will be made in the present article to furnish a satisfactory answer. We assign the proverb to the category of *synecdochical* expressions, regarding it as a species of the *totum pro parte*. The proverb is a general proposition, which throws its light upon a number of single instances. This is confirmed by the biblical usage in two ways—(*a*) It happens more than once in the OT that one and the same sentence is in one passage put into the mouth of the general subject 'they' (Germ. *man*, Fr. *on*), and in another is called a 'proverb.' In 1 S 19^{24b} we read, 'Wherefore they say, Is Saul also among the prophets?' whereas in the parallel passage (10^{12b}) we find, 'Therefore it became a *māshāl*, Is Saul also among the prophets'? Again, in Jer 31^{29} we read, 'In those days they shall say no more, The fathers have eaten sour grapes, and the children's teeth are set on edge,' but in Ezk 18^{2} we find in place of this, 'What mean ye, that ye use this *māshāl* in the land of Israel, The fathers have eaten sour grapes, and the children's teeth are set on edge?' (*b*) But even the meaning of *māshāl* appears to the present writer to show that the sayings to which this designation is applied were general propositions. For in art. PARABLE (IN OT) we consider we have proved that the original sense of *māshāl* was 'likeness' or 'identity,' and as the usual form of an identification is the combination of subject and predicate, *māshāl* became an expression for a judgment in general. What, then, is the Hebrew *māshāl* but a general proposition? In this way we may explain the use of *māshāl* also for an authoritative utterance in Nu 23$^{7.\,18}$ 24$^{3.\,15.\,20f.\,23}$, Job 27^{1} 29^{1}. From this point *māshāl* could readily attain to the meaning 'proverb,' which it possesses also, *e.g.*, in the recently-discovered Heb. text of Sir 47^{17a}, where we read משל, Syr. ܡܬ̈ܠܐ, Gr. παροιμίαι, Vetus (=Vulgate) Latina *proverbia*.

ii. *The general proposition and the proverb in the narrower sense in their mutual relations.*—These two belong to the same category, and the border-line between them cannot always be sharply drawn; but the essential difference between a general proposition and a proverb is this, that the proverb has entered more upon the stage of *unconscious* existence. Prominent representatives of the two groups are the following: (*a*) *General sentences* such as 'Thou shalt not muzzle the ox when he treadeth out the corn' (Dt 25^{4}). This sentence is, so to speak, on the way to go over to the camp of the proverbs (cf. 1 Co 9^{9}, 1 Ti 5^{18}), but it has not yet reached this goal. Other general sentences of the same kind occur in 1 S 15^{22} ('To obey is better than sacrifice'), 1 K 20^{11b}, Jer 13^{23} 23^{28b}, Ps 62^{10a}, 2 Ch 25$^{8b\beta}$, cf. Lk 1^{37}.—(*b*) But such sayings as the following have more certainly attained to the stage of current use, and are therefore *proverbs* in the more special sense: 'as Nimrod a mighty hunter [*i.e.* warrior or conqueror] before the LORD,' Gn 10^{9b}, cf. 22^{14b}, Jg 8^{21a}, 1 S 10^{12} (‖ 19^{24}) 24^{14}, 2 S 5^{8b} 20^{18}, Is 32$^{6a\alpha}$, Jer 31^{29}, Ezk 12^{22} 16^{44b} 18^{2}, Job 2^{4b}, Lk 4^{23}, Jn 4^{37} (ὁ λόγος, κ.τ.λ.), 2 P 2^{22} (παροιμία).—The genetic relation of the two groups is this, that the general sentences form a *wider circle*, from which the proverbs stand out as an *élite*, and *the two concentric circles* form a constant parallel.—There is even a passage in the OT where the characteristic of currency which belongs to the proverb proper has clear expression given to it. We refer to 1 S 24^{13}, where the sentence 'Out of the wicked cometh forth wickedness' is called מְשַׁל הַקַּדְמֹנִי, *i.e.* 'the proverb of the ancients' (cf., on the collective sense of the singular, König, *Syntax*, § 256e). What can this mean but that this judgment has been long passed, and preserved during the centuries? It is the same when in 2 S 20^{18} we read, 'They were wont in *old* time to speak, saying, They shall surely ask counsel at Abel.' On the other hand, the OT contains a remark from which we see that general sentences might be regarded as the product of reflexion. In the passage (Ec 12$^{9-12}$) where the Preacher says that he sought out many parables (מְשָׁלִים, lit. 'sentences'), he adds, 'Much study is a weariness of the flesh.' So in the Heb.

---

* *Vita*, 23, 31, and cf. *Ant.* IV. viii. 10, x. xi. 7, XVI. vi. 8, *c. Ap.* ii. 33, 40; Philo, *de Monarch.* i. 7 (cf. Jer 2^{11} 18$^{13\text{-}15}$, Mic 4^{5}).

text of Sir 13^{26b} we read ‘Study and meditation is wearisome thought,’ where in the Greek version this ‘study’ is specialized as *εὕρεσις παραβολῶν*, ‘invention of parables.’

iii. *The form of the proverb.*—The following varieties of form are to be noted—(*a*) Some of these sentences are *affirmative,* and serve to commend the individual to whom the general judgment is applied. This is illustrated by the very first proverb we encounter in the Bible, namely, ‘as Nimrod a mighty conqueror in the estimation of Jahweh’ (Gn 10^{9b}). Another *māshāl* may have a *negative* character, and pass a taunting criticism on the persons to whom such a negative *māshāl* refers. This is the case with the sentence, ‘Wherefore they that speak in proverbs say, Come unto Heshbon,’ etc. (Nu 21^{27}), or with the question, ‘Is Saul also among the prophets?’ (1 S 10^{12} ‖ 19^{24}). A taunting oracle of this kind is also to be spoken over the king of Babylon, when that city at last reaps the reward of her tyranny (Is 14^{4} ‘Thou shalt take up this parable against the king of Babylon, and say, How hath the oppressor ceased, the golden city ceased!’). The same phenomenon occurs in Hab 2^{6}, and a similar negative *māshāl* is spoken about disobedient Israel in Mic 2^{4}. Hence a formidable threat, occurring not rarely in the OT, is that some one shall be made the subject of a *māshāl.* Thus Israel, if it persists in its impiety, is to be a ‘proverb’ (Dt 28^{37}). The other examples are: 1 K 9^{7}, Jer 24^{9}, Ezk 14^{8} (לִמְשָׁלִים), Ps 44^{15} 69^{12}, Job 17^{6} (לְמָשָׁל), 2 Ch 7^{20}.

(*b*) Another *formal* difference amongst proverbs shows itself in their varying *lengths.* A judgment is naturally expressed, of course, in a single simple sentence, and so we find it not only in that ‘proverb of the ancients’ in 1 S 24^{14}, but in the great majority of the proverbs contained in the historical and prophetical books of the Bible. Jer 31^{29} and Ezk 12^{22} 18^{2} are exceptions, for in these the sentences are made up of two simple statements: for instance in the *māshāl* ‘The days are prolonged, and every vision faileth’ (Ezk 12^{22}). From this formal point of view we naturally obtain a rule of considerable importance for determining the *date* of the proverbs contained in the ‘book of *mĕshālîm*’ (Pr $1^{1.6}$ $26^{7.9}$). That the Book of Proverbs does not form a unity is evident even from the titles which we meet with in 10^{1} 22^{17} 24^{23} 25^{1} 30^{1} 31^{1}. For whoever prefixed to the 10th chapter the title ‘the Proverbs of Solomon,’ did not suppose that proverbs of Solomon were contained also in chs. 1–9. Now, the section 10^{1}–22^{16} possesses this formal characteristic, that the sentences contained in it are, with the exception of 19^{7} (cf. $21^{25f.}$), expressed in *isolated distichs*, and although in these sentences causal ($16^{12.26}$ 19^{19} 21^{25} 22^{9}) or final (15^{24} 16^{30}) clauses make their appearance, yet they form a part of the particular distich. But in the section 22^{17}–24^{34} groups of four, five, six, or more *stichoi* are more frequent. On the other hand, in chs. 25–29 the sentence is again frequently expressed by isolated distichs ($25^{11.12.14ff.23ff.}$, esp. chs. 28 and 29), or by tristichs ($25^{8.13}$), although tetrastichs also occur (perhaps in $25^{2f.4f.}$, certainly in $^{6f.9f.21f.}$) The last two chapters of the book contain as a rule larger groups of lines, and exhibit also such devices as the alphabetical poem (31^{10-31}). But the isolation of the sentences is almost entirely wanting in chs. 1–9. There the teacher of wisdom develops his ideas almost always in connected expositions (cf. $1^{8f.10-19}$ $2^{1-9.10f.}$ etc.). From these considerations alone the conclusion may be drawn with much probability that in the section 10^{1}–22^{16} we have the oldest collection of sayings (so recently also Wildeboer in his essay, *De Tijdsbepaling van het boek der Spreuken*, 1899, p. 7). See, further, the following article. This rule that the extent of the clauses in which a sentiment is expressed, increased in general as time went on, is favoured also when we compare the groups of sayings of Ben Sira ($1^{1-20.21-26.27-30}$ 2^{1-18} etc.). The Book of Qoheleth, which, in the opinion of the present writer (cf. *Einleitung*, pp. 433–435), was written still later, is likewise composed for the most part of continuous expositions. Post-biblical Jewish works also exhibit proverbs only of that kind which are inwoven in a continuous text, as pearls are wont to be set in gold. Such is the case in the tractate *Pirḳê Aboth* (lit. ‘chapters of the fathers’), which is perhaps the oldest portion of the Mishna.

iv. *The material of the Biblical proverbs.*—This may be best illustrated by indicating the *spheres* from which the particular sayings are drawn. These are mainly five—

(*a*) From the *Mineral* Kingdom we have the following: ‘The waters wear the stones’ (Job 14^{19}), the Hebrew pendant to ‘gutta cavat saxum’; ‘A word fitly spoken (is like) apples of gold in pictures of silver’ (Pr 25^{11}); ‘Iron sharpeneth iron’ (27^{17}); ‘In the fire is the gold tried’ (Sir 2^{5}); ‘Gold has ruined many’ (8^{2c}); ‘Whoso toucheth pitch it shall cleave to his hand’ (13^{1a}, Heb. text translated by C. Taylor); ‘What fellowship shall earthen pot have with kettle, when, if this smite that, it is dashed in pieces?’ (13^{2c}); ‘What is heavier than lead,’ etc.? (22^{14}); ‘Sand and salt and a mass of iron is easier to bear than a man without understanding’ (v.^{15}).

(*b*) From the *Vegetable* Kingdom we note first of all the proud question by which Jeremiah distinguishes himself from his rivals: ‘What is the chaff to the wheat?’ (23^{28b}). To the same category partially belongs also the saying about the eating of sour grapes (Jer 31^{29}, Ezk 18^{2}), as well as the following sentences: ‘Better is a dinner of herbs where love is, than a stalled ox and hatred therewith’ (Pr 15^{17} ‖ 17^{1}); ‘Wine is a mocker’ (Pr 20^{1}); ‘Drowsiness shall clothe (a man) with rags’ (23^{21b}); cf. ‘Seek not to be a mighty man at wine’ (Sir 34^{25}); ‘Like a new wine, so is a new friend’ (9^{10c}); and ‘Wine and women will make men of understanding to fall away’ (19^{2a}).

(*c*) From the *Animal* Kingdom are derived the following general sayings and proverbs: first comes the caution, ‘Thou shalt not muzzle the ox when he treadeth out the corn’ (Dt 25^{4}); next, the earnest question, ‘Can the leopard change his spots?’ (Jer 13^{23}); to which may be added the general sayings, ‘Go to the ant, thou sluggard; consider her ways, and be wise’ (Pr 6^{6}); ‘Where no oxen are, the crib is clean’ (14^{4}, cf. Sir 26^{7}); ‘A whip for the horse, a bridle for the ass, and a rod for the fool's back’ (26^{3}); ‘Skin for skin’ (Job 2^{4}); ‘Doth the wild ass bray when he hath grass?’ (6^{5}); ‘Small among flying creatures is the bee, and her fruit is the chief of sweetmeats’ (Sir 11^{3}); ‘Who will pity (?) a charmer that is stung?’ (12^{13a} translated from the Heb. by C. Taylor); ‘All flesh loveth its kind’ (13^{15a} כל הבשר יאהב מינו; cf. the Arabic, ‘One camel kneels again in the place of another,’ *ap.* Schultens, *Gram. Arab.* p. 297; ἧλιξ ἥλικα τέρπει; ‘Pares cum paribus facillime congregantur’; ‘Qui se ressemblent s'assemblent’; ‘Birds of a feather flock together’); ‘What fellowship shall wolf have with lamb?’ (Sir 13^{17a} מה יחובר זאב אל כבש); ‘Flee from sin as from a serpent,’ etc. (21^{2a}); ‘The true proverb, The dog is turned to his own vomit again, and, The sow that was washed to her wallowing in the mire’ (2 P 2^{22}).

(*d*) Other sayings in the Bible which border on the realm of proverbs, or belong to it, are borrowed from the *human* sphere: and if it is desired to divide this large group into its particular species, these may be given as follows:—(*α*) Many proverbs are derived from the life of the *individual.* To this category belong the frequently cited 'As Nimrod,' etc. (Gn 10^{9b}); 'Is Saul also among the prophets?' (1 S 10^{12} ‖ 19^{24}); 'As is the mother, so is her daughter' (Ezk 16^{44b}); 'Treasures of wickedness profit nothing' (Pr 10^{2a}; cf. the Arab. *maṯal*^{un}, 'Poverty is better than unlawful riches and unrighteous gain,' *ap.* Schultens, *Gram. Arab.* p. 284; 'Ill-gotten goods do not prosper'; 'Bien mal acquis ne profite pas'); 'The memory of the just is blessed,' etc. (Pr 10^{7} $13^{11. 20a}$); 'Righteousness exalteth a nation' (14^{34}); 'A soft answer turneth away wrath' (15^{1}); 'In all *labour* there is profit' (14^{23a}), cf. the following negative parallels: 'The *sluggard* will not plough by reason of the cold,' etc. (20^{4a} 22^{13} 24^{33} 26^{13-16}); 'A sluggard may be compared to a dirty stone' (Sir 22^{1}; cf. the Arabic saying, 'Sloth and much sleep lead away from God, and bring poverty,' *ap.* Schultens, *Gram. Arab.* p. 281 f.); 'It is better to dwell in a corner of the housetop than with a brawling *woman* in a wide house' (Pr 21^{9}; similar sayings about women are found in v.^{19} 25^{24} 27^{15}, cf. the extravagant hyperbole in 'I would rather dwell with a lion and a dragon than in a house with an angry woman' (Sir 25^{16})); 'A *friend* will not be known (יודע) in prosperity,' etc. (Sir 12^{8}, translated by C. Taylor); 'Whoso diggeth a *pit* shall fall therein' (Pr 26^{27}, and similarly Ec 10^{8}, Sir 27^{26}; cf. 'He who digs a pit for another, may soon fall himself therein,' or 'celui qui creuse la fosse y tombera'); 'Give to a brother, and let thy soul fare delicately' (Sir 14^{16a}, Heb. text תן לאח וג'); 'A slip on a pavement is better than a slip with the tongue' (Sir 20^{18a}); 'A *lie* is a foul blot in a man' (v.^{24a}; cf. the Arabic, 'The tongue of the dumb is better than the tongue which speaks lies,' *ap.* Schultens, *Gram. Arab.* p. 284); 'He who multiplies words occasions sin' (*Pirḳê Aboth*, i. 17); 'A rough (or boorish) man fears not sin' (אֵין בּוּר יְרֵא חֵטְא, *ib.* ii. 5); 'Whoso makes much flesh makes many worms' (*ib.* ii. 7; cf. Is 14^{11b} 66^{24b}, Job 7^{5a} 17^{14b} 21^{26b} 24^{20a} 25^{6a}).—(β) Other proverbs draw a lesson from the life of *nations* or other wider circles of the human race: 'They shall surely ask counsel at *Abel*' (2 S 20^{18}); 'Can the *Ethiopian* change his skin?' (Jer 13^{23}); 'As the man is, so is his strength' (Jg 8^{21a}); 1 S 24^{14}; 'The vile person will speak villainy' (Is 32^{6a}); Jer 31^{29}= Ezk 18^{2}.—(γ) In that observation of human life which led to the constructing of proverbs, regard has also been had to the life of the *warrior*, as in 'As Nimrod,' etc. (Gn 10^{9b}), and in 'Let not him that girdeth on (his harness) boast himself as he that putteth it off' (1 K 20^{11b}); the conduct of the *trader* is noted in 'skin for skin' (Job 2^{4}, cf. the case of Shylock); the sphere of the *physician* is in view in 'Physician, heal thyself' (Lk 4^{23}); and the hard lot of the *husbandman* suggests the lesson, 'One soweth and another reapeth' (Jn 4^{37}).

(ϵ) From the religious or *supra-human* sphere the following sayings are derived: 'In the mount of the LORD it is seen' [*i.e.* Divine Providence is exercised; see, further, art. JEHOVAH-JIREH] (Gn 22^{14b}); 'The blind and the lame must not come into the house' (*i.e.* the temple, 2 S 5^{8b}); 'The days are prolonged, and every vision faileth' (Ezk 12^{22}); 'God hath power to help' (2 Ch 25^{8}; cf. 'With God nothing is impossible,' Lk 1^{37}). This noting of the *spheres* from which the biblical proverbs are derived, prepares us for recognizing the *origin* of these—

v. *The source of the proverbs of the Bible.*—This was twofold—one source formal, and one material. Their formal source lay in the ability of the human mind to *compare* the objects of its observation, and, from comparison of the various phenomena, to draw *conclusions.* The material source was the sum of experiences gathered by men in the different spheres of their environment. Both sources were in the last resort opened up by God himself. For the human capacity for separating off points of difference and combining similarities, was a feature in the Divine image which was bestowed on man at his creation (Gn $1^{26f.}$ 2^{7}), and which survived the Fall (Gn $5^{1. 3}$ 9^{6}, 1 Co 11^{7}, Ja 3^{9}); cf. 'The spirit of man is the candle of the LORD' (Pr 20^{27a}), and '(God) gave man understanding' (Sir 38^{6} ויתן לאנוש בינה). And is not the same God the final author of the experiences which form the material substratum of the biblical proverbs? Hence the aged appear as Jahweh's representatives in the congregation (Lv 19^{32} 'Thou shalt rise up before the hoary head, etc., and fear thy God'). They are celebrated also elsewhere as possessors of wisdom, cf. Pr 1^{8} 6^{20}, Job 12^{12} ('with the ancient is wisdom') $15^{9f.}$, although in the opinion of Elihu this rule is not without exceptions ($32^{7f.}$). So also Ben Sira: 'Miss not the discourse of the aged, for they also learned of their fathers' (Sir 8^{9a}); and the Preacher drew his sayings (מְשָׁלִים Ec 12^{9}) from the experiences of his long life (1^{13} 7^{26}); cf. the exhortation, 'Let our lord consult only his *old* men' (Tel el-Amarna Letters, ed. Winckler, No. xli. 11), and the Arabic, 'Length of experience is increase of knowledge' (*ap.* Schultens, *Gram. Arab.* p. 281). Hence we need not wonder that in the Bible itself proverbs are viewed as legitimate elements in its contents. Like the information of the husbandman spoken of in Is 28^{26}, they have their original source in the Divine arrangement of the world and disposition of history.

vi. *Proverbs outside Scripture.*—From the same standpoint as above it is explicable how the proverbs of the Bible agree essentially with those which we find in the *post-biblical* Jewish writings and in the literary treasures of *other nations.* Further materials for comparison beyond what have been already cited from both these classes of writings will be found in the Literature.

LITERATURE.—J. Buxtorf, *Florilegium Hebraicum*, 1648; R. J. Fürstenthal, *Rabbinische Anthologie*, 1835; J. Fürst, *Perlenschnüre aramäischer Gnomen und Lieder*, 1836; L. Dukes, *Rabbinische Blumenlese*, 1844, and *Zur rabbinischen Spruchkunde*, 1851; C. Taylor, *Sayings of the Jewish Fathers*², Cambridge, 1897, *Appendix*, Camb. 1900; S. Schechter, *Aboth de Rabbi Nathan*, Vindobonæ, 1887; Gabirol's ספר מבחר הפנינים, *A Choice of Pearls*, originally, compiled from the Arabic, translated into Hebrew, with a faithful Eng. tr. by B. H. Asher, London, 1859; Freytag, *Arabum proverbia*, 1838–43; the Ethiopic *Book of the Philosophers*, portions of which are given in Dillmann's *Chrestomathia Æthiopica*, p. 40ff.; G. Gerber, *Die Sprache als Kunst*, Bd. ii. (1885) p. 405 ff.; W. Budge, *Oriental Wit*, etc., London, 1899, p. 31 ff.

PROVERBS, BOOK OF.—

Introduction.
i. Analysis of the book.
ii. Unity and Authorship.
iii. Dates of the various components of the book.
iv. Relation of the Massoretic text to the Versions.
Literature.

The Book of Proverbs (מִשְׁלֵי שְׁלֹמֹה; LXX title Παροιμίαι, subscr. B Παροιμίαι, A Π. Σολομῶντος, ℵ Π. Σαλ.) belongs, with Job and Qoheleth, to the Wisdom literature. In harmony with the character of the Hebrew *Ḥokhmah* (wisdom), which is inspired by religious motives, this book as a whole has a decidedly religious character, although we find also that many maxims have found their way into it which bear upon ordinary prudence of conduct, and are the result of purely human experience. See, further, art. WISDOM.

i. ANALYSIS OF THE BOOK.—The Book of Proverbs falls into a number of parts which are clearly distinct, and which are partially marked off by special titles—

(1) Chs. 1–9, which form the introduction to the

book which now follows. In 1^1 Solomon is named as the author of the proverbs, but v.^{6} appears also to announce the intention of publishing 'words and riddles of the wise.' The author of these chapters exhorts the reader, whom he addresses as 'my son,' to give himself with all earnestness to the pursuit of wisdom, and to flee folly, which is thought of predominatingly as consisting in sensual indulgences. In ch. 8 Wisdom is introduced speaking in person, while in ch. 9 'Madam Folly' is opposed to 'Madam Wisdom,' and the two are represented as issuing rival invitations to men. It is not possible to regard these chapters as a collection of various exhortations intended as words of introduction to books of proverbs (Bertheau), nor have we any right to assume that they contain serious interpolations (Hitzig). On the contrary, the unity of diction and of the whole mode of presentation, as well as the equally evident unity in the train of ideas throughout these chapters, point to a single author.

(2) Ch. 10^1–22^{16}, the 'proverbs of Solomon' (מִשְׁלֵי שְׁלֹמֹה 10^{1a}; LXX om.), forming the real kernel of the book. Each verse, consisting usually of seven, sometimes eight, rarely nine to eleven, words, forms a saying complete in itself and independent. In chs. 10–15 the *antithetic* parallelism predominates, in chs. 16–22^{16} the *synthetic*, along with which we find also the *synonymous*, in which the second member limits or expands or continues the first.

(3) Ch. 22^{17}–24^{22}. These 'words of the wise' ($22^{17\text{-}21}$) contain maxims and warnings which only exceptionally are comprised in a single verse; usually they extend to two, sometimes three, once even seven, verses. They are again addressed, like $1^{7\text{ff.}}$, to 'my son,' a form of address which is found in (2) only in the corrupt passage 19^{27}. The rigid poetical rhythm of (2) is not prominent in this section, here and there it is wanting entirely.

(4) Ch. $24^{23\text{-}34}$. This appears to be an appendix to (3). It is headed, 'These are also words of the wise,' and may perhaps be reduced to seven sayings and exhortations, comprised for the most part in one verse, although the second consists of two, and the seventh of five, verses.

(5) Chs. 25–29, with the heading, 'These also are proverbs of Solomon, which the men of Hezekiah, king of Judah, collected,' 25^1. Here again, as a rule, each verse makes up a proverb (so always in chs. 28. 29), although at times two, in $27^{23\text{-}27}$ even five, verses have to go together. Some of the sayings are duplicates of proverbs contained in 10^1–22^{16}. The parallelism is not regular as in (2), but these sayings are distinguished by the pithiness of their contents and the rich imagery of their language. The religious character recedes far into the background; notably in chs. 25–27, they are for the most part sayings bearing purely upon a prudent direction of the conduct of life.

(6) Ch. 30, entitled 'Words of Agur,' made up, as to form and contents, of enigmatical sayings, and a few numerical proverbs such as meet us elsewhere only in $6^{6\text{-}19}$. The title in 30^1 is manifestly corrupt (cf. Frankenberg or Wildeboer *ad loc.*, and art. AGUR).

(7) Ch. $31^{1\text{-}9}$, exhortations to 'Lemuel, king of Massa' (see LEMUEL and MASSA), spoken by his mother. These may really be reduced to a single saying consisting of eight verses, in which the mother cautions her son against wine and women, and exhorts him to rule righteously (cf. Mühlau, *De Proverb. quæ dicuntur Aguri et Lemuelis origine atque indole*, Lipsiæ, 1869, and Kuenen, *Onderzoek*^{2}, § 95, note 10). The book closes with—

(8) Ch. $31^{10\text{-}31}$, an alphabetical poem, standing by itself, without any connexion with what precedes, devoted to a panegyric on the virtuous housewife.

ii. UNITY AND AUTHORSHIP.—It is beyond question that in the present book we have to do not with a collection of proverbs which took their rise in the mouth of the people, but with artificially constructed poetry. Delitzsch has pointed to the saying contained in 1 S 24^{14} [Eng. ^{13}], 'Out of the wicked cometh forth wickedness,' as a specimen of the folk-proverb. The latter wants the rhythmical form, and is generally marked by pregnant brevity; cf. also 1 S 10^{12}, 1 K 20^{11}, Jer 31^{29}, Ezk 18^2, Lk 4^{23}, Jn 4^{37} (see the preceding article). But for such sayings we seek in vain in the Book of Proverbs. This is generally recognized to be the case, as is shown by the inquiry as to the authorship of our book and its sayings. From the titles in 10^1 25^1 22^{17} 24^{23a} 30^1 31^1 (cf. 1^6) it results with certainty that the traditional view, which credits Solomon with the authorship of our book and its individual parts, must be rejected. It must, further, be admitted that no principle can be distinguished upon which the proverbs are arranged. Sometimes, indeed, sayings of similar purport are brought together, which collectively make up a series of admonitions; or sayings in which the same word recurs are found in juxtaposition; but these are only isolated occurrences. Finally, it is a significant circumstance that the same proverbs are repeated in identical or almost identical terms in different parts of the book compare 21^9 with 25^{24}, 18^8 with 26^{22}, 20^{16} with 27^{1f}, 22^3 with 27^{12}, 19^{24} with 26^{15}, $17^{3a}=27^{21a}$, $19^{1a}=28^6$, $15^{18a}=29^{22a}$, $22^{28a}=23^{10a}$, $24^{33.\,34}=6^{10.\,11}$, $22^{23a}=23^{11b}$, 24^6 compared with 20^{18b} and 11^{14b}; nay, even within the same division such repetitions make their appearance, *e.g.* $14^{12}=16^{15}$, $10^{2b}=11^{4b}$, $10^{15a}=18^{11a}$, $11^{21a}=16^{15b}$, $15^{33b}=18^{12b}$, and oft.; cf. Delitzsch, *Comm.* p. 21 ff.; Nowack (in the *Kgf. Hdbch.*), p. xxiv; Cornill, *Einleitung*^{2}, p. 225; Driver, *LOT*^{6}, p. 397. The phenomena just noticed necessitate the assumption that the different parts of our book belong to different authors, and consequently exclude the authorship of Solomon.

But although the book in its present form does not proceed from Solomon, may not particular portions of it be assigned directly or indirectly to him? One title (10^1) plainly credits him with the authorship of 10^1–22^{16}, while another (25^1 'proverbs of Solomon, which the men of Hezekiah, king of Judah, collected') ascribes chs. 25–29 at least indirectly to him. But these titles simply give expression to the tradition that prevailed at a particular period, while the fact that the men of Hezekiah are spoken of in the third person would appear to indicate that this note does not proceed from themselves, nay, the way in which Hezekiah is spoken of not as 'king,' but as 'king of Judah,' suggests that the note was written down at a time when there was no longer a king of Judah (cf. Baudissin, *Die alttest. Spruchdichtung*, p. 11). We need not then regard it as impossible that we have to do with a literary fiction which attributed proverbs to Solomon, perhaps in order to enhance their value, just as the books of Qoheleth and Wisdom are also ascribed to him. Such a tradition is all the more intelligible, because not only was Solomon regarded as the beau ideal of wisdom, but in 1 K 4^{32} it is expressly stated that he spoke three thousand proverbs. This passage, in fact, has been sought to be used in support of the Solomonic authorship of our book, but (*a*) the Book of Proverbs contains only nine hundred and thirty-five verses, (*b*) 1 K 4^{32} says only that Solomon *spoke* three thousand proverbs, (*c*) this passage does not lead us to suppose that the contents of these proverbs belonged to the religious and moral sphere, rather would they appear from v.^{33} to have dealt with subjects of quite a different kind. Consequently the author of 1 K 4^{32} cannot have meant his remarks to apply to our book, although it is quite conceivable that the tradition that Solomon was the author of the Book of Proverbs, or of particular portions of it, goes back for its basis to this passage.

Against the Solomonic authorship of the portions designated above (2) and (5), the contents of the proverbs contained in them are rightly urged: in $14^{28.\,35}$ $16^{10.\,14f.}$ $20^{2.\,8.\,26.\,28}$ 21^{2} 22^{11} $25^{2f.\,5f.}$ $29^{4.\,14}$ it is not a king that speaks of himself, but another that speaks of the king, and the experiences underlying these proverbs are scarcely conceivable in the days of Solomon, rather do they point to later times; in 14^{1} 18^{22} $19^{13f.}$ $21^{9.\,19}$—proverbs dealing with married and domestic life—monogamy is uniformly presupposed, and unquestionably the thought of a harem is far from the mind of the author; proverbs like those contained in 11^{28} $15^{16.\,25}$ 16^{8} are unlikely in the mouth of the splendour-loving Solomon, etc.

Under these circumstances we must disregard the titles, and seek from internal evidence alone to date the composition of our book and of its parts.

iii. DATES OF THE VARIOUS COMPONENTS OF THE BOOK.—Which of the above divisions of the Book of Proverbs are we to make our starting-point? Hitzig and Hooykaas have taken 1^{7}–9 to be the oldest portion, holding that when 10^{1}–22^{16} were collected, 1^{7}–9 already existed. But simple comparison of the parallel passages in the two divisions does not justify such a conclusion; see Comm. on 18^{22} and 8^{35}; 14^{1} and 9^{1}; 19^{12b} and 3^{12}; 9 and 10^{1}; 12^{2} and 3^{21} 5^{2} 8^{12}; 12^{8} 16^{22} 19^{11} and 3^{4} 13^{15}; and cf. Kuenen, *l.c.* § 96, note 10. On the other hand, a comparison of the form of the proverbs and the conception of wisdom in these two divisions leads to the conclusion that the first division must be the more recent. The strict form of the *māshāl*, with its didactic tendency, as this appears throughout the second division, is suppressed in the first, and in its place a fuller presentation of the *parenesis* prevails. To regard a periodic structure such as we find here as older than the simple form of the distich in the second division is all the less possible, seeing that this first division also lets it be clearly seen that meanwhile wisdom has become a subject in the schools, where 'the wise' gathered their pupils around them as their 'sons,' a feature which is wanting in the second division. If one takes into account, finally, that in chs. 1–9 wisdom is thought of as an independent personality, who was with God even prior to the creation of the world, as the first of His works, who stood by His side as superintendent at the creation, and who now plays her rôle on earth among the children of men, whereas in the second division wisdom is partly prudent conduct and partly the fear of God by which one ensures for himself the blessing of God, namely long life, prosperity, etc., there can be no doubt that the second division (10^{1}–22^{16}) and the fifth (chs. 25–29), which are both attributed to Solomon, are older than the first (chs. 1–9).

The relation of the second and the fifth part *to one another* is not easy to determine. In chs. 25 ff. we find not only distichs, but also brief oracular discourses in which several verses are combined to express an idea (cf. 25^{23-28} and 27^{23-27}), while, further, in these chapters the rhythm is several times wanting or at least imperfect (cf. 25^{8} $26^{18f.}$). On these grounds it has generally been held that the fifth part is more recent than the second, in which we encounter nothing but distichs of uniformly pure rhythm. Hooykaas believes it possible to reach the same result by a comparison between the verses common to the two divisions, but an unprejudiced examination by no means establishes this conclusion, nay, Reuss (*La Bible*, vi. 149) actually calls 'the collection of the men of Hezekiah *the best part of the book*.' Viewed more exactly, the case stands thus: sometimes it is the second, sometimes the fifth, division that has preserved the original form of a proverb (cf. Kuenen, *l.c.* § 96, note 5). Very significant is the circumstance that in chs. 25–27 wisdom appears throughout as practical prudence of conduct, without any special religious tinge. This suggests that the fifth division, although as a collection more recent than the second, yet contains in part older proverbs than the latter (cf. Frankenberg, *Sprüche*, p. 8).

The third and fourth divisions are by general consent regarded as more recent than the second and fifth: instances of oracular discourses extending to five (24^{30-34}), nay, even to seven (23^{29-35}), verses, are found here again, while the rhythm is unmistakably less pure and complete than in these other divisions. As in the first division, so also here we find the form of address 'my son' (cf. $23^{15.\,19.\,26}$ and oft.); here as well as there the parenetic tone prevails, and, whereas in the second and fifth divisions wisdom is a human quality, it appears here as the sum of God's requirements from man, it is even personified as in the first division, and hence can say, 'My son, give me thine heart, and let thine eyes delight in my ways' (23^{26}). Finally, in verses like 23^{18} $24^{14.\,20}$ the thought of a retribution in the world beyond appears to emerge: 'The wicked hath no future, and the candle of the transgressor is put out,' a conception which is still strange to $10^{1ff.}$ and $25^{1ff.}$.

The appendixes chs. 30. 31 consist of three independent pieces, which undoubtedly belong to a somewhat late period, and are in fact probably the latest in the whole book. We are led to this conclusion by the very form of the proverbs they contain: in 30–31^{9} there is a manifest effort to express ideas in single short sententious poems marked by the extreme of art, and often enigmatically expressed. The contents, too, point to a late date: in $30^{1ff.}$ we find a deeper consciousness of the inadequacy of man's knowledge of God and of divine things than meets us anywhere else except in Qoheleth and partially in Job; moreover, the notion that appears in $30^{5f.}$ of a fixed written revelation, from which nothing is to be taken and to which nothing is to be added, equally points us to a late period, subsequent at all events to Deuteronomy.

The alphabetical poem (31^{10-31}) shows by this very device, which is peculiar to it, that we have to do with a relatively late literary product. To determine more specifically its date from its contents is unfortunately not possible.

The determination of the period to which *10^{1}–22^{16}* and *chs. 25–29* belong, is peculiarly difficult owing to the circumstance that historical allusions are practically wanting in them. Ewald (*Gesch. d. Volk. Isr.* iii. 598 ff.) has, indeed, discovered in $28^{2f.}$ $29^{2.\,4.\,11.\,12.\,16}$ allusions pointing us to the last years of the Northern kingdom, but there is no *necessity* to suppose these proverbs to have originated then; at the most it may be conceded simply that they would be intelligible if emanating from this period (cf. the Books of Amos and Hosea). The date of the rise of these collections is not, however, to be determined on the ground of particular sayings which, like the above, held good at various periods of time, but from the whole character of the collections. This has escaped the notice of those who, like Baudissin, have adduced in particular the sayings about the king in order to prove that these chapters originated during the times of Israel's independence. It has to be admitted that analogous sayings are found also in Sirach; but these are distinguished, we are told, from those we are dealing with, in so far as they contain warnings of the danger of intercourse with the great rather than point to the benefit arising from such (cf. Pr $16^{12f. 15}$). In confirmation of this date for the main stock of our book, we are pointed, further, to the mention in pre-exilic time (cf. Is 3^{3}, Jer 18^{18}, Dt 16^{19}) of 'the wise' along with priests and prophets (so Ewald, Oehler, Hooykaas, Delitzsch, and others). These 'wise,' it is held, were evidently divided into two classes—the one with a more secular tone, indifferent or even hostile to religion; the other with a religious character, concerned more with individual than with national principles and aims. From the sphere of the latter, chs. $10^{1ff.}$ and $25^{1ff.}$ are supposed to have emanated, whereas it is to the first class that the unfavourable judgment passed by the prophets upon 'the wise' applies (cf. Is 5^{21} 29^{14}, Jer 4^{22} 8^{9} $9^{22f.}$ and oft.). But neither have we any evidence that these 'wise' exercised a literary activity, nor is it probable that the above distinction existed. Kuenen (*l.c.* § 97, note 14) has pointed out that the prophets, by way of opposition to the anti-theocratic 'wise,' never mention this other class of religiously disposed 'wise' who are supposed to have been so nearly akin to themselves in their aims, nor characterize them as allies in their conflict with godlessness and immorality. But even if this presupposition, which is intended to show the *possibility* of a pre-exilic composition, were correct, as we have shown it is not, yet this *possibility* would not be converted into a *reality* simply by pointing to these sayings about the king or to any particular sayings, because it is by no means inconceivable that sayings belonging to the pre-exilic period should have been taken over into collections originating at a much later date. Consequently the question about the date of $10^{1ff.}$ and $25^{1ff.}$ can be determined only by taking into account the whole character of these collections. It is a characteristic circumstance that these proverbs agree in their religious and ethical requirements with those of the prophets, and yet on the other hand differ from the latter in some not unessential points: we find the same estimate of sacrifice in Pr 15^{8} $21^{3. 27}$ as in Am $5^{18ff.}$, Hos 6^{6}, Ezk $1^{11ff.}$; the same praise of humility and warning against pride in Pr 11^{2} 14^{29} $15^{1. 4. 18. 25. 33}$ $16^{5. 18f.}$ 17^{19} 18^{12} 19^{11} 21^{4} 22^{4} as compared with Is 2^{11}, Am 6^{8}, Hos 7^{11}, Mic 6^{8} and oft.; the same denunciation of those who oppress the poor, and the same commending of care for the latter in Pr 14^{31} 17^{5} 18^{23} $19^{1. 7}$ $22^{2. 7}$ $28^{3. 6. 27}$ 29^{13} as compared with Am $4^{1ff.}$, Hos $5^{10f.}$, Mic 2^{8} etc. Like the prophets, these proverbs see in the fear of God the foundation of all piety and morality, and in numerous passages they exhort men to this fear. But whereas the prophets deal essentially with the national life and apply to it their demands for righteousness, etc., the proverbs treat of matters belonging to the sphere of individual and domestic life. A serious displacement has even taken place in so far as the unique relation between Jahweh and Israel, which the prophets never lost sight of, has here disappeared, and the individual conception of religion has taken the place of the national: not Israel and the peoples, but the upright and the ungodly, the proud and the humble, the understanding and the foolish, are the contrasted categories with which the proverbs have to do. Whereas the prophets are Jahweh's advocates in His conflict with the gods of the heathen, and have to plead His cause to Israel when it turns from Him to the service of these, in the proverbs monotheism holds undisputed sway, and the consequences that result from it are not defended, but assumed as self-evident, and only the practical points of view insisted upon: He is the Creator of poor and rich (14^{31} 22^{2} 29^{13}); the Omniscient ($15^{3. 11}$ 16^{2} 17^{3} 21^{2} $24^{11f.}$); He directs all things, the actions of men ($16^{1. 9. 33}$ 19^{21} 20^{24} $21^{1. 30f.}$ 29^{26}) as well as their fortunes, etc. In view of this displacement of the subject of religion, it is quite comprehensible why in these proverbs there is likewise no mention of the Messianic deliverance which the prophets expected for the nation; rather is the central position occupied by the belief in individual retribution, as this had been growing up since the days of Jeremiah and Ezekiel (cf. Pr $10^{3. 24. 29f.}$ $11^{3-8. 31}$ $12^{2f. 13. 21}$ 13^{6} 15^{29} etc.). As in some of the Psalms, the godly are cautioned against the envy awakened by the prosperity of the wicked, and have their attention directed to the righteousness of Jahweh which will manifest itself in the future.

Views such as we have briefly sketched are not conceivable as contemporaneous with the preaching of the prophets—it is not without justification that Kuenen (*l.c.* § 97, note 15) calls the ethico-religious train of ideas represented by the composers of these proverbs an anachronism if referred to the period of the prophets—but only in the post-exilic period, a period in which Law and Prophecy are raised above all doubt, and hence not the slightest attempt is made to prove their truth, while at the same time there is an evident attempt to apply the results of the prophetic teaching to real life. In this the composers of the proverbs are quite in agreement with the tendency that prevailed in the post-exilic time.

As an objection to fixing the date then, the character of this period as one of narrow legal piety has, indeed, often been urged; but this view scarcely needs nowadays to be seriously refuted: books like Ruth and Jonah, whose post-exilic composition hardly any one now doubts, and a large portion of our Psalms show that it is quite incorrect to characterize the post-exilic period in such a way. What is true of the time of the Maccabæan wars we have no right to transfer to the whole preceding period back to the Exile; in this earlier period very different currents flowed side by side. But we lack the necessary data for fixing more definitely the period when $10^{1ff.}$ and $25^{1ff.}$ were composed, whether towards the end of the Persian or at the beginning of the Greek period.

Later in any case than these portions, as we have said already, is first of all the introduction (*chs. 1–9*), in which Wisdom and Religion are actually identified, and the former is personified. In the latter circumstance it has been sought to discover the influence of the Greek doctrine of ideas, but this notion is rightly rejected by Kuenen, Baudissin, and others; the contrast of the personified Folly shows that we have to do manifestly with a purely poetical personification. But Baudissin (*l.c.* p. 20) rightly adds: 'The mythologizing freedom with which Wisdom is portrayed as playing a rôle in the presence of God or upon earth, is not according to the ancient Hebrew manner, but recalls the Haggadic creations of the Rabbinic literature.' That we have actually before us a period more advanced than in $10^{1ff.}$ and $25^{1ff.}$ follows from the conception that here meets us of the guests of 'Madam Folly' as in the depths of Sheol (9^{18}). The latter, which was originally simply the abode of departed souls, has become synonymous with hell. In view of the close affinity in spirit and tendency between these chapters and Sirach, no very long period can have intervened between the composition of the two. We shall not be far wrong if we fix upon *c.* 250 B.C. as the date of the origin of these chapters, and therewith of our book as a whole. To bring the date further down (cf. Geiger, *Urschrift und Uebersetzungen*, p. 61 ff.) is impossible, inasmuch as no reason is then evident why Sirach itself was not admitted into the Canon. It cannot, indeed, be made out with certainty how far the book edited by the author of the introduction extended. While Delitzsch regards 24^{23}–29 as the first considerable addition, to which afterwards chs. 30. 31 were appended (cf. Driver, *LOT*, ch. viii.), others, like Cornill, ascribe the publication of the whole book, or, like Wildeboer, almost the whole with the exception of ch. 31 or $31^{10ff.}$, to the author of chs. 1–9 (cf. the Comm. on 1^{6}).

iv. RELATION OF THE MASSORETIC TEXT TO THE VERSIONS.—The MT shows marked deviations from the LXX, the Syr. Version, the Targum, and the Vulgate, although the deviations of the last three almost all go back to the LXX.

The Targum is entirely dependent upon the Peshiṭta, nay, it has practically arisen from it, hence the strong Syriac colouring of its language. Its author has at the same time plainly striven to approximate his rendering to the MT (cf. S. Maybaum in Merx' *Archiv*, ii. 66 ff., and Nöldeke, *ib.* 246 ff.).

The Peshiṭta exhibits such close agreement with the LXX, that one can hardly avoid supposing that the author in making his translation had the help of the LXX (cf. H. Pinkuss in *ZATW*, 1894, pp. 65 ff., 161 ff.).

The case of the Vulgate is similar to that of the Peshiṭta: Jerome evidently called in the LXX to aid the accomplishment of his task of translation.

As to the LXX itself, apart from particular readings, this Version is distinguished from the MT by (1) a number of additions and omissions, and (2) a difference in the order of the proverbs from 24^{22} onwards. Whether the *plus* of the LXX always goes back to a Heb. original, or whether we have to do with later additions, is often hard to decide. In cases where such LXX additions are wanting in the Vulgate, it is natural to suppose that they are late—a conclusion which need not surprise us in view of the long-continued bloom of the proverb literature. Regarding the reason for the different order followed in the LXX, it is impossible to get beyond conjectures (cf. P. de Lagarde, *Anmerkungen zur griechischen Uebersetzung der Proverbien*, Leipzig, 1863).

PROVIDENCE is twice used of the foresight and care of God, Wis 14^{3} 17^{2}, and once of the forethought of man, Ac 24^{2}. The Gr. is πρόνοια and the Vulg. *providentia*. Providence is used as a title of God in late classical writers, but never in Scripture. On the other hand, it is probably the modern use of the word as a Divine title that has caused its disuse in reference to man's forethought. Cf. the note to Lk 12^{22} in Rhem. NT, 'He forbiddeth not competent providence but to much carefulnes.' The Rhem. translators chide Beza for calling 'God's prescience or foreknowledge (in the Greeke πρόγνωσις) *God's providence*' (note on Ac 2^{23}). See following art., and art. GOD.

J. HASTINGS.

PROVIDENCE.—According to the OT the *creation* is continued in the *preservation* of the world by God, who gives or withdraws life according to His will (Gn 2^{17} 6^{3}). He gives offspring (Ps 127^{3}) even against hope (Gn 15^{5} 18^{10} 25^{21}, 1 S 1^{27}). He forms man's spirit within him (Zec 12^{1}). Man's life is at every moment dependent on God (Is 31^{3}, Job 34^{14}, Ps 139^{16}, 104^{29}), and man in his weakness apart from God is likened to the grass (Ps 90^{5}, Is 40^{6}). God saves life (Ps 18^{17}, Gn $8^{1.21}$), or He destroys it (Gn 7^{23} 19^{29}, Ex 12^{29}). He gives food to man and beast, and rules all the forces of nature (Jer 3^{3}, Ps 145^{16}, Job 38^{38-41}, Jl 1^{20}, Ps 136^{7-9} 29). This preservation of nature and man is the background of God's Providence in the kingdom of God, for nature serves His purposes, reveals His power and wisdom (Ps 8. 19), and shows His glory and goodness (Ps 104. 147^{17-19}). The thunder is His voice (Am 1^{2}), locusts are His army (Jl 2^{25}), He makes Canaan a fertile land (Ps 65^{10}). Although the regularity of natural phenomena is recognized (Ps 104^{9}, Jer $33^{20.25}$), yet there is no order of nature apart from God's will. Therefore miracles are taken for granted, for God does whatever He wills (Is 55^{11}), and nothing is too wonderful for God (Gn 18^{14}, Dt 8^{3}). The relation of God's Providence to man's free will is a subject of greater difficulty. While man's freedom and responsibility are emphasized (Gn 17^{2}, Ps 1, Is 1^{16}, Jer 21^{8}); his prayers are recognized as having power with God (Gn 18^{23} 24^{12} 25^{21}, Ex 8^{8} 9^{28} 10^{17}); and a blessing is regarded as having force in spite even of change of mind (Gn 27^{27-33}, Ex 12^{32}); yet all power is with God, for God is the potter and man is the clay (Jer 18^{6}); and God sends man evil and good alike (Am 3^{6}, La 3^{38}, Is 45^{7}). The lot of the nation, and of individuals in it, is determined according to a law of recompense, and all human action is directed by God to further His own ends, especially for the benefit of His people (Gn 50^{20}, Ex 3^{21}). Although a man's heart may devise his way, yet it is God that directs his steps (Pr 16^{9}); and so God can scorn the plans of the mighty (Ps 2^{4}). God's action in and by man is through His Spirit, which blinds as well as enlightens, hardens in sin as well as renews in righteousness. This belief in Providence was one of the leading marks of Heb. piety: rebuking pride (Hag 2^{8}, Ps $44^{4.7}$ 127^{1}); forbidding fear and despondency (Ps $33^{10.11.16}$ 60^{12} 77^{11} 94^{12} 118^{6} 144^{3}), and bringing courage and hope to suffering saints (Ps 121^{4} 127^{2} 91^{7} 66^{9}). While the fulfilment of His purpose of salvation for His people is God's immediate work, yet the action of God in the history of other nations is also acknowledged (Am 9^{7}, Dt 2^{22}, Is 46^{11} 48^{15}). There are problems of God's Providence that excite doubt and compel inquiry. The fact of heredity is affirmed (Dt 5^{9}, Ex $20^{5.6}$, Jer 32^{18}), and its difficulties are discussed (Jer 31^{29}, Ezk 18^{1}). God is regarded as Himself hardening men in sin, and the question is raised, How can He righteously condemn them (Is 6^{9}, Pr 16^{4}); the answer is given that the hardening is a penalty of sin (Ezk 12^{2}, Ps 18^{26}, La 3^{39}). The suffering of the righteous contradicts the assumption of a moral order on earth, which invariably rewards the righteous and punishes the wicked (Jer 12^{1}, Job 21^{7}, Ps 22. 73, Hab 1). This problem is fully discussed in the Book of Job. Suffering may be regarded as a discipline (Dt 8^{2}, Hos 2^{14}, Jer 35^{13}, Is 27^{8}). In later books the difficulty is somewhat relieved by the hope of individual resurrection, but the best answer to the question is given in the idea of vicarious suffering (Is 53). Doubt regarding God's ways in Providence is regarded as brutalizing (Ps 73^{22}); and in Ecclesiastes we have the nearest approach to scepticism in OT.

The NT takes for granted the teaching of the OT on Providence. Jesus teaches a beneficent

Providence to all men, good and bad (Mt 5^{45}); and encourages His disciples to trust in and pray to God as Father (Mt 6^{9}). As God cares for the flowers of the field and the birds of the air, so will He care for them (Mt 6$^{25-33}$). Nothing can befall them without God's knowledge (Mt 10$^{29.30}$). The prayer of faith will be answered (Mt 7$^{7-11}$=Lk 11$^{9-13}$, Mk 11$^{23.24}$=Lk 17^{6}). Even for daily bread prayer is to be made (Mt 6^{11}). This is not a new doctrine of God's Providence, only a more immediate application of it to individual believers than is found in OT, which is mainly concerned with the chosen nation. Jesus' miracles are also to be regarded as *signs* of God's Providence. St. Paul in Romans sketches the course of God's dealings with the individual believer from the beginning in foreknowledge to the end in glorification (Ro 8$^{29.30}$, cf. Eph 1$^{4-14}$); and affirms as the law of Providence that 'all things work together for good to them that love God' (Ro 8^{28}). On the wider stage of human history he traces the fulfilment of a Divine purpose in the inclusion of Jew and Gentile alike in sin, that righteousness might be of faith only (Ro 1–3); and in the temporary rejection of the Jew resulting in the call of the Gentile first of all, and followed finally by the restoration of the Jew also (9–11). In the Ep. to the Hebrews an independent interpretation of God's Providence is given, in which the sufficiency and supremacy of Christ in relation to OT ritual especially is proved. Finally, in the Apoc. the course of contemporary history, presented in symbolic forms, is for the comfort and hope of persecuted believers interpreted as God's immediate action for the establishment of the kingdom of Christ. See, further, artt. ESSENES, PHARISEES, STOICS.

A. E. GARVIE.

PROVINCE (Lat. *provincia*, Gr. ἐπαρχία).—The technical term used to describe the administrative divisions of the Roman empire; so Ac 23^{34} 'And when the governor had read the letter, he asked of what province he was'; Ac 25^{1} 'Now when Festus was come into the province.' The original meaning of the word was the sphere within which a magistrate (whether consul or prætor) exercised his *imperium* or sovereign power; so it could be used of the division between the two prætors of the different classes of legal business; so again we get such phrases as the following: *Consulibus Italia provincia decernitur*, where Italy is described as the sphere within which the consuls are to exercise their jurisdiction. It was only in B.C. 227, with the acquisition of Sardinia and Sicily, that the word *provincia* acquired its later sense, and the definition of a province came to be a division of the Roman empire with definite boundaries, under a standing chief magistrate, paying tribute in taxes to the supreme power. Under the Republic these provinces had been governed by proconsuls or proprætors under the supervision of the senate; on the establishment of the empire the proconsular *imperium* over all provinces was vested in the emperor, and by an agreement which he made with the senate the provinces were divided into two classes. The older, more peaceable provinces, where there was no need of any large military force, called the *provinciæ inermes*, were left in the hands of the senate; the frontier provinces, where military operations were necessary, were governed directly by the emperor through his lieutenants.

The governors of the senatorial provinces were appointed by lot from those who had held the office of *prætor* or *consul*, or as they were technically called the *consulares* and *prætorii*, or in some cases from those who had not yet attained that rank. Two provinces, Asia and Africa, were 'consular,' *i.e.* held by ex-consuls, the remainder were 'prætorian,' but all senatorial governors alike bore the name of PROCONSUL. The governors appointed by the senate were in theory the most distinguished and honourable; they were allowed 10 or 12 fasces; they had higher rank and larger salary; but their appointment was only for a year, they had no military command, and practically possessed only the appearance of power.

The governor of an imperial province is called by historians incorrectly *proprætor*; his proper title was *legatus Augusti*, lieutenant of the emperor, or more fully *legatus Augusti pro prætore*, *πρεσβευτὴς καὶ ἀντιστράτηγος τοῦ Σεβαστοῦ*. They were of two classes—those of consular rank or *consulares* (ὑπατικοί), and *prætorii*, those who possessed only prætorian rank. The latter were appointed to provinces where there was only one legion, the former to the larger and more important commands.

The arrangements concerning the provinces were liable to be changed according to the needs of the empire. If rebellion or invasion threatened any senatorial province, or if its finances fell into disorder, it would be transferred to the emperor, at any rate temporarily, and the emperor would very likely compensate the senate by giving them some other province in return. Instances of change will be given below.

The following are Roman provinces mentioned in the NT:—

Senatorial—	
Macedonia, enrolled B.C. 146	(Imperial from Tiberius to Claudius).
Achaia, B.C. 146	(Imperial B.C. 15–A.D. 14).
Asia, B.C. 133.	
Bithynia (with part of Pontus), B.C. 74	Senatorial to A.D. 111.
Cyprus, B.C. 27	(Imperial B.C. 27–22, then Senatorial).
Crete and Cyrenaica, B.C. 74.	
Imperial—	
Syria, B.C. 64	Of the First Class.
Galatia, B.C. 25	Of the Second Class.
Pamphylia and Lycia, B.C. 25	
Egypt, B.C. 30.	
Judæa	Under Procurators.
Cappadocia, A.D. 17	

The position of Egypt demands a slight reference. Its great wealth, and the importance of its corn trade, made Augustus give it special treatment. The country was the emperor's private property (*patrimonium Cæsaris*), and was governed by a *præfectus* of equestrian rank. No senator was allowed to enter the province.

Certain small provinces (Judæa and Cappadocia, for example) were governed by imperial PROCURATORS. They were generally districts which had been only recently added to the empire, and were not thoroughly romanized. Judæa was so treated during the intervals when it was not governed by native kings; ultimately it was definitely incorporated in the province of Syria.

One further form of *provincia* may be mentioned. In cases of great and serious emergency a special command might be given to some distinguished officer, embracing more than one province, or perhaps superior to the governors of several provinces: such was the position of Corbulo in the East, of Germanicus and possibly Quirinius in Syria.

If we pass to the internal government of the provinces, we notice first the concentration of power in the hands of the governor. He was the principal military, judicial, and administrative authority. Except in the case of Africa, he commanded all the troops, whether legions or auxiliary: he went from place to place to hold courts, the province being divided into *conventus* for that purpose (cf. Ac 19^{38}). The finances, however, were not directly in his hands. The proconsuls in senatorial provinces were assisted by a quæstor, while a *procurator* appointed by the emperor collected all taxes belonging to the *fiscus* or emperor's purse; in imperial provinces all the finance was in the hands of the *procurator*. The provinces were variously divided: in Macedonia, for example, there were four divisions apparently called locally μερίδες (Ac 16[12]), but the unit of administration within the province was, at any rate in all the settled Greek districts such as Asia and Achaia, the city. A city implied not only the actual town, but also all the land which belonged to it and was its territory. The cities were of two main classes—Roman cities or 'colonies,' the inhabitants of which had either full civic or Latin rights. These in the East were garrisons of the Romans, often inhabited by veteran soldiers. Such were Corinth, Philippi (Ac 16[12]), Lystra, Antioch in Pisidia. The second class of cities were non-Roman; they were either *civitates fœderatæ et immunes* or *civitates stipendiariæ*. The former were cities like Athens, which were supposed to be independent allies. No proconsul might enter Athens with his *fasces*, or any symbol of his power. The Greek cities seem generally to have preserved their old constitution. Outside the limits of the cities were the imperial estates, administered by imperial freedmen and slaves; and in less advanced districts, peoples whose organization was tribal, administered from some common religious centre or market, round which they were grouped. For religious and social purposes, for the worship of the emperor and the celebration of games, there existed representative bodies, the council of the province (τὸ Κοινὸν τῆς Ἀσίας, etc.), with their principal officer the high priest, the Asiarch, Galatarch, etc. (Ac 19[31]). These bodies had considerable social but little or no political influence.

The general condition of the provinces, at any rate during the 1st cent. of the empire, was good. Order was preserved. The taxation was definite and fixed. The governors were paid, and redress was comparatively easy if they were guilty of exactions. The country was prosperous, even if the taxation was heavy; and it was not until a later period that attacks from without and decrease of prosperity within broke down the economic prosperity of the empire.

LITERATURE.—W. T. Arnold, *The Roman System of Provincial Administration*; Mommsen and Marquardt, *Römische Staatsverwaltung und Staatsverfassung*; Furneaux, *Annals of Tacitus*; Schürer, *GJV* ² i. 378, 379 [*HJP* i. i. 327 ff., ii. 45 f.].

A. C. HEADLAM.

PROVOKE, PROVOCATION.—To provoke (*provocare*), lit. to 'call forth,' is in AV to excite any emotion or activity, good or bad. Hence we find 2 Co 9[2] 'Your zeal hath provoked very many,' and Col 3[21] 'Fathers, provoke not your children' (both ἐρεθίζω). For the orig. meaning of 'stir up,' cf. Jer 43[3] Cov. 'Baruch the sonne of Nerias provoketh the agaynst us.' Cf. also Erasmus, *Crede*, p. 15, 'It is a great spoore to prycke and provoke a man to profyght and go foreward in ony scyence or crafte: the love of the teacher'; and p. 99—'Saynte Paule provokyng the Galathians from vengeance to humanite and gentylnesse.' *Provocation* is always used in AV in a bad sense. In Ps 95[8] the Heb. is MERIBAH, which see.

J. HASTINGS.

PSALMS, BOOK OF.—The most important book, and in modern Heb. Bibles the first in order, of the third section of the OT Canon—that known as *Kĕthubhim* or *Hagiographa*. It has been thought that in the time of our Lord the Bk. of Psalms furnished a name for the *Kĕthubhim* as a whole (see Lk 24[44] and cf. Jos. *c. Ap.* i. 8, who speaks of 'the remaining four books' as containing 'hymns to God and precepts for human life'). It is not probable, however, that at this stage in the history of the Canon the title 'psalms' would be so used. The order of the books in the Hagiographa, moreover, has varied greatly. The earliest Rabbinic list (*Baba Bathra* 14*b*) gives the order as Ruth, Psalms, Job, Proverbs, etc., Ruth apparently being placed before Psalms because it contained an account of David's ancestry. Jerome (*Prol. Gal.*) gives the order as Job, Psalms, Proverbs, Ecclesiastes, Canticles, etc.; but this is not in accordance with prevailing Heb. tradition. In many MSS, especially the Spanish, the Books of Chronicles come first, then Psalms, Job, Proverbs, etc. The usual order is that of the German MSS followed in the printed edd. of the Heb. Bible—Psalms, Proverbs, Job (the poetical books, sometimes known by the technical name אמת, 'Truth,' formed by the initial letters of the three books Job, Proverbs, Psalms), followed by the five *Megilloth* or rolls, the narrative books coming last (see Ryle, *Canon of OT*, p. 229 ff.). The present article will deal with the Name and Number of the psalms, the Formation of the Collection, the Date and Authorship, the Titles and the Poetical Construction of the psalms, the Moral and Religious Ideas prevailing in the Psalter, the Text and Versions, and finally with the Literature of the subject.

i. NAME AND NUMBER.—No name for the psalms collectively is found in the book itself or in the text of the OT. The nearest approach to such a designation is found in the name given to a portion of the Psalter in the subscription to Ps 72 (v.[20])—'The prayers (תְּפִלּוֹת) of David, son of Jesse, are ended.' The word 'prayer' must here be understood in its broadest sense as any turning of the heart towards God in supplication or in praise. See also 1 S 2[1] and Hab 3[1]. Ps 17. 86. 90. 102 and 142 are also called 'prayers' in their several inscriptions. The title for the book used by the Jews is סֵפֶר תְּהִלִּים (shortened תִּלִּים, apocop. תִּלִּי, Aram. תִּלִּין), *i.e.* Book of Praises, a name which was current in the time of Origen and Hippolytus, though the genuineness of the passage in which the latter discusses the general introduction to Psalms has been questioned. In that passage the name stands transliterated into Greek as Σέφρα Θελείμ, and in Eus. *HE* vi. 25 Origen's title of the book is preserved as βίβλος ψαλμῶν Σφαρθελλείμ. Jerome confirms this by describing (in the preface to his *Psalt. juxta Heb.*) the Heb. title as *Sephar Tallim*. Eusebius elsewhere transliterates Σέφηρ Θιλλήν. The word which thus appropriately gave a name to the whole book is found once only in the Heb. text as a title, Ps 145 being called תְּהִלָּה a Song of Praise. The regular plural of this word is *tĕhillôth*, Ps 22[3], this feminine form being distinguished from the masc. *tĕhillîm*, in that the former points more distinctly to the subject-matter, the latter to the form of the composition. Cf. Baethgen, who distinguishes (Pref. to Comm. p. iii) between *ein Buch der Gesänge* and *ein Gesangbuch*.

The usual name for a separate psalm is מִזְמוֹר *mizmôr*, found in the titles of 57 psalms, from the third—probably the first in the earliest collection—onwards. The word by its derivation indicates that which is to be sung to a musical accompaniment, and in practice it is used only of a religious song. The more general word שִׁיר *shîr*, used for secular songs in Is 23[16] and Am 8[10], is found in combination with *mizmôr* 13 times in the titles; 5 times the order is *shîr mizmôr*, and 8 times this order is reversed. Once (Ps 46) the word *shîr* is used alone, and once it occurs in the form *shîrāh* (Ps 18). The word corresponding to *mizmôr* in Greek is ψαλμός, properly a song to the accompaniment of stringed instruments; and the usual title of the book in the LXX is βίβλος ψαλμῶν. But in Cod. Alex. we find ψαλτήριον, which is properly the name of a stringed instrument, adopted as a title of the book; hence Eng. 'Psalter.' The usual Greek title is quoted in St. Luke's writings, Lk 20^{42}, Ac 1^{20}. The Syriac name *Kěthâbâ de-mazmûrê* preserves a name which is not found in the OT as a plural, and which did not prevail as a collective title in subsequent Jewish usage.

The number of the psalms is 150, both according to the MT and the LXX. But the same total is preserved with a different arrangement in detail. Only the first eight psalms and the last three are marked by the same number in the two versions, the Greek combining Ps 9 and 10 in one, also Ps 114 and 115, whilst it divides Ps 116 and Ps 147 each into two parts severally numbered. This may be more clearly shown by the following table:—

	HEB.	LXX
Psalms	1–8	1–8
	9. 10	9
	11–113	10–112
	114. 115	113
	116	114. 115
	117–146	116–145
	147	146. 147
	148–150	148–150

The arrangement of the Greek is followed in the Vulg. and in some of the older Eng. VSS. In the LXX is found an additional psalm (151) with the following title: 'This psalm was written by David with his own hand, though it is outside the number, *composed* when he fought in single combat with Goliad.' It runs as follows:—

'I was small among my brethren,
And youngest in my father's house,
I used to feed my father's sheep.
My hands made a harp,
My fingers fashioned a psaltery.
And who will declare unto my Lord?
He is Lord, He it is who heareth.
He it was who sent his angel
And took me from my father's sheep,
And anointed me with the oil of his anointing
My brethren were goodly and tall,
But the Lord took no pleasure in them.
I went forth to meet the Philistine,
And he cursed me by his idols.
But I drew the sword from beside him;
I beheaded him and removed reproach from
the children of Israel.'

The psalm has no pretensions to genuineness, some of its phrases being obviously adaptations of the language of 1 S, but something is to be learned by comparing and contrasting it with the canonical psalms. Certain apocryphal psalms, drawn from Syrian sources, are given by Wright (*PSBA*, June 1887), including the above with four other psalms. One of these, in which a poet speaking in the first person is supposed to represent the feelings of the nation when Cyrus gave permission to the exiles to return from Babylon, is quoted at length by Baethgen (*Introd.* p. xl).

The different methods of numbering, indicated above, point to a various arrangement of material which there is good reason for thinking has been much more extensive. Ps 1 and 2 are found together in some copies. In Ac 13^{33} the Western reading preserved in D, 8, and some Lat. MSS known to Origen, describes what we call the second as the first psalm, whilst Justin (*Apol.* i. 40) quotes the whole of both psalms together as one prophetic utterance. As will be seen below, the distinction between Ps 9 and 10 and between 42 and 43 should never have been made; the latter two psalms are found together in several Heb. MSS. These facts, together with others to be mentioned, prepare us for the phenomenon of composite psalms.

ii. FORMATION OF THE COLLECTION. — The Psalter, as we now have it, is divided into five books, including respectively Ps 1–41, 42–72, 73–89, 90–106, 107–150. These divisions are marked in RV, and have been recognized by the Jews from at least the 2nd cent. of our era; it is not to be understood, however, that they represent the original lines of demarcation in the formation of the Psalter. The close of each 'book' is marked by a doxology, appended 'after the pious fashion, not uncommon in Eastern literature, of closing the composition or transcription of a volume with a brief prayer or word' (W. R. Smith, who adduces parallels from the Diwan of the Hodalite poets, to show how the limits of an older collection of poems may be marked by the retention of a doxological phrase). This explanation unquestionably applies to the three doxologies, 41^{13}, $72^{18.\,19}$ and 89^{53}; these are clearly separable from the psalms at the end of which they are respectively found. It is not clear that 106^{48}, at the end of Book iv., has precisely the same history; whilst the fifth book has no closing doxology, Ps 150, which is itself a full ascription of praise, being understood to obviate the necessity for such an addition. The fivefold division is recognized in the *Midrash Tehillin* on Ps 1^{1}, which undoubtedly embodies a tradition much earlier than the commentary itself. Jerome, also, in his *Prolg. Galeat.* distinguishes between the *quinque incisiones* and the *unum volumen* of the psalms. The passage from Hippolytus which refers to this subject cannot be urged as certainly genuine. The presence in the LXX version of the doxology at the end of the fourth book, with its liturgical addition, 'And let all the people say Amen,' unquestionably points to a fivefold division as more or less clearly marked in at least the 2nd cent. B.C., but it is not probable that this division was made by the final redactor of the Psalter himself setting in their respective places four doxologies to mark the limits of the various collections. On the contrary, evidence is forthcoming to show that the Psalter gradually grew into its present shape, and several of the stages by which the final result was reached can be distinctly traced. The chief evidence for this gradual compilation of the Psalter is as follows:—

a. The existence of duplicate editions of the same psalm. Compare Ps 14 with 53, 40^{13-17} with 70, 108 with 57^{7-11} and 60^{5-12}. The collections in which these duplicates severally occur must at one time have existed separately.

b. The use of the names of God in the various books is such that it cannot be considered accidental or without significance. The facts in brief are these. In Book i. the name J″ occurs 272 times, Elohim, used absolutely, only 15; in Book ii. the case is reversed, Elohim being found 164 times, J″ only 30 times. The figures in Book iii. are more complex, and it is found necessary to divide it into two parts, so that in Ps 73–83 J″ occurs 13 times, Elohim 36, while in 84–89 J″ is found 31 times, Elohim only 7 times. In Books iv. and v. J″ is used almost alone (339 times); the only exceptions being in Ps 108 (found also in earlier collections) and Ps 144, which there are other reasons for holding to be composite. That this prevailing use of one or other name is due (at least in part) not to the author but to editorial modification, is made probable by the fact that we have a Jahwistic and an Elohistic recension of the same psalm (cf. 14 and 53, also 40^{13} and 70); whilst the repetition of the phrase 'God, thy God' in 43^{4} 45^{7} and 50^{7} appears to have arisen from the much more appropriate 'J″, thy God.' The phraseology of some psalms appears to have been drawn directly from certain passages in the Law, with an alteration only in the Divine name used. Cf. Ps 50^{7} with Ex 20^{2}, Ps 71^{19} with Ex 15^{11} etc.

c. Another argument is drawn from the titles and the way in which the psalms are assigned in groups to various authors, those in Books i.–iii. having for the most part some kind of designation, whilst those in Books iv. and v. are generally anonymous.

d. The editorial note in Ps 72^{20} 'The prayers of David, the son of Jesse, are ended,' seems to prove conclusively that the compiler of the collection in question knew of no other Davidic psalms, whereas several that are found in later books are ascribed to David.

e. The rarity in Books iv. and v. of the musical notes and directions so common in the earlier books points to a difference in the history of their compilation.

f. Another argument has been drawn from the general character of the subject-matter in the various collections. It is thus expressed by Kirkpatrick: 'Speaking broadly and generally, the psalms of the First Division (Bk. i.) are *personal*, those of the Second (Bks. ii. and iii.) *national*, those of the Third (Bks. iv. and v.) *liturgical*. There are numerous exceptions; but it is in the First Division that personal prayers and thanksgivings are chiefly to be found; in the Second, prayers in special times of national calamity (44. 60. 74. 79. 80. 83. 89), and thanksgiving in times of national deliverance (46–48. 75. 76. 65–68); in the Third, psalms of praise and thanksgiving for general use in temple services' (95–100. 105–107. 111–118. 120–136. 146–150), *Introd.* pp. xlii, xliii.

Is it possible, then, more minutely to trace the stages by which the various sections of the Psalter assumed their present shape? It is noteworthy that in Bk. i. all the psalms are assigned to David, with the following exceptions: Ps 1 is introductory, and was probably prefixed to the collection as a suitable preface. The absence of a title to Ps 2 seems to point to a separate history, and perhaps accounts for its having been joined in many copies to Ps 1. Ps 10, which is anonymous, belongs to Ps 9, as is seen by the acrostic arrangement. Ps 33 is assigned to David in the LXX, but it was originally anonymous, and appears to be of distinctly later date than the rest.

In Bks. ii. and iii. all the psalms bear titles except Ps 43 (which, as the refrain shows, is part of 42) and 71. They fall, not quite symmetrically, into groups. Eight psalms together (42–49) are assigned to 'the sons of Korah,' and a supplement of a few Korahitic psalms is found in 84. 85. 87. One psalm 'of Asaph' (50) stands alone, followed later by a group of eleven Asaphic psalms 73–83. Ten psalms of David are found together (51–70, all Davidic except 66 and 67); Ps 86, which is also ascribed to David, may be shown to be a mosaic of sentences adopted from other psalms. One psalm (72) is assigned to Solomon, one to Heman, and one to Ethan.

In Bks. iv. and v., on the other hand, the rule is that the psalms are anonymous, the only exceptions being that the 90th psalm is ascribed to Moses, the 127th to Solomon, whilst a few additional ones, 17 in all, bear the name of David.

The history to which these facts appear to point may be sketched somewhat as follows. The earliest collection consisted of Ps 3–41 or the bulk of the Psalms now so numbered, bearing generally the name of David. The significance of that designation will be considered later; enough now to say that it does not necessarily imply that David himself was the author of every psalm—and to these were added Ps 1 and 2 and probably some others. The next in order were Levitical collections 'Korahite' or 'Asaphite,' and these were combined in due course by an 'Elohistic' editor, who added a few 'Davidic' and other psalms. A conjecture of Ewald is supported by many moderns, that Ps 51–72 originally stood after Ps 41, forming one collection of 'Davidic' psalms, with the editorial note 72^{20} found naturally at its close. The Levitical psalms would then follow in their order—Korahite 42–49, Asaphite 50. 73–83, Korahitic supplement 84–89. W. R. Smith marks the following stages in the process of forming the Psalter as it now exists:—

a. The formation of the first Davidic collection, with its closing doxology, Ps 1–41.

b. The second collection with doxology and subscription, Ps 51–72.

c. The twofold Levitical collection (Ps 42–49. 50 and 73–83).

d. Elohistic redaction and combination of *b* and *c*.

e. Addition to *d* of non-Elohistic supplement and doxology, Ps 84–89. (See *OTJC*^{2} 201).

Without adopting this precise arrangement, which has, however, much to recommend it, it may be assumed that by some such process—probably one not so accurate and precise as modern critics theoretically construct—the psalms in the first three books were gathered and arranged. Ps 90–150 are viewed by most modern scholars as one division or collection, but certain lines of stratification may easily be perceived in it. One exquisite little group of psalms is found in 120–134, the 'Songs of Ascents,' which in all probability at one time existed as a separate 'hymn-book.' Another break is found in the doxology appended to Ps 106, whatever may have been its precise history. Then Ps 92–100 possess a character of their own, and groups of *Hodu* and *Hallelujah* psalms may be discerned, though it is not likely that these ever existed as separate collections.

No precise rules can be given for the order in which the psalms are found. A certain broad outline of chronological order is perhaps discernible; sometimes psalms are grouped together which refer to the same subject-matter, *e.g.* the psalms of the Theophany of which Ps 98 forms a centre. The same musical designation appears to have caused the grouping of the *Maschil* psalms 42–45. 52–55, whilst those inscribed *Michtam* are found together in 56–60. Sometimes the occurrence of a word or phrase seems to link one psalm with another, and some writers, of whom Wordsworth, Forbes, and occasionally Delitzsch, may be named as examples, attach much significance to this. But it is undesirable to build any elaborate theories upon the arrangement of lyrics the present collocation of which must have had a long history. Experience shows how gradual and irregular has been the arrangement of many modern hymn-books, in days when much greater symmetry and more formal arrangement might be looked for than in the Psalter.

The dates of these several collections can be determined only in the most general way, and even so with a considerable measure of uncertainty. It is perhaps possible to fix a *terminus a quo* and *ad quem*, a superior and inferior limit, to mark the period within which the whole work must have been carried out. And first, for the superior limit.

The earliest collection is that of 'Davidic' psalms, numbered 1–41. If Ps 1 and 2 were included in the collection when it was first made, also 25 and 33, it is tolerably certain that this was not done till after—probably not long after—the return from Captivity. Ps 1 is almost certainly post-exilic. The language of 14^{7} 'Oh that the salvation of Israel were come out of Zion,' does not necessarily imply the Bab. Captivity, and the verse may be a liturgical addition. Ps 25^{22}, which forms an addition to an acrostic arrangement, breathes a similar prayer, and shows that the psalm in its present condition cannot be very early. The subject of Ps 16 does not necessitate a post-exilic date, but if a doctrine of immortality be implied in it, such a date is most probable. Some other psalms in this collection—notably 31 and 39—point at least to the period of the later monarchy. The history of Temple-music, moreover, so far as that is ascertainable from the documents before us, hardly seems to admit of the production of such a finished collection of Temple-songs before the Exile. The Chronicler must be understood as describing in 1 Ch 15 and 16 the institutions of his own time, of which David only laid the early foundations. That a guild of Temple-singers existed before the captivity of Judah is probable enough, but the collection as a whole—compare the titles to Ps 24 and 28 in the LXX—implies a stage of advancement in Temple psalmody which can hardly have been reached till after the Return. This does not imply, of course, that no previous collection of sacred songs had ever been made. It is possible, though hardly probable, that in the time of Solomon some steps had been taken in this direction. But we are dealing with the Psalter as it has come down to us, and we should name the period shortly after the Exile as the earliest possible and the most probable date for the formation of the first collection of psalms. The next may very well have taken place in the time of Nehemiah, and the work appears to have been very gradually accomplished during the succeeding centuries by stages which we cannot exactly trace, but some idea of which has been furnished above.

What, then, is *the inferior limit of date* in the carrying out of this work? Here a number of arguments have to be examined, the investigation of which is in itself instructive, and the material thus furnished is sufficient to warrant tolerably definite conclusions.

a. The bearing of 1 Ch 16 upon the date of the Psalter. The date of the Chronicler may be roughly taken as about B.C. 300. In ch. 16, in the course of an account of the bringing up of the ark to the city of David, the writer puts a psalm into the mouth of David as appropriate to such an occasion. The psalm is not directly attributed to David as the tr. of v.[7] in AV would imply. The phraseology only emphasizes the fact that David took especial care concerning the giving of thanks: 'On that day did David make it his chief work to give thanks unto the Lord by the hands of Asaph and his brethren.' A psalm follows, however, which consists of 105[1-15] 96 and certain verses ([1. 47. 48]) from Ps 106. Apparently, therefore, the Chronicler had these psalms—possibly a collection containing these psalms—before him when he wrote. V.[36] seems distinctly to imply that the writer adapted the doxology to his purpose, changing the imperfects into perfects, 'And all the people said Amen, and praised the Lord.' If this were the case, the conclusion is clear, that Ps 106 was written, perhaps Bk. iv. formed, somewhere in the 4th cent. B.C. Closer examination shows, however, that this is not quite so certain. Cheyne contends (*Origin of Ps.* p. 457) that vv.[34-36a] were only liturgical formulæ, not composed solely for use in Ps 106, but freely attached to many psalms. It may be replied that the connexion between 1 Ch 16[36] and Ps 106[48] as a whole appears too close to be accidental, and we can hardly conceive that the psalmist adapted the phraseology of the Chronicler, though Ryle seems to favour this view (*Canon of OT*, p. 129). It is possible, as Cheyne suggests, that additions were made to the various books after the collections had been provisionally closed, and this possibility must not be summarily excluded. It is possible, again, and for some reasons probable, that vv.[8-36] did not form part of the original text of 1 Ch 16. V.[7] joins very naturally to v.[37], whilst the words of the psalm do not fit in very appropriately with the phraseology of the seventh verse, when its meaning is rightly understood. This suggestion, originally made by Reuss, is favoured by Baethgen, and the possibility of its acceptance prevents the argument from being conclusive. Given both texts as they stand, it seems difficult to resist the conclusion that Ps 106, with its doxology complete, was before the Chronicler as he wrote.

β. The evidence afforded by the LXX is much more trustworthy, and rests upon a broader basis. It is true that we cannot be quite certain when the tr. of the Hagiographa was completed. That the whole work was begun and the tr. of the Pent. executed about B.C. 250 seems tolerably clear; but Cheyne and some others are disposed to bring down the inferior limit for the completion of the tr. of the Hagiographa very late. All Cheyne will admit is that it was finished 'at any rate before the Christian era.' The evidence of the prologue of Sirach, however, will hardly admit of a later date for the tr. of the Psalter than B.C. 150. The author of this preface, writing about B.C. 130, thrice mentions 'the law, the prophets, and the other books' (or an equivalent expression), and he speaks of his grandfather, Jesus son of Sirach, as having been familiar with these as sacred writings. This indicates a third class of sacred Scriptures, the canon of which was not necessarily complete in the time of Siracides, say B.C. 180. But that the Psalter was included among these can hardly be questioned, even though it were not in its present form. References in 1 and 2 Mac, as we shall see, confirm this supposition. But granted that the evidence is not conclusive, and bringing down the date for the tr. of the Psalter even so low as B.C. 100, it is clear that a considerable interval must be allowed for the accomplishment of the various processes passed through between the completion of the latest collection in Heb. and its rendering into Greek. Sanday (Bampt. Lect. on *Inspiration*, Lect. V. Note A, p. 271) marks as many as nine such processes. The number is probably excessive; but if the history of the formation of the Psalter has been at all correctly indicated, several stages must separate the composition of, say, one of the psalms in the Elohistic collection and its inclusion in the LXX. The smaller group of Korahite or Asaphic psalms would be collected, then would come the larger Elohistic collection, the addition of title, the embodiment of the smaller collection in the full Psalter of 150 psalms, the numeration, the formation of titles as found in the Greek,—these are some of the steps which must have been successively taken. Probably not much time needs to be allowed for some of them, some may even have been contemporaneous, but reflection shows that an interval of, at least, one or two decades must be allowed between the completion of the Heb. Psalter and its tr. into Greek.

γ. A further argument may be drawn from 1 Mac 7[16], which quotes Ps 79—usually accounted one of the latest in date—with the formula usual in citing Scripture—*κατὰ τοὺς λόγους οὓς ἔγραψεν*. For a psalm thus to be recognized and quoted as Scripture, implies the lapse of a considerable interval since its composition. Not much reliance for our purpose can be placed on the statement of 2 Mac 2[13], which records how Nehemiah, 'founding a library, gathered together the books about the kings and prophets, and the books of David (*τὰ τοῦ Δαυείδ*) and letters of kings about sacred gifts.'

δ. Indirectly, the so-called 'Psalms of Solomon' (which see) furnish evidence from another point of view. These psalms possess a distinct character of their own. If they may be placed, as most modern scholars are inclined to place them, about the middle of the 1st cent. B.C., a considerable interval must be allowed as elapsing between their composition and that of the latest canonical books. Even a superficial reader must be struck by the contrast between these 'psalms of the Pharisees' and those of the canonical psalter. Kirkpatrick speaks of them as 'separated by an impassable gulf.' This is strong language; but on the two great subjects of the future life and the Messianic hope the contrast is so striking, that if argument from growth and development of thought is worth anything at all, this is a case in which great reliance must be placed upon it.

Passing by other arguments of more questionable value, such as that from the musical titles, which were certainly unintelligible to the Gr. translators, and that from the language of the Chronicler concerning the Levitical guilds of singers, we may perhaps come to the following conclusion:—The Psalter is a collection of religious poetry chiefly, though not entirely, intended for use in public worship, and very gradually compiled. The earliest stage of the final process dates from shortly after the Exile, one step succeeding another through the compass of some three centuries, till the collection was virtually closed in the first half of the 2nd cent. B.C. Ryle represents the prevailing view of modern scholars when he says, 'The time of its final promulgation in its present form and of its first recognition as part of the people's Scriptures, may well have been that of the great religious revival that accompanied the success of the Maccabæan revolt, and the downfall of the Hellenizing party among the priests and nobles' (*Canon of OT*, p. 127). The exact form of the conclusion reached is somewhat dependent on the decision of questions concerning the date and authorship of individual psalms, a subject intimately bound up with that just discussed, to which accordingly we now pass.

iii. DATE AND AUTHORSHIP.—Care must be taken not to confuse date of compilation and date of composition, and sometimes a distinction must be made between the date of composition of the original psalm and the date to be assigned to it in its present form. Many of these lyrics were handed down orally, and, in particular, some of those that were connected with public worship may have been long current in a narrower circle before they found a place in a smaller or larger collection of psalms. Further, the phenomena of the Psalter, as we have it, prove conclusively that modifications were freely made in existing compositions, whether to make them suitable for public worship or to adapt them to the new circumstances of a new time.

It is not the object of this article to describe the history of lyric poetry amongst the Hebrews. But no intelligent judgment can be formed as to the probable date of these particular sacred songs, without a brief survey of what is known from other sources concerning the history of this form of literary composition in Israel.

The history of the people begins with an outburst of song. The deliverance from Egypt at the Red Sea was an event which made a deep impression on the ritual, the literature, and the national life of Israel. It was signalized, according to Ex 15, by a song 'which Moses and the children of Israel sang'—a pæan not unworthy of the great occasion. It is found as part of the 'second Elohist's' narrative, doubtless handed down from earlier days, and is fitted into its place by v.^{19}. That the whole song in its present form is antique seems hardly likely. Ewald, Dillmann, Delitzsch, and Driver agree that vv.$^{1-3}$ give the ruling strain of the ancient hymn, while the language of vv.^{13} and ^{17b} seems to point to later days, when the early deliverance was triumphantly recalled. The 'Song of Moses' in Dt 32 may with some confidence be assigned to the 8th cent. B.C. It is not Mosaic in its point of view; v.$^{7f.}$ are enough to show that the settlement in Canaan is an event of the far past. Driver would fix the date about the time of Jeremiah, and some features point in this direction. But it is near enough for the present purpose, if it be assigned generally to the period of the monarchy. The remarkable poem given at length in Jg 5, known as the Song of Deborah, is generally recognized as one of the oldest fragments of Heb. literature. Kuenen describes it as contemporaneous with the events it celebrates, and most critics acknowledge the absence of anachronisms and the strong impression of reality which this ode leaves upon them. The date of Hannah's song in 1 S 2 cannot easily be determined. Judged by modern ideas, it seems little suited for the occasion on which it is said to have been uttered, except so far as it sets forth the Divine exaltation of the lowly, or may be considered to possess a prophetic character. That it was composed after the establishment of the monarchy seems clear from v.^{10}. The lament over Saul and Jonathan ascribed to David in 2 S 1 may be taken as genuinely Davidic. It contains nothing inconsistent with the occasion, none of those indications of a later point of view sometimes found lurking in a single clause or allusion, whilst the date of the compilation of the book, so far as can be gathered, would point to an early origin for the elegy. Other indirect evidence as to the handing down of such songs from early times may be drawn from the mention of the 'book of Jashar' and the 'teaching of the song to the children of Judah' in v.^{18}. The 'last words' of David, found in 2 S 23, do not stand on quite the same footing, since these later chapters form an appendix to the book which may be much later in date.

Other lyrics which have come down to us embedded in prophetic literature—with which psalmody is closely connected—are the thanksgiving of Is 12, the dirge of Hezekiah in Is 38, the prayer of Habakkuk in Hab 3, and that of Jonah in Jon 2. It is impossible to enter into detailed questions of criticism, yet the objective evidence afforded by the dates of these poems, if they could be fixed, would be important, for these would serve as landmarks to judge of compositions when removed from their setting. Is 12 probably belongs to the period of Hezekiah. The dirge in ch. 38 may well be of the same date. It was apparently added by the compiler of Is 36-39 to the historical narratives drawn from 2 Kings. Cheyne compares the language of the dirge with that of Job, and holds it to be exilic, inserted on the principle that psalms in any sense illustrative of historical incidents might be quoted as if actually connected with them. The prayer of Habakkuk is considered by many critics to be a late addition, but there is no valid reason why it should not belong to the 6th cent. B.C. The general character of Jon 2 seems to mark it out as a cento of phrases drawn from earlier psalms. It has none of the freshness and force to be expected in a composition of the time of Jonah the prophet.

Gathering this hasty survey to a close, it may be said in a word that the highly elaborated poetical composition entitled 'The Lamentations,' though not by Jeremiah, and perhaps not of single authorship, may—allowing for the slightly varying dates of its different parts—be with some confidence placed soon after the Exile, in the course of the 6th cent. B.C. The finished acrostic arrangement, no less than the language and style, points to an advanced stage of poetical composition. See, further, art. POETRY (HEBREW).

If these results are only approximately correct, they furnish valuable data for further investigation. We cannot obtain as much information concerning the history of music and song in connexion with temple-worship. The notes of the Chronicler, written long after the event, though in many cases drawn from original sources, hardly enable us to determine how far the services which were inaugurated by David had developed in the earlier period of the monarchy. Some of the descriptions seem to give a picture of the full organization known to the Chronicler, of which David established merely the rudiments. Delitzsch laid it down that there were three chief epochs of psalmody in Israel—the time of David, of Jehoshaphat, and of Hezekiah; but in our records it is difficult to distinguish the stages of growth in the music and worship of the sanctuary. It seems clear, however, that the position discernible after the Exile (Ezr 2[41] and Neh 7[44]) implies considerable previous development, at least under the later monarchy, though its exact degree is doubtful. On the other hand, the outburst of song in the time of the Maccabees, of which many recent critics have much to say, while probable enough, is hypothetical only. The theory is likely enough *a priori*, and possesses some slight indirect confirmation from history (cf. 2 Mac 2[14]), but its historical basis is not strong enough to bear any solid superstructure. The evidence of Jer 33[11] is by no means unimportant where external evidence is so scanty; pointing, as it does, to a measure of liturgical development and the use of formulæ in worship during the Chaldæan period, which may form a fixed point in dealing with the psalms.

Let us next examine the titles so far as these bear on authorship. The facts are these. One psalm is attributed to Moses, 73 to David (in the five books respectively, 37. 18. 1. 2. 15), 2 to Solomon, 12 to Asaph, 11 to the sons of Korah, 1 to Heman, and 1 to Ethan. In fourteen cases the historical circumstances of composition are alluded to (cf. Ps 3. 7, etc.). These cease in the later books. Those that have come down to us are sometimes taken from the historical books, and sometimes present difficulties, as in the mention of 'Cush,' Ps 7. The LXX contains some additional titles. The following psalms, anonymous in the Heb., are in it ascribed to David, 33. 43. 67. 91. 93–99. 104; Ps 138 and 139 are inscribed in cod. A *τῷ Δαυεὶδ Ζαχαρίου*, while 146. 147, and 148 have the title *Ἀγγαίου καὶ Ζαχαρίου*. The historical references peculiar to this version are often curious or obscure, *e.g.* Ps 27 *πρὸ τοῦ χρισθῆναι*, Ps 29 *ἐξοδίου σκηνῆς*, Ps 66 *ἀναστάσεως*, whilst Ps 76 and 80 are entitled *πρὸς τὸν Ἀσσύριον* and *ὑπὲρ τοῦ Ἀσσυρίου*, and Ps 144 *πρὸς τὸν Γολιάδ*. This version contains also, it may be said in passing, notices of the days on which certain psalms were recited in public, as Ps 92 in the Heb. is spoken of as a Sabbath-psalm. Ps 24 was sung on the first day of the week, 48 on the second, 94 on the fourth, and 93 on the day before the Sabbath.

The anonymous psalms, called 'orphans' in later days, were by the later Jews provided with parents by being attributed to the author named in the nearest previous psalm (see Jerome, *Epist.* 139 *ad Cyprianum*). In all probability it is on this principle that so many psalms in the first book came to be attributed to David, and in later times Moses was credited with all the psalms 91–100, extending, that is, from the 'Mosaic' 90th psalm to the 101st, which bears David's name. The usage by which the whole Psalter came to be attributed to David, so that the popular name 'David' was applied to the whole collection in He 4[7] is easily intelligible, and has been frequently paralleled since in the names of 'Wesley's' and other popular hymn-books.

The time when these titles were added cannot be exactly determined. Some would be prefixed at the time of the earlier compilations, others when the collections of collections were made. Several of the titles in the LXX show, what one or two psalms in the Heb. exhibit, a combination of inconsistent traditions, both as regards author and occasion. As a whole, the titles represent an early, but far from contemporary tradition, and are for the most part uncritical in character, as may be shown by the following considerations.

1. Some of the psalms assigned to David cannot by any possibility be his. Compare, *e.g.*, the Aramaisms of 103. 122. 139 and 144; but especially those of 139, a psalm which must be amongst the latest in the Psalter. Other explanations have been given of these Aramaisms which cannot be considered satisfactory; but if they are supposed to originate in the Northern Kingdom, Davidic authorship is equally set aside.

2. Some psalms ascribed to David are evidently late because of their obvious borrowings from earlier psalms. These are tame in style, lacking the fresh vigour associated with the Davidic period, though often with a plaintive beauty of their own (cf. Ps 86).

3. The acrostic psalms 25. 34 and 37 cannot be David's. It is conceivable that this artificial style of composition came into use early, but it is not probable. Known examples of it are late, and some other features in the acrostic psalms of the first book—*e.g.* the condition of the State, the exhortations to patience under oppression, as in Ps 37—make so early a date impossible.

4. The mention of the temple in 5[7] 27[4] etc. must be considered as an evidence of date. It has been contended (*e.g.* by Delitzsch, *Psalms*, vol. i. pp. 160, 161) that הֵיכָל might be applied to the Davidic tabernacle; but it is only by a certain straining of language that a word for 'palace' could be applied to a tent, even though that tent were the dwelling-place of God. The phrase God's 'holy hill,' moreover, seems to imply that the sanctuary had been established upon Zion for some considerable time (see Driver, *LOT*^{6} p. 375). The early use of these expressions might, however, perhaps be allowed, if all other features of the psalms in question favoured a Davidic authorship. But this is not the case. The language which describes a period of oppression and fear (Ps 9[13] etc.) requires a good deal of adaptation before it will fit David's position, and the same may be said of the descriptions of the kind of foes against which the psalmist had to contend. Traditional interpretation may have accustomed readers to think of David under persecution by Saul, or at the time of Absalom's rebellion, but close examination shows that much of the language is inappropriate in David's mouth. Often there is a superficial resemblance to the circumstances of David's life, combined with real incompatibility. See, *e.g.*, Ps 20 and 21, which refer to the king, but could not have been written by king David in relation to himself; Ps 55[12. 13], which might seem to point to Ahithophel, but that so many phrases of the psalm (vv.[3. 9. 10], and the phraseology, carefully considered, of [12–14]) are incompatible with David's position. Many of the psalms ascribed to David are not the language of a monarch at all, but the plaintive complaints of one who is crushed under a government which he has no power to modify, and from which he cannot escape. Isolated expressions such as are found in 51[18. 19] may be explained as liturgical additions to an originally Davidic psalm, while 69[35] might conceivably be understood of David's time; but some violence is required in each case. And putting together (1) the separate phrases which betray a later date, (2) the kind of trials to which the psalmist is exposed, (3) the condition of society exhibited, (4) the maturity of theological thought often manifested,

it will be seen that a strong case is made out against at least a large number of the psalms attributed in the titles 'to David.'

Is it to be said, then, that *David wrote none of the psalms that have come down to us*? Wellhausen's dictum has often been quoted, that 'the question is not whether the Psalter contains post-exilic, but whether it contains any pre-exilic psalms,' and that question is by many answered in the negative. It will be safer to conduct the inquiry upon critical principles cautiously applied.

First, little or no reliance is to be placed on the titles as indicative of authorship. For it is not certain that the לְדָוִד is to be understood of personal authorship (compare the title 'of the sons of Korah,' where the preposition is admittedly not the *Lamed auctoris*). It is probable that a title originally given to one or two psalms in a book was afterwards affixed separately to all in a collection. And the arguments above alleged show that many of the titles must have been affixed in a crude and superficial way. But the same cannot be said of the general reputation of David as a psalmist. This must have rested upon a tolerably substantial basis. It has been said that David was noted only as a musician, not as a poet. The passages 1 S 16^{18}, 2 S 1^{17} 3^{33} 6^{14}, and Am 6^{5} are said not to imply more than this. But the Chronicler makes David to have been the founder of psalmody, see 1 Ch $15^{23.\ 25}$, 2 Ch 7^{29}, and compare Ezr 3^{10}, Neh 12^{36}.

Further, it has already been seen that David was confessedly the author of the elegy of 2 S 1, and the 18th psalm is attributed to him in 2 S 22. It is said that the first of these poems is not of a religious character, but that does not constitute a proof that the writer could not compose a religious poem, and for literary purposes its evidence is valid. David was the writer of verses which, as literature, are parallel with the psalms, whilst early tradition ascribes to him the composition of psalms also. Taking, then, the 18th psalm as a kind of test case, how stands the evidence? (*a*) *External Evidence.* If the 22nd ch. forms an integral part of 2 S, the testimony to Davidic authorship is early and strong. If—as there is reason to suppose—chs. 22 and 23 constitute a later addition to the book, their evidence is greatly weakened. It is not easy to determine whether the text as given in the psalm is earlier or later than that found in the history. Baethgen inclines to hold that the psalm gives the earlier form of text, but that the two have been handed down independently. On the other hand, it is much more probable that the brief historical introduction with which Ps 18 opens was taken from the history than *vice versâ*. (*β*) *Internal Evidence.* The contents of the psalm suit well the early monarchy, and can, in fact, with difficulty be applied to any other period. The vigour and freshness which characterize the style have convinced Ewald and many other critics of the Davidic authorship. The only arguments on the other side have been drawn from v.^{27}, which might very well have come from David's pen, and vv.$^{49.\ 50}$, which do unquestionably point the other way, though there is nothing in them absolutely incompatible with Davidic authorship. The theory adopted by Cheyne and others who support a much later date is that the writer, with marvellous ability and success, throws himself back into the life of the conquering hero of many centuries before, and the poem was 'conjecturally ascribed to the idealized David not long before the Exile.' This conclusion appears to spring from the assumed premiss that 'from the point of view of the history of art, not less than from that of the history of religion, the supposition that we have Davidic psalms presents insuperable difficulties.' The conjunction of internal and external evidence furnishes a fair, though not conclusive, case in favour of the Davidic authorship of Ps 18, such as would reasonably be accepted in the case of any similar document in classical literature, and it can be overruled only by considerations drawn from a general view of OT religion, such as cannot be discussed here.

It is obvious that a decision on the question of the 18th psalm will carry many others with it. If this psalm be not David's, probably none from his pen has come down to us; if it be, the way is open to examine other psalms for which a similar claim is made, rejecting such as are condemned by internal evidence. The only other psalm of which mention can be made here is the 110th. Older expositors, such as Delitzsch and Ewald, held it to be Davidic, or of the Davidic age, but the tendency of modern criticism is to assign to it a much later date. The terseness, vigour, and occasional obscurity of its phraseology favour an early origin, and its occurrence in the fifth book of the Psalter, which tells in favour of a late date, is not absolutely inconsistent with an earlier. Decision upon the point is bound up with the exposition of v.^{1}. If the opening words may be understood in the sense that the Messiah is objectively regarded as the psalmist's Lord, David may be regarded as the speaker. If, as many hold, this is impossible, the theocratic priest-king must be addressed by the psalmist as his lord, and the Messianic reference can only be indirect and typical, and Davidic authorship is excluded. It has been attempted to support the first of these theories by the language of 2 S $23^{2\text{-}5}$ and the prophecy recorded in 2 S 7, but these do not present a close parallel to the kind of Messianic reference proposed. An argument, conclusive to the minds of many, is drawn from our Lord's quotation of this psalm as recorded in the Synoptic Gospels. This quotation shows at least that the current Jewish opinion regarded the psalm as Messianic, but it does not exclude—(1) the supposition that an *argumentum ad hominem* was intended sufficient for the purpose which Christ had in view, or (2) the fact that the argument to be drawn from the psalm holds good, if for 'David' the general word 'psalmist' were substituted. A study of the whole use of OT made by Christ in His teaching shows that the questions of date and authorship with which criticism is chiefly concerned were not before the mind of our Lord as He spoke, nor was it His object to pronounce upon them.

In general, the conclusion reached upon the subject of Davidic psalms seems to be as follows. It cannot certainly be proved that David wrote any psalms; the probability is that he wrote many; it is not likely that all these were lost; some of those extant which are ascribed to him are appropriate in his lips; external evidence ascribes the 18th psalm to David, and if it be his, it is probable that others also should be attributed to him; and in determining the number of these, internal evidence drawn from contents, style, allusions, etc., is the sole criterion. The judgment of critics proceeding upon these lines naturally varies considerably. Baethgen, with some hesitation, admits 3 psalms as Davidic, Schultz 10, Ewald 17, Delitzsch 44, while Driver (*LOT*^{6} 380) sums up by saying—'A *non liquet* must be our verdict; it is possible that Ewald's list of Davidic psalms is too large, but it is not clear that none of the psalms contained in it are of David's composition.' The arguments above adduced would lead to the conclusion that from ten to twenty psalms—including 3. 4. 7. 8. 15. 18. 23. 24. 32, and perhaps 101 and 110—*may* have come down to us from David's pen, but that the number can hardly be greater and may be still less. The 90th psalm cannot have been written by Moses, nor the 72nd and 127th by Solomon. The titles in these cases must be understood as indicative of the subject-matter. The reference of certain psalms to Asaph, Heman, Ethan, and the sons of Korah, is to be understood from the point of view of compilation rather than of authorship. If these psalms were taken from collections associated with the Levitical guilds known by these historical names in the time of the second temple, the titles become easily intelligible. It creates difficulties to press the meaning of the preposition as *Lamed auctoris*, and to suppose (*e.g.*) that the family or guild of 'Korah' were either separately or conjointly authors of psalms. It is quite possible that the free multiplication of the title לְדָוִד is due to the same habit on the part of those who formed the several collections. Compilers would think more of the source from which the psalms were actually derived than of the presumably remote original author, especially in days when personal authorship was not dwelt upon as in a later time.

On the general subject of the age of the Psalms, Cheyne hardly allows one to be pre-exilic; the scattered references to monarchy he applies for the most part to the time of the Maccabæan revival. In this he stands almost alone amongst English critics, though the general tendency of criticism is to assign a continually increasing majority of the psalms to the post-exilic period. Cornill probably represents the prevailing opinion of contemporary scholars when he describes (*Einleitung*, p. 221) the Psalter as representing a reaction of the old Israelitish pious feeling against the stiffening formalism of the time of Ezra and his successors, a proof that the religious genius of Israel in the 3rd and 4th centuries B.C. had not been quenched by the growing influence of what was later known as Pharisaism. The historical allusions which are found in some psalms are not for the most part decisive, and these cease to have any weight if the possibility of later impersonation and idealization is freely conceded. Taking the language of the psalms as it stands, however, the nearest approach to definiteness on the ground of historical allusions would be found in Ps 46 as applied to the overthrow of Sennacherib, Ps 74 and 79 to the period of the Maccabees. Ps 68, which by earlier critics was assigned to the reign of Jehoshaphat, almost certainly belongs to the period of the Second Temple, and Ps 118, which has generally been considered as especially suitable to the return from Captivity, is confidently assigned by Cheyne to the Maccabæan period. Ps 45, which most critics place during the monarchy, is understood by the same writer of Ptolemy Philadelphus. If historical allusions are not decisive, neither will the evidence of parallel passages avail much. If the dates of Job, of Deut., and of certain chapters of Isaiah could be fixed, the dates of a few psalms might be approximately determined; *e.g.* Ps 8 was written before the Book of Job, and Ps 90 after Deuteronomy. The date of Jer. is well known, but a comparison between the language of the psalms and the prophet (cf. Ps 1 with Jer 17[7.8]) makes it difficult to say which can claim the priority. A certain group of psalms, *e.g.* 69, may with some confidence be assigned to the period of Jeremiah.

In only a very few cases can linguistic evidence be considered as decisively characteristic of late date; Ps 139 is probably the best example of this. The criterion of style is too subjective and too differently estimated by different critics to be relied upon as evidence of date. Arguments drawn from the stage of theological thought visible in the psalms depend upon the view taken of the history of OT theology, and opinion can hardly be considered ripe enough on this subject for it to be employed with certainty. The psalms themselves form no inconsiderable portion of the evidence by means of which that history is to be traced out, and it is clear that the vicious circle must be avoided which would conclude that a given psalm 'cannot be of early origin because the ideas it contains cannot have been promulgated so early.' The state of religious thought and life manifested in the writings of the prophets Amos and Hosea presupposes a long religious history, the nature of which has not yet been made sufficiently clear to allow of sweeping dogmatic assumptions. And, apart from a belief in the supernatural, the history of religion shows how frequently the *vates*, whether bard or prophet, has been before his time in his religious intuitions and aspirations. Certain *general* conclusions may, however, be given, which will guide us approximately to the time when the psalms as a whole were composed. A few being probably Davidic, a considerable number, especially in the earlier books, are pre-exilic, but the greater proportion of these date after the 8th cent. B.C. The large majority of the psalms may be with confidence assigned to the period during and shortly after the Exile, some few to the 3rd and even the 2nd cent. B.C.

Are any Maccabæan psalms included in the Psalter? This much debated question has received very various answers. There is an *a priori* probability in favour of the existence of such psalms and of their inclusion in the Psalter, if the Canon of OT were not closed too early to admit them. The strong probability is that the Canon was not virtually closed till about B.C. 100, and the Psalter may have been kept open even after the various collections were formed, in the sense that a few later psalms might find their way in after a collection possessed a separate existence. The evidence of Josephus and of 2 Mac may be taken as indirectly confirming the *a priori* probability that the Maccabæan times would furnish a vigorous psalmody. The evidence of the 'Psalms of Solomon' shows that the true spirit of psalm-composition existed even later, though the hopes and ideals of the psalmist had altered. When we examine the extant psalms, however, difficulties arise. Those which appear most likely to have sprung from Maccabæan times, such as 44. 74. 79. 83, are found, not in the later, but in the earlier or middle collections. It is possible, but not easy, to understand how a psalm composed B.C. 150 made its way into Book ii. and was labelled, not in the Heb. only, but in the Greek, as a psalm of Asaph. It is urged by some that the language of these psalms may be appropriately understood of earlier desolations than those of the time of Antiochus. But in Ps 74[8], for example, the phrase מוֹעֲדֵי אֵל (though understood by the LXX of feasts) seems distinctly to point to the synagogues of a later period, while 74[9] connects itself naturally with 1 Mac 4[46] 9[27] 14[41]. The argument drawn from the repeated use of חֲסִידִים, on the other hand, has been too much pressed, as if it must necessarily refer to the time when the *Ḥasidim* became a recognized party, when 'the company of the Hasidæans, mighty men of Israel,' offered themselves 'willingly for the law' (1 Mac 2[42]). It by no means follows that all mention of 'the pious ones' is to be taken as distinctly Maccabæan.

The history of opinion displays considerable diversity of opinion on this question. Theodore of Mopsuestia, holding the Davidic origin of the psalms generally, taught that David projected himself in the spirit of prophecy into the times of the Maccabees, so that some of the psalms faithfully picture that period. Calvin attributed Ps 44. 74 and 79 to the period in question; Hitzig and Olshausen enlarged this short list to embrace the greater portion of the Psalter, including all psalms from 73 to 150. Reuss assigned several psalms to a still later period—that of John Hyrcanus, B.C. 135–107. Cheyne indicates some twenty-five psalms as Maccabæan, including 20. 21. 33. 44. 60. 61. 63. 74. 79. 83. 101. 108. 115–118. 135–138. 145–150. His criteria of 'a uniquely strong church feeling,' an 'intensity of monotheistic faith,' and an 'ardour of gratitude for some unexampled stepping forth of the Lord J″ into history,' are not susceptible of specific and decisive application to Maccabæan times. The first criterion mentioned by Cheyne—the existence of 'some fairly distinct allusions to Maccabæan circumstances'—would be decisive if its occurrence could be clearly proved. But the allusions are held by such critics as Gesenius, Ewald, Dillmann, and Hupfeld to be anything but distinct. In our judgment the number of Maccabæan psalms cannot be large, but the bare possibility that a few such psalms were included in the Psalter before the Canon was closed should be left open. If any psalms of the 2nd cent. B.C. are found in our present collection, the internal evidence which would assign 44. 74. 79. 83 to this period may be held to outweigh the unquestionable difficulties arising from their place in the second and third books.

iv. TITLES.—It has been found convenient to discuss such of the titles as bear on the question of authorship already; the present section will therefore be devoted to an examination of those words or phrases, mostly musical notes, which require explanation. For the sake of convenience, they are given in alphabetical order, following the EV.

'Aijeleth hash-Shaḥar, Ps 22 עַל־אַיֶּלֶת הַשַּׁחַר, LXX *ὑπὲρ τῆς ἀντιλήμψεως τῆς ἑωθινῆς*, *i.e.* 'concerning the morning aid' (אֱיָלוּת); so Targum, which refers to the *Tamid*, the perpetual morning sacrifice; Jerome, *pro cervo matutino* (so Aq.). 'Upon' here signifies 'set to the tune of' (RV), the name of the song being prob. 'Hind of the Dawn.' W. R. Smith compares Arabic usage in thus describing melodies; also Ephraem in the Syriac. Baethgen understands the morning to be viewed as 'the hind in its swiftness.'

'Alâmôth, Ps 46; cf. 1 Ch 15[20] 'psalteries set to Alamoth' (RV), עַל־עֲלָמוֹת, LXX *ἐπὶ τῶν κρυφίων*, 'about the hidden things' (עֲלֻמוֹת), so Targum; Jerome, after Aq., *pro juventutibus*. In 1 Ch, LXX transliterates *ἀλαιμώθ*. Ges. and most moderns derive from *'almah*, 'damsel,' and render 'with accompaniment of damsel voices,' or 'in soprano.' Baethgen holds that this interpretation is not suitable to Ps 46. Rashi understands it of a musical instrument, as modern viola or tenor-violin. Cf. 'Double-bass,' corresponding to *Sheminith*, which see. It is a question whether the closing words of Ps 48 *'al-muth*, which will hardly bear the translation 'unto death,' should not be read as *'alâmôth* and taken as part of the title of the following psalm.

'Al-taschith (AV), *'Al-tashheth* (RV), Ps 57. 58. 59. 75, אַל־תַּשְׁחֵת, LXX *μὴ διαφθείρῃς*; Jerome *ut non disperdas*. As in RV, this must be understood to mean 'set to the tune of, Destroy not.' Possibly these words may form the beginning of an old vintage-song, such as we find described in Is 65[8], when the new wine is found in the cluster, 'and one saith, Destroy it not, for a blessing is in it'; but this is mere conjecture (see *OTJC*[2] p. 209).

Ascents.—See *Degrees*.

Chief Musician, for the.—Found in 55 psalms, beginning with Ps 4. See also Hab 3[19]. Heb. לַמְנַצֵּחַ, LXX *εἰς τὸ τέλος* (connect with לָנֶצַח 'for ever'?). Other Gr. VSS, *εἰς τὸ νῖκος*, Jerome *Victori*; following apparently the meaning of a kindred Aram. root. The verb נצח is found in 1 Ch 15[21] in reference to music, and is rendered 'to excel' in AV, 'to lead' the singing in RV. In 1 Ch 23[4] it means 'to preside over' the work in question. The meaning of the title, therefore, apparently is that the psalm was to be given to the precentor or leader of the choir, and was intended to be sung in the temple-service.

Dedication, A Song at the d. of the house, Ps 30, Heb. שִׁיר־חֲנֻכַּת הַבַּיִת, LXX *ἐκστάσεως*.—The order of words in this title suggests that in its present form it combines two several traditions; it is at the same time a psalm *lĕ-David* and a song for the dedication of 'the house.' It is possible that the two may be combined; not, however, when the site was chosen for the temple (Hengstenberg), for this was not the dedication of a house; nor (probably) at some re-consecration of the palace after Absalom's rebellion and David's absence. The most probable supposition, if the psalm is to be referred to David's lifetime, is that of Delitzsch, who refers it to the house mentioned in 2 S 5[11], and supposes that about this time the king was recovering from severe sickness. It is known, however (*Sopherim* xviii. 2), that this psalm was used by the Jews from an early date at the feast of *Ḥănukkah*, the 'dedication' mentioned in 1 Mac 4[54] and Jn 10[22], and Baethgen and many moderns consider that this clause of the title was added later as an after-thought. It has been questioned whether this is consistent with the ignorance of its meaning shown by the LXX. The probability is that the clause refers to a liturgical use of the psalm, not to its original composition.

Degrees, Songs of, Ps 120. 122–134 שִׁיר הַמַּעֲלוֹת; in 121 'לַמַּע; LXX *ᾠδὴ τῶν ἀναβαθμῶν*, Jerome *canticum graduum*, whence AV 'degrees,' RV 'ascents.'—Grammatically, the form of the title in Ps 121 is the more correct, if שִׁיר is to be understood of an individual psalm. W. R. Smith and Cheyne understand it collectively=שִׁירֵי, properly the title of the whole group, the plural 'ascents' indicating that the title of the group has come to be affixed to each psalm separately. The following meanings have been attached to this ambiguous phrase:—

1. The return from Babylon (Ewald). See Ezr 7[9], in which we read of 'the going up from Babylon,' and cf. Ezr 2[1]. The use of the plur. 'goings up' is explained to refer to more than one journey, under Cyrus and Artaxerxes (Ezr 2 and 8); or to the number of caravans, cf. *οἱ ἀναβαίνοντες* of Jn 12[20]. It is hardly likely, however, that the plural would be used of the one event which so signalized itself in the memory of the people, and the subject-matter of at least Ps 122 and 134 is unsuitable to this connexion.

2. The going up to the annual festivals in Jerusalem. The word *ma'ălah* is not elsewhere used of these journeys, but the cognate vb. עלה is (Ps 122[4] *al.*). The psalms are for the most part suitable in subject for such a purpose, either directly (see 122. 132. 133) or indirectly. Herder, Reuss, W. R. Smith ('Pilgrimage songs'), and Baethgen may be mentioned as amongst those who favour this explanation.

3. Fifteen steps led from the women's court to the men's court in the temple, and the Talmud (*Midd.* ii. 5, *Sukkah* 15*b*) says that these corresponded to the songs of degrees; not, however, that the psalms were named after the steps, or that the Levites sang these particular psalms upon the steps. This explanation of the name has, however, been held by some (*e.g.* Armfield, who has written a monograph upon the subject).

4. Delitzsch favours the interpretation which finds an allusion to the peculiar style or structure of the psalms, the repetition of a word or phrase, with a gradual ladder-like ascent as to a climax—'a step-like progressive rhythm of thoughts.' Compare the structure of the 'triolet' in more

recent literature. Against this, however, it may be urged that not all these psalms exhibit this structure (see 132); that it is found in some other psalms (*e.g.* 29); and that nowhere else is this technical use of the word found.

5. *Im höhern Chor* (Luther) to be sung 'in louder tones'; so R. Sa'adya Gaon, and cf. 2 Ch 20^{19} *lĕ-mā'lah* (diff. word from מַעֲלָה), 'with a loud voice *on high*' (AV), 'an exceeding loud voice' (RV).

6. An explanation, first given by Rashi, has lately been revived by Schiller-Szinessy, which refers the word to the 'liftings-up' or 'goings-up' of the heart in adoration and trust. See 121^{1} 123^{1} 130^{1}.

It will be gathered from the above sketch that no certain meaning can be given to the title of this group of lovely psalms. The second explanation is, on the whole, the most probable.

Gittith, Set to the, Ps 8. 81. 84, Heb. עַל־הַגִּתִּית, LXX ὑπὲρ τῶν ληνῶν, Jerome *pro* (*in*) *torcularibus* (גִּתּוֹת).—The Targ. explains of a musical instrument which David brought from Gath, or of the form of a wine-press. Generally understood to indicate the name of a tune, possibly set to a vintage-song, a meaning which the LXX and Jerome may possibly have had in view in their renderings. Ewald understands it to mean 'the March of the Gittite guard.'

Higgaion (הִגָּיוֹן).—This word does not occur in any of the titles, but is found in Ps 9^{16} and is conveniently considered here. It occurs in connexion with *Selah* (which see), and the double phrase is rendered by LXX ᾠδὴ διαψάλματος. It is found in the text of Ps 92^{3}, where Cheyne renders 'with sounding music upon the harp.' The root הגה from which the word is probably derived means to emit a deep, murmuring sound, and is used of a lion in Is 31^{4}, of a dove in Is 38^{14}, and of a mourner in Is 16^{7}. Also in a secondary sense of meditation or device in Ps 19^{14}, La 3^{62}. Kimchi explains *Higgaion* from this secondary meaning of the root; but it is in all probability a musical term derived from the primary meaning, possibly indicating a '*forte* burst of joyous music.'

Jonath-'elem-rĕḥoḳim, Ps 56 עַל־יוֹנַת אֵלֶם רְחֹקִים, LXX ὑπὲρ τοῦ λαοῦ τοῦ ἀπὸ τῶν ἁγίων μεμακρυμμένου, a tr. which supposes that Israel is intended by the word יוֹנָה *dove*, and אלם is quite misunderstood. Like so many others of these enigmatical phrases, this is in all probability the name of a melody to which the psalm is to be sung. With the reading אֵלִים the phrase may be interpreted 'the dove of the distant terebinths'; with present pointing, as in RVm, 'the silent dove of them that are afar off.'

Maḥălath, Ps 53; *Maḥălath lĕ'annôth*, Ps 88, Heb. עַל־מַחֲלַת, or with addition of לְעַנּוֹת, LXX ὑπὲρ Μαελέθ (τοῦ ἀποκριθῆναι) as pr. name, see Gn 28^{9}, 2 Ch 11^{18}, Jerome *pro choro*, *per chorum* (after Aq. Theod. Symm.). Considerable uncertainty attaches to the rendering of this phrase. If it does not indicate the name of a tune (Ibn Ezra), or the sadness of the melody to which the psalm was sung (Delitzsch), the choice lies between understanding *maḥălath* as (1) akin to *maḥălah*, 'sickness' or 'calamity' (Ex 15^{26}), so Targ.; or (2) as a musical instrument (Rashi, Ges., Lowe). Neither etymology nor the probabilities of the case can be said to point decidedly in either direction.

Maschil.—Found prefixed to 13 psalms, viz. 32. 42. 44. 45. 52–55. 74. 78. 88. 89. 142. Heb. מַשְׂכִּיל, LXX συνέσεως, εἰς σύνεσιν. Cf. 47^{7} זמרו משכיל, 'make melody in a skilful strain' (cf. RVm); Targ. 'with good understanding.' Gesenius renders, 'a didactic poem,' which does not fit many of the psalms mentioned above. Delitzsch understands it as indicating a 'contemplative' psalm (השכיל prop. 'consider,' 'attend to,' cf. Ps 101^{2} [RVm] 106^{7}); Rashi interprets by reference to 2 Ch 30^{22}, the Levites that 'had good understanding (*or* were well skilled) [apparently in music] for J″.' So far as etymology serves us, the title probably indicates a contemplative composition, but in process of time the original meaning probably passed away and it came to mean little more than a poem (cf. ποίημα).

Michtam, Ps 16 and 56–60 מִכְתָּם, LXX στηλογραφία.—So Gesenius, who says כתב = *scribere*, כתם = *inscribere*; the meaning in Eng. would imply a carefully-fashioned, 'emblazoned' psalm; but this meaning of the root כתם is wholly uncertain. Another suggested derivation connects with כֶּתֶם and would give the rendering 'a golden psalm'; so Luther. The word is also used in Is 38^{9} of Hezekiah's dirge, but it is not easy to detect any features which the various compositions to which the word is applied possess in common.

Muth-labben, Ps 9 עַל־מוּת לַבֵּן, LXX ὑπὲρ τῶν κρυφίων τοῦ υἱοῦ, Vulg. *pro occultis* (Jer. *pro morte*) *filii*, Targ. 'concerning the death of man (who came forth) between (the armies).' All these tr^{ns} show that the phrase was not understood, and the ignorance of the ancients is shared by the moderns. Grammar will not allow of the rendering 'death of the son,' *i.e.* Absalom, even if such a meaning were appropriate. In all probability this is the name of a tune; but whether it should be rendered 'Die for the son' or (with other pointing) 'Death makes white,' it is impossible to say, and cannot really signify.

Nĕginoth.—Found in six psalms—4. 6. 54. 55. 67. 76 בִּנְגִינוֹת, and once in 61 עַל־נְגִינַת, cf. Hab 3^{19}, LXX ἐν ψαλμοῖς, Jerome *in psalmis*. The word means unquestionably 'on stringed instruments'; it is always found after the phrase 'For the chief musician,' and indicates that the psalm is to be sung to an accompaniment of stringed music, cf. 1 Ch 15^{21}. *Neginath* is generally understood as the same word with an old feminine ending (Ges.); or, according to Massoretic punctuation, closely joined with *lĕ-David*, it would mean 'in the Davidic style of stringed music.'

Nĕḥiloth, Ps 5 אֶל־הַנְּחִילוֹת, LXX ὑπὲρ τῆς κληρονομούσης, as if הַנַּחֲלָה, Jerome *pro hæreditatibus*. Generally understood as=חֲלִילִים, meaning 'to the accompaniment of flutes' or wind-instruments. That flutes were used in worship, is shown by Is 30^{29}. Baethgen objects that the usual word for flute might be expected here, and understands Neḥiloth as the name of a tune.

Remembrance, To bring to, Ps 38 and 70 לְהַזְכִּיר, LXX εἰς ἀνάμνησιν (adding in 70, εἰς τὸ σῶσαί με κύριον), Jerome *in commemorandum, ad recordandum*. Is it to be understood, however, that God is to remember the psalmist, or the psalmist to remember God? Both views have been taken. The Targ., followed by Delitzsch, finds a reference to the *Azkarah* (ἀνάμνησις) part of the sacrifice of the Minḥah, when a portion was thrown upon the fire and the smoke was supposed to bring the worshipper into the Divine remembrance. See Lv 24$^{7.\,8}$, and connect with title in LXX περὶ σαββάτου. But the word is found in 1 Ch 16^{4}, when certain Levites were appointed to minister before the ark, and 'to record' (AV), 'celebrate' (RV), as well as to thank and praise J″; and perhaps this more general meaning of worshipping, in the sense of not forgetting the Divine benefits, is the more probable meaning here.

Shĕminith, Ps 6 and 12 עַל־הַשְּׁמִינִית, LXX ὑπὲρ τῆς ὀγδόης, 'upon the octave *or* the eighth,' cf. 1 Ch 15^{21}. The phrase either refers to a special kind of stringed instrument with eight strings, or means perhaps 'in the bass,' cf. *'al-'Alâmôth*=soprano. 'In a lower octave,' the reverse of the modern octave (Lowe).

Shiggaion, Ps 7 שִׁגָּיוֹן, LXX ψαλμός—μετὰ ᾠδῆς, Jerome *pro ignoratione* (after Theod. Symm., and see Ps 19^{12} 'errors').—The word is found in the plural in Hab 3^{1}. As derived from שׁגה 'to wander,' Ewald, Delitzsch, and others give the meaning of a 'dithyrambic song,' one characterized by various feelings or rhythms. Gesenius, with hesitation, renders *cantus suavis*. There appears to be nothing either in etymology, tradition, or the character of the two psalms in question to guide modern readers definitely to the meaning of this word.

Shoshannim, Shushan-'Eduth, Ps 45 and 69 עַל־שֹׁשַׁנִּים, Ps 60 עַל־שׁוּשַׁן עֵדוּת, Ps 80 אֶל־שֹׁ׳, LXX *ὑπὲρ τῶν ἀλλοιωθησομένων* (שֹׁשַׁנִּים from root שׁנה 'to change'), Jerome *pro liliis testimonii.*—Rashi understands as an instrument of six strings. Probably the name of a tune (Ibn Ezra and moderns) 'set to the melody of Lilies, or Lilies of the Testimony.' 'Pure as a lily is the Testimony,' *i.e.* the Law (Ewald).

Song of Loves, Ps 45 שִׁיר יְדִידֹת, LXX *ᾠδὴ ὑπὲρ τοῦ ἀγαπητοῦ.*—The allegorical interpretation which is suggested by the Gr. is of very early origin, and is based upon the use of language found in Hosea and elsewhere in OT, and recognized by St. Paul in Eph 5^{32}. The Targ. renders 'Thy beauty, O King Messiah.' The feminine plural termination must not be understood literally as of king's daughters (Hengstenberg), nor of a marriage-feast, nor in an erotic sense, for the word is a noble one; but according to the Heb. idiom it corresponds to a neuter abstract, and the phrase would mean 'A song of that which is lovely.' It is to be understood, like Canticles, of a pure and holy earthly love which may be understood to symbolize and prepare the way for a higher affection still.

To Teach, Ps 60 לְלַמֵּד, cf. Dt 31^{19}, where Moses is commanded to teach a song to the Israelites, and 2 S 1$^{17.18}$, where it is said that David 'bade them teach the children of Judah *the song of* the bow' (the word 'bow' is omitted in B of LXX)—a martial song, to be sung at the practice of arms? These parallels would seem to show that the title *lĕ-lammed* means that this psalm, like many others, was to be taught to Israel.

v. POETICAL CONSTRUCTION.—Heb. poetry, it is well known, is not constituted by rhyme. Neither, like Anglo-Saxon and other verse, is it marked by regularly recurring assonance, though occasionally this feature is present. Neither, again, is metre an essential feature of Heb. psalmody. It has been questioned among scholars—though only a small minority are prepared to answer in the affirmative—whether metre, implying lines consisting of a fixed number of syllables, is recognizable at all in OT poetry, as, confessedly, both rhyme and metre are characteristic of Jewish poems of the Middle Ages. But though metre is not discernible in Psalms, it does not follow that rhythm is excluded. The rhythm of thought in the well-known *parallelismus membrorum* is, of course, an essential feature, and rhythm of language matching the thought is readily perceptible, though no rules can be laid down for its determination. There is a rhythm in all the finest prose, not the less impressive for being irregular. In Psalms the rhythm of language more nearly approaches regularity than the rhythm of carefully constructed prose, but it defies analysis and systematization. The prevailing form is the couplet of two corresponding lines, though the triplet and quatrain are used from time to time. On this subject Driver says: 'The poetical instincts of the Hebrews appear to have been satisfied by the adoption of lines of *approximately* the same length, which were combined, as a rule, into groups of two, three, or four lines, constituting *verses*, the verses marking usually more distinct pauses in the progress of thought than the separate lines' (*LOT*^{6} p. 362). (For the details of this subject see Driver's chapter just quoted and art. POETRY). It may, however, be briefly said here that the chief attempts to trace out a more regular metrical system in Psalms than the above remarks allow, are those of J. Ley (*Metr. Formen der Heb. Poesie*, 1866, and *Grundzüge des Rhythmus in der Heb. Poesie*, 1875), Gustav Bickell (*Carmina VT metrice*, 1882, and articles in *ZDMG*, 1891–1894), and, more recently, H. Grimme ('Abriss der biblisch-hebräischen Metrik' in *ZDMG*, 1896, pp. 529–584, and 1897, pp. 683–712). Ley seeks to establish a metre which depends upon accents, and relies upon alliteration, assonance, and rhyme as subordinate features. Bickell seeks to prove that the measure of the verse is marked by regular alternation of accented and unaccented syllables; but he accomplishes this only by an excessive modification, not to say mutilation, of the text, and by a violent use of unnatural elisions. Grimme's system is described in art. POETRY, p. 6^{b}. C. A. Briggs holds Ley's views in a modified form. He says, 'The accent may be used as a principle of measurement to a very large extent in Heb. poetry, but it is not an absolute law; for whilst many poems and strophes are uniform in this respect, the poet breaks away from it and increases or diminishes the number of accents, as well as words, to correspond with the movements of his thought and motion' (*Bibl. Study*, p. 263).* This does not greatly differ from the mode of statement adopted by Delitzsch, which is accepted in this article. 'Heb. poetry is not metrical, *i.e.* it is not regulated by the laws of quantity and by the number of syllables; strong accents, which give prominence to the logically most important syllables, produce a very great variety of rhythms in the series of syllables that form the *stichoi*; the ictus of the verse is regulated by the logical movement; and the rhythm is the purely accentuating rhythm of the oldest kinds of national poetry' (*Psalms*, vol. i. p. 31, note, Eng. tr.).

There is one stage of poetical construction intermediate between the unit—couplet, triplet, or quatrain—and the completed lyric. It is the strophe or stanza, whichever name be considered most appropriate for a section of the poem, marking a clearly defined movement in the thought, and consisting of a measured number of lines. Moulton, in his *Literary Study of the Bible*, uses the term 'sonnet' to describe this feature of Heb. poetry, but the accepted connotation of the word makes it generally unsuitable, and it would be quite out of place in the psalms. Sometimes the close of the strophe is marked by a refrain, or a nearly exact repetition of verse or phrase at more or less regular intervals. Some of the most clearly marked examples of this are, 'Why art thou cast down, O my soul?' in 42$^{5.11}$ 43^{5}; 'The Lord of hosts is with us' in 46$^{7.11}$; 'Turn us again, O Lord of hosts' in 80$^{3.7.19}$; 'O that men would praise the Lord for his goodness' in 107$^{8.15.21.31}$. In the 136th psalm the refrain, 'his mercy endureth for ever' occurs as the latter half of every verse. Less readily recognized examples may be found in 39$^{5.11}$ 'Surely every man is vanity'; 56$^{4.10}$ 'In God will I praise his word'; 57$^{5.11}$ 'Be thou exalted, O God, above the heavens'; 62$^{1.5}$ 'My soul, wait thou only upon God'; 99$^{5.9}$ 'Exalt the Lord our God, for he is holy.' In some of these cases, however, the repetition of a phrase is rather the indication of a style which meets us markedly in the Songs of Ascents, than the occurrence of a refrain such as marks the close of a strophe. Frequently it is clear that a psalm naturally divides itself into sections, where no refrain or poetical device marks the several pauses. The first three psalms would sufficiently illustrate this, particularly the second, in which the arrangement of vv.$^{1-3.\ 4-6.\ 7-9.\ 10-12}$ commends itself at once. Driver holds that in many cases these sections

* Slightly modified in *Study of Holy Script.* (1899) p. 369f.

are 'to be regarded as logical rather than poetical units, and as not properly deserving—even in its modified sense—the name of strophes.' The construction of Heb. poetry, however, is such that it is always more or less difficult to make the distinction between thought and form; and as the length of line depends largely upon the movement of thought, so also with the length of what in prose would be called a section, but in the irregularly but rhythmically constructed poetry of Israel, may be called a strophe or a stanza. See, further, art. POETRY, p. 7 ff.

Several psalms are *acrostic*, or alphabetical, in their arrangement. Sometimes successive verses begin with the letters of the Heb. alphabet in order; sometimes half-verses, or pairs of verses, are thus marked, and in the 119th psalm eight verses are found to each letter. In Ps 9–10 we find two verses to a letter, but the scheme is not complete. In 9^{20} ק takes the place of כ, Ps 10 begins with ל, and the last four pairs of verses close with ק, ר, שׂ, ת, the intervening verses not being arranged alphabetically, though their number exactly corresponds with the number of letters passed over. In Ps 25 one verse is found to each letter, though ו is missing, and an extra verse is added at the end. In Ps 37 two verses occur to each letter (with slight irregularity), in 111 and 112 half a verse. In 34 and 145 the single-verse arrangement is found, with slight irregularities, which may be accounted for by a corruption of text. It might be supposed that so artificial an arrangement of matter would form a sure sign of late date, of a 'silver age' and fading poetic power, but this hardly appears to be the case. One of the most elaborate and complete instances is found in the 'Lamentations,' which is considerably earlier than many of the psalms. In Latin poetry the acrostic arrangement is found in early times (see Cicero's reference to Ennius, quoted by Delitzsch, i. 204); and Hitzig, who allows only fourteen Davidic psalms, includes 9 and 10 amongst them. The alphabetical psalms do not, as a rule, exhibit much poetic fire or vigour in comparison with psalms which are strictly lyrical in character. But this may be due to the subject and the mode of treatment adopted, for single phrases in the 119th psalm might easily be quoted which are full of imaginative fervour and power. If we cannot say with Delitzsch that the acrostic arrangement is 'full of meaning in itself,' it may be admitted with Driver that it was 'sometimes adopted by poets as an artificial principle of arrangement, when the subject was one of a general character, that did not lend itself readily to logical development.'

It is needless to say, however, that it is not in their form and construction that we find the true poetry of the psalms, though this is of such a character as to aid in securing for them the universality which is one of their chief features. The form of Heb. poetry bears rendering into other languages better than the poetical literature of any other nation. But the poetry of the psalms does not lie in their artistic form. The word 'artistic,' indeed, is out of place here. Artifice hides itself abashed in the presence of deep religious feeling. It is not merely that the predominating tone and spirit of the book is religious; religion has laid its strong uplifting hand upon every string of the psalmist's harp, every touch of the psalmist's fingers. The literary characteristics which charm us in the great poets of the world are indeed present. Lofty imagination marks some of the descriptions—'Who coverest thyself with light as with a garment, who stretchest out the heavens like a curtain.' 'He rode upon a cherub and did fly; yea, he did fly upon the wings of the wind.' Fancy appears in slighter touches, often unnoticed—'In Salem is his leafy covert, and his (rocky) lair in Zion.' The varied metaphors of the psalms have furnished religious life with brightness and picturesque variety for more than two thousand years. The terebinth planted by the streams, the hind panting for the water-brooks, the sun going out like a bridegroom from his chamber, the Divine Shepherd tending His flock alike in the pleasant pasture and the lonely and gloomy ravine,—these familiar images are not more striking than the thousand less noticed pictures, sketched in outline only: the crowned and anointed guest at the banquet of life spread in the very wilderness amongst foes; the harassed and overthrown forces of the enemy scattered over hillside and plain, like the ten thousand flakes 'when it snoweth in Zalmon'; or Death the shepherd herding among his flock in Sheol those who had arrogantly defied his power—yet the psalmist knows of a mightier Shepherd still, who shall 'redeem my soul from the power of Sheol, for he will receive me.' Some of the poetical effect is doubtless peculiar to the Hebrew, the picturesqueness of some of the words, and occasionally the variety of its synonyms, or the play of tenses, alternating one with another, like lights and shadows upon the hillside, or the changing colours upon the burnished neck of the dove. But the simplicity of diction which imparts such sublimity to a phrase—'with thee is the well-spring of life: in thy light we shall see light'; the depth of human feeling which can be felt like a beating pulse on every page—'Fervently do I love thee, J″, my strength!'—'Deep calleth unto deep at the noise of thy cataracts; all thy waves and billows are gone over me'; the concrete directness with which the most abstract truths of religion are set forth—'In the hand of J″ there is a cup, and the wine foameth; surely the dregs thereof, all the wicked of the earth shall drain them out and drink them';—'He shall cover thee with his pinions, and under his wings shalt thou take refuge'; these words appeal to the heart of the world, and their power is as great for the Englishman as for the Israelite. But the reason for this is not chiefly, though it is partly to be found in these poetical characteristics. The Psalter lives in virtue of its unique religious power and beauty, and on its theology something must now be said.

vi. RELIGIOUS AND ETHICAL IDEAS.—In the following paragraphs the Psalter will be treated as one whole. Owing to the uncertainty which attaches to the dates of the several psalms, it is impossible to trace out, according to the methods of biblical theology, the growth and development of religious ideas in the psalmists' minds, if, indeed, any marked growth took place. If the book is entirely post-exilic, the 'hymn-book of the second temple,' no decided theological development—except, perhaps, on the subject of the future life—would be expected. If, as we have seen reason to believe, the Psalter contains an anthology of sacred lyrics, extending over many centuries, a progress of thought might be looked for. But the method of the psalmist is not dialectic. He moves, not in the atmosphere of theology, but of religion. And whilst creeds change, litanies remain the same. It would be going too far to say that no variety, no advancement, in moral and religious ideas is discernible, but for the purposes of this brief examination it may be neglected. The Psalter is concerned with the deep, elemental ideas of religion—God, man, and the communion of man with God; joy and trouble, hope and fear, good and evil, their present conflict and future destiny; the human soul in all its moods and the Divine power and grace in all its aspects,—and it is proposed to describe a few characteristics only of the way in which these great themes are treated.

1. The leading feature in the doctrine of God—to speak theologically—which distinguishes the psalms is the clearness with which the Divine Personality is conceived, and the vividness with which it is depicted. 'J" liveth, and blessed be my Rock' is written on the book, within and without. The chief service which the psalms have rendered to the religion of the world is the preservation of the idea of the living God, without any impairing of His absolute and inconceivable glory. The thinker elaborates his abstract conceptions of the Divine till they dissolve into thin air; the boor imagines 'such a one as himself,' and lowers the Godhead into a 'magnified and non-natural' manhood. Isaac Taylor says that 'metaphysic theologies, except so far as they take up the very terms and figures of the Heb. Scriptures, have hitherto shown a properly religious aspect in proportion as they have been unintelligible; when intelligible they become—if not atheistic, yet tending in that direction.' No sacred book of any nation has solved this fundamental problem of all religion, how to preserve at the same time the Infinity and the Personality of God, as has the Psalter.

The psalmist is not afraid of 'anthropomorphisms.' He not only employs forms of speech which seem almost necessary, such as 'his eyes behold, his eyelids try, the children of men,' but he represents God as thinking upon man, so that the Divine thoughts are greater in number than the sand; as seated in the heavens with earth for His footstool, as bowing the heavens to come down, whether for judgment or deliverance; as spreading His broad wings of defence over His own people, scattering dismay and destruction among their enemies, and returning again on high in triumph, when He has 'led into captivity his captives,' bringing with Him the spoils of victory. But no reader of the psalms finds his ideas of Divine majesty lowered, or the Divine glory dimmed and shadowed, by these modes of speech. The Rabbi disdains them, the Alexandrian philosopher explains them away, the hypercritic finds only 'mythology' in them; the wise and devout man knows that nowhere else—except in the words of Jesus of Nazareth—is he brought so directly into the presence of the living God, as inexpressibly lofty and pure as He is near and gracious and tender.

The 'attributes' of God are not described in the psalms, but God in His varied attributes is made known as in the mirror of the worshipper's soul. Righteousness is pre-eminent, but it is blended with mercy, as if the pious heart had never conceived of the two asunder. 'J", thy loving-kindness reacheth unto the heavens, thy faithfulness unto the clouds. Thy righteousness standeth like the mountains of God; thy judgments are a great deep. How precious is thy loving-kindness!' (Ps 36). Loving-kindness is shown, according to the psalmist's view, by God's rendering to every man according to his work (62^{12}); yet it is an equally true explanation of the same חֶסֶד to define it as 'salvation,' or expand it into the clause 'J" hath dealt bountifully with me' (13$^{5.6}$). One of the most striking illustrations of the features upon which we have been dwelling is the attributing to the Most High God of עֲנָוָה 'humility.' The English word is a bold one to employ in this connexion, but it better expresses the psalmist's thought than 'condescension.' It is found but once, in 18^{35} 'thy lowliness hath made me great,' but the same quality is dwelt upon in God's humbling Himself to regard the heavens and the earth, and it is not far removed from that yearning 'pity' with which the Father God pities His children. The word 'sympathy' is not found in the Psalter, but that for which the word stands sheds rays across the gloom of dirge-like psalms (39 and 88), and shines like a radiant sun in the glow of such psalms as 27. 40. 103, and 146. And the marvel is that He who bends so low to lift the downcast, the degraded, and the sinner, is He whose 'kingdom ruleth over all,' and for whom the whole Psalter, as well as the 99th psalm, provides the refrain, *Holy is He.*

2. The manifestation of God in nature—to use a modern phrase—is not, properly speaking, a theme of the psalms. The nature-psalms are well known: the 8th and 19th, the 29th and 93rd, the 65th and 104th have taught mankind many lessons. But the pictures of nature come in by the way. For the psalmist, nature is not so much a revelation, as the frame of a picture which contains one. Occasionally the eye wanders to the frame and dwells upon it, but it is only in passing. The picture itself is concerned with the human soul and its relation to the living God. And if the psalms are a wonder of literature because of the unique picture of God which they present, in contrast with the highest conceptions of which man thus far had shown himself capable, no less remarkable is their portraiture of man. The Heb. psalmist might seem to be a child by the side of the Hindu sage and the Greek philosopher, but neither of these could sound the human heart as he has done. The complexities, the inconsistencies, the paradoxical contradictions which characterize human life are all here. 'What is man that thou art mindful of him, or the son of man that thou visitest him?' The littleness and the greatness of man are there, in a line; discerned, almost unconsciously to himself, by the poet, because his eye was fixed, not on man but on God. The first and last verses of the 8th psalm give the keynote to its music, and that of the whole Psalter, and man falls into his place, so small in himself, so great in his relation to God. 'Nothing is more easy than to take a high view of human nature, *alone*, or a low view, *alone*; there are facts and appearances in abundance to account for and justify either. But the view of the Psalms combines them; man's littleness and insignificance, in relation to the immense universe about him, and to its infinite and everlasting God; man's littleness in his relation to time, to his own short passage between its vast before and after, his feebleness, his misery, his sin: on the other side, man's greatness, as the consummate work of God's hands, thought worthy of His care, His choice, His provident and watchful regard; man's greatness and responsibility, as capable of knowing God and loving Him, of winning His blessing and perishing under His judgment; man's greatness even as a sinner able to sink so low, and yet to rise by repentance out of the deepest degradation and most hopeless ruin' (R. W. Church).

3. There may at first sight appear to be an inconsistency between the language of various psalms on the subject of sin. The deepest contrition is portrayed in the 32nd and 51st; the utmost confidence, sounding perilously like self-righteousness, in the 7th, 18th, and 101st. It may be thought that here is a mark of varying date, Israel's sense of sin deepening as history advanced; or that the contrast is between the language of men of different temperaments, or the same man in different moods. But the inconsistency is only apparent. The assertion of integrity is relative, not absolute. It is that of the *ḥasid*, the 'godly' man, who is determined to keep well within the bounds of the covenant which is the charter of national religion, or is conscious of having done so. The same man may bow low in humility before God and confess

his sins; just as the nation—for in the opinion of many the 'church-nation' is the speaker in the 'I' of the psalms—may at one moment plead the sacredness of the bond which binds it to J″, and at another deplore its own unfaithfulness to covenant-vows.

That the ethical view of the psalmist was limited is unquestionable; he was the child of his own age. Ethics was as yet too little personal, and the individual sense of wrong-doing was, for the most part, neither deep nor poignant. The life of the community—for better, for worse—was more important; and it is no easy matter sometimes to distinguish between the passages in which the psalmist speaks in his own name and those in which his personality is merged in the national life. The tendency of modern criticism is to minimize the personal element in the Psalms (see Smend, 'Ueber das Ich der Psalmen' in *ZATW*, 1888, pp. 49–147; and Cheyne, who says in *Origin of Ps.* p. 265: 'In the psalmists, as such, the individual consciousness was all but lost in the corporate—the Psalter is a monument of church-consciousness'; and notes, pp. 276, 277). It is not necessary to recoil to the other extreme in reaction against the excessive individualism of some schools of interpreters. There are psalms in which the personal note is unquestionable (3. 4. 6. 18. 27, etc.). Others, again, are as clearly national (44. 46. 76); whilst in others the references to trouble or to joy may be such that they might apply equally well to personal or to national experience (31. 86. 118); or the psalm written by an individual for himself might be used in worship by the community. Eminent modern critics (W. R. Smith, Driver, Cheyne) are content to understand the 51st psalm 'as a prayer for the restoration and sanctification of Israel in the mouth of a prophet of the Exile.' But such a view not merely runs counter to traditional exegesis, but appears to many, including the present writer, to fail to do justice to the language of such a psalm. Deep sense of sin and contrition on account of it, though not very frequently expressed in the psalms, forms an essential part of the religious life therein depicted. Some of the 'penitential' psalms, so-called, may refer to trouble rather than transgression, but the psalmist's religion cannot be understood if it be resolved into a sense of national humiliation and distress.

4. This is confirmed by the closeness of personal communion with God, which is the characteristic privilege of the devout soul in these poems, and the means by which that fellowship is to be restored, when it has been lost or impaired. The joy is spiritual when the avenue of communion is open; the sorrow is spiritual when that avenue is closed and darkened; the means by which the soul may meet again with its God are spiritual also. The Israelite is a member of a community in which sacrifice is a recognized institution; he does not disparage it, but if he has learned the lessons it has to teach, he knows that alone it is not sufficient. The well-known expressions of the 40th, the 50th, the 51st psalms—'Thou desirest not sacrifice, else would I give it'; 'Would I eat the flesh of bulls or drink the blood of goats?'—do not stand alone. There is no inconsistency between these psalms and 'I will go into thy house with burnt-offerings, I will offer bullocks with goats,' in the 66th. The 51st psalm, as it now stands, contains a recognition of ceremonial sacrifices in vv.$^{19.20}$, and even if these are not by the same author as v.^{17}, 'the sacrifices of God are a broken spirit,' the same temple-congregation could chant both alike without thought of contradiction. But the spiritual note is the deeper and the more characteristic. The psalmist has learned in the school of the prophet rather than of the priest, his plea is God's mercy, his hope for that sense of personal intercourse which can be enjoyed only when Divine forgiveness has removed the sense of personal sin. The heaviness and pain before confession ($32^{3.4}$ 40^{12}) is as deep as his assurance of the readiness of God to forgive is complete and his joy when forgiven rapturous ($40^{2.3}$ $103^{8\text{-}13}$). The 130th is not the only 'Pauline' psalm, and if its language and that of other psalms expresses the contrition of a community, it can only be said that the mourners for sin of all ages, in the most spiritual religion the world has ever known, have found no language more appropriate to express their penitential sorrow and the rapturous joy of forgiveness than is to be found in the psalms.

5. Another characteristic of the 'lower level of morality' which is said to mark the psalms is found in the particularism which belongs to many of them. The national confidence in J″ has a reverse side which is not always admirable. The tone which the psalmists, like the prophets, adopt towards other nations than Israel, varies. Sometimes they are simply marked out for judgment and punishment (Ps 2. 9. 68). Sometimes, though more rarely, they are represented as in some sense gathered in within the pale now occupied by Israel alone (Ps 22. 67. 87). Sometimes bitter resentment is expressed which sounds personal rather than national—the expression of fierce joy over the destruction of hated enemies, rather than the grave anticipation of righteous judgment upon evil. The *Imprecatory* psalms are better understood than they once were. Those who read into them a coarse vindictiveness are now seen to be no less wide of the mark than those who in a mistaken zeal contended that all the utterances of godly men in an inspired Bible must be justifiable by the highest standard. But the solution of a moral difficulty is not found in a timid compromise between extremes. The strong language of Ps 7. 35. 69. 109 and some others is not to be blamed as an exhibition of a personally revengeful spirit. The law condemns this as well as the gospel; and in the psalm which contains the strongest language, the writer disclaims such culpable resentment ($109^{4.5}$). The psalmist, as a member of a covenant-keeping community, was at liberty to identify himself with the friends of God and to count those who opposed him as God's enemies also ($139^{21.22}$). Not always does he specify the ground of his anger and prayers for their destruction, as in Ps 83, 'Against thee do they make a covenant . . . O my God, make them like whirling dust, as stubble before the wind'; but it is legitimate, in at least the majority of passages, to read in that thought when unexpressed. The psalmist would be simply unable to take the purely individualistic standpoint of modern times, which makes language such as we find in the 35th psalm for us unnatural and wrong.

It does not therefore follow that the spirit of the imprecatory psalms is justifiable by the standard of the NT. It may indeed be well to consider whether the OT saints, in the vigour and simplicity of their piety, did not cherish a righteous resentment against evil which the more facile and languid moral sense of later generations would have done well to preserve. 'O ye that love J″, hate evil,' is an exhortation that belongs, not to one age, but to all time. But the point in question is the relation, not to evil deeds, but to evil men. And here it must be clearly recognized that the moral level of the old dispensation is necessarily lower than that of the new. The Christian does not stand in relation to the world as the Jew did to the nations around him. The blessings of the New Covenant are not material as were many of the blessings promised under the Old; and the curses which are pronounced on those who refuse to inherit a blessing differ correspondingly. The prospect of a future life—to take one point only—alters the whole question of retribution and destiny. Without any spirit of Pharisaism or consciousness of superior virtue—which would be grossly out of place—the Christian cannot use the language of the imprecatory psalms as it stands, but interprets it in its spirit by reserving his wrath for the evil in himself and others, and striving to blend with it something of his Saviour's yearning compassion for the evil-doer.

6. The problems of life opened up by the question of evil do not figure largely in the psalms. The suffering of the righteous, the apparent impunity of the wicked, do not often disturb the psalmist's mind. The moods expressed are those of thankfulness for mercies bestowed, sorrow in trouble, present or impending, prayer for deliverance, help, and guidance, not the anxiety of doubt or the half-bitter, half-eager cry of the seeker after truth who would believe, but cannot. The spiritual wrestlings of Job and the incredulous scepticism of Koheleth in his darker hours hardly find any echo in the Psalter. The psalmist's mental exercises are described as mere transient moods, trying enough while they lasted, but not seriously affecting the foundations of his faith. The 73rd and the 77th psalms are the chief examples of this. The 38th, 88th, and other sorrowful psalms describe trouble of outward life and of inward spirit, but not such as arises from intellectual doubt or the undermining of faith in God. It is interesting to notice the way in which relief comes, when the question has once been raised as to whether the ways of Providence are equal and success precisely proportioned to character. In the 77th psalm the righteous man, who appeared to be forgotten and forsaken by God, falls back upon history, and recalls the deliverances wrought out for God's chosen people in the past. He rebukes, therefore, himself for his 'infirmity,' and renews his confidence in the 'right hand of the Most High.' Here there is no examination of the 'problem' at all as such; the theory that God rewards the righteous and punishes the wicked, which is so fiercely assailed in Job, is never questioned here. The writer of the 73rd psalm goes deeper. His perplexity arises rather from the prosperity of the wicked than the suffering of the righteous, but the problem in both cases is the same. His conclusion is emphatically announced at the beginning. 'Surely (אַךְ), God *is* good to Israel and to men of clean heart.' The mode of deliverance is described in vv.$^{15-17}$. In the sanctuary light came. But it came chiefly in the form of an emphatic re-statement of the prevailing theory of Providence. The wicked will be punished, all the more overwhelmingly because of delay in judgment. This psalmist holds with the writer of Ps 92 that only the dull and foolish fail to understand that if the workers of iniquity flourish, it is that they shall be destroyed for ever.

Another kind of solution may seem to be suggested by vv.$^{23-26}$. The psalmist finds his own portion in the presence and favour of God, and this is so strongly expressed that it might seem as if he had attained, by a sublime reach of faith, the doctrine of immortality. A similar conclusion is suggested by Ps 16, in which the same line of thought and religious experience is followed. Ps 17^{15} and 49^{15} are also held to express in briefer phrase the expectation that the righteous will enjoy life in the presence of God beyond the grave. It is certain that this was not the prevailing view of the writers of the psalms. The whole cast of these devout utterances would have been altered if any such expectation had formed a part of their working creed. The strain of the 6th, 30th, 39th, and 88th psalms is not the language of a passing mood. 'In death there is no remembrance of thee; in Sheol who shall give thee thanks?' The 'dust' cannot praise God; in the 'grave,' in 'darkness,' in 'Abaddon,' in the 'land of forgetfulness,' God cannot be praised, because He cannot be known by 'shades,' men who have passed away from the happy light of life. The evidence of silence is equally strong, though not so readily noticed. A blank is found in the creed of the psalmists, as of the OT writers generally, when life beyond the grave is in question. The exceptions in the psalms above referred to do not invalidate the rule. Translated with severe accuracy and closely restricted to their exact declarations, the passages 73^{23} 17^{15} and 49^{15} do not prove any clear anticipation of a future life. It may be otherwise with 16^{9-11}, but the more satisfactory way of treating all these passages is to consider them together. Thus handled, they show us the path by which the faithful servant of God was travelling upwards from amidst the twilight of a dispensation in which was no clear revelation of a future life. He could not believe that the pit of corruption or the shadowy half-existence of Sheol was to be the end of all for the friend of God. One who had set J″ always before him, and desired none in heaven or earth in comparison with his God, could not be left in darkness and forgetfulness, it must be that he should behold God's face in righteousness and be satisfied with His likeness. One who had God for his portion must have Him for ever. God was *his* God, and the psalmist anticipated the reasoning of the Saviour, 'He is not the God of the dead, but of the living.' Nevertheless, this was but a reach of faith. No revelation had been given, no doctrine could be taught, no complete assurance could be enjoyed. The hope was a bright, reassuring and not deceptive gleam of sunshine. But it was a gleam only. It was enjoyed for a moment and the clouds gathered in again. Not the clouds of denial or despair, but the impenetrable veil of vapour which hid from the saints of the Old Covenant God's will concerning the future. It does not follow that the psalmist's religion is of a low and feeble type because this element in it is for the most part missing. Its vigour is shown in the tenacity of his faith without the 'comfortable assurance' of later days. The Christian, for whom 'the resurrection of the dead and the life of the world to come' is an essential article of creed, may find a fuller meaning in the words of the psalmist than he himself dared to find in them, and wonder the more that he who knew so little believed so much and conquered in so hard a battle upon comparatively slender fare.

7. The hopes of the psalmists, like those of the prophets, were directed, not to a future life of the individual in heaven, but to the future of the community on earth. The subject of Messianic psalms can be adequately treated only in connexion with Messianic prophecy, of which they form a part. See under the articles MESSIAH and PROPHECY. The principles which should determine views of prophecy in general are here concerned, and they are better studied on the more extended field and in the more explicit utterances of the prophetical books. The psalms which have usually been termed (in a somewhat conventional sense) 'Messianic' are 2. 8. 16. 45. 72. 89, and 110. The list may vary slightly, but when it is examined it is inevitable that the questions should arise, Why include precisely these and no others? And what is meant by the term Messianic? For if mention of a personal king ruling on earth is essential, all these psalms cannot claim the title;

and if a larger sense of the term be intended, others have as good a right to be found in the list.

The older exegesis, which made the language of the Psalter generally, and of some psalms in particular, to be the language of Christ Himself, has for some time been discredited. Delitzsch, who may be taken to represent modern 'orthodox' scholarship, finds only one psalm, the 110th, directly Messianic in the sense that it contains prophecy immediately pointing to the person of a coming Anointed One, who was fully to set up God's kingdom on earth. All other references, as in the 2nd, 45th, and 72nd psalms, he understands primarily of Isr. monarchs, so that the words contain prophecy only in an indirect or typical sense. The tendency of criticism is to deny even this smaller measure of Messianic reference. 'All these psalms,' says Cheyne, referring chiefly to 2. 72, and 110, and in a lesser degree to some others, 'are only Messianic in a sense which is psychologically justifiable. They are, as I have shown, neither typically nor in the ordinary sense prophetically Messianic.' The 2nd and 110th psalms may claim the designation in the sense that 'the idealization of historical persons which they present presupposes the belief in an ideal Messianic monarchy, now or at some later time to be granted to Israel' (*Origin of Ps.* pp. 339, 340). That is, type and prophecy are alike excluded from the Psalter. The psalmists disregarded history, preferring to 'idealize'; their David is not the true David, their Moses is not the true Moses; and they had no right to find in the monarchs of their own time a type and pledge of future glory, and no power directly to prophesy concerning it. If this be so, the term 'Messianic' is hardly worth retaining, and its employment is likely to mislead.

Perhaps we may see in these views another instance of extreme reaction against a mistaken exegesis. The time when Ps 45[6] could be quoted as proof direct of the divinity of Christ has gone by. The hopes and prayers of Ps 72 are understood as hopes and prayers in which no direct vision of a King or Messiah was before the mind of the singer. It is even doubted by some of the most truly Christian interpreters whether 'the oracle of J″ unto my lord' in Ps 110[1] can mean that the speaker was the theocratic king, and his 'lord' a greater King yet to come. The 'Son' in Ps 2[12], if indeed that word occur at all in the obscure phrase נַשְּׁקוּ־בַר (see art. KISS), is no longer understood as the Son of God incarnate, and the 'Son' who is unquestionably mentioned in v.[7] is not supposed to be Jesus of Nazareth. But it by no means follows that no psalms are either prophetically or typically Messianic. The exegesis which finds in Ps 45 an epithalamium for some monarch unknown, is bound to confess that here is no ordinary wedding-song, and that the writer of it had thoughts which soared not only far above the occasion, but far above those of most of his contemporaries. The beneficent prince of Ps 72 is not a Jehoshaphat or a Jeroboam with a halo round his head, unwarrantably placed there by a court-poet in a dream. In whatever way the details of Ps 110 be understood, the priest-king of no Aaronic type, who was to gather around him an army of youths, clad not in mail but in holy festal apparel, multitudinous and brilliant as the dewdrops born from the womb of the morning, is not a phantom of imagination, suggested by the idealization of Simon the Maccabee. But is it possible at the same time to preserve the limits of sober exegesis and to believe in the prophetic message of the Psalms? The evangelists and apostles held a view of the Psalter, which they so often quoted, that cannot be defended if neither by way of prophecy nor of type is Christ contemplated in the Psalms at all.

A method of solving the difficulty is sometimes described as the theory of 'the double sense,' a phrase which seems to imply that the obvious meaning of the words as read refers to contemporary persons and events, whilst some deep-lying, mystical significance lies behind this, in which reference is made to Christ and the New Covenant. Now words can have but one meaning, though they may have not only a twofold but a manifold application. And it is not by a mystical sleight-of-hand, unintelligible to the plain reader, that a Messianic significance is to be found in the psalms. The first duty of the interpreter is to find the simple meaning of the words as they stand, as they were intended by the psalmist, and would be understood by his contemporaries. But the reason why this is not the end, as it is the beginning of exegesis of the psalms, is that the dispensation under which they were written did not stand alone, it was part of an organism, and the writers knew it. The Old Covenant proclaimed its own insufficiency, and pointed continually onwards. Consequently, when inspired writers handled certain themes, they did so in a way that would have been unintelligible but for this underlying consciousness. And often, when they were not themselves consciously glancing forwards, subsequent events shed a richer light upon their words, and enabled those who came after to make a much more complete and significant application of the words which they had spoken. When the glance of the psalmist fell directly upon the future culmination of the kingdom of God upon earth, his words are prophetically Messianic; when he was chiefly concerned with the present, but as part of an organism not yet completed, his words may be styled indirectly or typically Messianic. If the statement of Schultz be admitted, 'There is positively not one NT idea that cannot be shown to be a healthy and natural product of some OT germ, nor any truly OT idea which did not instinctively press towards its NT fulfilment' (*Old Test. Theol.* vol. i. p. 52, Eng. tr.)—a position which not many will care to dispute—the principles just laid down do but declare that in a growing plant the relation of the parts to the whole is best discerned in the maturity, not in the infancy of the growth. The seed is the prophecy of the plant, stem and buds and flowers, to those who know its nature. And the ἵνα πληρωθῇ of NT means that the earlier stage existed in order that the later might reach its ripe and full-orbed development.

The question whether certain psalms are rather to be considered directly or indirectly Messianic is one for the exegete. It may, however, be admitted that the number of direct prophecies is, at most, very small, and it may well be that the Psalter contains hardly a single instance. For, though psalmists and prophets had much in common, there were important differences between them. The very attitude of the psalmist makes it unlikely that he will look directly into the future. The 2nd and 110th psalms are those which partake most of this character, and the 2nd psalm in almost any case, the 110th if the theocratic king is not the speaker but the person addressed, can be most easily understood as only typically Messianic. But the monarch of Israel was a real type, and could seldom or never be considered as the psalmist considered him, without reference to the substance of which he was but the shadow. Take the idea of 'sonship,' for example. The promise was made in 2 S 7 that the king should be a 'son' of God: which of them came near to realizing this? And the inspired bard of the Old Covenant uses words concerning the filial character and promised triumphs of the chosen nation with their king at their head, which were never actually accomplished till He who was Son indeed was declared to be such by the resurrection from the dead, when it was said to Him, 'This day have I begotten thee.' This is no mere historical parallel, for the parallel is not obvious, but it is the full development of the plant which the psalmist spoke of in its germ and early growth. And such a psalm is truly Messianic.

But the name must not be confined to psalms in which there is specific mention of a coming personal king. This particular feature of the 'age to come' is not prominent in the Psalter, as it is in the Psalms of Solomon. The Messianic ideas of the OT are many. The kingdom is often spoken of, when there is no mention of the king. The Theophany or manifestation of the glory of J" upon the earth is another form which the hope of Israel wore; and the good time coming is sometimes described as a new and better Covenant which was to take the place of the old. Sometimes this golden age of the future is described in its effect upon nature, the fields and streams and fruits of the earth; sometimes upon the nations, which either willingly or unwillingly, in submissive alliance or as conquered enemies, are to help to swell the triumph of Israel. Though in all this there may be no mention of a personal Redeemer or Ruler, such language is in a real, perhaps the best sense of the word, 'Messianic.' The psalms which tell of the coming of J" to earth in beneficent judgment (96–98) are most truly a part of the Messianic prophecy. Christ Himself showed how unexpected lessons might be learned regarding His Person and work from the passage Ps 118^{22}, and it is needless to adduce the frequent quotations of the 2nd, 16th, and 110th psalms which are found in the sermons and letters of the apostles. Doubtless the psalmists, like the prophets, were able but feebly to understand how their high vaticinations were to be accomplished. Often they had little idea that 'not unto themselves but unto us they did minister,' in their rapt flights of joyful hope. But not the less did they aid in throwing subtle but significant chains of spiritual connexion across from the earlier days to the later, from the Old Covenant to the New; they aided in the growth of that marvellous spiritual organism, the development of that kingdom of God, the full glory of which has not dawned upon the earth even yet: and it is not difficult for the devout Christian, with such thoughts in his mind, to be convinced that he cannot fully understand the Psalter, unless he hears the voice of one who explains 'how that all things must needs be fulfilled which are written in the law of Moses, and the prophets, and the psalms, concerning ME.'

The Psalms have sometimes been classified according to their subject-matter, but any such arrangement is open to obvious objections. The subdivisions necessarily overlap, and many psalms refuse to be classified. Hupfeld in his *Introduction* deals with this subject, and Bleek (6th ed. by Wellhausen, p. 467), also Driver, *LOT* 6 p. 368 f. The analysis might run somewhat as follows: i. Songs of Praise to Jehovah; (*a*) as God of nature, Ps 8. 19^{1-6}. 29. 65. 104; (*b*) in relation to man, as God of Providence, 103. 107. 113. 145. ii. Didactic Psalms, on the moral government of the world, etc., Ps 1. 34. 37. 49. 73. 77; and of a more directly ethical character, 15. 24^{1-6} 32. 40. 50. iii. National Psalms, including (*a*) prayers in disaster, *e.g.* 44. 60. 74. 79. 80, etc., and (*b*) thanksgivings for deliverance, *e.g.* 46. 47. 48. 66. 68. 76, etc. iv. Purely historical Psalms, 78. 81. 105. 106. 114. v. Royal Psalms, 2. 18. 20. 21. 45. 72. 101, etc. vi. The more directly personal Psalms are of very various character: sometimes (*a*) they contain prayers for forgiveness or recovery from sickness, 3. 4. 6. 7. 22; sometimes (*b*) thanksgiving predominates, as in 30. 40. 116; or (*c*) the prevailing strain is one of faith or resignation, *e.g.* 16. 23. 27. 42. 121. 139; or the law is praised, as in 1. 19^{7-14} 119, or the house of God, as in 84. 122. 132. Such a classification, however, can hardly be considered to be of use, except in a very general and superficial way.

vii. TEXT AND VERSIONS.—The Massoretic text of the OT, it is now generally admitted, stands in need of frequent emendation. From the 7th cent. A.D. onwards, the Heb. text has been preserved with scrupulous fidelity, passing at times into extreme punctiliousness. But the early origin of this text is unknown, we possess no MSS earlier than the 10th cent. of our era, and the Massoretes represent for us only one line of textual transmission. The materials, however, for textual criticism are scanty. In the case of the NT, these are so abundant that conjectural emendation has little or no place in sound criticism. In the OT beyond the Massoretic notes, the only help is to be derived from the ancient versions. Hence scholars have been driven to adopt conjectures, more or less probable, in specially difficult passages; and as the science of textual criticism is still young, no sufficiently complete consensus of opinion has been arrived at with respect to the text in these cases.

As regards the Psalms, the chief ancient version to be consulted is, as elsewhere, the LXX. The Psalter is contained in cod. ℵ, B (except Ps 105^{27}–137^{6}), and A (except 49^{19}–79^{10}). The Greek tr. of the Psalms, though not equal to that of the Pent., is at least up to the general average of the LXX. In places it is quite at fault, but not so frequently as in the Prophets, and in some passages its help is valuable. The frequent difficulty of ascertaining the original reading of the Greek itself is one of the chief drawbacks to its critical use. The Targum of the Psalms is of uncertain date, since it embodies some early tradition, but in its present form cannot date earlier than the 7th or 8th cent. A.D. The Pesh. Syriac version (2nd cent.?), though in the main agreeing with the Heb., is often of service by the support which it gives to the LXX. The later Gr. VSS, so far as extant, are not of much critical value. Jerome's version of the Psalms is rendered from the Heb., while that retained in the Vulg., a representative of the Old Lat., was translated from the Greek. Jerome's renderings are sometimes of considerable value, and shed light on the history of the text, when they do not enable us to reconstruct it. The Eng. versions may be briefly mentioned, though their history is generally familiar. The Pr. Bk. version of the Psalms is taken from the Great Bible (first ed. 1539), which was a revision of Matthew's Bible, the Psalms in which was the work of Coverdale. Coverdale's tr. was made from the Zürich Bible and the Vulg., and accordingly in it the traces are to be found of LXX readings which have made their way through the Lat. into the Pr. Bk. version. The AV of 1611, which is far more accurate, did not displace the earlier version to which congregations had become accustomed, and which is undoubtedly better fitted for melodious chanting in public worship. The RV of 1885 represents a much nearer approach to accuracy of rendering, and is invaluable as an adjunct to AV, though it has not yet displaced it. Many of the renderings approved by modern scholarship are to be found not in the text, but in the margin, since a two-thirds majority of the Revisers was necessary to effect an alteration. A very useful work has been recently (1898) published by Driver, entitled the *Parallel Psalter*, in which the Pr. Bk. version is given on one page, with a new version by Dr. Driver himself opposite. The book contains a valuable Introduction and Glossaries. The Camb. Univ. Press published in 1899 *The Book of Psalms, containing the Pr. Bk. version, the AV, and the RV, in parallel columns*. The metrical versions of the Psalms in English alone are exceedingly numerous, but neither Milton, nor Keble, nor less known poets who have attempted metrical renderings, can be said to have attained any great success.

It is beyond the scope of this article to illustrate the need of textual criticism in detail, or its probable effects. But the following are a few examples of familiar passages in which corruption is probable or has been suspected. Ps 2^{12}, where the word בַּר with the meaning 'son' is not Hebrew. None of the ancient VSS adopt this rendering, and Jerome translates '*Adorate pure.*' In Ps 8^2 the word תְּנָה can hardly be the correct reading. In 22^{16} the Heb. reads כָּאֲרִי, which means 'like a lion'; the rendering 'pierced' is a tr. of כארו; so the LXX, Vulg. and Syriac. Symm., as now appears, followed the MT. Sometimes a gloss may have crept into the text, as in 49^{14}, where the clause 'the upright shall have dominion over them in the morning' reads like a later insertion. In Ps 48^{14} עַל־מוּת is untranslatable as it stands. In 55^{19} and 77^{10} there is an abruptness in the existing text which points to a probable error. Ps 68 abounds in difficult passages, some of which may be due to textual corruption. The opening of Ps 87 is so abrupt that it is thought mutilation must have taken place, or that our psalm is only a fragment. The irregularities in some of the acrostics (*e.g.* Ps 37) are probably due not to the author, but to confusion in transcription or transmission. The present form of some of the musical notes in the titles is not improbably due to the ignorance of scribes, who blundered in the transmission of archaic and unfamiliar words.

It is not intended to assume that in all of these cases corruption has certainly occurred, or to adduce them as more than a few salient illustrations of a large and difficult subject. So long as external evidence remains as scanty as at present, the uncertainty which proverbially attends all attempts of 'subjective' criticism, proposing conjectural emendations, must be expected to continue.

viii. The LITERATURE of the subject is portentously large. Even excluding the mass of devotional commentaries and annotations, and limiting attention to exegetical and critical literature only, a detailed history of exposition would run to very great length. The following selection from the works on the Psalms, which the piety and learning of centuries have accumulated, may be of some service. A section of Delitzsch's Introduction is devoted to the subject (vol. i. p. 64, Eng. tr. by Eaton). Amongst the Fathers, the most important commentaries are those of Athanasius, Gregory of Nyssa, Ambrose, Jerome, and esp. Chrysostom and Augustine. Ignorance of Hebrew on the part of nearly all the early Fathers of the Church, and their un-critical and un-historical methods of exegesis, mar the effect of their devout and often spiritually instructive comments. In the Middle Ages, the Jewish exegetes are more important than the Christian. Amongst these may be named Rashi (11th cent.), Ibn Ezra (12th cent.), and David Kimchi (13th cent.); other later Jewish writers were used by the scholars who helped to prepare the way for the Reformation of the 16th cent. At the time of the Reformation, says Delitzsch, the rose-garden of the Psalter also began to diffuse its odour as in the renewed freshness of a May morning.' The Psalms formed the hymn-book of the Reformed Churches, and it is matter of history how largely the cause of the Reformers was advanced by the hymns of Luther and the tr. of Marot (1543) and Beza (1562). Luther's notes on some of the psalms (*Operationes*) exhibit his evangelical insight and spiritual power, but Calvin's *Commentary* (1557) is more complete as well as more sound and masterly, and may still be consulted with great advantage. In more modern times, Rosenmüller's *Scholia* (1798–1804), though only a compilation, rendered excellent service at the time of their publication, and amongst the works of the last half-century the following may be mentioned:—de Wette (1811–56); Hitzig (1863–65); Olshausen in *Kurzgef. Exeg. Handbuch* (1853); Hengstenberg (1847, 1852); Hupfeld (1855–62, 2nd ed. by Riehm, 1867–71, 3rd by Nowack, 1888); Ewald, *Dichter d. AB* (1839, 1866); Delitzsch (5th ed. 1894); Moll in Lange's *Bibelwerk* (1869–71); Reuss (2nd ed. 1899); Grätz, *Krit. Komm.* (1882); Schultz in *Strack's Komm.* (1888, 2nd ed. by Kessler, 1899); Baethgen in Nowack's *Hand-Komm.* (1892); Duhm in Marti's *Kurzer Hand-Commentar* (1899). Ewald, Delitzsch, and Moll have been translated into English. Amongst recent Eng. commentators may be mentioned Perowne (6th ed. 1866); Jennings and Lowe, *The Psalms with Critical Notes* (1884); Cheyne, *The Book of Psalms* (1888), and *The Origin of the Psalter*, Bampton Lectures (1891); De Witt (1891); Maclaren in *Expositor's Bible* (1890–92), and Kirkpatrick in *Cambr. Bible* (1893–95). The sections on the Psalms in the several Introductions to OT should not be neglected. The following may be named as representative: Wellhausen-Bleek (6th ed. 1893), Riehm (ed. Brandt, 1889), Driver (6th ed. 1897), Cornill (3rd and 4th ed. 1896); Strack (5th ed. 1898), König (1893), Wildeboer (*Litt. d. AT*, 1897). Neale and Littledale have collected in 4 vols. (1860–74) Notes from the primitive and mediæval writers; and Spurgeon in his *Treasury of David* has made a similar compilation, chiefly from the Puritans (1870–85). Other books of interest are: Fausset, *Horæ Psalmicæ* (1885); Forbes, *Structural Connexion of Psalms* (1888); Binnie, *The Psalms, their Origin, Teaching, and Use* (1886); Alexander, *Witness of Psalms to Christ*, Bampt. Lect. (3rd ed. 1890); E. G. King, *The Psalms in Three Collections*, pt. i. 1898; Cheyne, *The Christian Use of the Psalms*, 1899. Amongst separate articles besides Smend's in *ZATW*, 1888 (see above, p. 160^a), or monographs are Baethgen's in *SK*, 1880; Giesebrecht in *ZATW*, 1881; G. Beer has written on *Individual- u. Gemeindepsalmen* (1894); A. Rahlfs, *עני und ענו in den Psalmen*, 1892; Stade, 'Die messian. Hoffnung im Psalter' in *Ztschr. f. Theol. u. Kirche*, 1892, p. 369 ff.; Coblenz, *Ueber das betende Ich in den Psalmen*, 1897; B. Jacob, 'Beiträge zu einer Einl. in die Psalmen' in *ZATW*, 1896–97; Wellhausen, 'Bemerkungen zu den Psalmen' in *Skizzen u. Vorarbeiten*, vi. (1899) 163–187; W. T. Davison, *The Praises of Israel* (1893), enlarged ed. 1898.

Of critical editions of the Heb. text of the Psalms may be mentioned that in the Baer-Delitzsch series (Leipzig, 1880), and that of Wellhausen in Haupt's *SBOT* (1895; Eng. tr. of this text by Furness in *PB*). The Camb. Univ. Press has published separately, *The Psalms in Greek* from vol. iii. of Swete's *OT in Greek.*

W. T. DAVISON.

PSALMS OF SOLOMON.—This name was given at an uncertain date (certainly before the 5th, perhaps before the 2nd cent.) to a collection of 18 psalms dating from 1st cent. B.C., and extant in a Greek version of a Hebrew original.

i. NAME.—The name of Solomon is not, seemingly, attached to these psalms for any very definite reason. They themselves make no pretence to Solomonic authorship. Unless the real author's name was Solomon, which is *possible*, the most likely explanation is that it seemed a natural and obvious name to attach to a collection of psalms which was circulating anonymously. That the book owes its preservation to the selection of this name may be regarded as certain.

ii. MANUSCRIPTS.—It is preserved in eight MSS, uniformly in company with the other sapiential books (Pr, Ec, Ca, Wis, Sir). These eight MSS are —(1) R (Vatican, Gr. 336); (2) H (Copenhagen, Gr. 6); (3) M (Moscow Synod, Gr. N. 147); (4) P (Paris, Gr. 2991 A); (5) V (Vienna, Gr. Theol. 7); (6. 7) at Mt. Athos; (8) in the *Bibliotheca Casanatensis* at Rome. None of them is older than the 10th cent. It was formerly contained in the Codex Alexandrinus (A, of 5th cent.). There are no ancient versions in other languages.

iii. HISTORY.—There is no single clear Patristic quotation from the book as we have it. The Book of Baruch has a section (4^{36}–5) which is derived in large part from one of these psalms (No. 11), but naturally without acknowledgment. The Gnostic book *Pistis Sophia* and the 4th cent. Latin writer Lactantius both quote certain odes of Solomon, which were very probably an appendix to our book, of Christian origin; but the 18 Greek psalms are nowhere cited. Mention of the book occurs only in lists of apocryphal writings, and in two Byzantine writers of the 12th cent., John Zonaras and Theodore Balsamon. David Hoeschel, librarian at Augsburg, was the first modern who called attention to the book, and it was first printed after his death, in 1626, by the Jesuit de la Cerda in his *Adversaria Sacra*. There have been many editions since. The best text, for the formation of which all the known eight MSS have been used, is that of O. von Gebhardt in *Texte u. Unters.* (1895): text only. The Cambridge University Press has issued a text (1899) based upon Cod. R, with the variants of all the MSS used by Gebhardt. The fullest English edition is that of Ryle and James (1891), containing text, translation, introduction, and notes.

iv. DATE, CHARACTER, etc.—It is agreed by the large majority of modern scholars that these psalms belong to the period of Pompey's invasion of Palestine and siege of Jerusalem (B.C. 63). The second psalm describes his death in unmistakable terms.

It is also commonly agreed that the psalms were written (1) in Palestine, (2) in the Hebrew language, (3) by a Pharisee. The first of these three points is assumed on grounds of general probability, supported by the subjects of the psalms, and the fact that they seem intended for synagogal use. The second depends on a large number of linguistic peculiarities, and is demonstrated by the existence of a number of passages which can be best explained as mistranslations of a Hebrew text. In favour of the third the following reasons may be urged:—There is a strong polemic element in the psalms; many invectives are directed against a party who are called *sinners* (ἁμαρτωλοί) or *transgressors* (παράνομοι), while the party to which the psalmist belongs are the *righteous* (δίκαιοι) or *holy* (ὅσιοι). The party of the sinners is in power, and has usurped David's throne and the priesthood. The holy things are polluted, and secret enormities are prevalent. The party of the sinners is also rich and prosperous, while the *saints* are for the most part poor.

All these points are strikingly appropriate to the Hasmonæan rule in its latter days, and to the Sadducean party. On the other hand, the distinctive Pharisaic doctrines and aspirations are maintained and cherished by the psalmist. The ideal of a theocracy, the hope of a Messiah, the expectation of a retribution, and the views expressed about free will, are all of them just such as the Pharisees are known to have held.

v. CONTENTS OF THE PSALMS.—

Ps 1. Deals shortly with the sin and punishment of Jerusalem.
2. The siege of Jerusalem; the sins which led to it; the death of the besieger; the justice of God.
3. A contrast between the righteous and the sinner.
4. A description and denunciation of the 'men-pleasers' (ἀνθρωπάρεσκοι).
5. God's mercy to the righteous.
6. The fearlessness of the righteous.
7. A prayer for God's chastening.
8. The sins of Israel, and their punishment: a prayer for restoration.
9. God's justice and man's free will.
10. The blessedness of affliction.
11. The restoration of Israel. This psalm coincides largely with Baruch 5, which seems to be derived from it.
12. The deceitful tongue: its deeds and its punishment.
13. The preservation of the righteous and the destruction of the sinner.
14. God's faithfulness to the righteous; the sinner's insecurity.
15. The deliverance of the righteous; the sinner's fall.
16. Confession of sin; praise for deliverance; and prayer for future guidance.
17. The kingship of God; the overthrow of David's throne; the kingdom of the Messiah.
18. God's love to Israel; anticipations of Messiah's rule; praise of God as the Lord of the heavens. This last portion ends abruptly, and seems not connected with the rest of the psalm. It may possibly be a fragment of a 19th psalm.

The most important of these psalms are 2. 4. 8. 11. 17. 18.

vi. MESSIANIC TEACHING.—The Messiah of these psalms is figured as a king of the seed of David, who is to appear in God's good time to drive out the Romans (*Gentiles*) and Sadducees (*sinners*), to restore the dispersed tribes and renew the glories of Jerusalem and its temple, and subdue and convert the Gentiles. He will reign in holiness and justice, not by force of arms. He is anointed (χριστός) king and priest, but he is not divine.

The new features in this description are mainly two. (1) Messiah is a person. Excluding Dn 7 as of disputed interpretation, we have this point plainly stated for the first time in the literature of Palestine. The oldest portion of *Sib. Orac.*, which comes from Egypt, has a somewhat similar description of a coming king (iii. 652 ff.). (2) The epithet χριστός is here first applied to him.

We may see in this presentation of Messiah a result of the brilliant victories of the Maccabees, which had reawakened in the popular mind the hope of a Jewish monarchy. But this is only part of the truth.

A designation of Messiah which appears in these psalms, and elsewhere only in La 4²⁰ and Lk 2¹¹, is χριστὸς κύριος. A probable view of it is that, as in Lamentations, it is a faulty rendering, and should be χ. κυρίου.

The interest and importance of these psalms is very considerable. They throw much light on the aims and thoughts of the Pharisees of our Lord's time; they mark an important stage in the development of the Messianic idea; and they illustrate in very many points the diction of the NT and of the LXX.

In literary merit they do not stand very high. The longer psalms are the best; the shorter ones are like centos from the Davidic psalter. Still we gain a favourable impression of the author: while he is a strong and unsparing partisan, he is clearly also a pious and humble-minded man.

LITERATURE.—A list of editions and notices will be found in Ryle and James's edition; since the date of that, Gebhardt's as well as the Camb. text have appeared (see above), and also a pamphlet by Frankenberg (*Die Datierung der Ps. Sol.*, Giessen, 1896), and a German version by Prof. Kittel in Kautzsch's *Apokr. u. Pseudepigr. d. AT.*

M. R. JAMES.

PSALTERY.—A stringed instrument of music, described in art. MUSIC in vol. iii. p. 459ᵇ. The Gr. ψάλλειν, to harp, gave ψαλτής a harper, and ψαλτήριον a harp (used in the widest sense). The LXX uses ψαλτήριον as the tr. of five Heb. words—(1) כִּנּוֹר Gn 4²¹ (EV 'harp'), Ps 49⁴ (EV 'harp') 81² 149³ (EV 'harp'), Ezk 26¹³ (EV 'harp'); (2) נֵבֶל or נֶבֶל Neh 12²⁷, Ps 33² 57⁸ 92³ 108² 144⁹ 150³, Is 5¹² (AV 'viol,' RV 'lute'); (3) נְגִינָה Is 38²⁰ (EV 'stringed instruments'); (4) פְּסַנְתֵּרִין or פְּסַנְטֵרִין Dn 3⁵· ⁷· ¹⁰· ¹⁵; (5) תֹּף Job 21¹² (EV 'timbrel'). From ψαλτήριον was formed Lat. *psalterium*, from which (through Old Fr. *psalterie*) came Eng. 'psaltery.' The spelling in Chaucer (following the middle-Eng. pronun.) is *sautrye*, as *Milleres Tale*, 27—

> 'And al above ther lay a gay sautrye,
> On which he made a nightes melodye
> So swetely, that al the chambre rong.'

Wyclif has a variety of spelling: sautree, sautrie, sawtree, sawtrye, and psautrie are all found in the Wyclifite versions. The eccles. Lat. *psalterium* was both a psaltery and a song sung to the psaltery, and then also the book of songs or the Psalter.

J. HASTINGS.

PSALTIEL.—2 Es 5¹⁶ (RVm). See PHALTIEL.

PSYCHOLOGY.—An initial prejudice on this topic, arising out of an extravagant claim made by some writers on its behalf, has first of all to be removed. To frame a complete and independent philosophy of man from the Bible is impossible. The attempt cannot commend itself to any judicious interpreter. The psychology of the Bible is largely of a popular character, and not a scientific system. Moreover, the Bible implicitly takes for granted much that men have thought out for themselves on this theme. But the relation of the psychology to the content of revelation is very close. It is essential to the other doctrines of Scripture—its directly religious doctrines—that these be expressed in terms of such underlying thoughts on man's nature and constitution as are implied in the Bible itself. For in terms of some conception of man—some psychology more or less systematic—must all religious and theological statements be couched. But the religious teachings of the Bible have always suffered injustice when they have been forced (as is so commonly the case) to take shapes derived from systems of thought and theories of man other than those of Scripture. How constantly all through the Christian centuries Christian doctrines have been run into the mould of the prevailing philosophies, is proverbial. In the earliest age of Christian speculation Plato and Plotinus shaped almost all Bible interpretation. In the Middle Ages, Aristotle ruled the Scholastic Theology, and his sway extended down to and beyond the Reformation. Leibnitz and Descartes had their age of influence in the 17th and 18th centuries. Kant and Hegel control the forms of thinking of many cultured theologians in our own day. But when we seek to work out a Biblical Theology, when we aim at presenting the result of Scripture exegesis in our statement of revealed doctrine, we are bound to defer to the Scripture way of thinking. We can rid ourselves of the mistake which so long vitiated Theology, only by observing those ideas of Life and of the Soul which the Scripture-writers themselves assume in all their statements. To ascertain the science of human life, if it may be so called, to put together such simple psychology as underlies the writings of Scripture, cannot be an unnecessary task. Theology is not truly biblical, so long as it is controlled by non-biblical philosophy, and such control is inexcusable when it is seen that a view of human nature, available for the purpose, is native to the source from which Theology itself is derived. Two things are assumed here, without further explanation. The one is, that such materials, of this kind, as the Scriptures give, cannot form a complete or independent structure. They cannot be rightly treated except in close connexion with the proper and principal theme of the Bible. They cannot be treated abstractly or separately. They occur in the record of a revelation of Divine dealings with man for his redemption. They must be treated, therefore, in line with the history and development of these dealings. The other is, that they are on the whole uniform, that one fairly consecutive and connected system of ideas on the topic holds through the whole Bible. The proof of this will come out in the exposition. It is an OT system of thought. Even among the older apostles in the NT the same order of thought rules. Only in the case of the Pauline writings is there any marked change or advance, consistent enough, however, in its development of the original ideas.

Rothe has said * that we may appropriately speak of a 'language of the Holy Ghost.' Cremer, who quotes the remark, expounds it thus: 'The spirit of the language assumes a form adequate to the new views which the Spirit of Christ creates and works.' † Without attention to this element of progress it is impossible to read biblical psychology aright. This alone explains the transition from terms in the earlier Scriptures that are rather physical than psychical, to those in the later Scriptures that are more deeply charged with spiritual meaning. A progressive religious revelation is intimately connected with the growth of humanity, casts growing light upon the nature and prospects of man, will therefore be increasingly rich in statements and expressions bearing upon the knowledge of man himself, and especially of his inner being. It is in the latest records of such a revelation that the terms expressive of the facts and phenomena of man's nature should be correspondingly enriched, diversified, and distinguishable in their meaning. It is on this principle that in the sketch which follows so much attention is given to the Pauline anthropology.

i. The Bible account of *man's origin* first claims our attention. What strikes one is the unity and simplicity of the conception. We are warned off, by the primal passage (Gn 2^{7}), from any sharp analysis. 'The LORD God formed man of the dust of the ground, and breathed into his nostrils the breath of life; and man became a living soul.' There are two elements or factors specified from which God formed man—'dust from the ground'; 'breath of the Almighty,'—and the result is a unity. The OT has no definite, single word (unless we except גְּוִיָּה, which occurs 13 times, namely Gn 47^{18}, Jg $14^{8.9}$, 1 S $31^{10.12\,bis}$, Neh 9^{37}, Ps 110^{6}, Ezk $1^{11.23}$, Nah $3^{3\,bis}$, Dn 10^{6}; see art. BODY) for the '**body**' apart from the soul. Indeed the term '**soul**' is sometimes used for the corpse (Lv 21^{11}, Nu 6^{6} $9^{6.7.10}$ 19^{13}). In this primal passage, therefore, the expression 'man became a living soul' has a characteristic simplicity. We must not identify 'soul' here with what it means in modern speech, or even in later biblical language. In primitive Scripture usage it means not the 'immaterial rational principle' of the philosophers, but simply 'life embodied.' So that here the unity of the created product is emphatically expressed. The sufficient interpretation of the passage is that the Divine inspiration awakes the already kneaded clay into a living human being. Cf. Ezekiel's vision (ch. 37), where there is, first, the reconstruction of the animal frame—bone, sinews, flesh, skin; and only after this the 'breath' comes upon them, and they live.

Now, this account of the origin of man is fitted to exclude certain dualistic views of his nature with which the religion of revelation had to contend. 'It directly contradicts the doctrine of the pre-existence of the soul' (Schultz, *OT Theology*, ii. 252, Clark, Edin. 1892). Whether, indeed, the formation of man's frame and the inbreathing of his life be taken as successive or simultaneous moments in the process of his creation, the description is exactly fitted to exclude that priority of the soul which was necessary to the transmigration taught by Oriental religions, or, to the pre-existence theory of the Greek schools. There is here no postponement or degradation of the earthly frame in favour of the soul, as if the soul were the man, and the body were only the prison-house into which he was sent, or the husk in which for a time he was concealed. According to this account, the synthesis of two factors, alike honourable, constitutes the man.

That neither the familiar antithesis, soul and body, nor any other pair of expressions by which we commonly render the dual elements in human nature, should occur in this *locus classicus*, is a fact which helps to fix attention on the real character of the earlier OT descriptions of man. The fact is not explained merely by the absence of analysis. Rather is it characteristic of these Scriptures to assert the solidarity of man's constitution—that he is of one piece, and not composed of separate or independent parts. This assertion is essential to the theology of the Bible—to its discovery of human sin, and of Divine salvation. In a way not perceived by many believers in its doctrines, this idea of the unity of man's nature binds into consistency the Scripture account of his Creation, the story of his Fall, the character of Redemption, and all the leading features in the working out of his actual recovery, from his Regeneration to his Resurrection.

---

* *Zur Dogmatik*, p. 238 (Gotha, 1863).

† Cremer's *Wörterbuch der NT Gräcität*, Vorrede, p. 5 (Gotha, 1886).

Later Scriptures suggest a more definite and separate idea of the body. In Job 4^{19} we have בָּתֵּי־חֹמֶר 'houses of clay,' imitated perhaps in 2 Co 5^{1} *ἡ ἐπίγειος . . . οἰκία τοῦ σκήνους*; also in Dn 7^{15} 'grieved in my spirit in the midst of my body' (נִדְנֶה sheath), 2 P 1^{4} *τοῦ σκηνώματός μου*. In the OT Apocrypha the pre-existence idea is, once at least, suggested, Wis $7^{19.20}$ 'a good soul fell to my lot, and being good . . . came into a body undefiled.'* The NT uses freely the Greek duality, which has become the modern one, 'soul and body'; and though the OT 'flesh and soul' does not occur in the NT, 'body and spirit' can take its place. Then, in the progress of redemption, it at last appears that the discrepancy between the two is resolved, when the redeemed *πνεῦμα* shall put on *σῶμα πνευματικόν* (1 Co 15^{44}), 'a spiritual body,' which is by no means the same as a 'bodiless spirit' (see BODY).

ii. Let us now pass on to the biblical treatment of *sin and salvation*, and show how these affect the various elements of human nature as more specifically distinguished through them, especially the terms 'flesh,' 'soul,' and 'spirit.'

Flesh.—Besides the more obvious literal meanings of this term already discussed in a separate article, it acquires a psychological importance when we ask whether its general OT sense is morally unfavourable, and what is the origin and force of the peculiar meaning it has in St. Paul, as the principle, or a seat of the principle, of sin in man. From the first application of 'flesh' to fallen man (Gn 6^{3}) there is nothing in the OT which identifies it with the principle of evil. 'Not a single passage can be adduced wherein *bāsār* is used to denote man's sensuous nature as the seat of an opposition against his spirit and of a bias towards sin' (Müller, *Christian Doct. of Sin*, i. 323). It is true that 'flesh' is used for human kind in contrast to higher beings and to God (*e.g.* Gn 6^{3}, Ps 78^{39}), and, so used, brings out his frailty and finitude. It is true also that 'flesh' as a constituent of human nature means the perishable, animal, sensuous, and even sensual element of it (*e.g.* Ec 5^{6}, Is 40^{6}); but which of these ideas is prominent in any passage must be learned from its connexion and context. It is further true that in its meaning of 'natural kinship' there is often an implied contrast with something better—'Israel after the flesh' (1 Co 10^{18}). But the conclusive proof that nothing of moral depreciation is necessarily implied in this use of 'flesh,' is its application to Christ as designating His human in contrast with His Divine nature. 'The word was made flesh' (*ὁ λόγος σὰρξ ἐγένετο*, Jn 1^{14}). 'Who was manifest in the flesh, justified in the spirit' (1 Ti 3^{16}); 'made of the seed of David according to the flesh, declared to be the Son of God with power, according to the spirit' (Ro $1^{3f.}$). But in the Pauline Epistles a specific meaning of the term emerges. In certain well-known passages it denotes the principle which resists the Divine law, as contrasted with the 'mind' consenting to the law that it is good, and which, even in the regenerate, makes war against 'the spirit.' Here we have a very marked ethical significance given to the term 'flesh.' Nor is it the only term of its kind used to denominate the evil principle in man's nature as now under sin. 'The old man,' 'the body of sin,' 'the body of the flesh,' 'the law in the members,' 'our members which are upon earth,' are kindred expressions, more or less closely denoting the same thing, although 'the flesh,' in its counterpoise to 'the mind' and to 'the spirit' respectively, is the leading expression (Ro 7^{23} 8^{6}, Gal 5^{17}).

How is it, then, that this term 'flesh,' properly denoting the lower, corporeal or physical element in human nature, should come to denote the being of sin in that nature? Is it because this physical element is the main seat, or the original source of evil in man? But, according to St. Paul, it is not in the physical alone that sin has its seat. There are sinful desires of the mind as well as of the flesh (Eph 2^{3}). There is defilement of 'the spirit' (2 Co 7^{1}). There are works called 'of the flesh' which have nothing to do with sensuality, *e.g.* hatreds, variance, emulation, wraths, factions, divisions, heresies (Gal 5^{20}, 1 Co $3^{1.3}$). The apostle calls by the name of 'fleshly wisdom' what was evidently speculative tendency derived from the Greek schools (2 Co 1^{12}). There were heretics at Colossæ whose ruling impulse he calls their 'fleshly mind,' though they were extreme ascetics, attached to some form of Gnosticism (Col $2^{18.21.22.23}$).

It might indeed be maintained that if we assume the physical nature in man to be the source of evil in him, it would be easy to explain how the whole man under that influence should be called 'the flesh' or 'the body of sin.' But this assumption will not tally with the treatment of man's bodily nature in these writings. Any view implying the inherent evil of matter is radically opposed to the whole Bible philosophy. It is as opposed to the Scripture account of its beginning in the race, as it is to our experience of its first outbreak in the individual. In Genesis the first sin is represented as the consequence of a primary rebellion against God. The earliest manifestations of evil in children are selfishness, anger, and self-will. Again, that the corporeal nature is necessarily at strife with the spiritual, is a view which cannot be reconciled with the claims made upon 'the body' in the Christian system. Throughout St. Paul's Epistles, Christians are enjoined 'to yield their members instruments of righteousness unto God' (Ro 6^{13}), to 'present their bodies a living sacrifice' (Ro 12^{1}), to regard their bodies as 'members of Christ,' and as 'the temple of the Holy Ghost' (1 Co $6^{15.19}$); that the body is for the Lord, and the Lord for the body (1 Co 6^{13}). Still more impossible is it to reconcile with such a view the Christian revelation concerning the future of the redeemed, and the consummation of redemption. If sin were the inevitable outcome of man's possession of a body, redemption ought to culminate in his deliverance from the body, instead of in its change and restoration to a higher form (Ph 3^{21}). To say that the matter of the body is, or contains, the principle of sin, and then to say, as St. Paul does (Ro 8^{11}), that the last result of the Redeemer's Spirit indwelling in us shall be to quicken these mortal bodies, would be flat self-contradiction. But the view which connects sin with the material body is neither Hebrew nor Christian. It is essentially alien to the whole spirit of revelation. No doubt, at a very early period in Christian history, chiefly through the influence of the Greek and some of the Latin Fathers, it obtained such hold of Christian thought that it continues to colour popular modes of conception and speech to the present day. One of the most obvious examples is that men imagine they are uttering a scriptural sentiment when they speak of welcoming death as the liberation of the soul from the body. Yet the idea of St. Paul is exactly the reverse, when he declares that even the redeemed, who have the first-fruits of the Spirit, groan within themselves waiting for the adoption, *i.e.* for the redemption of their body (Ro 8^{23}). Two additional reasons why the apostle cannot be held as tracing man's evil to the corporeal element, may be summed up in the words of Julius Müller: 'He denies the presence of evil in Christ who was partaker of our fleshly nature, and he recognizes its presence in spirits, who are not partakers thereof. Is it not, therefore, in the highest degree probable that, according to him, evil does not necessarily pertain to man's sensuous nature, that *sarx* denotes something different from this?' (*l.c.* i. 321).

---

* Compare *ib.* 9^{15} *φθαρτὸν γὰρ σῶμα βαρύνει ψυχήν.*

Taking, then, the two meanings of the term 'flesh,' we note how impossible it is, in a way of mere ratiocination, to develop the one out of the other. The attempt to get the ethical significance which St. Paul gives to it out of the elementary Hebrew conception of the perishable or earthly part of man, signally fails. It leaves out the clearly biblical account of the change in human nature caused by the Fall. It is quite inadequate to explain how selfishness, wrath, pride, and other non-fleshly sins, bear prominently the name 'works of the flesh.' To assert, for instance, that *sarx* from its primary meaning, 'living material of the body,' came by a natural process of thought and language to mean 'the principle of sin,' is to assume human nature to be subject to sin by its physical constitution—a view wholly untenable, because at variance with the most radical conception of the Bible from its earliest to its latest writings.

Yet there must be some connexion between the two ideas. Otherwise we fall into mere tautology, and obtain the profound conclusion that 'the flesh' is sinful human nature. If 'the flesh' be nothing else than just this condition of human nature which is to be explained, then the whole of St. Paul's subtle and acute deduction would be 'nothing but the most wretched argument in a circle' (Pfleiderer). Now, it is quite certain the apostle means to posit a principle of sin in man, 'the sin that dwelleth in me,' 'the law in my members.' It is further clear that the law or principle of sin is one thing, and that the flesh, or native constitution of man in which it inheres, is another. It is certain that the sacred writer as little develops the principle of sin out of the mere physical flesh, as he identifies the one with the other. It is impossible to deny a very pointed reference to the lower element of human nature in this important key-word of the Pauline theology. But what misleads is the supposition that the lower and higher elements in man were conceived of by St. Paul as they were by the Greeks or are by ourselves; that the antithesis, material and immaterial, is at the basis of the distinction. So long as this idea prevails, it will be impossible to get rid of the suspicion that in 'the flesh' of the Pauline Epistles we have something which connects sin essentially with the material element in man's constitution. Let us get rid of this idea. Substitute for it the proper biblical antithesis,—earthly and heavenly, natural and supernatural, that 'flesh' is what nature evolves (this term being understood, of course, in a theistic sense), 'spirit' what God in His grace bestows,—then we can see how the idea of 'flesh,' even when ethically intensified to the utmost, is appreciably distinct from the notion of evil necessarily resident in matter. The great saying of our Lord in Jn 3^6 is probably the source of apostolic doctrine on the point: 'That which is born of the flesh is flesh.' 'Flesh' has become the proper designation of the race as self-evolved and self-continued. Human nature as now constituted can produce nothing but its like, and that like is now sinful. 'Flesh,' therefore, may be appropriately used for the principle of corrupt nature in the individual, for the obvious reason that it is in the course of the flesh, or, of the ordinary production of human nature, that the evil principle invariably originates. Thus the phrase is some explanation of the condition of man's nature, which it describes. It is no objection to this view, but rather a confirmation of its correctness, that it grounds the Pauline use of *sarx* on the underlying doctrine of hereditary corruption. 'Flesh' is that through which man in his natural state is descended from a sinful race and inherits a sinful nature, and the term is used to denote that nature. On the other hand, 'spirit' is that through which and in which God implants the new Divine life of holiness, and the term therefore is used to denote that life. See FLESH.

Soul and Spirit.—Let us now direct our attention to what is usually considered the *crux* of our topic, and which, from the exaggerated use made of it by some writers, has led others to explode or reject biblical psychology altogether. The question raised is whether the Scripture makes a tenable and consistent distinction between *soul* and *spirit*. This is the real question which underlies that of the so-called trichotomy of the Bible Does the Bible conceive of human nature as threefold, as made up of body, soul, and spirit? The only relevant question is the one above stated. In what sense and to what extent does the Bible recognize a distinction between *soul* and *spirit*? A large number, probably a majority, of exegetes have been in the habit of concluding that there is no real distinction, that the terms are synonymous, or at least interchangeable, and that nothing can be asserted beyond a shadowy, poetic distinction which enables the sacred writers to employ them in parallelism. But when we face the facts we are forced to a different conclusion. In the Pauline Epistles it is undoubted that a real distinction is asserted. The natural or unconverted man is said to be *soulish*, the renewed man *spiritual* (*ψυχικός, πνευματικός*, 1 Co $2^{14.15}$; cf. Jude^{19} *ψυχικοί, πνεῦμα μὴ ἔχοντες*). Again, St. Paul asserts that the body which all men carry to the grave is *soulish*, but the body of the resurrection is *spiritual* (*ψυχικόν, πνευματικόν*, 1 Co 15^{44}); that the first man was made a living *soul*, the last Adam a quickening *spirit* (v.^{45}). The distinction of the adjectives is repeated in v.^{46}.

Now, a fact of this sort emerging in such decisive and culminating passages of St. Paul's writings compels us to reconsider the usage. If we adhere rigidly to the conventional idea that there is no real distinction in the terms 'soul' and 'spirit' beyond that of parallelism, we must go on to hold St. Paul to have introduced, in important passages of his writings, an arbitrary and baseless antithesis. For this we are certainly not prepared, and are thrown back upon the conclusion, which has great and growing probability in its favour, that from OT usage there was real distinction latent in the employment by biblical writers of the terms *soul* and *spirit*, which distinction was recognized and emphasized in these leading passages of St. Paul. What the distinction is, it may not be easy to determine with precision. Precision is perhaps not present in the case at all. But there can remain little doubt in the mind of a careful reader of Scripture that a distinction makes itself felt from the first and throughout. Even in the relation of both terms to physical life the distinction is felt. To this both *pneuma* and *psyche*, like *rûaḥ* and *nephesh*, of which they are the Greek equivalents, originally belong. *Nephesh* is the subject or bearer of life, *rûaḥ* is the principle of life; so that in all OT references to the origin of living beings we can distinguish *nephesh* as life constituted in the creature, from *rûaḥ* as life bestowed by the Creator.

No doubt, the 'life' indicated by these terms is that of man and the lower animals alike. A 'living soul' is a living creature in general, or an animated being. It is used in Gn $1^{20.30}$ in a wide sense of creatures that have life, and the same expression is used in Gn 2^7 to denote the result, even in man, of the Divine creative breath. So, also, *rûaḥ* and its kindred term *nĕshāmāh* are used for the principle of life, in man and brute alike. It is the '*nĕshāmāh* of life' that makes man a living soul (*l.c.*). It is the '*rûaḥ* of life' that animates all creatures threatened by the Flood (6^{17}), and all those which entered into the ark (7^{15}). It is the *nishmath-rûaḥ* of life those had which perished in the waters (7^{22}). These passages prove that no distinction is made between the life-principle in animals generally and in man.

But, what is of more importance, they call attention to a usage which is practically uniform of putting 'spirit' (*rûaḥ* or *nĕshāmāh*) for the animating principle, and 'soul' or 'living soul' (*nephesh ḥayyah*) for the animated result. This primary distinction of the two terms, when applied to physical life, has passed over from the Hebrew of the OT to their Greek equivalents in the NT, and suggests a reason for their respective employment, even when the meaning goes beyond the merely physical. If *psyche* thus means the entire being as a constituted life, we can see why it is used in such a connexion as that of Jn 10^{11} 'He giveth his life for the sheep' (*psyche*, not *zōē*, nor *pneuma*). If *pneuma* is the life-principle, we see the propriety of its use in Jn 19^{30} 'He gave up the ghost' (*pneuma*). When we pass from this primary application of the two terms to a higher, in which they refer not to physical life alone, but also to the life of the mind, both terms denote almost indifferently the inner nature. For this purpose they are used throughout the OT and generally even in the NT with no sharp distinction, but freely interchanged and combined. As, for instance, when each is used alone, 'Why is thy spirit so sad?' 'Why art thou cast down, my soul?' (1 K 21^{5}, Ps 42^{11}); 'Jesus was troubled in spirit'; 'My soul is exceeding sorrowful' (Jn 13^{21}, Mt 26^{38}); 'To destroy both soul (*psyche*) and body'; 'The body without the spirit (*pneuma*) is dead' (Mt 10^{28}, Ja 2^{26}). Or, again, when the two terms occur together, in the manner of other terms of Hebrew poetry, 'With my soul (*nephesh*) have I desired thee in the night; yea, with my spirit (*rûaḥ*) within me will I seek thee early' (Is 26^{9}); 'My soul (*psyche*) doth magnify the Lord, and my spirit (*pneuma*) hath rejoiced in God my Saviour' (Lk $1^{46.\,47}$); 'Stand fast in one spirit (*pneuma*), with one soul (*psyche*) striving for the faith of the gospel' (Ph 1^{27} RV). These last quoted passages prove it quite impossible to hold that 'spirit' can mean exclusively or mainly the Godward side of man's inner nature, and 'soul' the rational or earthward. The terms are parallel, or practically equivalent expressions for the inner life as contrasted with the outer or bodily life. The whole usage makes for the ordinary bipartite view of human nature, and not at all for any tripartite theory. No doubt, however, the underlying distinction found in the primary or physical application of the terms gives propriety to their usage all through; and, when firmly grasped, prepares us to understand the expanded meaning which they receive in the later Scriptures.

All through Scripture 'spirit' denotes life as coming from God, 'soul' denotes life as constituted in the man. Consequently, when the individual life is to be made emphatic, 'soul' is used. 'Souls' in Scripture freely denotes persons. My 'soul' is the Ego, the self, and when used like 'heart' for the inner man, and even for the feelings, has reference always to special individuality. On the other hand, 'spirit'—seldom or never used to denote the individual human being in this life—is primarily that imparted power by which the individual lives. It fitly denotes, therefore, when used as a psychological term, the innermost of the inner life, the higher aspect of the self or personality. Thus the two terms are used, over the breadth of Scripture, as parallel expressions for the inner life. The inner nature is 'soul' according to its special individual life; it is 'spirit' according to the life-power whence it derives its special character. The double phrase 'soul and spirit' presents the man in two aspects as his life is viewed from two different points.

So much for the use of the two words in the Scripture at large. But when we come to certain NT writings—mainly though not exclusively Pauline—a still more definite meaning has set in. The adjective 'psychic' or 'soulish' has taken a force not perceptible in its root-word. It has become almost equivalent to 'carnal.' In Ja 3^{15} a wisdom is spoken of which is 'earthly, soulish (RV sensual), devilish.' Of certain predicted opponents of the gospel, it is said (Jude ^{19}) that 'they are soulish (AV and RV sensual; RVm natural *or* animal), not having the Spirit.' St. Paul terms the unregenerate who cannot discern the things of the spirit of God a 'soulish' man (1 Co 2^{14}). The body which we wear at present—'the body of our humiliation' (Ph 3^{21})—is a 'soulish' body, and shall be sown in the grave as such (1 Co 15^{44-46}). The corresponding adjective 'pneumatic' or 'spiritual' has now taken on, in the parallel passages, a religious sense, and denotes what belongs to the *pneuma* in that sense, viz. that which is derived from the spirit of God—the spirit of the regenerate life. It is plain that if we would not accuse these NT writers—especially St. Paul—of introducing groundless distinctions, we are drawn to admit a real difference of the terms from the first, in the general or wider sense already described.*

Spirit.—On a closely similar line of exegetical investigation we explain the Scripture use of this term. It is an entirely original biblical term for the highest aspect of man's life. It is almost inseparable from the idea of man's relation to God, whether in creation or in redemption. All through the OT it is the supreme term for human life. God is spirit, and man has spirit. 'The spirit returns to God who gave it' (Ec 12^{7}). In this way the psychology of the Bible is distinguished from all ethnic systems. In this it stands entirely alone, and is thoroughly consistent with itself from first to last. 'Spirit' is not so used by Plato, by Philo, by the earlier Stoics, by Plotinus and the Neo-Platonists, nor indeed anywhere out of the circle of Bible thought. It denotes the direct dependence of man upon God. The peculiarly biblical idea is the attribution to man, as the highest in him, of that which is common to man with God. 'Spirit' is the God-given principle of man's life, physical, mental, and spiritual. Where modern analysis imports a false element into it, is when an attempt is made to represent πνεῦμα as a separable constituent of man's being, as something which can be wanting, dead, or dormant on the one hand, restored or confirmed on the other. Indeed the whole character of the Bible psychology is mistaken in such attempts to distinguish spirit, soul, heart, and the like as separate faculties. They are diverse aspects of one indivisible inner life.

When we come to the Pauline writings, and those associated with them in the NT, we find that a certain improvement or addition to the force of this term has come in; yet one completely in harmony with its original meaning. That in man which is 'spiritual' is, frankly and fully, that which is influenced by the spirit of God—by the new spirit of regeneration. 'Spirit' is more entirely used of the renewed man, though there is still a clear and appreciable distinction maintained between the two. ‘The Spirit itself beareth witness with our spirit that we are the children of God’ (Ro 8^{16}). Yet so almost complete is the identification, that our translators find it difficult —throughout the Epistles—to determine where the term spirit should be distinguished by a capital letter. The advance consists in the fact that, whereas from the first, man's life is dignified as the direct inbreathing of the Almighty,—*nĕshāmāh* or *rûaḥ* from God,—his new life is now signalized by a term identical with that bestowed on the Third Person of the Holy Trinity. It is one of the central doctrines of Christianity concerning the theanthropic person of the Son, that, as head of the new humanity, He becomes a life-giving πνεῦμα—a quickening spirit. At every point in the unfolding of the Bible anthropology this doctrine of the *pneuma* in man will be found distinctive. It forms a central element in the Divine Image in which he was created, and at the climax of redemption it is the appropriate designation of the man as renewed in Christ. See SPIRIT.

---

* See this discussed in ch. v. of the present writer's *Bible Doctrine of Man*, Edin. 1895.

Heart is a term used with much clearness and consistency throughout Scripture, for the inner, the real, the hidden and ruling element in man's nature. Translated into modern language it denotes, in one of its most frequent applications, ‘principles of action.’ It is always sufficiently distinguished from Being or Personality. From the first it is said that ‘every imagination of the thoughts of man's heart is evil’ (Gn 6^{5}), *i.e.* his ‘principles of action’ are gone wrong, but it is never said that the personality is corrupt or destroyed. Again, it is the great promise of restoration, ‘a new heart also will I give you, and a new spirit will I put within you’ (Ezk 36^{26}), *i.e.* new principles will be implanted; yet it is not another or a different personality that is given. There is not such a sharp distinction in Bible speech as that which we have introduced into modern language between the *head* and the *heart*. There is no marked separation of the rational and intellectual elements in man's nature from the emotional or volitional. Although there is, to some extent, a distinction of this kind between לֵבָב and נֶפֶשׁ, all inward elements of whatever sort may be included under heart: even such as good judgment and clear perception are, at least in the OT, considered as qualities of heart. In the writings of the older apostles the OT idea of ‘heart’ is still the ruling one. Indeed, in these NT writings the Greek terms for the intellectual life of man are used for the more general OT terms ‘Heart,’ ‘Soul,’ and the like, without any precision whatever. Thus the LXX, on occasion (*e.g.* Dt 6^{5}, B), uses διάνοια for *lēbhābh*. St. Mark (12^{33}) uses σύνεσις for *nephesh*. St. Luke introduces διάνοια along with καρδία, ψυχή, and ἰσχύς (10^{27}). See HEART.

It is plain, however, that in the writings of St. Paul and those allied to him, these Greek expressions for the intellectual elements in man have acquired more place, although no very marked precision. In especial, St. Paul has a firm conception of MIND (νοῦς) as the highest expression for man's mental or intellectual faculty, as that which in man, under grace, is appealed to by the Divine law (Ro 7$^{23.\,25}$), and as that, on the other hand, which is to be distinguished from the *afflatus* or influence upon him of the supernatural (1 Co 14$^{14.\,15}$). Then there is introduced in these writings a free use of the similar and related terms in which the Greek language was so rich, σύνεσις understanding, λόγος reason, διαλογισμός reasoning, νοήματα thinkings, φρόνημα minding or disposition, but scarcely any one of these used with strictness or accuracy. See MIND.

The one instance in which a Greek term of this character is introduced and adhered to in the NT, is συνείδησις or **conscience.** It is once used by the LXX in the OT (Ec 10^{20}), where it is also introduced by our translators on the margin, but obviously rather with the meaning ‘consciousness’ than ‘conscience.’ The force of it in Wis 17^{11} (‘a witness within,’ RV) is more nearly our own. To trace the advance of the term from its literal meaning of ‘self-consciousness’ to its full ethical import, would take us outside of biblical matter altogether. Its clear and full recognition in pagan literature is significant. Lightfoot speaks in somewhat strong terms of this word as the ‘crowning triumph of ethical nomenclature,’ which ‘if not struck in the mint of the Stoics, at all events became current coin through their influence.’ He cites it as a special instance of ‘the extent to which Stoic philosophy had leavened the moral vocabulary of the civilized world at the time of the Christian era.’ Now its use in the NT precisely corresponds to this estimate. It does not occur in the Gospels except in Jn 8^{9}, a passage which the best scholarship does not hold to be genuine. It occurs twice in the addresses of St. Paul recorded in Acts; plentifully in the Epistles of Paul and of Peter and in the Epistle to the Hebrews, and in all these places its force is equivalent to that which it still bears in modern speech. Were we to bring it into line with the older biblical usage, it might be reckoned a function of πνεῦμα so far as it signifies ‘self-consciousness’; and of καρδία when regarded as moral approval or disapproval. In confirmation of this it is to be noted that St. John uses καρδία (1 Jn 3$^{19-21}$) in a connexion where St. Paul would have used νοῦς or συνείδησις. The use of conscience, however, is so definite and consistent as to force us to the conclusion that it was introduced into the NT as a full-fledged idea. See CONSCIENCE.

The system of thought thus sketched belongs essentially to the OT. It is what Continental writers call a ‘psychology of the Hebrews.’ In our outline, this fact is rather concealed by the almost disproportionate attention given to the important modifications made on it by the Apostle Paul. But the system itself is the ruling one, not only throughout the OT but in the writings of the older apostles in the NT. The Greek terms supplied by the Septuagint are taken up in their OT meanings, and from these the writers seldom or never depart. The leading psychological notions are those attached to the simple terms spirit, soul, flesh, heart. These four are the *voces signatæ* of the entire Scripture view of man's nature and constitution. They are all grouped round the idea of life, or of a living being. The first two—soul and spirit—represent in different ways, or, from different points of view, the life itself. The last two—flesh and heart—denote respectively the life-environment and the life-organ,—the former, that in which life inheres; the latter, that through which it acts. So much for their simple and primary meaning. In their secondary meaning they are grouped as follows: spirit, soul, flesh are expressions for man's whole nature viewed from different points. They are not three natures. Man's one nature is really expressed by each of them, so that each alone may designate the human being. Thus man is *flesh* as an embodied perishable creature. ‘All flesh is grass, and all the goodliness thereof as the flower of the field’ (Is 40^{6}). Man again is *soul*, as a living being, an individual responsible creature, ‘All souls are mine’ (Ezk 18^{4}). Once more, man is *spirit*. More commonly, however, he is said to have or possess ‘spirit’ as his life-principle. ‘Heart’ stands outside this triad, because man is never called a ‘heart,’ or men collectively spoken of as ‘hearts.’ ‘Heart’ never denotes the personal subject, but always the organ of the personality.

Again, the four terms may be thus grouped: 'spirit,' 'soul,' 'heart' may be used to denote, each of them, one side of man's double-sided nature, viz. his inner or higher life. Over against any one of these may stand 'flesh'; as representing his nature on its outer or lower side, so that the combination will express in familiar duality the whole of man as 'flesh and spirit,' 'flesh and soul,' or 'flesh and heart.' The two latter combinations are the ruling ones in the OT. Thus 'soul' and 'flesh' occur. 'My soul thirsteth for thee, and my flesh longeth for thee' (Ps 63^{1}). 'My flesh in my teeth, and my life (soul) in my hand' (Job 13^{14}). 'His flesh hath pain, and his soul mourneth' (Job 14^{22}). A land entirely stripped of its trees and of its crops is said be 'consumed soul and body' (Is 10^{18} Heb. 'from the soul and even to the flesh'). Equally characteristic is the conjunction of 'flesh' with 'heart' for the whole human being. Aliens wholly unfit for God's service are described as 'uncircumcised in heart and flesh' (Ezk 44$^{7.9}$). The man whose whole being is given to pleasure 'searches in his heart how to cheer his flesh' (Ec 2^{3} RV). 'Remove sorrow from thy heart and put away evil from thy flesh' (Ec 11^{10}). The *summum bonum* of human life is when a 'sound heart is the life of the flesh' (Pr 14^{30}), an expression which reminds one of the classic *mens sana in corpore sano*. This dualism of the OT is clinched in the memorable description of its final form, when 'the dust returns to the earth as it was, and the spirit to God who gave it' (Ec 12^{7}).

The distribution of parts, however, is not invariably or rigidly dualistic. For along with such as those now quoted we have also various trinal phrases, *e.g.* 'My soul longeth . . . for the courts of the Lord; my heart and my flesh crieth out unto the living God' (Ps 84^{2}). 'My heart is glad and my glory rejoiceth, my flesh also dwelleth in safety' (Ps 16^{9}). 'Mine eye is consumed with grief, yea, my soul and my belly' (RV 'body,' Ps 31^{9}). Yet, dual or trinal though the terms may be, the intention is essentially bipartite, viz. to express in man the inner and the outer, the higher and the lower, the animating and the animated all resting upon the primal contrast of what is earth-derived with what is God-inbreathed.

Such is a condensed account of the Bible treatment of psychological terms and ideas, which also goes a long way to fix the biblical teaching about Man. At most of the important points, the Bible view of man's nature coincides with that of human psychology at large. Scripture frankly and fully confirms the view which places man among the animals, but at their head. It makes man differ in no respect as to the origination of his physical frame, but in two most important particulars it distinguishes man altogether from the animals—in the direct and immediate connexion of his origin with God, and in his survival of death (see artt. ESCHATOLOGY and RESURRECTION).

PTOLEMAIS (Πτολεμαΐς) is the NT name of the old Canaanitish stronghold ACCO (which see). It received this name from Ptolemy II. Philadelphus when, after the conquest of Syria and the death of Alexander the Great, it came into his possession. For several hundred years, throughout its independence during the wars of the Maccabees, and under the dominion of Rome, when it received the privileges of a Roman city, this title supplanted the original name. At Ptolemais, Jonathan Maccabæus was treacherously captured (1 Mac 12^{48}); and the Greeks had built there a splendid temple to Jupiter. It is only once noticed in the NT, in connexion with the missionary journey of St. Paul from Tyre to Cæsarea (Ac 21^{7}). There was a small band of Christian converts in the place, and it is recorded that the Apostle abode with them one day. Ptolemais was favourably situated as regards both sea and land approaches. On the occasion of the Apostle's visit, we are told that he came by sea, having sailed from the harbour of Tyre, and that he proceeded on foot to Cæsarea and from thence to Jerusalem. But there is every likelihood, judging from Ac 11^{30} 12^{25} 15$^{2.30}$ 18^{22}, that he must have passed several times through the city, by the ancient land-route along the coast that connected Cæsarea by means of the rocky pass of the Ladder of Tyre with Antioch.

Josephus (*Ant.* XIV. XV. 1) tells us that Herod landed at Ptolemais on his voyage from Italy to Syria. It may be mentioned that there is another Ptolemais, the capital of Pentapolis in Cyrenaica, of which the celebrated Synesius, the pupil of Hypatia of Alexandria, was bishop early in the 5th century. In the extremely interesting series of his letters which are still extant, there is one addressed to all Christian bishops throughout the world, in which he announces that he had excommunicated, at a Diocesan Synod, Andronicus, the governor of the place, on account of his crimes against the Church.

As it was a seaport town, the Jews, who were not a maritime people, took very little interest in the Syrian Ptolemais, and therefore it hardly figures on the pages of Scripture. But in mediæval times it rose into great fame under the name of Acre, which is closely connected with its original name of Acco, and has obscured all the other names imposed or altered at different times by foreigners. Elsewhere in the Holy Land sacred memories almost obliterate secular ones; but here it is the reverse. The civil history of Acre is decidedly Western, as is the prominent headland on which it is situated, which pushes itself farther out from the monotonous coast than any other place in Palestine, except Carmel. On this projecting shoulder of the Holy Land the town occupies so commanding a position that Napoleon called it the Key of Syria. At a distance it presents the appearance of a strongly fortified European town, but its architectural features inside are thoroughly Oriental in character. At the time of the Crusaders it was the Castella Peregrinorum, the principal landing-place of pilgrims to Jerusalem; and it was the last foothold of the Crusaders on the sacred soil. Here was the principal seat of the great knightly orders of St. John of the Temple and the Hospital, who gave it the French name of St. Jean d'Acre. It had a large share in the feudal and ecclesiastical wars of Europe, and in the unhappy political intrigues of the Republics of Venice, Genoa, and Pisa. It has been subjected to numerous sieges, from the days of Baldwin, the founder of the shortlived dynasty of the Latin sovereigns of the Eastern empire, to those of Napoleon, whose destiny was here first marred by defeat. Saladin, Cœur de Lion, and Sir Sydney Smith performed feats of valour in connexion with this fortress. The last siege took place in 1840, when Sir Charles Napier, fighting for the Turks, took the town from the Egyptians under Ibrahim Pasha.

Acre never recovered the bombardment of the English fleet; and it is now a dull, ruinous town of about 10,000 inhabitants. It is the market-place of the Syrian wheat trade; and the bread manufactured from the rich crops grown on the surrounding plain of Acre is proverbially said to be 'the best in the Holy Land'; thus maintaining still the reputation it had acquired in the days of Israel, when the Patriarch cast the blessing of his son into its local mould, 'out of Asher his bread shall be fat.' The shallow *Nahr N'amân*, the ancient Belus, which falls into its broad bay, recalls the Greek story of the chance invention of glass on its banks; and the patriarchal promise to the lot of Issachar of 'the treasures hid in the sands,' which may have had something to do with the ancient classical tradition. The view from the shattered ramparts is very extensive and beautiful, comprising on the one side the opposite headland of Carmel, reflected in the blue waters of the curved bay, and on the other the dark green plain along the coast up to the white promontory of the Ladder of Tyre; the distant snow-clad Lebanon range fading northwards in the clouds; while the eastern horizon is closed up by the shadowy hills of Galilee.

LITERATURE.—Conder, *Tent-Work in Palestine*, pp. 188-192; Stanley, *SP* pp. 264-266; Bovet, *Egypt, Palestine, and Phœnicia*, pp. 383-385.
HUGH MACMILLAN.

PTOLEMY (Πτολεμαῖος, a metric alternative for the Ion. *πολεμήϊος*, 'warlike') I., surnamed Σωτήρ, 'Preserver' (on account of his defence of the Rhodians in B.C. 306; Paus. i. 8. 6; or by the Confed. of the Cyclades, who claim the credit, according to Inscript. 373 in Michel's *Recueil*—see Mahaffy, *Emp. Ptol.* 110 f.), was the son of Lagus and Arsinoë, a reputed concubine of Philip of Macedon. He was born about B.C. 367, and upon the death of Alexander (1 Mac 1^{6-9}) he assumed the satrapy of Egypt. For the intricate details of the wars that preceded his assumption of royalty in B.C. 305, see Mahaffy, *op. cit.* 27-58; Droysen, *Hellenismus*; Niese, *Gesch. der Griech. Staaten*, pt. i.—by each of whom the original authorities are given. He abdicated in B.C. 285 in favour of his second son, and died two years later, with his dynasty firmly established by his wise and vigorous administration upon the throne of Egypt. In the course of his campaigns he several times traversed or occupied Palestine. In B.C. 320 (Cless in Pauly, art. 'Ptolemy'), or more probably eight years later, he took advantage of the Sabbath law to seize Jerusalem on that day (Jos. *Ant.* XII. i.), but so ingratiated himself with the people that many of them accompanied him to Egypt and settled there (Jos. *c. Ap.* i. 22; Müller, *Fragm. Hist. Græc.* ii. 393). They were employed partly as mercenaries; and in Alexandria a kind of citizenship and a special quarter of the city appear to have been assigned them (Jos. *Wars*, II. xviii. 7). Such migrations to Egypt occurred three or four times during this reign; and the favour with which the Egyp. rule was regarded in Palestine was largely due to the kindness with which the settlers were treated, and to the comparative avoidance of interference with their religious practices. It has been assumed (*e.g.* by Cheyne) that Is 19^{18-25} (this passage may allude to the Jewish temple at Heliopolis founded in the time of Ptol. VII.) was written in the time of this king, and he is generally held to be 'the king of the south' referred to in Dn 11^{5}, where the RVm is to be preferred.
R. W. MOSS.

PTOLEMY II. (afterwards known as *Φιλάδελφος*, 'brother-loving,' from the title adopted by his sister and wife, Arsinoë), the youngest son of Soter, succeeded his father in B.C. 285. He continued his father's policy, and, instead of Hellenizing Egypt, treated the country rather as a private estate to be administered wisely in the interest of its proprietor. On the series of coins which he struck at Tyre the earliest date that occurs is B.C. 266 (Poole, *Coins of Ptol.* xxix.); and consequently his first Syrian war took place at least two or three years earlier. From that time Palestine formed a permanent part of his kingdom, his right to hold it as an inheritance from his father having been unrecognized before. Among the cities which he founded were Philotera to the south of the Lake of Galilee (Polyb. v. 70), Philadelphia on the site of Rabbah (Jerome, *in Ezek.* 25), and Ptolemais on the site of Acco (pseudo-Aristeas in Merx, *Archiv*, i. 274; Droysen, *Hellenismus*, iii. 2. 305). In these foundations his principal object seems to have been to conciliate the people, and to furnish himself with centres of influence. A second Syrian war soon after B.C. 250 was provoked by an attempt on the part of Antiochus II. to annex the country; but of its details nothing is known with certainty, except that Philadelphus lost no part either of his dominions or apparently of his supremacy by sea in the Eastern Mediterranean. He died in B.C. 247. The reign of Philadelphus was a brilliant literary epoch in Alexandria. At his court, as officials of the Museum and Library which his father founded and he fostered, gathered many of the most eminent writers, artists, dilettanti, of the period: and thus was provided a place for the fusion of Jewish and Greek ideas, and a means of introducing the latter into Palestine itself. It is not impossible that the story of the origin of the LXX is so far correct, that the Pent. and perhaps also Joshua were translated during his reign and under royal patronage: see SEPTUAGINT. Dn 11^{6} is to be interpreted of Philadelphus; but the latter part of the verse is so vague and even so difficult of translation that there is ground for suspicion that the text is corrupt. It has been conjectured that Ps 72 was written soon after the accession of Philadelphus as an expression of the anticipations which his reputation warranted, and Ps 45 in honour of his marriage with the daughter of Lysimachus, king of Thrace; but neither conjecture has much support.
R. W. MOSS.

PTOLEMY III. (first styled *Εὐεργέτης*, 'benefactor,' in a decree of the synod of Canopus in B.C. 238) succeeded his father Philadelphus in B.C. 247. Soon after his accession, to avenge the murder of his sister at Antioch, he engaged in the third Syrian war, during which his conquests led him far into the East, and on his return from which he is alleged to have offered sacrifices in Jerus. (Jos. *c. Ap.* ii. 5). In B.C. 229 the control of the Jewish taxes was entrusted to Josephus, nephew of Onias II., according to an account (Jos. *Ant.* XII. iv. 1-5), for which there is probably some historical basis, and which is an evidence of the mildness and consequent popularity of the Egyp. rule. Of the later history of Euergetes only the scantiest information has been preserved. He appears to have devoted himself principally to the internal development of his kingdom, which was at the height of prosperity in B.C. 222, when he was murdered by his son (Justin, xxix. 1), or more probably died a natural death (Polyb. ii. 71). Dn 11^{7-9} is to be interpreted of Euergetes, the middle verse relating to the act by which he won his title—the restoration of the Egyp. idols carried off by Cambyses nearly three centuries before.

This king must not be confounded with the Euergetes of the Prologue to Sirach. The data of time show that the latter must have been Euergetes II., known also as Physcon, who was admitted by his brother to conjoint sovereignty in B.C. 170, and died in B.C. 117. R. W. Moss.

PTOLEMY IV. (Φιλοπάτωρ, strictly 'fond of his father,' though the title appears to have been given in the belief that he was designated for the throne by his father) succeeded his father Euergetes in B.C. 222. In the fifth year of his reign he was forced into an expedition to recover Palestine from Antiochus the Great, who was completely defeated in a battle near Raphia. Dn $11^{11.12}$ is a summary of the campaign. A treaty of peace was made with Antiochus (Polyb. v. 87), and Ptolemy returned homewards. At Jerus., according to a story in 3 Mac., he attempted to enter the Holy of Holies against the indignant protests of the people, but fell in a fit on its threshold. Renouncing his purpose, he returned to Alexandria, where his rage against the Jews showed itself in an edict commanding them to practise idolatry on pain of degradation from citizenship. So many refused, that in an access of wrath he gave orders for all the Jews in Egypt to be collected at Alexandria to be put to death. The royal design was again thwarted by supernatural occurrences: and a national feast was appointed to commemorate the deliverance. The last statement may be regarded as authentic, and it is not unlikely that the Jews under this king lost some of their privileges, and joined the Egyp. natives in uneasiness and insurrection (Polyb. v. 107, xiv. 12); but very little reliance can be safely placed on 3 Mac. Of the rest of his reign, which terminated in B.C. 205, little is recorded beyond his extreme licentiousness and his Napoleonic love of building. R. W. Moss.

PTOLEMY V. (Ἐπιφανής, 'illustrious') had no sooner succeeded his father, Philopator, in B.C. 205, than Antiochus the Great took advantage of the Egyp. king's minority to seize Palestine. Ptolemy's general, Scopas, was sent to recover the country, but was defeated near the sources of the Jordan, and compelled to surrender at Sidon (Jerome, *in Dan.* 11^{15}). Many of the Jews were led by the concessions of Antiochus (Jos. *Ant.* XII. iii. 3) to transfer to him their allegiance, and the country passed finally from under the control of Egypt. When the Romans forbade Antiochus to attack Ptolemy, he conciliated both, but retained his conquests by betrothing his daughter Cleopatra to the Egyp. king (B.C. 198). The marriage was celebrated in B.C. 193, the Syrian princess receiving as her dowry the royal share of the taxes of the conquered provinces, but no right of interference in their government. On the death of Antiochus, Ptolemy decided to invade Syria, but before his preparations were complete was poisoned in B.C. 182, or the early part of the following year. Dn 11^{14-17} is to be interpreted of these relations between Ptolemy and Antiochus; but 11^{14b} must refer to a futile attempt to restore the independence of Israel (Bevan, *in loc.*) rather than to a preference for Antiochus by a party amongst the Jews, for in that case the phrases, so far as they are intelligible, are contrary to fact. R. W. Moss.

PTOLEMY VI. (should be reckoned as VII., as there is evidence of the brief reign of an older brother: for the authorities and the present state of the question, see Mahaffy, *Emp. Ptol.* 329 f.—surnamed Φιλομήτωρ, 'lover of his mother') spent the first seven years of his reign under the regency of his mother, Cyprus being meanwhile under the governorship of Ptolemy Macron (2 Mac 10^{13}), who afterwards transferred his allegiance to Syria. Soon after her death he took the government into his own hands; and amongst the envoys who came for the occasion was Apollonius, who was instructed to discover the feelings of the Egyp. court towards Syria (2 Mac 4^{21}). In B.C. 173 the king married his sister Cleopatra. Two years later he was defeated on the borders of Egypt by Antiochus IV., who overran the country (1 Mac $1^{18f.}$) and got possession of the king. The latter's brother, Euergetes II., was at once raised to the throne by the people of Alexandria, and, when Antiochus retired, reigned conjointly with his brother (B.C. 170). In B.C. 163 Philometor was driven out of Egypt by his brother, but restored soon after by order of the Roman senate, the kingdom being divided and Cyrene assigned to Euergetes. From B.C. 154 there was peace between the brothers. About the same time must be dated the foundation of the temple of Onias, near Heliopolis (Jos. *Ant.* XIII. iii. 1–3), the circumstances of which are an evidence of the king's popularity amongst and favour to the Jews. To the same conclusion point his employment of Jewish generals (Jos. *c. Ap.* ii. 5), his relation to the Jew Aristobulus (2 Mac 1^{10}), who is identified with the Alexandrian philosopher of the same name by Clemens Alex. (*Strom.* v. 14. 97) and Eusebius (*Præp. Evang.* viii. 9), and possibly also the dedication of Ad. Est 11^{1}. When Alexander Balas was trying to establish his authority over Palestine, he sought alliance with Philometor (1 Mac 10^{51-58}), whose daughter Cleopatra was given him in marriage about B.C. 150. With a view to take advantage of the rivalry between Balas and Demetrius (1 Mac 11^{1}), or more probably in anger at the suspected treason of the former (Jos. *Ant.* XIII. iv. 6), Ptolemy again invaded Syria, and attached to himself Demetrius by promises of support and of marriage with Cleopatra; but, after making himself master of Antioch, he retained the crown of Syria for himself. Balas was defeated in battle, and killed in the course of his flight; but Ptolemy was wounded mortally, and only lived to have his enemy's head presented to him, in B.C. 146 (1 Mac 11^{8-18}; Jos. *Ant.* XIII. iv. 8). Dn 11^{25-30} is to be understood of the wars between Philometor and Antiochus IV.

R. W. Moss.

PTOLEMY VII. (more correctly IX., the young son of Cleopatra II. having reigned for a few months, assumed the title of Euergetes II., possibly at his coronation at Memphis, but was better known amongst his Greek subjects by the nickname of Physcon, 'fat-paunch') succeeded to sole rule in B.C. 146 or the following year, and died about thirty years afterwards. Justin and Strabo describe him as tyrannous to his subjects, and as shrinking from no crime; but the papyri (cf. especially Mahaffy in vol. iv. 192 ff. of Petrie's *Hist. of Egypt*) represent him as extending the commercial bounds of Egypt, and as upholding law and order within it. There are indications in two texts from Athribis (cf. also Grenfell's *Papyri*, i. 74 f.) that he protected and was popular amongst his Jewish subjects. If so, the evidence against the theory that 3 Mac. records persecutions during his reign is increased. In the Prologue to Sir. the editor of the Gr. version states that he came to Egypt in the 30th year of Euergetes (B.C. 133, the reckoning being from the commencement of the joint reign of the brothers), and implies that by that time the entire OT had already been translated for the benefit of the Jews in Egypt, probably with special reference to the needs of those resident in the great centre of Leontopolis. The task appears to have been begun in the reign of

Philopator, possibly earlier, and may have been completed shortly before the visit of the writer of the Prologue.

Literature.—Of Ptolemaic literature a good summary to 1895 is given in Wachsmuth's *Einleitung in das Studium der alten Geschichte*, 579 ff., whilst the articles, especially by Cless and by Wilcken, in the new edition of Pauly's *Realencyclopädie*, ed. Wissowa, are invaluable. The principal sources are Justin's *Epitome*; Pausanias, bk. i.; Jerome, *Com. on Dan. xi.*; Plutarch's *Life of Cleomenes*; Josephus, Diodorus, Polybius, and Livy, of which any edition with a good index will furnish a list of the scattered passages referring to the Ptolemies. Careful and ingenious use is made of inscriptions by Mahaffy in his *Empire of the Ptolemies*, and in his sketch of the Ptolemaic Dynasty in the fourth volume of Petrie's *Hist. of Egypt*. Amongst the best connected histories are Droysen's *Geschichte des Hellenismus*, and Strack's *Dynastie der Ptolemäer*. For the inscriptions, in addition to the memoirs of the Egypt Exploration Fund, Wilcken's *Archiv für Papyrus-forschung*, Mahaffy's *Petrie Papyri* in 3 vols. of 'Cunningham Memoirs' of the Royal Irish Academy, Revillout's *Revue Egyptologique* and *Mélanges*, should be consulted. A great wealth of papyri has accumulated in the British Museum and the Louvre, at Leyden, Turin, Rome, and elsewhere, and these are gradually being edited in separate memoirs or in one of the Egyptological periodicals by Grenfell, Hunt, and others; but only a comparatively small proportion relate to the period of the Ptolemies. For further or more general literature reference should be made to the bibliographical note at the close of the article on Egypt, vol. i. p. 667.

R. W. Moss.

PUAH.—1. (פּוּעָה ; Φουά) Ex 1^{15}, one of the Hebrew midwives in Egypt. Philo (*Quis rerum divin.* p. 389 f., ed. 1613) identifies this name with 2, perhaps rightly, and explains, Φουὰ ἐρυθρὰν ἑρμηνεύεται. 2. (פּוּאָה ; Φουά) Jg 10^1, of the tribe of Issachar, father of the minor judge Tola. Puah is called 'son of Dodo,' for which LXX and Syr. give the improbable rendering, 'son of his [Abimelech's] uncle.' A recension of LXX, represented by 8 minuscles, renders . . . *υἱὸν Φουὰ υἱὸν* Καριὲ [Καρηὲ] *πατραδέλφου αὐτοῦ, κ.τ.λ.*; hence Hollenberg (*ZATW* i. 104 f.) concludes that Puah was the son of קָרֵחַ (cf. 2 K 25^{23}, Jer 40^8), and that the name has fallen out of MT. Moore (*Judges*, p. 273) suggests that Καριέ is only a corruption of *Issachar*; the MT is probably right. 3. In the lists of Issachar, Gn 46^{13}, Nu 26^{23} (פֻּוָּה Puvah), 1 Ch 7^1 (פּוּאָה), Puah appears as the brother, not the father of Tola. Both are probably names of clans rather than of individuals.

The meaning of Puah is uncertain. The name has been connected with the Arab. فُوَّة *fûh*, a plant yielding a red dye, 'madder,' the *Rubia tinctorum* of Linn. In Talm. פּוּאָה is used in this sense, *e.g.* *Shabb.* 89*b*, *Erub.* 26*c*. See Löw (*Aramäische Pflanzennamen*, 251). If this be so, the connexion with Tola, 'the crimson worm,' is interesting. Lagarde (*Mittheil.* iii. 1889, 281) takes *puah* to be a sea-weed = *φῦκος*, and explains that Issachar's son was so called because he used sea-weed in dyeing; Issachar dwelt by the sea (Dt 33^{19}). But the *rubia tinct.* is not a sea-weed.

G. A. Cooke.

PUBLICAN (*τελώνης*, from *τέλος*, 'tax'; Lat. *publicanus*).—In the widest sense the word *publicanus* stands for any one who has business connexions with the State. It is usually employed in a narrower and more specific sense for a farmer-general of the revenue—by preference a man of equestrian rank (who was also sometimes designated 'manceps,' *e.g.* Cicero, *Div. in Cæcilium*, 33, and 'redemptor,' *Div.* ii. 47). The name was also given to the agents of the farmer of the revenue, whom he employed in collecting the taxes. In Palestine the taxes went to the imperial treasury (*fiscus*), not to that of the senate (*ærarium*). Under the procurator the Judæan taxes were paid through that official, whose primary function was the superintendence of the revenue. In the territories assigned to the petty kings and tetrarchs, such as that of Herod Antipas, the payment was made to those authorities. Even separate cities were allowed to collect their own taxes. An inscription in Greek and Aramaic at Palmyra, giving the custom tariff of a number of articles in the time of Hadrian, shows that the town had a certain authority in determining the details of its own taxation (Schürer, *HJP* I. ii. 67 ff.).

The publican leased the customs of a particular district for a fixed annual sum, gaining what the revenue yielded in excess of that amount, and being required to make good any deficiency. In earlier times even direct taxes had been farmed (Jos. *Ant.* XII. iv. 1, 3, 4, 5). But this was no longer the case in NT days. The publicans of whom we read in the Gospels were engaged in collecting the custom dues on exports (Marquardt, *Römische Staatsverwaltung*, ii. p. 261 ff.). Pliny mentions that merchants from Arabia paid custom dues at Gaza (*HN* xii. 63-65). In Jericho there was an *ἀρχιτελώνης*, possibly himself the farmer of the customs of that important trade centre. Most of the NT publicans could only have been tax-collectors, subordinate to the official who more strictly bore the name 'publicanus.' Publicans formed themselves into companies (*societates publicanorum*), each member taking a quarter, or a lesser share, of the collecting and its profits or losses, according to the amount of capital invested. In the time of the Cæsars the contract was for five years.

It is evident that such a system as this would be liable to abuse, especially in a neglected and ill-governed province. It is expressly stated in the Palmyra inscription that the authorities should prevent the lessee of the customs from exacting anything beyond what was required by the law. Differences having arisen, a fixed tariff for a number of articles appears on the inscription to prevent misunderstandings and undue exactions. The unpopularity of the publican was partly due to his being a servant of the hated Roman government. This would be the case especially in Judæa under the procurators. The case of Galilee under Herod Antipas was somewhat different; and yet the Herods were dependent on and subservient to Rome. For a Jew to engage in collecting the revenues that went to support the foreign domination, was regarded as peculiarly mean and unpatriotic. If he grew rich it was on the spoils wrung from his brethren by the oppressor. Consequently men who had a due regard for their own good name would shrink from accepting the office. This would lead to its falling into the hands of persons of doubtful reputation. Then the farming of the customs was a direct incentive to dishonesty. In Rabbinical literature the tax-gatherer is commonly treated as a robber. In NT publicans and sinners are commonly coupled as forming but one class. It would not be fair to accept the popular judgment on this matter as an unprejudiced assertion of the truth. Still, our Lord's gracious treatment of the publicans is no indication that He wished to clear their character from calumny, for He was equally gracious to persons of notoriously bad character when He saw signs of amendment. Levi had been a publican, but he left his previous occupation on becoming a disciple of Jesus (Lk $5^{27.28}$). Zacchæus declared that he had mended his ways, and was in the practice of making ample recompense for his previous extortions at the time when he met with Jesus (Lk 19^8). Our Lord's ministry was peculiarly acceptable to publicans (Lk 15^1). We have no reference to any men of this class in the apostolic period. Acts and the Epistles never name the publicans.

Literature.—Schürer, *HJP* I. ii. 17; Marquardt, *Römische Staatsverwaltung*, ii. 261-270, 289-293; Pauly, *Real-Encyc.*, art.

'Publican'; Leyrer in Herzog's *Real-Encyc.*, art. 'Toll'; Herzfeld, *Handelsgeschichte der Juden*, etc. 159 ff.; Naquet, 'Des impôts indirects chez les Romains,' etc. (Bursian's *Jahresberichte*, xix. 466 ff.); Cagnat, 'Étude historique sur les impôts indirects Romains,' etc. (*ib.* xxvi. 245 ff.); Vigié, *Études sur les impôts indirects Romains*; Edersheim, *Jesus the Messiah*, i. 515 ff.

W. F. ADENEY.

PUBLIUS, or more correctly Poplius (Πόπλιος), the leading man in Malta when St. Paul was cast on the island by shipwreck. He was both rich and hospitable, and his father was among those who were healed by the apostle (Ac $28^{7.8}$). He is described as ὁ πρῶτος (rendered 'the chief man' in AV and RV), a title which seems to have been peculiar to Malta, but which has been proved from inscriptions to have had a technical significance there. These inscriptions, however, leave it doubtful whether the title indicates the chief magistrate of the island or one with an honorary rank. He may have been the delegate of the prætor of Sicily, to whose jurisdiction Malta belonged. The name Poplius is the Gr. form of the prænomen Publius, but in this instance it may be the Gr. rendering of the nomen Popilius. Tradition says that he was the first bishop of Malta, and that afterwards he became bishop of Athens.

W. MUIR.

PUDENS (Πούδης, but a few cursives give Σπούδης; *Pudens*).—A Christian at Rome in the time of St. Paul's last imprisonment there, who sends greeting from him to Timothy (2 Ti 4^{21}). This is all that is certainly known of him, but conjecture has been rife in attempting to identify him with others of the same name. The name is Roman, often borne by Romans of good family, and common in the early Christian centuries. Thus we find—(1) Aulus Pudens, a soldier, the friend of Martial, and husband of a British lady, Claudia (Mart. *Epigr.* iv. 13; xi. 53). (2) Titus Claudius Pudens, husband of Claudia Quintilla, whose inscription to a lost child has been found between Rome and Ostia (*CIL* vi. 15,066). (3) Pudens, a son of Pudentinus, a Roman who gave the site for a temple which the British king Cogidubnus erected to Neptune (*CIL* vii. 17). (4) Mævius Pudens, employed by Otho to corrupt Galba's friends (Tac. *Hist.* i. 24). (5) Pudens, a Roman knight, killed at the siege of Jerusalem (Jos. *BJ* VI. ii. 10). (6) Pudens, a Roman senator, said by Roman tradition to have been the host of St. Peter at Rome (Baronius, *Ann. Eccl. ad* A.D. 44, *Martyr. Rom. ad* May 19; Lipsius, *Apocryph. Apostel-leg.* ii. 1. 207, 418). (7) Pudens, father of Pudentiana and Praxedes, *c.* A.D. 160.

The Greek *Menæa*, appealing to the authority of Dorotheus, regards Pudens as having been one of the seventy disciples, who afterwards accompanied St. Paul on his missionary journeys, and was beheaded under Nero. His memory is honoured with that of Aristarchus and Trophimus in the Greek Church on April 14. The Roman Church tended to identify him with the host of St. Peter (6), who was apparently confused with (7) (see *Acta Sanctorum* for May 19, where the editor distinguishes between the two). English writers have attempted to identify him with (1) and (3). This is possible, but cannot be regarded as proved (cf. art. CLAUDIA). So many of the name were soldiers, that the conjecture may be hazarded that Pudens was one of the soldiers who had been in charge of St. Paul, perhaps one to whom he had been chained while a prisoner.

W. LOCK.

PUL (פּוּל, Φοὐλ, Φουά, Φαλώχ, Φαλώς).—The Assyrian Pulu. See TIGLATH-PILESER.

PUL.—Is 66^{19}. See PUT, p. 177^{a}.

PULPIT.—This term occurs only in Neh 8^{4} ‖ 1 Es 9^{42} in connexion with the reading of the Law, when Ezra is said to have stood 'upon a pulpit of wood' (עַל־מִגְדַּל־עֵץ, LXX βῆμα ξύλινον). The Heb. word מִגְדָּל, which is frequent in the sense of 'tower' (cf. AVm and RVm at Neh 8^{4}), means any *elevated* structure. Ezra's 'pulpit,' like its Latin original, *pulpitum*, probably corresponded rather to what we should call a 'platform' or 'stage.'

J. A. SELBIE.

PULSE (זֵרֹעִים *zērōʻîm*, זֵרְעֹנִים *zērʻōnîm*, Dn $1^{12.16}$).—The words in the original do not refer to any special plant, or even order of plants, but only to *things sown*. The purpose of Daniel and his companions was to be tried on a purely vegetable diet. An Arab. word of similar meaning, but more restricted, is *ḳuṭnîyyeh* (pl. *ḳaṭânî*), which is defined as 'grains, with the exception of wheat, barley, raisins, and dates,' or as 'those grains which are cooked, as lentils, mâsh (*Vigna Nilotica*), horse beans, beans, and chick peas.' The latter definition would correspond well with the Eng. 'pulse,' which refers to the edible seeds of the order *Leguminosæ*. It is said that they are called by this name in Arab. from the root *ḳaṭan*, 'to dwell,' because they last well, or because they are necessary to those who dwell in houses. Other authorities define *ḳaṭânî* to be *khilf*, *i.e.* all summer vegetables, which would make the exact equivalent of *zērōʻîm* and *zērʻōnîm*.

'Pulse' in 2 S 17^{28} is not in the Heb. original. The word 'parched' (קָלִי = *roasted* or *toasted*) occurs twice in this verse, once after *ḳemaḥ*= 'meal,' following wheat and barley, and tr^d 'parched *corn*' (see WHEAT); and again, after beans and lentils, and tr^d 'parched *pulse*.' It is customary to roast immature chick peas (Arab. *ḥummus*) in the oven, and eat them. The natives are exceedingly fond of them when prepared in this way. The allusion in the above passage is doubtless to grains roasted in the oven or toasted over the fire. See PARCHED.

G. E. POST.

PUNISHMENTS. — See CRIMES AND PUNISHMENTS.

PUNITES (הַפּוּנִי, B ὁ Φουαεί, A Φουαί).—The gentilic name from PUVAH, Nu 26^{23}. See PUAH, No. 3. Siegfried-Stade suggest that the Heb. name should perhaps be pointed פֻּוָּי.

PUNON (פּוּנֹן, B Φεινώ, A Φινώ, F Φινών).—A station in the journeyings of the children of Israel, mentioned only in Nu $33^{42.43}$. The LXX renders it in the same way as PINON, the name of one of the 'dukes' of Edom (Gn 36^{41}). Eusebius (*s.v.* Φινών) and Jerome (*s.v.* 'Faenon') speak of it as formerly a city of the dukes of Edom, and identify it with a place between Petra and Zoar, called Φαινών, where mines were worked (*Onomast.* ed. Lag. pp. 155 and 288).

A. T. CHAPMAN.

PURAH (פֻּרָה ? 'branch' = פֻּארָה Is 10^{33}; ? 'winepress' = פּוּרָה Is 63^{3}; LXX Φαρά).—Gideon's 'servant,' lit. 'young man' (נַעַר, LXX παιδάριον, Vulg. *puer*), *i.e.* armour-bearer, Jg $7^{10f.}$; cf. 9^{54}, 1 S $14^{1.6}$, 2 S 20^{11}.

G. A. COOKE.

PURCHASE.—To purchase (from Old Fr. *pourchasser*, *i.e.* *pour* 'for' and *chasser* 'to chase') is to pursue after a thing, hence to acquire. The sense is now narrowed to acquiring by payment. For the wider meaning cf. Melvill, *Diary*, p. 42, 'Mr Andro Melvill . . . with grait difficultie purchassit leave of the kirk and magistrates of Genev . . . and takin jorney cam hamwart'; Knox, *First Blast* (Arber's reprint, p. 7), 'The veritie of God is of that nature, that at one time or at other, it will pourchace to it selfe audience'; *Article* XXV.

'They that receave them unworthyly purchase to them selves damnation.' This wider meaning is also seen in Ac 20^{28} 'the church of God which he hath purchased with his own blood' (ἣν περιεποιήσατο); and in 1 Ti 3^{13} 'They that have used the office of a deacon well purchase to themselves a good degree' (περιποιοῦνται, RV 'gain'). Cf. Ps 84^{3} in metre—

'The swallow also for herself
Hath purchased a nest.'

J. Hastings.

PURGE.—Like Lat. *purgare* and Fr. *purger*, the verb to 'purge' was formerly used in the widest sense of to cleanse or purify. Hence Ps 51^{7} 'Purge me with hyssop, and I shall be clean,' referring to the ceremony of dipping a bunch of hyssop (see Hyssop) in blood and sprinkling the leper or defiled person (Lv 14^{4}, Nu 19^{18}); Mt 3^{12} 'He will throughly purge (RV 'cleanse') his floor'; Mk 7^{19} 'purging all meats' (RV 'making all meats clean,' *i.e.* ceremonially, see Swete's note); Jn 15^{2} 'Every branch that beareth fruit, he purgeth it' (RV 'cleanseth it'); He 1^{3} 'when he had by himself purged our sins' (RV 'made purification of sins'). Cf. the tr. of 1 Jn 3^{3} in Udall, *Erasmus' NT*, 'And every man that hath thys hope in him, purgeth himself, even as he also is pure'; Wyclif's tr. of Ja 4^{8} 'ye synners clense the hondis, and ye double in soule purge ye the hertis'; and the Act of Henry viii. (1543) prohibiting Tindale's Translation, 'The person or persons being detecte or complained on, shal be admitted to purge and trie his or theyr innocency by other witnesse.' J. Hastings.

PURIFICATION.—See Unclean.

PURIM (פּוּרִים or יְמֵי הַפֻּרִים).—A Jewish festival of whose origin and institution we have an account in the Book of Esther. There we are informed that the festival had its rise in the resting and rejoicing of the Jews in Persia after their slaughter of their enemies on 13th Adar, in the 12th year of king Ahasuerus (*i.e.* Xerxes, B.C. 473). That was the day which Haman, the grand vizier, had chosen by *lot* (=*pur*, Est 3^{7}) for the extermination of the Jews throughout the Pers. empire. Owing to the fact that in Susa the conflict was renewed on 14th Adar, the 'day of feasting and gladness' in that city fell on the 15th. It was therefore enacted, as we learn from what appears to be an interpolation (9^{20-32}), by an ordinance of Mordecai, the successor of Haman, confirmed by Esther the queen (who were chiefly instrumental in procuring the deliverance), that there should be an annual celebration of the feast in all time coming, among the Jews and their seed, both on 14th and 15th Adar; 'that they should make them days of feasting and gladness, and of sending portions one to another and gifts to the poor.' No religious services were enjoined, and the observance seems to have been at first merely of a convivial and charitable nature; but ultimately it was accompanied with the reading of the Bk. of Esther in the synagogue, the whole congregation joining enthusiastically in the closing passages relating to Mordecai's triumph, and, at the mention of Haman, hissing, stamping, gesticulating and crying out, 'Let his name be blotted out; let the name of the wicked perish,' while the reader pronounced the names of Haman's ten sons all in one breath to indicate that they expired at the same moment. This reading of 'the Megilla,' preceded and followed by a special benediction, commencing in each case with the words, 'Blessed art thou, O Lord our God, king of the universe,' takes place both on the evening of the 13th of Adar, which is observed as a fast-day (called 'the Fast of Esther,' traceable from the 9th cent.; cf. 9^{31} 4^{3}), and on the morning of the 14th, which along with the 15th is devoted to celebrations of a festive and social character, as enjoined in Scripture, but without any prohibition of labour. To the influence of the Bk. of Esther the festival seems to have largely owed its popularity (Buxtorf, *Syn. Jud.* 24, and Ginsburg in Kitto's *Cycl.*). Apart from that book, the following are the only allusions to the subject that have been discovered in ancient literature. Referring to the commemoration of the victory over the Syrian general Nicanor on 13th Adar (B.C. 161), 2 Mac (15^{36}), which was probably written a little before the beginning of the Christian era, mentions that the anniversary fell on the day before 'Mordecai's day.' 1 Mac (about a century earlier) is silent on the point, although it mentions (7^{49}) the institution of 'Nicanor's day.' Josephus, writing about the close of the 1st cent. A.D., gives an account of the feast (*Ant* XI. vi. 13), and mentions that in his day it was observed by the Jews throughout the world on the 14th and 15th Adar, which days they called Φρουραίους. In the *Meg. Taanith* (xii. 31), which existed in the 2nd cent. A.D., these two days are also mentioned as 'the days of Purim,' when 'mourning is forbidden.' By some 'the Feast of the Jews' (Jn 5^{1}, cf. 4^{35} 6^{4}) is identified with Purim; but the inference is questionable, as the latter never had any special connexion with Jerus., and was not likely, as actually celebrated, to be very attractive to the Saviour (but see Milligan-Moulton on Jn 5^{1}).

With regard to the historical origin of Purim, there has been during the last half-century a growing tendency to reject the narrative in the Bk. of Esther, largely owing to the difficulty of finding any Persian word with which the name Pur can be identified. Various theories have been advanced to show that the festival had quite a different origin.

1. According to Reuss (*Gesch. AT*, § 473), following J. D. Michaelis (*Gesch. AT*), it may have grown out of the Nicanor-festival on 13th Adar, the latter losing its historical significance in the course of an eventful century or two, and thus becoming a preparatory fast to 'Mordecai's day,' whose strong hold upon the popular mind (notwithstanding the misgivings of the Great Synagogue, *Meg.* LXX. 4) was due to the popularity of the Bk. of Esther, with which it was so closely connected. This theory, however, leaves the *Purim* mystery unsolved, and it is negatived by the fact that even so late as in the *Meg. Taanith* (xii. 30) the 13th Adar is spoken of as 'Nicanor's day.'

2. J. Fürst (*Kanon AT*) and E. Meier (*Heb. Wrtb.*) trace Purim directly to a Pers. spring-festival (adopted by the Jews in Susa), and suppose the name to be connected with Pers. *bahar*=spring. Zunz (*ZDMG* xxvii.) takes a similar view, regarding the Bk. of Esther as designed to invest the festival with a Jewish character when it could no longer be got rid of; while Meyboom gives the idea a practical form by supposing Haman to be an emblem of winter overcome by the sun (Esther) and the moon (Mordecai).

3. Hitzig (*Gesch. Isr.*) observes that *Phur* in mod. Arabic=New Year (cf. *pûrva=the first*), and argues for a New Year's festival of Parthian origin which the Bk. of Esther (after B.C. 238) was designed to commend to the Jewish nation generally, its historical elements, such as they are, being derived from the early Arsacid, not the Achæmenid period.

4. A more remarkable theory is that which was originated by von Hammer in 1827 (*Wien. Jahrbuch Lit.*), and elaborated and developed by Lagarde in his 'Purim,' *Ein Beitrag zur Gesch. der Religion* (1887), according to which the feast is a Judaic transformation of the old Zoroastrian Farwardigân (Festival of the Dead), observed on the last ten days of the year, including five intercalary days. Lagarde (while also ascribing an influence to the μαγόφονια of Herod. iii. 79, and to a *Fest des Unbürtigen*) endeavours to make out a linguistic connexion between the Pers. name just mentioned and the various phases of the Greek name by which Purim is represented in the Septuagint (viz. φρουραί, φουρδία, φουρμαία, φρουραίοι), finding in these the elements of New-Pers. *Pôrdigân*, which he identifies with the φουρδιγάν, mentioned by the Byz. Menander as a Pers. feast in the 6th cent., and inferring the original Gr. form to have been φρουδαιά=Heb. *Purdaia* (פּוּרְדַּיָּא), while he explains away the Heb. פּוּר by supposing that the original reading (3^{7}) may have been, not פּוּר הוּא, but פַּרְמָנָה (*pharmanah*)=Pers. *firman* (edict). Renan takes a similar view (Livre iv. *Hist. du P. d'Isr.*), tracing the name to Pers. *Fourdi* (Aram. *Pourdaï*, Heb. *Phourdim=Phourim*), and supposes the festival to have acquired its halo of Jewish romance in the time of the Maccabees. The etymological argument, however, is very precarious, popular usage in such a case being little influenced by corruptions of text,

and the various Gr. readings being too easily accounted for by the errors of Alexandrian copyists to justify us in using them to correct such a good Heb. text, even if the derivation from *Farwardigân* were better supported than it is (for objections see Halévy in the *Rev. des Études Juives*, 1887, who derives the LXX forms from the Gr. *φρουρά*=*guard*).

5. Another theory which has been recently advanced with no less confidence is that of Grätz (*Monatsschrift Ges. u. Wiss. d. Jud.* xxxv. 10–12). He traces Purim to Heb. פּוּרָה (*pûrah*)=wine-press, supposing the feast to have been due to the adoption by the Jews in Palestine (in the reign of Ptolemy IV. Philopator, B.C. 222–205, through the Hellenizing influence of Joseph the tribute-collector,—Jos. *Ant.* XII. iv.) of the Gr. festival Πιθοιγία=jar-opening, corresponding to the *Vinalia* of the Romans, alleging in support of his theory the riotous mirth and the making of presents of wine which characterized that Bacchanalian season. The linguistic argument, however, is seen to be more apparent than real when it is noticed that *wine-press* suggests, not *spring* (when the *Anthesteria* were held, of which the *Pithoigia* formed part), but *autumn*, and that the *Anthesteria* lasted for *three* days. Moreover, it is scarcely conceivable that such a Gr. institution could have gained in the course of a generation or two such a strong hold on the affections of the Jews as to resist the anti-Hellenic reaction which set in under the Maccabees within half a century afterwards.

6. Still more recently Zimmern (*ZATW*, 1891) has derived the Feast of Purim from the Bab. *Zagmuku* (otherwise *Akitu*), an ancient New Year's festival, celebrated with great pomp and mirth in the opening days of Nisan (cf. Est 3^7). This was remarkable chiefly for an *assembly* (Assyr. *puḫru*, easily passing into the meaning of feast, cf. κοινή and *cœna*, *convivium*) of the gods, which was held under the presidency of the Bab. tutelar deity *Marduk*, *Merodach* (cf. *Mordecai*), in a chamber forming part of a larger room (*Ubšugina*=*room of the puḫru*) in his temple *Ê-Sagila*, for the purpose of settling the fates of the king and the whole nation for the coming year (cf. the *lot* of Est 3^7 9^{24}). This celebration represented a similar mythical assembly of the gods, supposed to be held in a mysterious spot in the far East, which, again, had its prototype in a convivial assembly of the gods on the eve of the creation (see art. BABYLONIA, vol. i. 217^a), at which Marduk was appointed to overcome the rival power *Tiâmat*, and carry out the work of creation. In this connexion Marduk is significantly called 'the arranger of the *puḫru* of the gods.' In *Tiâmat* Zimmern thinks we may find the original of *Haman* (as in *Marduk* of *Mordecai*); and in the story of the Bk. of Esther he sees a Jewish transformation of the Bab. legend (Bel and the Dragon), the change of date from Nisan to Adar being due to the desire to keep it a month earlier than the solemn Passover.

Confirmation of this theory in a modified form is offered by Jensen (*WZKM* vi. 47 ff. 209 ff.; see also his communication to Wildeboer, quoted by the latter in his Comm. on 'Esther' in Marti's *Kurzer Hdcomm.* p. 173), who suggests the identification of Haman with an Elamite god Humba-ba=*Hummam* (corresponding to the Bab. Marduk), of Haman's wife *Zeresh* with Hummam's consort *Kiriša*, and of *Vashti* with an Elamite divinity *Wasti*, while at the same time pointing out that *Esther* =Bab. *Istar*, and that *Hadassa* in Bab.=*bride*. He also makes out *Istar* to be a cousin of *Marduk*, as Esther of Mordecai. With this mythology he connects the Bab. New Year's epic which celebrates, in twelve parts, the changing fortunes of Eabani (Marduk), and he finds in the Bk. of Esther a combination of these and other elements of a more popular character relating to the Babylonian conquest of the Elamites, the whole being wrought up by Jewish fancy amid Pers. surroundings.

Wildeboer, while accepting this theory, combines with it the idea of a festival of the dead (All-Souls'-Day), as suggested by Lagarde above, and applied by Schwally (*Leben nach dem Tode*, 42 ff.). Hence the feastings and fastings and sending of gifts—repasts and offerings for the dead being a usual accompaniment of such commemorations in Persia and elsewhere; hence, too, the absence of the name of God from a story intended for such semi-heathenish rites, as its introduction in such a connexion would have given offence to the religious authorities and prevented its admission to the synagogue.

A different version of the same theory is given by Br. Meissner (*ZDMG*, 1896). He traces back the Jewish festival through its Persian medium to the festivities referred to by Berosus under the name of Σάκαια, which he identifies (on doubtful etymological grounds) with the Bab. Zagmuk, as popularly understood and observed. In the celebration of this festival, which was of so merry a character that Istar, the goddess of love, naturally acquired a more prominent place in it than Marduk, it was usual for a slave, arrayed in royal apparel, to rule over the nobles for five days, and something like a reversal of the ordinary social relations took place. Meissner supposes the Jews to have become acquainted with it in Susa, and to have appreciated it so much in their state of subjection as to perpetuate it in a form that was specially fitted to glorify their own nation.

In the *Expositor*, Aug. 1896, Mr. C. H. W. Johns calls attention to the fact, as brought out by Peiser in the *Keilinschriftliche Bibliot.* vol. iv. p. 107, that the Assyr. word *puru* means 'term of office,' 'turn,' and holds Purim to be derived from *Puru*, which is free from the ineffaceable guttural in *puḫru*, as the common designation of the New Year's feast on its *secular* side (in connexion with the accession of officials), as distinguished from its sacred names and associations, with which the Jews could have no sympathy.

According to a conjecture of M. J. de Goeje's, favoured by Kuenen, the story of Esther is derived from the same Persian tradition as the tale of *The Thousand and One Nights*, which has a similar heroine in Scheherazade.

The word *Pur* has sometimes been supposed to belong to the same root as Pers. *pâre* and Lat. *pars*, but Halévy traces it to a lost Aram. word פּוּרָה, from root פרר=to break in pieces, after the analogy of other Semitic tongues, in which the idea of 'lot' is closely related to that of fraction, or partition, with which he connects the distribution of gifts at the feast. Another suggestion is that it may have denoted some object (cf. *urn*, *dice*, *cards*) used in casting lots,—such as Dieulafoy (*Rev. des Ét. Juives*, 1888) claims to have discovered in the excavations of the Memnonium at Susa, in the shape of a quadrangular prism, bearing different numbers on its four faces, which he thinks may have been used for casting lots, the name *pur* (like Sanskrit *pur* 'fulness,' Pers. *pur* 'full,' Lat. *plenus*, Fr. *plein*) having reference to its *solid* form. But Jensen (quoted by Wildeboer as above) derives the word from Assyr. *pūru* or *būru*=*stone*, used in a metaphorical sense analogous to that of גּוֹרָל and *ψῆφος*.

In subsequent times the Feast of Purim has often been the means of sustaining the faith of Jewish communities when in imminent danger of destruction at the hands of their enemies, of which we are reminded by the Cairene Purim (*Furin al-Mizrayim*) and the Purim-Vincent, designed to commemorate the deliverance of the Jews in Cairo and Frankfort in 1524 and 1616.

It may be added that the distinction between 'Great Purim' and 'Little Purim,' referring to the two celebrations that used to take place in leap-year, in Adar and Ve-Adar respectively, cannot be traced to an earlier period than the 2nd cent. A.D.

LITERATURE.—Besides the authorities cited above, see the literature referred to in art. ESTHER, and, further, Derenbourg, *Hist. de la Pal.* 442 ff.; W. R. Smith, *OTJC*^{2}, 184 n.

J. A. M'CLYMONT.

PURITY.—This word, in subst. form, is not found in AV or RV of OT, and occurs only twice in NT, 1 Ti 4^{12} 5^2 (*ἁγνεία*), the RV adding, however, a third instance when it accepts (with ℵ B) *καὶ τῆς ἁγνότητος* at 2 Co 11^3. The form 'pureness' occurs once in NT, 2 Co 6^6 (*ἁγνότης*), and three times in OT, Job 22^{30}, Is 1^{25}, Pr 22^{11} (Heb. being *bōr* in the two former passages, and *ṭāhôr* in the last, and the LXX reproduction being nearest to exactness in the *ὁσίας χεῖρας* of Proverbs). In all these instances the use of 'purity' is ethical. This ethical use is one of the functions of all the Heb. and Gr. words constituting the family of *purity*, though it would be an error to say that any one of these words is never used ceremonially; even *bārar* (primarily= 'separate') is ceremonial in at least one passage, Is 52^{11}. And, of course, there is the literal use also, as, for instance, to describe gold when free from alloy (Ex 25^{11} *et al.*, *ṭāhôr*, *καθαρός*; cf. Rev 21^{21}). But the Eng. translators have preferred 'purity' and its family for the ethical region (though they have never so used 'purification,' and have not restricted 'purify'), and have preferred 'clean' (though 'cleanness' is almost always ethical) for the double office of ethical and ceremonial. In the Gr. usage there are similar preferences. *Ἁγνός*, *ἁγνεία*, *ἁγνότης*, *ἁγνῶς* (Ph 1^{17} only, RV 'sincerely') are in NT exclusively ethical, though not so exclusively *ἁγνίζω*, and not at all *ἁγνισμός* (Ac 21^{26} only); in LXX *ἁγνός* is almost always ethical, though never *ἁγνίζω*, *ἁγνεία*, or *ἁγνισμός* (Jer 6^6 is doubtful; Heb.='rest for your souls,' LXX rendering *ἁγνισμός*, which may be intended to mean national purification from idolatry); *ἁγνότης* and *ἁγνῶς* do not occur; while *καθαρός*, *ṭāhôr*, is in LXX mainly ceremonial, and in NT, as is natural, nearly always ethical; indeed, in Tit 1^{15} (*πάντα καθαρὰ τοῖς* *καθαροῖς*) the idea of ceremonial or Levitical impurity, already ignored in the spiritual Psalms (*e.g.* Ps 119), is overtly surrendered (cf. Mt 15$^{11-20}$, Mk 7^{15}). Ἁγνός and its immediate correlates are doubtless connected with the more comprehensive family of ἅγιος, but form at the same time a distinct branch confined to one aspect of holiness, *holiness* and *purity* remaining so far distinct throughout OT. Ἅγιος, *ḳādōsh*, 'holy,' as separate, as related to God, who is absolutely separate from all evil, is in OT used fundamentally, not of ethical qualities, but of position—the position of God as *unapproachable* in majesty, power, and goodness; the position of men as *consecrated* to and by God, and therein and thereby summoned to be *separate*, in God-likeness, from all the defilements of heathenism (Lv 19^{2} 11^{44}); and, finally, the position of material things as related to the service of God or the consecrated position of men. One of the most prominent of the defilements of heathenism was sensuality, and to this the family of ἁγνός stands especially opposed, both in classical Greek (cf. ἁγνή with Artemis in Homer, and the use of ἁγνός in Soph. *Antig.* 880, and Dem., *adv. Neær.* 59, 78) and in sacred Greek (cf. 4 Mac 18$^{7.\,8}$, and 2 Co 11^{2}, Tit 2^{5}); yet it often takes a wider sweep and covers purity of motive (Ja 4^{8}, 1 P 1^{22}), and of character generally (1 Co 11^{3}, Ja 3^{17}, 1 Jn 3^{3}, and in LXX Ps 11 (12)^{6} 18 (19)^{9}, Pr 20^{9}).

In NT ἁγνός and καθαρός may perhaps be distinguished (see Westcott on 1 Jo 3^{3}) as predominantly connoting *feeling* and *state* respectively, ἁγνός (cf. ἅζομαι) implying a shrinking from pollution, while καθαρός expresses simply the fact of cleanness. Hence the ἁγνίζει ἑαυτόν in 1 Jn 3^{3} and the ἁγνίσατε καρδίας in Ja 4^{8} penetrate more deeply towards the root of the matter than the καθαρίσατε χεῖρας of the latter passage, or even than the καθαρίζει ἡμᾶς of 1 Jn 1^{7}, the καθαρίσῃ ἡμᾶς of 1 Jn 1^{9}, and the καθαρίσῃ λαόν of Tit 2^{14}, in proportion as the purification by the man of his external acts, or the purification by the external influence (if we may so speak) of God or Christ, has less to do with internal and personal feeling than the effort of the man upon his inner life. Westcott also distinguishes ἁγνός and καθαρός from ἅγιος, in that the latter is 'holy absolutely in itself or in idea,' while ἁγνός and καθαρός 'admit the thought or the fact of temptation or pollution.' So 'a man is ἅγιος in virtue of his divine destination (He 10^{10}) to which he is gradually conformed (He 10^{14}),' while he is καθαρός or ἁγνός according (we may add) as we regard his state or the internal discipline by which, on the human side, the state is attained. If these distinctions hold, we shall, with Westcott, interpret the phrase 'even as he is pure' (ἁγνός), 1 Jn 3^{3}, not of God (of whom ἁγνός could not be predicated), but of Christ in the light of the discipline of His human life.

Another word, which AV translated 'pure' in 2 P 3^{1} ('your pure minds'), and which is very closely allied to ἁγνός, is εἰλικρινής (-εια or -ια), a word of uncertain etymology (see Lightfoot on Ph 1^{10}), but of no uncertain significance. It is now, in RV, in all five passages where it occurs, rendered by 'sincere' (or its subst.), that is, *unmixed*, a sense which it bears in the only place where it is found in LXX, Wis 7^{25}, Wisdom being there spoken of as an 'unmingled effluence of the glory of the Almighty.' Trench (*NT Synon.*^{8} p. 309) is probably correct in distinguishing εἰλικρινής from καθαρός, as denoting (the former) freedom from the falsehoods of life and (the latter) freedom from its pollutions. Ὅσιος, which is associated with words for 'purity' at He 7^{26}, has special reference to piety, *i.e.* reverence for the acknowledged sanctities of law and religion. See CLEAN, HOLINESS, and UNCLEAN.
J. MASSIE.

PURPLE (אַרְגָּמָן *'argāmān*; Aram. אַרְגְּוָן *'argĕwān* (Dn 5$^{7.\,16}$); Arab. *urjuwân*; πορφύρα, *purpura*).—This dye was extracted from the shell-fish *Murex trunculus*, L., and *M. brandaris*, L., and sometimes from *Purpura hæmastoma*. Large heaps of the shells of these molluscs are found near Tyre, and outside the south gate of Sidon. The dye was known as Tyrian purple. It was extracted from the throat of the animal, each one yielding a single drop. The exact colour is uncertain, as the art of extracting the dye is lost. The fluid is at first white, then, by exposure, becomes green, and finally reddish purple. The purple (πορφυροῦν) robe (ἱμάτιον) of Jn 19^{2} (cf. πορφύραν, Mk 15^{17}) is called scarlet (χλαμύδα κοκκίνην) in Mt 27^{28}. See, further, art. COLOURS in vol. i. p. 457^{b}.
G. E. POST.

PURSE.—See BAG.

PURTENANCE (an abbrev. of 'appurtenance,' from Lat. *apertinere*, through Old Fr. *apartenir*, *apurtenaunse*) means properly whatever pertains to, and in its single occurrence in AV (Ex 12^{9}) is used for the intestines of the Passover lamb (RV 'inwards'). The tr. is from Tindale. Wyclif has 'entrayls.' Cf. *Babees Book*, p. 275, 'Kydde roste with ye heed and the portenaunce on lamb and pygges feet, with vinegre and percely theron.'
J. HASTINGS.

PURVEYOR, *i.e.* 'provider' (Fr. *pourvoyeur*, from Old Fr. *proveoir* or *porveoir* = Lat. *providere*), occurs only in To 1^{13} of Tobit, who obtained grace and favour in the eyes of Enemessar and became his *purveyor* (ἀγοραστής). The ἀγοραστής (lit. 'buyer') was the slave who had to buy provisions for the house (Xen. *Mem.* I. v. 2); cf. the Lat. *obsonator* (Plaut. *Mil.* III. i. 73; Sen. *Ep.* 47).
J. A. SELBIE.

PUT (AV Phut, except in 1 Ch 1^{8}, Nah 3^{9}).—Name of an African nation; פּוּט, LXX Φούδ in Gn, Ch (A in Ch Φούτ, Genes. Cotton. Φούθ), in the Prophets Λίβυες (except Nah 3^{9}, where the rendering φυγή appears,* with a false division of the verse); the marginal additions of Q (Marchalianus) twice explain the name fancifully as στόμα; Vulg. *Phuth*, *Phut* (Ch), in the Prophets *Libyes*, *Libya* (Ezk 30^{5}—so AV in Jer and Ezk).

In Gn 10^{6}, 1 Ch 1^{8}, Put is the third son of Ham. In the Prophets, warriors from Put are principally associated with the armies of Egypt as auxiliaries. Jer 46^{9} 'Cush and Put, that handle the shield, and the Ludim, that handle and bend the bow,' are among 'the mighty men' of Egypt. In Ezk 30^{5} we have a similar enumeration of auxiliaries beginning with Cush and Put. In Nah 3^{9} Thebes (No-amon) has Ethiopia and Egypt as 'her strength,' Put and Lubim as her 'helpers.' A distinction seems to be made here between the subjects of the Ethiopian-Egyptian empire and the independent tribes, living farther off, who appear to have served the Pharaohs only as mercenaries. In Ezk 27^{10} Tyrus is said to have had Persia and Lud and Put in her army. An employment of E. African mercenaries in Tyrus is strange, although it does not present greater difficulties than the connexion with various other remote nations, like Persia (but see below). In Ezk 38^{5}, however, the circumstance that in the army of the Northern prince Gog from Magog 'Persia, Cush, and Put' appear among the various barbarians from Asia Minor, is very surprising. If we do not wish to accuse the prophet of senselessly accumulating here all obscure names of remote nations known to him, it is most natural to assume a corruption of the text, due to a reader's having enlarged it from other passages (from 27^{10} ?). A blunder of the scholarly Ezekiel, who displays such a wide knowledge of geography, especially in ch. 27, is not very probable. Otherwise, Put would be another country than the one usually designated (see below). The passage must certainly be used with caution. On the other hand, Is 66^{19} seems to come in here: 'Pul and Lud, that draw the bow,' as the most remote nations. The reading Φούδ for Pul in the LXX (א Φούθ) confirms the evident emendation to *Put*.

---

* This blunder seems to be one of the rare instances where the Egyptian tongue influenced the Alexandrian translators. פוּט does not exist in Hebrew, nor does it mean 'to flee' in the Semitic languages, but Coptic has πωτ 'to run, to flee.' Some MSS read Φούδ also in Ezk 27^{10}; see Field, *Hexapla*.

These biblical passages are insufficient to determine the situation of the country. However, apart from the difficult and doubtful name Lud, we see the Libyans repeatedly distinguished from Put, *e.g.* in Gn 10^{13} (see LEHABIM) and Nah 3^{9} (see LUBIM), also in Ezk 30^{5}, where we must read *Lub* instead of *Cub*, after the LXX. Therefore the guess of the LXX at the Libyans has little probability. We have rather to look to the east of Africa.

The best interpretation of the name, which is now being more and more generally accepted, is the identification with the country *Punt* (or rather *Puent* ?) of the Egyptian inscriptions.[*] The Persian list of tributary countries in Naksh-i-Rustam (Spiegel, *Pers. Keilinschr.*^{2} 119) enumerates Kushiya, Putiya, and Masiya (Babylonian translation *Pûṭa, Kûšu, Maṣṣû*), confirming the view that *Puṭ* (with assimilation of the *n*) was the form of the name used by all Semites, and that it signified a part of N. Eastern Africa. The Egyptians pronounced *t* after *n* regularly with a sound which the Greeks translated by δ (cf. Φούδ with the correct rendering, not of the Hebrew, but of the Egyptian pronunciation), the Semites by ט. So *Pûṭ* stands for *Pu*(*n*)*t*, quite regularly.

The Egyptian inscriptions mention this country of Punt (later form *Pune*) very frequently after *c.* 3000 B.C. According to the latest investigations, it comprised the whole African coast of the Red Sea from the desert E. of Upper Egypt to the modern Somali country.[†] Parts of it, evidently only those in the north (between Souakin and Massoua ?), were tributary to the great conquering Pharaohs of the 18th dynasty. Whether the masters of Egypt in prophetic time extended their power so far south is uncertain. But at all times there was intercourse and commerce between Egypt and the southern rich parts of Punt both by land, through the Nubian desert, and by water. We have various inscriptions referring to commercial naval expeditions sent by the Pharaohs, especially in the 12th, 18th, and 20th dynasties, of which that in the time of queen *Ḥa't-sheps*(*o*)*ut* has become most famous by the fine pictures illustrating it upon the walls of the temple of Deir el-Bahri in Western Thebes. Already in the 5th dynasty king Assa received a member of the African dwarf-tribes from Punt. The treasures of Punt were: slaves, cattle, gold (from a region called 'Amau), ivory, ebony, ostrich- feathers and -eggs, rare live animals (especially monkeys), greyhounds for hunting, gum, and a number of fragrant substances from various trees or shrubs. The incense needed by the Egyptians for the divine worship and for cosmetics formed the most important product of the country. The parts of Punt producing it were called 'the incense-terraces' (or 'stairs'), apparently situated on the Abyssinian coast (incense in sufficient quantity grows only E. of Bâb el-Mandeb), but it would be wrong to limit Punt to these regions. The inhabitants were rude nomadic shepherds, some of them negroes or mixed with negroes, but mostly of the pure Hamitic race, *i.e.* near relatives of the Egyptians and the other white Africans. Consequently their descendants are the desert tribes called *Troglodytæ* (better *Trogodytæ*) or *Ichthyophagi* by the Greeks, *Bedja* by the Arabs in the north, Saho and Afar (Danakil) on the Abyssinian coast.[*] They can hardly have formed a large contingent of the Egyptian armies, because the desert regions north of Abyssinia were too thinly populated. Only the archers of the region *Maza* (*Maṣiya* of the Persians, see above), more inland, *i.e.* nearly in the modern province of Taqa, were as popular as policemen and guards as the Nubas are in modern Egypt; this country of the Mazoyu is frequently separated from Punt. But the prophets speaking of Put-Punt evidently did not consider the scanty population of this country. To them it represented all Africa east of Egypt and Ethiopia (*i.e.* the Nubian Nile valley, not modern Ethiopia or Ḥabesh), an endless and mysterious part of the world. The Phœnicians (cf. Ezk 27^{10}) may have extended their commercial connexions to what the Greeks called the 'coasts of the aromata,' after the completion of Necho's canal between the Nile and the Red Sea;[†] before that time the difficulties must have been too great to allow a direct contact.

Commentators who wished to follow the translation of the LXX, compared the Coptic name ϕⲁⲓⲁⲧ 'Libya (especially the western part of the Delta), Libyan' (thus Knobel and, following him, Dillmann). The hieroglyphic equivalent of *Phaiat* has not yet been found, but the word looks like a (plural ?) denominative from a feminine noun ending in *-et*. This would not at all agree with the *ṭ* (ט) of the Semites, unless an *n* had been assimilated (see above). The Greek translators of the prophets may have thought of this name, nevertheless. See, however, above, the objections from the biblical passages and the confirmation of the reading *Pûṭ* from the Persian inscription. Some Egyptologists compare the Egyptian expression for 'foreign warriors,' which they erroneously read *pet*, *pite*, etc. But the Amarna tablets have shown that this expression 'bowmen' was *pedate* (singular 'a troop of bowmen' *pedite*(*t*), derived from *pide*(*t*) 'bow'). Consequently neither the Coptic ϕⲁⲓⲁⲧ nor the Semitic *Puṭ* agrees with these formations. How the comparison of 'a river Phut in Mauretania' (*i.e.* Morocco, which was never even known to the Egyptians!) in Josephus (*Ant.* I. vi. 2)[‡] was seriously considered by modern commentators, remains a mystery.[§]

W. MAX MÜLLER.

---

[*] Due to G. Ebers in his *Aegypten und die Bücher Mose's*, p. 64, accepted, *e.g.*, by Stade (*de Isa. vat. Æth.*). On the weak attempt at contradiction by Dillmann, see the present writer's *Asien*, p. 115.

[†] A great mass of earlier literature on the much discussed situation of this country is antiquated. Formerly scholars tried to identify Punt with Southern Arabia, then (after Maspero) they located it on both sides of the Red Sea. The latest literature will be found in Krall, *Das Land Punt* ('Sitzungsberichte Akad. Vienna,' cxxi. 1890); Naville, *Deir el-Bahari*, iii.; W. M. Müller in *Mittheil. vorderas. Gesells.* iii. 1898, 148 (cf. *Asien und Europa*, ch. 7). Glaser (*Mittheil. vorderas. Gesells.* iv. etc.) unfortunately uses some very antiquated sources.

[*] If we have a right to compare the tribes more to the south-east, we might speak also of the Gallas. The frequent comparison of the Somalis with the 'Punti' is erroneous. The Somalis lived originally only on the eastern coast of modern Somaliland, *i.e.* at too great a distance. Some writers have tried to find in Punt the original African seat of the 'Phœnicians.' But this idea rests only on the accidental similarity of a Latin pronunciation (Punicus for Phœnicus). No ethnologic connexion between those African savages and the highly cultured Asiatic nation can be found. The position of the Phœnicians in Gn 10 among the Hamites seems to be due to other reasons than those of ethnology.

[†] See *Mittheil. vorderas. Gesells.* iii. 152, on the completion of the canal.

[‡] Called *Phthuth* Ptol. iv. 1, 3; *Fut* Plin. v. 1, and known thus also to Jerome.

[§] Winckler (*Forschungen*, i. 513) has raised the question

PUTEOLI (Ποτίολοι, modern Pozzuoli).—The great commercial port of Italy, in what is called now the Bay of Naples, but was at one time called the *Sinus Puteolanus.* It was at this port that St. Paul landed on his journey to Rome (Ac 28^{13}). There were already brethren there, and he and St. Luke were entreated to tarry with them seven days. Its name is of doubtful origin, but is attributed either to the putrid smell of the sulphurous springs close by, or to the wells (*putei*) of the place. Cicero, like St. Paul, landed there when he came from Sicily (*pro Planc.* 26). It was the resort of trade from all parts, notably from the East, and the corn supplies for the capital were landed here. Josephus speaks of himself as having landed there after being shipwrecked (*Vit.* 3), and gives its other name of Dicæarchia. There must have been a Jewish population in the place (cf. Jos. *Ant.* XVIII. vi. 4), and this may perhaps account for the presence of Christians there. Some of the ruins of the ancient mole, at which the apostle must have landed, are still in existence.

H. A. REDPATH.

PUTHITES (הַפּוּתִי, B Μειφειθείμ, A Ἠφιθείν).—One of the families of Kiriath-jearim, 1 Ch 2^{53}. See GENEALOGY, iv. 38.

PUTIEL (פּוּטִיאֵל, Φουτιήλ).—The father-in-law of Aaron's son Eleazar, Ex 6^{25} (P). About Putiel we hear nothing more in the OT, and the meaning of the name is uncertain. Gray (*HPN* 210) classes it amongst the late and artificial names characteristic of the lists of P and the Chronicler. It may be half-Egyptian half-Semitic (='he whom El gave,' see Dillm.-Ryssel, *Exodus*, *ad loc.*), but even if so, it will not bear all the weight of the argument that Hommel (*AHT* 293, 295) builds upon it in regard to the early history of Israel and the character of the Priests' Code. J. A. SELBIE.

PUVAH.—See PUAH.

PYGARG (דִּישֹׁן *dīshōn*).—*Dīshōn* occurs only once (Dt 14^{5}). It is the fifth name in the Heb. list. In B of the LXX it comes third in order (πύγαργος), *yaḥmûr* and *'aḳḳō* being left out, although AF reproduce these by βούβαλος and τραγέλαφος. Both Eng. VSS have adopted 'pygarg' for *dīshōn*, but AVm has 'dishon *or* bison.' We have no certain knowledge of the animal intended by *dīshōn*, except that it is to be inferred, from its position in the list, that it was an antelope. If, of the four antelopes found in the deserts contiguous to Pal., *Gazella Dorcas*, L., corresponds to *ẓěbi*, *Antilope leucoryx*, Pall., to *tě'ō*, we may adopt *A. Addax*, Licht., for *dīshōn*. This species is over 3½ feet high at the shoulders, and shaped like the reindeer. Its horns are spiral, 2½ feet long. Its colour is white, with the exception of a black mane, and a tawny colour on the shoulders and back. It is uncertain whether the fourth antelope, *Alcephalus bubalis*, Pall., is mentioned in Scripture (see UNICORN). G. E. POST.

PYRAMID.—Simon the Maccabee is said to have erected a magnificent monument to his parents and his (four) brothers at Modein. This consisted partly of seven pyramids (πυραμίδας), six set up one opposite another, with the seventh (intended apparently for Simon's own monument) probably standing by itself at one of the ends, 1 Mac 13^{28} (cf. Jos. *Ant.* XIII. vi. 6). Pyramid-graves are, of course, most familiar to us in Egypt, but they were not uncommon elsewhere. There is probably a reference to such graves in Is 14^{18} 'all the kings of the earth, all of them, lie in honour, each one in his own house.' The Bible contains no certain special allusion to the pyramids of Egypt, the reference in Job 3^{14}, which has been conjectured, being very doubtful (see Dillm. *ad loc.*).

PYRRHUS (Πύρρος: lit. 'fiery-red').—Amongst the companions of St. Paul who accompanied him on his last journey to Jerusalem from Philippi was Sopater of Berœa, who in the RV is described as 'son of Pyrrhus' (Ac 20^{4}). The word Πύρρου is omitted in TR in accordance with the later authorities, but it is read by all the different classes of older documents (אABDE vulg. boh. sah. Or.), and must clearly have formed part of the original text. Blass (*ad loc.*) points out that this is the only case in the NT in which a patronymic is added after the Greek fashion, and that perhaps it implies that Sopater was of noble birth. A. C. HEADLAM.

PYTHON.—The reading πύθωνα in Ac 16^{16} is attested by the overwhelming evidence of אABC* D*. The inferior reading πύθωνος, found in C^{3}D^{2} EHLP, is easily explained. The accusative form was not understood. Hence the more intelligible construction with the genitive (cf. Lk 4^{33}). The reading πύθωνα is obviously the right one (so Lachm. Tisch. WH, Blass).

The name Πύθων as a Greek term must be connected with that of the district Πυθώ in Phocis, which lay at the foot of Parnassus where the town Delphi was situated. Its geographical association with the Delphic oracle over which Apollo presided gave rise to the adjective Πύθιος as an epithet of Apollo. His priestess was called ἡ Πυθία. Also the name Πύθων, derived from this local connexion, was bestowed on the serpent whom the god was believed to have slain when he took possession of the Delphic oracle. According to Apollodorus (I. iv. 1) this oracle was formerly in possession of the goddess Themis, and the mysterious chasm, from which the intoxicating and inspiring exhalations issued, was guarded by this serpent, whom Apollo destroyed. The connexion of the serpent with wisdom and soothsaying is based on demonology (see MAGIC in vol. iii. pp. 209 (footnote), 210). Cf. Gn 3^{1}, Mt 10^{16}.

In the present passage it is clear that what is implied is that the girl was considered to be possessed of a soothsaying demon. In the language of the OT she would probably be called a בַּעֲלַת אוֹב (1 S 28^{7}). The word אוֹב, however, is employed by itself to convey this meaning, and is reproduced in the LXX by ἐγγαστρίμυθος (Lv 19^{31} 20$^{6.27}$). The Syriac version on Ac 16^{16} renders by ܪܘܚܐ ܕܩܣܡܐ 'soothsaying spirit' (lit. 'spirit of soothsaying'). See art. SOOTHSAYING; cf. also *Necromancy* under SORCERY.

OWEN C. WHITEHOUSE.

---

whether the *Puṭu-yaman* mentioned in the fragmentary annals of Nebuchadnezzar does not come in here. This 'Greek-Putu' is mentioned among remote countries in the midst of the sea, which aided Egypt under Amasis against the Babylonians, and this reminds Winckler of Nah 3^{9}. But the necessary addition *yaman* (Greek) shows that this country (Winckler supposes Lesbos, suitably to his restoration of the name of the prince, viz. [*Pitta*]*kû*(*s*), or Caria) is to be distinguished from the ordinary Pût of the Bible, the Persians and Babylonians. Perhaps the Put of Ezk 27^{10} [ch. 38^{5}] might be explained after Winckler, so that we should have two countries called Put—one in Africa, another in the north.

Q

QOHELETH.—See ECCLESIASTES.

QUAIL (שְׂלָו [*Kerê* שְׂלָיו] *sĕlāw*, in Nu 11^{31} plur. שַׂלְוִים, which implies a sing. שַׂלְוָה *salweh*; *ὀρτυγομήτρα*, *coturnix*; Arab. *selwa*).—A well-known migratory bird, *Coturnix vulgaris*, L. A few individuals remain in Egypt and the Holy Land throughout the year. The migrators arrive in abundance, on their way north towards the beginning of March, and again on their way south in November. Some pass through without stopping, while others remain to breed. Their arrival is heralded by their peculiar call, especially early in the morning and at sunset. They migrate in vast flocks, crossing the Arab. desert, flying for the most part at night. They also cross the Mediterranean, selecting as their places of passage the narrowest portions, as that between Africa and Malta, Sicily, and the Greek islands, etc. They always fly with the wind. Their bodies are so heavy in comparison with the power of their wings that they cannot cross very long reaches of the sea. Many perish, even in the short passage, and those which arrive safe are excessively fatigued. Quails are twice mentioned in connexion with the Wilderness Journeyings (Ex 16^{13} [P], Nu $11^{31.\,32}$ [JE], cf. Ps 105^{40}). Those which supplied the Israelites came in spring, while on their way northwards. Tristram has shown that they would naturally follow up the Red Sea to its bifurcation, and cross at the narrowest part into the Sinaitic peninsula. A sea wind would bring them in immense numbers into the camp which the Israelites occupied at that time. The miracle consisted in their being directed to the right time and place. Quails, when migrating, begin to arrive at night (Ex 16^{13}), and are found in large numbers in the morning (Nu $11^{31.\,32}$). Their great exhaustion on their arrival makes it easy to believe all that is said in the narrative as to the numbers which the Israelites captured, and the ease with which they were taken.

The quail belongs to the order *Gallinæ*, family *Phasianidæ*. Its predominant colour is brown, shaded and mottled with rufous and grey, with edgings of black. A buff line extends down over each eye, and another down the centre of the head. Its length is 7½ inches. Its flesh is succulent. It is popularly known in Syria as the *fŭrrî*, an onomatopoetic word, referring to the whirring of its wings as it takes to flight. See, further, Dillm.-Ryssel on Ex 16^{13}. G. E. POST.

QUAKE.—To quake (from the same root as 'quick' [=alive], 'quicken,' cf. *Piers Plowman*, 'Quook as hit quyke were') is to shake, usually with fear (so always in AV, where the transit. sense does not occur). Thus He 12^{21} 'Moses said, I exceedingly fear and quake' (*ἔκφοβός εἰμι καὶ ἔντρομος*). George Fox in his *Journal* says, 'Justice Bennet of Derby was the first that called us Quakers, because I bid them tremble at the word of the Lord. This was in the year 1650.' Fox had used the verb 'quake,' which probably struck the Justice's ear as odd because already antiquated in this sense. Yet RV retains it everywhere, and adds Mt 28^{4} 'For fear of him the watchers did quake' (for AV 'shake,' Gr. *σείω*, which is tr$^{\text{d}}$ 'quake' in AV and RV at 27^{51}). Amer. RV introduces 'quake' also at Ps 18^{7}. J. HASTINGS.

QUALITY is used in Ad. Est 11^{heading} in the sense of rank: 'The stock and quality of Mardocheus. Cf. Shaks. *Henry V.* IV. viii. 95—

> 'The rest are princes, barons, lords, knights, squires,
> And gentlemen of blood and quality.'

QUARREL.—Like Lat. *querela*, from which it comes, through Old Fr. *querele*,* 'quarrel' originally meant a complaint or cause of complaint. Thus Hall, *Works*, ii. 155, 'It was thy just quarrell, O Saviour, that whiles one Samaritane returned, nine Israelites were healed, and returned not.' Then it was used for any cause or *case* that had to be pursued or defended, as in Golding's *Calvin's Job*, 559, 'Although Job had a just and reasonable quarrell, yet did he farre overshote himself'; and p. 573, 'Sometymes we will be ashamed to mainteyne a good quarrell, bycause wee see that men do but make a mocke at it.' This is the sense in which the word is used in AV: Lv 26^{25} 'I will bring a sword upon you that shall avenge the quarrel of my covenant' (RV 'execute the vengeance'); 2 K 5^{7} 'See how he seeketh a quarrel against me' (RVm 'an occasion'); Mk 6^{19} 'Herodias had a quarrel against him' (AVm 'an inward grudge,' RV 'set herself against him,' Gr. *ἐνεῖχεν αὐτῷ*); except in Col 3^{13} 'If any man have a quarrel against any,' where the meaning is rather 'complaint,' as AVm and RV; Gr. *μομφή*.

The verb 'to quarrel' occurs in AV Preface in the transit. sense of oppose, object to. Cf. Melvill, *Diary*, 370, 'At the quhilk word the King interrupts me, and crobbotlie quarrels our meitting, alleaging it was without warrand and seditius.' The modern intrans. meaning of the verb is found in Sir 31^{29}, and RV introduces it at Pr 20^{3}.

J. HASTINGS.

QUARRY.—In 1 K 6^{7} it is said that the temple was built of stone made ready 'at the quarry' (RV; AV has 'before it was brought thither,' RVm 'when it was brought away'). The MT, whose correctness is not above suspicion, is אֶבֶן שְׁלֵמָה מַסָּע; LXX *λίθοις ἀκροτόμοις ἀργοῖς*; Vulg. *de lapidibus dolatis atque perfectis*. The rendering 'quarry' or 'quarrying' for מַסָּע is probably correct (cf. the use of the root נסע in Hiphil in 1 K 5^{31} $^{\text{[Eng. 17]}}$ and Ec 10^{9}), and the meaning is that the huge stones spoken of in $5^{31\,(17)}$ were dressed before leaving the quarry (for this practice cf. Benzinger, *Heb. Arch.* 237). For the process of quarrying as carried on by the Egyptians in early times, see Maspero, *Dawn of Civilization*, p. 383 f., and *passim*. It is evident that 1 K 6^{7} breaks the connexion, and this verse is probably a later addition (so Benzinger, Kittel, *et al.*). The statement contained in it gave rise to a variety of fanciful legends tending to the glorification of the temple and its builder (see Benzinger, *Comm. ad loc.*).

The only other occurrence of 'quarry' in the EV is in Jg $3^{19.\,26}$. According to v.^{19}, Ehud turned back from 'the quarries that were by Gilgal,' and after the assassination of Eglon he 'escaped while they tarried, and passed beyond the quarries,' v.^{26}. AVm and RVm offer as an alternative rendering 'graven images'; LXX has *τὰ γλυπτά*; Vulg. in v.^{19} 'reversus de Galgalis, *ubi erant idola*,' in v.^{26} 'Locum *idolorum*.' The Hebrew is פְּסִילִים, which is used as plural to פֶּסֶל, and is employed of images of gods in wood, stone, or metal, Dt $7^{5.\,25}$ 12^{3}, Is 21^{9} 30^{22}, 2 Ch 34^{4}. Moore, who considers that 'quarries' is an unwarranted translation, proposes rendering '*sculptured stones* (probably rude stone images).' They may be the same as the stones which, according to popular tradition, Joshua erected to commemorate the passage of the Jordan (Jos 4^{20}), or, possibly boundary stones, marking the last Moabite outpost (cf. Jg 3^{26}). See, further, Budde ('Richter' in *Kurzer Hdcom. ad loc.*), who thinks the *Pĕsîlîm* probably marked the Jordan ford at Gilgal, and that the ford was known by this name. For Jos 7^5 (RVm) see SHEBARIM.

---

* The spelling has been assimilated to the distinct word 'quarrel,' a square-headed crossbow bolt (Low Lat. *quadrellum*).

In Is 51^1 מַקֶּבֶת בּוֹר (lit. 'excavation of a pit') is used for *quarry* in a fig. sense: 'Look unto the rock whence ye were hewn, and to the hole of the pit (εἰς τὸν βόθυνον τοῦ λάκκου) whence ye were digged.' On a Rabbinical conceit regarding this passage see PETER (FIRST EPISTLE OF) in vol. iii. p. 795^b. See, further, art. STONE. J. A. SELBIE.

QUARTUS (Κούαρτος).—Mentioned with Erastus, the treasurer of Corinth, as joining in St. Paul's greeting to the Church of Rome, Ro 16^{23}. He is commemorated Nov. 3. Later traditions will be found in *Acta Sanctorum*, Nov., i. p. 585.

A. C. HEADLAM.

QUATERNION (τετράδιον) means a group consisting of four persons or things. The Greek word is a ἅπαξ λεγ. in NT, being found only in Ac 12^4 παραδοὺς τέσσαρσιν τετραδίοις στρατιωτῶν φυλάσσειν αὐτόν, Vulg. *quatuor quaternionibus*. A Roman watch consisted, Polybius tells us, of four men (vi. 33: τὸ φυλακεῖόν ἐστιν ἐκ τεττάρων ἀνδρῶν), and Vegetius (*de Re Militari*, iii. 8) writes: 'De singulis centuriis quaterni equites et quaterni pedites excubitum noctibus faciunt.' The same author goes on to explain that the night was divided into *four* watches of three hours each; cf. Jerome, *Epist.* 140. 8 (ed. Vallarsi). It seems that one member of the quaternion watched (while the other three slept) through each watch. It appears from Jn 19^{23} (cf. *Ev. Petr.* 9) that a τετράδιον was on guard during the Crucifixion, and from Mt 27^{65} (ἔχετε κουστωδίαν) perhaps that the same quaternion was on duty at the time of the Resurrection; but see GUARD, 4.

Τετράδιον occurs in Philo (*adv. Flaccum*, ii. 533. 25, ed. Mangey) with the same colouring as in NT, στρατιώτην τινα τῶν ἐν τοῖς τετραδίοις φυλάκων, and fairly frequently in late authors in the sense of a quire of a book containing four double leaves, *i.e.* sixteen pages. The Latin form *quaternio* is rare, and occurs only once in the Vulgate, if we may trust Dutripon. The Peshiṭta of Ac 12^4 ('sixteen soldiers') misses the clear reference to Roman military custom. On this subject cf. Marquardt and Mommsen, *Handb. der röm. Alterthümer*, v. 407 (ed. 1876). W. EMERY BARNES.

QUEEN.—1. The usual Heb. term for 'queen' in the OT is מַלְכָּה (in Dn 5^{10} Aram. stat. emph. מַלְכְּתָא); LXX βασίλισσα; with the verb מלך 'to be queen,' Hiph. 'to make queen,' Est $2^{4.\,17}$. For מְלֶכֶת see art. QUEEN OF HEAVEN. The other words so translated in AV are—2. גְּבִירָה (lit. 'mistress,' cf. Is 24^2) 1 K 11^{19} (LXX μ(ε)ίζων) 15^{13} (ἡγουμένη), 2 K 10^{13} (δυναστεύουσα), 2 Ch 15^{16} (LXX om.), Jer 13^{18} (οἱ δυναστεύοντες) 29 [Gr. 36]^2 (βασίλισσα) [RV in the last two passages 'queen-mother']. 3. שֵׁגַל (שָׁגַל = 'ravish'; cf. Dt 28^{30}, Is 13^{16}, Zec 14^2) only in Ps 45^9 (βασίλισσα), Neh 2^6 (παλλακή).* The Aram. form of the word is found in Dn $5^{2f.\,23}$ (Theod. in all παλλακή, LXX om.). 4. שָׂרָה (lit. 'princess,' cf. AVm) Is 49^{23} (ἄρχουσαι). In NT βασίλισσα is alone found—Mt 12^{42}, Lk 11^{31}, Ac 8^{27}, Rev 18^7.

In ordinary cases of synonyms it is well to trace the usage of each word in the original; but as in this case the same Hebrew word is used to convey more than one meaning of our English 'queen,' it will conduce to clearness and also be found more suggestive if the usage of the English word in our Bibles be taken as our guide. This has three meanings: the queen reigning in her own right, the queen as the wife of the reigning king, and the queen as the mother of the reigning king.

i. *The queen reigning in her own right.*—The general tendency of the Semitic as of the other groups of nations in strictly historical times has been for women to take other than the first place in governing, and this tendency is very conspicuous in the history of Israel. Possibly the general close connexion in Semitic States of the king with the god (see KING, i. 2) made it appear unseemly that a woman should rule; and though among the Northern Arabians queens seem to have been frequent, as well as in the Southern Arabian kingdom of Sheba (see McCurdy, *HPM* § 334), there is no trace in Israel of any official recognition of women as being capable of the chief government. It is just possible, indeed, that the word Hammolecheth* (1 Ch 7^{18}), usually understood as the proper name of a Manassite woman, should be translated 'the queen' (so Targ. and many Rabbis, *e.g.* Kimchi and R. Solomon b. Melek, Vulg.), but corroborative evidence is wholly lacking. The position of Deborah as 'judge' (for parallels in Arabian history see W. R. Smith, *Kinship*, pp. 104, 171) was quite abnormal, and presumably due solely to her personal vigour and character. So too Athaliah, who reigned (מֹלֶכֶת) over Judah six years (2 K 11^3, 2 Ch 22^{12}), was a mere usurper, and traded on her earlier influence and position. Hence 'queen' in this first sense is used only of the non-Israelitish queen of SHEBA (מַלְכַּת שְׁבָא 1 K $10^{1\text{-}13}$, 2 Ch $9^{1\text{-}12}$, Mt 12^{42}, Lk 11^{31}), CANDACE, queen of Ethiopia (Ac 8^{27}), and Babylon personified (Rev 18^7).

ii. *The queen as the wife of the reigning king.*—Queen in this sense also is hardly found in Israelitish history. In Egypt (1 K 11^{19}) Pharaoh gives Hadad to wife the sister of Tahpenes the queen (הַגְּבִירָה, but the text is very doubtful). In Persia Vashti (Est 1) and Esther (Est 2 and *passim*) are successively called the queen (מַלְכָּה) of Ahasuerus. And again 'queen' is used in Neh 2^6 in reference to the royal consort (שֵׁגַל) of Artaxerxes Longimanus. In Dn $5^{2.\,3.\,23}$, however, שגל is used of royal wives of lower rank. In Israel, on the contrary, 'queen' in this sense is used only indirectly and in poetry. So מְלָכוֹת (βασίλισσαι) in Ca $6^{8.\,9}$ of wives who enjoyed some higher (perhaps more legal) status than mere concubines (פִּילַגְשִׁים, παλλακαί). In Ps 45^9 שֵׁגַל is used of the one legitimate wife.

iii. *The queen as the mother of the reigning king* (אֵם הַמֶּלֶךְ 1 K 2^{19}, 2 K 24^{15}).—Strange as it is to modern ideas that the queen-mother should be the queen *par excellence*, it is very common in the East (*e.g.* China in our own time), and perhaps almost the necessary result of polygamy (see FAMILY in vol. i. p. 847^a).† 'Queen' occurs in this sense in the Bible of a non-Israelite only in Dn $5^{10\,bis}$, where the mother (apparently) of Belshazzar is so called (מַלְכְּתָא);‡ but it is used more often of Israelites. In fact the queen-mother appears to have had a regular official status both in the Northern and in the Southern kingdom, which in part accounts for the frequency with which the name of the mother of the king is recorded (see below), and the importance attached to some of her actions. The actual term 'queen' (גְּבִירָה) is used only of Jezebel (2 K 10^{13} prob.), Maacah (1 K 15^{13}=2 Ch 15^{16}), and Nehushta (Jer 13^{18} 29^{2}). The semi-royal state, however, of Bathsheba, Solomon's mother, is shown in 1 K 2^{19}, where Solomon sits on his throne and sets a throne for 'the king's mother,' and she sits on his right hand. The importance, too, of Maacah, Asa's 'mother' (*i.e.* probably grandmother), who had retained her influence from the reign of Abijah, is shown by the mention of her idolatry, and of Asa's destruction of the monstrous figure that she had made (1 K 15^{13}= 2 Ch 15^{16}).

---

* Possibly in Jg 5^{30} (end) שֵׁגַל should be read for שָׁלָל (so Ewald, followed by Bertheau, Oettli, Renan, Kautzsch. For other proposed emendations of the text see Moore, *ad loc.*).

* The reading, however, is not certain. The Peshiṭta (which some think to be in Chronicles a Jewish Targum of 3rd cent. A.D.) reads *Maacah*.

† So among the negroes of West Africa the mother has incomparably more influence than the wife. See Miss M. H. Kingsley, *West African Studies*, 1899.

‡ Commentators have compared Amastris, the wife of Xerxes and mother of Artaxerxes I. (Herod. vii. 61), and Parysatis, the wife of Darius and mother of Artaxerxes Mnemon and Cyrus (Xen. *Anab.* I. i. 1).

Athaliah has been already mentioned. Nehushta, from Jeremiah's bitter words in Jer 22^{26}, appears to have used her official position to take an active part against Jeremiah and his policy of submitting to the Chaldæans.

From Jer 13^{18} the queen-mother appears to have worn a crown (עֲטָרָה, στέφανος) more or less like the king's, but the 'head tire' (RV) is a translation of a doubtful reading. In Jg 5^{30}, Ewald, by a slight textual change, renders 'for the neck of the queen' (see Moore, *in loc.*).

For the names of the mothers of the kings of Judah see GENEALOGY in vol. ii. p. 126^{b}. In the case of the kings of Israel the only names found are Zeruah the mother of Jeroboam I. (1 K 11^{26}) and Jezebel the mother of Ahaziah (presumably, cf. 1 K 22^{52}) and Joram (prob. 2 K $3^{2.13}$ 10^{13}).

A. LUKYN WILLIAMS.

QUEEN OF HEAVEN, THE.—מְלֶכֶת הַשָּׁמַיִם *m^{e}lekheth hash-shāmayim*, or in a few MSS מְלֶאכֶת הַשּׁ׳ *m^{e}le'kheth*, etc.; τῇ στρατιᾷ τοῦ οὐρανοῦ, 'the host of heaven,' in Jer 7^{18}, but τῇ βασιλίσσῃ τοῦ οὐρανοῦ, 'the queen of heaven,' in Jer 44 [Gr. 51] $^{17.18.19.25}$, except ℵ* in v.^{25} τῇ Βάαλ; in v.^{15} two late cursives give as the rendering of the Heb. represented by '(Then all the men which knew that their wives burned incense) unto other gods,' θεοῖς ἑτέροις τῇ στρατιᾷ τοῦ οὐρ.; with a few exceptions the other LXX MSS have no equivalent for 'unto other gods'; Aq., Symm., and Theod. in 7^{18}, and Symm. in 44 $[51]^{18}$ τῇ βασ. τ. οὐρ.; *reginæ cœli*, but also in Jerome (Kuenen, *Abhandl.* p. 187, Germ. tr.), *militiæ cœli*; Syr. (Lee), 'for the worship (ܦܘܠܚܢ) of heaven' in 7^{18} $44^{17.18.25}$, 'for the queen (ܡܠܟܬܐ) of heaven' in 44^{19}; Targ. כוכבת שמיא 'star(s) of heaven'; according to Jastrow, *the planet Venus.*

The reading מְלֶאכֶת *m^{e}le'kheth* is set aside by common consent as a late emendation due to the tradition that מלכת here was to be interpreted as מלאכת. The pointing מְלֶכֶת *m^{e}lekheth*, is sometimes explained as an intentional variation of *malkath*, 'queen-of,' meant to suggest that a false goddess was not a legitimate queen, just as *ham-Melekh*, 'the king,' when used of a false god, receives the vowels of *bosheth*, 'shame,' and becomes *ham-Molekh.* But more probably the pointing indicates that מְלֶכֶת was identified with מְלֶאכֶת 'work,' the silent Aleph having dropped (as sometimes happens, Ges.-Kautzsch ^{26}, § 23. 3).

M^{e}lekheth, thus identified, was taken by the Syriac, also by Kimchi, in the sense of 'service' or 'worship,' in which it is found in 1 Ch 9^{13} etc.; but it is clearly not the worship, but the object of worship. It was no doubt intended by the punctuators to be taken in the sense of 'the host of heaven.' Probably *m^{e}lekheth* itself was not understood to mean 'host' directly; but the punctuators equated the unusual phrase *m^{e}lekheth hash-sh.* to the more common phrase *ẓĕbā hash-sh.* (Jer, etc.), being partly influenced by the references in Gn $2^{2.3}$ to Creation as God's *m^{e}lekheth.* This view was taken by the LXX in Jer 7^{18} (unless the unlikely view be adopted that the LXX here and in 44 $[51]^{15}$ read *ẓĕbā hash-sh.*), and perhaps by the Targ., and was recognized as an alternative by Jerome; cf. above. It has been recently revived by Stade, mainly on the ground that elsewhere Jeremiah speaks of the Jews as worshipping 'other gods' or 'the host (*ẓābā*) of heaven,' and that therefore this phrase should denote a group of objects of worship; cf. also the statement that Manasseh 'built altars for all the host of heaven in the two courts of the house of Jehovah,' 2 K 21^{5}. But most critics, *e.g.* Budde (*Rel. of Isr.* p. 162), Cornill (*SBOT*), Giesebrecht (*Jer.*), Kautzsch (*AT*), Kuenen, hold that the original meaning was 'queen of heaven,' and the proper pointing is *malkath.* The pointing *malkûth*, 'kingdom,' has met with little acceptance. It is pointed out that the phrases 'worship of other gods . . . of the host of heaven' may equal 'idolatry, star worship,' and are in no way evidence against the existence of a popular and widespread cult of a particular goddess.

According to 7^{18} 44 $[51]^{15-30}$ this goddess was offered incense and cakes which 'pourtrayed' her, and had been worshipped by the ancestors of the Jews of Jeremiah's time, and by their kings and princes in the cities of Judah, and in the streets of Jerusalem. The Jewish women were specially devoted to this worship.

This 'queen of heaven' can scarcely be a collective term for the stars, and is usually identified with the moon, or some planet or fixed star; most commonly with the Assyrian *Ishtar*, the planet Venus (also, however, connected with the moon). 'Queen, or princess, of heaven' apparently occurs as a title of Ishtar, and she is styled 'Lady of Heaven,' *bilit sam-i-i*, in the Amarna Tablets (Winckler, p. 48 f.); and our goddess may be the Atar-samain (Athar-Astarte), worshipped in North Arabia. Cf. the divine title *Ba'al Shamayin* in Aramaic inscriptions. See ASHTORETH in vol. i. pp. 168^{b}, 169^{b}. At Athens cakes in the shape of a full-moon (σελῆναι) were offered to the moon-goddess Artemis; and in Arabia similar offerings were made to the goddess Al-Uzza, whose star was Venus, and to the sun (Kuenen, 208). St. Isaac of Antioch (d. *c.* 460) tells us that the Syrian women worshipped the planet Venus from the roofs of their houses, as a means of preserving and increasing their beauty. *Ishtar* seems to have been identical with *Ashtoreth*; but probably this worship of the 'queen of heaven' was not the ancient Canaanite cult of Ashtoreth, but a new worship of the goddess with her Assyrian name and rites, due to the political supremacy of Assyria in the reign of Manasseh.

The title *Regina Cœli* has been given to the Virgin Mary; and at Mukden, the Sacred City of China, there is a temple to the 'Queen of Heaven.' Cf. ASHTORETH.

LITERATURE.—See ASHTORETH in vol. i. p. 168^{b} note*, p. 169^{b} note*; and add Giesebrecht, *Jeremiah*, on 7^{18}; W. H. Bennett, *Jeremiah xxi.-lii.*, ch. xv. This article is largely indebted to Kuenen's Essay.

W. H. BENNETT.

QUESTION.—The modern sense of 'interrogation' is found in the Synoptic Gospels in the phrase 'ask a question,' Mt $22^{35.46}$, Mk 12^{34}, Lk 2^{46} 20^{40}, the Gr. being always the verb ἐπερωτάω standing alone. In Lk 2^{46} Tindale has 'bothe hearynge them and posinge them,' but the meaning is not different, since 'pose' is used in its old sense of interrogate, as in Bacon, *Hist. Henry VII.* 119, 'She posed him and sifted him, to try whether he were the very Duke of York or no.' Tindale was followed by all the Eng. VSS till the Rhem. and Auth., when 'pose' had become antiquated in this sense. The sense of interrogation is found also in

2 Es 8^{55} ‘And therefore ask thou no more questions concerning the multitude of them that perish’ (Noli ergo adicere inquirendo). A slightly different meaning is found in 1 Es 6^{30} ‘Without further question’ (ἀναμφισβητήτως); with which may be compared 1 Co $10^{25.\,27}$ ‘Asking no question for conscience’ sake’ (μηδὲν ἀνακρίνοντες διὰ τὴν συνείδησιν).

The phrase ‘to call in question’ is in AV more than to dispute; it means to accuse, to bring into judgment. Thus Ac 19^{40} ‘We are in danger to be called in question for this day’s uproar’ (κινδυνεύομεν ἐγκαλεῖσθαι, RV ‘we are in danger to be accused’); 23^{6} ‘Of the hope and resurrection of the dead I am called in question’ (ἐγὼ κρίνομαι; so 24^{21}). See CALL in vol. i. p. 344^{a}, and cf. Winthrop, *Hist. of New Eng.* i. 172, ‘The governour wrote to some of the assistants about it, and, upon advice with the ministers, it was agreed to call them [the offenders] in question.’

Elsewhere the subst. ‘question’ is used either in the sense of discussion, dispute, or else the subject of discussion, matter of dispute. Thus (1) *Discussion, dispute* (Gr. always ζήτησις), Jn 3^{25} ‘Then there arose a question between some of John’s disciples and the Jews about purifying’; 2 Ti 2^{23} ‘Foolish and unlearned questions avoid.’ Cf. Ac 28^{29} Wyc., ‘Jewis wenten out fro him, havynge miche questioun, *or seking* (Purvey, *ethir* musyng) among hem silf.’ Also Shaks. *Henry V.* I. i. 5—

‘The scrambling and unquiet time
Did push it out of farther question.’

(2) *Subject of debate*, 1 K 10^{1} ‖ 2 Ch 9^{1} ‘She came to prove him with hard questions’ (בְּחִידוֹת, lit. ‘with riddles,’ see RIDDLE); 1 K 10^{3} ‖ 2 Ch 9^{2} ‘And Solomon told her all her questions’ (דְּבָרֶיהָ, lit. ‘her matters’); cf. Mk 11^{29} ‘I will also ask of you one question’ (ἕνα λόγον, AVm ‘one thing,’ RVm ‘*Gr.* word’). Elsewhere only ζήτημα and only in Acts, as Ac 23^{29} ‘Whom I perceived to be accused of questions of their law.’ Cf. Shaks. *Hamlet*, III. i. 56—

‘To be, or not to be: that is the question.’

The verb ‘to question’ occurs only in the phrase ‘question with one’ (once ‘question among themselves,’ Mk 1^{27}), which often meant to dispute, argue with, as Shaks. *Merch. of Venice*, IV. i. 70, ‘I pray you, think you question with the Jew’; but in AV it seems never to mean more than ‘inquire of.’ Thus Lk 23^{9} ‘Then he questioned with him in many words (ἐπηρώτα δὲ αὐτὸν ἐν λόγοις ἱκανοῖς), but he answered him nothing.’

J. HASTINGS.

QUICK, QUICKEN.—Although the adverb ‘quickly’ in the sense of *speedily* is of frequent occurrence in AV, neither ‘quick’ nor ‘quicken’ is ever found with that meaning.

In Is 11^{3} and some passages in the Apocr. the meaning of ‘quick’ is *acute* or *active*. Thus Is 11^{3} ‘And shall make him of quick understanding in the fear of the LORD’ (וַהֲרִיחוֹ, RV ‘His delight shall be in the fear of the Lord,’ RVm as AV, see esp. Delitzsch, *in loc.*); Wis 7^{22} ‘Wisdom . . . taught me . . . for in her is an understanding spirit . . . quick’ (ὀξύ, Vulg. *acutus*, RV ‘keen’); 8^{11} ‘I shall be found of a quick conceit in judgment’ (ὀξὺς ἐν κρίσει, Vulg. *acutus in judicio*). With these passages cf. Knox, *Hist.* 377, ‘Many wondered at the silence of John Knox, for in all these quick reasonings hee opened not his mouth’; Melvill, *Diary*, 77, ‘Efter ernest prayer, maters war gravlie and cleirlie proponit, overtures made be the wysest, douttes reasonit and discussit be the learnedest and maist quick.’ We still retain this sense slightly modified in ‘quick-witted,’ of which an example may be quoted from Tindale, *Pent.* Prologe to Lv (p. 297), ‘Allegoryes make a man qwick witted and prynte wysdome in him and maketh it to abyde, where bare wordes go but in at the one eare and out at the other.’ In Sir 31^{22} the meaning is rather *active* than acute, ‘In all thy works be quick’ (γίνου ἐντρεχής).

Elsewhere the meaning is *living*, mostly in direct opposition to *dead*, as Nu 16^{30} ‘If . . . they go down quick into the pit,’ compared with v.^{33} ‘They . . . went down alive into the pit’ (Heb. in both חַיִּים, AV follows Tindale, RV ‘alive’ in both); Ps 55^{15} ‘Let them go down quick into hell’ (RV ‘alive into the pit’); clearly in the phrase ‘the quick and the dead,’ Ac 10^{42}, 2 Ti 4^{1}, 1 P 4^{5}. Cf. Jn 7^{38} Wyc., ‘Flodis of quyke watir schulen flowe of his wombe’; Knox, *Works*, iii. 232, ‘Thair upon followit sa cruell persecutioun, under the name of justice, that na small noumber wer burnit quick’; Barlowe, *Dialogue*, 58, ‘It is enacted throughoute Suytzerland among the Oecolampadyanes, and in dyvers other places, that whosoever is founde of the Anabaptystes faction, he shall be throwen quycke into the water, and there drowned’; Tindale, *Expositions*, 189, ‘As there is no sin in Christ the stock, so can there be none in the quick members, that live and grow in him by faith’; Fuller, *Holy State*, 9, ‘He that impoverisheth his children to enrich his widow, destroyes a quick hedge to make a dead one.’

In He 4^{12}, though the same Gr. word (ζῶν) is used as in the passages quoted above, the meaning is more than merely living, rather *alive*, almost *lively*, ‘For the word of God is quick and powerful’ (Rhem. ‘lively and forcible’). And this is nearest of all to the derivation of the word, its base being the Teut. *kwika*, ‘lively,’ cognate with Lat. *vivus*. Cf. Milton, *Areopag.* (Hales’ ed. p. 7), ‘Against defaming it was decreed that none should be traduc’d by name . . . and this course was quick enough, as Cicero writes, to quell both the desperate wits of other Atheists, and the open way of defaming, as the event shew’d.’

To quicken is to *give life to*, whether physically or spiritually. In OT it is always the tr. of חִיָּה (Piel of חָיָה to live), which also means to preserve life, but when tr^{d} ‘quicken’ in AV always means to bless with spiritual life. In NT the Gr. is either ζωοποιέω or its compound συνζωοποιέω (Eph 2^{5}, Col 2^{13}, tr^{d} ‘quickened together with’). In Jn 5^{21} the physical and spiritual meanings are placed side by side, ‘For as the Father raiseth up the dead and quickeneth them; even so the Son quickeneth whom he will.’

J. HASTINGS.

QUICKSANDS (Ac 27^{17}, RV Syrtis).—The Syrtes, Major and Minor, are situated on the N. coast of Africa, in the wide bay between the headlands of Tunis and Barca. They consist of sandbanks occupying the shores of the Gulfs of Sidra on the coast of Tripoli, and that of Gabes on the coast of Tunis or Carthage. They have been considered a source of danger to mariners from very early times, not only from the shifting of the sands themselves, but owing to the cross currents of the adjoining waters. Thus in the *Æneid* of Virgil (iv. 40 f.) we find them referred to—

‘Hinc Gætûlæ urbes, genus insuperabile bello:
Et Numidæ infræni cingunt, et inhospita Syrtis.’

In the last voyage of St. Paul on his way to Italy the ship in which he and his companions were sailing was at the mercy of the tempest, and was drifting before the N.E. wind EURAQUILO, after leaving the shelter of the island of Cauda. There was every reason, therefore, to fear that they might be driven on the Syrtis, which was situated to the leeward of their course; but owing (it may be supposed) to the rotatory movement of the wind they were driven into the sea of Adria (Ac 27^{27}).*

E. HULL.

QUINTUS MEMMIUS.—See MEMMIUS (QUINTUS).

QUIRINIUS, CENSUS OF.—The statement of St. Luke (2^{1-3}) as to how the birth of Christ came to take place at Bethlehem rather than at Nazareth, has produced an amount of discussion of which the world is rather weary. We should have had less of this, if apologists had not been ready to admit, and opponents eager to maintain, that to prove that the evangelist has here made a misstatement, is to imperil, if not demolish, the authority of his Gospel as an inspired writing. Nothing of the kind is at stake. We have no right to assume that inspiration secures infallible chronology; and St. Luke bases his claim to be heard, not on inspiration, but on the excellence of his information and his own careful inquiry (Lk 1^{1-4}). Yet even well-informed and careful writers sometimes make mistakes, and he may have done so here.

There is no serious difficulty about the statement that Augustus ordered that there should be a general census throughout the Roman Empire (2^1). It is true that there is no direct evidence, independent of Luke, of any such decree; and we know that in some provinces no census was held during the reign of Augustus. Nevertheless there is evidence that periodic enrolments were made in Egypt (*Clas. Rev.* Mar. 1893); and a Roman census in Judæa at the time indicated, in consequence of general orders issued by Augustus, is not improbable (Suet. *Aug.* 28, 101, *Cal.* 16; Tac. *Ann.* i. 11. 5, 6; Plin. *Nat. Hist.* iii. 2. 17). The real difficulty is about the parenthetical remark in v.^{2}.

There has been much discussion about the text of v.^{2}, but the right reading is certainly *αὕτη ἀπογραφὴ πρώτη ἐγένετο ἡγεμονεύοντος τῆς Συρίας Κυρηνίου*: 'This took place as a first enrolment, when Quirinius was governor of Syria.'† And this remark is made in order to distinguish this census from the one in A.D. 6, 7, when Q. certainly *was* governor and conducted the census (Ac 5^{37}, Jos. *Ant.* XVIII. i. 1, ii. 1). But it is hard to see how Q. could be governor when Herod died in B.C. 4. From B.C. 9 to 6 Sentius Saturninus was governor;‡ from B.C. 6 to 4 Quinctilius Varus. After that nothing is clear till A.D. 6, when P. Sulpicius Quirinius succeeds and holds the census of Ac 5^{37}. Bergmann, Mommsen, Zumpt, and others have shown that this governorship of Q. was probably not his first, but that he was in office during part of the interval between B.C. 4 and A.D. 6, viz. B.C. 3, 2. But it still remains as incredible as ever it was that Q. was governor *before the death of Herod*; and until that is established we must admit that Luke is at least a year wrong in his chronology. Even Zahn, who denies the *later* governorship of Q., and asserts that only one census was taken, viz. in B.C. 4 to 2 (to which he refers both Lk 2^2 and Ac 5^{37}), is obliged to place the census after Herod's death. No help on this point is obtained from the oft-quoted testimony of Justin Martyr, who in three passages places the birth of Christ *ἐπὶ Κυρηνίου*, and in one of them says that the birth at Bethlehem may be learned *ἐκ τῶν ἀπογραφῶν τῶν γενομένων ἐπὶ Κυρηνίου τοῦ ὑμετέρου ἐν Ἰουδαίᾳ πρώτου γενομένου ἐπιτρόπου* (*Apol.* i. 34, 46; *Dial.* 78). But it should be noted that Justin calls Q. *ἐπίτροπος*, *procurator*, not *legatus*, as he was in A.D. 6. The word which Luke uses is indefinite (*ἡγεμονεύω*), and might be employed of any kind of ruler; but in the only other place in which he uses it (3^1) it is of the *procurator* Pontius Pilate. Until Judæa became a Roman province in A.D. 6 there would be no *procurator* in the strict sense; but Q. may have had some military position in Syria even before the death of Herod, and also have been concerned with the census. And this is perhaps Luke's meaning; he may not be giving a mere date. In any case Christians who were inventing an explanation of the birth at Bethlehem would not be likely to attribute it to Roman and heathen causes. The error, if there be one, has probably foundation in fact; and, moreover, is not the result of confusion with the later census A.D. 6, 7, which Luke himself notices Ac 5^{37}.

The general result is that if a mistake has not been proved, neither has it been disproved. If the accuracy of Luke in many other details were not so conspicuous, one would say that there probably is some mistake. But the error would not be great, if Q. held some office in Syria B.C. 3, 2, and helped to complete a census which was begun before the death of Herod. And there is no error, if Christ's birth is to be placed B.C. 6 (vol. i. p. 405), and Q. was in command in Syria then, which would be the right time for the first of a series of enrolments, of which that in Ac 5^{37} was the second.*

LITERATURE.—See the commentaries of Farrar and Godet; the *Lives of Christ* by Andrews, Didon, Edersheim, Keim, and B. Weiss; the articles 'Cyrenius' in Smith, *DB*^{2}, and 'Schätzung' in Herzog; the monographs of Zumpt on 'Das Geburtsjahr Christi,' 1869 (*Bibl. Sacra*, 1870), and of Zahn, 'Die Syr. Statthalterschaft und d. Schätzung des Quirinius,' in *Neue Kirchl. Ztsft.* 1893; and above all, Schürer, *HJP* I. ii. 105 ff., and Ramsay, *Was Christ born at Bethlehem?* 1898.
